Department 391 RULES OF GEORGIA DEPARTMENT OF NATURAL RESOURCES

Current through Rules and Regulations filed through November 2, 2022

Table of Contents

ADMINISTRATIVE HISTORY

Chapter 391-1. ADMINISTRATION.

Subject 391-1-1. ORGANIZATION AND PUBLIC PARTICIPATION.

Rule 391-1-1-.01. Organization.

Rule 391-1-1-.02. Repealed.

Rule 391-1-1-.03. Powers, Duties, Titles, Qualifications, Appointments and Other Matters Pertaining to the Department's Unit of Peace Officers.

Rule 391-1-1-.04. Method of Obtaining Information from, Making Submissions to or Requests of the Department.

Rule 391-1-1-.05. Procedure to Petition for Adoption of Rules.

Rule 391-1-1-.06. Procedure for Declaratory Rulings.

Rule 391-1-1-.07. Repeal of Asbestos Licensing Board Rules.

Subject 391-1-2. PROCEDURES FOR DISPOSITION OF CONTESTED CASES.

Rule 391-1-2-.01. Definitions.

Rule 391-1-2-.02. Applicability and Scope of These Rules.

Rule 391-1-2-.03. Petitions for Hearing; Time for Filing of Same.

Rule 391-1-2-.04. Filing of Petitions for Hearing.

Rule 391-1-2-.05. Content of Petitions for Hearing.

Rule 391-1-2-.06. Referral of Petitions for Hearing to Office of State Administrative Hearings.

Rule 391-1-2-.07. Stay Pending Final Action.

[Rule 391-1-2-.08. Final Decision.](#)

[Rule 391-1-2-.09. Criteria for Review and for Determining Civil Penalties.](#)

[Rule 391-1-2-.10. Repealed.](#)

[Rule 391-1-2-.11. Repealed.](#)

[Rule 391-1-2-.12. Repealed.](#)

Rule 391-1-4-.57. [Repealed].

Rule 391-1-4-.58. [Repealed].

Rule 391-1-4-.59 through 391-1-4-.69. Repealed (Previously Reserved).

Subject 391-1-5. [Repealed].

Rule 391-1-5-.01. [Repealed].

Rule 391-1-5-.02. [Repealed].

Rule 391-1-5-.03. [Repealed].

Rule 391-1-5-.04. [Repealed].

Rule 391-1-5-.05. [Repealed].

Rule 391-1-5-.06. [Repealed].

Rule 391-1-5-.07. [Repealed].

Subject 391-1-6. GEORGIA CONSERVATION TAX CREDIT PROGRAM.

Rule 391-1-6-.01. Purpose and Scope.

Rule 391-1-6-.02. The Name of the Program.

Rule 391-1-6-.03. Definitions.

Rule 391-1-6-.04. Application for Pre-certification and Certification.

Rule 391-1-6-.05. Monitoring and Reporting Requirements.

Subject 391-1-7. REFUND OF FEES.

Rule 391-1-7-.01. Refund of Fees.

Subject 391-1-8. PROCEDURES FOR CHANGE OF USE OR CONVEYANCE OF HERITAGE PRESERVES.

Rule 391-1-8-.01. Definitions.

Rule 391-1-8-.02. Applicability and Scope of these Rules.

Rule 391-1-8-.03. Petitions to Request a Change of Use.

Rule 391-1-8-.04. Filing Petitions to Request a Change of Use.

Rule 391-1-8-.05. Content of Petitions to Request a Change of Use.

Rule 391-1-8-.06. Processing of Change of Use Petitions.

Rule 391-1-8-.07. Conveyance of Heritage Preserves to Local Governments.

Subject 391-1-9. NONDISCRIMINATION IN THE PROVISION OF PUBLIC SERVICES.

Rule 391-1-9-.01. Notice of Nondiscrimination.

Rule 391-1-9-.02. Accommodating Persons with Limited English Proficiency.

Rule 391-1-9-.03. Americans with Disabilities Act ("ADA").

Subject 391-1-10. SOCIAL MEDIA.

Rule 391-1-10-.01. Moderation of Comments on the Department's Social Media Accounts.

Chapter 391-2. COASTAL RESOURCES.

Subject 391-2-1. REPEALED.

Rule 391-2-1-.01. Repealed.

Rule 391-2-1-.02. Repealed.

Rule 391-2-1-.03. Repealed.

Rule 391-2-1-.04. Repealed.

Rule 391-2-1-.05. Repealed.

Rule 391-2-1-.06. Repealed.

Rule 391-2-1-.07. Repealed.

Rule 391-2-1-.08. Repealed.

Subject 391-2-2. SHORE PROTECTION.

Rule 391-2-2-.01. Committee Meetings.

Rule 391-2-2-.02. Hurricane-Resistant Construction Standards.

Rule 391-2-2-.03. Beach Driving Authorizations.

Rule 391-2-2-.04. Repealed.

Rule 391-2-2-.05. Repealed.

Rule 391-2-2-.06. Repealed.

Rule 391-2-2-.07. Repealed.

Rule 391-2-2-.08. Repealed.

Rule 391-2-2-.09. Repealed.

Rule 391-2-2-.10. Repealed.

Rule 391-2-2-.11. Repealed.

Subject 391-2-3. COASTAL MARSHLANDS PROTECTION.

Rule 391-2-3-.01. Committee Meetings.

Rule 391-2-3-.02. Regulation of Upland Component of a Project.

Rule 391-2-3-.03. Regulation of Marinas, Community Docks and Commercial Docks.

Rule 391-2-3-.04. Annual Leave Rate Adjustment.

Rule 391-2-3-.05. Extension of Live-Aboard Privileges.

Subject 391-2-4. SALTWATER FISHING REGULATIONS.

Rule 391-2-4-.01. Eel Fishing.

Rule 391-2-4-.02. Shad Fishing.

Rule 391-2-4-.03. Sound/Beach Boundaries.

Rule 391-2-4-.04. Saltwater Finfishing.

[Rule 391-2-4-.05. Shrimp Trawl Gear Specifications. Requirement for Use of Turtle Excluder Devices.](#)

[Rule 391-2-4-.06. Recreational Fishing for Shrimp.](#)

[Rule 391-2-4-.07. Crabbing.](#)

[Rule 391-2-4-.08. Bycatch Reduction Specifications. Requirement for use of Bycatch Reduction Devices.](#)

[Rule 391-2-4-.09. Commercial Fishing. Requirements for Keeping and Reporting Records.](#)

[Rule 391-2-4-.10. License Lotteries.](#)

[Rule 391-2-4-.11. Bait Minnow Trapping.](#)

[Rule 391-2-4-.12. Lawful Fishing Methods and Gear, Generally.](#)

[Rule 391-2-4-.13. Commercial Fishing for Catfish in Saltwater.](#)

[Rule 391-2-4-.14. Shrimp Bait Dealers.](#)

[Rule 391-2-4-.15. Protections for horseshoe crabs; catch limits; exceptions.](#)

[Rule 391-2-4-.16. Saltwater Fishing Guide and Saltwater Fishing Pier Operator Reporting.](#)

[Rule 391-2-4-.17. Commercial Fishing Species Endorsements.](#)

[Rule 391-2-4-.18. Shellfish sanitation; seed importation; water bottoms lease terms.](#)

[Rule 391-2-4-.19 thru 391-2-4-.98. Reserved.](#)

[Rule 391-2-4-.99. Repealer.](#)

[Subject 391-2-5. COASTAL INCENTIVE GRANT PROGRAM DESCRIPTION.](#)

[Rule 391-2-5-.01. Coastal Incentive Grant Program, Match, Term and Reimbursement.](#)

[Rule 391-2-5-.02. Mission Statement.](#)

[Rule 391-2-5-.03. Terminated.](#)

[Rule 391-2-5-.04. Eligibility and Contract Requirements.](#)

[Rule 391-2-5-.05. Awards.](#)

[Rule 391-2-5-.06. Funding Themes.](#)

[Rule 391-2-5-.07. Terminated.](#)

[Rule 391-2-5-.08. Construction/Acquisition Projects and Terms.](#)

[Rule 391-2-5-.09. Terminated.](#)

[Rule 391-2-5-.10. Budget, Match Requirements and Indirect Costs.](#)

[Rule 391-2-5-.11. Terminated.](#)

[Rule 391-2-5-.12. RFP Application Submittal.](#)

[Rule 391-2-5-.13. Application Review Process.](#)

[Rule 391-2-5-.14. Terminated.](#)

[Rule 391-2-5-.15. Timeline.](#)

[Rule 391-2-5-.16. Contact Information.](#)

[Rule 391-2-5-.17. Non-Research Project Evaluation Criteria.](#)

Rule 391-2-5-.18. Research Project Evaluation Criteria.

Subject 391-2-6. CLEAN VESSEL ACT GRANT PROGRAM DESCRIPTION.

Rule 391-2-6-.01. Clean Vessel Act Grant Program.

Subject 391-2-7. BOATING INFRASTRUCTURE GRANT PROGRAM DESCRIPTION.

Rule 391-2-7-.01. Boating Infrastructure Grant Program.

Chapter 391-3. ENVIRONMENTAL PROTECTION.

Subject 391-3-1. AIR QUALITY CONTROL.

Rule 391-3-1-.01. Definitions. Amended.

Rule 391-3-1-.02. Provisions. Amended.

Rule 391-3-1-.03. Permits. Amended.

Rule 391-3-1-.04. Air Pollution Episodes.

Rule 391-3-1-.05. Repealed.

Rule 391-3-1-.06. Repealed.

Rule 391-3-1-.07. Inspections and Investigations.

Rule 391-3-1-.08. Confidentiality of Information.

Rule 391-3-1-.09. Enforcement.

Rule 391-3-1-.10. Continuance of Prior Rules.

Rule 391-3-1-.11. Small Business Stationary Source Technical and Environmental Compliance Assistance Program Administration.

Rule 391-3-1-.12. Duties of the Small Business Stationary Source Technical and Environmental Compliance Assistance Program.

Rule 391-3-1-.13. Acid Rain.

Rule 391-3-1-.14. General Conformity.

Rule 391-3-1-.15. Transportation Conformity.

Subject 391-3-2. GROUNDWATER USE.

Rule 391-3-2-.01. Purpose.

Rule 391-3-2-.02. Definitions.

Rule 391-3-2-.03. Permit Required.

Rule 391-3-2-.04. Permit Application. Amended.

Rule 391-3-2-.05. Division Consideration of Permit Applications, Modifications, Revocations and Denials.

Rule 391-3-2-.06. Granting of a Permit to Use Ground Water.

Rule 391-3-2-.07. Duration of Permit and Renewal.

Rule 391-3-2-.08. Submission of Ground Water Use Report.

Rule 391-3-2-.09. Dewatering Wells.

Rule 391-3-2-.10. Salt Water Encroachment or Deterioration of Water Quality.

Rule 391-3-2-.11. Unreasonable Adverse Effects on Ground Water Withdrawal.

Rule 391-3-2-.12. Geologic and Hydrologic Information.

[Rule 391-3-2-.13. Test Wells.](#)

[Rule 391-3-2-.14. Abandoned Wells.](#)

[Rule 391-3-2-.15. Enforcement.](#)

[Rule 391-3-2-.16. Permitting Based on Regional Water Development and Conservation Plans.](#)

[Subject 391-3-3. SURFACE MINING.](#)

[Rule 391-3-3-.01. Authority and Administration.](#)

[Rule 391-3-3-.02. Permits.](#)

[Rule 391-3-3-.03. Bonding.](#)

[Rule 391-3-3-.04. Substitution of Previously Mined Site.](#)

[Rule 391-3-3-.05. Mining Land Use Plan.](#)

[Rule 391-3-3-.06. Final Acceptable Reclamation.](#)

[Rule 391-3-3-.07. Maps and Aerial Photographs.](#)

[Rule 391-3-3-.08. Protection of the Public Interest.](#)

[Rule 391-3-3-.09. Protection of the Environment and Contiguous Natural and Other Resources.](#)

[Rule 391-3-3-.10. Confidentiality of Information.](#)

[Rule 391-3-3-.11. Repealed.](#)

[Subject 391-3-4. SOLID WASTE MANAGEMENT.](#)

[Rule 391-3-4-.01. Definitions.](#)

[Rule 391-3-4-.02. Solid Waste Handling Permits.](#)

[Rule 391-3-4-.03. Public Participation.](#)

[Rule 391-3-4-.04. General. Amended.](#)

[Rule 391-3-4-.05. Criteria for Siting.](#)

[Rule 391-3-4-.06. Permit by Rule for Collection, Transportation, Processing, and Disposal.](#)

[Rule 391-3-4-.07. Landfill Design and Operations.](#)

[Rule 391-3-4-.08. Solid Waste Thermal Treatment Operations.](#)

[Rule 391-3-4-.09. Shredding, Baling, Materials Recovery Facilities, and Other Processing Operations.](#)

[Rule 391-3-4-.10. Coal Combustion Residuals.](#)

[Rule 391-3-4-.11. Closure Criteria.](#)

[Rule 391-3-4-.12. Post-Closure Care.](#)

[Rule 391-3-4-.13. Financial Responsibility.](#)

[Rule 391-3-4-.14. Groundwater Monitoring and Corrective Action.](#)

[Rule 391-3-4-.15. Biomedical Waste.](#)

[Rule 391-3-4-.16. Composting and Anaerobic Digestion Facilities.](#)

[Rule 391-3-4-.17. Measuring and Reporting Requirements.](#)

[Rule 391-3-4-.18. Operator Certification.](#)

Rule 391-3-4-.19. Scrap and Used Tire Management.

Rule 391-3-4-.20. Enforcement.

Subject 391-3-5. RULES FOR SAFE DRINKING WATER.

Rule 391-3-5-.01. Purpose.

Rule 391-3-5-.02. Definitions.

Rule 391-3-5-.03. Coverage.

Rule 391-3-5-.04. Approval Required. Amended.

Rule 391-3-5-.05. Preparation and Submission of Engineering Reports, Plans and Specifications for Public Water Systems.

Rule 391-3-5-.06. Source of Water Supply.

Rule 391-3-5-.07. Wells.

Rule 391-3-5-.08. Springs.

Rule 391-3-5-.09. Water Treatment Facilities.

Rule 391-3-5-.10. Distribution System.

Rule 391-3-5-.11. Storage Tanks.

Rule 391-3-5-.12. Disinfection.

Rule 391-3-5-.13. Cross Connections.

Rule 391-3-5-.14. Operation.

Rule 391-3-5-.15. Record Maintenance.

Rule 391-3-5-.16. Fluoridation.

Rule 391-3-5-.17. Permit to Operate a Public Water System.

Rule 391-3-5-.18. Primary Maximum Contaminant Levels for Drinking Water.

Rule 391-3-5-.19. Secondary Maximum Contaminant Levels for Drinking Water.

Rule 391-3-5-.20. Turbidity Sampling and Analytical Requirements.

Rule 391-3-5-.21. Inorganic Chemical Sampling and Analytical Requirements.

Rule 391-3-5-.22. Organic Chemical Sampling and Analytical Requirements.

Rule 391-3-5-.23. Coliform Sampling.

Rule 391-3-5-.24. Disinfectant Residuals, Disinfection Byproducts, and Disinfection Byproduct Precursors Sampling, Analytical and Other Requirements.

Rule 391-3-5-.25. Treatment Techniques, Lead and Copper Requirements.

Rule 391-3-5-.26. Unregulated Contaminants Sampling and Analytical Requirements.

Rule 391-3-5-.27. Monitoring Frequency and Analytical Methods for Radioactivity in Community Water Systems.

Rule 391-3-5-.28. Alternative Analytical Techniques.

Rule 391-3-5-.29. Certified Laboratories.

Rule 391-3-5-.30. Reporting Requirements.

Rule 391-3-5-.31. Monitoring of Consecutive Public Water Systems.

Rule 391-3-5-.32. Public Notification.

Rule 391-3-5-.33. Variances and Exemptions.

ADMINISTRATIVE HISTORY

Administrative History following each Rule gives the date on which the Rule was originally filed and its effective date, as well as the date on which any amendment or repeal was filed and its effective date. Principal abbreviations used in the Administrative History are as follows:

f. - filed

eff. - effective

R. - Rule (Abbreviated only at the beginning of the control number)

Ch. - Chapter (Abbreviated only at the beginning of the control number)

ER. - Emergency Rule

Rev. - Revised

Note: Emergency Rules are listed in each Rule's Administrative History by Emergency Rule number, date filed and effective date. The Emergency Rule will be in effect for 120 days or until the effective date of a permanent Rule covering the same subject matter superseding this Emergency Rule is adopted, as specified by the Agency.

Chapter 391-1-1 entitled "Solid Waste Management" has been adopted. Filed November 21, 1972; effective December 12, 1972, as specified by Rule [391-1-1-07](#).

Chapter 391-1-1 has been repealed. Chapters 391-3-1 entitled "Air Quality Control", 391-3-3 entitled "Land Reclamation", 391-3-4 entitled "Solid Waste Management" have been adopted. Filed September 6, 1973; effective September 26, 1973.

Chapter 391-3-3, entitled "Land Reclamation," containing Rules [391-3-3-01](#) through [391-3-3-11](#), has been adopted. Filed September 6, 1973; effective September 26, 1973.

Chapter 391-3-5, entitled "Water Supply Quality Control," containing Rules [391-3-5-01](#) through [391-3-5-20](#), has been adopted. Filed September 6, 1973; effective September 26, 1973. (**This Chapter was not printed at the request of the Agency.**)

Chapter 391-4-2, entitled "Hunting Regulations," containing Rules [391-4-2-04](#) through [391-4-2-49](#) and 391-4-2-.101 through 391-4-2-.149, has been adopted. Filed October 19, 1973; effective November 8, 1973. (Rules [391-4-2-50](#) through 391-4-2-.100 are reserved.)

Rules [391-4-2-50](#) through [391-4-2-58](#) have been adopted. Filed November 14, 1973; effective December 4, 1973.

Rule [391-4-2-.49](#) has been repealed and a new Rule [391-4-2-.49](#) adopted. Filed January 21, 1974; effective February 10, 1974.

Chapter 391-4-3, entitled "Fishing Regulations" containing Rules [391-4-3-.01](#) through [391-4-3-.27](#), has been adopted. Filed April 11, 1974; effective May 1, 1974.

Chapter 391-3-2, entitled "Groundwater Use," containing Rules [391-3-2-.01](#) through [391-3-2-.15](#), has been adopted. Filed May 13, 1974; effective June 3, 1974, as specified by the Agency.

Chapter 391-3-6, entitled "Water Quality Control," containing Rules [391-3-6-.01](#) through [391-3-6-.06](#) has been adopted. Filed June 10, 1974; effective June 30, 1974.

Rule [391-3-1-.02](#) has been amended. Filed July 16, 1974; effective August 5, 1974.

Chapter 391-4-2, entitled "Hunting Regulations," containing Rules [391-4-2-.01](#) through [391-4-2-.58](#) and 391-4-2.101 through 391-4-2-.149, has been repealed and a new Chapter 391-4-2, of the same title, containing Rules [391-4-2-.01](#) through [391-4-2-.46](#), and 391-4-2-.101 through 391-4-2-.154, adopted. Filed July 22, 1974; effective August 11, 1974. (Rules 391-4-2-.47 through 391-4-2-.100 are reserved.)

Chapter 391-3-4, entitled "Solid Waste Management," has been repealed and a new Chapter 391-3-4, of the same title, containing Rules [391-3-4-.01](#) through [391-3-4-.10](#), adopted. Filed September 19, 1974; effective October 9, 1974.

Rules [391-4-2-.47](#) through [391-4-2-.58](#) have been adopted. Filed October 15, 1974; effective November 4, 1974.

Chapter 391-3-3, entitled "Land Reclamation," has been repealed and a new Chapter 391-3-3, of the same title, containing Rules [391-3-3-.01](#) through [391-3-3-.10](#), adopted. Filed October 23, 1974; effective November 12, 1974.

Chapter 391-4-12, entitled "Coastal Marshlands Protection," containing Rules [391-4-12-.01](#) through [391-4-12-.05](#), has been adopted. Filed January 15, 1975; effective February 4, 1975.

Rules [391-4-2-.59](#) through [391-4-2-.63](#) have been adopted. Filed March 14, 1975; effective April 3, 1975.

Paragraphs: (4) of Rule 391-4-2-.114,(2) of Rule 391-4-2-.117,(5) of Rule 391-4-2-.120,(2) of Rule 391-4-2-.121,and(4) of Rule 391-4-2-.128 have been repealed and new paragraphs of the same numbers adopted. Filed March 14, 1975; effective April 3, 1975.

Rule 391-4-2-.118 has been amended by the repeal of paragraphs (3) and (4) and by the adoption of new paragraphs (3), (4), and (5). Filed March 14, 1975; effective April 3, 1975.

Rule 391-4-2-.136 has been amended by the repeal of paragraphs (4) and (5) and by the adoption of new paragraphs (4), (5), and (6). Filed March 14, 1975; effective April 3, 1975.

Rule 391-4-2-.137 has been amended by the repeal of paragraph (3) and by the adoption of new paragraphs (3) and (4). Filed March 14, 1975; effective April 3, 1975.

Rule 391-4-2-.138 has been amended by the repeal of paragraph (4) and by the adoption of new paragraphs (4) and (5). Filed March 14, 1975; effective April 3, 1975.

Rule 391-4-2-.151 has been amended by the repeal of paragraph (4) and by the adoption of new paragraphs (4) and (5). Filed March 14, 1975; effective April 3, 1975.

Rule 391-4-2-.152 has been amended by the repeal of paragraph (4) and by the adoption of new paragraphs (4) and (5). Filed March 14, 1975; effective April 3, 1975.

Chapter 391-4-3 has been repealed and a new Chapter 391-4-3, of the same title, containing Rules [391-4-3-.01](#) through [391-4-3-.28](#), adopted. Filed April 15, 1975; effective May 5, 1975.

Sub-paragraph (2)(m) of Rule [391-3-1-.02](#) has been repealed. Filed June 30, 1975; effective July 20, 1975.

Rule [391-3-1-.03](#) has been amended by the repeal of sub-paragraph (2)(e) and paragraph (3) and by the adoption of a new sub-paragraph (2)(e) and a new paragraph (3). Filed June 30, 1975; effective July 20, 1975.

Chapter 391-4-5 (Boating Regulations), containing Rules [391-4-5-.01](#) through [391-4-5-.06](#), was received in the Office of Secretary of State on July 11, 1975, in accordance with Section 22 of the Georgia Boat Safety Act of 1973, Ga. Laws 1973, p. 1443.

Rule [391-3-1-.01](#) has been amended by the repeal of paragraphs (d), (p), and (x) and by the adoption of new paragraphs (d), (p), and (x); said Rule has also been further amended by the addition of new paragraphs (ff), (gg), and (hh). Filed October 31, 1975; effective November 20, 1975.

Rule [391-3-1-.02](#) has been amended by: the repeal of paragraph (1) and adoption of a new paragraph (1); the addition of a new sub-paragraph (2)(a)3.; the repeal of sub-paragraph (2)(b)2. and adoption of a new sub-paragraph (2)(b)2; the repeal of sub-paragraph (2)(c) and adoption of a new sub-paragraph (2)(c); the repeal of sub-paragraph (2)(e)1. exclusive of sub-paragraphs (i) and (ii) and adoption of a new sub-paragraph (2)(e)1.; the repeal of sub-paragraph (2)(f) and adoption of a new sub-paragraph (2)(f); the repeal of sub-paragraph (2)(g)1. and adoption of a new sub-paragraph (2)(g)1.; the repeal of sub-paragraph (2)(l)1.(i) and adoption of a new sub-paragraph (2)(p)1.(ii) and adoption of a new sub-paragraph (2)(p)1.(ii); the repeal of sub-paragraph (3)(a) and adoption of a new sub-paragraph (3)(a); the repeal of sub-paragraphs (4)(d), (4)(e), and (4)(g) and adoption of a new sub-paragraphs (4)(d), (4)(e), and (4)(g); the repeal of paragraph (5) and adoption of a new sub-paragraph (5); and by the repeal of sub-paragraph (6)(a) and adoption of a new sub-paragraph (6)(a). Filed October 31, 1975; effective November 20, 1975.

Rule [391-3-1-.06](#) has been repealed. Filed October 31, 1975; effective November 20, 1975.

Rules [391-3-1-.03](#), [.04](#), [.07](#), [.08](#), and [.09](#) have been repealed and new Rules of the same numbers adopted. Filed October 31, 1975; effective November 20, 1975.

Chapter 391-4-2, containing Rules [391-4-2-.01](#) through [391-4-2-.63](#) and 391-4-2-.101 through 391-4-2-.154 has been repealed and new Chapter 391-4-2, of the same title, containing Rules [391-4-2-.01](#) through [391-4-2-.46](#) and 391-4-2-.101 through 391-4-2-.155, adopted. Filed December 9, 1975; effective December 29, 1975. (Rules [391-4-2-.47](#) through 391-4-2-.100 are reserved.)

Rule [391-4-3-.22](#) has been repealed and a new Rule [391-4-3-.22](#) adopted. Filed December 9, 1975; effective December 29, 1975.

Chapter 391-4-8, entitled "Saltwater Fishing Regulations," containing Rules 391-4-8-.02 and 391-4-8-.07, was filed on December 9, 1975; December 29, 1975. Rules 391-4-8-.01 and 391-4-8-.03 through 391-4-8-.06 are reserved. (At the request of the Agency, publication of this Chapter is being withheld because adoption of a new Chapter 391-4-8 is anticipated.)

Chapter 391-4-9, entitled "General Regulations," containing Rule [391-4-9-.01](#), has been adopted. Filed December 9, 1975; effective December 29, 1975.

Rules [391-4-2-.47](#) through [391-4-2-.59](#) have been adopted. Filed December 10, 1975; effective December 30, 1975.

Chapter 391-4-3 has been repealed and a new Chapter 391-4-3, of the same title, containing Rules [391-4-3-.01](#) through [391-4-3-.11](#), [391-4-3-.50](#) through [391-4-3-.65](#) and 391-4-3-.151, adopted. Filed March 2, 1976; effective March 22, 1976. (Rules [391-4-3-.12](#) through [391-4-3-.49](#) and 391-4-3.66 through [391-4-3-.150](#) are reserved.)

Rules [391-4-2-.39](#), [391-4-2-.41](#), and [391-4-2-.44](#) have been repealed and new Rules of the same numbers adopted. Filed March 29, 1976; effective April 18, 1976.

Rule 391-4-2-.156 has been adopted. Filed March 29, 1976; effective April 18, 1976.

Sub-paragraphs (1)(a) and (1)(g) of Rule [391-4-3-.63](#) have been amended. Filed April 5, 1976; effective April 25, 1976.

Rule [391-4-3-.65](#) has been amended by the adoption of paragraph (4). Filed June 10, 1976; effective June 30, 1976.

Chapter 391-3-3 has been repealed and a new Chapter 391-3-3, of the same title, containing Rules [391-3-3-.01](#) through [391-3-3-.09](#), adopted. Filed July 19, 1976; effective August 8, 1976.

Chapter 391-4-2, containing Rules [391-4-2-.01](#) through [391-4-2-.59](#) and 391-4-2-.101 through 391-4-2-.156, has been repealed and a new Chapter 391-4-2, of the same title, containing Rules [391-4-2-.01](#) through [391-4-2-.27](#), [391-4-2-.29](#) through [391-4-2-.46](#) and 391-4-2-.101 through

391-4-2-.158, adopted. Filed August 5, 1976; effective August 25, 1976. (Rules [391-4-2-.28](#) and [391-4-2-.47](#) through 391-4-2-.100 are reserved.)

Chapter 391-4-13, entitled "Protection of Endangered, Threatened, Rare, or Unusual Species," containing Rules [391-4-13-.01](#) through 391-4-13-.09, has been adopted. Filed August 5, 1976; effective August 25, 1976.

Rules [391-4-2-.47](#) through [391-4-2-.51](#) have been adopted. Filed August 24, 1976; effective September 13, 1976.

Emergency Rule [391-4-2-.66](#) "Emergency Closing of the Coosa River and Other Rivers" was filed on September 8, 1976. By an opinion of the Attorney General to the Department of Natural Resources, said Emergency Rule became effective on September 7, 1976, the date of adoption; said Emergency Rule is to remain in effect for a period of 120 days, or until the adoption of a permanent Rule covering the same subject matter superseding this Emergency Rule, as specified by the Agency. In accordance with the Authority granted in said Emergency Rule, the Commissioner of the Department of Natural Resources issued an Administrative Order declaring that certain portions of the Etowah and Oostanaula Rivers are closed to commercial fishing, effective September 13, 1976. (Said emergency Rule and said Administrative Order will not be printed. Copies may be obtained at the Department of Natural Resources.)

Rule [391-4-2-.28](#) has been adopted. Filed September 14, 1976; effective October 4, 1976.

Chapter 391-4-5, entitled "Boating Regulations," received in the Office of Secretary of State on July 11, 1975, has been repealed and a new Chapter 391-4-5, of the same title, containing Rules [391-4-5-.01](#) through [391-4-5-.09](#) adopted. Filed October 6, 1976; effective October 26, 1976.

Rules [391-4-2-.52](#) through [391-4-2-.60](#) have been adopted. Filed October 26, 1976; effective November 15, 1976.

Rule [391-4-2-.201](#) has been adopted. Filed October 26, 1976; effective November 15, 1976. (Rules 391-4-2-.159 through 391-4-2-.200 are reserved.)

Rule 391-4-2-.158 has been amended. Filed November 5, 1976; effective November 25, 1976.

Rule [391-4-3-.12](#) has been adopted. Filed February 28, 1977; effective March 20, 1977. (This Rule will not be printed at the request of the Department of Natural Resources since the adoption of a new Chapter 391-4-3 is contemplated the latter part of March, 1977; copies may be obtained from the Agency.)

Rules [391-4-2-.61](#) and [391-4-2-.62](#) have been adopted. Filed March 14, 1977; effective April 3, 1977. (These Rules will not be printed at the request of the Department of Natural Resources since the adoption of a new Chapter 391-4-2 is contemplated in April 1977; copies may be obtained from the Agency.)

Rule 391-4-2-.101 has been amended by the adoption of paragraph (24). Filed March 14, 1977; effective April 3, 1977. (This Rule will not be printed at the request of the Department of Natural Resources since the adoption of a new Chapter 391-4-2 is contemplated in April, 1977; copies may be obtained from the Agency.)

Rules 391-4-2-.111, 391-4-2-.112, 391-4-2-.114, 391-4-2-.117, 391-4-2-.118, 391-4-2-.121, 391-4-2-.122, 391-4-2-.133, 391-4-2-.134, 391-4-2-.141, 391-4-2-.142, 391-4-2-.156, and 391-4-2-.157 have been amended. Filed March 14, 1977; effective April 3, 1977. (These Rules will not be printed at the request of the Department of Natural Resources since the adoption of a new Chapter 391-4-2 is contemplated in April, 1977; copies may be obtained from the Agency.)

Chapter 391-3-7, entitled "Erosion and Sedimentation Control," containing Rules [391-3-7-.01](#) through [391-3-7-.09](#), has been adopted. Filed April 6, 1977; effective April 26, 1977.

Chapter 391-4-3, containing Rules [391-4-3-.01](#) through [391-4-3-.11](#), [391-4-3-.50](#) through [391-4-3-.65](#), and [391-4-3-.151](#) has been repealed and a new Chapter 391-4-3, of the same title, containing Rules [391-4-3-.01](#) through [391-4-3-.11](#), and [391-4-3-.100](#), has been adopted. (Rules [391-4-3-.12](#) through [391-4-3-.99](#) are reserved.) Filed April 6, 1977; effective April 26, 1977.

Rules 391-4-13-.09 has been amended by the adoption of sub-paragraphs (1)(f), (2)(f), (2)(g), and (4)(h). Filed May 11, 1977; effective May 31, 1977.

Emergency Rule 391-4-8-0.2 "Emergency Closing of Salt Waters to Fishing with Power Drawn Nets" was filed on May 17, 1977, having become effective May 13, 1977, the date promulgated and adopted to remain in effect for a period of 120 days or until the adoption of a permanent Rule superseding this Emergency Rule, as specified by the Agency. (Said Emergency Rule will not be published; copies may be obtained from the Agency.)

Emergency Rule 391-4-8-0.3 "Emergency Closing of Salt Waters to Fishing with Seines and Nets of Certain Sizes" was filed on June 20, 1977, having become effective on May 26, 1977, the date promulgated and adopted, to remain in effect for a period of 120 days or until the adoption of a permanent Rule superseding this Emergency Rule, as specified by the Agency.

Emergency Rule 391-4-8-0.4 "Emergency Authorization to Open, Under Certain Conditions, Tidal Rivers and Creeks or Portions Thereof to Fishing for Shrimp for Bait" was filed on July 1, 1977, having become effective June 24, 1977, to remain in effect for 120 days or until the adoption of a permanent Rule superseding this Emergency Rule, as specified by the Agency.

Under the Authority granted in Emergency Rules 391-4-8-0.2 and 391-4-8-0.4, effective May 13, 1977 and June 24, 1977, respectively, the Commissioner of the Department of Natural Resources issued an Administrative Order on July 1, 1977, declaring: "1. Effective 7 a.m. E.D.T. on Wednesday July 6, 1977 all salt waters outside, on the seaward side of the sounds, shall be open to commercial fishing with power-drawn nets. 2. Effective 7 a.m. E.D.T. on Wednesday July 6, 1977 the hatched areas on the seven maps attached hereto as Exhibit A shall be open to commercial fishing with power-drawn nets for shrimp for bait from 7 a.m. E.D.T. to 7 p.m. E.D.T. daily. Provided, however, persons so taking shrimp shall be limited to no more than thirty

(30) quarts of shrimp on board their boat at any one time." Said Administrative Order was filed in the Office of Secretary of State on July 12, 1977.

460 Georgia Department of State Parks, containing Chapters 460-1 through 460-7, has been repealed in its entirety. Filed June 30, 1977; effective July 20, 1977.

Chapter 391-5-1, entitled "Purpose of the State Parks and Historic Sites System," containing Rule [391-5-1-.01](#), has been adopted. Filed June 30, 1977; effective July 20, 1977.

Chapter 391-5-2, entitled "Definitions," containing Rule [391-5-2-.01](#), has been adopted. Filed June 30, 1977; effective July 20, 1977.

Chapter 391-5-3, entitled "Site Occupancy and Use," containing Rules [391-5-3-.01](#) through [391-5-3-.11](#), has been adopted. Filed June 30, 1977; effective July 20, 1977.

Chapter 391-5-4, entitled "Rates and Refunds," containing Rules [391-5-4-.01](#) and [391-5-4-.02](#), has been adopted. Filed June 30, 1977; effective July 20, 1977.

Chapter 391-5-5, entitled "Reservations," containing Rules [391-5-5-.01](#) through [391-5-5-.08](#), has been adopted. Filed June 30, 1977; effective July 20, 1977.

Chapter 391-5-6, entitled "Enforcement," containing Rules [391-5-6-.01](#) and [391-5-6-.02](#) has been adopted. Filed June 30, 1977; effective July 20, 1977.

Chapter 391-3-5, containing Rules [391-3-5-.01](#) through [391-3-5-.20](#), has been repealed and a new Chapter 391-3-5, entitled "Rules for Safe Drinking Water," containing Rules [391-3-5-.01](#) through [391-3-5-.47](#), adopted. Filed July 5, 1977; effective July 26, 1977, as specified by Rule [391-3-5-.47](#).

Emergency Rules 391-4-8-0.2, 391-4-8-0.3, and 391-4-8-0.4 and all Administrative Orders issued pursuant thereto have been repealed. Filed August 26, 1977; effective September 15, 1977.

Chapter 391-4-8, containing Rules 391-4-8-.02 and 391-4-8-.07 (Rules 391-4-8-.01, and 391-4-8-.03 through 391-4-8-.06 were reserved) has been repealed and a new Chapter 391-4-8, of the same title, containing Rules 391-4-8-.01 and 391-4-8-.99, adopted. (Rules 391-4-8-.02 through 391-4-8-.98 are reserved.) Filed August 26, 1977; effective September 15, 1977.

Rules [391-4-2-.47](#) through [391-4-2-.51](#) have been repealed and new Rules of the same numbers adopted. Filed September 2, 1977; effective August 26, 1977, the day of adoption, in accordance with Georgia Laws 1977, pp. 396, 455 (Sec 45-513, sub-sec. (d)).

Rules [391-4-2-.01](#) through [391-4-2-.46](#) have been repealed and new Rules [391-4-2-.01](#) through [391-4-2-.12](#) and [391-4-2-.26](#) through [391-4-2-.41](#) adopted. Rules [391-4-2-.13](#) through [391-4-2-.25](#), and [391-4-2-.42](#) through [391-4-2-.46](#) are reserved. Filed September 14, 1977; effective October 4, 1977.

Rules [391-4-2-.52](#) through [391-4-2-.60](#) have been repealed and new Rules of the same numbers adopted. Filed September 16, 1977; effective August 26, 1977, the day of adoption, in accordance with Georgia Laws 1977, pp. 396, 455.

Rules 391-4-2-.101 through 391-4-2-.158 have been repealed and new Rules 391-4-2-.101 through 391-4-2-.154 adopted. Rules 391-4-2-.155 through 391-4-2-.200 are reserved. Filed September 14, 1977; effective October 4, 1977.

Rule 391-4-13-.09 has been amended by the repeal of sub-paragraphs (5)(b), (e), (i), (n), (p), (r), (s), (u); (6)(c), (d), (l), (n), (o), (s), (t), (v), (w), (y), (bb), (cc), (gg), (hh), (ii), (kk), (ll), (mm), (nn), (oo), (pp), (rr), (ss), (uu), (vv), (ww), (xx), (eee), (fff), (ggg), (iii), (jjj), (lll), and by renumbering the remaining subparagraphs. Filed September 14, 1977; effective October 4, 1977.

283 Georgia Historical Commission, containing Chapters 283-1 and 283-2, has been repealed. Filed September 30, 1977; effective October 20, 1977.

540 Georgia Recreation Commission, containing Chapters 540-1 and 540-2, has been repealed. Filed September 30, 1977; effective October 20, 1977.

670 Ty Cobb Baseball Memorial Commission, containing Chapters 670-1 through 670-4, has been repealed. Filed September 30, 1977; effective October 20, 1977.

Chapter 391-1-5, entitled "Planning and Research," containing Rules [391-1-5-.01](#) and [391-1-5-.02](#) has been adopted. Filed September 30, 1977; effective October 20, 1977.

Chapter 391-5-7, entitled "Transfer of Ty Cobb Baseball Memorial Commission," containing Rule [391-5-7-.01](#), has been adopted. Filed September 30, 1977; effective October 20, 1977.

Rule [391-3-6-.07](#) has been adopted. Filed February 2, 1978; effective February 22, 1978.

Rules [391-4-2-.61](#) and [391-4-2-.62](#) have been repealed and new Rules of the same numbers adopted. Filed March 6, 1978; effective March 26, 1978.

Rules 391-4-2-.107, 391-4-2-.108, 391-4-2-.110, 391-4-2-.113, 391-4-2-.114, 391-4-2-.117, 391-4-2-.118, 391-4-2-.128, 391-4-2-.129, 391-4-2-.130, 391-4-2-.131, 391-4-2-.137, 391-4-2-.138, 391-4-2-.139, 391-4-2-.145, 391-4-2-.148, 391-4-2-.152, and 391-4-2-.153 have been amended, respectively, by the addition of a paragraph. Filed March 6, 1978; effective March 26, 1978.

Emergency Rule 391-3-8-0.5, "Rules for Dam Safety," containing Rules 391-3-8-0.5-.01 through 391-3-8-0.5-.12, was filed on July 28, 1978, effective July 28, 1978, the date of adoption, to remain in effect for a period of 120 days or until the effective date of permanent Rules covering the same subject matter superseding this Emergency Rule, as specified by the Agency, and in accordance with Rule 391-3-8-0.5-.12.

Rules [391-4-2-.47](#) through [391-4-2-.51](#) have been repealed and new Rules of the same numbers adopted. Filed August 11, 1978; effective August 31, 1978.

Rule [391-4-9-.01](#) has been repealed and a new Rule [391-4-9-.01](#) adopted. Filed August 11, 1978; effective August 31, 1978.

Chapter 391-3-8, entitled "Rules for Dam Safety," containing Rules [391-3-8-.01](#) through [391-3-8-.12](#), has been adopted superseding Emergency Rule 391-3-8-0.5. Filed August 31, 1978; effective September 20, 1978.

Rules [391-4-2-.02](#), [391-4-2-.26](#) through [391-4-2-.41](#), [391-4-2-.47](#) through [391-4-2-.62](#), and 391-4-2-.101 through 391-4-2-.154 have been repealed and new Rules [391-4-2-.02](#), [391-4-2-.26](#) through [391-4-2-.36](#), and 391-4-2-.101 through 391-4-2-.154 adopted. Filed September 6, 1978; effective September 26, 1978.

Rule 391-4-2-.155 has been adopted. Filed September 6, 1978; effective September 26, 1978.

Rules [391-4-2-.52](#) through [391-4-2-.60](#) have been adopted. Filed November 2, 1978; effective September 29, 1978, the date of adoption, as specified by Certification of said Rules in accordance with Georgia Code Sec. 45-513(d).

Rules [391-4-2-.61](#) through [391-4-2-.63](#) have been adopted. Filed March 2, 1979; effective March 22, 1979.

Rules 391-4-2-.107, 391-4-2-.108, 391-4-2-.110, 391-4-1-.113, 391-4-2-.114, 391-4-2-.117, 391-4-2-.118, 391-4-2-.128 through 391-4-2-.131, 391-4-2-.138 through 391-4-2-.140, 391-4-2-.146, 391-4-2-.149, 391-4-2-.153, and 391-4-2-.154 have been amended by additions thereto. Filed March 2, 1979; effective March 22, 1979.

Rule [391-3-1-.01](#) has been repealed and a new Rule [391-3-1-.01](#) adopted. Filed March 20, 1979; effective April 9, 1979.

Rule [391-3-1-.02](#) has been amended by: the adoption of subparagraphs (1)(c), (1)(d); the repeal of subparagraph (2)(a)1. and the adoption of a new subparagraph (2)(a)1.; the adoption of subparagraphs (2)(a)4. thru (2)(a)8.; the repeal of subparagraphs (2)(b), (2)(c)1.(iv), (2)(c)2.(iii), (2)(d)3. and the adoption of new subparagraphs of the same numbers; the repeal of Figure 1 of subparagraph (2)(d) and the adoption of a new Figure 1; the repeal of subparagraphs (2)(g)2., (2)(h), (2)(i)1. (ii), (2)(j)1., (2)(l)1., (2)(l)2., (2)(n)1.(v) and the adoption of new subparagraphs of the same numbers; the repeal of subparagraphs (2)(n)1. (vi), (2)(n)1.(vii); the adoption of subparagraphs (2)(k)2., (2)(n)2., (2)(t) through (2)(z), (2)(aa) through (2)(ff); the repeal of subparagraphs (4)(b), (4)(c), 4(e), (4)(f), (4)(g), (5)(a)10. and the adoption of a new subparagraphs of the same numbers; the repeal of paragraph (6) and the adoption of a new paragraph (6); and, the adoption of paragraphs (7), (8), (9). Filed March 20, 1979; effective April 9, 1979.

Rule [391-3-1-.03](#) has been amended by the repeal of paragraphs (3), (5), and (6) and by the adoption of new paragraphs of the same numbers. Filed March 20, 1979; effective April 9, 1979.

Rules [391-3-1-.05](#) and [391-3-1-.09](#) have been repealed and new Rules of the same numbers adopted. Filed March 20, 1979; effective April 9, 1979.

Rule [391-3-1-.10](#) has been adopted. Filed March 20, 1979; effective April 9, 1979.

Chapter 391-3-9, entitled "Radioactive Waste Material Disposal," containing Rules [391-3-9-.01](#) through [391-3-9-.07](#), has been adopted. Filed June 14, 1979; effective July 4, 1979.

Chapter 391-2-2, entitled "Shore Assistance," containing Rules [391-2-2-.01](#) through [391-2-2-.07](#), has been adopted. Filed July 11, 1979; effective July 31, 1979.

Rule [391-4-2-.14](#) has been adopted. Filed July 26, 1979; effective August 15, 1979.

Rules [391-4-2-.02](#), [391-4-2-.10](#), [391-4-2-.12](#), [391-4-2-.26](#), [391-4-2-.27](#), and 391-4-2-.101 through 391-4-2-.155 have been repealed and new Rules of the same numbers adopted. Filed July 26, 1979; effective August 15, 1979.

Rules [391-4-2-.28](#) through [391-4-2-.36](#) have been repealed. Filed July 26, 1979; effective August 15, 1979.

Rules [391-4-2-.47](#) through [391-4-2-.51](#) have been adopted. Filed August 9, 1979; effective August 29, 1979.

Rules 391-3-6.08 through [391-3-6-.10](#) have been adopted. Filed August 24, 1979; effective September 13, 1979.

Emergency Rule 391-2-2-0.6 was filed on October 1, 1979, having become effective September 26, 1979, the date of adoption, to remain in effect for 120 days, as specified by the Agency. Said Emergency Rule authorized the Board of Natural Resources to suspend the provisions of subparagraph [391-2-2-.05](#) so that construction or alteration authorized by a permit granted by the Committee (Shore Assistance Committee, established by Georgia Laws 1979, Act No. 672) may commence immediately, and directed the Board to specify, in the Resolution declaring such suspension, the geographic area or the particular permit(s), previously approved by the Committee, covered by the suspension. Said Emergency Rule has attached thereto Resolution of the Board adopted on September 26, 1979 adopting said Emergency Rule, and has attached thereto Resolution of said Board adopted September 26, 1979 specifying the geographic area concerned.

Rules [391-4-2-.52](#), and [391-4-2-.54](#) through [391-4-2-.58](#) have been repealed and new Rules of the same numbers adopted. Filed November 2, 1979; effective November 22, 1979.

Rule 391-4-2-.156 has been adopted. Filed November 5, 1979; effective November 25, 1979.

Chapter 391-4-5 has been repealed and a new Chapter 391-4-5 of the same title, containing Rules [391-4-5-.01](#) through 391-4-5-18, adopted. Filed December 12, 1979; effective January 1, 1980.

By Certification of the Department of Natural Resources filed on December 28, 1979, Chapter 391-4-12, entitled "Coastal Marshlands Protection," containing Rules [391-4-12-.01](#) through [391-4-12-.05](#), was declared renumbered as Chapter 391-2-3 and the Rules therein renumbered as [391-2-3-.01](#) through [391-2-3-.05](#); effective January 17, 1980.

By Certification of the Department of Natural Resources filed on December 28, 1979, Chapter 391-4-8, entitled "Saltwater Fishing Regulations," containing Rules 391-4-8-.01 and 391-4-8-.99, was renumbered as Chapter 391-2-4 and the Rules therein renumbered as [391-2-4-.01](#), and [391-2-4-.99](#); effective January 17, 1980.

Rule [391-2-4-.02](#) has been adopted. Filed December 28, 1979; effective January 17, 1980.

Rule [391-4-3-.13](#) has been adopted. Filed January 4, 1980; effective January 24, 1980.

Paragraph (9) of Rule [391-2-2-.02](#) has been repealed and a new paragraph (9) adopted. Filed January 28, 1980; effective February 17, 1980.

Paragraphs (1) and (2) of Rule [391-2-2-.04](#) have been amended. Filed January 28, 1980; effective February 17, 1980.

Subparagraphs (1)(a)4., 5., 6. of Rule [391-2-2-.05](#) have been amended. Filed January 28, 1980; effective February 17, 1980.

Subparagraph (6)(a) of Rule [391-2-2-.05](#) has been repealed and a new subparagraph (6)(a) adopted. Filed January 28, 1980; effective February 17, 1980.

Subparagraph (2)(d) of Rule [391-2-2-.11](#) has been amended. Filed January 28, 1980; effective February 17, 1980.

Rule [391-4-3-.05](#) has been repealed and a new Rule [391-4-3-.05](#) adopted. Filed January 28, 1980; effective February 17, 1980.

Rule [391-4-3-.06](#) has been repealed. Filed January 28, 1980; effective February 17, 1980.

Rule [391-4-3-.09](#) has been amended by the repeal of subparagraphs (1)(c) and (1)(f) and by renumbering subparagraph (1)(d) as (1)(c) and subparagraph (1)(e) as (1)(d); said Rule has been further amended by adding a fishing fee following subparagraph (1)(d); paragraphs (2) and (4) of said Rule have been amended. Filed January 28, 1980; effective February 17, 1980.

Rule [391-4-3-.10](#) has been amended by the adoption of paragraph (3). Filed January 28, 1980; effective February 17, 1980.

Rule [391-4-3-.12](#) has been adopted. Filed January 28, 1980; effective February 17, 1980.

Rule [391-4-2-.61](#) has been repealed and a new Rule [391-4-2-.61](#) adopted. Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.106 has been amended by the adoption of subparagraph (1)(c) and paragraph (4). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.107 has been amended by the adoption of subparagraph (1)(f). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.109 has been amended by the adoption of subparagraph (1)(f). Filed March 3, 1980; effective 23, 1980.

Rule 391-4-2-.112 has been amended by the adoption of subparagraph (1)(f). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.113 has been amended by the adoption of subparagraph (1)(f). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.114 has been amended by the adoption of subparagraph (1)(f). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.116 has been amended by the adoption of subparagraph (1)(h). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.117 has been amended by the adoption of subparagraph (1)(e) and paragraph (3). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.120 has been amended by the adoption of subparagraph (1)(d). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.127 has been amended by the adoption of subparagraph (1)(e). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.128 has been amended by the adoption of subparagraph (1)(g). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.129 has been amended by the adoption of subparagraph (1)(e). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.130 has been amended by the adoption of subparagraph (1)(h). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.135 has been amended by the adoption of subparagraph (1)(c) and paragraph (3). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.137 has been amended by the adoption of subparagraph (1)(i). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.138 has been amended by the adoption of subparagraph (1)(h). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.140 has been amended by the adoption of subparagraph (1)(g). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.142 has been amended by the adoption of subparagraph (1)(e). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.145 has been amended by the adoption of subparagraph (1)(d). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.146 has been amended by the adoption of subparagraph (1)(d). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.148 has been amended by the adoption of subparagraph (1)(d). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.149 has been amended by the adoption of subparagraph (1)(i). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.150 has been amended by the adoption of subparagraph (1)(c). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.151 has been amended by the adoption of subparagraph (1)(f). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.153 has been amended by the adoption of subparagraph (1)(d). Filed March 3, 1980; effective March 23, 1980.

Rule 391-4-2-.154 has been amended by the adoption of subparagraph (1)(e). Filed March 3, 1980; effective March 23, 1980.

Rule [391-4-2-.202](#) has been adopted. Filed March 3, 1980; effective March 3, 1980.

Rule [391-3-1-.01](#) has been amended by the repeal of subparagraph (jjj) and by the adoption of a new subparagraph (jjj); said Rule has been further amended by the adoption of subparagraphs (kkk) through (vvv). Filed March 7, 1980; effective March 27, 1980.

Rule [391-3-1-.02](#) has been amended by the adoption of subparagraphs (2)(a)9., (2)(gg), and (6)(a)2.(xi); said Rule has been further amended by the repeal of subparagraph (6)(a)2.(vii)(I)I. and by the adoption of a new subparagraph (6)(a)2.(vii)(I)I. Filed March 7, 1980; effective March 27, 1980.

Rule [391-4-3-.06](#) has been adopted. Filed March 27, 1980; effective April 16, 1980.

Rule [391-3-5-.48](#) has been adopted. Filed June 24, 1980; effective July 14, 1980.

Rule [391-3-6-.06](#) has been repealed and a new Rule [391-3-6-.06](#) adopted. Filed June 24, 1980; effective July 14, 1980.

Rule [391-3-6-.11](#) and 391-3-6.12 have been adopted. Filed June 24, 1980; effective July 14, 1980.

Chapter 391-3-10, entitled "Inspection and Maintenance," containing Rules [391-3-10-.01](#) through [391-3-10-.10](#) has been adopted. Filed July 1, 1980; effective July 21, 1980.

Rules [391-4-2-.10](#), [391-4-2-.12](#), [391-4-2-.13](#), [391-4-2-.26](#), and [391-4-2-.27](#) have been repealed and new Rules of the same numbers adopted. Filed July 29, 1980; effective August 18, 1980.

Rules 391-4-2-.101 through 391-4-2-.156 have been repealed and new Rules of the same numbers adopted. Filed July 29, 1980; effective August 18, 1980.

Rules 391-4-2-.157 through 391-4-2-.163 have been adopted. Filed July 29, 1980; effective August 18, 1980. (Rules 391-4-2-.164 through 391-4-2-.200 are reserved.)

Paragraphs (2), (3), and (5) of Rule [391-4-2-.47](#) have been repealed a new paragraphs of the same numbers adopted. Filed August 6, 1980; effective August 26, 1980.

Paragraph (1) of Rule [391-4-2-.48](#) has been repealed and a new paragraph (1) adopted. Filed August 6, 1980; effective August 26, 1980.

Paragraph (1) of Rule [391-4-2-.49](#) has been repealed and a new paragraph (1) adopted. Filed August 6, 1980; effective August 26, 1980.

Paragraph (1) of Rule [391-4-2-.50](#) has been repealed and a new paragraph (1) adopted. Filed August 6, 1980; effective August 26, 1980.

Rule [391-2-4-.03](#) has been adopted. Filed August 15, 1980; effective September 4, 1980.

Chapter 391-3-11, entitled "Hazardous Waste Management," containing Rules [391-3-11-.01](#) through [391-3-11-.15](#), has been adopted. Filed August 28, 1980; effective September 17, 1980.

Paragraphs (1) and (2) of Rule [391-4-2-.52](#) have been repealed and new paragraphs (1) and (2) adopted. Filed September 12, 1980; effective October 2, 1980.

Rule [391-4-2-.54](#) has been repealed and a new Rule [391-4-2-.54](#) adopted. Filed September 12, 1980; effective October 2, 1980.

Paragraph (1) of Rule [391-4-2-.55](#) has been repealed and a new paragraph (1) adopted. Filed September 12, 1980; effective October 2, 1980.

Paragraph (1) of Rule [391-4-2-.56](#) has been repealed and a new paragraph (1) adopted. Filed September 12, 1980; effective October 2, 1980.

Paragraph (1) of Rule [391-4-2-.57](#) has been repealed and a new paragraph (1) adopted. Filed September 12, 1980; effective October 2, 1980.

Paragraph (1) of Rule [391-4-2-.58](#) has been repealed and a new paragraph (1) adopted. Filed September 12, 1980; effective October 2, 1980.

Rule [391-3-1-.01](#) has been amended by the repeal of subparagraph (jjj) and by the adoption of a new subparagraph (jjj). Filed October 27, 1980; effective November 16, 1980.

Rule [391-3-1-.02](#) has been amended by: the repeal of subparagraph (2)(a)6.(i) and by the adoption of a new subparagraph (2)(a)6.(i); the adoption of subparagraphs (2)(a)6.(iii), (2)(hh) through (2)(oo); and by the repeal of paragraph (7) and the adoption of a new paragraph (7). Filed October 27, 1980; effective November 16, 1980.

Chapter 391-1-5 has been repealed. Filed December 22, 1980; effective January 11, 1981.

By Certification of the Department of Natural Resources filed on December 22, 1980, Chapters 260-1, entitled "Organizational Authority," 260-6, entitled "Agreements," 260-7, entitled "Deputy Regulations," 260-9, entitled "General Regulations," and 260-11, entitled "Public Exhibition of Wildlife," Rules and Regulations of the State Game and Fish Commission, have been repealed in their entirety; effective January 11, 1981.

Rule 391-4-2-.106 has been amended by the adoption of subparagraph (1)(c) and by the adoption of paragraph (4). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.107 has been amended by the adoption of subparagraph (g). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.109 has been amended by the adoption of subparagraph (1)(g). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.111 has been amended by the adoption of subparagraph (f). Filed December 22, 1980; effective January 1, 1981.

Rule 391-4-2-.112 has been amended by the adoption of subparagraph (f). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.113 has been amended by the adoption of subparagraph (f). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.114 has been amended by the adoption of subparagraph (d). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.116 has been amended by the adoption of subparagraph (1)(h). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.117 has been amended by the adoption of subparagraph (1)(e) and by the adoption of paragraph (3). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.120 has been amended by the adoption of paragraph (1)(d). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.126 has been amended by the adoption of paragraph (d). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.127 has been amended by the adoption of subparagraph (1)(e). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.130 has been amended by the adoption of subparagraph (f). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.131 has been amended by the adoption of subparagraph (i). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.132 has been amended by the adoption of subparagraph (d). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.137 has been amended by the adoption of subparagraph (1)(d) and by the adoption of paragraph (3). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.139 has been amended by the adoption of subparagraph (1)(h). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.141 has been amended by the adoption of subparagraph (1)(h). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.144 has been amended by the adoption of subparagraph (g). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.145 has been amended by the adoption of subparagraph (1)(d) and paragraph (3). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.148 has been amended by the adoption of subparagraph (e). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.149 has been amended by the adoption of subparagraph (1)(d). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.151 has been amended by the adoption of subparagraph (d). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.152 has been amended by the adoption of subparagraph (1)(g) and paragraph (3). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.153 has been amended by the adoption of subparagraph (1)(c). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.154 has been amended by the adoption of subparagraph (1)(f) and (3) and (4). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.156 has been amended by the adoption of subparagraph (1)(d). Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-2-.157 has been amended by the adoption of subparagraph (1)(f). Filed December 22, 1980; effective January 11, 1981.

Rule [391-4-9-.02](#) has been adopted. Filed December 22, 1980; effective January 11, 1981.

Chapter 391-4-13, entitled "Protection of Endangered, Threatened, Rare or Unusual Species," containing Rules [391-4-13-.01](#) through 391-4-13-.09, has been renumbered as Chapter 391-4-10, and said Rules therein renumbered as [391-4-10-.01](#) through [391-4-10-.09](#). Filed December 22, 1980; effective January 11, 1981.

By Certification of the Department of Natural Resources filed on December 22, 1980, the title of Division 391-5 has been changed from "Parks and Historic Sites" to "Parks, Recreation and Historic Sites," effective January 11, 1981.

Rule [391-4-5-.02](#) has been amended by the repeal of subparagraph (d) and by the adoption of a new subparagraph (d). Filed January 30, 1981; effective February 19, 1981.

Rule [391-4-5-.03](#) has been amended by the adoption of paragraphs (8) and (9). Filed January 30, 1981; effective February 19, 1981.

Rules [391-4-5-.12](#) and [391-4-5-.13](#) have been repealed and new Rules of the same numbers adopted. Filed January 30, 1981; effective February 19, 1981.

Rule [391-4-5-.16](#) has been amended by the repeal of subparagraph (b) and by the adoption of a new subparagraph (b). Filed January 30, 1981; effective February 19, 1981.

Rule [391-4-5-.17](#) has been repealed and a new Rule [391-4-5-.17](#) adopted. Filed January 30, 1981; effective February 19, 1981.

Rule [391-4-3-.06](#) has been amended by the repeal of subparagraphs (c) and (d) and by the adoption of new subparagraphs (c), (d), and (e). Filed April 3, 1981; effective April 23, 1981.

Rule [391-4-3-.10](#) has been amended by the repeal of paragraph (3) and by the adoption of a new paragraph (3). Filed April 3, 1981; effective April 23, 1981.

Rule [391-2-4-.01](#) has been repealed. Filed April 17, 1981; effective May 7, 1981.

Rule [391-3-10-.06](#) has been amended by the repeal of paragraph (2) and by the adoption of a new paragraph (2). Filed April 29, 1981; effective May 19 1981.

Rule [391-3-10-.07](#) has been repealed and a new Rule [391-3-10-.07](#) adopted. Filed April 29, 1981; effective May 19, 1981.

Rule [391-3-10-.09](#) has been repealed and a new Rule [391-3-10-.09](#) adopted. Filed April 29, 1981; effective May 19, 1981.

Rule [391-3-7-.01](#) has been amended by the repeal of subparagraph (i) and by the adoption of a new subparagraph (i). Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-7-.02](#) has been amended by the repeal of the unnumbered paragraph following the Rule title and subparagraphs (a), (h), (i), (j), (k), and (l), and by the adoption of a new unnumbered paragraph and new subparagraphs (a), (h), (i), (j) and (k). Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-7-.03](#) has been amended by the repeal of subparagraphs (2)(c), (3)(b) and paragraph (4), and by the adoption of new subparagraphs (2)(c), (3)(b) and a new paragraph (4). Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-7-.04](#) has been amended by the repeal of paragraph (2) and by the adoption of a new paragraph (2). Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-7-.06](#) has been amended by the repeal of paragraph (2) and by the adoption of a new paragraph (2). Filed July 16, 1981; effective August 5, 1981.

Rule 391-3-7.07 has been repealed and a new Rule [391-3-7-.07](#) adopted. Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-7-.08](#) has been repealed and a new Rule [391-3-7-.08](#) adopted. Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-7-.09](#) has been repealed. Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-11-.01](#) has been amended by the repeal of paragraph (2) and by the adoption of a new paragraph (2). Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-11-.02](#) has been amended by: the repeal of paragraph (1) and by the adoption of a new paragraph (1); the repeal of paragraph (2); and, by renumbering paragraph (3) as (2). Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-11-.05](#) has been amended by: the repeal of paragraph (1) and by the adoption of a new paragraph (1); the repeal of paragraph (2); and, by renumbering paragraph (3) as (2). Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-11-.07](#) has been amended by: the repeal of paragraph (1) and by the adoption of a new paragraph (1); the repeal of paragraphs (2) and (3); and, by the renumbering paragraphs (4) and (5) as (2) and (3), respectively. Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-11-.08](#) has been amended by the repeal of paragraph (1) and by the adoption of a new paragraph (1). Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-11-.09](#) has been amended by the repeal of paragraphs (1) and (2) and by the adoption of a new paragraph (1). Filed July 16, 1981. effective August 5, 1981.

Rule [391-3-11-.10](#) has been amended by the repeal of paragraph (1) and by the adoption of a new paragraph (1), and has been further amended by the adoption of paragraphs (3), (4), and (5). Filed July 16, 1981; effective August 5, 1981.

Rule [391-3-11-.11](#) has been amended by: the adoption of subparagraphs (1)(a), (2)(b) through (2)(h), (3)(a) through (3)(e), (4)(a) through (4)(h), and (5)(a); the repeal of subparagraphs (6)(a) through (6)(d) and by the adoption of new subparagraphs (6)(a) through (6)(c); and, by the adoption of subparagraph (7)(a) and paragraphs (9) and (10). Filed July 16, 1981; effective August 5, 1981.

Rule [391-4-2-.47](#) has been amended by the repeal of paragraphs (1), (2), and (3) and by the adoption of new paragraphs (1), (2), and (3). Filed August 6, 1981; effective August 26, 1981.

Rule [391-4-2-.48](#) has been amended by the repeal of paragraph (1) and by the adoption of a new paragraph (1). Filed August 6, 1981; effective August 26, 1981.

Rule [391-4-2-.49](#) has been amended by the repeal of paragraph (1) and by the adoption of a new paragraph (1). Filed August 6, 1981; effective August 26, 1981.

Rule [391-4-2-.50](#) has been amended by the repeal of paragraph (1) and by the adoption of a new paragraph (1). Filed August 6, 1981; effective August 26, 1981.

Rule [391-4-9-.03](#) has been adopted. Filed August 10, 1981; effective August 30, 1981.

Rule [391-4-2-.10](#) has been repealed and a new Rule [391-4-2-.10](#) adopted. Filed August 10, 1981; effective August 30, 1981.

Rule [391-4-2-.15](#) has been adopted. Filed August 10, 1981; effective August 30, 1981.

Rules [391-4-2-.26](#) and [391-4-2-.27](#) have been repealed and new Rules of the same numbers adopted. Filed August 10, 1981; effective August 30, 1981.

Rules 391-4-2-.101 through 391-4-2-.163 "Hunting Regulations" have been repealed and new Rules 391-4-2-.101 through 391-4-2-.162 adopted. Filed August 10, 1981; effective August 30, 1981.

Rule [391-4-2-.52](#) has been amended by the repeal of paragraphs (1) and (2), and by the adoption of new paragraphs (1) and (2). Filed September 22, 1981; effective October 12, 1981.

Rule [391-4-2-.54](#) has been repealed and a new Rule [391-4-2-.54](#) adopted. Filed September 22, 1981; effective October 12, 1981.

Rule [391-4-2-.55](#) has been amended by the repeal of paragraph (1), and by the adoption of a new paragraph (1). Filed September 22, 1981; effective October 12, 1981.

Rule [391-4-2-.56](#) has been amended by the repeal of paragraph (1) and by the adoption of a new paragraph (1). Filed September 22, 1981; effective October 12, 1981.

Rule [391-4-2-.57](#) has been amended by the repeal of paragraph (1) and by the adoption of a new paragraph (1). Filed September 22, 1981; effective October 12, 1981.

Rule [391-4-2-.58](#) has been amended by the repeal of paragraph (1) and by the adoption of a new paragraph (1). Filed September 22, 1981; effective October 12, 1981.

Rule [391-3-1-.02](#) has been amended by: the repeal of subparagraph (2)(a)9. and by the adoption of a new subparagraph (2)(a)9.; the adoption of subparagraph (2)(g)1.(viii); the repeal of subparagraph (2)(gg)2.(i)(I) and by the adoption of a new subparagraph (2)(gg)2.(i)(I); and, by the adoption of subparagraph (2)(gg)2.(i)(V). Filed December 3, 1981; effective December 23, 1981.

Chapter 391-3-13, entitled "Oil and Gas Deep Drilling," containing Rules [391-3-13-.01](#) through [391-3-13-.17](#) has been adopted. Filed December 23, 1981; effective January 12, 1982.

Rule [391-4-2-.61](#) has been repealed and a new Rule [391-4-2-.61](#) adopted. Filed February 2, 1982; effective February 22, 1982.

Rules 391-4-2-.105 through 391-4-2-.107, 391-4-2-.109, 391-4-2-.111 through 391-4-2-.114, 391-4-2-.116, 391-4-2-.117, 391-4-2-.120, 391-4-2-.126, 391-4-2-.127, 391-4-2-.130 through 391-4-2-.132, 391-4-2-.137, 391-4-2-.139, 391-4-2-.141, 391-4-2-.144, 391-4-2-.145, 391-4-2-.148, through 391-4-2-.153, 391-4-2-.155, 391-4-2-.156 have been amended. Filed February 2, 1982; effective February 22, 1982.

Rule [391-4-5-.02](#) has been amended by the repeal of subparagraph (g), Filed July 1, 1982; effective July 21, 1982.

Rule [391-4-5-.03](#) has been amended by the repeal paragraphs (1), (3), (6), (7), and (8) and by the adoption of new paragraphs (1), (3), (6) and (7); said Rule is further amended by the repeal of subparagraph (9)(a) and by the adoption of a new subparagraph (9)(a) and by the adoption of a new subparagraph (9)(a). Filed July 1, 1982; effective July 21, 1982.

Rule [391-4-5-.04](#) has been repealed and a new Rule [391-4-5-.04](#) adopted. Filed July 1, 1982; effective July 21, 1982.

Rule [391-4-5-.15](#) has been amended by the repeal of subparagraph (a) and by the adoption of a new subparagraph (a). Filed July 1, 1982; effective July 21, 1982.

Rule [391-4-5-.18](#) has been repealed a new Rule [391-4-5-.18](#) adopted. Filed July 1, 1982; effective July 21, 1982.

Rules [391-4-5-.19](#), [391-4-5-.20](#), and [391-4-5-.21](#) have been adopted. Filed July 1, 1982; effective July 21, 1982.

Rules [391-4-2-.10](#), [391-4-2-.12](#), [391-4-2-.26](#), [391-4-2-.27](#), [391-4-2-.61](#), and 391-4-2-.101 through 391-4-2-.162 have been repealed and new Rules of the same numbers adopted. Filed July 6, 1982; effective July 26, 1982.

Rules [391-4-2-.16](#), 391-4-2-.163, 391-4-2-.164, and 391-4-2-.165 have been adopted. Filed July 6, 1982; effective July 26, 1982.

Chapter 391-1-1, entitled "Organization," containing Rules 391-1-1.01 through [391-1-1-.03](#), has been adopted. Filed July 29, 1982; effective August 18, 1982.

Chapter 391-1-2, entitled "Procedure for Administrative Hearings Before Board-Appointed Administrative Law Judges," containing Rules [391-1-2-.01](#) through [391-1-2-.26](#), has been adopted. Filed July 29, 1982; effective August 18, 1982.

Chapter 391-1-3, entitled "Administrative Review of Initial Decision," containing Rules [391-1-3-.01](#) through [391-1-3-.13](#), has been adopted. Filed July 29, 1982; effective August 18, 1982.

Rule [391-4-2-.47](#) has been amended by the repeal of subparagraph (1)(a) and paragraphs (2) and (3), and by the adoption of a new subparagraph (1)(a) and new paragraphs (2) and (3). Filed July 29, 1982; effective August 18, 1982.

Paragraphs [391-4-2-.48](#), [391-4-2-.49](#), and [391-4-2-.50](#) have been repealed and new paragraphs [391-4-2-.48](#), [391-4-2-.49](#), and [391-4-2-.50](#) adopted. Filed July 29, 1982; effective August 18, 1982.

Rule [391-4-2-.52](#) has been amended by the repeal of paragraphs (1) and (2) and by the adoption of new paragraphs (1) and (2). Filed July 29, 1982; effective August 18, 1982.

Rule [391-4-2-.54](#) has been repealed and a new Rule [391-4-2-.54](#) adopted. Filed July 29, 1982; effective August 18, 1982.

Paragraphs [391-4-2-.55](#), [391-4-2-.56](#), [391-4-2-.57](#), [391-4-2-.58](#) have been repealed and new paragraphs [391-4-2-.55](#), [391-4-2-.56](#), [391-4-2-.57](#), [391-4-2-.58](#) adopted. Filed July 29, 1982; effective August 18, 1982.

Rule [391-3-1-.02](#) has been amended by the repeal of subparagraph (2)(a)8, and by the adoption of a new subparagraph (2)(a)8. Filed August 27, 1982; effective September 16, 1982.

Rule [391-3-1-.03](#) has been amended by the adoption of subparagraph (3)(a)5. Filed August 27, 1982; effective September 16, 1982.

Paragraph [391-3-11-.01](#) has been amended. Filed December 9, 1982; effective December 29, 1982.

Rules [391-3-11-.02](#) and [391-3-11-.05](#) have been amended. Filed December 9, 1982; effective December 29, 1982.

Rule [391-3-11-.04](#) has been amended by changing the punctuation in paragraphs (2) and (3). Filed December 9, 1982; effective December 29, 1982.

Paragraph [391-3-11-.07](#) has been amended and paragraph [391-3-11-.07](#) adopted. Filed December 9, 1982; effective December 29, 1982.

Paragraph [391-3-11-.08](#) has been amended. Filed December 9, 1982; effective December 29, 1982.

Rules [391-3-11-.10](#), [391-3-11-.11](#) and [391-3-11-.12](#) have been amended. Filed December 9, 1982; effective December 29, 1982.

Rule [391-3-11-.15](#) has been repealed. Filed December 9, 1982; effective December 29, 1982.

Rule [391-4-3-.06](#) has been repealed and a new Rule [391-4-3-.06](#) adopted. Filed March 31, 1983; effective April 20, 1983.

Rule [391-3-5-.02](#) has been amended by the repeal of subparagraph (q) and by the adoption of a new subparagraph (q) and subparagraphs (ff) and (gg). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.04](#) has been amended by the repeal of paragraph (3) and by the adoption of a new paragraph (3) and paragraphs (4) and (5). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.06](#) has been amended by the repeal of subparagraphs (c)1. and (d), and by the adoption of new subparagraphs (c)1. and (d). Filed July 15, 1983. effective August 4, 1983.

Rule [391-3-5-.07](#) has been amended by: the repeal of subparagraphs (5)(c), (11)(c) and (11)(f) and by the adoption of new subparagraphs (5)(c), (11)(c), and (11)(f); the repeal of paragraph (10) and by adoption of new subparagraphs (10) and (14); and, by the adoption of new subparagraphs (5)(b)1. and (5)(b)2. Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.09](#) has been amended by the repeal of subparagraphs (a), (c), (f)3., (k), and (l), and by the adoption of new subparagraphs (a), (c), (f)3., (k), (l), (n), and (o). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.12](#) has been amended by the repeal of subparagraph (1)(b) and by the adoption of a new subparagraph (1)(b). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.13](#) has been amended by the repeal of paragraphs (1) and (2) and by the adoption of new paragraphs (1) and (2). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.14](#) has been amended by the repeal of paragraphs (4), (7), (8), (9), and (10) and by the adoption of new paragraphs of the same numbers. Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.16](#) has been repealed and a new Rule [391-3-5-.16](#) adopted. Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.17](#) has been amended by the repeal of paragraph (10) and by the adoption of a new paragraph (10). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.18](#) has been amended by the repeal of subparagraphs (1)(a),(4)(a)1. and (4)(a)2. and by the adoption of new subparagraphs (1)(a), (1)(d), (4)(a)1., and (4)(a)2., and by the adoption of paragraph (5). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.19](#) has been amended by the repeal of paragraphs (1), (3), and (7) and by the adoption of new paragraphs (1), (3), (7), (9) and (10) and by the adoption of subparagraphs (4)(e) and (4)(f). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.20](#) has been amended by the repeal of paragraph (1) and by the adoption of new paragraphs (1) and (5). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.21](#) has been amended by the adoption of paragraph (7). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.22](#) has been amended by the repeal of subparagraph (1)(b) and by the adoption of a new subparagraph (1)(b), and by the adoption of paragraph (6). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.24](#) has been repealed and a new Rule [391-3-5-.24](#) adopted. Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.25](#) has been amended by the repeal of paragraph (1) and by the adoption of new paragraphs (1) and (5). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.26](#) has been amended by the repeal of paragraphs (1),(4) and (8) and by the adoption of new paragraphs (1),(4),(8) and (9). Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.27](#) has been repealed and a new Rule [391-3-5-.27](#) adopted. Filed July 15, 1983; effective August 4, 1983.

Rule [391-3-5-.31](#) has been amended by the repeal of subparagraph (1)(d) and by the adoption of a new subparagraph (1)(d). Filed July 15, 1983; effective August 4, 1983.

Rules [391-3-5-.49](#), [391-3-5-.50](#) and [391-3-5-.51](#) have been adopted. Filed July 15, 1983; effective August 4, 1983.

Rules [391-4-2-.10](#), [391-4-2-.11](#), [391-4-2-.26](#), [391-4-2-.27](#), [391-4-2-.61](#), and 391-4-2-.101 through 391-4-2-.165, have been repealed and new Rules of the same numbers adopted; also, Rules [391-4-2-.64](#) and 391-4-2-.166 have been adopted. Filed July 25, 1983; effective August 14, 1983.

Rule [391-4-2-.12](#) has been amended by the adoption of paragraph (6). Filed July 25, 1983; effective August 14, 1983.

Paragraphs 391-4-2-.47, and (5) have been amended. Filed July 25, 1983; effective August 14, 1983.

Paragraph (1) of Rules [391-4-2-.48](#), [391-4-2-.49](#), [391-4-2-.50](#), [391-4-2-.52](#), [391-4-2-.55](#), [391-4-2-.56](#), [391-4-2-.57](#) and [391-4-2-.58](#) have been amended. Filed July 25, 1983; effective August 14, 1983.

Chapter 391-4-11, entitled "Commercial Alligator Farming," containing Rules [391-4-11-.01](#) through [391-4-11-.10](#), has been adopted. Filed July 25, 1983, effective August 14, 1983.

Rule [391-4-3-.09](#) has been repealed. Filed October 19, 1983; effective November 8, 1983.

Rule [391-4-3-.10](#) has been amended by the repeal of subparagraph (1)(a) and by the adoption of a new subparagraph (1)(a). Filed October 19, 1983; effective November 8, 1983.

Rule [391-2-4-.02](#) has been amended by the repeal of paragraphs (2), (3), and (4) and by the adoption of new paragraphs (2), (3), and (4). Filed December 28, 1983; effective January 17, 1984.

Rule [391-4-10-.09](#) has been amended by the repeal of subparagraphs (1)(a) and (4)(g) and by the adoption of new subparagraphs (1)(a) and (4)(g). Filed April 20, 1984; effective May 10, 1984.

Rule [391-4-5-.19](#) has been amended by the adoption of subparagraphs (u), (u)1., (v), (v)1., (w), (w)1., (x), and (x)1.. Filed May 1, 1984; effective May 21, 1984.

Rule [391-4-5-.20](#) has been amended by the repeal of subparagraph (1)(f)5. and by the adoption of a new subparagraph (1)(f)5.; said Rule has been further amended by the adoption of subparagraphs (1)(n)4., (1)(v), (1)(v)1., (2)(s), (2)(s)1., (2)(t), (2)(t)1. and 2., (2)(u), (2)(u)1. through 15., (3)(q)13. and 14., (3)(cc), (3)(cc)1., (3)(dd), (3)(dd)1. and 2., (3)(ee), (3)(ee)1. through 9., (4)(j), (4)(j)1. through 3., (4)(k), and (4)(k)1.. Filed May 1, 1984; effective May 21, 1984.

Subparagraph [391-3-9-.03](#) has been amended. Filed July 6, 1984; effective July 26, 1984.

Paragraph [391-3-11-.02](#) has been amended. Filed July 6, 1984; effective July 26, 1984.

Paragraph [391-3-11-.08](#) has been amended. Filed July 6, 1984; effective July 26, 1984.

Chapter 391-4-2 has been amended by the repeal of Rules [391-4-2-.10](#), [391-4-2-.11](#), [391-4-2-.15](#), [391-4-2-.26](#), [391-4-2-.27](#), [391-4-2-.61](#), [391-4-2-.64](#), and 391-4-2-.101 through 391-4-2-.166 and by the adoption of new Rules [391-4-2-.10](#), [391-4-2-.11](#), [391-4-2-.15](#), [391-4-2-.26](#), [391-4-2-.27](#), [391-4-2-.61](#), [391-4-2-.64](#) and 391-4-2-.101 through 391-4-2-.166. Filed July 30, 1984; effective August 19, 1984.

Rule [391-4-2-.47](#) has been amended by the amendment of subparagraph (1)(a) and paragraphs (2) and (3). Filed July 30, 1984; effective August 19, 1984.

Rules [391-4-2-.48](#), [391-4-2-.49](#), [391-4-2-.50](#), [391-4-2-.52](#), [391-4-2-.55](#), [391-4-2-.56](#), [391-4-2-.57](#), and [391-4-2-.58](#) have all been amended by the repeal of paragraph (1) and by the adoption of a new paragraph (1). Filed July 30, 1984; effective August 19, 1984.

Rules 391-4-2-.167 through 391-4-2-.171 have been adopted. Filed July 30, 1984; effective August 19, 1984.

Rule [391-4-2-.26](#) has been amended by amending subparagraph (4)(c) and by adopting a new subparagraph (4)(g). Filed October 4, 1984; effective October 24, 1984.

Rule 391-4-2-.172 has been adopted. Filed October 4, 1984; effective October 24, 1984.

Chapter 391-1-2 has been repealed and a new Chapter 391-1-2, of the same title, containing Rules [391-1-2-.01](#) through [391-1-2-.35](#), adopted. Filed March 12, 1985; effective April 1, 1985.

Chapter 391-1-3 has been repealed. Filed March 12, 1985; effective April 1, 1985.

Chapter 391-5-8, entitled "Designation of Historic Buildings and Landmark Museum Buildings," Containing Rules [391-5-8-.01](#) through [391-5-8-.03](#), was filed on April 2, 1985; effective April 22, 1985.

Filed May 6, 1985; effective May 26, 1985.

Paragraph [391-3-10-.02](#) has been amended. Filed May 6, 1985; effective May 26, 1985.

Rule [391-3-10-.06](#) has been amended by the repeal of paragraph (1) and by the adoption of a new paragraph (1). Filed May 6, 1985; effective May 26, 1985.

Rule [391-3-6-.02](#) has been amended by the repeal of subparagraph (3)(a) and by the adoption of new subparagraphs (3)(a) and (3)(g). Filed May 30, 1985; effective June 19, 1985.

Rule [391-3-6-.03](#) has been amended by the following: the repeal of subparagraphs (2)(b), (6)(a), (6)(b)1.(v), (6)(c)5., (6)(d)1.(iv), (6)(e)1.(iv), and (6)(f)1.(v), and, by the adoption of new subparagraphs of these numbers; the repeal of paragraphs (7) and (11) and by the adoption of new paragraphs (7) and (11); by the adoption of subparagraphs (3)(e) and (5)(g); and, by the adoption of paragraphs (12), (13) and (14). Filed May 30, 1985; effective June 19, 1985.

Rules [391-4-2-.10](#), [391-4-2-.11](#), [391-4-2-.26](#), [391-4-2-.27](#), [391-4-2-.54](#), [391-4-2-.61](#) and [391-4-2-.64](#) have been repealed and new Rules of the same numbers adopted. Filed July 17, 1985; effective August 6, 1985.

Paragraphs (1), (2) and (3) of Rule [391-4-2-.47](#) have been amended. Filed July 17, 1985; effective August 6, 1985.

Paragraph (1) of Rules [391-4-2-.48](#), [391-4-2-.49](#), [391-4-2-.50](#), [391-4-2-.52](#), [391-4-2-.55](#), [391-4-2-.56](#), [391-4-2-.57](#), and [391-4-2-.58](#), have been amended. Filed July 17, 1985; effective August 6, 1985.

Rules 391-4-2-.101 through 391-4-2-.172 have been repealed and new Rules 391-4-2-.101 through 391-4-2-.170 adopted. Filed July 17, 1985; effective August 6, 1985.

Rule [391-4-5-.20](#) has been amended by the adoption of subparagraphs (2)(1)(3)., (3)(ff)1., ((4)(k)2., 4)(k)3. and (4)(k)4.. Filed September 4, 1985; effective September 24, 1985.

Rules [391-3-11-.01](#), [391-3-11-.02](#), [391-3-11-.03](#), 391-3-11.04, [391-3-11-.06](#), [391-3-11-.08](#), [391-3-11-.09](#), [391-3-11-.12](#), [391-3-11-.13](#) and [391-3-11-.14](#) amended. Filed September 6, 1985; effective September 26, 1985.

Rules [391-3-11-.05](#), [391-3-11-.07](#), [391-3-11-.10](#) and [391-3-11-.11](#) repealed and new Rules of the same numbers adopted. Filed September 6, 1985; effective September 26, 1985.

Rules [391-4-2-.52](#), [391-4-2-.54](#), [391-4-2-.55](#), [391-4-2-.57](#) and [391-4-2-.58](#) repealed and Emergency Rules 391-4-2-0.7-.52, 391-4-2-0.8-.54, 391-4-2-0.9-.55, 391-4-2-0.10-.57 and 391-4-2-0.11-.58 adopted in lieu thereof. Filed October 1, 1985; effective September 25, 1985, the date of adoption, to remain in effect for a period of 120 days, as specified by the Agency. These Emergency Rules were adopted to make the Georgia Migratory Bird Hunting Regulations coincide with those published by the U.S. Fish and Wildlife Service. (Said Emergency Rules will not be published; copies may be obtained from the Agency.)

Rule [391-4-3-.10](#) has been amended by the repeal of paragraphs (1) and (2) and by the adoption of new paragraphs (1) and (2). Filed October 16, 1985; effective November 5, 1985.

Rule [391-3-8-.01](#) has been repealed and a new Rule [391-3-8-.01](#) adopted. Filed October 29, 1985; effective November 18, 1985.

Rule [391-3-8-.02](#) has been amended. Filed October 29, 1985; effective November 18, 1985.

Rule [391-3-8-.12](#) has been repealed and Rules [391-3-8-.03](#) through [391-3-8-.11](#) renumbered as Rules [391-3-8-.04](#) through [391-3-8-.12](#); and, a new Rule [391-3-8-.03](#) adopted. Filed October 29, 1985; effective November 18, 1985.

Renumbered Rule [391-3-8-.04](#) has been repealed and a new Rule [391-3-8-.04](#) adopted. Filed October 29, 1985; effective November 18, 1985.

Renumbered Rule [391-3-8-.05](#) has been amended by the repeal of paragraph (7). Filed October 29, 1985; effective November 18, 1985.

Renumbered Rule [391-3-8-.09](#) has been amended by the repeal of paragraphs (2), (3) and (6) and by the adoption of new paragraphs (2), (3), (6) and (7). Filed October 29, 1985; effective November 18, 1985.

Renumbered Rule [391-3-8-.10](#) has been amended by the repeal of paragraph (1) and by the adoption of a new paragraph (1); said Rule has been further amended by renumbering subparagraph (4)(1) as subparagraph (4)(m) and by the adoption of a new subparagraph (4)(1). Filed October 29, 1985; effective November 18, 1985.

Renumbered Rule [391-3-8-.11](#) has been amended by the repeal of paragraph (1) and subparagraph (2)(d) and by the adoption of a new paragraph (1) and subparagraphs (2)(d) and (2)(h). Filed October 29, 1985; effective November 18, 1985.

Rules [391-4-2-.10](#), [391-4-2-.26](#), [391-4-2-.61](#), [391-4-2-.64](#), and 391-4-2-.101 through 391-4-2-.172 have been repealed and new Rules [391-4-2-.10](#), [391-4-2-.26](#), [391-4-2-.61](#), [391-4-2-.64](#) and 391-4-2-.101 through 391-4-2-.173 adopted. Filed July 31, 1986; effective August 20, 1986.

Paragraphs [391-4-2-.47](#) have been amended. Filed July 31, 1986; effective August 20, 1986.

Paragraphs (1) of Rules [391-4-2-.48](#), [391-4-2-.49](#) and [391-4-2-.50](#) have been repealed and new paragraphs (1) adopted. Filed July 31, 1986; effective August 20, 1986.

Chapter 391-3-11 has been amended by changing the authority citation within the Rules; by adopting paragraphs [391-3-1-.03](#); and, by the adoption of a new Rule [391-3-11-.15](#). Filed September 5, 1986; effective September 25, 1986.

Rule [391-4-2-.46](#) has been adopted. Filed October 22, 1986; effective November 11, 1986.

Paragraphs [391-4-2-.52](#) have been amended. Filed October 22, 1986; effective November 11, 1986.

Rule [391-4-2-.54](#) has been repealed and a new Rule [391-4-2-.54](#) adopted. Filed October 22, 1986; effective November 1, 1986.

Paragraphs (1) of Rules [391-4-2-.55](#), [391-4-2-.56](#), [391-4-2-.57](#) and [391-4-2-.58](#) have been amended. Filed October 22, 1986; effective November 11, 1986.

Rule [391-2-4-.03](#) has been amended by the repeal of subparagraph (2)(g) and by the adoption of a new subparagraph (2)(g). Filed October 23, 1986; effective November 12, 1986.

Rule [391-4-5-.19](#) has been amended by the adoption of subparagraph (d)12. Filed December 9, 1986; effective December 29, 1986.

Rule [391-4-5-.20](#) has been amended by the adoption of subparagraphs (1)(r)2., (1)(w), (3)(g)6. thru 8., and (3)(gg). Filed December 9, 1986; effective December 29, 1986.

Rule [391-3-1-.01](#) has been amended by the repeal of the main paragraph and by the adoption of a new main paragraph. Filed December 9, 1986; effective December 29, 1986.

Paragraphs 391-3-1-.02 and (9) have been amended. Filed December 9, 1986; effective December 29, 1986.

Rule [391-3-1-.03](#) has been amended by the adoption of subparagraphs (8)(c) 6. through 11. Filed December 9, 1986; effective December 29, 1986.

Chapter 391-3-14, entitled "Asbestos Removal and Encapsulation," containing Rules [391-3-14-.01](#) through [391-3-14-.03](#), adopted. Filed December 9, 1986; effective December 29, 1986.

Chapter 391-5-9, entitled "Submerged Cultural Resources" containing [391-5-9-.01](#) through [391-5-9-.07](#) adopted. Filed February 9, 1987; effective March 1, 1987.

Emergency Rule 391-4-2-0.12, which repealed Rule [391-4-2-.13](#) and adopted a new Rule 391-4-2-0.12-.13, has been adopted. Filed March 30, 1987, effective March 25, 1987, the date of adoption, to remain in effect for a period of 120 days, as specified by the Agency.

Said Emergency Rule was adopted to implement the legislative intent and to further public welfare which requires the Board of Natural Resources to set the fee for residents' wildlife management area stamps at or below \$15.60 and for non-residents' stamps at or below \$61.25 which must be purchased on or before April 1 in order to hunt on State wildlife management areas after such date. (This Emergency Rule will not be published; copies may be obtained from the Agency.)

Subparagraph [391-1-2-.01](#) has been amended. Filed April 24, 1987; effective May 14, 1987.

Rule [391-1-2-.02](#) has been amended by the repeal of subparagraph (2)(o) and by the adoption of new subparagraphs (2)(o) and (2)(p). Filed April 24, 1987; effective May 14, 1987.

Paragraph [391-1-2-.03](#) has been amended. Filed April 24, 1987; effective May 14, 1987.

Subparagraph 391-1-2-.066 has been amended and subparagraph 391-1-2-.067. adopted. Filed April 24, 1987; effective May 14, 1987.

Rule [391-1-2-.09](#) has been amended. Filed April 24, 1987; effective May 14, 1987.

Subparagraph [391-1-2-.15](#) and paragraph (3) have been amended. Filed April 24, 1987; effective May 14, 1987.

Paragraphs [391-1-2-.16](#) have been amended. Filed April 24, 1987; effective May 14, 1987.

Rule [391-1-2-.19](#) has been amended by the adoption of subparagraph (1)(e). Filed April 24, 1987; effective May 14, 1987.

Rule [391-1-2-.20](#) has been amended by the adoption of a paragraph (4). Filed April 24, 1987; effective May 14, 1987.

Paragraph [391-1-2-.22](#) has been amended. Filed April 24, 1987; effective May 14, 1987.

Paragraphs [391-1-2-.24](#) have been amended. Filed April 24, 1987; effective May 14, 1987.

Paragraph [391-1-2-.31](#) has been amended. Filed April 24, 1987; effective May 14, 1987.

Rule [391-1-2-.35](#) has been repealed and a new Rule [391-1-2-.35](#) adopted. Filed April 24, 1987; effective May 14, 1987.

Rule [391-1-2-.36](#) has been adopted. Filed April 24, 1987; effective May 14, 1987.

Rules [391-4-2-.10](#), [391-4-2-.13](#), [391-4-2-.14](#), [391-4-2-.26](#), [391-4-2-.27](#), [391-4-2-.61](#), [391-4-2-.64](#) and 391-4-2-.101 through 391-4-2-.173 repealed and Rules [391-4-2-.10](#), [391-4-2-.13](#), [391-4-2-.26](#), [391-4-2-.27](#), [391-4-2-.61](#), [391-4-2-.64](#) and 391-4-2-.101 through 391-4-2-.178 adopted. Filed July 16, 1987; effective August 5, 1987.

Rule [391-4-2-.15](#) has been amended. Filed July 16, 1987; effective August 5, 1987.

Paragraphs [391-4-2-.47](#) have been amended. Filed July 16, 1987; effective August 5, 1987.

Paragraph (1) of Rules [391-4-2-.48](#), [391-4-2-.49](#) and [391-4-2-.50](#) have been amended. Filed July 16, 1987; effective August 5, 1987.

Rule [391-4-2-.201](#) has been amended by amending subparagraphs (2)(b) and (5)(f) and by adopting a subparagraph (5)(g). Filed July 16, 1987; effective August 5, 1987.

Rules [391-3-10-.01](#), [391-3-10-.03](#), [391-3-10-.04](#), [391-3-10-.07](#), [391-3-10-.08](#), [391-3-10-.09](#) and [391-3-10-.10](#) repealed and new Rules of these numbers adopted. Filed September 2, 1987; effective September 22, 1987.

Rule [391-3-10-.02](#) has been amended by the repeal of paragraph (3) and by the adoption of a new paragraph (3); said Rule has been further amended by the adoption of paragraphs (5) and (6). Filed September 2, 1987; effective September 22, 1987.

Rule [391-3-10-.05](#) has been amended by the repeal of subparagraph (a)2. and the adoption of a new subparagraph (a)2. Filed September 2, 1987; effective September 22, 1987.

Rule [391-3-10-.06](#) has been amended by the repeal of subparagraph (3)(a) and by the adoption of a new subparagraph (3)(a); said Rule has been further amended by the adoption of subparagraph (3)(e). Filed September 2, 1987; effective September 22, 1987.

Rule [391-3-10-.11](#) has been adopted. Filed September 2, 1987; effective September 22, 1987.

Paragraphs (1) and (2) of Rule [391-4-2-.52](#) have been amended. Filed September 22, 1987; effective October 12, 1987.

Paragraph (1) of Rules [391-4-2-.46](#), [391-4-2-.54](#), [391-4-2-.55](#), [391-4-2-.56](#), [391-4-2-.57](#), and [391-4-2-.58](#) have been amended. Filed September 22, 1987; effective October 12, 1987.

Rule [391-3-1-.01](#) has been amended by the repeal of subparagraphs (jjj) and by the adoption of new subparagraphs (jjj) and by the adoption of new subparagraphs (jjj) and (www). Filed September 25, 1987; effective October 15, 1987.

Rule 391-3-.02 has been amended by the repeal of subparagraphs (2)(a)6., (2)(w), (2)(x), (2)(ii), (2)(mm), (2)(tt), (8)(b) and paragraph (9) and by the adoption of subparagraphs and paragraph of

these numbers; said Rule has been further amended by the adoption of a new subparagraph (2)(vv). Filed September 25, 1987; effective October 15, 1987.

Rules [391-3-11-.01](#) through [391-3-11-.15](#) have been amended to change references and authority and Rule [391-3-11-.16](#) has been adopted. Filed October 7, 1987; effective October 27, 1987.

Rule [391-2-4-.02](#) has been amended by the repeal of subparagraph (3)(c) and by the adoption of a new subparagraph (3)(c). Filed December 2, 1987; effective December 22, 1987.

Rule [391-3-1-.01](#) has been amended by the repeal of subparagraph (mmm) and by the adoption of a new subparagraph (mmm); said Rule has been further amended by the adoption of subparagraphs (xxx), (yyy), (zzz) and (aaaa). Filed March 25, 1988; effective April 14, 1988.

Rule [391-3-1-.02](#) has been amended by the repeal of subparagraph (4)(c) and paragraph (7) and by the adoption of a new subparagraph (4)(c) and a new paragraph (7). Filed March 25, 1988; effective April 14, 1988.

Rule [391-3-1-.02](#) has been amended by the repeal of subparagraphs (2)(a)9. and 2(gg)2.(i)(V) and by the adoption of new subparagraphs of these numbers. Filed May 3, 1988; effective May 23, 1988.

Rules [391-3-11-.01](#) through [391-3-11-.16](#) has been amended. Filed June 8, 1988; effective June 28, 1988.

Emergency Rule 391-3-6-0.13 containing Rule 391-3-6-0.13-.14, entitled "State Revolving Loan Program," was filed on April 1, 1988, having become effective March 23, 1988, the date of adoption, to remain in effect for a period of 120 days or until the effective date of a permanent Rule covering the same subject matter superseding this

Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted to allow the implementing of this Rule until it can be adopted permanently. (Said Emergency Rule will not be published; copies may be obtained from the Agency.)

Emergency Rule 391-3-6-0.13 repealed and Rule [391-3-6-.14](#) has been adopted. Filed July 8, 1988 effective July 28, 1988.

Emergency Rule 391-3-15-0.14, entitled "Underground Storage Tank Management," containing Rules 391-3-15-0.14-.01 through 391-3-15-0.14-.15, was filed on July 7, 1988, having become effective July 1, 1988, to remain effect for a period of 120 days or until the effective date of a permanent Charter superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted because there is an imminent peril to the public welfare if the receipt of Environmental Assurance Fees is not expedited to the maximum extent possible during an interim period prior to adoption of final rules. (Said Emergency Rule will not be published; copies may be obtained from the Agency.)

Rules [391-4-2-.10](#), [391-4-2-.26](#), [391-4-2-.27](#), [391-4-2-.61](#) and [391-4-2-.64](#) have been repealed and new Rules of these numbers adopted. Filed July 15, 1988; effective August 4, 1988.

Paragraphs (2) and (3) of Rule [391-4-2-.47](#) have been amended. Filed July 15, 1988; effective August 4, 1988.

Paragraph (1) of Rules [391-4-2-.48](#), [391-4-2-.49](#) and [391-4-2-.50](#) have been amended. Filed July 15, 1988; effective August 4, 1988.

Rules [391-4-2-.14](#), [391-4-2-.70](#) and [391-4-2-.71](#) have been adopted. Filed July 15, 1988; effective August 4, 1988.

Rules 391-4-2-.101 through 391-4-2-.179 have been repealed. Filed July 15, 1988; effective August 4, 1988.

Rules [391-4-11-.03](#), [391-4-11-.04](#), [391-4-11-.05](#), [391-4-11-.06](#) and [391-4-11-.07](#) have been repealed and new Rules of these numbers adopted. Filed July 15, 1988; effective August 4, 1988.

Chapter 391-4-12, entitled "Nuisance Alligator Harvest," containing Rules [391-4-12-.01](#) through [391-4-12-.06](#), was filed on July 15, 1988; effective August 4, 1988.

Chapter 391-4-13, entitled "Sale of Alligator Meat and Products," containing Rules [391-4-13-.01](#) through [391-4-13-.03](#), was filed on July 15, 1988; effective August 4, 1988.

Emergency Rule 391-4-2-0.15 containing the repeal of subparagraph 391-4-2-0.15-.70(ccc) was filed on August 29, 1988, effective August 24, 1988, the date of adoption, to remain in effect for a period of 120 days or until the effective date of a permanent repeal of the same subject matter, as specified by the Agency. Said paragraph was repealed because the Rogers Tract W.M.A. will not be leased to the State this year, and this Emergency Rule is necessary to avoid public confusion and to aid law enforcement on the land. (Said Emergency Rule will not be published; copies may be obtained from the Agency.)

Rules [391-4-2-.53](#) and [391-4-2-.54](#) have been repealed. Filed October 14, 1988; effective November 3, 1988.

Paragraphs (1) and (2) of Rule [391-4-2-.52](#) have been amended. Filed October 14, 1988; effective November 3, 1988.

Paragraphs (1) of Rules [391-4-2-.46](#), [391-4-2-.55](#), [391-4-2-.56](#), [391-4-2-.57](#) and [391-4-2-.58](#) have been amended. Filed October 14, 1988; effective November 3, 1988.

Rule [391-4-2-.60](#) has been amended. Filed October 14, 1988; effective November 3, 1988.

Chapter 391-3-15, entitled "Underground Storage Tank Management," containing Rules [391-3-15-.01](#) through [391-3-15-.15](#), has been adopted. Filed November 4, 1988; effective November 24, 1988.

Rules [391-3-6-.03](#) and [391-3-6-.06](#) have been amended. Filed December 9, 1988; effective December 29, 1988.

Rules [391-4-3-.03](#), [391-4-3-.06](#), [391-4-3-.07](#), [391-4-3-.08](#) have been repealed and new rules of the same titles adopted; Rule [391-4-3-.09](#) entitled "Public Fishing Areas" adopted. February 2, 1989; effective February 22, 1989.

Rule [391-3-5-.01](#) has been repealed and a new Rule of the same title adopted. Filed May 12, 1989; effective June 1, 1989.

Rule 319-3-5-.02 has been amended by the repeal of subparagraphs (f), (h), (n), (p) and (r) and by the adoption of new subparagraphs of the same letters and by the adoption of a new subparagraph (hh).

Rule [391-3-5-.04](#) has been repealed and a new Rule of the title adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.06](#) has been amended by the repeal of subparagraphs (a), (c)1. and (d)1., and by the adoption of new subparagraphs (a), (c)1. and (d)1. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.07](#) has been amended by the repeal of subparagraphs (3)(g), (5)(b)1., (5)(b)2. and paragraphs (4) and (10) and by the adoption of new subparagraphs (3)(b), (5)(b)1., (5)(b)2. and paragraphs (4) and (10) and by the adoption of a new subparagraph (11)(d)3.

Rule [391-3-5-.09](#) has been amended by the repeal of subparagraphs (a), (f)3. and (m) and by the adoption of new subparagraphs (a), (f)3. and (m). Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.10](#) has been repealed and a new Rule of the same title adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.12](#) has been repealed and a new Rule of the same title adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.14](#) has been amended by the repeal of paragraphs (4), (5), (7), (9) and subparagraph (10)(a), and by the adoption of new paragraphs (4), (5), (7), (9) and subparagraph (10)(a).

Rule [391-3-5-.17](#) has been repealed and a new Rule of the same title adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.18](#) has been repealed and a new Rule of the same title adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.19](#) has been repealed and a new Rule entitled "Secondary Maximum Contaminant Levels for Drinking Water" adopted. Filed may 12, 1989; effective June 1, 1989.

Rule [391-3-5-.20](#) has been repealed and a new Rule of the same title adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.21](#) has been repealed and a new Rule of the same title adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.22](#) has been repealed and a new Rule of the same title adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.23](#) has been repealed and a new Rule entitled "Microbiological Contaminant Sampling and Analytical Requirements" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.24](#) has been repealed and a new Rule entitled "Trihalomethanes" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.25](#) has been repealed and a new Rule entitled "Volatile Synthetic Organic Chemical Sampling and Analytical Requirements" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.26](#) has been repealed and a new Rule entitled "Sodium and Corrosion Control" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.27](#) has been repealed and a new Rule entitled "Monitoring Frequency and Analytical Methods for Radioactivity in Community Water Systems" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.28](#) has been repealed and a new Rule entitled "Alternative Analytical Techniques" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.29](#) has been repealed and a new Rule entitled "Laboratory Approval" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.30](#) has been repealed and a new Rule entitled "Reporting Requirements" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.31](#) has been repealed and a new Rule entitled "Monitoring of Consecutive Public Water Systems" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.32](#) has been repealed and a new Rule entitled "Public Notification" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.33](#) has been repealed and a new Rule entitled "Variances and Exemptions" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.34](#) has been repealed and a new Rule entitled "Emergencies" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.35](#) has been repealed and a new Rule entitled "Inspections and Investigations" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.36](#) has been repealed and a new Rule entitled "Enforcement" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.37](#) has been repealed and a new Rule entitled "State Primacy Maintenance" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.38](#) has been repealed and a new Rule entitled "Effective Date" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.39](#) has been repealed and a new Rule entitled "Public Water System Classification" adopted. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.40](#) has been repealed. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.41](#) has been repealed. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.42](#) has been repealed. Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.43](#) has been repealed and renumbered as [391-3-5-.34](#). Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.44](#) has been repealed and renumbered as [391-3-5-.35](#). Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.45](#) has been repealed and renumbered as [391-3-5-.36](#). Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.46](#) has been repealed and renumbered as [391-3-5-.37](#). Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.47](#) has been repealed and renumbered as [391-3-5-.38](#). Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.48](#) has been repealed and renumbered as [391-3-5-.39](#). Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.49](#) has been repealed and renumbered as [391-3-5-.31](#). Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.50](#) has been repealed and renumbered as [391-3-5-.24](#). Filed May 12, 1989; effective June 1, 1989.

Rule [391-3-5-.51](#) has been repealed. Filed May 12, 1989; effective June 1, 1989.

Chapter 391-3-6 has been amended. Filed May 31, 1989; effective June 20, 1989.

Chapter 391-3-4 has been amended by amending Rules [391-3-4-.01](#), [.02](#), [.03](#), [.04](#), [.06](#), [.07](#) and [.08](#); Rules [391-3-4-.05](#), [.09](#) and [.10](#) have been repealed and new Rules adopted and by adopting Rules [391-3-4-.11](#) thru [391-3-4-.19](#). Filed June 9, 1989; effective June 29, 1989.

Rule [391-2-4-.02](#) has been amended. Filed June 19, 1989; effective July 9, 1989.

Emergency Rule 391-3-6-0.16-.03, (containing Rule 391-3-6-0.16-.03(5)(d)(iv) and (v), modifies paragraph [391-3-6-.03](#) and adds new paragraph [391-3-6-.03](#) was filed on July 6, 1989; effective June 30, 1989, the date of adoption, remain in effect for a period of 120 days or until the effective date of a permanent Rule superseding this Emergency Rule, as specified by the Agency. (Said Emergency Rule will not be published, copies may be obtained from the Agency.)

Chapter 391-4-2 has been amended. Filed July 17, 1989; effective August 6, 1989.

Rule [391-4-11-.03](#) has been repealed and a new Rule entitled "Acquisition of Alligators" adopted. Filed July 17, 1989; effective August 6, 1989.

Rules [391-4-11-.04](#) through [391-4-11-.06](#) have been amended. Filed July 17, 1989; effective August 6, 1989.

Rules [391-4-11-.07](#) through [391-4-11-.09](#) have been amended. Filed July 17, 1989; effective August 6, 1989.

Rule [391-4-13-.02](#) has been repealed and a new Rule of the same title adopted. Filed July 17, 1989; effective August 6, 1989.

Rule [391-4-13-.03](#) has been amended and a new paragraph (f) adopted. Filed July 17, 1989; effective August 6, 1989.

Rule [391-2-4-.04](#) has been adopted. Filed August 24, 1989; effective September 13, 1989.

Emergency Rule 391-3-6-0.17-.03 which amended subparagraphs (2)(c), (3)(e), (5)(d)(i), (5)(d)(ii), (5)(d)(ii)8., (5)(d)(ii)10., (5)(d)(ii)11., added subparagraphs (5)(d)(ii)14., through (5)(d)(ii)31., amended footnote under subparagraph (5)(d)(ii); amended subparagraph (5)(d)(iii); repealed subparagraphs (5)(d)(iii)1. through (5)(d)(iii)52.; adopted new subparagraphs (5)(d)(iii)1. through (5)(d)(iii)89.; amended subparagraphs (6)(a), (6)(a)(i), (6)(b), (6)(c), (6)(c)(iii), paragraphs (7), (9), (11), (12); amended footnote (2) under paragraph (12) and amended paragraph (14) was filed on August 25, 1989; effective August 23, 1989, the date of adoption, to remain in effect for a period of 120 days or until the effective date of a permanent Rule superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted to protect the citizens of Georgia during an interim period prior to adoption of the final rule. (Said Emergency Rule will not be published, copies may be obtained from the Agency.)

Emergency Rule 391-3-6-0.18-.06 which amended subparagraphs (4)(d)5.(i); repealed subparagraphs (4)(d)5.(i)1. through (4)(d)5.(i)68.; adopted new subparagraphs (4)(d)5.(ii)1. through (4)(d)5.(ii)129.; amended subparagraphs (4)(d)5.(ii); (4)(d)5.(ii)(1) through (4)(d)5.(ii)(3); repealed subparagraphs (4)(d)5.(ii)(3)(a) through (4)(d)5.(ii)(3)(II); adopted new subparagraphs (4)(d)5.(ii)(3)(a) through (4)(d)5.(ii)(3)(t); amended subparagraphs (4)(d)5.(iii)(1), (4)(d)5.(iii)(2); repealed subparagraphs (4)(d)5.(iii)(4), (4)(d)5.(iii)(5); amended and renumbered subparagraph (4)(d)5.(iii)(6) to (4)(d)5.(iii)(4); and amended subparagraph (4)(d)5.(iv) was filed on August 25, 1989; effective August 23, 1989, the date of adoption, to remain in effect for a period of 120 days or until the effective date of a permanent Rule superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted to protect the citizens of Georgia during an interim period prior to adoption of the final rule. (Said Emergency Rule will not be published, copies may be obtained from the Agency.)

Rule [391-4-2-.52](#) has amended paragraphs (1) and (3) and adopted paragraphs (4) and (5). Filed September 12, 1989; effective October 2, 1989.

Rule [391-4-2-.55](#) has been amended. Filed September 12, 1989; effective October 2, 1989.

Rule [391-4-2-.56](#) has been amended. Filed September 12, 1989; effective October 2, 1989.

Rule [391-4-2-.57](#) has been amended. Filed September 12, 1989; effective October 2, 1989.

Rule [391-4-2-.58](#) has been amended. Filed September 12, 1989; effective October 2, 1989.

Rule [391-4-2-.60](#) has been amended. Filed September 12, 1989; effective October 2, 1989.

Chapter 391-3-11 has been amended. Filed October 31, 1989; effective November 20, 1989.

Emergency Rule 391-3-6-0.19-.03 which amended subparagraphs (5)(d)(iii)83 through (5)(d)(iii)89 and (5)(d)(v); added subparagraphs (5)(d)(iii)83 through (5)(d)(iii)89 and new paragraph (5)(d)(v) was filed on December 8, 1989; effective December 6, 1989, the date of adoption, to remain in effect for a period of 120 days or until the effective date of a permanent Rule superseding this Emergency Rule, as specified by the Agency. Said

Emergency Rule was adopted to protect the citizens of Georgia during an interim period prior to adoption of the final rule. (Said Emergency Rule will not be published, copies may be obtained from the Agency.)

Chapter 391-6-1 entitled "Regional Reservoirs" containing Rules [391-6-1-.01](#) through [391-6-1-.07](#) has been adopted. Filed December 8, 1989; effective December 28, 1989.

Rules [391-3-6-.03](#) and [391-3-6-.06](#) have been amended. Filed December 8, 1989; effective December 28, 1989.

Rule [391-3-7-.01](#) and [391-3-7-.02](#) have been amended. Filed December 12, 1989; effective January 1, 1990.

Rule [391-3-7-.03](#) has been amended and retitled "Land Disturbing Activity Permits". Filed December 12, 1989; effective January 1, 1990.

Rule [391-3-7-.04](#) has been amended and retitled "Erosion and Sedimentation Control Plan Requirements". Filed December 12, 1989; effective January 1, 1990.

Rule [391-3-7-.05](#) has been repealed and a new Rule entitled "Land Disturbing Activities Within the 100 Year Flood Plain" adopted. Filed December 12, 1989; effective January 1, 1990.

Rule [391-3-7-.06](#) has been repealed and a new Rule entitled "Retention of Undisturbed Vegetative Buffer" adopted. Filed December 12, 1989; effective January 1, 1990.

Rule [391-3-7-.07](#) has been repealed and a new Rule entitled "Land Disturbing Activities Within 100 Feet (Horizontal) of Trout Streams" adopted. Filed December 12, 1989; effective January 1, 1990.

Rule [391-3-7-.08](#) has been repealed and a new Rule entitled "Turbidity Limits for Stormwater Runoff Discharges" adopted. Filed December 12, 1989; effective January 1, 1990.

Rule [391-3-7-.06](#) has been amended and renumbered to [391-3-7-.09](#). Filed December 12, 1989; effective January 1, 1990.

Rule [391-3-7-.07](#) was renumbered to [391-3-7-.10](#). Filed December 12, 1989; effective January 1, 1990.

Chapter 391-3-15 has been amended. Filed January 29, 1990; effective February 18, 1990.

Rule [391-1-1-.01](#) have been amended. Filed January 30, 1990; effective February 19, 1990.

Rules [391-1-1-.02](#) and [.03](#) have been amended. Filed January 30, 1990; effective February 19, 1990.

Rules [391-1-1-.04](#) and [.05](#) have been adopted. Filed January 30, 1990; effective February 19, 1990.

Rules 391-1-12-.02(3), .06(1)(b) 2. and 3. have been amended; and 4. has been adopted. Filed January 30, 1990; effective February 19, 1990.

Rules [391-1-2-.08](#), [.10\(1\)](#), [.15\(3\)](#), [.16\(1\)](#), have been amended; .17(3) has adopted a new (3) and renumbered (3) to (4) and (4) to (5); .19(4) has been amended and (1)(f) adopted. Filed January 30, 1990; effective February 19, 1990.

Rule [391-1-2-.21](#) has been amended and subparagraph (8) repealed; .23(1)(l) has been amended and a new (1)(m) adopted and (1)(m) renumbered to (1)(n); .24(4) has been amended and .37 adopted. Filed January 30, 1989; effective February 19, 1990.

Chapter 391-3-2 has been amended. Filed April 3, 1990; effective April 23, 1990.

Rules [391-3-6-.02](#) through [391-3-6-.07](#) have been amended. Filed April 3, 1990; effective April 23, 1990.

Rule [391-3-6-.15](#) entitled "General Permit Requirements" adopted. Filed April 3, 1990; effective April 23, 1990.

Rules [391-3-6-.04](#) and [391-3-6-.06](#) have been amended. Filed July 6, 1990; effective July 26, 1990.

Chapter 391-5-10 entitled "Evaluation of Properties For The Georgia Register of Historic Places," containing Rules [391-5-10-.01](#) to [391-5-10-.04](#) adopted. Filed July 12, 1990; effective August 1, 1990.

Chapter 391-5-11 entitled "Preliminary and Final Certification of Rehabilitated Historic Properties," containing Rules [391-5-11-.01](#) to [391-5-11-.05](#) adopted. Filed July 12, 1989; effective August 1, 1990.

Rules [391-4-2-.10](#); [.14](#); [.26](#); [.47](#); [.48](#); [.61](#); [.64](#); [.70](#); [.71](#) have been amended. Filed July 24, 1990; effective August 13, 1990.

Rules 391-4-11-.02;(5) and (6) has been adopted; Rules [391-4-11-.03](#); [.05\(e\)](#); [.08](#); [.09\(2\)](#) have been amended. Filed July 24, 1990; effective August 13, 1990.

Rules [391-4-13-.02](#) and [.03\(1\)\(a\)](#) have been amended. Filed July 24, 1990; effective August 13, 1990.

Rule [391-4-12-.05](#) have been amended. Filed July 24, 1990; effective August 13, 1990.

Rule [391-4-2-.09](#), [.52](#), [.55](#) through [.58](#) have been amended. Filed August 30, 1990; effective September 19, 1990.

Chapter 391-3-8 has been amended. Filed August 31, 1990; effective September 20, 1990.

Emergency Rule 391-5-11-0.20-.01(12)(d) was filed on October 4, 1990; effective September 28, 1990, the date of adoption to remain in effect for a period of 120 days or until the effective date of a permanent Rule superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted in order to protect the welfare of Georgia citizens and others who are participating in the rehabilitation of historic properties. (Said Emergency Rule will not be published; copies may be obtained from the Agency.)

Rule [391-2-4-.05](#) has been adopted. Filed October 25, 1990; effective November 14, 1990.

Chapter 391-3-11 has been amended. Filed November 2, 1990; effective November 22, 1990.

Chapter 391-3-5 has been amended. Filed December 4, 1990; effective December 24, 1990.

Rules [391-3-1-.01](#), [.02](#) and [.03](#) have been amended. Filed December 20, 1990; effective January 9, 1991.

Chapter 391-3-16 entitled "Rules for Environmental Planning Criteria" containing Rules [391-3-16-.01](#) through [391-3-16-.03](#) has been adopted. Filed December 27, 1990; effective March 28, 1990, as specified by certification of this Agency.

Rules [391-3-6-.02](#), [.03](#) and [.06](#) have been amended. Filed February 15, 1991; effective March 7, 1991.

Rule [391-4-3-.03](#) has been repealed and a new Rule, same title adopted; Rule [391-4-3-.10](#) has been amended. Filed March 1, 1991; effective March 21, 1991.

Chapters 391-5-10 and 391-5-11 have been amended. Filed April 15, 1991; effective May 5, 1991.

Chapter 391-3-17 entitled "Radioactive Materials" containing Rules [391-3-17-.01](#) to [391-3-17-.09](#) have been adopted. Filed May 2, 1991; effective May 22, 1991.

Rules [391-5-3-.03](#) and [391-5-3-.12](#) have been adopted. Filed May 30, 1991; effective June 19, 1991.

Chapter 391-4-2 has been amended. Filed July 17, 1991; effective August 6, 1991.

Rules [391-4-9-.01](#) and [.03](#) have been amended. Filed July 17, 1991; effective August 6, 1991.

Rule [391-4-11-.04](#) has been repealed and a new Rule entitled "Specifications for Alligator Farms" adopted. Filed July 17, 1991; effective August 6, 1991.

Rule [391-4-13-.02](#) has been amended. Filed July 17, 1991; effective August 6, 1991.

Rule [391-2-4-.04](#) has been amended. Filed July 30, 1991; effective August 19, 1991.

Rules [391-3-15-.01](#).02, .04 through .13 have been amended. Filed August 8, 1991; effective August 28, 1991.

Chapter 391-3-4 has been amended. Filed September 4, 1991; effective September 24, 1991.

Rules [391-4-2-.50](#), [.52\(1\)](#), [\(3\)](#), [\(4\)](#), [.55\(1\)](#), [.57\(1\)](#), [.58\(1\)](#) have been amended. Filed September 10, 1991; effective September 30, 1991.

Subparagraph (a) of Rule [391-3-1-.02](#) has been amended. Filed September 27, 1991; effective October 17, 1991.

Rule [391-4-2-.46](#) has been amended. Filed October 7, 1991; effective October 27, 1991.

Chapter 391-3-11 has been amended. Filed December 9, 1991; effective December 29, 1991.

Rules [391-3-16-.04](#) and [.05](#) have been adopted. Filed December 20, 1991; effective January 9, 1992.

Emergency Rule 391-4-4-0.21-.01 was filed on January 31, 1992, effective January 29, 1992, the date of adoption, to remain in effect for a period of 120 days or until the effective date of a permanent Rule covering the same subject matter superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted to define the term "exotic fish" thereby preventing the importation of fish not native to Georgia waters that could represent an imminent peril to the public, safety or welfare of the citizens of Georgia. (Emergency Rule will not be published; copies may be obtained from the Agency).

The Georgia Department of Natural Resources has adopted Emergency Rules 391-4-2-0.22-.13 and 391-4-2-0.23-.14. Filed February 28, 1992; effective February 26, 1992, the date of adoption, to remain in effect for 120 days or until the effective date of a permanent Rule covering the same subject matter superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted to prevent an imminent threat to public welfare and to protect the citizens of Georgia from chaos resulting from a delay in increasing hunting and fishing license fees. (Emergency Rule will not be published; copies may be obtained from the Agency).

Chapter 391-3-18 entitled "Environmentally Sensitive Property," containing Rules [391-3-18-.01](#) to [.04](#) has been adopted. Filed February 7, 1992, effective February 27, 1992.

Paragraphs (4) and (5) of Rule [391-2-4-.04](#) have been amended. Filed February 26, 1992; effective March 17, 1992.

Emergency Rules 391-4-2-0.22-.13 and 391-4-2-0.23-.14(2) were repealed and permanent Rules [391-4-2-.13](#) and [391-4-2-.14](#) adopted. Filed March 16, 1992; effective April 5, 1992.

Emergency Rule 391-3-6-0.24-.04 was filed May 1, 1992, effective April 29, 1992, the date of adoption, to remain in effect for a period of 120 days or until the effective date of a permanent Rule covering the same subject matter superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted to "make the Rules consistent with Federal Law". (Emergency Rule will not be published; copies may be obtained from the Agency).

Rules [391-4-3-.02](#), [.03\(1\)](#), [.09](#) were repealed and readopted; [.04\(e\)](#) adopted; [.06\(g\)](#), [\(h\)](#) repealed and readopted and [\(i\)](#) adopted; [.10\(4\)](#) adopted. Filed June 5, 1992; effective June 25, 1992.

Chapter 391-4-2 and Rules [391-4-9-.02](#) have been amended. Filed June 5, 1992; effective June 25, 1992.

Chapter 391-3-5 has been amended. Filed June 25, 1992; effective July 15, 1992.

Chapter 391-2-1 entitled "River Houses", containing Rules [391-2-1-.01](#) to [391-2-1-.08](#) has been adopted; Chapters 391-2-2 and 391-2-3 have been repealed and new Chapters, same titles, adopted. Filed June 26, 1992; effective July 16, 1992.

Chapter 391-3-10 has been repealed and Emergency Chapter 391-3-10-0.25 of same title containing Emergency Rules 391-3-10-0.25-.01 to 391-3-10-0.25-.35 adopted. Filed July 21, 1992; effective July 17, 1992, the date of adoption, to remain in effect for a period of 120 days or until the effective date of a permanent Rule covering the same subject matter superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted to make the Rules comply with the Georgia Motor Vehicle Emission Inspection and Maintenance Act as amended by the 1992 General Assembly to provide additional authorities to satisfy the Federal Clean Air Act Amendments of 1990. (Emergency Rule will not be published; copies may be obtained from the Agency).

Rule [391-2-4-.04](#) has been amended. Filed July 22, 1992; effective August 11, 1992.

Chapter 391-3-3 has been amended by changing name to "Surface Mining"; Rules [391-3-3-.01](#) to [391-3-3-.08](#) have been amended; .09 repealed and a new Rule entitled "Protection of the Environment and Contiguous Natural and Other Resources" adopted; .10 entitled "Confidentiality of Information" adopted. Filed July 23, 1992; effective August 12, 1992.

Emergency Rule 391-3-6-0.24-.04 has been repealed and a permanent Rule, same title, adopted. Filed August 19, 1992; effective September 8, 1992.

Rules [391-3-1-.01](#), [.02](#), [.03](#) have been amended. Filed August 27, 1992; effective September 16, 1992.

Rules [391-4-2-.46](#), [.52](#), [.55](#), [.56](#), [.57](#), and [.58](#) have been amended. Filed August 28, 1992; effective September 17, 1992.

Rule [391-2-1-.05](#) has been amended. Filed September 1, 1992; effective September 21, 1992.

Rule [391-2-4-.06](#) has been adopted. Filed October 1, 1992; effective October 21, 1992.

Chapter 391-3-11 has been amended. Filed October 29, 1992; effective November 18, 1992.

Rules [391-3-1-.01](#), [.02](#), [.03](#), [.05](#), [.09](#), [.10](#), [.11](#), and [.12](#) have been amended. Filed November 2, 1992; effective November 22, 1992.

Emergency Chapter 391-3-10-0.25 has been repealed and a permanent Chapter 391-3-10 of same title has been adopted. Filed November 2, 1992; effective November 22, 1992.

Rules [391-4-10-.02](#), [.06](#), [.09](#) were amended and paragraph (3) of Rule [391-4-10-.03](#) adopted. Filed November 4, 1992; effective November 24, 1992.

Rule [391-5-3-.12](#) has been amended. Filed November 20, 1992; effective December 10, 1992.

Rules [391-3-13-.12](#) and [.13](#) were amended. Filed November 24, 1992; effective December 14, 1992.

Rule [391-4-2-.52](#) has been amended. Filed December 14, 1992; effective January 3, 1993.

Rule [391-3-4-.17](#) has been amended, [.19](#) repealed and a new Rule entitled "Scrap Tire Management" adopted; [.20](#) entitled "Enforcement" adopted. Chapter 391-3-15 has been amended. Filed December 17, 1992; effective January 6, 1993.

Rules [391-3-6-.02](#), [.03](#), [.06](#), [.08](#), [.09](#).10, [.12](#), [.14](#) have been amended. Filed April 8, 1993; effective April 28, 1993.

Chapter 391-3-19 entitled "Hazardous Site Response" containing Rules [391-3-19-.01](#) to [391-3-19-.03](#) have been adopted. Filed May 27, 1993; effective June 16, 1993.

Chapter 391-4-2 has been amended. Filed June 3, 1993; effective June 23, 1993.

Chapter 391-3-4 has been amended; Rules [391-3-5-.02](#) and [.17](#) have been amended; [391-3-5-.40](#) has been adopted. Filed June 7, 1993; effective June 27, 1993.

Rules [391-3-1-.02](#), [.03](#) have been amended. Filed July 1, 1993; effective July 21, 1993.

Emergency Rule 391-4-9-0.26-.04 was filed and effective July 23, 1993, the date of adoption, to remain in effect for 120 days or until the effective date of a permanent Rule covering the same subject matter superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted due to "a threat to human health through the importation of non-domesticated wild animals..." (Emergency Rule will not be published; copies may be obtained from the Agency.)

Rule [391-2-4-.04](#) has been amended. Filed July 26, 1993; effective August 15, 1993.

Rules [391-3-6-.03](#) and [.12](#) were amended. Filed August 9, 1993; effective August 29, 1993.

Rules [391-1-1-.01](#) to [.03](#), [391-4-2-.52](#), [.55](#) to [.58](#) have been amended; Chapters 391-4-11, 391-4-12 and 391-4-13 have been repealed and new Chapters of same titles adopted. Filed August 27, 1993; effective September 16, 1993.

Rules [391-3-4-.01](#), [.08](#), [.12](#) have been amended. Filed October 7, 1993; effective October 27, 1993.

Emergency Rule 391-5-12-0.27 was filed October 28, 1993; effective October 27, 1993, the date of adoption, to remain in effect for 120 days or until the effective date of a permanent Rule covering the same subject matter superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted "to allow the issuance of permits for construction and repair of boat docks..." (Emergency Rule will not be published; copies may be obtained from the Agency.)

Rules [391-3-1-.02](#), [.03](#) have been amended. Filed October 28, 1993; effective November 17, 1993.

Rule [391-4-9-.04](#) has been adopted. Filed October 29, 1993; effective November 18, 1993.

Rule [391-3-10-.14](#) has been amended; Rule [391-3-10-.36](#) and Chapter 291-3-20 have been adopted. Filed November 1, 1993; effective November 21, 1993.

Emergency Rule 391-3-17-0.28-.03 was filed December 9, 1993, effective December 8, 1993, the date of adoption to remain in effect for a period of 120 days or until the effective date of a permanent Rule superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted "to maintain in good standing the Agreement between the State of Georgia and the United States Nuclear Regulatory Commission; and to adequately protect the public health and safety related to the receipt, use and possession of radioactive materials." (Said Emergency Rule will not be published; copies may be obtained from the Agency.)

Chapter 391-3-11 has been amended. Filed January 27, 1994; effective February 16, 1994.

Rule [391-3-19-.02](#) has been amended; .04 and .05 have been adopted. Filed January 31, 1994; effective February 20, 1994.

Rules [391-4-3-.03](#), [.10\(4\)](#) have been amended and Chapter 391-4-14 has been adopted. Filed February 4, 1994; effective February 24, 1994.

Chapter 391-3-17 has been amended. Filed February 24, 1994; effective March 16, 1994.

Chapter 391-3-5 has been amended. Filed March 10, 1994; effective March 30, 1994.

Chapter 391-3-21 entitled "Grant Program" containing [391-3-21-.01](#), .02 submitted April 14, 1994.

Chapter 391-3-22 entitled "Clean Fueled Fleets" containing Rules [391-3-22-.01](#) to [.11](#) has been adopted. Filed May 2, 1994; effective May 22, 1994.

Chapter 391-5-12 entitled "Permitting Boat Docks at High Falls State Park Lake", containing Rules [391-5-12-.01](#) to [.08](#), has been adopted. Filed May 5, 1994; effective May 25, 1994.

Rules [391-3-6-.05](#), [.15](#) has been amended and .16, .17 adopted. Filed May 9, 1994; effective May 29, 1994.

Chapter 391-5-13 entitled "State and Federal Grant Programs" submitted May 11, 1994.

Chapter 391-7-1 entitled "Pollution Prevention Actions Grant Programs" submitted May 11, 1994.

Rules [391-3-20-.01](#), [.02](#), [.09](#), [.18](#), [.21](#); [391-3-1-.01](#), [.02](#) have been amended; [391-3-1-.13](#) adopted. Filed May 24, 1994; effective June 13, 1994.

Grant [391-3-21-.03](#) submitted May 25, 1994.

Grant [391-5-13-.02](#), [.03](#) submitted May 26, 1994.

Grant [391-5-13-.04](#) submitted June 1, 1994.

Rules [391-4-2-.02](#), [.10](#), [.11](#), [.15](#), [.26](#), [.47](#), [.48](#), [.63](#), [.70](#), [.71](#) have been amended and [.17](#) adopted. Filed June 2, 1994; effective June 22, 1994.

Grant [391-5-13-.05](#) submitted June 10, 1994.

Grant [391-3-21-.04](#) submitted June 27, 1994.

Rules [391-1-1-.01](#), [.02](#), [.03](#) have been amended. Filed June 29, 1994; effective July 19, 1994.

Chapters 391-5-1 to 5-6 have been amended. Filed June 30, 1994; effective July 20, 1994.

Grant [391-3-21-.03](#) submitted July 1, 1994.

Rule [391-3-19-.02](#), [.05](#) have been amended; [.06](#) to [.08](#) adopted. Filed July 1, 1994; effective July 21, 1994.

Rules [391-3-1-.01](#) to [.03](#) have been amended. Filed July 28, 1994; effective August 17, 1994.

Grant [391-3-21-.04](#) submitted August 15, 1994.

Chapter 391-3-20 and Rules [391-3-1-.02](#) and [391-3-10-.14](#), [.36](#) have been amended. Filed August 31, 1994; effective September 20, 1994.

Rules [391-4-2-.52](#), [.55](#) to [.58](#) have been amended. Filed September 1, 1994; effective September 21, 1994.

Grants [391-3-21-.01](#), [.02](#) submitted September 27, 1994.

Chapter 391-3-17 has been amended. Filed October 4, 1994; effective October 24, 1994.

Rules [391-3-1-.01](#) to [.03](#) have been amended and [.14](#) adopted. Filed October 31, 1994; effective November 20, 1994.

Chapter 391-3-11 has been amended. Filed December 6, 1994; effective December 26, 1994.

Rules [391-2-4-.02](#); [391-3-2-.02](#), [.04](#); [391-3-6-.07](#) have been amended. Filed December 9, 1994; effective December 29, 1994.

Editors Note: [391-5-13-.06](#) to .09 were submitted as part of the disbursements register and will not be published. This register is open for public inspection.

Grant [391-5-13-.10](#) submitted December 29, 1994.

Chapter 391-3-15 has been amended. Filed February 3, 1995; effective February 23, 1995.

Rules [391-2-4-.07](#) and [391-3-19-.09](#) have been adopted; [391-3-19-.02](#), .03, .06 were amended. Filed February 28, 1995; effective March 20, 1995.

Grant [391-5-13-.05](#) submitted March 13, 1995.

Rules [391-3-10-.36](#), [391-3-20-.12](#) and [391-3-20-.17](#) have been reserved. Filed April 28, 1995; effective May 18, 1995.

Emergency Rule 391-2-4-0.29-.03 was filed and effective May 24, 1995, the date of adoption to remain in effect for a period of 120 days or until the effective date of a permanent Rule superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted to "protect the citizens of Georgia from an imminent peril during an interim period prior to adoption of a final Rule." (Emergency Rule will not be published; copies may be obtained from the Agency.)

Emergency Rule 391-3-6-0.30-.18 was filed July 3, 1995, effective June 28, 1995, the date of adoption to remain in effect for a period of 120 days or until the effective date of a permanent Rule superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted to "protect the citizens of Georgia during a interim period prior to adoption of the final Rule." (Emergency Rule will not be published; copies may be obtained from the Agency.)

Chapter 391-4-2 and Rules [391-4-12-.02](#), [.03](#); [391-4-11-.04](#), .09 have been amended. Filed May 25, 1995; effective June 14, 1995.

Rules [391-3-1-.01](#), [.02](#), [.03](#) have been amended. Filed June 30, 1995; effective July 20, 1995.

Grant [391-3-21-.03](#) submitted July 26, 1995.

Rule [391-2-4-.03](#) has been amended. Filed August 24, 1995; effective September 13, 1995.

Rules [391-4-2-.50](#), [.52](#), [.55](#), [.56](#) to [.58](#) have been amended. Filed August 25, 1995; effective September 14, 1995. 1999.

Rules [391-3-1-.01](#), [.02](#); 391-3-.10-.36 and Chapter 391-3-20 have been amended. Filed August 28, 1995; effective September 17, 1995.

Chapter 391-3-6 has been amended. Filed August 30, 1995; effective September 19, 1995.

Grants [391-3-21-.01](#), .02, .04 submitted September 20, 1995.

Rule [391-3-6-.18](#) has been amended and .19 has been adopted. Filed October 6, 1995; effective October 26, 1995.

Grant [391-5-13-.04](#) submitted October 23, 1995.

Emergency Rule 391-4-3-0.31-.10 was filed November 3, 1995, effective November 1, 1995, the date of adoption to remain in effect for a period of 120 days or until the effective date of permanent Rule superseding this Emergency Rule, as specified by the Agency. Said Emergency Rule was adopted "in order to protect the citizens' of Georgia from imminent peril". (Emergency Rule will not be published; copies may be obtained from the Agency.)

Rule [391-2-4-.04](#) has been amended. Filed November 3, 1995; effective November 23, 1995.

Grant [391-3-21-.05](#) submitted November 30, 1995.

Chapter 391-3-11 amended. Filed December 8, 1995; effective December 28, 1995.

Rule [391-3-19-.09](#) amended. Filed December 11, 1995; effective December 31, 1995.

Rule [391-2-4-.08](#) has been amended and Chapter 391-4-6 entitled "Sapelo Island General Operating and Access Procedures" has been adopted. Filed January 25, 1996; effective February 14, 1996. Paragraph (3) of Rule [391-4-2-.02](#) has been adopted. Filed February 28, 1996; effective March 19, 1996.

Emergency Rule 391-3-6-0.32 was filed on May 1, 1996, effective April 25, 1996, the date of adoption, to remain in effect 120 days or until the effective date of a permanent Rule covering the same subject matter superseding this Emergency Rule, as specified by the Agency. Said Emergency Rules were adopted to "protect the citizens of Georgia during an interim period prior to adoption of the final Rule". (This Emergency Rule will not be published; copies may be obtained from the Agency.)

Grant [391-3-21-.04](#) submitted May 20, 1996.

Rule [391-2-4-.07](#) has been amended. Filed May 29, 1996; effective June 18, 1996.

Rules [391-4-2-.10](#), [.26](#), [.48](#), [.70](#), [.71](#) have been amended; Rule [391-4-9-.02](#) has been repealed and a new Rule adopted. Filed May 30, 1996; effective June 19, 1996.

Rules [391-3-1-.01](#), [.02](#), [.03](#) and [391-4-14-.01](#) have been amended.

Rules [391-3-14-.04](#) to [.10](#) have been adopted. Filed June 3, 1996; effective June 23, 1996.

Emergency Rule 391-3-20-0.33 was filed on June 4, 1996; effective May 29, 1996, the date of adoption, to remain in effect for 120 days or until the effective date of a Permanent Rule covering the same subject matter superseding this Emergency Rule, as specified by the Agency.

Said Emergency Rule was adopted to comply with O.C.G.A. Section [12-9-1](#) et seq. (This Emergency Rule will not be published; copies may be obtained from the Agency.)

Rules [391-3-10-.01](#), [.12](#), [.16](#), [.36](#) have been amended. Filed June 4, 1996; effective June 24, 1996.

Rules [391-3-15-.01](#), [.02](#), [.04](#) to [.09](#), [.11](#) to [.13](#) have been amended. Filed June 6, 1996; effective June 26, 1996.

Chapter 391-3-23 entitled "Petroleum Pipeline Eminent Domain Permit Procedures" containing Rules [391-3-23-.01](#) to 393-3-23-.08 has been adopted. Filed June 18, 1996; effective July 8, 1996.

Grant [391-3-21-.05](#) submitted June 26, 1996.

Chapter 391-3-24 entitled "Lead-Based Paint Abatement and Certification" containing

Rules [391-3-24-.01](#) to [.08](#) has been adopted. Filed June 28, 1996; effective July 18, 1996.

Emergency Rule 391-3-6-0.32 has been repealed and a new Chapter 391-3-6 adopted. Filed July 10, 1996; effective July 30, 1996.

Grant [391-3-21-.06](#) submitted July 11, 1996.

Grant [391-5-13-.04](#) submitted August 14, 1996.

Rules [391-3-1-.02](#), [.12](#) have been amended. Chapter 391-3-20 has been amended. Filed August 26, 1996; effective September 15, 1996.

Rule [391-3-15-.13](#) has been amended. Filed September 3, 1996; effective September 23, 1996.

Rules [391-4-2-.52](#), [.55](#), [.56](#), [.57](#), [.58](#) have been amended. Rule [391-4-2-.72](#) has been adopted. Filed September 6, 1996; effective September 26, 1996.

Rules [391-4-3-.05](#), [.06](#), [.07](#), [.09](#), [.11](#) have been repealed and new

Rules adopted. Rules [391-4-3-.13](#), [.14](#) have been adopted. Filed September 11, 1996; effective October 1, 1996.

Rule [391-3-6-.03](#) has been amended. Filed October 17, 1996; effective November 6, 1996.

Chapter 391-3-11 has been amended. Filed December 10, 1996; effective December 30, 1996.

Grant [391-5-13-.01](#) submitted December 27, 1996.

Emergency Rules 391-2-4-0.34-.04 and 391-2-4-0.35-.09 were filed and effective on January 29, 1997, the date of adoption, to remain in effect for 120 days or until the effective date of a Permanent Rule covering the same subject matter superseding this Emergency Rule is adopted, as specified by the Agency. Said Emergency Rules were adopted to protect the resource from an imminent peril during an interim period prior to adoption of a final Rule. (This Emergency Rule will not be published; copies may be obtained from the Agency.)

Rules [391-4-3-.03](#), [.06](#), [.08](#) have been amended. Filed January 29, 1997; effective February 18, 1997.

Grant Chapter 391-7-2 submitted March 17, 1997.

Rules [391-3-17-.01](#) to [.07](#), [.10](#) have been amended. Filed April 16, 1997; effective May 6, 1997.

Rules [391-2-4-.04](#), [391-4-3-.06](#), [.09](#) have been amended. Filed April 23, 1997; effective May 13, 1997.

Rules [391-3-6-.03](#), [.06](#), [.12](#), [.14](#) have been amended. Filed May 2, 1997; effective May 22, 1997.

Rules [391-2-4-.08](#), [391-4-2-.10](#), [.11](#), .26, .48 have been amended; .18 has been adopted; .62 has been repealed; .70, .71 have been repealed and new Rules adopted. Filed June 2, 1997; effective June 22, 1997.

Rules [391-3-1-.01](#) to [.03](#), [.13](#); [391-3-20-.01](#), [.03](#) to [.07](#), [.09](#) to [.12](#), .16 to .19, .21 have been amended. Filed June 3, 1997; effective June 23, 1997.

Grant [391-3-21-.05](#) submitted June 30, 1997.

Rules [391-3-4-.04](#) to [.07](#), [.13](#) have been amended. Filed July 31, 1997; effective August 20, 1997.

Rules [391-4-2-.49](#), [.52](#), [.55](#) to [.58](#) have been amended. Filed August 27, 1997; effective September 16, 1997.

Rules [391-3-5-.02](#), [.04](#) to [.07](#), [.09](#), [.10](#), [.14](#), [.17](#) to [.25](#), [.27](#) to [.29](#), [.39](#) have been amended. Filed September 26, 1997; effective October 16, 1997.

Grant 391-2-5 entitled "Coastal Incentive Grant Program" submitted October 1, 1997.

Grants [391-3-21-.01](#), .02 submitted October 2, 1997.

Emergency Rule 391-3-20-0.36-.04, [.09](#) was filed on October 17, 1997, having become effective on October 15, 1997, the date of adoption, to remain in effect for 120 days or until the effective date of a Permanent Rule covering the same subject matter superseding this Emergency Rule is adopted, as specified by the Agency. Said Emergency Rule was adopted to make more test

stations available for testing vehicle emissions. (This Emergency Rule will not be published; copies may be obtained from the Agency.)

Rule [391-5-1-.03](#) has been amended. Filed May 14, 1999; effective June 3, 1999.

Rule [391-3-6-.20](#) has been adopted. Filed June 16, 1999; effective July 6, 1999.

Rules [391-3-1-.01](#), [.02](#), [.03](#), [.13](#), [391-3-20-.01](#), [.05](#), [.21](#) have been amended. Filed June 18, 1999; effective July 8, 1999.

Grant [391-3-21-.05](#) submitted July 9, 1999.

Rule [391-3-19-.03](#) has been amended. Filed August 6, 1999; effective August 26, 1999.

Rules [391-4-2-.46](#), [.49](#), [.52](#), [.55](#) to [.58](#) have been amended. Rule [391-4-2-.51](#) has been repealed and a new Rule adopted. Filed August 26, 1999; effective September 15, 1999.

Chapter 391-3-26 entitled "Commercial Environmental Laboratories" has been adopted. Filed September 3, 1999; effective September 23, 1999.

Rules [391-3-1-.01](#), [.02](#), [.03](#); [391-3-20-.01](#), [.03](#) to [.07](#), [.09](#) to [.16](#), [.18](#), [.21](#), [.22](#); [391-4-3-.03](#), [.09](#), [.13](#), [.14](#) have been amended. Filed September 17, 1999; effective October 7, 1999.

Rules [391-3-5-.02](#), [.04](#), [.14](#), [.26](#), [.33](#), [.40](#), [.41](#) have been amended. Filed September 24, 1999; effective October 14, 1999.

Grant [391-5-13-.04](#) submitted October 1, 1999.

Rule [391-2-4-.04](#) has been amended. Filed October 28, 1999; effective November 17, 1999.

Rules [391-3-11-.01](#) to [.18](#) have been amended. Rule [391-3-11-.19](#) has been repealed. Filed October 27, 2000; effective November 16, 2000.

Rules [391-3-19-.02](#), [.07](#), Appendix I have been amended, Appendix IV has been adopted. Filed November 3, 1999; effective November 23, 1999.

Rule [391-2-4-.11](#) has been adopted. Rules [391-3-20-.06](#), [.09](#), [.11](#) to [.18](#), [.20](#) have been amended. Filed December 2, 1999; effective December 22, 1999.

Grant [391-3-21-.04](#) submitted December 28, 1999.

Rules [391-3-1-.01](#), [.02](#), [.03](#) have been amended. Filed January 27, 2000; effective February 16, 2000.

Rule [391-3-6-.03](#) has been amended. Filed February 7, 2000; effective February 27, 2000.

Rule [391-3-6-.03](#) has been amended. Filed April 12, 2000; effective May 2, 2000.

Grant [391-3-21-.01](#) submitted May 8, 2000.

Rule [391-4-2-.26](#) has been amended. Filed June 1, 2000; effective June 21, 2000.

Rules [391-3-6-.06](#), [.20](#) have been amended. Filed June 26, 2000; effective July 16, 2000.

Grant [391-3-21-.05](#) submitted July 7, 2000.

Rules [391-3-1-.01](#), [.02](#), [.03](#) have been amended. Filed July 27, 2000; effective August 16, 2000.

Chapter 391-1-4 entitled "Georgia Greenspace Program" has been adopted. Filed August 15, 2000; effective September 4, 2000.

Rules [391-4-2-.46](#), [.49](#), [.52](#), [.55](#) to [.58](#) have been amended. Filed August 28, 2000; effective September 17, 2000.

Rules [391-3-5-.02](#), [.04](#), [.09](#), [.12](#), [.14](#), [.15](#), [.17](#), [.18](#), [.20](#), [.24](#), [.30](#), [.32](#), [.39](#), [.40](#), [.42](#) have been amended. Filed September 29, 2000; effective October 19, 2000.

Grant [391-3-21-.04](#) submitted October 5, 2000.

Rules [391-4-3-.06](#), [.13](#), [.14](#) have been amended. Filed October 11, 2000; effective October 31, 2000.

Rules [391-3-11-.01](#) to [.18](#) has been amended. Rule [391-3-11-.19](#) has been repealed. Filed October 27, 2000; effective November 16, 2000.

Grant [391-3-21-.09](#) submitted October 30, 2000.

Chapter 391-3-7 has been repealed and a new Chapter adopted. Filed November 2, 2000; effective November 22, 2000. Rules [391-3-1-.01](#), [.02](#), [.03](#), [391-3-20-.01](#), [.03](#), [.04](#), [.05](#), [.07](#), [.08](#), [.09](#), [.11](#), [.12](#), [.13](#), [.15](#), [.17](#), [.18](#), [.19](#), [.21](#), [.22](#) have been amended. Filed December 8, 2000; effective December 28, 2000.

Rule [391-3-7-.05](#) has been amended. Filed December 12, 2000; effective January 1, 2001.

Rule [391-3-6-.21](#) has been adopted. Filed February 8, 2001; effective February 28, 2001.

Rule [391-3-20-.21](#) has been amended. Filed March 1, 2001; effective March 21, 2001.

Grant Chapter 391-1-5 entitled "The Georgia Greenspace Program FY 2001" submitted March 6, 2001.

Grant [391-3-21-.01](#) submitted March 12, 2001.

Rule [391-3-6-.16](#) has been amended. Filed March 30, 2001; effective April 19, 2001.

Rule [391-3-6-.13](#) has been amended. Filed April 3, 2001; effective April 23, 2001.

Rules [391-4-2-.02](#), [.09](#), [.11](#), [.12](#), [.17](#), [.26](#), [.48](#), [.49](#) have been amended. Rules [391-4-2-.04](#), [.10](#), [.13](#), [.14](#), [.64](#), [.70](#), [.71](#), [.72](#) and [391-4-9-.02](#) have been repealed and new Rules adopted. Rules [391-4-2-.05](#) to [.08](#) have been repealed. Filed May 29, 2001; effective June 18, 2001.

Rule [391-3-6-.05](#) has been amended. Filed May 31, 2001; effective June 20, 2001.

Rules [391-3-5-.04](#), [.14](#), [.18](#), [.20](#), [.22](#) to [.27](#), [.30](#), [.32](#), [.41](#) have been amended. Filed June 8, 2001; effective June 28, 2001.

Grant [391-3-21-.05](#) submitted June 26, 2001.

Rules [391-3-1-.01](#), [.02](#), [.03](#), [391-3-20-.01](#), [.03](#) to [.07](#), [.09](#), [.12](#), [.13](#), [.15](#), [.16](#), [.20](#), [.21](#) have been amended. Filed June 28, 2001; effective July 18, 2001.

Rules [391-2-4-.04](#), [391-4-2-.46](#), [.52](#), [.55](#) to [.58](#) have been amended.

Rule [391-4-2-.13](#) has been repealed and a new Rule adopted. Filed August 28, 2001; effective September 17, 2001.

Rule [391-3-6-.20](#) has been amended. Filed September 12, 2001; effective October 2, 2001.

Grant [391-5-13-.05](#) submitted September 19, 2001.

Grant [391-3-21-.04](#) entitled "Section 319(h) Nonpoint Source Implementation

Grant FY1999, FY2000 and FY2001" submitted September 28, 2001.

Grant [391-3-21-.04](#) entitled "Section 319(h) Nonpoint Source Implementation

Grant FY1996, FY1997, FY1998, and FY2002 submitted September 28, 2001.

Rule [391-4-2-.70](#) has been amended. Filed October 1, 2001; effective October 21, 2001.

Rules [391-3-15-.01](#), [.02](#), [.04](#) to [.09](#), [.11](#) to [.13](#) have been amended.

Filed October 9, 2001; effective October 29, 2001.

Rules [391-3-6-.03](#), [.06](#) have been amended. Filed October 26, 2001; effective November 15, 2001.

Chapter 391-1-4 has been amended. Filed November 21, 2001; effective December 11, 2001.

Grant [391-3-21-.01](#) submitted November 28, 2001.

Rules [391-3-1-.01](#), [.02](#), [.03](#), [391-3-20-.01](#), [.04](#), [.05](#), [.07](#), [.09](#), [.10](#), [.11](#), [.13](#), [.15](#), .17, .22, [391-3-25-.01](#), [.02](#), [.03](#), [.05](#) have been amended. Rule [391-3-25-.06](#) has been adopted. Filed December 6, 2001; effective December 26, 2001.

Grant Chapter 391-1-5 submitted January 24, 2002.

Rules [391-3-11-.01](#) to [.18](#) have been amended. Filed February 5, 2002; effective February 25, 2002.

Rules [391-3-17-.01](#) to [.10](#) have been amended. Filed March 29, 2002; effective April 18, 2002.

Rule [391-3-6-.03](#) has been amended. Filed May 10, 2002; effective May 30, 2002.

Rule [391-4-2-.17](#) has been repealed. Rule [391-4-2-.26](#) has been repealed and a new Rule adopted. Rule [391-4-2-.70](#) has been amended. Filed June 4, 2002; effective June 24, 2002.

Rules [391-3-1-.01](#), [.02](#), [.03](#), [391-3-20-.03](#), [.06](#), .19, .21, [391-3-24-.01](#) to [.07](#) have been amended. Filed June 27, 2002; effective July 17, 2002.

Rules [391-3-6-.03](#) and [.13](#) have been amended. Filed July 2, 2002; effective July 22, 2002.

Rules [391-4-2-.46](#), [.52](#), [.55](#) to [.58](#), [391-4-3-.03](#), [.06](#), [.13](#) and [.14](#) have been amended. Rule [391-4-9-.05](#) has been adopted. Filed August 19, 2002; effective September 8, 2002.

Chapter 391-1-4 has been repealed and a new Chapter adopted. Filed December 4, 2002; effective December 24, 2002.

Rule [391-3-6-.03](#) has been amended. Filed December 9, 2002; effective December 29, 2002.

Rules [391-3-1-.01](#), [.02](#), [391-3-5-.02](#), [.04](#), [.06](#), [.09](#), [.10](#), [.14](#), [.15](#), .17, .18, .20, .21, .27, .30, .32, .33, .40, .41, [391-3-11-.01](#) to .18, [391-3-20-.04](#), and .17 have been amended. Filed December 10, 2002; effective December 30, 2002.

Grant [391-5-13-.03](#) submitted December 30, 2002.

Rule [391-3-1-.02](#) has been amended. Filed January 31, 2003; effective February 20, 2003.

Rules [391-3-1-.01](#), [.02](#), and [.03](#) have been amended. Chapter 391-3-29 entitled "Water Well Pump Installers" has been adopted. Filed March 31, 2003; effective April 20, 2003.

Emergency Rule 391-3-1-0.41-.02(2)(bbb)3. has been adopted. Filed April 25, 2003; effective April 23, 2003, the date of adoption, to be in effect for 120 days or until the effective date of a permanent Rule covering the same subject matter superseding this Emergency Rule is adopted, as specified by the Agency. This Emergency Rule was adopted to provide adequate time for fuel providers to modify their production processes and schedules to avoid supply problems while providing cleaner air sooner, to help support the 2004 emission reductions needed for the ozone attainment plan. (This Emergency Rule will not be published; copies may be obtained from the Agency.)

Grant [391-3-21-.04](#) submitted May 29, 2003.

Rules [391-4-2-.10](#), [.26](#), [.47](#), [.48](#), [.49](#), [.64](#), [.201](#), and [391-4-9-.03](#) have been amended.

Rules [391-4-2-.11](#), [.14](#), [.18](#), [.27](#), [.70](#), [.71](#), [.72](#), and [391-4-9-.02](#) have been repealed and new Rules adopted. Rules [391-4-2-.62](#) and [.65](#) have been adopted. Chapter 391-4-15 entitled "Wildlife Violator Compact" has been adopted. Filed May 30, 2003; effective June 29, 2003.

Rules [391-3-17-.01](#) to [.03](#) have been amended. Rule [391-3-17-.05](#) has been repealed and a new Rule adopted. Filed May 30, 2003; effective July 1, 2003, as specified by the Agency.

Rules [391-3-1-.02](#) and [.03](#) have been amended. Filed June 4, 2003; effective June 24, 2003.

Rules [391-3-19-.02](#), [.06](#), and [.07](#) have been amended. Filed July 3, 2003; effective July 23, 2003.

Rules [391-3-6-.20](#) and [.21](#) have been amended. Filed August 26, 2003; effective September 15, 2003.

Rule [391-4-2-.17](#) has been adopted. Rules [391-4-2-.46](#), [.52](#), [.55](#) to [.58](#) have been amended. Filed September 2, 2003; effective September 22, 2003.

Rule [391-4-3-.03](#) has been amended. Filed September 4, 2003; effective September 24, 2003.

Grant Chapter 391-2-5 submitted October 9, 2003.

Chapter 391-5-14 entitled "Georgia State Income Tax Credit Program for Rehabilitated Historic Property" has been adopted. Filed October 9, 2003; effective October 29, 2003.

Rules [391-3-6-.01](#), [391-3-7-.01](#), [.05](#), [.07](#), and [.08](#) have been amended. Rules [391-3-6-.22](#), [391-3-7-.09](#) and [.10](#) have been adopted. Rules [391-3-7-.02](#) to [.04](#) have been repealed.

Filed November 5, 2003; effective November 25, 2003.

Grant [391-3-21-.04](#) submitted November 10, 2003.

Rules [391-3-20-.01](#) and [.17](#) have been amended. Filed December 5, 2003; effective December 25, 2003.

Rule [391-3-7-.01](#) has been amended. Filed December 9, 2003; effective December 29, 2003.

Grant [391-5-13-.02](#) submitted December 23, 2003.

Rule [391-3-6-.23](#) has been adopted. Rules [391-3-11-.01](#) to [.18](#) have been amended. Filed February 2, 2004; effective February 22, 2004.

Grant [391-3-21-.04](#) submitted March 2, 2004.

Chapter 391-3-30 entitled "Outdoor Water Use" has been adopted. Filed June 8, 2004; effective June 28, 2004.

[391-4-2-.62](#) has been amended. Filed July 1, 2004; effective July 21, 2004.

Rules [391-3-1-.02](#) and [.03](#) have been amended. Filed July 8, 2004; effective July 28, 2004.

Grants [391-3-21-.01](#), [.02](#), [.07](#) to [.09](#) terminated July 13, 2004.

Rules [391-4-2-.46](#), [.52](#), [.55](#) to [.58](#) have been amended. Filed August 27, 2004; effective September 16, 2004.

Grant [391-3-21-.10](#) submitted November 5, 2004.

Rule [391-3-6-.14](#) has been amended. Rule [391-3-6-.24](#) has been adopted. Filed November 5, 2004; effective November 25, 2004.

Rules [391-3-1-.01](#), [.02](#), [391-3-7-.01](#), [.05](#), [.08](#), [391-3-11-.01](#) to [.18](#), [391-3-20-.01](#) to [.05](#), [.07](#) to [.13](#), [.15](#) to [.22](#) have been amended. Filed December 20, 2004; effective January 9, 2005.

Rule [391-2-4-.07](#) has been amended. Filed December 20, 2004; effective April 1, 2005, as specified by the Agency.

Rules [391-3-5-.02](#), [.04](#), [.13](#), [.18](#), [.20](#), [.25](#), and [.40](#) have been amended. Filed December 21, 2004; effective January 10, 2005.

Grant [391-3-21-.04](#) submitted March 31, 2005.

Rule [391-5-1-.03](#) has been amended. Filed May 5, 2005; effective May 25, 2005.

Rules [391-4-2-.12](#), [.26](#), [.48](#), [.49](#), [.62](#), and [.64](#) have been amended. Rules [391-4-2-.18](#), [.70](#), and [.71](#) have been repealed and new Rules adopted. Filed June 16, 2005; effective July 6, 2005.

Rules [391-3-1-.01](#) to [.03](#) have been amended. Filed June 30, 2005; effective July 20, 2005.

Rule [391-3-4-.06](#) has been amended. Filed July 8, 2005; effective July 28, 2005.

Rule [391-5-1-.05](#) has been amended. Filed August 9, 2005; effective August 29, 2005.

Rules [391-4-2-.46](#), [.52](#), [.55](#) to [.58](#), [391-4-3-.03](#), and [.05](#) have been amended. Filed August 25, 2005; effective September 14, 2005.

Grant [391-2-5-.01](#) submitted October 24, 2005.

Rule [391-3-6-.03](#) has been amended. Filed November 7, 2005; effective November 27, 2005.

Rule [391-5-9-.08](#) has been adopted. Filed December 9, 2005; effective December 29, 2005.

Rule [391-1-2-.07](#) has been repealed and a new Rule adopted. Rule [391-3-20-.17](#) has been amended. Filed December 21, 2005; effective January 10, 2006.

Rule Chapter 391-3-28 entitled "Flint River Drought Protection" has been adopted. Filed January 20, 2006; effective February 9, 2006.

Grant [391-3-21-.04](#) submitted January 26, 2006.

Rules [391-3-11-.01](#) to [.18](#) have been amended. Filed February 21, 2006; effective March 13, 2006.

Rules [391-3-1-.02](#) and [.03](#) have been amended. Filed March 7, 2006; effective March 27, 2006.

Rule [391-5-1-.04](#) has been amended. Filed March 8, 2006; effective March 28, 2006.

Rules [391-3-1-.02](#) and [.03](#) have been amended. Filed March 30, 2006; effective April 19, 2006.

Rule [391-4-2-.70](#) has been amended. Filed May 26, 2006; effective June 15, 2006.

Rules [391-3-1-.01](#), [.02](#), and [.03](#) have been amended. Rule [391-3-1-.05](#) has been repealed.

Chapter 391-3-28 has been repealed and a new Chapter adopted. Filed June 23, 2006; effective July 13, 2006.

Rule [391-2-4-.11](#) has been amended. Filed July 3, 2006; effective July 23, 2006.

Rule [391-3-1-.03](#) has been amended. Filed July 24, 2006; effective August 13, 2006.

Rules [391-4-2-.46](#), [.52](#), [.55](#) to [.58](#), [391-4-3-.13](#) and [.14](#) have been amended. Filed August 24, 2006; effective September 13, 2006.

Chapter 391-1-6 entitled "Georgia Conservation Tax Credit Program" has been adopted.

Rule [391-4-2-.11](#) has been repealed and a new Rule adopted. Rule [391-4-2-.17](#) has been amended. Filed August 25, 2006; effective September 14, 2006.

Grant [391-5-13-.03](#) submitted September 28, 2006.

Rules [391-4-10-.07](#) and [.09](#) have been repealed and new Rules adopted. Filed October 26, 2006; effective November 15, 2006.

Rule [391-2-4-.04](#) has been amended. Filed December 8, 2006; effective December 28, 2006.

Grants [391-2-5-.01](#) to [.18](#) submitted December 11, 2006.

Rules [391-3-20-.01](#) and [391-3-20-.17 1.](#) have been amended. Filed December 21, 2006; effective January 10, 2007.

Grant [391-3-21-.04](#) submitted February 16, 2007.

Rules [391-3-1-.02](#) and [.03](#) have been amended. Chapter 391-3-29 has been repealed.

Filed February 20, 2007; effective March 12, 2007.

Rule [391-2-3-.02](#) has been adopted. Filed March 6, 2007; effective March 26, 2007.

Rule [391-3-1-.02](#) has been amended. Filed March 14, 2007; effective April 3, 2007.

Rules [391-4-2-.10](#), [.26](#), [.48](#), [.49](#), [.62](#), and [.64](#) have been amended. Rules [391-4-2-.70](#) and [.71](#) have been repealed and new Rules adopted. Filed May 24, 2007; effective June 13, 2007.

Rule [391-3-16-.01](#) has been amended. Filed July 2, 2007; effective July 22, 2007.

Grant [391-5-13-.04](#) submitted July 5, 2007.

Rules [391-3-1-.01](#) to [.03](#) and [391-3-7-.09](#) have been amended. Filed July 5, 2007; effective July 25, 2007.

Rule [391-2-3-.02](#) has been amended. Filed July 25, 2007; effective August 14, 2007.

Rules [391-1-1-.01](#), [.04](#) to [.06](#), [391-1-2-.03](#), [.04](#), [391-2-4-.10](#), [391-4-2-.46](#), [.52](#), [.55](#) to [.58](#) have been amended. Filed August 30, 2007; effective September 19, 2007.

Rule [391-3-20-.21](#) has been amended. Filed September 6, 2007; effective September 26, 2007.

Grants [391-2-5-.01](#) to [.18](#) submitted October 31, 2007.

Rule [391-3-20-.17 1.](#) has been amended. Filed December 7, 2007; effective December 27, 2007.

Rule [391-3-6-.03](#) has been amended. Filed December 14, 2007; effective January 3, 2008.

Rules [391-3-1-.02](#) and [391-3-6-.23](#), and [\(15\)](#) have been amended. Filed February 7, 2008; effective February 27, 2008.

Grant [391-5-13-.02](#) submitted February 25, 2008.

Rules [391-3-15-.02](#), [.05](#) to [.07](#), and [.13](#) have been amended. Filed March 18, 2008; effective April 7, 2008.

Grant [391-5-13-.06](#) submitted April 23, 2008.

Rules [391-3-1-.01](#) and [.02](#) have been amended. Filed May 19, 2008; effective June 8, 2008.

Rules [391-4-2-.47](#) and [.70](#) have been amended. Filed May 29, 2008; effective June 18, 2008.

Grant [391-3-21-.04](#) submitted June 3, 2008.

Rules [391-3-11-.01](#) to [.18](#) have been amended. Filed June 3, 2008; effective June 23, 2008.

Rules [391-3-1-.02](#) and [.03](#) have been amended. Filed August 22, 2008; effective September 11, 2008.

Rules [391-4-2-.46](#), [.47](#), [.52](#), [.55](#) to [.58](#) have been amended. Filed September 2, 2008; effective September 22, 2008.

Rules [391-3-17-.01](#) to [.03](#), [.05](#), and [.06](#) have been amended. Filed October 17, 2008; effective November 6, 2008.

Grants [391-2-5-.01](#) to [.18](#) submitted October 30, 2008.

Rule [391-4-5-.12](#) has been amended. Filed October 30, 2008; effective November 19, 2008.

Rules [391-5-14-.02](#), [.07](#), and [.11](#) have been amended. Filed November 5, 2008; effective November 25, 2008.

Rule [391-3-20-.17](#) has been amended. Filed December 8, 2008; effective December 28, 2008.

Rules [391-3-6-.03](#) and [.13](#) have been amended. Rule [391-3-6-.25](#) has been adopted. Filed January 29, 2009; effective February 18, 2009.

Grant [391-5-13-.06](#) submitted February 11, 2009.

Rule [391-2-4-.04](#) has been amended. Filed February 11, 2009; effective March 3, 2009.

Grant [391-3-21-.10](#) submitted March 23, 2009.

Rules [391-3-1-.01](#), [.02](#), and [.04](#) have been amended. Rule [391-3-2-.16](#) has been adopted.

Chapter 391-3-32 entitled "Regional Water Planning" has been adopted. Filed March 23, 2009; effective April 12, 2009.

Rule [391-5-1-.03](#) has been amended. Filed April 29, 2009; effective May 19, 2009.

Rules [391-1-6-.01](#) to [.05](#) have been amended. Filed May 1, 2009; effective May 21, 2009.

Rules [391-3-5-.02](#), [.06](#), [.15](#), [.18](#), [.23](#) to [.25](#), [.29](#), [.32](#), [391-4-2-.10](#), [.26](#), [.48](#), [.49](#), [.62](#), [.64](#), [391-4-3-.09](#), and [391-4-9-.02](#) have been amended. Rules [391-3-5-.52](#) to [.54](#) have been adopted. Rules [391-4-2-.13](#), [391-4-2-.70](#), and [.71](#) have been repealed and new Rules adopted. Chapter 391-3-31 entitled "Rules for Water Conservation Best Management Practices and Certification" has been adopted. Filed May 27, 2009; effective June 16, 2009.

Chapter 391-5-12 has been repealed and a new Chapter adopted. Filed June 24, 2009; effective July 14, 2009.

Rules [391-3-1-.01](#) to [.04](#) have been amended. Filed June 30, 2009; effective July 20, 2009.

Rules [391-3-15-.02](#), [.05](#), and [.13](#) have been amended. Rule [391-3-15-.16](#) has been adopted. Filed August 28, 2009; effective September 17, 2009.

Rules [391-4-2-.13](#) and [391-4-2-.58](#) have been repealed and new Rules adopted. Rules [391-4-2-.46](#), [.52](#), [.55](#) to [.57](#), [.62](#), [.70](#), and [391-4-3-.09](#) have been amended. Filed September 8, 2009; effective September 28, 2009.

Grants [391-2-5-.01](#) to [.18](#) submitted September 23, 2009.

Grants [391-3-21-.11](#) and [.12](#) submitted October 20, 2009.

Rule [391-4-10-.07](#) has been amended. Filed October 22, 2009; effective November 11, 2009.

Rule [391-2-3-.03](#) has been adopted. Filed November 17, 2009; effective December 7, 2009.

Rules [391-3-19-.02](#), [.03](#), [.04](#), [.06](#), [.08](#), Appendices I, II, III, and IV have been amended. Filed November 25, 2009; effective December 15, 2009.

Rule [391-3-1-.02](#) has been amended. Filed November 30, 2009; effective December 20, 2009.

Rule [391-2-3-.04](#) has been adopted. Filed January 29, 2010; effective February 18, 2010.

Rule [391-2-4-.04](#) has been amended. Filed March 25, 2010; effective April 14, 2010.

Grant [391-3-21-.04](#) submitted June 21, 2010.

Rule [391-4-2-.62](#) has been amended. Filed June 7, 2010; effective June 27, 2010.

Rule [391-3-1-.03](#) has been amended. Filed June 21, 2010; effective July 11, 2010.

Grant Chapter 391-2-5 containing [391-2-5-.01](#) to .18 submitted August 27, 2010.

Paragraphs (1) of Rules [391-4-2-.46](#), [391-4-2-.55](#), [391-4-2-.56](#), [391-4-2-.57](#), and [391-4-2-.58](#) have been amended. Paragraphs (1) and (2) of Rule [391-4-2-.47](#) have been amended. Paragraphs (1), (2), (3), (7), and (8) of Rule [391-4-2-.52](#) have been amended. Paragraphs 1(d) and 5 of Rule [391-4-3-.13](#) have been amended. Chapter 391-6-1 has been repealed. Filed September 1, 2010; effective September 21, 2010.

Rules [391-3-1-.01](#), [391-3-1-.02](#), and [391-3-1-.14](#) have been amended. Rule [391-3-1-.15](#) has been adopted. Filed September 16, 2010; effective October 6, 2010.

Rule [391-2-4-.02](#) has been amended. Filed November 4, 2010; effective November 24, 2010.

Grants [391-3-21-.13](#) and .14 submitted November 19, 2010.

Rules [391-3-7-.01](#) and [.05](#) have been amended. Chapter 391-3-24 has been repealed and a new Chapter entitled "Lead-Based Paint Hazard Management" adopted. Filed November 19, 2010; effective December 9, 2010.

Rules [391-3-1-.02](#) and [.03](#) have been amended. Filed December 9, 2010; effective December 29, 2010.

Paragraph (3) of Rule [391-5-1-.03](#) has been amended. Filed December 14, 2010; effective January 3, 2010.

Grant [391-5-13-.07](#) submitted December 15, 2010.

Rules [391-3-6-.08](#) and [.09](#) have been amended. Filed February 2, 2011; effective February 22, 2011.

Rule [391-3-6-.07](#) has been amended. Filed February 15, 2011; effective March 7, 2011.

Rule [391-3-6-.15](#) has been amended. Filed March 3, 2011; effective March 23, 2011.

Rule [391-2-3-.02](#) has been amended. Filed May 5, 2011; effective May 25, 2011.

Grants [391-3-21-.14](#) and .15 submitted May 16, 2011.

Rule [391-3-6-.03](#) has been amended. Filed May 16, 2011; effective June 5, 2011.

Rules [391-4-2-.10](#), [391-4-2-.12](#), [391-4-2-.27](#), [391-4-2-.64](#), [391-4-2-.70](#), [391-4-2-.71](#), [391-4-2-.73](#), [391-4-9-.02](#) repealed and readopted. F. Jun. 1; eff. Jun. 21, 2011.

Rules [391-4-2-.26](#), [391-4-2-.48](#), [391-4-2-.49](#), amended. F. Jun. 1, 2011; eff. Jun. 21, 2011.

Chapter 391-1-8 adopted and Rule [391-4-2-.71](#) repealed and readopted. F. Jun. 29, 2011; eff. Jul. 19, 2011.

Chapters 391-1-7, 391-1-8, [391-4-9-.06](#) adopted. F. Jun. 30, 2011; eff. Jul. 20, 2011.

Rules [391-3-1-.01](#), [.02](#), [.03](#) amended. F. Aug. 24, 2011; eff. Sep. 13, 2011.

Grants Chapter 391-2-5 submitted. Aug. 25, 2011.

Rules [391-4-2-.46](#), [391-4-2-.52](#), [391-4-2-.55](#), [391-4-2-.56](#), [391-4-2-.57](#), [391-4-2-.58](#) amended. F. Aug. 25, 2011; eff. Sep. 14, 2011.

Rule [391-3-6-.02](#) amended. F. Sep. 8, 2011; eff. Sep. 28, 2011.

Chapter 391-4-16 entitled "Fresh-water Turtle Regulations" adopted. F. Jan. 27, 2012; eff. Feb. 16, 2012.

Grants [391-5-13-.04](#) and [391-5-13-.05](#) submitted Feb. 7, 2012.

Rules [391-3-1-.01](#) and [.02](#) amended. F. Feb. 16, 2012; eff. Mar. 7, 2012.

Rules [391-2-3-.03](#), [391-2-3-.05](#) amended. F. Jun. 27, 2012; eff. Jul. 17, 2012.

Grant [391-3-21-.13](#) submitted July 18, 2012.

Rules [391-3-6-.05](#), [391-3-6-.20](#), [391-3-6-.21](#), [391-3-11-.01](#) through [.18](#), [391-3-21-.13](#) amended. F. Jul. 18, 2012; eff. Aug. 7, 2012.

Rules [391-3-1-.01](#), [.02](#), [.03](#) amended. F. Jul. 20, 2012; eff. Aug. 9, 2012.

Rules 391-3-11.01 through [391-3-11-.18](#) amended. F. July 18, 2012; eff. Aug. 7, 2012.

Rules [391-2-6-.01](#), [391-2-7-.01](#) adopted. F. Sep. 4, 2012; eff. Sep. 24, 2012.

Chapter 391-2-5 amended. F. Sep. 4, 2012; eff. Sep. 24, 2012.

Rules [391-4-2-.46](#), [391-4-2-.49](#), [391-4-2-.48](#), [391-4-2-.49](#), [391-4-2-.52](#), [391-4-2-.55](#), [391-4-2-.56](#), [391-4-2-.57](#), [391-4-2-.58](#) amended. F. Sep. 5, 2012; eff. Sep. 25, 2012.

Rules [391-3-1-.02](#) amended. F. Aug. 31, 2012; eff. Sep. 20, 2012.

Rules [391-1-6-.03](#) and [391-1-6-.04](#) amended. F. Nov. 6, 2012; eff. Nov. 26, 2012.

Rules [391-2-4-.01](#), [391-2-4-.12](#), [391-2-4-.13](#), [391-2-4-.14](#), adopted and rules [391-2-4-.02](#), [391-2-4-.04](#), [391-2-4-.06](#) amended. F. Dec. 18, 2012; eff. Jan. 7, 2013.

Rule [391-2-4-.15](#) adopted. F. Jan. 16, 2013; eff. Feb. 5, 2013.

Rule [391-4-6-.06](#) amended. F. Jan. 23, 2013; eff. Feb. 12, 2013.

Rules [391-3-4-.06](#) and [391-3-4-.07](#) amended. F. Feb. 5, 2013; eff. Feb. 25, 2013.

Grant [391-3-21-.15](#) submitted May 2, 2013.

Chapter 391-2-1 repealed. F. May 1, 2013; eff. May 21, 2013.

Rule [391-3-1-.02](#) amended. F. May 2, 2013; eff. May 22, 2013.

Rules [391-3-1-.02](#), [391-3-15-.13](#) amended. F. May 24, 2013; eff. June 13, 2013.

Rule [391-4-9-.07](#) adopted. F. May 28, 2013; eff. June 17, 2013.

Rules [391-4-2-.20](#), [.21](#), [.22](#), [.24](#), [.25](#), [.28](#) through [.32](#), [.40](#), [.41](#), [.43](#), [.44](#), [.45](#), [.53](#), [.54](#), [.66](#), [.67](#), [.68](#) adopted; Rules [391-4-2-.02](#), [.09](#), [.11](#), [.12](#), [.26](#), [.27](#), [.46](#) through [.52](#), [.55](#), [.56](#), [.60](#) through [.65](#), [.70](#), [.71](#), [391-4-9-.02](#) repealed and new rules adopted; Rules [391-4-2-.03](#), [.04](#), [.10](#), [.14](#), [.15](#), [.17](#), [.57](#), [.58](#), [.59](#) repealed. F. June 13, 2013; eff. July 3, 2013.

Rule [391-1-1-.01](#) amended; [391-1-1-.02](#) repealed. F. June 26, 2013; eff. July 16, 2013.

Rules [391-3-1-.01](#), [391-3-1-.02](#), [391-3-1-.03](#), [391-3-1-.12](#) amended. F. July 12, 2013; eff. Aug. 1, 2013.

Rules [391-3-1-.03](#), [391-3-7-.01](#), [391-3-7-.05](#), [391-3-17-.10](#) amended. F. Aug. 16, 2013; eff. Sep. 5, 2013.

Chapter 391-2-5 amended. F. Aug. 27, 2013; eff. Sep. 16, 2013.

Rule [391-4-2-.33](#) adopted; Rules [391-4-3-.03](#), [.05](#), [.06](#) amended; Rules [391-4-2-.43](#), [.44](#), [.45](#), [.47](#) through [.56](#) repealed and new rules adopted. F. Aug. 28, 2013; eff. Sep. 17, 2013.

Grant [391-5-13-.02](#) submitted Sep. 27, 2013.

Rule [391-3-6-.03](#) amended. F. Oct. 2, 2013; eff. Oct. 22, 2013.

Rule [391-2-4-.16](#) adopted; Rules [391-2-4-.01](#) through [.04](#), [391-2-4-.13](#), [391-3-6-.07](#), [391-4-3-.10](#) amended. F. Dec. 13, 2013; eff. Jan. 2, 2014.

Rule [391-4-5-.22](#) adopted; Rule [391-4-5-.05](#) amended. F. Dec. 16, 2013; eff. Jan. 5, 2014.

Rules [391-3-4-.06](#), [391-3-5-.01](#) through [391-3-5-.42](#), [391-3-5-.52](#), [391-3-5-.53](#), [391-3-5-.54](#), [391-3-17-.01](#), [.02](#), [.03](#), [.05](#), [.07](#) amended. F. Jan. 8, 2014; eff. Jan. 28, 2014.

Rule [391-2-4-.04](#) amended. F. Feb. 5, 2014; eff. Feb. 25, 2014.

Grant [391-5-13-.02](#) submitted Mar. 31, 2014.

Rule [391-3-1-.02](#) amended. F. Apr. 14, 2014; eff. May 4, 2014.

Chapter 391-3-22 repealed in its entirety, no new chapter adopted. F. Apr. 21, 2014; eff. May 11, 2014.

Rule [391-3-6-.23](#) amended; Rules [391-4-2-.27](#), [391-4-2-.70](#) repealed and new rules adopted; Rules [391-3-20-.01](#), [.03](#), [.04](#), [.05](#) through [.13](#), [.15](#) through [.22](#) amended. F. May 30, 2014; eff. June 19, 2014.

Chapter 391-1. ADMINISTRATION.

Subject 391-1-1. ORGANIZATION AND PUBLIC PARTICIPATION.

Rule 391-1-1-.01. Organization.

- (1) The Board of Natural Resources is a Constitutional Board, empowered by law to establish the general policies to be followed by the Department of Natural Resources.
- (2) The Board appoints and removes (subject to the approval of the Governor) the Commissioner of Natural Resources and the Director of the Environmental Protection Division. The Board sets out the general policy under which the Commissioner supervises, directs, accounts for, organizes, plans, administers and executes all the respective statutory functions of the Department and the Divisions, and under which the Director of the Environmental Protection Division supervises, directs, accounts for, organizes, plans and executes the respective statutory functions of the Environmental Protection Division.
- (3) As organized by the Commissioner, the Department consists of the Commissioner's Office and five operating Divisions: Wildlife Resources; Parks, Recreation and Historic Sites; Coastal Resources; Law Enforcement; and Environmental Protection (created by statute). The directors of the Divisions other than Environmental Protection are appointed by the Commissioner, subject to the approval of the Board.

Rule 391-1-1-.03. Powers, Duties, Titles, Qualifications, Appointments and Other Matters Pertaining to the Department's Unit of Peace Officers.

- (1) By O.C.G.A. [27-1-16](#) there is established within the Department of Natural Resources a unit of peace officers known as conservation rangers. The Commissioner of Natural Resources appoints such number of conservation rangers of the state at large as are necessary to carry out the law enforcement responsibilities pertaining to the Department.
- (2) A conservation ranger of the state at large appointed by the Commissioner of Natural Resources is an employee of the Department and holds either the title of Conservation Ranger or of Class I Deputy Conservation Ranger, depending upon whether law enforcement duties are primary function of the conservation ranger's employment (Conservation Ranger) or if additional duties, such as that of a park manager, wildlife technician or biologist are the primary functions of the conservation ranger's employment (Class I Deputy Conservation Ranger). However, regardless of their title, Conservation Rangers and Class I Deputy Conservation Rangers are conservation rangers of the state at large.
- (3) By O.C.G.A. § [27-1-17](#) the Board of Natural Resources is also authorized to appoint deputy conservation rangers, however, that authority is delegated by the Board by this rule to the Commissioner of Natural Resources except to the extent set forth in this rule. Deputy conservation rangers appointed by the Commissioner as Class I Deputy Conservation Rangers pursuant to O.C.G.A. § [27-1-16](#) and this delegation are assigned all of the qualifications, powers and duties of conservation rangers of the state at large, shall take the same oath, and shall adhere to all of the laws, rules, policies and guidelines which govern the Department's law enforcement unit. The badge of a Class I Deputy

Conservation Ranger shall be inscribed with the State Seal, the name of the Department, and such other information as may be appropriate.

- (4) The Board of Natural Resources reserves the exclusive power to appoint deputy conservation rangers who are not currently employees of the Department. They will normally either be retired Department employees who were formally conservation rangers or persons, such as marshals of county magistrate courts, who assist the Department's law enforcement unit by enforcing certain aspects of the environmental and wildlife laws such as waste control and hunter safety. Deputy conservation rangers appointed by the Board of Natural Resources must have actual duties relating to the protection of natural resources and post the bond required by O.C.G.A. § [27-1-17\(c\)](#).
- (5) A deputy conservation ranger appointed by the Board of Natural Resources holds the title of Class II Deputy Conservation Ranger and by this rule is assigned by the Board of Natural Resources all of the powers and duties of a conservation ranger. Class II Deputy Conservation Rangers must be certified peace officers pursuant to the requirements of the Peace Officers Standards and Training Council. They shall take the same oath as a conservation ranger and shall adhere to all of the laws, rules, policies and guidelines which govern the Department's law enforcement unit. The badge of a Class II Deputy Conservation Ranger shall be inscribed with the State Seal, the name of the Department, and such other information as may be appropriate.
- (6) Class I and Class II Deputy Conservation Rangers are authorized by the Board of Natural Resources to arrest persons accused of violating any law or regulation which such officers are empowered to enforce by the issuance of a citation pursuant to O.C.G.A. § [27-1-19](#).
- (7) The appointments of all deputy conservation rangers holding that status on the effective date of this rule, regardless of whether their title is Class I Deputy Conservation Ranger or Class II Deputy Conservation Ranger and regardless of whether they were appointed initially by the Board of Natural Resources or by the Commissioner of Natural Resources are hereby ratified.

 - (f) For archaeological information - 2610 Highway 155, S.W., Stockbridge, Georgia 30281.
- (3) To request that the name and address of a person or organization be placed on a Division's mailing list maintained for advance notice of its rule-making proceedings pursuant to O.C.G.A Section [50-13-4](#), a written request shall be mailed to the Director of that Division. The written request shall contain a complete and accurate mailing address of the person or organization to which advance notice is to be mailed. The written request may specify that the person or organization is to receive advanced notice of only the proposed rules or proposed amendments to rules of a specific program or branch of a Division, such as proposed rules or amendments to rules proposed by the Land Protection Branch of the Environmental Protection Division or the Hunting and Fishing Regulations proposed annually by the Wildlife Resources Division.

Amended: F. Mar. 22, 2021; eff. Apr. 11, 2021.

Rule 391-1-1-.05. Procedure to Petition for Adoption of Rules.

- (1) Any interested person desiring to petition the Board of Natural Resources requesting the promulgation, amendment or repeal of a rule shall submit three copies of the petition, in writing, to the Commissioner, Department of Natural Resources, 2 Martin Luther King, Jr. Drive, S.E., Suite 1252 East, Atlanta, Georgia 30334-9000. No special form of petition shall be required but the petition shall state fully the rule involved, the reason for the desired change, any parties who it is known will be affected by the change, and any additional facts known to the petitioner which might influence the decision of the Board to initiate or not initiate rulemaking.
- (2) The Board shall act upon the petition as prescribed in O.C.G.A. Section [50-13-9](#).

Amended: F. Aug. 30, 2007; eff. Sept. 19, 2007.

Rule 391-1-1-.06. Procedure for Declaratory Rulings.

- (1) Any person wishing to file a petition for a declaratory ruling as to the applicability of a statute or rule or order shall submit three copies of the petition, in writing, to the Commissioner, Department of Natural Resources, 2 Martin Luther King, Jr. Drive, S.E., Suite 1252 East, Atlanta, Georgia 30334-9000.
- (2) The petition shall state all the facts, including the names of those parties involved in the fact situation, and shall include a statement of the legal issue sought to be resolved. A declaratory ruling will not be issued on a hypothetical fact situation, and any ruling requested must affect a specific fact situation and specific parties, including the person or persons requesting the ruling. If the parties involved in the fact situation include persons in addition to the person or persons requesting the ruling, the person or persons requesting the ruling shall serve a copy of the petition upon such additional persons by personal delivery or by mail. Service by mail shall be complete upon mailing by first class mail, with proper postage attached, to such person. Every submission shall be accompanied either by an acknowledgment of service from the person served, or his authorized agent for service, or by a certificate of service stating the date, place, and manner of service, and the name and address of the persons served. Any person, including the additional parties served, may seek to participate in a declaratory ruling proceeding in the manner and under the standards provided by O.C.G.A. Section [50-13-14](#).
- (3) The individual or entity within the Department of Natural Resources responsible for enforcing the statute or rule will be assigned the petition for a declaratory ruling and shall

issue a ruling thereon as promptly as possible. In doing so, the individual or entity may seek the opinion of the Attorney General.

- (4) A ruling disposing of a petition for a declaratory ruling shall have the same status as an administrative law judge decision or order in a contested case.

Rule 391-1-1-.07. Repeal of Asbestos Licsnsing Board Rules.

The Asbestos Licensing Board was abolished by Act No. 614 of the 1996 Session of the General Assembly (Ga. Laws 1996, Page 238) and certain functions of the Asbestos Licensing Board were transferred by said Act to the Board of Natural Resources. The Board of Natural Resources has enacted its own rules to carry out those transferred functions which rules are found in Chapter 391-3-14. The rules of the Asbestos Licensing Board published by the Secretary of State as Chapters 52-1 through 52-7 of the Official Rules of the State of Georgia are hereby repealed.

Subject 391-1-2. PROCEDURES FOR DISPOSITION OF CONTESTED CASES.

Rule 391-1-2-.01. Definitions.

As used in this Chapter, the term:

- (a) "Decision Maker" means the individual or entity within DNR that took or proposed the action to be reviewed under this Chapter. The term Decision Maker includes, without limitation, the CMPC, the Commissioner, the Director and the SAC.
- (b) "ALJ" means an Administration Law Judge appointed by the Board.

- (c) "APA" means the Georgia Administration Procedure Act (O.C.G.A. Title 50, Chapter 13).
- (d) "Board" means the Board of Natural Resources.
- (e) "Clerk" means the Administrative Hearing Clerk.
- (f) "CMPC" means the Coastal Marshlands Protection Committee.
- (g) "Commissioner" means the Commissioner of Natural Resources.
- (h) "CPA" means the Civil Practice Act (O.C.G.A. Title 9, Chapter 11).
- (i) "Director" means the Director of the Environmental Protection Division of DNR.
- (j) "DNR" means the Georgia Department of Natural Resources.
- (k) "SAC" means the Shore Assistance Committee.
- (l) "Attorney General" means the Attorney General of the State of Georgia.
- (m) "Person" means any individual, partnership, firm, corporation, association, or other entity.

History. Original Rule entitled "Applicability and Scope of These Rules" was filed on July 29, 1982; effective August 18, 1982.

Amended: Rule repealed and a new Rule entitled "Definitions" adopted. Filed March 12, 1985; effective April 1, 1985.

Amended: Filed April 24, 1987; effective May 14, 1987.

Repealed: ER. 391-1-2-0.39-.01 of same title adopted. F. Jun. 25, 1998; eff. Jun. 24, 1998, the date of adoption, to remain in effect for 120 days or until the effective date of a permanent Rule covering the same subject matter superseding this ER., is adopted, as specified by the Agency.

Repealed: Permanent Rule adopted. F. Aug. 27, 1998; eff. Sept. 16, 1998.

Rule 391-1-2-.02. Applicability and Scope of These Rules.

- (1) The Rules in this Chapter govern all formal hearings in "contested cases," as that term is defined in the APA, which are conducted before an ALJ. An ALJ shall afford a liberal construction of these rules insofar as they are applied to cases wherein petitioners or respondents are unable to be represented by counsel.
- (2) An ALJ shall hear all contested cases arising under the following laws:
 - (a) The Game and Fish Code (O.C.G.A. Title 27).

- (b) The Coastal Marshlands Protection Act of 1970 (O.C.G.A. Title 12, Chapter 5, Article 4, Part 4).
 - (c) The Shore Assistance Act of 1979 (O.C.G.A. Title 12, Chapter 5, Article 4, Part 2).
 - (d) The Oil and Gas and Deep Drilling Act of 1975 (O.C.G.A. Title 12, Chapter 4, Article 2, Part 2).
 - (e) The Georgia Surface Mining Act of 1968 (O.C.G.A. Title 12, Chapter 4, Article 2, Part 3).
 - (f) The Solid Waste Management Act (O.C.G.A. Title 12, Chapter 8 Article 2).
 - (g) The Georgia Air Quality Act of 1978 (O.C.G.A. Title 12, Chapter 9)
 - (h) The Georgia Hazardous Waste Management Act (O.C.G.A. Title 12, Chapter 8, Article 3).
 - (i) The Georgia Water Quality Control Act (O.C.G.A. Title 12, Chapter 5, Article 2).
 - (j) The Ground Water Use Act of 1972 (O.C.G.A. Title 12, Chapter 5, Article 3, Part 2).
 - (k) The Georgia Safe Drinking Water Act of 1977 (O.C.G.A. Title 12, Chapter 5, Article 3, Part 5).
 - (l) The Georgia Safe Dams Act of 1978 (O.C.G.A. Title 12, Chapter 5, Article 5, Part 3).
 - (m) The Erosion and Sedimentation Act of 1975 (O.C.G.A. Title 12, Chapter 7).
 - (n) The Metropolitan River Protection Act (O.C.G.A. Title 12, Chapter 5, Article 5, Part 6).
 - (o) The Georgia Asbestos Safety Act (O.C.G.A. Title 12, Chapter 12).
 - (p) All other laws providing for the Review by an ALJ of any decision, order or action.
- (3) Procedural questions arising at any stage of the proceeding which are not addressed in the APA, any other applicable law or these Rules shall be resolved at the discretion of the ALJ, as justice requires. The ALJ may consult and utilize the CPA and the Uniform Rules for the Superior Courts in the exercise of this discretion.

Rule 391-1-2-.04. Filing of Petitions for Hearing.

- (1) An original and three copies of all petitions for hearing in contested cases shall be filed on 8 1/2 by 11 inch paper with the Decision Maker. Submissions shall be deemed filed on the date on which they are received by the Decision Maker, c/o Commissioner of Natural Resources, 2 Martin Luther King, Jr. Drive, S.E., Suite 1252 East, Atlanta, Georgia 30334-9000, or when mailed by first class mail, with proper postage attached, and properly addressed directly to the Decision Maker, whichever date comes first. The petitioner shall simultaneously serve a copy of such petition by certified mail or personal service upon the Attorney General, and, if applicable, upon the persons or entity to whom the permit or license was issued.
- (2) The office hours of the Decision Maker shall be 8:00 a.m. to 4:30 p.m., Monday through Friday, except State legal holidays.
- (3) All submissions shall meet the applicable requirements of the OSAH Rules, Chapter 616-1-2, and of Rule [391-1-2-.06](#) below.
- (4) Failure to comply with this Rule or any other requirement of this Chapter relating to form or content of submissions to be filed may result in the non-complying portions of the submission being excluded from consideration. If the Decision Maker or the Attorney General determines that a submission fails to meet any requirement of this Chapter, the

Decision Maker may return the submission by mail together with a reference to the applicable Rule(s). A party whose submission has been returned shall have 10 days from the date the submission is mailed back by the Decision Maker within which to conform the submission to the applicable Rule(s) and refile it with the Decision Maker.

Rule 391-1-2-.05. Content of Petitions for Hearing.

- (1) A petition for hearing on the grant or denial of a permit or license shall contain:
 - (a) A copy of the license or permit of which review is sought.
 - (b) A statement of the legal authority and jurisdiction under which a hearing is requested;
 - (c) A short and plain statement of the factual matters asserted;
 - (d) A statement of each specific section (including subsection and paragraph if applicable) of the laws or rules involved in any questions of law;
 - (e) The name and current mailing address of the petitioner's counsel;
 - (f) A short and plain statement of the nature of the petitioner's interest in the matter;
 - (g) In cases contesting the issuance of a license or permit, those suggested permit conditions or limitations which the petitioner believes required to implement the provisions of the law under which the permit or license was issued; and
 - (h) In cases contesting conditions, limitations or requirements placed on the issuance of a license or permit, specific reference to the conditions, limitations or requirements contested, as well as suggested revised or alternative permit conditions, limitations or requirements which the petitioner believes required to implement the provisions of the law under which the permit or license was issued.
- (2) A petition for a hearing on an order requiring or imposing administrative enforcement relief or the revocation, suspension, amendment, modification or non-renewal of a permit or license shall contain:

- (a) A copy of the notice or order for which review is sought;
 - (b) A statement of the legal authority and jurisdiction under which a hearing is requested; and
 - (c) A reply to the allegations set forth in the order which reply shall address all the factual allegations set forth in the order.
- (3) For hearings on the revocation of the privilege of operating a vessel pursuant to O.C.G.A. § [52-7-12.5\(e\)](#), the following information must be included:
- (a) The petitioner's full name, current address, driver's license or Social Security number, date of birth and telephone number at which the petitioner can be reached between the hours of 8:00 a.m. and 4:30 p.m.;
 - (b) The name and address of all interested parties who may testify;
 - (c) A clear and concise statement of the facts upon which the contested case arises;
 - (d) A statement setting forth the relief sought; and
 - (e) If represented by counsel, the name, address, and phone number of that counsel.
- (4) A petition for a hearing on any action not covered in Paragraphs (1) through (2) above shall contain the information required to be included in petitions for hearing by subparagraphs (a) through (f) of paragraph (1) above.

Rule 391-1-2-.06. Referral of Petitions for Hearing to Office of State Administrative Hearings.

Upon receipt of a timely petition for hearing, the Decision Maker shall forward the original and two copies of the petition to the Attorney General along with a request that an OSAH Form 1 be prepared and transmitted along with the petition for hearing to OSAH. Referral of a petition for hearing to OSAH is not a determination that the petition satisfied Rule [391-1-2-.04\(4\)](#) above or that the petitioner is entitled to a hearing. Rather, referral of a petition for hearing to OSAH shall constitute a request that such issues be decided by the ALJ and a hearing conducted pursuant to state law, if appropriate.

Rule 391-1-2-.07. Stay Pending Final Action.

- (1) Except as otherwise provided by law or regulation concerning a specific type of order or action taken by a Decision Maker, or by paragraphs (2) and (3) of this rule, any order or action of a Decision Maker shall be stayed upon the filing of a petition for review of the order or action pursuant to Rule [391-1-2-.03](#).
- (2) When the filing of the petition is with the Director and by a person to whom the order or action is not directed and when the order or action involves the grant of a permit, permit amendment or variance, the filing shall stay such order or action of the Director only until such time as the hearing has been held and for ten days after the administrative law judge renders his or her decision on the matter. The hearing shall be held and the decision of the administrative law judge shall be rendered not later than 90 days after the date of the filing of the petition. Such period may be extended for a time certain by order of the administrative law judge upon consent of all parties or by order of the administrative law judge for good cause shown for a period not to exceed an additional 60 days.
- (3) The following actions shall not stay the order or action of a Decision Maker.
 - (a) The filing of a petition with the Director by any person to whom such order or action is not directed in any case involving the grant of a permit, permit amendment, or variance by the Director regarding water withdrawal for farm uses under Code Section [12-5-31](#) or Code Section [12-5-105](#).
 - (b) The filing of a petition for hearing contesting any order issued or action taken by the Director pursuant to the Georgia Hazardous Site Response Act, O.C.G.A. § [12-8-90](#), et. seq. The filing shall not stay any further order or action by the Director, or any obligation imposed by the Georgia Hazardous Site Response Act, O.C.G.A. § [12-8-90](#), et seq., or the rules and regulations promulgated pursuant thereto, Department of Natural Resources Rules Chapter 391-3-19, except as provided in O.C.G.A. § [12-8-97\(f\)](#).

Rule 391-1-2-.09. Criteria for Review and for Determining Civil Penalties.

In rendering a decision imposing civil penalties, the ALJ shall consider all factors which are relevant including the factors listed below to the extent applicable and not inconsistent with statutory or more specific regulatory provisions.

- (a) The amount of civil penalty necessary to ensure immediate and continued compliance and the extent to which the violator may have profited by failing or delaying to comply;
- (b) The character and degree of impact of the violation or failure on the natural resources of the state, especially any rare or unique natural phenomena;
- (c) The nature of the violator's conduct which resulted in the violation in terms and inadvertence, negligence, recklessness, or knowing intent;
- (d) The conduct of the violator to take promptly, or in failing or refusing to take promptly, all feasible steps or procedures necessary or appropriate to comply or to correct the violation or failure;
- (e) Any prior violations of, or failures by, such person to comply with statutes, rules, regulations, orders, or permits administered, adopted, or issued by a Department of Natural Resources Decision Maker;
- (f) The character and degree of injury to or interference with the reasonable use of property which is caused or threatened to be caused by such violation or failure; and

- (g) The character and degree of injury to or interference with public health and safety which is caused or threatened to be caused by such violation or failure.

Subject 391-1-3. PUBLIC PARTICIPATION IN ENFORCEMENT OF ENVIRONMENTAL STATUTES.

Rule 391-1-3-.01. Public Participation In Enforcement of Environmental Statutes.

- (1) The Environmental Protection Division shall issue notices of proposed or final administrative orders and proposed or final administrative consent orders as required in applicable statutes and rules of this State.
- (2) At the completion of the negotiation process required by O.C.G.A. § [12-2-2\(c\)\(6\)](#) and before executing and issuing any administrative consent order which falls in any of the categories in (a) below, the Environmental Protection Division shall provide notice and opportunity to the public to comment on and provide information regarding the proposed issuance of such orders. This chapter shall not apply to or delay emergency actions as determined by the director of the Environmental Protection Division, nor actions which will immediately address ongoing harmful releases into the environment, nor actions relating to Georgia's Underground Storage Tank Trust Fund disbursements on behalf of that fund's participants.
 - (a) The following categories of administrative consent orders are subject to (2) above:

1. orders for which the director of the Environmental Protection Division believes a release of a regulated substance into the environment may have endangered or may be endangering human health. A regulated substance is one having a human health-based standard adopted by the Board of Natural Resources. The Director may consider such factors as the toxicity of the released substance, the amount and duration of the release and the potential for human exposure to the release.
 2. orders with compliance schedules exceeding one year or orders extending an existing compliance schedule.
 3. a second order issued to the same facility for reasons of noncompliance under the same statute in a twelve month period.
 4. orders for which the person entering into the proposed order requests in writing that notice be issued to the public.
- (b) A thirty-day comment period shall be provided. The notices shall include, at a minimum, the name and location of the facility; the nature of the violation or cause of the order, and information on how to obtain a copy of the proposed order.
- (c) The Environmental Protection Division shall consider all information received during the comment period prior to acting upon the proposed administrative consent order. Such information may consist of, but not be limited to, letters, documents, photos, and videos.
- (3) The Environmental Protection Division shall prepare notices (typically weekly, but at least monthly) which list fully executed administrative orders and fully executed administrative consent orders issued by the director. The notices shall include pertinent information such as the order number, the name and location of the facility, the nature of the violation or cause of the order, the date of issuance and the monetary settlement.
- (4) The notices specified in (1), (2) and (3) above shall consist of posting on the Environmental Protection Division's Internet Web Site and, for orders pertaining to facilities located in counties with populations of less than 10,000 persons, written notice provided to local newspapers and radio stations. Notices shall be mailed to persons requesting such for an annual fee of fifty (\$50) dollars.

Subject 391-1-6. GEORGIA CONSERVATION TAX CREDIT PROGRAM.

Rule 391-1-6-.01. Purpose and Scope.

- (1) To provide for state income tax credits with respect to qualified donations of real property for conservation purposes and to provide for authority of the Department of Natural Resources to provide conditions, limitations, and exclusions for the Georgia Conservation Tax Credit Program.
- (2) The Department of Natural Resources shall be the certifying agency by:
 - (a) determining that property donated under this program is a Qualified Donation of Conservation Land; and

- (b) providing an official certification form to the donor of Conservation Land that qualifies the donor for a state income tax credit.

Cite as Ga. Comp. R. & Regs. R. 391-1-6-.01

Authority: O.C.G.A. Secs. [48-7-29.10](#), [48-7-29.12](#).

History. Original Rule entitled "Purpose and Scope" adopted. F. Aug. 25, 2006; eff. Sept. 14, 2006.

Amended: F. May 1, 2009; eff. May 21, 2009.

Rule 391-1-6-.02. The Name of the Program.

The program shall be referred to as the Georgia Conservation Tax Credit Program (GCTCP).

Cite as Ga. Comp. R. & Regs. R. 391-1-6-.02

Authority: O.C.G.A. Secs. [48-7-29.10](#), [48-7-29.12](#).

History. Original Rule entitled "The Name of the Program" adopted. F. Aug. 25, 2006; eff. Sept. 14, 2006.

Amended: F. May 1, 2009; eff. May 21, 2009.

Rule 391-1-6-.03. Definitions.

- (1) "Applicant" means a Georgia taxpayer, either individual, partnership, corporation, professional association, limited liability company, or other entity, who makes or contemplates making a Qualified Donation to a Qualified Organization.
- (2) "Certification" means final determination by the Department that an Applicant has made a Qualified Donation of Conservation Land.
- (3) "Conservation Easement" means a non-possessory interest of a holder in real property as defined in O.C.G.A. § [48-7-29.12\(a\)\(1\)](#).
- (4) "Conservation Land" means Permanently Protected land and water, or interests therein, that is in its undeveloped, natural state and that serves at least two conservation purposes or that has been developed only to the extent consistent with, or is restored to be consistent with at least two Conservation Purposes.
- (5) "Conservation Purpose" is defined in O.C.G.A. § [48-7-29.12\(a\)\(2\)](#). For purposes of the GCTCP and as used in this chapter, the following phrases contained in the definition shall have the following meaning:
 - (a) "Water quality protection for wetlands, rivers, streams, or lakes" means protection of water quality through the conservation of land containing a substantial amount of 100-year floodplain or containing streams, rivers, springs, marshlands, or natural wetlands. Any wetland or natural lake must have a vegetated buffer with a width of at least 100 feet as measured from its edge for that part of the edge within

the applicant's property, which ensures at least 75 percent tree canopy evenly distributed after harvest must be maintained. Buffer requirements for rivers and streams are addressed in Section (10)(d)(iv) of this Rule.

- (b) "Protection of wildlife habitat consistent with state wildlife conservation policies" means protection of wildlife habitat through the conservation of high priority plants, animals, and habitats as defined by Georgia's Comprehensive Wildlife Conservation Strategy dated August 31, 2005, a copy of which can be obtained on the web at www.georgiawildlife.com or from the Wildlife Resources Division of the Department of Natural Resources 2070 U.S. Hwy. 278, SE, Social Circle, GA 30025;
 - (c) "Protection of outdoor recreation consistent with state outdoor recreation policies" means protection of land which is accessible for substantial and regular use by the general public at little or no cost and which provides low-infrastructure natural-resource based outdoor recreation as described in Georgia's current Statewide Comprehensive Outdoor Recreation Plan, a copy of which can be obtained on the web at www.gastateparks.org or from the Georgia State Parks & Historic Sites Division of the Department of Natural Resources at 2 Martin Luther King, Jr. Dr., Suite 1352 East, Atlanta, GA 30334;
 - (d) "Protection of prime agricultural or forestry lands" means protection of prime agricultural and forestry land managed according to current Best Management Practices as defined by the Georgia Soil and Water Conservation Commission and/or the Georgia Forestry Commission. Such properties must consist of a minimum of ten (10) contiguous acres and be used for production of timber products, crops, or livestock;
 - (e) "Protection of cultural sites, heritage corridors, or archeological and historic resources" means protection of land with significant archaeological and/or historic sites, listed in or eligible for the Georgia Register of Historic Places either individually, or as a contributing building or land area within a historic district.
- (6) "Permanent Protection" and "Permanently Protected" mean the protection of land and water resources as defined below:
- (a) Owned by the Federal Government or State of Georgia, or owned by a County, a Municipality, or a consolidated government of this State, and designated and managed for Conservation Purposes. Properties owned by a County, a Municipality, or a consolidated government of the State are also subject to the conditions of Sections 6 (c) and 11 of this Rule but properties owned by the State of Georgia or the Federal Government are not subject to Sections 6(c) and 11;
 - (b) Owned by a Qualified Organization other than the Federal Government, the State of Georgia, a County, a Municipality, or a consolidated government of this State with the following supporting documents:

- (i) A letter from the State, Federal Government, a County, a Municipality, or a consolidated government of this State, stating intent to acquire the tract from the Qualified Organization at a later date and to designate and manage the land in accordance with 6 (a); and
 - (ii) A Resolution from the board of the Qualified Organization stating that the Qualified Donation is being acquired, with the intent to transfer the Qualified Donation to the State, Federal Government, a County, a Municipality, or a consolidated government of this State, for designation and management in accordance with 6 (a), and that the Qualified Organization will manage the Qualified Donation for Conservation Purposes until the Qualified Donation is transferred to the State, Federal Government, a County, a Municipality, or a consolidated government of this State; and
 - (iii) A letter from the landowner stating they are making the Qualified Donation, to the Qualified Organization with the intent that the Qualified Donation will be transferred to the State, Federal Government, a County, a Municipality, or a consolidated government of this State, for designation and management in accordance with 6 (a); or
- (c) Owned by any Individual, entity, or a Qualified Organization other than the State of Georgia or Federal Government, and subject to:
 - (i) A permanent conservation easement where the Department is assured that the language of the conservation easement will protect the conservation values of the land; or
 - (ii) A permanent restrictive covenant as provided in subsection c of Code Section [44-5-60](#);
- (7) "Department" means the Department of Natural Resources.
- (8) "Pre-Certification" means preliminary determination by the Department that an Applicant's proposed Qualified Donation meets the criteria for Conservation Land.
- (9) "Donation" includes a conveyance by full donation, by a discounted sale below Fair Market Value, or by an interest in property which qualifies as a permanent conservation easement
- (10) "Qualified Donation" shall have the meaning set forth in O.C.G.A. § [48-7-29.12\(a\)\(6\)](#). The following types of properties and easements do not have a Conservation Purpose and are specifically not eligible as qualified donations:

- (a) Any real property which is used for or associated with the playing of golf, or other high-infrastructure recreational facility;
- (b) Any real property which is otherwise required to be dedicated open space pursuant to local governmental regulations or ordinances or to increase building density levels; and
- (c) Except as otherwise provided in O.C.G.A. § [48-7-29.12\(d\)\(2\)](#), only one qualified donation may be made on a property that was part of a larger parcel under the same ownership in the prior 5 years.
- (d) Any real property that does not meet the following additional requirements, where applicable, as outlined in O.C.G.A § [48-7-29.12\(c\)](#):
 - i. Subdivision is prohibited for a donated property of less than 500 acres and limited to one subdivision for a donated property of 500 acres or more;
 - ii. New construction on a donated property of structures, roads, impoundments, ditches, dumping, or any other activity that would harm the protected conservation values of such donation is prohibited on such property;
 - iii. New construction on a donated property within 150 feet of any perennial or intermittent stream is prohibited;
 - iv. A buffer of at least 100 feet on each side of any perennial river or stream on the donated property which ensures at least 75 percent tree canopy evenly distributed after harvest must be maintained, and a buffer of at least 50 feet on each side of any intermittent streams on the donated property which ensures at least 75 percent tree canopy evenly distributed after harvest must be maintained. Where the river or stream is also the property boundary, only the side of the river or stream within the property requires the buffer. As used in the preceding sentence, "buffer" means a vegetated buffer;
 - v. Timber and agricultural activities undertaken on the donated property are prohibited unless in accordance with best management practices published by the State Forestry Commission or the Soil and Water Conservation Commission, as the case may be;
 - vi. New construction on the donated property causing more than 1 percent of such property's total surface area to be covered by impervious surfaces is prohibited;
 - vii. Mining on the donated property is prohibited;

- viii. Planting on the donated property of non-native invasive species listed in Category 1, Category 1 Alert, or Category 2 of the "List of Non-Native Invasive Plants in Georgia" developed by the Georgia Exotic Pest Council is prohibited.
- (11) "Qualified Organization" means the federal government, state, a county, a municipality, or a consolidated government of this state with such donated property at least partially within its boundaries; or a bona fide charitable nonprofit organization qualified under the Internal Revenue Code. To be bona fide, a charitable nonprofit organization qualified under the Internal Revenue Code must:
- (a) Be authorized to do business in Georgia and, if required, be currently registered with the Georgia Secretary of State;
 - (b) Be an organization operated primarily or substantially to conserve one or more of the conservation purposes specified in Section 391-1-6-.03(5) (a-e), as evidenced in the organization's mission and articles of corporation and other materials;
 - (c) Have received tax-exempt status as a charity under section 501c(3) of the Internal Revenue Code of 1986 as stated in a Determination Letter provided by the Internal Revenue Service;
 - (d) Meet the requirements of section 1.170A-14(c) of the Treasury Regulations of 1986, and therefore have the power to acquire, hold, or maintain land or interests in land; and
 - (e) Have adopted the Land Trust Alliance's *Land Trust Standards and Practices (2004)*, a copy of which can be obtained from www.lta.org, as guidelines for the organization's operations
 - (f) Be accredited by the Land Trust Accreditation Commission (www.landtrustaccreditation.org) beginning on January 1, 2014.

Amended: F. Nov. 6, 2012; eff. Nov. 26, 2012.

Rule 391-1-6-.04. Application for Pre-certification and Certification.

- (1) Application forms for Pre-Certification or Certification may be obtained from the Department. The Applicant shall submit the completed application to the Department

with all attachments necessary to provide sufficient information for review and evaluation.

- (2) The Department shall review all completed Pre-Certification applications and shall make a preliminary determination as to whether or not the proposed donation is a Qualified Donation of Conservation Land. The Applicant shall be notified of this determination by letter within 60 days of receipt of the application. The Department shall reject Pre-Certification applications that are incomplete, incorrect, or do not meet the definition of Conservation Land, including applications where the conservation easement does not provide for Permanent Protection as required in this chapter. If the Department rejected the Pre-Certification application because it was incomplete or incorrect, the Applicant may resubmit the Pre-certification application with revised or corrected information for consideration by the Department.
- (3) Application for Certification of a donation may be made only after:
 - (a) The donor submits a non-refundable application fee of \$5,000; provided however, that the nonrefundable application fee for property donated to the state shall be 1 percent of the total value of the donation, unless such donation is being made to qualify the state for a federal or state grant
 - (b) An appraisal is submitted to the Department and forwarded to the State Properties Commission, which includes:
 1. A certification page, as established by the Uniform Standards of Professional Appraisal Practice, signed by the appraiser; and
 2. An affidavit signed by the appraiser which includes a statement specifying:
 - i. the value of the unencumbered property, the total value of the qualified donation in gross, and an accompanying statement identifying the methods used to determine such values;
 - ii. whether a subdivision analysis was used in the appraisal;
 - iii. whether the landowner or related persons own any other property, the value of which is increased as a result of the donation; and
 - iv. that the appraiser is certified pursuant to Chapter 39 A of Title 43.
 - (c) The property transaction has been completed and recorded by deed or other method to assure Permanent Protection.
- (4) Upon meeting the conditions of Section 3 of this Rule, the Department will proceed with the certification process and shall make a determination as to whether or not the donation is a Qualified Donation of Conservation Land. The Applicant will be notified of this determination, including the reason for rejection, if applicable, by letter within 90 days,

subject to the Department's receipt of the State Properties Commission's (SPC) determination of an approved appraisal. If the Department does not receive SPC's determination of an approved appraisal within the 90 days, then the Department shall issue the determination within 10 days of receiving SPC's approved appraisal. The Department shall reject Certification applications that are incomplete, incorrect, or are not Qualified Donations of Conservation Land, including applications where the conservation easement does not provide for Permanent Protection as required in this chapter. If the Department rejected the Certification application because it was incomplete or incorrect, the Applicant may resubmit the application with revised or corrected information for consideration by the Department.

- (5) A final determination by the Department on a Certification application shall be subject to review and appeal under Chapter 13 of Title 50, the Georgia Administrative Procedure Act. To contest the Department's final determination, an applicant must file a petition for a hearing within thirty (30) calendar days after issuance of notice of the Department's final determination. A petition for hearing must be in writing and must comply with all applicable requirements set forth in Rules [391-1-2-.03](#), [391-1-2-.04](#) and [391-1-2-.05](#). The date upon which a petition for hearing is deemed to be filed with the Department is determined in accordance with Rule [391-1-2-.04](#). The failure of an applicant to file a petition for hearing within thirty (30) calendar days after issuance of notice of the Department's final determination shall operate as a waiver of the applicant's right to contest the determination and the determination shall become the final decision of the Department in accordance with O.C.G.A. § [50-13-19](#).

Rule 391-1-6-.05. Monitoring and Reporting Requirements.

- (1) Holders of Conservation Easements certified under this program shall annually monitor the Conservation Easement to assure that the terms are maintained and shall prepare an annual monitoring report. The Department may request a copy of annual monitoring reports at any time. A Qualified Organization that fails to submit requested annual monitoring reports shall not be eligible to be a Qualified Organization until they are in compliance with this rule.
- (2) The Department shall annually submit to its Board a status report of the GCTCP.

Subject 391-1-7. REFUND OF FEES.

Rule 391-1-7-.01. Refund of Fees.

- (1) Persons with claims that they should be issued a monetary refund resulting from fees allegedly collected in error or overpayment or to which the Department is not otherwise entitled may submit such claims with the Department, by making, with the applicable Division of the Department, a Request for Refund on forms or in such manner as provided by the Department. No claim shall be considered unless such Request for Refund has been properly submitted within a maximum of two years after the date of the event giving rise to the claim and unless such claim does not exceed \$5,000.00.
- (2) The appropriate Division may request such supporting data, documentation, or information as it deems necessary for evaluation of a particular Request for Refund. The Division shall not take action on a Request for Refund until all supporting documents or information requested by the Division has been submitted by the requestor.
- (3) After reviewing and considering the information submitted by the requestor in support of a Request for Refund, the respective Division Director or his/her designee shall make a determination either to pay (in full or a portion thereof), or reject such claim and shall notify the requestor of the decision and the reasons for it.
- (4) If a determination is made to pay such claim or a portion thereof, the Division Director or his/her designee shall forward the decision to the Department's accounting section for issuance of the payment to the requestor, or shall otherwise pay such claim or a portion thereof using normal accounting methods and procedures approved by the Department.

Subject 391-1-8. PROCEDURES FOR CHANGE OF USE OR CONVEYANCE OF HERITAGE PRESERVES.

Rule 391-1-8-.01. Definitions.

As used in this Chapter, the term:

- (a) "Board" means the Board of Natural Resources.

- (b) "Change of use" means any use of all or part of a Heritage Preserve by a third party that is not part of the Department's management of the Heritage Preserve consistent with its dedicated uses and that either (i) lasts for more than sixty (60) days or (ii) will result in a permanent change to the topography of the Heritage Preserve or (iii) both.
- (c) "Costs of complying with this Chapter" includes but is not limited to travel expenses, room rentals, transcription expenses, Board member per diem and copying charges.
- (d) "Direct interest" means having a real property interest in the Heritage Preserve or having a managerial or operational interest in the Heritage Preserve pursuant to an agreement with the Department.
- (e) "Commissioner" means Commissioner of Natural Resources.
- (f) "Department" means the Georgia Department of Natural Resources.
- (g) "Heritage Preserve" means a parcel or parcels of land to which the state holds fee simple title or a lesser estate that is in the custody of the Department and that has been dedicated as a heritage area by the Governor.
- (h) "Local government" means a municipality or county of this state that desires to acquire fee simple title to a Heritage Preserve.
- (i) "State entity" means a state agency, department or authority with a direct interest in the use of a Heritage Preserve.
- (j) "Third party" means a state agency, department or authority or a private entity, such as a utility company, that does not have a direct interest in the Heritage Preserve.

Rule 391-1-8-.03. Petitions to Request a Change of Use.

- (1) Petitions for a change of use must be in writing and must be submitted in the manner required by Rule [391-1-8-.04](#).
- (2) Only a state entity may submit a petition for a change of use. Any state entity petitioner other than the Department must consult with the Department prior to petitioning for a change of use.
- (3) No third party may petition for a change of use. The Department, in its sole discretion, may file a petition for a change of use on behalf of a third party. The third party must consult with and obtain the support of the Division with operational responsibility for the affected Heritage Preserve and the Department's real estate office prior to requesting the Department file a petition on its behalf.

Rule 391-1-8-.04. Filing Petitions to Request a Change of Use.

- (1) An original and three copies of all petitions for a change of use must be filed on 8 1/2 by 11 inch paper with the Board. A petition is filed on the date on which it is actually received by the Board.
- (2) A petition must be submitted to the Board, c/o Commissioner, Georgia Department of Natural Resources, 2 Martin Luther King, Jr. Drive, S.E., Suite 1252 East, Atlanta, Georgia 30334-9000 by mail or hand delivery.
- (3) The office hours of the Commissioner are 8:00 a.m. to 4:30 p.m., Monday through Friday, except State legal holidays.
- (4) All petitions must meet the requirements of Rule [391-1-8-.05](#) below.
- (5) A copy of the petition must also be submitted to the Chief of Real Estate, Georgia Department of Natural Resources, 2 Martin Luther King, Jr. Drive, S.E., Suite 1454 East, Atlanta, Georgia 30334-9000.

- (6) The Commissioner may return any petition failing to comply with this Chapter to the petitioner without submitting it to the Board for consideration with a brief statement of why it is being returned.
- (7) A petitioner may resubmit a petition at any time after it is returned as noncompliant by the Commissioner by filing a new petition that meets the requirements of this Chapter.

Rule 391-1-8-.05. Content of Petitions to Request a Change of Use.

A petition for a change of use shall contain:

- (a) A statement identifying the affected Heritage Preserve;
- (b) A preliminary plat or map that shows the location of the affected Heritage Preserve, including the county(ies) and land lot(s) or district(s) of property and the location of the change of use area within the Heritage Preserve;
- (c) A statement of the acreage that will be affected by the proposed change of use and how the impacted area currently functions within the Heritage Preserve;
- (d) A statement of the purpose of the change of use;
- (e) A statement describing in detail any mitigation that is proposed to offset the impact of the change of use on the Heritage Preserve;
- (f) A statement of why the proposed change of use is an imperative and unavoidable necessity for which no other solution exists;
- (g) The name and current mailing address of the petitioner and the name and telephone number of the petitioner's primary contact person;
- (h) A statement that the petitioner, or the third party working through the Department, will be responsible for all costs of complying with this Chapter; and
- (i) If the petitioner is not the Department, a written statement from the Department regarding its position on the merits of the petition.

Rule 391-1-8-.06. Processing of Change of Use Petitions.

- (1) Upon receipt of a petition for a change of use, the Commissioner will deliver a copy of the petition to the Board at its next regularly scheduled meeting.
- (2) The Department will schedule public hearings in the county or counties in which the affected portion of the Heritage Preserve is located within ninety (90) days of the filing of the petition.
- (3) Each public hearing will be conducted as follows:
 - (a) The date, time and location of the public hearing will be posted on the Department's web site and at the regular meeting place of the Board at least thirty (30) days prior to the public hearing;
 - (b) The date, time and location of the public hearing will be given to the legal organ in which notices of sheriff's sales are published in the county in which the public hearing is to be held;
 - (c) At least one Board member will be physically present at the public hearing;
 - (d) A Board member shall conduct the public hearing with assistance from the Department's staff and will establish reasonable rules for its conduct;
 - (e) If technologically possible, Board members may attend the public hearing by telephone conference call;
 - (f) A transcript of the public hearing will be made;
 - (g) Any member of the public attending the public hearing may submit a written or oral statement; and
 - (h) Any member of the public unable to attend the public hearing may submit a written statement for the Board's consideration to the Board c/o Commissioner at the address in Rule [391-1-8-.04\(2\)](#) on or before the date of the public hearing.
- (4) The Department shall provide all Board members with a copy of all written statements and the transcript(s).
- (5) The Board Chair shall place consideration of the petition on the agenda of a regularly scheduled Board meeting in a timely manner.

- (6) After due consideration of all testimony from the public hearing, any written comments, the Department's position and any additional public comments provided at the Board meeting, the Board shall make a finding as to whether the proposed change of use is an imperative and unavoidable necessity for which no other solution exists. The Board shall submit a recommendation to the General Assembly for its consideration by sending a resolution to the Speaker of the House and the President of the Senate with a copy to the Governor either supporting or objecting to the proposed change of use. The Board resolution may partially support or object to the petition and may include any additional recommendations the Board finds appropriate.

Rule 391-1-8-.07. Conveyance of Heritage Preserves to Local Governments.

- (1) A local government that desires to acquire fee simple title to a Heritage Preserve shall:
 - (a) Consult with the Division within the Department with operational responsibility for the Heritage Preserve; and
 - (b) If the Division with operational responsibility for the Heritage Preserve supports the conveyance of fee simple title of the Heritage Preserve to the local government, the local government will work with the Division and the Department's real estate office to draft a perpetual conservation easement consistent with the best and most important uses established in the document dedicating the Heritage Preserve and any other conservation values or restrictions identified by the Department as applicable to the property; and
 - (c) The local government will work with the State Properties Commission to determine the good and valuable consideration to the State for the conveyance.
- (2) Once the local government and the Department agree upon the form of the conservation easement, the Department shall submit a written request to the Board to approve the conveyance of the Heritage Preserve to the local government by removing the heritage preserve dedication from the property and conveying the property to the local government subject to the grant of a perpetual conservation easement to the State of Georgia.
 - (a) With the exception of historic homes located on three acres or less of real property and designated by the Secretary of the Interior as National Historic Landmarks, the written request from the Department to the Board shall include the following information:

1. A statement identifying the Heritage Preserve and setting forth the reasons the Department supports the removal of the heritage preserve and the subsequent conveyance of the property to the local government;
 2. An adopted resolution by the local governing body approving the proposed conveyance;
 3. An adopted resolution by the local governing body acknowledging that it is prohibited from assigning any interest it may acquire in the property to a private individual or entity;
 4. An adopted resolution by the local governing body agreeing that it will not enter into an operational agreement with a third party that conveys a real property interest;
 5. A statement from the local government explaining its intended uses for the property; and
 6. A copy of the draft conservation easement.
- (b) For historic homes located on three acres or less of real property and designated by the Secretary of the Interior as National Historic Landmarks, the written request from the Department to the Board shall include the following information:
1. A statement identifying the Heritage Preserve and setting forth the reasons the Department supports the removal of the heritage preserve and the subsequent conveyance of the property to the local government;
 2. An adopted resolution by the local governing body approving the proposed conveyance;
 3. A statement from the local government explaining its intended uses for the property; and
 4. A copy of the draft conservation easement.
- (3) Upon receipt of the Department's written request to convey a Heritage Preserve to a local government, the Board will hold a public hearing at a regularly scheduled Board meeting. The public hearing will be conducted consistent with the Board's routine meeting procedures for receiving public comments.
- (4) If the Board determines that the removal of the heritage preserve dedication from the property and its conveyance to the local government subject to a conservation easement is in the best interest of the State, the Board shall adopt a resolution removing the heritage preserve dedication effective the date the Governor signs the quitclaim deed conveying

the property to the local government. The Board shall then follow its regular procedures relating to the disposition of real property and the acquisition of a conservation easement.

- (5) If the Board determines that the removal of the heritage preserve dedication from the property is not in the best interest of the State, the Board shall not remove the heritage preserve dedication and the Heritage Preserve shall not be conveyed to the local government.
- (6) If the General Assembly and the State Properties Commission approve the conveyance of the property to the local government, the Department will file with the Secretary of State and the office of the clerk of the superior court of the county or counties in which the property is located a notice of the removal of the heritage preserve dedication simultaneously with the recording of the conservation easement in the real property records of the county or counties in which the property is located.
- (7) The local government shall pay all costs associated with the disposition of real property that the Department routinely requires the grantee to pay and all costs associated with the acceptance of a conservation easement that the Department routinely requires the grantor to pay.
- (8) The Department and the local government may independently negotiate the terms and conditions of a transfer of all or part of the personal property located at the Heritage Preserve from the Department to the local government.

Subject 391-1-9. NONDISCRIMINATION IN THE PROVISION OF PUBLIC SERVICES.

[Rule 391-1-9-.01. Notice of Nondiscrimination.](#)

The Georgia Department of Natural Resources ("the Department") does not discriminate in the provision of public services on the basis of race, color, national origin, age, disability, or sex.

Cite as Ga. Comp. R. & Regs. R. 391-1-9-.01

Authority: O.C.G.A. § [12-2-4](#).

History. Original Rule entitled "Notice of Nondiscrimination" adopted. F. Oct. 26, 2021; eff. Nov. 15, 2021.

Rule 391-1-9-.02. Accommodating Persons with Limited English Proficiency.

- (1) Individuals who do not speak English as their primary language and who have a limited ability to read, speak, write, or understand English have Limited English Proficiency ("LEP"). The Department will take reasonable steps to ensure that persons with LEP have meaningful access to participate in the Department's services, activities, programs, and other benefits. All interpreters, translators, and other aids needed to comply with this rule will be provided without cost to the person being served.
 - (a) **Four-factor analysis to determine accommodations for LEP persons.** The Divisions within the Department provide services to diverse members of the public. Thus, LEP persons encountered may vary depending on the region of the State served or the individuals served by a specific program. For these reasons, the Divisions will consider the following four factors when determining the services necessary for LEP persons under this policy.
 - (i) **Number or proportion of LEP persons.** This requires assessing the number and proportion of LEP persons eligible to be served or likely to be encountered by a Division or program.
 - (ii) **Frequency of contact with the Division.** This necessitates assessing how frequently LEP persons are encountered by a Division or program.
 - (iii) **Nature and importance of the program.** This factor prioritizes vital programs and information and involves assessment of the relative importance of the program to the Division, to the state as a whole, or to the affected LEP community.
 - (iv) **Resources available.** This entails assessing the resources available to the Division or program and the costs to implement accommodations for LEP persons.
 - (b) **Implementation of procedures.** When Divisions have completed the four-factor analysis, each Division shall develop an accessibility and outreach policy that addresses the written and oral language assistance services that will be provided. Accessibility and outreach policies shall include:
 - (i) identifying the language needs of LEP individuals;
 - (ii) identifying ways in which language assistance will be provided;
 - (iii) training staff on policies and procedures;
 - (iv) providing notice of written and oral language assistance to LEP individuals;
 - (v) monitoring and updating LEP policies and procedures; and

(vi) providing notice of the grievance procedure to the public.

(2) Grievance procedure regarding the Department's provision of services, activities, programs, or benefits to LEP persons.

- (a) This grievance procedure may be used by anyone who wishes to file a complaint alleging discrimination in the Department's provision of services, activities, programs, or benefits to LEP persons.
- (b) The complaint shall be in writing and contain information about the alleged discrimination such as name, address, and phone number of the complainant and the location, date, and description of the grievance. Alternative means of filing complaints, such as personal interviews or a tape recording of the complaint will be made available upon request.
- (c) The complaint should be submitted by the complainant and/or his designee as soon as possible, but no later than sixty (60) calendar days after the alleged violation.
- (d) Complaints should be submitted online at:

<https://gadnr.org/limited-english-proficiency-complainant-form> or by mail to:

Georgia Department of Natural Resources

LEP Coordinator

2 Martin Luther King, Jr., Drive, SE

Suite 1252 East

Atlanta, Georgia 30334

- (e) Within 15 calendar days after receipt of the complaint, the LEP Coordinator or his/her designee will meet with the complainant to discuss the complaint and the possible resolutions.
- (f) Within 15 calendar days of the meeting, the LEP Coordinator will respond in writing. The response will explain the position of the Department and offer options for a substantive resolution of the complaint.
- (g) All written complaints received by the Department's LEP Coordinator and/or his/her designee and responses will be retained by the LEP Coordinator for at least three years.

History. Original Rule entitled "Accommodating Persons with Limited English Proficiency" adopted. F. Oct. 26, 2021; eff. Nov. 15, 2021.

Rule 391-1-9-.03. Americans with Disabilities Act ("ADA").

The Department will make all reasonable accommodations to ensure that people with disabilities have a meaningful opportunity to enjoy its programs, services, and activities.

(1) **Definitions.**

- (a) **Service animal:** any dog that is individually trained to do work or perform tasks for the benefit of people with disabilities. Examples of work or tasks include, but are not limited to, guiding people who are blind or have low vision, alerting people who are deaf or hard of hearing, pulling a wheelchair, alerting or protecting a person during a seizure, reminding a person with mental illness to take prescribed medications, calming a person with post-traumatic stress disorder during an anxiety attack, or performing other duties.
- (b) **Miniature horse:** a horse generally ranging in height from 24 to 34 inches measured to the shoulders and generally weighing 70 to 100 pounds that have been individually trained to do work or perform tasks for people with disabilities. Miniature horses are considered service animals.
- (c) **Support or therapy animal:** an animal that individuals with disabilities utilize for emotional support, well-being, or comfort. Because they are not individually trained to perform work or tasks, support or therapy animals are not service animals.
- (d) **Individual with a disability:** is a person who has a physical or mental impairment that limits one or more major life activities, or has a record of such impairment.
- (e) **Accommodation:** any modification or adjustment in policies, practices, procedures, or environment to enable a qualified individual with a disability to enjoy opportunities and access to the Department's rights, privileges, benefits, and services.
- (f) **Wheelchair:** means a manually-operated or power-driven mobility device designed primarily for use by an individual with a mobility disability for the main purpose of indoor, or of both indoor and outdoor locomotion.
- (g) **Other power-driven mobility device ("OPDMD"):** any mobility device powered by batteries, fuel, or other engines, whether or not designed primarily for use by individuals with mobility disabilities, that is used by individuals with mobility disabilities for the purpose of locomotion, including golf cars; electronic

personal assistance mobility devices, such as the Segway PT; or any mobility device designed to operate in areas without defined pedestrian routes, but is not a wheelchair within the meaning of this section.

- (h) **Auxiliary aids and services:** devices or services that enable effective communication for people with disabilities.

(2) **Effective Communication for People Who Have Speech, Hearing, or Vision**

Impairments. It is the policy of the Department to ensure effective communication with individuals with disabilities in our programs, services, and activities.

- (a) The Department will provide, free of charge, appropriate auxiliary aids and services when necessary to ensure effective communication with individuals with disabilities. Auxiliary aids and services provided may include:
 - (i) For people who are blind, have vision loss, or are deaf-blind, this includes providing a qualified reader; information in large print, Braille, or electronic for use with a computer screen-reading program; or an audio recording of printed information. A "qualified reader" is someone who is able to read effectively, accurately and impartially, using any necessary specialized vocabulary.
 - (ii) For people who are deaf, have hearing loss, or are deaf-blind, this includes providing a qualified notetaker, a qualified sign language interpreter, oral interpreter, cued-speech interpreter, or tactile interpreter; real-time captioning; written materials; or a printed script of a stock speech. A "qualified interpreter" is someone who is able to interpret effectively, accurately, and impartially, both receptively (i.e., understanding what the person with the disability is saying) and expressively (i.e., having the skill needed to convey information back to that person) using any necessary specialized vocabulary.
 - (iii) For people who have speech disabilities, this may include providing a qualified speech-to-speech transliterator. A "qualified transliterator" is someone trained to recognize unclear speech and repeat it clearly.
- (b) The Department shall not require an individual to bring someone to interpret for him/her. The Department may rely on a companion to interpret in only two situations:
 - (i) In an emergency involving an imminent threat to the safety or welfare of an individual or the public, an adult or minor child accompanying a person who uses sign language may be relied upon to interpret or facilitate communication only when a qualified interpreter is not available.

- (ii) In situations not involving an imminent threat, an adult accompanying someone who uses sign language may be relied upon to interpret or facilitate communication when a) the individual requests this, b) the accompanying adult agrees, and c) reliance on the accompanying adult is appropriate under the circumstances. This exception does not apply to minor children.
 - (iii) Under exception (ii), the Department may not rely on an accompanying adult to interpret when there is reason to doubt the person's impartiality or effectiveness.
- (c) **Requests for auxiliary aids and services.** Requests for an auxiliary aid or service for effective communication in receiving a service or participating in a program provided by the Department should be made as soon as possible, by submitting the appropriate request form. Requests should be made at least two weeks (10 business days) in advance of a scheduled event to allow time for scheduling. Request forms are available on the Department's website under Accessibility, as well as, at each Department location. All requests for auxiliary aids and services will be addressed promptly and in accordance with ADA requirements. The individual requesting the auxiliary aid or service will be notified as soon as possible if the Department is unable to meet the request and an effective alternative will be offered. Alternate formats or assistance may be requested by mail, or phone to:

Georgia Department of Natural Resources

ADA Coordinator

2 Martin Luther King, Jr., Drive, S.E.

Atlanta, Georgia 30334

Phone: (404) 656-2783

- (3) **Service Animal Policy.** Service animals shall not be excluded from the Department's facilities or activities.
- (a) It is Department policy to permit service animals anywhere in or on property owned, leased, or managed by the Department ("Department Property") where the public is normally allowed to go. Further, it is Department policy to permit miniature horses used as service animals in or on Department property where reasonable based on whether the horse is housebroken, is under the owner's control, can be accommodated based on type, size, and weight, and will not compromise legitimate safety requirements. Service animals should be harnessed,

leashed, or tethered unless such devices interfere with the service animal's work, or if the visitor's disability prevents the use of these devices. In that case, the visitor must maintain control of the animal through voice, signal, or other effective controls. The Department's policy includes an expectation that service animal owners will take responsibility for meeting legal requirements, ensure that animals are under their control, and adhere to cleanup rules.

- (b) **When support or therapy animal permitted.** The Department's service animal policy does not extend to support or therapy animals. Support or therapy animals may be permitted on Department properties where pets are not normally allowed on a case-by-case basis. However, it is the Department's policy to require that support or therapy animal owners obtain permission before bringing a support or therapy animal onto Department property, the requesting individual must submit a request and appropriate supporting documentation. Requests for a support or therapy animal will be evaluated by the appropriate office.

- (c) **Permitted staff inquiries.** When it is not obvious what service an animal provides, it is Department policy to allow staff to ask two questions:

First, is the service animal required because of a disability? Second, what work or task has the service animal been trained to perform? Department staff cannot ask about the person's disability, require medical documentation, require a special identification card, training documentation for the service animal, or ask that the service animal demonstrate its ability to perform the work or task.

- (d) **Allergies and fear of dogs.** Under Department policy, allergies and fear of dogs are not valid reasons for denying access or refusing service to people using service animals. When a person who is allergic to dog dander and a person who uses a service animal must spend time in the same room or facility, they both should be accommodated by assigning them, if possible, to different locations within the room or different rooms in the facility.
- (e) **Removal of service animal.** The Department prohibits removal of a service animal unless the service animal is out of control and the handler does not take effective action to control it or the service animal is not housebroken. When there is a legitimate reason to ask that a service animal be removed, the Department requires staff to offer the person with the disability the opportunity to obtain goods or services without the animal's presence.
- (f) **Food service areas.** The Department requires establishments that sell or prepare food to allow service animals in public areas on Department Property even if state or local health codes prohibit animals on premises.

- (g) **Integrated service.** The Department forbids isolating people with disabilities who use service animals from other patrons or treating them less favorably than other patrons.
 - (h) **Fees and surcharges.** The Department prohibits charging fees or surcharges to guests with service animals that are not being charged to other patrons without animals. In addition, if a deposit or fee is required to be paid by patrons with pets, the charge must be waived for service animals.
 - (i) **Damage.** If guests are normally charged for damage that they cause, the Department allows guests with a disability to be charged for damage caused by himself or his service animal.
 - (j) **Care and supervision.** The Department does not require staff to provide care or food for a service animal.
- (4) **Wheelchairs and other power-driven mobility devices.** Wheelchairs and OPDMDs shall not be excluded from Department facilities or activities. The Department will permit individuals with mobility disabilities to use wheelchairs and manually powered mobility aids, such as walkers, crutches, canes, braces, or other similar devices designed for use by individuals with mobility disabilities in any areas open to pedestrian use. The Department will make reasonable modifications in its policies, practices, or procedures to permit the use of other power-driven mobility devices ("OPDMDs") by individuals with mobility disabilities, in any areas open to pedestrian use.
- (a) **The Department and its individual Divisions have determined that certain classes of OPDMDs cannot be operated in accordance with legitimate safety requirements in certain areas. Thus, use of OPDMDs in and on Department property is restricted as follows:**
 - (i) Gasoline OPDMDs are not permitted inside buildings and/or enclosed spaces.
 - (ii) OPDMDs will not be allowed on delicate natural areas where pedestrian or vehicular traffic is restricted.
 - (iii) OPDMDs will not be allowed on public roads within the parks unless equipped for road use.
 - (iv) OPDMDs, in combination with the operator, which exceed 800 pounds total weight, are prohibited on nature trails (concrete and boardwalk portions), observation platforms, overlooks, boat docks, piers, and similar structures.
 - (v) OPDMDs may not be operated at speeds that exceed 5 miles per hour.

- (vi) To operate OPDMDs on Wildlife Management Areas, a permit is required.
 - (vii) On Wildlife management areas, OPDMDs are to be used on labelled "Handicap Access Roads" only.
 - (viii) Department staff may advise a person using an OPDMD that a particular area does not permit use of such device if the area has been included in the exceptions of this rule.
- (b) **The Department and its individual Divisions have determined that OPDMDs and wheelchair users in and on Department property must observe the following requirements:**
- (i) Users are required to operate the device at the speed of pedestrian traffic.
 - (ii) Users are required to operate the device on established pedestrian pathways to the same extent that pedestrians are required to stay on established pathways regardless of whether the device may be capable of off-path travel.
 - (iii) Users may not operate the device in specific locations excluded by this rule.
- (c) **General OPDMD and wheelchair considerations:**
- (i) The Department will not provide storage of any mobility device when it is not being used.
 - (ii) Users must follow established instructions for going through security screening machines if the device contains technology that could be harmed by the machine.
 - (iii) The Department does not represent that the trails and access ways found on the natural areas are designed, maintained, managed, or safe for use by any particular person or mobility device. Certain risks are inherent in the use of any trail or access way, and the Department assumes no liability for injury to any person or for damage to any mobility device, whether caused by the operator, another visitor to a nature area's trail or facility, or any other circumstance.
- (d) **Permitted staff inquiries:**
- (i) Department staff shall not ask an individual using a wheelchair or other OPDMD questions about the nature and extent of the individual's disability.

- (ii) Department staff may ask a person using a OPDMD to provide credible assurance that the mobility device is required because of the person's disability.
 - (I) Department staff must accept the presentation of a valid, State-issued, disability parking placard or card, or other State-issued proof of disability as credible assurance that the use of the OPDMD is for the individual's mobility disability.
 - (II) Department staff must accept as credible assurance a verbal representation, not contradicted by observable fact, that the OPDMD is being used for a mobility disability.
 - (e) **Provision of personal mobility devices.** Nothing in this policy should be construed to require the Department to provide personal mobility devices (such as wheelchairs or motorized scooters) to individuals with disabilities.
- (5) **Grievance procedure regarding the Department's provision of services, activities, programs, or benefits to individuals with disabilities.**
- (a) This grievance procedure may be used by anyone who wishes to file a complaint alleging discrimination in the Department's provision of services, activities, programs, or benefits to individuals with disabilities.
 - (b) The complaint should be in writing and contain information about the alleged discrimination such as name, address, phone number of complainant and location, date, and description of the problem. Alternative means of filing complaints, such as personal interviews or a tape recording of the complaint will be made available for persons with disabilities upon request.
 - (c) The complaint should be submitted by the complainant and/or his designee as soon as possible but no later than sixty (60) calendar days after the alleged violation. Complaints may be submitted online through the complaint form that is available on the Department's website under Accessibility or by mail to:

Georgia Department of Natural Resources

ADA Coordinator

2 Martin Luther King, Jr., Drive, SE

Suite 1252 East

Atlanta, Georgia 30334

- (d) Within 15 calendar days after receipt of the complaint, the Department's ADA Coordinator or her designee will meet with the complainant to discuss the complaint and the possible resolutions. Within 15 calendar days of the meeting, the Department's ADA Coordinator or her designee will respond in writing, and where appropriate, in a format accessible to the complainant, such as large print, Braille, or audio tape. The response will explain the position of DNR and offer options for substantive resolution of the complaint.
- (e) If the response by the Department's ADA coordinator or her designee does not satisfactorily resolve the issue, the complainant and/or his/her designee may appeal the decision within 15 calendar days after receipt of the response to the State of Georgia ADA Coordinator or her designee.
- (f) Within 15 calendar days after receipt of the appeal, the State of Georgia ADA Coordinator or her designee will meet with the complainant to discuss the complaint and possible resolutions. Within 15 calendar days after the meeting, the State of Georgia ADA Coordinator, or her designee will respond in writing, and, where appropriate, in a format accessible to the complainant, with a final resolution of the complaint.
- (g) All written complaints received by the Department's ADA Coordinator or her designee, appeals to the State of Georgia ADA Coordinator, or her designee, and responses from these two offices will be retained by the Georgia Department of Natural Resources ADA Coordinator for at least three years.

Subject 391-1-10. SOCIAL MEDIA.

Rule 391-1-10-.01. Moderation of Comments on the Department's Social Media Accounts.

- (1) The Georgia Department of Natural Resources ("the Department") uses various third-party social media websites for outreach. The Department encourages the public to interact and communicate about the content posted on the Department's social media accounts. The Department does not endorse the opinions or views expressed by any public comment.
- (2) The Department does not discriminate against any views. However, the deletion of comments on social media posts may be necessary in certain circumstances described

here. The Department may remove comments not related to the topic of the social media post. Additionally, the Department may delete comments that contain profanity.

- (3) A comment will not be edited or modified to remove unacceptable content. If a portion of the comment violates this rule, then the entire comment will be deleted.
- (4) The Department adheres to the terms and conditions of the various social media websites that it uses. The Department may be required to report to the social media websites public comments that violate their terms and conditions. The Department is not responsible for any such public comments that are deleted by social media websites.

Rule 391-2-2-.03. Beach Driving Authorizations.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations to establish criteria under which the Shore Protection Committee may issue authorizations to drive motor vehicles on Georgia dynamic dune field and beaches consistent with the purposes of the Shore Protection Act.
- (2) **Definitions used in this rule.**
 - (a) "Wet Sand Beach" means the area below the high tide line that is covered with water when the tide is high during an average high tide. The wet sand beach does not include the area where the dry sand is covered with water during a spring or otherwise exceptionally high tide.
 - (b) "Own or have an interest in real property" means to hold fee simple title, to have a life estate or other retained right, or to have a bona fide leasehold interest (other than a usufruct) for a term of one year or more, individually or as a partner or tenant in common, in and to a parcel of land. Own or have an interest in real property shall not include holding a rental agreement, license, or other right to use real property which does not constitute an interest in real property; in addition, such term does not include holding an easement over or across a tract of land. After the effective date of this section of this rule, such term shall not include newly-created undivided interests smaller than one-fifth except if created by inheritance or devise.
- (3) **Authorizations.**

- (a) Authorizations to operate motor vehicles on, over, or across the dynamic dune field or beaches, as provided by O.C.G.A. [12-5-248](#), shall be in accordance with the following criteria.
1. Authorizations may be issued only to those persons who have demonstrated to the satisfaction of the Shore Protection Committee that they meet one or more of the following criteria which justify driving on the beach when the Committee has determined that the proposed driving on the beach is not inconsistent with the public interest:
 - (i) are engaged in bona fide educational activities or scientific research as such activities are defined in O.C.G.A. Section [27-1-2\(24\)](#) and [\(62\)](#), or other bona fide educational activities or scientific research, and that require beach driving;
 - (ii) are a legal resident or full-time resident on the island for which the authorization is requested;
 - (iii) are involved in beach maintenance or security which makes driving a vehicle necessary;
 - (iv) own or have an interest in real property on the island in question, or are the spouses, parents, children, grandchildren, and other lineal descendants (and their spouses) of such individuals.
 2. Authorizations will be valid for five (5) years from the date of issuance.
 3. Authorizations are non-transferable.
 4. Authorizations will be barrier island specific.
 5. Authorizations are issued to persons only, except as provided in paragraph 11 of this section, which covers General Authorizations provisions of the rules.
 6. Authorizations will be issued only to persons with valid driver's licenses from the State of Georgia or other state, nation, or territory, and authorizations must be in possession of the person to whom the authorization was issued when that person is engaged in beach driving.
 7. Beach driving during the period May 1 to October 31 shall be restricted to daylight hours (1/2 hour before sunrise to 1/2 hour after sunset), except that authorizations allowing beach driving at night during such time period only for the purposes of scientific research, predator control, educational activities, or law enforcement may be issued to persons engaged in such activities.

8. Driving shall be permitted only on the wet sand beach, except and to the extent necessary to drive around a slough or other impassable area on the beach. Access to the wet sand beach shall be from access points as set forth in Appendix A, or from other Department-approved access routes from the upland.
9. Drivers shall minimize any disturbance of shorebirds, turtles or other wildlife and shall avoid disturbance altogether if possible.
10. Drivers receiving authorizations will be required to limit their speed to a maximum of 25 mph from August 1 through March 31 and 20 mph from April 1 through July 31, except in the case of an emergency. Nothing in these rules shall supersede any lower speed limit established on any barrier island.
11. General Authorizations: The Shore Protection Committee may grant a general beach driving authorization to a governmental entity or island manager which will cover all those persons who possess a valid driver's license and are under their employ or supervision and who are engaged in bona fide research, beach cleanup, law enforcement, animal control, resource management or beach maintenance activities during the time they are engaged in these activities. In this instance, individual authorizations will not be required provided the government entity or island manager submits to the Shore Protection Committee, and revises from time to time as appropriate, a list of the names of those individuals who will be covered by a general authorization.
12. Applications: Applications for beach driving authorization shall be made on forms provided by the Shore Protection Committee whose address is One Conservation Way, Brunswick, GA 31520-8687.
13. Revocation of Authorization: The Shore Protection Committee may revoke any authorization issued for failure to comply with these rules and regulations or any other rules and regulations promulgated under O.C.G.A. Title 12 Conservation and Natural Resources or Title 27 Game and Fish.
14. Authorizations to drive on a beach shall not be required during a medical, life-saving, or other emergency.
15. Nothing in these rules shall supersede any ordinances which further restrict driving on the beach.
16. Any person who is aggrieved or adversely affected by any order or action of the Shore Protection Committee may appeal as provided in O.C.G.A. [12-5-244](#).

Rule 391-2-3-.02. Regulation of Upland Component of a Project.

(1) Findings and Purpose.

(a) Findings. In promulgating this Rule, the Board declares the following:

1. Georgia's coastal marshlands have long been recognized by the General Assembly and the Board as a vital natural resource system, a vital area of the state, and essential to maintain the health, safety, and welfare of all the citizens of the State.
2. The Coastal Marshlands Protection Act (CMPA) provides a grant of authority to the Board of Natural Resources and Coastal Marshlands Protection Committee to regulate certain activities that affect or have the potential to affect the coastal marshlands of the state, to ensure the values and functions of the coastal marshlands are not impaired and to protect the public interest.
3. Stormwater management measures, impervious surface coverage standards, and marshlands buffer design and maintenance measures as applied to

projects which are subject to permitting under the Coastal Marshlands Protection Act are warranted so as to protect this vital area and to protect the public interest.

- (b) Purpose. The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations for permitting under and enforcement of the Coastal Marshlands Protection Act. This Chapter establishes procedures and criteria to be applied by the Coastal Marshlands Protection Committee when reviewing applications for a permit to remove, fill, dredge, drain, or otherwise alter any marshlands or construct or locate any structure on or over marshlands within the estuarine area of the state.

(2) Definitions used in this Rule.

- (a) "Applicant" means any person who files a permit application under the Coastal Marshlands Protection Act.
- (b) "Coastal marshlands" or "marshlands" means any marshland intertidal area, mud flat, tidal water bottom, or salt marsh in the State of Georgia within the estuarine area of the state, whether or not the tidewaters reach the littoral areas through natural or artificial watercourses. "Vegetated marshlands" shall include those areas upon which grow one, but not necessarily all, of the following: salt marsh grass (*Spartina alterniflora*), black needlerush (*Juncus roemerianus*), saltmeadow cordgrass (*Spartina patens*), big cordgrass (*Spartina cynosuroides*), saltgrass (*Distichlis spicata*), coast dropseed (*Sporobolus virginicus*), bigelow glasswort (*Salicornia bigelovii*), woody glasswort (*Salicornia virginica*), saltwort (*Batis maritima*), sea lavender (*Limonium nashii*), sea oxeye (*Borrchia frutescens*), silverling (*Baccharis halimifolia*), false willow (*Baccharis angustifolia*), and high-tide bush (*Iva frutescens*). The occurrence and extent of salt marsh peat at the undisturbed surface shall be deemed to be conclusive evidence of the extent of a salt marsh or a part thereof.
- (c) "Committee" means the Coastal Marshlands Protection Committee.
- (d) "Effective impervious cover" is the percentage derived when total impervious area is adjusted to reflect the fact that a site design results in the actual impervious surface characteristics of a site with a lower total impervious area, supported by scientific and engineering studies and findings.
- (e) "Estuarine area" means all tidally influenced waters, marshes, and marshlands lying within a tide-elevation range from 5.6 feet above mean tide level and below.
- (f) "Greenspace" means vegetative upland or wetland that remains in its natural state or has been developed only to the extent consistent with natural ecological systems protection.

- (g) "Impervious surface" means any surface such as pavement, roofs, roadways or other surface material through which water does not permeate.
- (h) "Marshlands buffer" means a zone or strip of land of a specified width along the riparian border of the project that serves as a protective setback.
- (i) "Marshlands component of the project" means the part of the project in an estuarine area or any structure on or over an estuarine area, including but not limited to marinas, community docks, bridges, piers, and bulkheads, requiring a permit under the Coastal Marshlands Protection Act pursuant to O.C.G.A. Section [12-5-286](#).
- (j) "Nonstructural Stormwater Management Practice" means any naturally occurring or planted vegetation or other pervious component of a stormwater management plan that provides for, or enhances, stormwater quality and/or reduces stormwater quantity or provides other stormwater management benefits.
- (k) "Person" means any individual, partnership, corporation, municipal corporation, county, association, or public or private authority, and shall include the State of Georgia, its political subdivisions, and all its departments, boards, bureaus, commissions, or other agencies, unless otherwise specifically exempted by the Coastal Marshlands Protection Act.
- (l) "Project" means the proposed construction or maintenance activity identified in an application for a marshlands permit within the contemplation of the Coastal Marshlands Protection Act. A project may consist of two components: a marshlands component and an upland component, as defined herein.
- (m) "Stormwater Treatment" means a process of remediation, reduction and/or elimination of the undesirable characteristics of runoff including, but not limited to, peak runoff rate, velocity, volume, and quantity of solids and pollutants.
- (n) "Total Impervious Area" means all impervious surface in a specified area as calculated as a percent of the total area.
- (o) "Untreated Stormwater" means runoff that is discharged without previously being managed by one or a combination of techniques that remediate, reduce and/or eliminate undesirable characteristics of the runoff.
- (p) "Upland" means lands that are neither coastal marshlands nor wetlands.
- (q) "Upland component of the project" is all those service areas, amenities, and recreational areas located inland of the Coastal Marshlands Protection Act jurisdiction line, that serve or augment the functioning of the marshlands component of the project, such as, but not limited to, dry stack boat storage; dockmaster shop; fuel storage and delivery facilities to serve the marshlands

component of the project; and restrooms intended for users of the marshlands component of the project. This term may extend to and cover such facilities adjacent to or in proximity to the marshlands component of the project that are intended to serve exclusively or primarily the users of the marshlands component of the project if the Committee finds in its sole discretion that such facility is likely to alter the marshlands.

- (r) "Wetlands" means areas that are inundated or saturated by surface or ground water often and long enough to support and under normal circumstances do support a prevalence of vegetation typically adapted for life in saturated soil conditions, such as swamps, marshes, bogs, and floodplains.
- (3) **Procedure for Determining Project Boundaries.** The applicant shall delineate the boundaries of the proposed project. Such boundaries shall be subject to review and validation by the staff of the Department of Natural Resources to ensure that the entire project is delineated. Such boundaries shall be included in the application proposed for consideration by the Committee. In this regard, the applicant shall submit documentation identifying all areas that are planned to be used in connection with the project which is delineated, to allow the Coastal Marshlands Protection Committee to verify the extent of the project.
- (4) **Marshlands Buffers for Upland Component of the Project.**
- (a) There is established a 50-foot marshlands buffer applicable to the upland component of the project as measured horizontally inland from the coastal marshland-upland interface, which is the Coastal Marshlands Protection Act jurisdiction line, so as to ensure the project does not result in the filling or other alteration of the coastal marshlands.
 - (b) The applicant for a permit under the Coastal Marshlands Protection Act and these rules shall certify adherence to soil and erosion control responsibilities, which, for purposes of the Coastal Marshlands Protection Act shall include recognition of and compliance with the following requirements unless in conflict with a criterion or exception established by the Environmental Protection Division of the Department of Natural Resources.
 1. Except as provided in subparagraph 2. of this paragraph and paragraphs (d) and (g) below, no land-disturbing activities within the project boundaries shall be conducted within the 50-foot marshlands buffer, and such marshlands buffer shall remain in its natural, undisturbed state of vegetation, so as to naturally treat stormwater during both construction and post construction phases of the upland component of the project.
 2. Land disturbance and construction of structures within the 50-foot marshlands buffer in the upland component of the project shall be limited to the following:

- (i) Construction and maintenance of temporary structures necessary for construction of the marshlands component of the project;
 - (ii) Construction and maintenance of permanent structures that are required for the functionality of and/or provide permanent access to the marshlands component of the project; and
 - (iii) Planting and grading with vegetated materials within the marshlands buffer to enhance stormwater management, such as erosion and sediment control measures, and to allow pedestrian access for passive recreation.
- (c) After such land disturbing activities associated with (b)2.(i) above are completed, and except as allowed for in (b)2.(ii) and (iii) above, the marshlands buffer must be restored to and maintained in a natural vegetated state or in a vegetated state at least as protective or better than pre-construction conditions, subject to hand trimming and thinning as authorized in the permit.
- (d) Already existing impervious surfaces and structures within the marshlands buffer area may remain and be maintained, provided the replacement, modification or upgrade does not increase any encroachment upon the required marshlands buffer in effect at the time of the replacement, modification or upgrade.
- (e) Marshlands buffers shall be designed, installed and/or maintained sufficiently such that stormwater discharge to coastal marshlands from the marshlands buffer is managed according to the policy, criteria, and information including technical specifications and standards in the Coastal Stormwater Supplement to the Georgia Stormwater Management Manual, 1st Edition, April 2009.
- (f) Nothing in this Rule shall be construed to limit the power or authority of the Director of the Environmental Protection Division.
- (g) The Coastal Marshlands Protection Committee, in its sole discretion, is authorized to grant a permit that includes an exception to the 50-foot marshlands buffer if the Committee finds that three conditions are met:
 - 1. Application of the marshlands buffer requirement will create a substantial hardship on the applicant; and
 - 2. The purpose, function and treatment capabilities of the marshlands buffer can be or has been achieved by alternative means, such that the stormwater discharge to coastal marshlands from the marshlands buffer is managed according to the policy, criteria, and information including technical specifications and standards in the Coastal Stormwater Supplement to the

Georgia Stormwater Management Manual, 1st Edition, April 2009, and is protective of water quality; and

3. Consistent with the purpose and reasonable use of the proposed project, the smallest practicable encroachment into the marshlands buffer is being utilized;
4. For purposes of this part, substantial hardship means a significant, site-specific and demonstrable condition exists that precludes the project from being constructed. The Coastal Marshlands Protection Committee shall consider the following factors in their evaluation of whether a substantial hardship exists:
 - (i) If the applicant complies with the required marshlands buffer width, the property cannot practicably be used for the proposed project. Merely proving that the exception would permit a greater profit from the property shall not be considered adequate justification for an exception; and
 - (ii) The substantial hardship results from application of the marshlands buffer width to the property separately or in conjunction with other factors such as unrelated deed restrictions, other state, federal or local government restrictions or ordinances; and
 - (iii) The substantial hardship is due to the physical nature of the applicant's property, such as its size, shape, or topography; and
 - (iv) The applicant or predecessor in title did not, by deed, covenant, or other voluntary act after March 26, 2007, create a situation where the application of the marshlands buffer would create a substantial hardship on the applicant.

(5) Stormwater Management Standards for the Upland Component of the Project.

- (a) There shall be no discharge of untreated stormwater from developed or disturbed areas, whether surface or piped, to coastal marshlands from the upland component of the project. The Committee is authorized to waive this requirement if the Committee finds that the site or project characteristics prohibit treatment, there is no practicable alternative, and it has minimal adverse impact.
- (b) In addition to the requirements of Section (5)(a) above, discharged stormwater from the upland component of the project shall be managed according to the policy, criteria, and information including technical specifications and standards in the Coastal Stormwater Supplement to the Georgia Stormwater Management Manual, 1st Edition, April 2009.

- (c) As a component of the stormwater treatment system, greenspace shall be retained and interconnected where practicable and appropriate.
 - (d) The use of non-structural stormwater management and stormwater better site design practices, such as those listed in the Coastal Stormwater Supplement to the Georgia Stormwater Management Manual, 1st Edition, April 2009, shall be utilized to the maximum extent practicable.
- (6) **Impervious Surface.** Pervious surfaces shall be used to the maximum extent practicable, and total impervious area shall be minimized with the goal of achieving no more than 15% effective impervious cover where practicable taking into account existing structures that are part of the project and the available land area that is part of the upland component of the project.
- (7) **Required Information.** The Coastal Marshlands Protection Committee shall establish an application checklist to assist applicants. A copy of the application checklist may be obtained by contacting the Committee at its administrative headquarters: Coastal Resources Division, One Conservation Way, Suite 300, Brunswick, Georgia 31520, 912-264-7218.

Rule 391-2-3-.03. Regulation of Marinas, Community Docks and Commercial Docks.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations for permitting under and enforcement of the Coastal Marshlands Protection Act. This Chapter establishes standards and procedures to be applied by the Coastal Marshlands Protection Committee when reviewing applications for a permit to construct or modify a marina, commercial dock, or community dock on or over marshlands within the estuarine area of the state.
- (2) **Definitions used in this Rule.**
- (a) "303(d) listed stream" means a stream, stream segment, or other surface waterbody identified on a list submitted biannually to the U.S. Environmental Protection Agency by the Georgia Environmental Protection Division, known as

the 303(d) list. Inclusion on the 303(d) list denotes the waterbody segment as impaired because it does not meet one or more designated uses (i.e. Fishing, Recreation, etc.) and for which one or more total maximum daily loads needs to be developed.

- (b) "Approved Disposal System" means an on-site wastewater disposal system suitable for domestic or other sewage approved by the Georgia Environmental Protection Division and/or local sanitation regulatory authority, as applicable.
- (c) "Commercial Dock" means a dock providing 500 linear feet or less of docking space for vessels inclusive of commercial vessels.
- (d) "Committee" means Coastal Marshlands Protection Committee.
- (e) "Community dock" means a dock providing 500 linear feet or less of docking space which is a subdivision or community recreational amenity providing water access for residents, and which may or may not entail a fee. A dock meeting this definition but providing more than 500 feet of docking space is treated as a marina, as defined in these rules.
- (f) "Department" means the Georgia Department of Natural Resources.
- (g) "Effective shading" means the amount of shading realized by utilizing alternative walkway decking material or alternative walkway design when compared to shading associated with traditional planking construction.
- (h) "Fixed dock" means a dock, constructed on pilings, that is fixed in elevation, i.e., that does not float on the water.
- (i) "Fixed terminal platform" means the platform constructed on pilings at the terminal, waterward end of a dock.
- (j) "Floating dock" means a dock that floats on the water to which watercraft are tied for mooring.
- (k) "Heritage preserve marshlands "means those marshlands that have been dedicated as a heritage preserve by the Governor pursuant to O.C.G.A. [12-3-75](#).
- (l) "Impaired water" means a stream, stream segment, or other surface waterbody that does not meet water quality standards and that is identified in the most recent 303(d) list as an "Impaired Water. "
- (m) "Improvements" means additions to or enhancements of raw land or structures that normally increase its usefulness and/or value, which are constructed in accordance with applicable legal requirements at the time of such construction and are intended to remain attached to or associated with the project.

- (n) "Manatee Basics for Boaters" means a 3' by 4' manatee educational display sign referenced in certain leases or permits, which contains standardized content pre-approved by the Wildlife Resources Division Wildlife Conservation Section.
- (o) "Manatee Travel Corridor" means channel(s) or waterway(s) that manatees are known to frequent and/or travel through, as determined by telemetry studies, aerial surveys and the Wildlife Resources Division's Wildlife Conservation Section's public sightings database.
- (p) "Marina" means any dock facility which has any one or more of the following:
 - 1. Includes fueling, maintenance or repair services (regardless of dock length);
 - 2. Is greater than 500 linear feet of dock space; or
 - 3. Has dry storage for boats in an upland storage yard or vertical rack system.
- (q) "Minor alteration" means any change in the marshlands which taken singularly or in combination with other changes, involves less than 0.10 acres.
- (r) "Model Ordinance within the Guide for Molluscan Shellfish Control in the National Shellfish Sanitation Program" means the requirements which are minimally necessary for the sanitary control of molluscan shellfish, as established by the National Shellfish Sanitation Program, a voluntary and cooperative program established in 1925 and comprised of federal, state and municipal authorities and representatives of the shellfish industry.
- (s) "Modification" means a structural change to a community dock, commercial dock, or marina facility, whether existing but not permitted, existing and permitted, or permitted and yet to be constructed.
- (t) "Project" means the proposed construction or maintenance activity identified in an application for a marshlands permit within the contemplation of the Coastal Marshlands Protection Act. A project may consist of two components: a marshlands component and an upland component, as defined in Rule [391-2-3-.02\(1\)](#).
- (u) "Tier One Community Crab Dock" means a community dock consisting of a single fixed walkway and an "L" or "T" shaped fixed terminal platform, supported on pilings, lacking floats, and from which water dependent activities such as fishing may be conducted.
- (v) "Tier Two Community Dock" means a community dock consisting of a single fixed walkway and terminal fixed platform, supported on pilings, connecting ramp(s), and floating dock(s), and from which water dependent activities such as boating and fishing may be conducted.

- (w) "Tier Three Community Dock" means a community dock consisting of a single fixed walkway and terminal fixed platform, supported on pilings, connecting ramp(s), and floating dock(s), and which does not qualify under a Tier One Community Crab Dock or a Tier Two Community Dock, and from which water dependent activities such as boating and fishing may be conducted.

(3) Tier One Community Crab Dock.

- (a) To qualify for the permitting procedures as set out in paragraph (c) below, a proposed Tier One Community Crab Dock project must comply with the following standards or conditions:
1. There shall be no improvements on the upland component of the project, other than for pedestrian access to the marsh component and driveways and parking area landward of the 50' marshlands buffer, all of which must be pervious.
 2. The community dock must be for water-dependent activities that access a channel with defined banks and not ponded areas or mudflats.
 3. The community dock must terminate at the first channel that is 10 feet wide grass to grass.
 4. If the community dock walkway spans a tributary that can be bridged (a tributary less than 10 feet wide), it must have a minimum clearance of six feet above the mean high water line to the bottom of the walkway bridge. Piling spacing must provide for safe navigation in the channel.
 5. A single "L" or "T" shaped fixed terminal platform up to 180 square feet is allowed.
 6. The width of the fixed terminal platform may not exceed 6 feet.
 7. The fixed terminal platform may not extend more than one-third of the width of the creek at mean high water.
 8. The fixed terminal platform may not be enclosed but may be covered and screened with wainscoting not higher than three feet.
 9. The fixed terminal platform may be roofed; provided, however, the roof may not exceed a maximum height of 12 feet above the fixed terminal platform decking at the lowest deck height.
 10. A second deck, attic, or ceiling storage is not allowed on any roofed section of the fixed terminal platform.

11. The community dock walkway may not exceed 4 feet in width and may not exceed 500 feet maximum length. The walkway is measured from the delineated marshlands jurisdiction line as determined or verified by the Department, channelward to the fixed terminal platform.
 12. The community dock walkway decking shall be of same material for its entire length, and standardized materials must be used when grating is used.
 13. The community dock walkway must be constructed at a height above all vegetation, but not more than six feet above grade.
 14. No floating dock or docks are allowed as part of the marshland component of the project.
 15. No hoists or lift davits are allowed as part of the marshland component of the project.
 16. No boats are allowed except for kayaks and canoes.
 17. The community dock may not have fish cleaning stations, restrooms, retail or commercial activity.
 18. Lighting if used must be shielded and on a timer.
 19. No dredging is allowed in association with the community dock project.
 20. The community dock may not be located in heritage preserve marshlands.
 21. The applicant must operate and maintain the dock in a manner that will not unreasonably obstruct navigation to and from neighboring properties.
- (b) Professional drawings of the project are required to be submitted as a part of the application. The drawings must be stamped by a Registered Land Surveyor, Professional Engineer, or Architect licensed to do business in Georgia.
- (c) Upon receipt of a substantially complete project application and application fee, an abbreviated review and processing period shall apply.
1. Staff to the Committee shall have 21 days to review the project permit application.
 2. The Committee shall provide Public Notice of the application for 15 days.
 3. Upon a determination that the project application is complete (including staff review and public notice) and the project meets all requirements of the

Coastal Marshlands Protection Act and these rules, the Commissioner may issue a Coastal Marshlands Protection Act permit unless a Committee member requests the application be brought to a Coastal Marshlands Protection Committee meeting for broader consideration.

4. Provided the project application is not called to a Coastal Marshlands Protection Committee meeting, total processing time of a Tier One Community Crab Dock shall not exceed 45 days following a preliminary determination by staff of completeness.
 - (d) No construction or alteration of a Tier One Community Crab Dock may commence until the expiration of 30 days following the date on which the application is approved; provided, however, that if a timely appeal is filed, no construction or alteration may commence until all administrative and judicial proceedings are terminated.
 - (e) The applicant/permittee must demonstrate the capacity to establish sufficient power and authority to enforce the conditions of the permit.
 - (f) Any modification to a Tier One Community Crab Dock is subject to review pursuant to the appropriate Tier criteria.
 - (g) If a proposed project does not qualify as a Tier One Community Crab Dock the application will be processed using the review and processing protocol for a Tier Two Community Dock, Tier Three Community Dock and Commercial Dock, or Marinas, using the lowest tier review and processing protocol for which the proposed project meets the standards. An application for multiple dock structures automatically defaults to the review and processing protocol for a Tier Three Community Dock and Commercial Dock.
 - (h) Permittee must provide a post-construction survey that locates the Tier One Community Crab Dock as indicated in the application materials. Such survey shall comply with the Georgia Plat Act, O.C.G.A. Sec. [15-6-67](#) et seq.
- (4) **Tier Two Community Dock.**
- (a) To qualify for the permitting procedures as set out in subparagraph (c) below, a proposed Tier Two Community Dock project must comply with the following standards or conditions:
 1. The upland component of the project is limited to pedestrian access and pervious parking landward of the 50' marshland buffer.
 2. There shall be no commercial activity at the community dock.

3. The community dock shall provide mooring space on a first come, first served basis and is open to all in the community served by the dock.
4. The community dock does not require a water bottoms lease, i.e., the dock has 500 linear feet or less of mooring space.
5. The community dock walkway shall not exceed 6 feet in width, 750 feet in length, and 3,000 square feet of effective shading impact. The walkway is measured from the delineated marshlands jurisdiction line as determined or verified by the Department, channelward to the fixed terminal platform.
6. The community dock walkway decking shall be of same material for its entire length, and standardized materials must be used when grating is used.
7. The community dock walkway must be constructed at a height above all vegetation, but not more than six feet above grade.
8. The community dock must be for water-dependent activities that access the first channel with defined banks and not ponded areas or mudflats.
9. The creek on which the community dock is located must be a minimum of 25 feet in width mean low water to mean low water.
10. A community dock located in a creek 25 feet to 39 feet width mean low water to mean low water may occupy a maximum of one-fourth of the creek width mean low water to mean low water.
11. A community dock located in a creek 40 feet wide or greater mean low water to mean low water may occupy a maximum of one-third of the creek width mean low water to mean low water.
12. If the community dock walkways spans a tributary that can be bridged (a tributary less than 10 feet wide, grass to grass), it must have a minimum clearance of six feet above the mean high water line to the bottom of the walkway bridge. Piling spacing must provide for safe navigation in the channel.
13. The community dock may have a single fixed terminal platform at the end of the walkway, which is limited to a maximum of 400 square feet, including screened and/or roofed sections.
14. The fixed terminal platform or floating docks shall not be constructed over vegetation.

15. The fixed terminal platform may not be enclosed but may be covered and screened with wainscoting not higher than three feet.
16. The fixed terminal platform may be roofed; provided, however, the roof may not exceed a maximum height of 12 feet above the fixed terminal platform decking at the lowest deck height.
17. A second deck, attic, or ceiling storage is not allowed on any roofed section of the fixed terminal platform.
18. The community dock may have floating docks, which shall be limited in size to that which is reasonable for the documented, intended use, not to exceed 800 sq. feet maximum floating dock structure. Documentation of need must be submitted to justify the size of the proposed floating dock.
19. Floating docks may not rest on the water bottom at low tide and must be supported on pilings or by cradle at least two feet above the mud.
20. No fish cleaning station, fueling, restrooms, pump-out, or retail activities are allowed.
21. No dredging is allowed in association with the community dock project.
22. Lighting if used must be shielded and on a timer.
23. The community dock may not be located in heritage preserve marshlands.
24. The community dock or its operation shall not cause or create a measurable adverse water quality impact to the waterbody in which it is built, as measured by dissolved oxygen, fecal bacteria, or nutrient enrichment. At a minimum, the community dock must not be in a body of water listed on Georgia EPD's most recent 303(d) list as an "Impaired Water."
25. If the Department determines through its own water quality sampling or other resource analyses that there are environmental impacts of concern associated with the project, the Department may require the applicant/permittee at the applicant/permittee's expense, to have water, substrate, and/or tissue samples collected and analyzed for metals, petroleum hydrocarbons, or other constituents.
 - (i) Sample collection and analyses must be according to methods approved by the Department.

- (ii) All results from such sampling results must be provided to the Department as obtained and may be used by the Department to further restrict the dock to reduce water quality impacts.
- 26. The permittee must operate and maintain the dock in a manner that will not unreasonably obstruct navigation to and from neighboring properties.
- 27. The applicant/permittee must post temporary manatee awareness signage during construction of the facility and permanent posting and maintenance of the informational display signage, "Manatee Basics for Boaters" post-construction.
- (b) Professional drawings of the project are required to be submitted as a part of the application. The drawings must be stamped by a Registered Land Surveyor, Professional Engineer, or Architect licensed to do business in Georgia.
- (c) Upon receipt of a substantially complete Tier Two Community Dock project application and application fee, an abbreviated review and processing period shall apply.
 - 1. Staff to the Coastal Marshlands Protection Committee shall have 60 days to review the project permit application.
 - 2. The Committee shall provide Public Notice of the application for 15 days, which period shall be concurrent with the staff review.
 - 3. Staff to the Coastal Marshlands Protection Committee shall have 15 days to review the public comment received.
 - 4. If the Tier Two Community Dock project is a minor alteration, Committee members shall have 10 days to request broader consideration of the project at a meeting of the Coastal Marshlands Protection Committee.
 - (i) Upon a determination that the project application is complete (including staff review and public notice) and the project meets all requirements of the Coastal Marshlands Protection Act and these rules, the Commissioner may issue a Coastal Marshlands Protection Act permit for a Tier Two Community Dock which is a minor alteration unless a Coastal Marshlands Protection Committee member requests that the project be heard at a Coastal Marshlands Protection Committee meeting for broader consideration.
 - (ii) If no Committee member requests the application receive broader consideration at a Coastal Marshlands Protection Committee

meeting, the application shall be processed to the Commissioner of Natural Resources for his review and action within 15 days.

- (iii) Provided the project application is not called to a Coastal Marshlands Protection Committee meeting, total processing time of a Tier Two Community Dock shall not exceed 115 days following a preliminary determination by staff of completeness.
5. Upon determination that a Tier Two Community Dock project application that is not a minor alteration is complete (including staff review and public notice), the project application shall be placed on the meeting agenda of the Coastal Marshlands Protection Committee.
 6. If a second public notice is issued, an additional 15 days would be added to the processing time.
- (d) No construction or alteration of a Tier Two Community Dock may commence until the expiration of 30 days following the date on which the application is approved; provided, however, that if a timely appeal is filed, no construction or alteration may commence until all administrative and judicial proceedings are terminated.
 - (e) The "Minor Alteration" acreage provision of the Coastal Marshlands Protection Act shall not take into consideration any reduction in acreage calculation for the effective shading impact reduction attributable to alternative walkway decking material or alternative walkway design.
 - (f) The applicant/permittee must demonstrate the capacity to establish sufficient power and authority to enforce the conditions of the permit.
 - (g) Any modification to a Tier Two Community Dock is subject to review pursuant to the appropriate Tier criteria.
 - (h) If a proposed project does not qualify as a Tier Two Community Dock the application will be processed using the review and processing protocol for a Tier Three Community Dock and Commercial Dock, or Marinas, using the lowest tier review and processing protocol for which the proposed project meets the standards. An application for multiple dock structures automatically defaults to the review and processing protocol for a Tier Three Community Dock and Commercial Dock.
 - (i) Permittee must provide a post-construction survey that locates the Tier Two Community Dock as indicated in the application materials. Such survey shall comply with the Georgia Plat Act, O.C.G.A. Sec. [15-6-67](#) et seq.

(5) Tier Three Community Dock or Commercial Dock.

- (a) To qualify for the permitting procedures as set out in subparagraph (d) below, a proposed Tier Three Community Dock or Commercial Dock project must comply with the following standards or conditions:
1. The community dock walkway or commercial dock walkway shall not exceed 6 feet in width, 1,000 feet in length, and not exceed 3,000 square feet of effective shading impact. The walkway is measured from the delineated marshlands jurisdiction line as determined or verified by the Department, channelward to the fixed terminal platform.
 2. The Coastal Marshlands Protection Committee may provide for an exception to the limitations on maximum walkway length and square footage. Documentation of need must be submitted to justify an exception, which shall be granted or denied in the sole discretion of the Committee.
 3. The community dock or commercial dock walkway decking shall be of same material for its entire length, and standardized materials must be used when grating is used.
 4. The community dock or commercial dock walkway must be constructed at a height above all vegetation, but not more than six feet above grade.
 5. If the community or commercial dock walkway spans a tributary that can be bridged (a tributary less than 10 feet wide, grass to grass), it must have a minimum clearance of six feet above the mean high water line to the bottom of the walkway bridge.
 6. The fixed terminal platform may not be enclosed but may be covered and screened with wainscoting not higher than three feet.
 7. A second story or deck is not allowed on any roofed section of the fixed terminal platform.
 8. Floating docks may not rest on the waterbottom at low tide and must be supported on pilings or by cradle at least two feet above the mud.
 9. No dredging is allowed in association with the initial community or commercial dock project.
 10. The applicant must operate and maintain the dock in a manner that will not unreasonably obstruct navigation to and from neighboring properties.
 11. The community dock or its operation shall not cause or create a measurable adverse water quality impact to the waterbody in which it is built, as measured by dissolved oxygen, fecal bacteria, or nutrient enrichment.

12. If the Department determines through its own water quality sampling or other resource analyses that there are environmental impacts of concern associated with the project, the Department may require the applicant/permittee at applicant/permittee's expense, to have water, substrate, and/or tissue samples collected and analyzed for metals, petroleum hydrocarbons, or other constituents.
 - (i) Sample collection and analyses must be according to methods approved by the Department.
 - (ii) All results from such sampling results must be provided to the Department as obtained and may be used by the Department to further restrict the dock to reduce water quality impacts.

13. The applicant/permittee must post temporary manatee awareness signage during construction of the facility and permanent posting and maintenance of the informational display signage, "Manatee Basics for Boaters" post-construction.
 - (b) Professional drawings of the project are required to be submitted as a part of the application. The drawings must be stamped by a Registered Land Surveyor, Professional Engineer, or Architect licensed to do business in Georgia.
 - (c) A needs assessment must be submitted to justify the size of the proposed community dock or commercial dock. The Coastal Marshlands Protection Committee may opt for phased build out based on demonstrated need. If the permit requires a phased build out based on demonstrated need, the permit may be extended for an additional five years upon a showing that all due efforts and diligence have been made toward completion of the phases authorized to date based on demonstrated need.
 - (d) Upon receipt of a substantially complete Tier Three Community Dock or Commercial Dock project application and application fee, the application shall be reviewed and processed subject to a higher degree of examination and scrutiny and longer review times than a Tier One Community Crab Dock or a Tier Two Community Dock.
 1. The Coastal Marshlands Protection Committee shall provide Public Notice of the application for 30 days.
 2. An application is complete when it contains substantially all of the written information, documents, forms, fees, and materials required by the Coastal Marshlands Protection Act, and such additional information as is required by the Committee to properly evaluate the application.

3. The Coastal Marshlands Protection Committee shall act upon an application for a permit within 90 days after the application is complete; provided, however, that this provision may be waived upon the written request of the applicant.
- (e) No construction or alteration of a Tier Three Community Dock or Commercial Dock may commence until the expiration of 30 days following the date on which the application is approved; provided, however, that if a timely appeal is filed, no construction or alteration may commence until all administrative and judicial proceedings are terminated.
 - (f) The "Minor Alteration" acreage provision of the Coastal Marshlands Protection Act shall not take into consideration any reduction in acreage calculation for the effective shading impact reduction attributable to alternative walkway decking material or alternative walkway design.
 - (g) The applicant/permittee must demonstrate the capacity to establish sufficient power and authority to enforce the conditions of the permit.
 - (h) Permittee must provide a post-construction survey that locates the Tier Three Community Dock or Commercial Dock as indicated in the application materials. Such survey shall comply with the Georgia Plat Act, O.C.G.A. Secs. [15-6-67](#) et seq.

(6) Marinas.

- (a) The Coastal Marshlands Protection Committee may issue a permit for a marina in accordance with the requirements of the Coastal Marshlands Protection Act. Unless otherwise determined by the Committee in accordance with subparagraph (h) below, a marina must comply with the following standards or conditions:
 1. The marina launch pier shall not exceed 1,000 feet in length. The marina launch pier is measured from the delineated marshlands jurisdiction line as determined or verified by the Department, channelward to the boat launching area.
 2. The marina pedestrian walkway shall not exceed 1,000 feet in length and shall not exceed 3,000 square feet of effective shading impact. The walkway is measured from the delineated marshlands jurisdiction line as determined or verified by the Department, channelward to the fixed terminal platform.
 3. The Coastal Marshlands Protection Committee may provide for an exception to the limitations on maximum marina launch pier length, and to the limitations on marina pedestrian walkway length and square footage.

Documentation of need must be submitted to justify an exception, which shall be granted or denied in the sole discretion of the Committee.

4. The marina may not be sited within 1,000 feet of waters classified as approved for shellfish harvesting by the Coastal Resources Division, or located where its presence or operation would cause a closing of waters classified for shellfish harvest based on the Model Ordinance within the Guide for Molluscan Shellfish Control in the National Shellfish Sanitation Program.
5. A marina to be located on open water must be sited at the first navigable creek that has a defined channel, adequate width and depth for the intended use, and established history of navigational access or use.
6. Any marina component proposed to be constructed on or over coastal marshlands must be for water dependent activities. No restaurants or structures for non-water dependent uses may be constructed on or over coastal marshlands.
7. Floating docks may not rest on the waterbottom at low tide and must be supported on pilings or by cradle at least two feet above the mud.
8. A marina proposed to be located in a manatee travel corridor or on a waterway where manatees may be found must have protective measures to minimize manatee/boat interactions to include:
 - (i) An education plan for boaters using the marina;
 - (ii) Regular monthly maintenance of dock facilities' hoses, faucets, or any apparatus or equipment capable of producing a stream of fresh water in close proximity to the access of the facility;
 - (iii) A contingency plan for emergency repair of freshwater sources;
 - (iv) Temporary manatee awareness signage during construction of the facility and permanent posting and maintenance of the informational display sign, "Manatee Basics for Boaters" post-construction; and
 - (v) Speed zones may be required if the marina is in a manatee travel corridor.
9. No dredging of tidal waterbottoms or vegetated coastal marshlands is allowed in association with the initial marina project.

10. If the marina could require maintenance dredging in the future, a permanent, dedicated spoil site with the capacity for the initial dredge volume and anticipated maintenance needs must be identified at the time of application.
11. Dry boat storage is encouraged as a supplement or alternative to in-water mooring, to the extent feasible.
12. The marina should provide onshore restrooms, shower, and laundry facilities in the upland component of the project. The applicant/permittee must take specific measures (such as, but not limited to, signs or dock regulations) to encourage boaters to use the washrooms, laundromat, and restrooms onshore, if any.
13. A marina must have an approved disposal system for disposal of wastewater generated by boats and upland facilities at the marina.
14. A marina must install, for collection of solid wastes, trashcans, dumpsters, or other suitable containers in compliance with The Act to Prevent Pollution from Ships (33 USCA 1901 and 33 CFR 158). Adequate separate containers for toxic substances shall be available.
15. A marina shall not allow any person to operate a marine toilet at a marina at any time so as to cause or permit to pass or to be discharged into the waters adjacent to the marina any untreated sewage or other waste matter or contaminant of any kind.
 - (i) A marina must have a working pump-out facility and dockside wastewater collection system for sanitary wastes from vessels, adequate for the capacity of the marina (number and size of vessels) and require their use by boats using the marina, unless specific exceptions are allowed by the Coastal Marshlands Protection Committee.
 - (ii) Pump-out facility maintenance logs must be kept.
 - (iii) The marina must prominently display signage showing the location of the nearest pump-out facility.
16. The Coastal Marshlands Protection Committee may permit marina fueling facilities which conform to U.S. Environmental Protection Agency and GADNR Environmental Protection Division laws and regulations, and which meet the following requirements:

- (i) Fuel storage tanks and fuel lines between tank, dock, and vessels shall be equipped with emergency shut-off valves.
 - (ii) Dispensing nozzles shall be the automatic closing type without a hold-open latch.
 - (iii) A marina must have adequate booms available either on-site or under contract to contain any oil spill.
 - (iv) The marina shall have a current "Operations Manual" containing the following:
 - (I) Description of how the applicant meets the conditions of this permit,
 - (II) The geographic location of the dock,
 - (III) A physical description of the facility showing mooring areas, fuel storage and dispensing areas, and locations of safety equipment,
 - (IV) A description and the location of each emergency shut-off system,
 - (V) The names and telephone numbers of the facility, U.S. Coast Guard Marine Safety Office, Environmental Protection Division Emergency Response Center, and other personnel who may be called by employees of the facility in an emergency, including fire and police, and
 - (VI) The names and telephone numbers of available hazardous spill clean-up contractors nearest the dock.
17. All components of a marina must be designed, installed, operated and maintained in a manner that will not unreasonably obstruct navigation to and from neighboring properties.
18. The marina or its operation shall not cause or create a measurable adverse water quality impact to the waterbody in which it is built, as measured by dissolved oxygen, fecal bacteria, or nutrient enrichment.
19. If the Department determines through its own water quality sampling or other resource analyses that there are environmental impacts of concern associated with the marina project, the marina may be required to have at applicant's/permittee's expense, water, substrate, and/or tissue samples

collected and analyzed for metals, petroleum hydrocarbons, or other constituents.

- (i) Sample collection and analyses must be according to methods approved by the Department.
 - (ii) All results from such sampling must be provided to the Department as obtained and may be used by the Department to further restrict the dock to reduce water quality impacts.
- (b) Professional drawings of the marina project are required to be submitted as a part of the application. The drawings must be stamped by a Registered Land Surveyor, Professional Engineer, or Architect licensed to do business in Georgia.
- (c) A needs assessment must be submitted to justify the size of the proposed marina. The Coastal Marshlands Protection Committee may opt for phased build out based on demonstrated need. If the permit requires a phased build out based on demonstrated need, the permit may be extended for an additional five years upon a showing that all due efforts and diligence have been made toward completion of the phases authorized to date based on demonstrated need.
- (d) Upon receipt of a substantially complete marina project application and application fee, the application shall be reviewed and processed subject to a higher degree of examination and scrutiny and longer review times than a Tier One Community Crab Dock or a Tier Two Community Dock.
 - 1. The Coastal Marshlands Protection Committee shall provide Public Notice of the application for 30 days.
 - 2. An application is complete when it contains substantially all of the written information, documents, forms, fees, and materials required by the Coastal Marshlands Protection Act, and such additional information as is required by the Committee to properly evaluate the application.
 - 3. The Coastal Marshlands Protection Committee shall act upon an application for a permit within 90 days after the application is complete; provided, however, that this provision may be waived upon the written request of the applicant.
- (e) No construction or alteration of a marina may commence until the expiration of 30 days following the date on which the application is approved; provided, however, that if a timely appeal is filed, no construction or alteration may commence until all administrative and judicial proceedings are terminated.

- (f) The applicant/permittee must demonstrate the capacity to establish sufficient power and authority to enforce the conditions of the permit.
- (g) Permittee must provide a post-construction survey that locates the marina as indicated in the application materials. Such survey shall comply with the Georgia Plat Act, O.C.G.A. Secs. [15-6-67](#) et seq.
- (h) Nothing in these rules shall be construed to preclude the Committee from developing or issuing permits suitable to the circumstances of a particular application.

(7) Community Dock, Commercial Dock, or Marina Modification.

- (a) A permit modification may be issued by the Committee in accordance with subparagraph (c) below for a community dock, commercial dock, or marina modification that complies with all the following standards or conditions:
 1. The project modification entails no improvements to the upland component of the project; and
 2. The project is a modification or addition to an existing dock facility permitted by the Coastal Marshlands Protection Committee for water-dependent activities; and
 3. The project modification involves less than 0.1 acre of new impacts to coastal marshlands; and
 4. The project modification will not affect a change in use of the originally permitted community dock or marina; and
 5. The project modification does not necessitate the issuance of an initial marina lease for the facility undergoing modification; and
 6. No fueling is allowed in association with the community dock, commercial dock, or marina modification; and
 7. No fish cleaning station may be located on or over coastal marshlands in association with the community dock, commercial dock, or marina modification; and
 8. No dredging is allowed in association with the community dock, commercial dock, or marina modification.
- (b) Professional drawings of the project are required to be submitted as a part of the application. The drawings must be stamped by a Registered Land Surveyor, Professional Engineer, or Architect licensed to do business in Georgia.

- (c) Upon receipt of a substantially complete Community Dock, Commercial Dock, or Marina Modification project application and application fee that meets the standards of subparagraph (a), above, an abbreviated review and processing period shall apply.
1. Staff to the Committee shall have 21 days to review the project permit application.
 2. The Committee shall provide Public Notice of the application for 15 days.
 3. Upon a determination that the project application is complete (including staff review and public notice), the Commissioner may issue a Coastal Marshlands Protection Act permit unless a Committee member requests the application be brought to a Coastal Marshlands Protection Committee meeting for broader consideration.
 4. Provided the project application is not called to a Coastal Marshlands Protection Committee meeting, total processing time of a community dock modification, commercial dock modification, or marina modification meeting the standards of subparagraph (a), above, shall not exceed 45 days following a preliminary determination by staff of completeness.
- (d) No construction or alteration of a community dock or marina modification may commence until the expiration of 30 days following the date on which the application is approved; provided, however, that if a timely appeal is filed, no construction or alteration may commence until all administrative and judicial proceedings are terminated.
- (e) The applicant/permittee must demonstrate the capacity to establish sufficient power and authority to enforce the conditions of the permit.
- (f) Any modification not meeting the standards of subparagraph (a) above, shall be reviewed and processed subject to a higher degree of examination and scrutiny applying the standards and review times of the tier that would apply if it were a new project.
- (g) Permittee must provide a post-construction survey that locates the Community Dock, Commercial Dock, or Marina Modification indicated in the application materials. Such survey shall comply with the Georgia Plat Act, O.C.G.A. Secs. [15-6-67](#) et. seq.

Effective Sep. 30, 2021.

Rule 391-2-3-.04. Annual Leave Rate Adjustment.

- (1) **Purpose.** The purpose of this rule is to establish the procedure pursuant to which the Coastal Marshlands Protection Committee will adjust the annual rental fee per acre for leasing state owned marshland and waterbottoms.
- (2) **Procedures for Adjusting Marina Lease Rate.**
 - (a) The annual rental fee per acre for leasing state owned marshland and waterbottoms for 2009 is one thousand dollars (\$1,000.00).
 - (b) Beginning in 2010 and using the 2009 annual rental fee per acre as a base, the Coastal Marshlands Protection Committee shall annually adjust the amount of the annual rental fee per acre for leasing state owned marshland and waterbottoms by the rate of change (inflation or deflation) in the Consumer Price Index - All Urban Consumers Less Food and Energy as reported by the Bureau of Labor Statistics of the United States Department of Labor for the most recent calendar year.
 - (c) The Coastal Marshlands Protection Committee shall determine the adjustment to the annual rental fee per acre for state owned marshland and waterbottoms on or before May 1 of each calendar year.

Rule 391-2-3-.05. Extension of Live-Aboard Privileges.

- (1) **Scope.** The Rules in this Chapter will guide the Commissioner in considering requests for extensions of time to occupy a live-aboard under O.C.G.A. § [12-5-288\(b\)\(8\)](#).
- (2) **Definitions used in this Rule.**

- (a) "Applicant" means any owner of a live-aboard who requests the Commissioner grant an extension of time beyond 90 days in any calendar year to permit persons to occupy a live-aboard.
- (b) "Approved Disposal System" means an on-site wastewater disposal system suitable for domestic or other sewage approved by the Georgia Environmental Protection Division and/or local sanitation regulatory authority, as applicable.
- (c) "Commissioner" means the Commissioner of Natural Resources of the State of Georgia or designee.
- (d) "CMPA" means the Coastal Marshlands Protection Act of 1970 as amended, O.C.G.A. § [12-5-280](#)*et seq.*
- (e) "Department" means the Department of Natural Resources of the State of Georgia.
- (f) "Discharge" means, and shall include, spilled, leaked, pumped, poured, emitted or dumped.
- (g) "Eligible marina" means any marina that meets the criteria set forth in Rule 391-2-3-.05(4).
- (h) "Live-aboard" means a floating vessel or other watercraft capable of safe, mechanically propelled navigation under average Georgia coastal wind and current conditions which is utilized as a human or animal abode and is located at a marina or a mooring area established by the department.
- (i) "Live-aboard operator" means the owner of a live-aboard or any person other than the owner who occupies, operates or has charge of the navigation or use of a live-aboard.
- (j) "Marina" means any dock facility that has one or more of the following:
 - 1. Includes fueling, maintenance or repair services (regardless of dock length);
 - 2. Is greater than 500 linear feet of dock space; or
 - 3. Has dry storage for boats in an upland storage yard or vertical rack system.
- (k) "Marina operator" means the owner of an eligible marina or any person who operates or has charge of an eligible marina.
- (l) "Sewage" means human or animal body wastes and the waste from toilets and other receptacles intended to receive or retain body wastes.

(3) **Extension Eligibility.**

- (a) No live-aboard may be occupied in Georgia coastal waters subject to the jurisdiction of the CMPA for more than 90 days during any calendar year unless the live-aboard owner has been granted an extension of time in writing by the Commissioner.
- (b) The applicant shall submit a written request for an extension to the Commissioner.
- (c) The Commissioner shall promptly consider any written request that meets the following requirements:
 - 1. The applicant submits the request on the application form provided by the Department to the Commissioner, c/o the Coastal Resources Division, One Conservation Way, Brunswick, Georgia 31520;
 - 2. The Coastal Resources Division receives the request at least 15 calendar days prior to the requested extension start date;
 - 3. The applicant certifies that the live-aboard has a secured mechanism to prevent discharge of treated and untreated sewage. Examples of secured mechanisms considered to be effective at preventing discharges include, but are not limited to, closing the seacock and padlocking, using a non-releasable wire tie, or removing the seacock handle (with the seacock closed).
 - 4. The applicant certifies that they will not discharge any sewage, treated or untreated, into Georgia coastal waters subject to the jurisdiction of the CMPA.
 - 5. The applicant certifies that the live-aboard is capable of being used as a means of transportation on the water and is capable of safe, mechanically-propelled, navigation under average Georgia coastal wind and current conditions.
 - 6. The applicant identifies the eligible marina at which the live-aboard operator will moor the live-aboard.
 - 7. The applicant provides written documentation of a slip rental agreement with an eligible marina.
 - 8. The applicant states the reasons for requesting the extension and the period of time for which the extension is requested.
 - 9. The Commissioner, in his or her sole discretion, may grant or deny any request for an extension of time to occupy a live-aboard.

10. The Commissioner, in his or her sole discretion, may consider requests for extensions that do not meet this Rule if the applicant shows extraordinary and extenuating circumstances.
11. An extension may be granted for a specific live-aboard and cannot be transferred to a different live-aboard.

(4) **Eligible Marina.** No marina may permit a live-aboard to moor at its dock facility for more than 90 days in any calendar year unless the marina meets the following criteria:

- (a) The marina has an approved disposal system with a minimum holding tank size as listed below or a direct connection to a municipal or private sewage treatment facility; provided; however, that nothing in this Rule shall preclude a marina from owning or contracting with a mobile sewage pump-out service so long as said service provides documentation of proper disposal of sewage compliant with local, state or federal ordinances, regulations, and laws.

Total # of Live-aboards Minimum Holding Tank Size

1. 1 to 20	300 gallons
2. 21 to 40	600 gallons
3. 41 to 60	900 gallons
4. 61 to 80	1,200 gallons
5. 81 to 100	1,500 gallons
6. More than 100	2,000 gallons

- (b) The marina is in good standing with its CMPA permit and its Department waterbottoms lease.
- (c) The marina requires proof that each live-aboard mooring at its dock facility that has been occupied in Georgia coastal waters subject to the jurisdiction of the CMPA for more than 90 days during any calendar year has been granted an extension by the Commissioner pursuant to O.C.G.A. § [12-5-288\(b\)\(8\)](#).

(5) **Record Keeping.**

- (a) Live-aboard operators granted an extension shall keep on the live-aboard records or receipts describing the location and date of sewage pump-out for the duration of the extension.
- (b) Each eligible marina shall keep at its office, in an organized and recoverable fashion, and for the duration of the extension:
 1. all records or receipts describing the date of each sewage pump-out inclusive of a live-aboard identifier; and

2. A copy of the document authorizing the extension for each live-aboard moored at its dock facility that has been occupied in Georgia coastal waters subject to the jurisdiction of the CMPA for more than 90 days in any calendar year.
 - (c) A copy of the document authorizing the extension shall be kept onboard the live-aboard for the duration of the extension.
- (6) **Extension Term.** The Commissioner may grant extensions for up to one calendar year at a time, beginning January 1 and ending December 31. Extensions can be requested for additional years, subject to the same requirements.
- (7) **Live-aboard and Marina Inspection.** Live-aboard owners granted an extension and eligible marinas are subject to inspections by Department personnel to verify compliance with this rule.
- (8) **Amendment and Termination of Extensions.**
 - (a) The live-aboard operator shall notify the Department using the Department provided form prior to re-locating the live-aboard to a new eligible marina.
 - (b) A marina operator shall notify the Department if any live-aboard with an extension moored at its dock facility terminates its agreement with the marina operator.
 - (c) An extension may be terminated if the Commissioner determines that the conditions of the extension have been violated by the live-aboard operator after 10 days notice to the live-aboard owner.
 - (d) Any live-aboard owner who believes that the Commissioner erroneously terminated an extension may file an appeal with the Commissioner within 10 days of the date of the decision. The appeal must be in writing and set forth in detail the reasons for the appeal. The appeal must be postmarked or delivered to the Commissioner at the Commissioner's official address on or before the 10th day; provided that if the 10th day falls on a Saturday, Sunday or state holiday, then the 10th day is deemed to be the first business day after said Saturday, Sunday or state holiday.

Repealed: F. June 26, 1992; eff. July 16, 1992.

Adopted: New Rule entitled "Extension of live-Aboard Privileges". F. Jun. 27, 2012; eff. July 17, 2012.

Subject 391-2-4. SALTWATER FISHING REGULATIONS.

Rule 391-2-4-.01. Eel Fishing.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations based on sound principles of wildlife research and management, establishing the commercial and recreational seasons, days, and places; methods of fishing and disposition; and size, creel, and possession limits for eel.
- (2) **Areas Open to Commercial Eel Fishing.** It shall be lawful to fish commercially for adult eels in the following areas:
 - (a) In any salt waters of this state except as specifically prohibited below;
 - (b) In the Savannah River from the saltwater demarcation line to a point one-half mile below the Stevens Creek Reservoir Dam;
 - (c) In the Ogeechee River from the saltwater demarcation line to the U.S. Highway 25 bridge at Millen;
 - (d) In the Altamaha River from the saltwater demarcation line to the confluence of the Oconee and Ocmulgee Rivers provided; however, it shall be unlawful to fish commercially for eel in the North Altamaha River, except on the ocean side (downstream) of the mouth of, but not including, Lewis Creek. Such fishing shall also be unlawful in the South Altamaha River, except on the ocean side (downstream) of the uppermost entrance of Hammersmith Creek;
 - (e) In the Oconee River from the confluence of the Oconee and Ocmulgee Rivers to a point one-half mile below Lake Sinclair Dam;
 - (f) In the Ocmulgee River from the confluence of the Oconee and Ocmulgee Rivers to a point one-half mile below Juliette Dam;
 - (g) In the Satilla River from the saltwater demarcation line to the U.S. Highway 84 bridge at Waycross;
 - (h) In the St. Marys River from the saltwater demarcation line to Georgia Highway 94 bridge near St. George;
- (3) **Seasons.** Fishing for eels shall be open year-round.
- (4) **Gear for Taking Eels.** It shall be lawful to fish commercially for adult eels as follows:
 - (a) With rectangular pots no larger than 24 inches x 24 inches x 15 inches or with cylindrical traps no larger than 15 inches nor smaller than 9 inches in diameter and no greater than 36 inches in length. Each gear type must have:

1. A mesh size no smaller than 1 inch x ½ inch, except for the throat or muzzle and the end opposite the throat or muzzle of cylindrical traps;
 2. A round opening, the size of which shall be limited by a steel ring 2 inches in diameter securely attached to the material of which the muzzle or throat is constructed; and
 3. Attached thereto a tag bearing the name, address and commercial fishing license number of the person using such pot or trap and non-green colored float bearing the corresponding commercial fishing license number in one inch letters of contrasting color.
- (5) **Possession of Fish Other than Eels.** All fish other than eels, caught in any trap set for eels shall be returned to the waters of the state immediately after and at the place the trap has been fished. Possession of any fish other than adult eels shall be prima-facie evidence of fishing illegally.
- (6) **Commercial Harvest Limits.** Commercial harvest of eels is limited to adult eels which shall mean eels at least nine inches in length. Except as otherwise provided, there shall be no commercial creel limit for the harvest of adult eels.

Rule 391-2-4-.02. Shad Fishing.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations based on sound principles of wildlife research and management, establishing the commercial and recreational seasons, days and places; methods of fishing and disposition; and size, creel, and possession limits for shad.
- (2) **Areas Open to Commercial Shad Fishing.**
 - (a) Nets shall be set or fished only in flowing water within the banks of the stream channels. Nets may not under any circumstances be set or fished in waters that are not flowing such as in sloughs or dead oxbow lakes.

- (b) Waters of the Savannah River system open to commercial shad fishing are the Savannah River downstream of the U.S. Highway 301 bridge, Collis Creek, Albercorn Creek, Front River, Middle River, Steamboat River, McCoy's Cut, Housetown Cut, Back River upstream from Corps of Engineers New Savannah Cut, New Savannah Cut, North Channel Savannah River downstream to a line running due south of the easternmost tip of Oyster Bed Island, South Channel Savannah River downstream to a line running from the southeast tip of Cockspur Island to the mouth of Lazaretto Creek, and Elba Island Cut between North and South Channels of the Savannah River.
 - (c) Reserved.
 - (d) Waters of the Altamaha River system open to commercial shad fishing are the Oohopee River upstream to the U.S. Highway 1 bridge; the Altamaha River downstream of the from U.S. Highway 1 bridge including Cobb Creek Oxbow, Beards Creek from its mouth upstream to the Long-Tatnall County line (Big Lake), Sturgeon Hole from the Altamaha River to the lower mouth of Harper Slough, Old Woman's Pocket, South Branch, General's Cut, South Altamaha River, Champney River, Butler River, One Mile Cut, Wood Cut, Darien River upstream to the confluence Darien Creek, and Cathead Creek, Buttermilk Sound upstream to the mouth of Hampton River, Hampton River, Altamaha sound to the sound/beach boundary (see [391-2-4-.03](#)), Rockdedundy River, Little Mud River, South River, Back River, North River upstream to Hird Island Creek, and Doboy Sound from the sound/beach boundary upstream to a line from range F1 R4 sec A across buoy R "178" to Sapelo Island. Old River and Mid Slough of the Penholoway River and Ellis Creek are closed to commercial shad fishing.
 - (e) Reserved.
 - (f) Reserved.
- (3) **Commercial Shad Fishing Seasons.** The commercial shad fishing season shall be open as provided in subparagraphs (a), (b) and (c) of this paragraph from 1 January to 31 March; however, the Commissioner of Natural Resources, in accordance with current, sound principles of wildlife research and management, may at his discretion open or close the season 30 days after 31 March on any or all areas open to commercial shad fishing.
- (a) The Altamaha River system downstream from the Seaboard Coastline Railroad bridge (at Altamaha Park) will be open to commercial shad fishing Monday through Friday each week. Upstream of this point will be open Tuesday through Saturday each week.
 - (b) The Savannah River system downstream from the I-95 bridge will be open to commercial shad fishing Tuesday through Friday each week. Upstream of the I-95 bridge it will be open Wednesday through Saturday each week.

(c) Reserved.

(4) Commercial Gear and Methods for Taking Shad.

(a) 1. Set nets and drift nets of at least four and one-half inch stretched mesh or trot lines (in accordance with O.C.G.A. [27-4-91](#)) may be used to commercially fish for shad, provided, however, that only drift nets may be used in the Savannah River system downstream of a line between the mouth of Knoxville Creek and McCoy's Cut at Deadman's Point; Altamaha Sound; and Doboy Sound.

2. Nothing in this section shall preclude the commercial use of pole and line gear.

(b) 1. Set nets must be placed at least six hundred (600) feet apart and shall be limited to one hundred (100) feet in length. All set nets must have one end secured to the stream's bank and be buoyed at the outer (streamward) end so as to be clearly visible to boaters.

2. Set and drift nets must be situated so as to follow one-half the stream width open and free for the passage of fish.

3. Drift nets shall not be fished closer than three hundred (300) feet apart and shall be limited to a maximum of one thousand (1,000) feet in length in saltwaters.

(c) This Rule applies only to American and hickory shad. Game fish other than American shad and hickory shad, and all species of catfish taken in shad nets must be released unharmed into the waters from which they were taken.

(d) Notwithstanding any other provision to the contrary, there shall be no possession or creel limit on commercially harvested American shad or hickory shad

(5) Recreational Shad Fishing.

(a) Recreational shad fishermen are restricted to two poles and lines. Fishermen using more than two poles and lines shall be considered to be fishing commercially.

(b) Bow nets shall be considered recreational fishing gear and shall have a minimum legal size of 3 ½ inches stretched mesh.

(c) The maximum recreational daily creel and possession limit shall be eight (8) for any one or a combination of American shad or hickory shad.

Rule 391-2-4-.03. Sound/Beach Boundaries.

- (1) **Purpose.** The purpose of these rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations to regulate the places wildlife can be taken. (O.C.G.A. [27-4-12](#)).
- (2) **Designations of Sound/Beach Boundaries.** Sound/Beach boundaries consist of an imaginary line running through coordinates generally located on the southern tip of a barrier island to the northern tip of the next barrier island immediately south.
 - (a) Estelle Sound (Savannah River). The boundary is from the point located at 32° 02' 04.5" N. Lat./ 80° 51' 03.8" W. Long. at the easternmost end of the south jetty of the Savannah River Entrance to the point located at 32° 01' 48" N. Lat./ 80° 51' 09" W. Long. at the northern tip of Tybee Island.
 - (b) Wassaw Sound. The boundary is from the point located at 31° 56' 38" N. Lat./80° 55' 45" W. Long. on the southern tip of Little Tybee Island to the point located at 31° 54' 37.5" N. Lat./ 80° 56' 09.5" W. Long., directly in front of the large concrete bunker on the northern tip of Wassaw Island.
 - (c) Ossabaw Sound. The boundary is from the point located at 31° 51' 27" N. Lat./81° 00' 00" W. Long. on the southern tip of Wassaw Island to the point located at 31° 49' 02" N. Lat./81° 02' 17" W. Long. on the northern tip of Ossabaw Island.
 - (d) St. Catherines Sound. The boundary is from the point located at 31° 43' 17" N. Lat./81° 8' 13" W. Long. on the southern tip of Ossabaw Island to the point located at 31° 41' 55" N. Lat./81° 8' 23" W. Long. on the northern tip of St. Catherines Island.
 - (e) Sapelo Sound. The boundary is from the point located at 31° 33' 20" N. Lat./81°10' 35" W. Long on the southern tip of St. Catherines Island to the point located 31°31' 50" N. Lat./81° 11' 13" W. Long. on the northern tip of Black Beard Island.
 - (f) Doboy Sound and Altamaha Sound. The boundary is from the point located at 31° 22' 55" N. Lat./81° 16' 25" W. Long. on the southern tip of Sapelo Island to the

point located at 31° 21' 50.48" N. Lat./81° 17' 36.63" W. Long. on the northern tip of Wolf Is land then turning south to a point located at 31° 19' 34.12" N. Lat./81° 17' 18.20" W. Long. on the southern tip of Wolf Is land, finally turning southwest to a point located at 31° 17' 21" N. Lat./81° 17' 57" near the northeastern tip of Little St. Simons Island.

- (g) Reserved.
 - (h) Hampton River. The boundary is from the point located at 31° 13' 5" N. Lat./81° 18' 7" W. Long. on the southern tip of Little St. Simons Island to the point located at 31° 12' 48" N. Lat./81° 18' 38" W. Long. on the northeastern tip of Sea Island.
 - (i) St.03 Simons Sound. The boundary is from the point located at 31° 08' 01" N. Lat./81° 23' 37" W. Long. at the base of the lighthouse on the southern tip of St. Simons Island to the point located at 31° 7' 12" N. Lat./81° 24' 35" W. Long. on the northern tip of Jekyll Island.
 - (j) St. Andrew Sound. The boundary is from the point located at 31° 0' 55" N. Lat./81° 25' 48" W. Long. on the southern tip of Jekyll Island to the point located at 30° 58' 38" N. Lat./81° 24' 49" W. Long. on the northern tip of Little Cumberland Is land.
 - (k) Cumberland Sound. The boundary is from the point located at 30° 42' 52" N. Lat./81° 27' 10" W. Long. on the southern tip of Cumberland Island to the point located at 30° 42' 21" N. Lat./81° 27' 15" W. Long. at the northern most point of Fort Clinch.
- (3) All ocean facing inlets and creeks on the eastern side of barrier islands such as, but not limited to Tybee and Little Tybee Creek, McQueen's Inlet on St. Catherine's Island, Cabretta Inlet/Blackbeard Creek on Sapelo Island, Beacon Creek on Wolf Island, Gould's Inlet on St. Simons Island, and Christmas Creek on Cumberland Island, shall be considered sounds for the purposes of delineating sound/beach boundaries.

Rule 391-2-4-.04. Saltwater Finfishing.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations based on sound principles of

wildlife research and management, establishing the seasons, methods of fishing, and disposition; size, possession, and creel limits; and gear and landing specifications for certain finfish.

(2) **Definitions.**

- (a) "Billfish" means Blue Marlin (*Makaira nigricans*), White Marlin (*Tetrapturus albidus*) and Sailfish (*Istiophorus albicans*).
- (b) "Daily creel limit" means the lawful amount of a species of finfish that a person may take in one day or possess at any one-time, except at one's place of abode or at a commercial storage facility provided the Board has not prohibited sale of that species.
- (c) "Hammerhead Sharks" means a group of sharks inclusive of great hammerhead (*Sphyrna mokarran*), scalloped hammerhead (*Sphyrna lewini*) and smooth hammerhead (*Sphyrna zygaena*).
- (d) "Handline" means a mainline to which no more than two hooks are attached and which is retrieved by hand without the aid of mechanical devices.
- (e) "Landed" means to bring fish to shore in this state, regardless of the jurisdiction from which they were taken or harvested.
- (f) "Minimum size" means the species' specific size in length, specified as fork length, lower jaw fork length or total length, below which size it is unlawful to possess that finfish species.
- (g) "Maximum size" means the species' specific size in length, specified as fork length, lower jaw fork length or total length, above which size it is unlawful to possess that finfish species.
- (h) "Open Season" means that specified period of time during which one may take from any of the waters of this state certain finfish species.
- (i) "Prohibited Sharks" means a group of sharks inclusive of sand tiger (*Carcharias taurus*), sandbar shark (*Carcharhinus plumbeus*), silky shark (*Carcharhinus falciformis*), bigeye sandtiger (*Odontaspis noronhai*), whale shark (*Rhincodon typus*), basking shark (*Cetorhinus maximus*), white shark (*Carcharodon carcharias*), dusky shark (*Carcharhinus obscurus*), bignose shark (*Carcharhinus altimus*), Galapagos shark (*Carcharhinus galapagensis*), night shark (*Carcharhinus signatus*), reef shark (*Carcharhinus perezii*), narrowtooth shark (*Carcharhinus brachyurus*), Caribbean sharpnose shark (*Rhizoprionodon porosus*), smalltail shark (*Carcharhinus porosus*), Atlantic angel shark (*Squatina dumeril*), longfin mako (*Isurus paucus*), bigeye thresher (*Alopias superciliosus*), sharpnose sevengill shark (*Heptanchias perlo*), bluntnose sixgill shark (*Hexanchus griseus*),

bigeye sixgill shark (*Hexanchus nakamurai*), and oceanic whitetip shark (*Carcharhinus longimanus*).

(j) "Sharks" means all species of sharks other than those comprising the small shark composite as defined in subparagraph 2(k), hammerhead sharks as defined in subparagraph 2(c), prohibited sharks as defined in subparagraph 2(i), and individual species regulated by this rule.

(k) "Small Shark Composite" means a group of sharks inclusive of Atlantic sharpnose shark (*Rhizoprionodon terraenovae*), bonnethead (*Sphyrna tiburo*), and spiny dogfish (*Squalus acanthias*).

(3) Seasons, Daily Creel and Possession Limits, Minimum and Maximum Size Limits.

The following species may be taken in accordance with the seasons, daily creel and possession limits, and minimum and maximum size limits set forth below, except as otherwise specifically provided herein:

SPECIES	SEASON	Daily Creel and Possession Limit	Minimum Size (inches)	Maximum Size (inches)
(a) Amberjack	All Year	1	28 FL	
(b) Atlantic croaker	All Year	25		
(c) Atlantic sturgeon	No Open Season has been established by the Board of Natural Resources.			
(d) Black drum	All Year	15	14 TL	
(e) Black sea bass	All Year	15	12 TL	
(f) Reserved				
(g) Bluefish	All Year	15	12 TL	
(h) Cobia	March 1 - October 31	1 per person not to exceed 6 per boat	36 FL	
(i) Dolphin	All Year	10 per person not to exceed 54 per boat.	20 FL	
1. Headboats with a valid certificate of inspection are allowed 10 dolphin per paying passenger.				
(j) Flounder (<i>Paralichthys spp.</i>)	All Year	15	12 TL	
(k) Gag grouper	All Year	2	24 TL	
(l) King mackerel	All Year	3	24 FL	
(m) Red Drum	All Year	5	14 TL	23TL
(n) Red Porgy	All Year	3	14 TL	
(o) Red Snapper	All Year	2	20 TL	

(p) Reserved				
(q) Prohibited Sharks	Unlawful to possess.			
(r) Sharks	All Year	1 per person or boat	54 FL	
(s) Sheepshead	All Year	15	10 TL	
(t) Small Shark Composite	All Year	1	30 FL	
(u) Spanish mackerel	All Year	15	12 FL	
1. A catch of Spanish mackerel under the minimum size limit is allowed equal to five percent by weight of the total catch of Spanish mackerel on board a trawler.				
(v) Spot	All Year	25		
(w) Spotted sea trout	All Year	15	14 TL	
(x) Tarpon	All Year	1	68 TL	
(y) Tripletail	All Year	2	18 TL	
(z) Weakfish	All Year	1	13 TL	
(aa) Reserved				
(bb) American eel	All Year	25	9 TL	
(cc) Hammerhead Sharks	All Year	1 per person or boat	78 FL	
(dd) Shortfin Mako Shark	All Year	1 per person or boat	83 FL	

- (4) **Restrictions on Sale.** It shall be unlawful for any person in this state to sell, purchase, or barter any of the following species or part thereof, except as otherwise specifically provided herein:
- (a) No person operating as a dealer may buy or sell sharks, small shark composite species, hammerhead sharks, and shortfin mako sharks caught in state waters without first obtaining a federal Commercial Shark Dealer Permit and when state or federal quotas for species within those groups have been reached.
 - (b) Tarpon.
 - (c) No person may sell any fish managed under federal law and harvested from either Georgia waters or the South Atlantic Exclusive Economic Zone except when the catch of such fish is allowed by applicable federal law. This prohibition of sale does not apply to fish harvested, landed, and sold in compliance with applicable

federal law and held in cold storage by a seafood dealer or processor. This prohibition also does not apply to a seafood dealer's purchase or sale of fish harvested from waters other than those of Georgia or the South Atlantic Exclusive Economic Zone, provided such fish is accompanied by documentation of legal harvest.

(d) Reserved

(e) Reserved

(5) Possession and Landing Specifications.

- (a) All fish subject to restrictions specified in this Rule may be possessed in state waters or landed only with head and fins intact, except that when landed for commercial purposes, all sharks, small shark composite species, hammerhead sharks, and shortfin mako sharks may have the heads removed but fins and tail must remain naturally attached.
- (b) It shall be unlawful to transfer at sea in State waters from a fishing vessel to any other vessel or person any fish caught which are subject to the restrictions specified in this Rule.
- (c) Except as otherwise provided by law, it shall be unlawful to fish for sharks, small shark composite species, hammerhead sharks, or shortfin mako sharks for recreational purposes with any gear other than rod and reel or handline as defined in subparagraph (2)(d) above. Additionally, anglers must use non-offset, corrodible, non-stainless-steel circle hooks when fishing for sharks recreationally, except when fishing with flies or artificial lures.
- (d) Except as otherwise provided by law, trawlers fishing for shrimp for human consumption pursuant to Code Section [27-4-133](#) shall be exempt from the creel and possession limits for spot and Atlantic croaker.
- (e) Except as otherwise specifically provided herein, in state waters the size, catch, creel and possession limits, fishing period closures, and requirements pertaining to the taking, release, landing, sale, purchase, trade, or barter of billfish shall be prescribed by federal regulations implemented under the Fishery Conservation and Management Act (PL 94-265) and the Consolidated Atlantic Highly Migratory Species Fishery Management Plan.

Rule 391-2-4-.05. Shrimp Trawl Gear Specifications. Requirement for Use of Turtle Excluder Devices.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations to regulate the times, methods, ways, means, and devices of taking wildlife which are necessary to protect threatened and endangered sea turtles in state waters.
- (2) Definitions.
 - (a) "Qualified turtle excluder device" or "TED" means a device approved by the National Marine Fisheries Service, and described in 50 C.F.R. Section 272.72(e)(4)(ii)(A)-(F), or any additional device approved by the National Marine Fisheries Service pursuant to 50 C.F.R. Section 272.72(e)(4)(iii).
 - (b) "Headrope length" means the straightline length of that portion of the top rope of the trawl net from which the net is hung measured between the outermost hanging points.
 - (c) "Perimeter" means the opening or entrance to the trawl formed and limited by attachment of the net mesh to line, which line is securely attached so as to form a continuous perimeter around the leading edge of the net. The perimeter so formed is measured from point to point along the line forming the leading edge of the net.
- (3) Vessels Required to Use Turtle Excluder Devices.
 - (a) All shrimp trawlers which trawl for shrimp consumption in Georgia's sound pursuant to O.C.G.A. [27-4-133](#) must have a qualified turtle excluder device in each net. In addition, all shrimp trawlers which trawl for shrimp for human

consumption pursuant to O.C.G.A. [27-4-133](#) in Georgia's offshore waters, seaward of the sounds and south of 31°20' North latitude, must have a qualified turtle excluder device installed in each trawl net during trawling operations during 1 April through 31 December of each year. Shrimp trawlers which trawl for shrimp for human consumption in Georgia's offshore waters, seaward of the sounds and north of 31°20' North latitude, must use a qualified TED in each net during the period 1 April through 30 November of each year.

(4) Exemptions.

- (a) Vessels using a single net having a headrope length of 30 feet or less and a perimeter around the leading edge of the net not greater than 82 feet are exempt from the TED requirement.
- (b) A single test net, commonly referred to as a trynet, having a headrope length of 20 feet or less is exempt from the TED requirement provided that such net is pulled immediately in front of another net and is not connected to another net in any way.
- (c) A trawl being used as part of a public or private experimentation authorized by the Director, Southeast Region, National Marine Fisheries Service, as provided in 50 C.G.R. Section 227.72(e)(4)(iv) and permitted according to O.C.G.A. Section [27-2-12](#) is exempt from the TED requirement provided written authorization shall be maintained aboard the shrimp trawler with such a trawl at all times.

[Rule 391-2-4-.06. Recreational Fishing for Shrimp.](#)

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations based on sound principles of wildlife research and management, establishing the recreational seasons, days, and places; methods of fishing and disposition; and size, creel, and possession limits for shrimp.
- (2) **Food Shrimp.** For the purpose of recreationally fishing for shrimp to be used for human consumption, any person who has a recreational fishing license may recreationally fish for food shrimp at such times and places as the commissioner has established.
 - (a) **Gear.** Except as otherwise provided by law or regulation, it shall be unlawful to recreationally fish for food shrimp in the salt waters of the State of Georgia by any means except the following:

1. Food shrimp cast net as defined in O.C.G.A. [27-1-2](#) (29.1); or a
 2. Beach seine of a length and mesh size authorized for use in salt waters by [391-2-4-.12](#).
- (b) **Quantity for Cast Nets.** No person or group of persons occupying the same boat recreationally fishing for shrimp by means of a food shrimp cast net may take more than 48 quarts of shrimp with heads or 30 quarts of shrimp tails in any day. No such person or group of persons occupying the same vessel may possess at any time more than 48 quarts of shrimp with heads or 30 quarts of shrimp tails.
- (c) **Quantity for Seines.** No one person recreationally fishing for shrimp solely by means of a seine, whether such person is acting alone or in a group of persons, may take more than 24 quarts of shrimp with heads or 15 quarts of shrimp tails in any day. No such person may possess at any time more than 24 quarts of shrimp with heads or 15 quarts of shrimp tails. If any person or group of persons are in possession of a food shrimp cast net and a seine, such person or group of persons shall be subject to the limits imposed upon taking shrimp by food shrimp cast net.
- (3) **Bait Shrimp.** For the purpose of recreationally fishing for shrimp to be used for live bait in this state, any person who has a recreational fishing license may recreationally fish for bait shrimp at such times and places as the commissioner has established.
- (a) **Gear.** Except as otherwise provided by law or regulation, it shall be unlawful to recreationally fish for bait shrimp in the salt waters of the State of Georgia by any means except the following:
1. Bait shrimp cast net as defined in O.C.G.A. [27-1-2](#) (5.1).
 2. Food shrimp cast net as defined in O.C.G.A. [27-1-2](#) (29.1);
 3. Beach seine of a length and mesh size authorized for use in salt waters by [391-2-4-.12](#); or a
 4. "Ten-foot net" as described in O.C.G.A. [27-1-2](#)-(71.1) and herein. A "ten-foot net" means a trawl net with the following characteristics:
 - i. A cork line not to exceed ten feet from tie-to-tie between the first and last mesh across the mouth of the net, a lead line not to exceed 13 feet from tie-to-tie between the first and last mesh across the mouth of the net, and leg lines of equal length. No webbing shall extend toward the door beyond the original brail lines which run vertically between the first tie at each end of the cork line and the first tie at each end of the lead line.

- ii. The leg lines of a ten foot net shall not exceed 4 feet from the fastener on the otter board (door) to the first mesh tie on the cork (head) line, and shall not exceed 4 feet 7 inches from the fastener on the otter board to the first mesh tie on the lead (foot) line. Total net width including leg lines and webbing shall not exceed 18 feet on the cork line and 22 feet 2 inches on the lead line.
 - iii. The vertical lines (brails) connecting the head line and the lead line shall not exceed 36 inches in length.
 - iv. The tow lines (bridles) connecting the tow vessel to the otter boards shall not exceed 75 feet from the fasteners on the otter board to the transom of the boat, including all connectors at the otter boards and the tow vessel; on tongue nets the third tow line and all connectors also shall not exceed 81 feet.
 - v. Otter boards shall not exceed 15 inches x 30 inches (height x length) in dimension.
 - vi. Head line floats on standard (tongueless) designs shall not exceed five in number, only one of which may exceed 3½ inches, but shall not exceed 6 inches in longest measurement. Nets of a tongue or bib design may have a maximum of two floats neither of which may exceed 6 inches in longest measurement.
 - vii. Webbing mesh size shall not be smaller than one inch when stretched nor exceed 1³/₈ inches when stretched measurement. Total mesh count in the circumference of the bag where it attaches to the body of the net, and also rearward throughout the construction of the bag shall not exceed 50.
 - viii. Total net length including the body of the net, the bag, and the cod-end shall not exceed 19 feet 6 inches.
- (b) Time. It shall be unlawful to fish for bait shrimp with a "ten-foot net" at night.
- (c) Quantity for "Ten-foot net". No person fishing for shrimp with a "ten-foot net" shall possess more than two quarts of bait shrimp at any time, no more than one-half pint of which may be dead; but any such person may take a maximum of four quarts of bait shrimp during any 24 hour period. When two or more persons fishing for shrimp under this subsection occupy the same boat; there may be no more than four quarts of bait shrimp on board the boat at any time, no more than one pint of which may be dead; but the persons occupying the boat may take a maximum of eight quarts of bait shrimp during any 24 hour period. Possessing or

taking more than the limits prescribed in this subparagraph shall be unlawful. Possessing more than these limits shall be prima-facie evidence that the shrimp were taken for some purpose other than to be used as live bait.

- (d) Quantity for bait shrimp cast net or seine. When food shrimp season is closed, any person fishing for shrimp with a cast net or seine shall possess no more than two quarts of bait shrimp at any time, all of which may be dead; and provided, further, that any such person may take a maximum of four quarts of bait shrimp during any day. When two or more persons taking shrimp under this subparagraph occupy the same boat, there may be no more than four quarts of bait shrimp on board the boat at any time, all of which may be dead; and the persons occupying the boat may together take a maximum of eight quarts of bait shrimp during any day.
- (e) It shall be unlawful for any person to sell or otherwise dispose of, for human consumption, any shrimp caught pursuant to this paragraph or to possess such shrimp for the purpose of sale or other distribution for human consumption or personally to consume such shrimp. Possession of shrimp with heads off shall be prima-facie evidence that the shrimp are to be sold for human consumption or are personally to be consumed.

Rule 391-2-4-.07. Crabbing.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations to regulate the times, places, numbers, species, sizes, manner, methods, ways, means, and devices of taking, capturing, transporting, storing, selling, and using wildlife so as to conserve marine crabs, primarily of the species *Callinectes sapidus*.
- (2) **Definitions.**
 - (a) "Escape ring" means a rigid, circular port forming the boundary of an opening placed flush with an outside surface of the wire mesh or other material in the wall of the crab trap so as to create an unobstructed opening through the wall of the trap.
 - (b) (i) "Commercial crab trap" means a trap as specified in O.C.G.A. [27-1-2\(14\)](#) and [27-4-151\(i\)](#), deployed for the purpose of taking crabs as defined in

O.C.G.A. [27-1-2\(21\)](#) whether such crabs are taken for the purpose of sale or not.

- (ii) Additionally, a crab trap shall have installed at least two escape rings with unobstructed openings of minimum inside diameter of 2 3/8 inches. Such escape rings shall be positioned in the crab trap on any of the four vertical, outside walls. For purposes of meeting this definition, escape rings shall not be placed on a horizontal outside wall, which forms the ceiling, or top of the trap, or the bottom of the trap.
 - (iii) In addition to the specifications detailed in subsection (i) of O.C.G.A. [27-4-151](#), effective April 1, 2005 the float attached to any commercial crab trap fished without a commercial fishing license or a commercial crabbing license pursuant to that subsection of the Code shall be colored fluorescent green or lime green. No commercial crab trap fished for the purpose of sale shall be marked with a fluorescent green or lime green float.
- (c) In addition to the specifications detailed in O.C.G.A. [27-1-2\(14\)](#), a "commercial peeler crab trap" deployed for the purpose of taking "peeler crabs" as defined in O.C.G.A. [27-1-2\(47\)](#), whether such peeler crabs are taken for the purpose of sale or not, shall be constructed with a minimum mesh size of one inch, shall have a minimum dimension of 24 inches, by 24 inches, by 24 inches and shall be exempt from the escape ring requirement specified in subparagraph 391-2-4-.07(2)(b), provided that such a trap is baited only with legal-sized live male blue crabs. Other baits including fish or other organisms which attract crabs into such traps, shall be prohibited and shall be prima-facie evidence of a violation of this paragraph.

(3) Gear for taking Crabs.

- (a) Any person who deploys a crab trap in the waters of the State as provided for in O.C.G.A. [27-4-151](#) may only use a crab trap as defined in O.C.G.A. [27-1-2\(14\)](#) and [27-4-151](#), and in paragraphs (2)(b) and (c) above.

Repealed: New Rule entitled "Crabbing" adopted. F. Dec. 20, 2004; eff. Apr. 1, 2005, as specified by the Agency.

Rule 391-2-4-.08. Bycatch Reduction Specifications. Requirement for use of Bycatch Reduction Devices.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations to regulate the times, methods, ways, means, and devices of taking wildlife which are necessary to conserve living marine resources.
- (2) **Definitions used in this rule.**
 - (a) "Centerline" means the seam that runs along the top center of the trawl net. In the absence of a seam, the centerline runs from the center point of the length of the head rope to the furthest distance on top of the cod end of the trawl.
 - (b) "Certified bycatch reduction device" or "BRD" means a device specified in subsection 3(a)(i, ii, and iii) or a device certified by the National Marine Fisheries Service.
 - (c) "Cod end" means the end of a trawl net which acts as the receptacle for fish and other organisms caught in the net. It is closed and secured, at the extreme end, with a line.
 - (d) "Functional tailbag length" means that portion of the cod end forward of the tail rope tie off rings toward the mouth of the trawl net.
 - (e) "Headrope" means a rope that is attached to the upper lip (top edge) of the mouth of a trawl net along the forwardmost edge.
 - (f) "Headrope length" means the straight line length of that portion of the top rope of a trawl net from which the net is hung measured between the outermost hanging points.
 - (g) "Try net" means a net pulled for brief periods of time just before, or during, deployment of the primary net(s) in order to test for shrimp concentrations or determine fishing conditions (e.g. presence or absence of bottom debris, jellyfish, bycatch, seagrass, etc.).
- (3) **Vessels Required to use Bycatch Reduction Devices.**
 - (a) Effective June 1, 1996 all shrimp trawlers which trawl for shrimp for human consumption in Georgia saltwaters as permitted by O.C.G.A. [27-4-133](#) must have a certified bycatch reduction device (BRD) installed in each net, other than an exempt shrimp trawl or try net, at all times of the year. Effective July 1, 1997, all shrimp trawlers must have a certified BRD installed in trawl nets and trynets with a headrope length of greater than sixteen feet. A BRD shall be deemed to be certified if it is one of the types specified herein or is certified by the National Marine Fisheries Service.
 1. Fish Eye BRD - This device shall consist of at least one rigid exit opening frame sewn into each trawl net. This frame is to be constructed of no more

than four bars creating an apex to orient the exit opening. Each frame shall have an exit opening in the shape of an oval and a minimum of nine inches in length and a minimum of four and one half inches across the opening in the shortest dimension, creating an unobstructed opening with a surface area equal to or greater than twenty square inches facing the direction of the mouth of the trawl net. Each frame shall be installed in the cod end of the trawl net no further forward than seventy two percent of the functional tailbag length from the tail rope tie off rings. The frame shall be installed along the centerline on the top side of the cod end of the trawl net.

2. Eight-Inch Expanded Mesh/Extended Funnel BRD - This device consists of a funnel of small mesh netting within a cylinder of large mesh netting, held open by at least one semi-rigid hoop, and is installed in the trawl net behind a certified Turtle Excluder Device as defined in Rule [391-2-4-.05](#). One side of the funnel is extended vertically to provide passage for shrimp to the cod end and to create an area of reduced water flow to allow for fish escapement through the larger mesh outer netting. This BRD shall meet the following specifications:
 - (i) The small mesh funnel and large mesh section shall be positioned within extension sections constructed of no smaller than one and five eighths inch stretched-mesh nylon netting, no less than one hundred twenty meshes in circumference. The extension section in front of the large mesh section shall be no less than six and one half meshes long, and the extension section behind the large mesh section shall be no shorter than twenty three meshes in length.
 - (ii) The small mesh funnel shall be constructed of no less than one and one half inch stretched-mesh netting. This component shall have a circumference of no less than one hundred twenty meshes at the leading edge and no more than one hundred four meshes at the trailing edge. The short side of the funnel shall be at least thirty-six inches long, while approximately half of the opposite side of the funnel shall extend at least twenty-two inches further toward the trailing edge of the funnel. The leading edge of the funnel shall be attached no less than three meshes forward of the leading edge of the large mesh. At least seven meshes of the short side of the funnel shall be attached to the back section of extension webbing on the top and bottom at least eight meshes back from the trailing edge of the large mesh section.
 - (iii) The larger mesh outer section shall consist of no smaller than eight-inch stretched-mesh netting and shall be hung on the square. This

section shall have a circumference no smaller than nineteen meshes and a length of at least four meshes.

- (iv) The leading edge of the large mesh section shall be attached to the trailing edge of the front extension section. One semi-rigid hoop constructed of plastic-coated trawl cable with a minimum diameter of thirty inches shall be installed at least five meshes behind the trailing edge of the large mesh section. If a second hoop is used, it shall be installed in the front extension section at least three meshes ahead of the large mesh section.
3. Ten-Inch Expanded Mesh/Extended Funnel BRD - This device consists of a funnel of small mesh netting within a cylinder of large mesh netting, held open by at least one semi-rigid hoop, and is installed in the trawl net behind a certified Turtle Excluder Device as defined in Rule [391-2-4.05](#). One side of the funnel is extended vertically to provide passage for shrimp to the cod end and to create an area of reduced water flow to allow for fish escapement through the larger mesh outer netting. This BRD shall meet the following specifications:
- (i) The small mesh funnel and large mesh section shall be positioned within extension sections constructed of no smaller than one and three eighths inch stretched-mesh nylon netting, no less than one hundred twenty meshes in circumference. The extension section in front of the large mesh section shall be no less than three meshes long, and the extension section behind the large mesh section shall be no shorter than eighteen and one half meshes in length.
 - (ii) The small mesh funnel shall be constructed of no less than one and one half inch stretched-mesh netting. This component shall have a circumference of no less than eighty meshes at the leading edge and no less than eighty meshes at the trailing edge. The short side of the funnel shall be at least twenty-seven inches long, while approximately half of the opposite side of the funnel shall extend at least fifteen inches further toward the trailing edge of the funnel. The leading edge of the funnel shall be attached no less than one half mesh forward of the leading edge of the large mesh. The short side of the funnel shall be attached to the back section of extension webbing on the top and bottom at least two meshes back from the trailing edge of the large mesh section.
 - (iii) The larger mesh outer section shall consist of no smaller than ten inch stretched-mesh netting and shall be hung on the square. This

section shall have a circumference no smaller than nineteen meshes and a length of at least three meshes.

- (iv) The leading edge of the large mesh section shall be attached to the trailing edge of the front extension section. One semi-rigid hoop constructed of plastic-coated trawl cable with a minimum diameter of thirty inches shall be installed at least one and a half meshes behind the trailing edge of the large mesh section. If a second hoop is used, it shall be installed in the front extension section at least three meshes ahead of the large mesh section.

- 4. Diamond Fish Eye BRD - This device shall consist of at least one rigid exit opening frame sewn into each trawl net. This frame is to be constructed of no more than four bars creating an apex to orient the exit opening. Each frame shall have an exit opening in the shape of a diamond and a minimum of six and one half inches in length and a minimum of five and one half inches across the opening in the shortest dimension, creating an unobstructed opening with a surface area equal to or greater than nineteen square inches facing the direction of the mouth of the trawl net no further forward than seventy two percent of the functional tailbag length from the tail rope tie off rings. The center of the exit opening of the frame shall be installed no more than nineteen meshes offset from either side of the centerline on the top side of the cod end of the trawl net.

- (b) Bycatch reduction devices are required in try nets having a headrope length of greater than sixteen feet used for purposes of food shrimping pursuant to O.C.G.A. [27-4-133](#).
- (c) A BRD shall be used in conjunction with a certified Turtle Excluder Device when such a device is required pursuant to 50 C.F.R. Section 227.72(e)(4) (i, ii, and iii) and Section 227.72(e)(2)(ii)(A)(1).

(4) Exemptions.

- (a) A trawl net being used as part of a public or private experimentation authorized by the Department of Natural Resources, as provided in O.C.G.A. [27-2-12](#), is exempt from the BRD requirement provided written authorization shall be maintained aboard the shrimp trawler with such a trawl at all times.
- (b) Reserved.
- (c) Reserved.

History. Original Rule entitled "Bycatch Reduction Specifications. Requirement for Use of Bycatch Reduction Devices" adopted. F. Jan. 25, 1996, eff. Feb. 14, 1996.

Amended: F. Jun. 2, 1997; eff. Jun. 22, 1997.

Amended: F. Dec. 3, 1997; eff. Dec. 23, 1997.

Rule 391-2-4-.09. Commercial Fishing. Requirements for Keeping and Reporting Records.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations to set standards, methods and times for submitting commercial fishing records.
- (2) **Definitions used in this Rule.**
 - (a) "Atlantic Coastal Cooperative Statistics Program" means a cooperative state, regional and federal agency initiative designed to coordinate, improve and standardize commercial and recreational seafood harvest data collection and management for the Atlantic coast.
 - (b) "Commercial crab harvester" means anyone who is licensed or authorized by the state to fish for crabs for commercial purposes pursuant to O.C.G.A. [27-4-150](#).
 - (c) "Commercial fishing records" means the information on the form approved by, or provided by, the Department to seafood dealers and commercial seafood harvesters who are required to report the purchase, landing or harvest of seafood pursuant to this rule.
 - (d) "Commercial seafood harvester" means anyone who sells or barter any portion of the catch from any fishing trip.
 - (e) "Commercial shrimp castnet harvester" means anyone who is licensed by the state to fish for shrimp with castnet gear for commercial purposes pursuant to O.C.G.A. [27-4-205](#).
 - (f) "Department" means the Department of Natural Resources, Coastal Resources Division.
 - (g) "Fishing trip" means the time during which a person is actively engaged in fishing, or in water-based activities in support of fishing, regardless of platform.
 - (h) "Marine fishery product" means seafood as defined in O.C.G.A. [27-1-2\(63\)](#).
 - (i) "Seafood dealer" means any person or entity other than the final consumer who purchases, ships, consigns, transfers, barter, accepts, maintains, or packs any

marine fishery products received from commercial seafood harvesters or marine aquaculturists for the first time and is licensed as such pursuant to O.C.G.A. [27-4-136](#). Where any commercial crab, seafood, or shrimp castnet harvester or marine aquaculturist sells, consigns, transfers, or barter marine fishery products to anyone other than a Georgia seafood dealer licensed pursuant to O.C.G.A. [27-4-136](#), such commercial crab, seafood, or shrimp castnet harvester or marine aquaculturist is himself acting as a seafood dealer and is subject to all requirements associated therewith including but not limited to the reporting requirements of this Rule and the licensing provisions of O.C.G.A. [27-4-136](#).

- (j) "Landed" means to bring fish to shore in this state, regardless of the jurisdiction from which they were taken or harvested.

(3) Persons required to report commercial fishing records.

- (a) All seafood dealers, are required to report fishing trip level records on a monthly basis directly to the Department as specified below.
- (b) All commercial crab, seafood, and shrimp castnet harvesters shall submit fishing trip level records to the seafood dealer at the time of transaction as specified below. Such fishing trip level records must be recorded at the time of the transaction on forms approved by the Department.

- (4) **Methods.** Monthly commercial fishing records are to be submitted on a form supplied by the Department or on an alternate form approved by the Department. All requests for approval of an alternate form must be submitted to the Department in writing with a copy of the proposed alternate form attached or included with the request. The alternate form must provide identical information and follow the same format as the Department form. Upon receipt of a request for approval of an alternate form, the Department will review the form for the required information within 5 days of the receipt of the request. All persons that use an approved alternate form shall be responsible for all costs associated with the printing and use of such forms. Forms approved by participating Atlantic Coastal Cooperative Statistics Program will be accepted by the Department.

- (5) **Times.** Seafood dealers are required to submit written monthly commercial fishing records to the Department by the tenth day of the subsequent month. These records may be hand delivered or submitted via mail, or electronically. Permission to submit records electronically must be obtained from the Department. All other commercial seafood harvesters are required to submit fishing trip level records directly to the seafood dealer at the time of transaction.

(6) Commercial Fishing Record Content.

- (a) **Seafood Dealer.** At the time of the transaction the seafood dealer is required to record the information referenced below. All information must be complete and

accurate. Reporting records of subsequent sales between dealers is not required. The information contained in the record shall include the following:

1. Trip date - date the fishing trip started.
2. Vessel ID - Coast guard documentation or state registration number.
3. Individual ID - Personal commercial fishing license number
4. Trip number - used only if there is more than one fishing trip per day
5. Species - each species landed, sold, or discarded
6. Quantity - the amount of each species landed, sold or discarded
7. Units of measurement - landed units (pounds, each, bushels, etc)
8. Disposition - food, bait, pet food, personal use
9. Ex-vessel value or price - dollar value or price per unit of species sold
10. County or port landed - location where product was unloaded (dock, boat ramp)
11. State landed - state where product was landed
12. Dealer ID - dealer identification number
13. Unloading date - the date of landing at the dealer
14. Market - market category that effects the price (count size etc)
15. Grade - landing condition that affects price (fillet, gutted)
16. Gear - type of gear used to catch landed species
17. Quantity of gear - number of pots, etc.
18. Days at sea - days from the start of the fishing trip to dock in days and hours
19. Number of crew - number including captain
20. Fishing time - total amount of time gear was in the water
21. Area fished - specific area within water body where fishing occurred
22. Number of sets - total number of sets or tows per trip

- (b) Commercial Crab, Seafood, or Shrimp Castnet Harvesters. Commercial fishing records for each fishing trip made by commercial crab, seafood, or shrimp castnet harvesters must be submitted to the seafood dealer to whom the product was sold at the time of the transaction. Commercial fishing records submitted to the seafood dealer by commercial crab, seafood, or shrimp castnet harvesters must contain all of the information specified in subparagraphs (6)(a)(1) through (6)(a)(22) above. All information must be complete and accurate.
- (7) **Penalties.** Pursuant to O.C.G.A. Sections [27-1-36](#) and [27-2-25](#), failure to comply with the provisions of this rule may result in a civil penalty imposed by the commissioner of up to \$1000.00 and/or a suspension of or refusal to renew the person's commercial fishing license for up to two years.
- (8) **Commercial Crab Harvester License Renewal.** Any commercial crab harvester who has not submitted all harvest records for the previous year, as required by this rule, shall be ineligible for license renewal until such time as the required records have been submitted and all penalties paid.

Rule 391-2-4-.10. License Lotteries.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations to conduct lotteries for the purpose of issuing commercial fishing licenses.
- (2) **Definitions used in this rule.**
 - (a) "Department" means the Department of Natural Resources, One Conservation Way, Brunswick, Georgia.
- (3) **Lottery Application.** Individuals interested in obtaining lottery commercial crab licenses or lottery commercial food shrimp cast netting licenses to be issued through a lottery pursuant to O.C.G.A. [27-4-150\(e\)\(4\)](#) and O.C.G.A. [27-4-206\(c\)](#) must make application in person to the Department by the times specified in subparagraph 391-2-4-.10(4) of this Rule. Applications must be submitted on forms provided by the Department. No more than one application per individual may be submitted. Individuals submitting more than one application, or false information, will be disqualified. Incomplete, incorrect or duplicate applications will be rejected. Individuals submitting an application which is disqualified or rejected will be notified of the reason for rejection or disqualification.

- (4) **Lottery Application Deadline.** For the 1998/99 license year only applications for lottery commercial food shrimp cast netting licenses must be submitted by the close of business (4:00 p.m.) on October 15, 1998. Beginning on April 1, 1999, applications for lottery commercial crab licenses or lottery commercial food shrimp cast netting licenses to be selected by lottery may be submitted no earlier than April 1 of each license year and must be submitted by the close of business (4:00 p.m.) on June 1 of each license year.
- (5) **Random Drawing.** Applicants will be selected through a random computer drawing. All applicants will be listed in numerical order as selected following the drawing.
- (6) **Notice of Selection.** Applicants chosen to receive a license will be notified of their selection via certified mail. These applicants must purchase the license by July 1 of that year. The notice of selection must be presented to the Department at the time of purchase. The notice of selection is not transferable.
- (7) **Sales of Un-issued Commercial Food Shrimp Cast Netting Licenses.** After August 1 of each year, the Department may offer for sale available commercial food shrimp cast netting licenses on a first-come, first-served basis at the Coastal Regional Headquarters in Brunswick.

Amended: F. Dec. 14, 2017; eff. Jan. 3, 2018.

Rule 391-2-4-.11. Bait Minnow Trapping.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations to regulate the times, places, numbers, species, sizes, manner, methods, ways, means, and devices of taking, capturing, transporting, storing, selling, and using wildlife to conserve bait minnows.
- (2) **Definitions.**
 - (a) "Bait Minnow" means any member of the family Fundulidae, including but not limited to mummichog killifishes, commonly known as mud minnows, but not including domestic fish.
 - (b) "Bait Minnow Trap" means a rectangular or cylindrical cage or structure which is constructed of hardware cloth, wire, plastic or similar material used for catching minnows to be used as bait. Maximum dimensions shall not exceed 24 inches in length, 18 inches in width, or 9 inches in height for rectangular traps, or 24" in length and 30" in circumference for cylindrical traps. A bait minnow trap used commercially shall be constructed of materials with a mesh size no smaller than

1/2" bar mesh; except, however, the funnel or muzzle to the trap shall be constructed of materials of mesh no smaller than 1/4" bar mesh. A bait minnow trap used recreationally shall be constructed of materials with a mesh size no smaller than 1/4" bar mesh. The round throat (opening) of the funnel or muzzle to a bait minnow trap shall not exceed 1 inch in diameter. Each trap must have attached thereto a tag bearing the name and address of the owner of the trap or must have tethered to each trap a float bearing the name and address of the person using such gear. If the trap is used for commercial purposes, the tag or float must also include the commercial bait dealer license number of the person using such gear or the license number of the bait dealer employing the person using the gear.

(c) "Department" means the Department of Natural Resources, Coastal Resources Division.

(3) Commercial and Recreational Bait Minnow Trapping.

(a) It is lawful to commercially harvest bait minnows of the family Fundulidae using bait minnow traps as defined in paragraph (2)(b) above, in the saltwaters of this state, provided such individual has a valid commercial fishing license pursuant to O.C.G.A. Sections [27-2-23](#) and [27-4-110](#), and a valid bait dealer license pursuant to O.C.G.A. Section [27-4-171](#), and provided that such individual meets the requirements for live bait shrimp facilities as specified in O.C.G.A. Section [27-4-171](#). An individual who is an employee of a licensed bait dealer and who possesses a valid personal commercial fishing license pursuant to O.C.G.A. Sections [27-2-23](#) and [27-4-110](#) and bait minnow endorsement pursuant to Rule [391-2-4-.17](#) may work the bait minnow traps of his or her employer.

1. No holder of a bait dealer license commercially harvesting bait minnows may employ more than 10 traps at any given time.
2. The sale of commercially harvested bait minnows by a properly licensed bait dealer for resale purposes is allowed only to persons possessing a valid wholesale fish dealer license pursuant to O.C.G.A. Sections [27-2-23](#) and [27-4-76](#).
3. A licensed bait dealer must maintain at all times a daily record book showing the amount of bait minnows harvested and sold daily. Written reports of such transactions shall be submitted to the Department no later than the fifth day of the subsequent month in a format prescribed by the Department.
4. No licensed bait dealer or licensed wholesale fish dealer may possess more than 100 quarts of bait minnows at any time.

(b) It is lawful to recreationally harvest bait minnows of the family Fundulidae using bait minnow traps as defined in paragraph (2)(b) above, in the saltwaters of this

state, provided such individual complies with the recreational fishing license requirements as specified in O.C.G.A. Sections [27-1-2](#) and [27-2-23](#).

1. No individual recreationally harvesting bait minnows may employ more than 2 traps at any time, except that a salt water fishing guide licensed pursuant to O.C.G.A. Code Section [27-2-23.2](#) may employ a maximum number of 4 traps at any time, provided that the bait minnows are not sold.
2. No individual recreationally harvesting bait minnows may possess more than 2 quarts of bait minnows at any given time, except that a salt water fishing guide licensed pursuant to O.C.G.A. Code Section [27-2-23.2](#) may possess no more than 10 quarts of bait minnows at any time, provided that the bait minnows are not sold.

Rule 391-2-4-.12. Lawful Fishing Methods and Gear, Generally.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations based on sound principles of wildlife research and management, establishing the commercial and recreational methods and gear for fishing.
- (2) **Methods Generally.** The following methods shall be lawful in saltwater except as specifically prohibited herein;
 - (a) It shall be unlawful to use a gig to take any fish, crustaceans, or mollusks in salt water, except that a gig may be used to take flounder in salt water.
 - (b) It shall be unlawful to use any seine in salt water, except that:
 1. The use of a seine 12 feet in length or less, with a maximum depth of four feet and a maximum mesh size of one-inch stretched mesh in saltwater, is not prohibited;
 2. The use of a seine less than 100 feet in length having a minimum net size of 1¼ inch stretched mesh on any sand beaches on any barrier island of this state is not prohibited. The use of such seines in any inlets or tidal sloughs is prohibited;

3. The use of seines greater than 100 feet and up to 300 feet in length having a minimum net size of 2½ inches stretched mesh on the ocean-front side of beaches is not prohibited, provided that such seines may not be used in any inlets or tidal sloughs;
 4. Seines over 300 feet in length are prohibited.
 5. It shall be unlawful to use any seine in salt water in such a manner that it will block more than one-half of the entrance of a tidal river, creek, slough, or inlet to the ocean.
 6. It shall be unlawful to use a beach seine as a gill net. A gill net is defined as a single net or webbing attached to float and lead lines and fished in a stationary manner to ensnare or entangle the fish in the meshes.
- (c) It shall be unlawful to place, deposit, distribute, or scatter any bait of any kind in, on, or over any waters of this state so as to lure, attract, or entice shrimp toward such bait or to cause shrimp to congregate in the area where such bait is placed. It shall also be unlawful to fish for shrimp by any method, including the use of a cast net, in or near any waters which are baited.
- (d) It shall be unlawful to fish for shrimp for commercial purposes at night.
- (3) **Gear for Commercial Fishing.** Except as otherwise specifically authorized by law or regulation, it shall be unlawful for any person engaged in commercial saltwater fishing in this state to use any gear other than the following gear, which may only be used for the purposes and in the manner set forth below:
- (a) Power-drawn nets or trawls used to fish for seafood from any of the salt waters of this state in accordance with O.C.G.A. Title 27, chapter 4, Article 4;
 - (b) Commercial crab traps used in accordance with O.C.G.A. Title 27, chapter 4, Article 4;
 - (c) Seines used in salt waters to fish for fish or crustaceans and purse seines used in salt waters to fish for fish or crustaceans, which seines or purse seines are used in accordance herein and with O.C.G.A. Title 27, chapter 4, Articles 3, and 4;
 1. It shall be unlawful for any person other than a licensed commercial saltwater fisherman to use a purse seine. It shall also be unlawful to use a purse seine in any of the salt waters of this state; provided, however, it shall be lawful to use a purse seine in the waters outside, on the seaward side, of the sounds, when such outside waters are opened in accordance with O.C.G.A. Title 27, chapter 4, Article 4. As used in this Code section, "purse seine" means a large seine, supported at the upper edge by floats and

weighted at the bottom edge, which is designed to be set by one or more boats around a school of fish and so arranged that after the sides have been brought together the bottom of the net can be closed by drawing the purse line taut.

- (d) Wire baskets, trotlines, or hoop nets used to fish for catfish in salt water in accordance with [391-2-4.13](#);
 - (e) Traps and pots used to fish for adult eels in accordance with [391-2-4-.01](#);
 - (f) Set nets and drift nets used to fish for shad in accordance with [391-2-4-.02](#);
 - (g) Gigs used to fish for flounder in saltwater;
 - (h) Cast nets;
 - (i) Seines used to fish for seafood along public beaches in accordance with this section;
 - (j) Tongs and dredges used to fish for oysters in accordance with O.C.G.A. Title 27, chapter 4, Article 4;
- (13) Clam rakes, other hand-held implements, and dredges used to fish for clams in accordance with O.C.G.A. Title 27, chapter 4, Article 4; and
- (14) Pole and line used to fish for finfish.

Rule 391-2-4-.13. Commercial Fishing for Catfish in Saltwater.

- (1) **Purpose.** The purpose of this Rule is to implement the authority of the Board of Natural Resources to promulgate rules and regulations based on sound principles of wildlife research and management, establishing the commercial seasons, days, and places; methods of fishing and disposition; and size, creel, and possession limits; gear and landing specifications for catfish in saltwater.
- (2) **Areas Open to Commercial Fishing for Catfish in Saltwater.** Except as otherwise provided herein, all salt waters of this state shall be open to the taking of catfish for commercial purposes.

- (a) It shall be unlawful to commercially fish for catfish in the North Altamaha River, except on the ocean side (downstream) of the mouth of, but not including, Lewis Creek. Such fishing shall also be unlawful in the South Altamaha River, except on the oceanside (downstream) of the uppermost entrance of Hammersmith Creek.
- (3) **Commercial Gear for Taking Catfish in Saltwater.** It shall be unlawful for any person to commercially fish for catfish in the salt waters of this state with any gear except the following:
- (a) Trotlines;
 - (b) Wire baskets meeting the requirements of Code Section [27-4-92](#) and having a non-green colored float attached bearing the corresponding commercial fishing license number in one inch letters of contrasting color; and
 - (c) Hoop nets of one inch on the square (two-inches stretch) or larger which do not exceed three and one-half feet in diameter or ten feet in length.
- (4) **Minimum Sizes.** It shall be unlawful for any person to commercially fishing for catfish in the salt waters of this state to take and retain any catfish less than nine inches in total length. Any catfish taken and retained by such person shall be deemed to be less than nine inches if it is less than seven inches with head removed or less than six inches with head and tail removed.

Rule 391-2-4-.14. Shrimp Bait Dealers.

- (1) **Purpose.** The purpose of this Rule is to implement the authority of the Board of Natural Resources to promulgate rules and regulations based on sound principles of wildlife research and management, establishing the seasons, days, and places; methods of fishing, and disposition; and size, creel, and possession limits; gear and landing specifications for commercial harvest of bait shrimp.
- (2) **General.** It shall be unlawful for any person commercially fishing for shrimp for live bait pursuant to this section to:
 - (a) Use any power-drawn net which is larger than a 20 foot net or constructed of mesh smaller than one inch or greater than one and three-eighths inches when stretched;

- (b) Fish for shrimp pursuant to this Code section at night; or
 - (c) Have on board the boat used for fishing for shrimp pursuant to this Rule more than 50 quarts of shrimp at any one time, no more than 10 percent of which may be dead;
- (3) **Facilities.** All applicants for bait dealer licenses and all licensed bait dealers shall have and maintain facilities meeting the following requirements:
- (a) Live bait shrimp facilities must be located within the salt waters of the state, as defined by the salt-water demarcation line described in Code Section [27-4-1](#), and such facilities must consist of either floating bait containers or tanks with circulating or recirculating systems to provide an exchange of salt waters. Floating bait containers must be permanently affixed to docks or other permanent structures which are attached to high ground above the high water mark and must be constructed with adequate openings to provide for a steady exchange of salt water. Tanks with circulating saltwater systems must include adequate spray outlets to provide aeration as well as sufficient water inlets to create a circulating flow within the bait tank;
 - (b) All live shrimp-holding facilities must be constructed of nontoxic materials or materials which have been properly treated with an approved nontoxic substance. The facilities must be maintained in a condition conducive to keeping shrimp alive, which requires regular cleaning and the removal of dead shrimp;
 - (c) Any live bait shrimp dealership which is not within one-half mile of public saltwater angling access shall be required to maintain public access to customers through such services as public launching facilities, public fishing docks or platforms, or other forms of saltwater access during all tidal stages, including without limitation vehicular access and public parking; provided, however, that any live bait dealership which derives at least \$5,000.00 of earned income from the sale of recreational fishing supplies and accessories associated with saltwater angling shall be exempt from the provisions of this paragraph. Any dealer claiming such exemption shall provide such records as the department deems necessary to evidence such sales;
 - (d) No organisms other than shrimp may be held in live shrimp bait tanks; and
 - (e) Freezer storage sufficient to freeze and to keep frozen any shrimp which die while in possession of the dealer and which are to be sold as dead bait must be maintained on the premises of the established bait dealership.
- (4) **Condition of Bait Shrimp.** Except as otherwise provided for by law or regulation, it shall be unlawful for any licensed bait dealer to allow shrimp to be removed from the premises of his or her established bait dealership unless it is sold as:

- (a) Live bait in a container of such size as to ensure that all live shrimp therein are covered by a minimum of one inch of salt water; or
 - (b) Dead bait which has been packaged with heads on and frozen. The packages shall contain not more than one quart of dead shrimp and must be clearly marked with letters at least one-half inch in height to read as follows: "SOLD FOR BAIT ONLY." Dead bait purchased for resale must be purchased from a licensed bait dealer and must be packaged and labeled as described.
- (5) It shall be unlawful for any licensed bait dealer to fail to keep all shrimp in saltwater tanks meeting the standards prescribed in subparagraph (3) of this Rule unless and until such shrimp die, in which case the shrimp shall be promptly frozen and packaged as dead bait. It shall also be unlawful for any licensed bait dealer intentionally to cause or allow live shrimp to die.
- (6) It shall be unlawful for any person to use, for other commercial fishing purposes, any equipment which has been used for obtaining live bait pursuant to this Code section.
- (7) It shall be unlawful for any licensed bait dealer or any of his or her employees to have or permit in or on a commercial bait fishing boat owned by the dealer or such employees and used for bait shrimping pursuant to this Rule or to have or permit in or on the premises of the established bait dealership any shrimp caught, sold, to be sold, or to be disposed of for human consumption.
- (8) It shall be unlawful for a licensed bait dealer to fail to maintain at all times a daily record book showing, for each transaction, the amount of bait shrimp purchased, the person from whom it was purchased, and the date of such purchase, as well as the amount of live shrimp and the amount of dead shrimp sold daily. Any such report shall include, without limitation, any transaction between licensed bait dealers and shall provide the name of the dealership acting as the seller in the transaction. Written reports of such transactions for each month shall be submitted to the department no later than the fifth day of the subsequent month in a format prescribed by the department.
- (9) It shall be unlawful for any licensed bait dealer or an employee of such person to sell or otherwise distribute to any one person, within a 24 hour period, more than eight quarts of shrimp. It shall also be unlawful for any person to buy, within a 24 hour period, more than eight quarts of shrimp.
- (10) It shall be unlawful to sell, unload, or otherwise dispose of shrimp taken for bait at any place other than the licensed bait dealership for which the bait was taken. This subparagraph shall not prohibit the transfer from the boat taking such shrimp to an approved vehicle with aeration equipment to keep shrimp alive which will unload shrimp so taken at a licensed bait dealership so long as the amount of bait being transferred does not exceed 50 quarts.

- (11) It shall be unlawful for any licensed bait dealer to have, at his or her established bait dealership at one time, more than 200 quarts of live shrimp. It shall also be unlawful for more than 10 percent of the shrimp at the dealership or 20 quarts, whichever amount is less, to be dead shrimp unless the dead shrimp in excess of such percentage are promptly frozen and packaged as dead bait as required by subparagraph (4)(b) of this Rule.
- (12) It shall be unlawful for more than one boat to be in use for fishing for shrimp at any one time for an established bait dealer.
- (13) It shall be unlawful for any licensed bait dealer to fail to publicly advertise his or her facility. For the purpose of advertising, each established bait shrimp dealer shall display prominently on the road or drive leading to the facility and on any related dock a sign or signs which shall include the following:
 - (1) "LIVE BAIT FOR SALE" and
 - (2) the hours and days of operation. Signs shall be at least 24 inches by 18 inches in size and shall display letters and numbers at least three inches in height.
- (14) Notwithstanding subparagraphs (10) and (11) of this Rule, it shall be lawful for a licensed bait dealer to sell live bait shrimp taken pursuant to this Rule to another licensed bait dealer if the department has been previously notified of the destination of the shrimp to be sold and the time and approximate amount of the sale and if the department has approved the equipment for transferring such shrimp. Transportation and transfer of live bait shrimp between bait dealers shall not exceed the 200 quart possession limit for commercial bait facilities as provided in subparagraph (11).
- (15) It shall be unlawful for any licensed bait dealer to fail to have and display any current business license required by the county or city in which the bait dealership is located and a sales tax certificate of registration issued pursuant to Code Section [48-8-59](#).
- (16) Before the Department issues a bait dealer license it shall inspect the bait dealer facilities to determine if the facilities comply with the requirements of this Rule and O.C.G.A. [48-8-59](#), within 30 days from the time application for license is received.

Rule 391-2-4-.15. Protections for horseshoe crabs; catch limits; exceptions.

- (1) **Purpose.** The purpose of this Rule is to implement the authority of the Board of Natural Resources to promulgate rules and regulations based on sound principles of wildlife research and management, establishing the commercial and recreational seasons, days,

and places; methods of fishing and disposition; and size, creel, and possession limits; gear and landing specifications for horseshoe crabs.

- (2) **Areas Open to Taking of Horseshoe Crabs.** All salt waters of this state are closed to the taking of horseshoe crabs for bait except during those times when the salt waters or portions thereof are opened to the taking of shrimp, whelk, or blue crab by trawling pursuant to O.C.G.A. [27-4-133](#).
- (3) **Quantity.** It shall be unlawful for any person taking horseshoe crabs pursuant to this Rule to take or possess more than 25 horseshoe crabs at any one time or for there to be on board the boat used for the taking more than 75 horseshoe crabs at any one time, whichever is less; provided, however, that the taking or catching of horseshoe crabs incidentally during legal fishing operations of other marine species shall not be a violation of this Rule if the horseshoe crabs so taken in excess of the limits set forth herein are immediately returned to the water from which they were taken without being intentionally or negligently harmed by the taker or the equipment being used.
- (4) **Biomedical Harvest.** This Rule shall not prohibit the taking or possession of horseshoe crabs for the purpose of collecting horseshoe crab blood for the production of amebocyte lysate or other approved medical uses, so long as the taker and possessor have permits issued by the Department authorizing such taking or possession and the horseshoe crabs are handled so as to minimize injury to the horseshoe crabs. Horseshoe crabs may be taken and possessed pursuant to a medical takings permit without regard to the possession limit set forth in paragraph (3) of this Rule or whether or not the salt waters from which they are taken are open or closed for the taking of horseshoe crabs for bait. Horseshoe crabs taken and possessed pursuant to a medical takings permit must be returned unharmed to state waters of comparable salinity and water quality as soon as is feasible after collection of their blood.
- (5) This Rule shall not prohibit the interstate import of horseshoe crabs provided that a bona fide bill of lading accompanies such horseshoe crabs as proof that such horseshoe crabs were not taken or transported in violation of this Rule or the laws of the jurisdiction from which the horseshoe crabs originated.

Rule 391-2-4-.16. Saltwater Fishing Guide and Saltwater Fishing Pier Operator Reporting.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations to set such times and manners for submitting records as may be required by the Department.
- (2) **Persons required to report.** Effective January 1, 2014 all persons licensed as salt water fishing guides and all persons operating licensed salt water fish piers pursuant to O.C.G.A. [27-2-23.2](#) shall report such information as may be required by the Department.
- (3) **Methods.** Monthly records are to be submitted on forms supplied by the Department or on an alternate form approved by the Department. All requests for approval of an alternate form must be submitted to the Department in writing with a copy of the proposed alternate form attached or included with the request. The alternate form must provide identical information and follow the same format as the Department form. Upon receipt of a request for approval of an alternate form, the Department will review the form for the required information within 5 days of the receipt of the request. All persons that use an approved alternate form shall be responsible for all costs associated with the printing and use of such forms.
- (4) **Times.** If required by the Department, all salt water fishing guides and salt water fishing pier operators shall submit written monthly records of activity to the Department, whose address for the purpose of reporting shall be the Coastal Resources Division headquarters, by the tenth day of the subsequent month. These records may be hand delivered or submitted via mail, or electronically. Permission to submit records electronically must be obtained from the Department.
- (5) **Penalties.** Pursuant to O.C.G.A. Sections [27-1-36](#) and [27-2-25](#), failure to comply with the provisions of this rule may result in a civil penalty imposed by the commissioner of up to \$1000.00 and/or a suspension of or refusal to renew the license for up to two years.

Rule 391-2-4-.17. Commercial Fishing Species Endorsements.

- (1) **Purpose.** The purpose of these Rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations to designate species of wildlife or species grouping of wildlife that require a commercial fishing species endorsement.
- (2) **Endorsements.** In addition to a commercial fishing license and commercial fishing boat license required by Code Sections [27-4-110](#) and [27-2-8](#), any person engaged in commercial fishing shall obtain a separate commercial fishing species endorsement for each species or species grouping listed below:

- (a) Bait Minnows (family *Fundulidae*). A bait minnow endorsement is required of employees of a licensed bait dealer that are engaged in the harvest of bait minnows, other than those exempted by Code Section [27-4-171](#), but is not required of the licensed bait dealer.
- (b) Bait Shrimp (*Penaeus spp.*). A bait shrimp endorsement is required of employees of a licensed bait dealer that are engaged in the harvest of bait shrimp, other than those exempted by Code Section [27-4-171](#), but is not required of the licensed bait dealer.
- (c) Cannonball Jellyfish (*Stomolophus meleagris*). A cannonball jellyfish endorsement is required of any licensed commercial fisherman employed on board a trawl vessel harvesting or landing cannonball jellyfish unless the fisherman is onboard a vessel having a trawler crew license issued pursuant to Code Section [27-2-8](#).
- (d) Catfish in Saltwater (families *Ariidae* and *Ictaluridae*). A catfish in saltwater endorsement is required of any licensed commercial fisherman harvesting or landing catfish in saltwater.
- (e) Crab (*Callinectes spp.*) A crab endorsement is required of any licensed commercial fisherman employed by a commercial crab harvester or by a soft-shell crab-dealer, or employed on board a trawl vessel harvesting or landing crab, but is not required of a licensed commercial crab harvester or a licensed soft-shell crab dealer licensed pursuant to Code Section [27-4-150](#). Notwithstanding the foregoing, a crab endorsement shall not be required of a fisherman onboard a vessel having a trawler crew license issued pursuant to Code Section [27-2-8](#).
- (f) Eel (*Anguilla spp.*) An eel endorsement is required of any licensed commercial fisherman harvesting or landing eel.
- (g) Finfish. A finfish endorsement is required of any licensed commercial fisherman harvesting or landing finfish other than shad, catfish in saltwater or bait minnows. Notwithstanding the foregoing, a finfish endorsement shall not be required of a licensed commercial fisherman onboard a vessel having a trawler crew license issued pursuant to Code Section [27-2-8](#).
- (h) Food Shrimp (*Penaeus spp.*) A food shrimp endorsement is required of any licensed commercial fisherman employed by a commercial shrimp castnet harvester or onboard a trawl vessel unless the fisherman is onboard a vessel having a trawler crew license issued pursuant to Code Section [27-2-8](#).
- (i) Horseshoe crab (*Limulus Polyphemus*). A horseshoe crab endorsement is required of any licensed commercial fisherman harvesting or landing horseshoe crabs unless the fisherman is onboard a vessel having a trawler crew license issued pursuant to Code Section [27-2-8](#).

- (j) Shad (*Alosa spp.*) A shad endorsement is required of any licensed commercial fisherman harvesting or landing shad.
- (k) Shellfish (*Crassostrea spp.* and *Mercenaria spp.*). A shellfish endorsement is required of any employee of a master collecting permittee actively involved in the harvest or landing of shellfish and includes the master collecting permit holder.
- (l) Whelk (family *Busyconidae*). A whelk endorsement is required of any licensed commercial fisherman harvesting or landing whelk unless the fisherman is onboard a vessel having a trawler crew license issued pursuant to Code Section [27-2-8](#).

Rule 391-2-4-.18. Shellfish sanitation; seed importation; water bottoms lease terms.

- (1) **Purpose.** The purpose of this Rule is to implement the authority of the Board of Natural Resources to promulgate rules and regulations based on current, sound principles of wildlife research and management establishing commercial shellfish sanitation requirements, seed size and importation criteria, and water bottoms lease terms.
- (2) **Adoption of National Shellfish Sanitation Program Model Ordinance.** The following publication is adopted by reference and is part of these Rules: The National Shellfish Sanitation Program ("NSSP") Model Ordinance entitled "Guide for the Control of Molluscan Shellfish Model Ordinance" ("Guide") covering the sanitation of harvesting, processing, and distribution of shellfish. Violations of the Guide are violations of these Rules, and the Department of Natural Resources is authorized to enforce any requirements set forth in the Guide.
- (3) **Hatcheries and Nurseries.** All hatcheries and nurseries providing shellfish seed, whether in-state or out-of-state, must be certified by the department. Certification is based upon current, sound principles of wildlife research and management and history of shellfish disease in the vicinity of the hatchery or nursery facility.
- (4) **Commercial shellfish seed size.** Clam seed shall not be greater than one-half inch and oyster seed shall not be greater than one inch.
- (5) **Shellfish Seed Health Requirements, Importation.** For the purpose of possessing shellfish seed for mariculture in this state, any person permitted to conduct mariculture operations according to this section must adhere to the following:

- (a) All shellfish seed used in mariculture must originate only from hatcheries or nurseries certified by the department; and
 - (b) Shellfish seed from out-of-state hatchery and nursery facilities must be accompanied by a Certificate of Health from a Department-approved pathologist certifying the shellfish seed as free from disease and pathogens and must include the following:
 - (i) Location(s) where the shellfish seed was spawned and nursed;
 - (ii) Size of shellfish seed tested;
 - (iii) List of diseases and pathogens in the analysis as required by the department;
 - (iv) Shellfish species tested;
 - (v) An indication that the shellfish seed was tested within 30-days prior to entering this state unless waived by the Department; and
 - (vi) Copies of the Certificate of Health must be maintained by the hatchery and/or nursery and the master harvester for a period of not less than three years.
 - (c) Visual inspection of out-of-state shellfish seed shipments prior to placement on a lease must be granted upon request by the Department. Imported seed may be rejected if there is non-conformance of shellfish seed size or comingling of species that is not listed on the bill of lading or invoice that accompanies such shipment.
- (6) Leasing of State-Owned Water Bottoms Terms, Siting, other Considerations.**
- (a) The term of a state-owned water bottoms lease shall not exceed ten years and is subject to such provisions, requirements and conditions as determined by the Department. Leases may be renewed for additional terms if the lessee is in compliance with the terms of the current lease.
 - (b) Subtidal water bottoms leases shall be sited in accordance with the following criteria:
 - (i) In Approved Shellfish Growing areas as determined by the department;
 - (ii) In areas with a minimum width of 200 feet at mean low water;
 - (iii) In areas with a minimum depth of not less than 6 feet at mean low water; and
 - (iv) Not on or over an existing shellfish resource, live bottom or saltmarsh.

- (c) Any boundary of a subtidal water bottom lease shall not be within the following:
 - (i) 150 feet of a federal project, such as a federally maintained channel;
 - (ii) 50 feet of an existing commercial, community or private dock; and
 - (iii) 50 feet of a shoreline at mean low water.

- (d) Subtidal water bottoms leases may only be located within or adjacent to certain resources if the Department determines, after consulting with the appropriate local, state or federal agencies with jurisdiction over the subject matter, that the lease is compatible with the following:
 - (i) Critical habitat for marine, threatened or endangered species;
 - (ii) Bait shrimping zones; and
 - (iii) Heritage Preserves as defined in O.C.G.A. Title 12.

- (e) Before siting a subtidal water bottoms lease the Department shall evaluate such other considerations as it deems necessary, but shall include at a minimum the following:
 - (i) Areas with known pre-existing or historical commercial, recreational and private uses of the waterway such as commercial and recreational fishing, high boat traffic, riparian viewsheds, and research sites;
 - (ii) Areas where property owners may exercise riparian rights to construct docks or marinas; and
 - (iii) Areas of dynamic shorelines and shoaling.

Subject 391-2-5. COASTAL INCENTIVE GRANT PROGRAM DESCRIPTION.

Rule 391-2-5-.01. Coastal Incentive Grant Program, Match, Term and Reimbursement.

The Georgia Department of Natural Resources (DNR), Coastal Resources Division (CRD), solicits proposals for Coastal Incentive Grants (CIG) awarded under the Georgia Coastal Management Program (GCMP). The following announcement provides background and describes funding priorities, selection criteria, and application procedures.

This Request for Proposals solicits projects that are related to the themes identified by the Coastal Advisory Council (CAC) for the FY 2022-2023 Cycle 25 awards. Projects that are acceptable but for which there are no available funds may be awarded a CIG at a later date if funds become available.

All CIG applications must be matched annually \$1.00 federal to \$1.00 local (1:1). Match may be either cash from local, state or private sources or "in-kind" service(s).

If selected, CIG Cycle 25 contracts will run for one year beginning October 1, 2022 through September 30, 2023. Applications will be accepted for two-year sub-grant requests with the second year of support contingent upon approval and receipt of federal funds. Year 1 funding is not transferable to Year 2, if applicant submits a two (2) year project.

CIGs are reimbursable sub-grants. A Request for Reimbursement of federal project costs, along with a report of applicable non-federal match, is to be submitted with the Final Report, using the format provided by the DNR. Reimbursement will be made following completion of the terms of the sub-grant contract and receipt and performance of all deliverables for each sub-grant year.

Rule 391-2-5-.04. Eligibility and Contract Requirements.

CIG applicants must meet the following Minimum Eligibility Requirements:

Eligible Entities: Only Georgia Qualified Local Governments (counties and municipalities approved by the Georgia Department of Community Affairs) in the eleven-county coastal area, Georgia state government agencies (except DNR), and Georgia government affiliated educational and research institutions are eligible for a CIG sub-grant award. Applications from other parties will be considered if sponsored by an eligible entity.

Eligible projects must concentrate entirely or be physically located within at least one of the eleven (11) designated Georgia counties within the GCMP service area. GCMP eligible counties include Brantley, Bryan, Camden, Chatham, Charlton, Effingham, Glynn, Liberty, Long, McIntosh, and Wayne.

Equal Opportunity: The applicant must comply with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, The Age Discrimination Act of 1975, The Americans with Disabilities Act of 1990, and all other state and federal laws of non-discrimination. The applicant must certify that no person shall be discriminated against on the basis of race, color, sex, religion, national origin, age, or physical or mental handicap for any program, activity, or facility sponsored, operated, or constructed under the sub-grant project.

State and Federal Laws/Regulations: The applicant must comply with all existing laws and regulations for receiving and expending state and federal grant money including, but not limited to, public notices, bidding and purchasing requirements, and the Georgia Environmental Policy Act. Proposed projects must comply with existing state and federal environmental laws, rules, and regulations including, but not limited to, the Coastal Marshlands Protection Act, the Shore Protection Act, the Georgia Coastal Management Act, the federal Clean Water Act, the Georgia Clean Water Quality Control Act, the federal Endangered Species Act, and the Georgia Endangered Wildlife Act. If the applicant is a county or municipal government, the applicant must be in compliance with the Georgia Planning Act and be certified as a Qualified Local Government as defined by the Act before any Program funds will be awarded.

Applicability: The applicant must include a statement explaining how the project furthers the GCMP mission, goals, and policies. The statement must begin with "This project furthers the GCMP mission by." and then be completed with how the project ties back to the mission stated in Section [391-2-5-.02](#).

Sub-grant Contract: A legally binding contract will be executed between the sub-granting organization (DNR) and recipients of sub-grant awards (Applicant). The contract will set forth the program requirements, sub-grant conditions, and define the project scope of work, deliverables, and timeline with milestones of accomplishments.

Rule 391-2-5-.05. Awards.

Applicants may apply for up to **\$80,000** per year in a federal fund request so long as the proposed project is related to one or more funding theme priorities designated in Section [391-2-5-.06](#). Projects that involve low-cost construction or land acquisition must follow the terms and conditions in the most recent version of NOAA's 306A Guidance document. All low-cost construction and acquisition projects require a pre-application meeting and site visit by DNR staff. See Section [391-2-5-.08](#) for greater detail regarding construction/acquisition project terms. Up to two year proposals will be accepted, as per conditions stated in Section [391-2-5-.01](#).

Rule 391-2-5-.06. Funding Themes.

The themes of the FY 2022-2023 Cycle 25 CIG Program as adopted by the CAC are (*bulleted items are provided only as examples*):

Oceans and Wetlands

- * Maintaining or improving the quality of wetlands
- * Conservation and restoration of wetland habitats
- * Improved understanding of ocean and wetland habitats and functions

Public Access and Land Conservation

- * Add or enhance physical access for the public to coastal water resources (i.e. rivers, wetlands, beaches)
- * Public access planning
- * Conservation of riparian habitats through acquisition
- * Land conservation, preservation, and/or management, especially for sea level rise retreat
- * Analysis of land conservation needs and opportunities for habitat protection

Sustainable Communities

- * Strengthen local capacity to implement sustainable approaches in planning and development
- * Increase understanding of costs and benefits associated with sustainable approaches to coastal development
- * Identification and preservation of unique community qualities, historical and cultural features, including public education of the above

Disaster Resiliency and Coastal Hazards

- * Improve understanding of coastal hazards and potential impacts
- * Develop, implement or incorporate adaptation and mitigation strategies/plans or policies
- * Strengthen local capacity to implement FEMA's Community Rating System

Non-Point Source Pollution

- * Improvements to existing urban runoff control structures in coastal watersheds
- * Projects that address stormwater quantity and quality improvements utilizing BMPs recommended by the Georgia Coastal Stormwater Supplement
- * No construction projects are eligible under this theme

Rule 391-2-5-.08. Construction/Acquisition Projects and Terms.

Allowable construction/acquisition activities are defined under Section 306A of the Coastal Zone Management (CZM) Act, and as such are defined by statute. Theme related construction/acquisition projects are limited to a federal request of \$80,000, may be up to two (2) year projects, and must abide by the terms and conditions in the most recent version of NOAA's 306A guidance document. Applicants may be asked to revise scope of work of construction projects to meet eligibility guidelines and/or NOAA's 306A guidance document. All construction or land acquisition projects must undergo a pre-application site visit by DNR staff prior to submittal of a full application, if invited to submit such. NOAA is currently revising the 306A guidance document and construction/acquisition project terms may be subject to change prior to project start depending on the effective date of the new guidance.

Applicants must meet the objectives and allowable use guidelines under Section 306A of the Coastal Zone Management Act to be considered. At this time, refer to the 1999 Coastal Zone

Management Act Section 306A guidance document for full text of objectives and uses. In summary, sub-grants for construction/acquisition projects made under Section 306A may be used for the following activities only:

- * The acquisition of fee simple and other interests in land;
- * Low-cost construction projects, including but not limited to, paths, walkways, fences, parks, and the rehabilitation of historic buildings and structures;
- * The rehabilitation or acquisition of piers to provide increased public use, including compatible commercial activity;
- * The establishment of shoreline stabilization measures including the installation or rehabilitation of bulkheads for the purpose of public safety or increasing public access and use;
- * The removal or replacement of pilings where such action will provide increased recreational use of urban waterfront areas;
- * Engineering designs, specifications, and other appropriate reports related to these activities; and
- * Educational, interpretive, and management costs and other related costs NOAA determines to be consistent with the purposes of this section.

Historic Preservation Division of the Georgia Department of Community Affairs (Georgia HPD or HPD): All construction projects must obtain a clearance letter from the Georgia HPD stating no significant impact, or specifying project conditions, as required under Section 106 of the federal Historic Preservation Act of 1966. Applications are considered incomplete and the project cannot begin until a clearance letter from HPD has been returned to the DNR-CRD. It is the applicant's responsibility to provide the HPD clearance letter as a supporting document of the RFP.

Endangered Species Act: All construction projects must obtain a letter from the US Fish and Wildlife Service (FWS) stating there will be no significant impacts, or specifying project conditions, from the proposed project according to Section 7 of the Endangered Species Act. Applications are considered incomplete and the project cannot begin until a clearance letter from the FWS has been returned to the DNR-CRD. It is the applicant's responsibility to provide the FWS clearance letter as a supporting document of the RFP.

NOAA Involvement: All construction project proposals are required to submit a completed 306A Project Questionnaire with their application including documentation in the form of reports, permits, coordination letters from state and federal agencies, maps, and photographs when necessary. Work cannot begin on any construction project until the 306A Project Questionnaire has been reviewed, approved, and signed by NOAA's Coastal Programs Division Chief and the DNR-CRD.

Additionally, federally funded projects are required by the National Environmental Policy Act (NEPA) of 1969 to assess the environmental impact(s) (Public Law 91-190, as amended; 82 Stat. 852, as amended; 42 U.S.C. 4321-4347). NOAA is responsible for determining and advising whether a proposed sub-grant project is eligible for a categorical exclusion in accordance with NOAA's NEPA regulations.

Terminated: September 23, 2009.

Rule 391-2-5-.10. Budget, Match Requirements and Indirect Costs.

All funding components must be supported by a direct line item budget. Applicant overhead cost must be itemized and included as a direct expense. As per the OMB 2 C.F.R. 200 Circular (Uniform Guidance), indirect cost rates, percentages, or contingencies will be considered as allowable costs for reimbursement or match, in whole or part, as preferred by the applicant, under the CIG program. The applicant must include a statement of the federally negotiated indirect cost rate in the budget narrative, as well as proof of the agreement. If the applicant has never had a federally negotiated indirect cost rate agreement, then a maximum 10% de minimis indirect cost rate is allowable, unless otherwise negotiated between the applicant and DNR-CRD at the applicant's discretion.

The applicant must match the federal funds requested through the CIG program. The minimum required match ratio for CIG sub-grants is \$1.00 federal to \$1.00 local (1:1) for all projects. A 1:1 match must be accrued for each year of the project. Match may be either cash from local, state, or private sources; or "in-kind service(s)". Generally, funds from other federal agencies may not be used as match, unless the program authorization for that funding program indicates that their funds may be used to meet an applicant's local share. If federal dollars are to be used as match, the applicant must provide a copy of the authorizing language or a statement from the federal agency that it is allowable, including a statutory citation for the authorizing language.

In-Kind Match: A match source that is considered "in-kind services" must meet the following criteria:

- * Verifiable from your records
- * Directly attributable to the project
- * Personnel time must be documented and submitted with the appropriate form
- * Performed or provided within the contracted period
- * Personnel salary or in-kind labor cannot be derived from any other federally assisted program and cannot be paid by the federal government under another award.

The federal Coastal Zone Management Act predetermines match requirements.

Rule 391-2-5-.12. RFP Application Submittal.

The FY 2022-2023 Cycle 25 CIG opportunity will involve a competitive pre-application process followed by an invitation only competitive full application process. The detailed CIG pre-and full application instructions, format, and standard required forms are available on the DNR-CRD website.

Pre-Application Process: Pre-applications must be submitted online by **4:30pm on Friday, December 3, 2021**. Applicants must submit a completed profile form (as provided by DNR-CRD) and succinctly summarize the project goals, relevance to coastal management, tasks to be performed, and an overall estimated budget as outlined in the pre-application instructions found on the aforementioned DNR-CRD website. Pre-applications must be submitted online by the due date and time. A notice of receipt will be sent via email. Pre-applications will be competitively reviewed and only those selected will be invited to submit a full application. Applicants will be notified by January 14, 2022 if they have been selected, or not.

Full Application Process: Applicants with selected pre-applications will be invited to submit a full application. Full applications must be submitted online by **4:30pm on Friday, February 11, 2022**. In addition to the pre-application information, the full application should also include specific and detailed task descriptions by year, a project timeline with major milestones, project management information, a detailed yearly budget breakdown with narrative, and all supporting documentation as outlined in the full application instructions found on the aforementioned DNR-CRD website. Facsimiles and email submissions of the full application will not be accepted. The full application packet must be submitted online by the due date and time

Applications received after the deadline will not be accepted.

Rule 391-2-5-.13. Application Review Process.

Applications must be submitted with a profile form, proposal, other required forms, and supporting documentation as described in the detailed CIG application instructions located on the DNR-CRD website.

Pre-Application Process: Following the submittal of the pre-application, the CZM Grants Coordinator will schedule the Pre-Application Review Team, which may be comprised of Coastal Zone Management (CZM) Technical Assistance staff; the CZM Program Manager; and CRD Habitat, Fisheries, Shellfish, and/or Education and Outreach staff. The Team will review and competitively rank the pre-applications based on 1) applicability to the GCMP mission, goals, and policies, 2) a demonstrated coastal management need, 3) clear project goals, 4) budget soundness, 5) an applicant's past performance, and 6) relationship to other federal funding. Selected applicants will be invited to submit a full application.

Full Application Process: Upon selection of the pre-applications, the CZM Grants Coordinator will schedule the CIG Technical Review Committee, which is comprised of five (5) coastal community professionals from the following fields: state resource management, local government, non-governmental organization, academia, and citizen-at-large. The Committee will review and preliminarily score the applications based on the criteria provided in Sections [391-2-5-.17](#) and [391-2-5-.18](#). The Committee will consider the applications in a roundtable forum from highest to lowest preliminary score. After careful consideration, final ranking will be determined by consensus. Full applications that are recommended for funding by the Committee will be included in the DNR application for annual funding from the National Oceanic and Atmospheric Administration (NOAA) GCMP CZM Grant. NOAA makes the final review and approval of all CIG sub-grants. All applicants will be notified of the Committee's recommendation by April 29, 2022. All applicants will be notified of final NOAA approval by August 31, 2022.

Late, incomplete, and ineligible pre-and full applications will be returned to the applicant. Unsuccessful applicants may contact the CZM Grants Coordinator within 30 days of pre-or full application notification to discuss reason(s) for denial.

Rule 391-2-5-.17. Non-Research Project Evaluation Criteria.

Non-Research Project Evaluation Criteria

Project proposals will be evaluated on a numerical scale based upon the following criteria.

Total points available = 140

_____ Problem Statement (Max 15 points)

8-15 points The proposal clearly defines the problem or issue and describes how the project will resolve the problem.

1-7 points The proposal clearly defines the problem or issue, however, it does not clearly describe how the project will resolve the problem.

0 points The proposal does not clearly define a problem or there is no connection shown between the project and the problem.

_____ Project Outcomes (Max 15 points)

8-15 points The project outcomes are clear and concise; the proposal shows how the outcomes are attainable and/or that they will produce useable results.

1-7 points The project outcomes are clear; however, it is not clear that the outcomes are attainable and/or that they will produce useable results.

0 points The project outcomes are not clear and concise.

_____ **Project Work Schedule, Deliverables and Budget** (Max 15 points)

8-15 points The project work schedule and budget are clearly stated, clearly linked, and provide a logical sequence to produce well-defined deliverables *and* the budget optimizes funding through an efficient use of funds as illustrated by budget and budget narrative.

1-7 points The project work schedule and budget are clearly stated, clearly linked and provide a logical sequence to produce well-defined deliverables.

0 points The project work schedule, deliverables and budget are unclear or unrealistic.

_____ **Coastal Resource Management and Planning / Practicality** (Max 20 points)

11-20 points The proposed project clearly describes its application to the Georgia Coastal Management Program mission and specifically identifies practical uses for the project information or project result (can be an educational experience or construction project) by coastal managers (federal, state and/or local level).

1-10 points The proposed project clearly describes its application to the Georgia Coastal Management Program mission, but does not specifically identify the practical use of the project information or result by coastal managers.

0 points The proposed project does not clearly describe its application or utility to coastal managers.

_____ **Timing/Immediacy** (Max 10 points)

6-10 points The project can be done only at this time due to current circumstances and the proposal clearly describes and supports those circumstances.

1-5 points The project may be done at some future time, but project benefits will be maximized if its completion can capitalize on current circumstances.

0 points The project may be done at a future time with no significant ill effects accruing to the project benefits.

_____ **Planning Priority** (Max 15 points)

8-15 points The project is specifically identified by one or more federal, state, regional, and/or local plans. (**Applicant must reference or attach a copy of the relevant section of the plan(s) in order to receive points.**)

1-7 points The project need is conceptually supported by one federal, state, regional, and/or local plan. (**Applicant must reference or attach a copy of the relevant section of the plan(s) in order to receive points.**)

0 points The project is not identified or conceptually supported in a published plan.

_____ **Natural Resource Conservation, Protection, Restoration and Enhancement** (Max 15 points)

1-15 points Rank the degree to which the project will conserve, protect, restore, sustain, or enhance a coastal resource(s).

_____ **Community Partnership and Volunteer Involvement** (Max 10 points)

6-10 points The project involves cooperation with two or more coastal municipalities, community agencies or organizations, or volunteers will contribute a *substantial* amount of time and effort to the project. The application clearly describes how partners will contribute and does not just make a conclusory statement.

1-5 points The project involves cooperation with one coastal municipality, community agency or organization, or volunteers will contribute a *moderate* amount of time and effort to the project. The application clearly describes how the partner will contribute and does not just make a conclusory statement.

0 points The project involves only the applicant agency and does not include the use of volunteers or partner organizations.

_____ **Communications Component** (Max 15 points)

8-15 points The proposed project clearly describes an educational and/or training component which provides information and findings to multiple audiences (i.e. scientific community, local government, general public, key stakeholders, etc.).

1-7 points The proposed project clearly describes an educational and/or training component which provides information and findings to a specific targeted audience or the general public, but not to both

0 points The proposed project does not clearly describe an educational and/or training component.

_____ **Matching of Sub-Grant Funds** (Max 10 points)

10 points The project provides other public and/or private investments (match) equal to or greater than 200% (i.e. 2:1) of the requested federal funds.

7 points The project provides other public and/or private investments (match) equal to or greater than 150% (i.e. 1.5:1) of the requested federal funds.

4 points The project provides other public and/or private investments (match) equal to or greater than 110% (i.e. 1.1:1) of the requested federal funds.

0 points The project does not provide more than the required 100% (i.e. 1:1) of the requested federal funds.

_____ **REVIEWER TOTAL (Max 140 points)**

Reviewer's Comments:

Rule 391-2-5-.18. Research Project Evaluation Criteria.

Research Project Evaluation Criteria

Project proposals will be evaluated on a numerical scale based upon the following criteria.

Total points available = 140

_____ **Problem Statement (Max 10 points)**

6-10 points The proposal clearly defines the problem or issue and describes how the project will resolve the problem.

1-5 points The proposal clearly defines the problem, however, it does not clearly describe how the project will resolve the problem.

0 points The proposal does not clearly define a problem or there is no connection shown between the project and the problem.

_____ **Project Outcomes (Max 10 points)**

6-10 points The project outcomes are clear and concise; the proposal shows how the goal and objectives are attainable and how useful information will be produced.

1-5 points The project outcomes are clear and concise; however, it is not clear that the goal and objectives are attainable or that they will produce useable results.

0 points The project outcomes are not clear and concise.

_____ **Project Work Schedule, Deliverables and Budget** (Max 15 points)

8-15 points The project work schedule and budget are clearly stated, clearly linked, and provide a logical sequence to produce well-defined deliverables *and* the budget optimizes funding through an efficient use of funds as illustrated by budget and budget narrative.

1-7 points The project work schedule and budget are clearly stated, clearly linked and provide a logical sequence to produce well-defined deliverables.

0 points The project work schedule, deliverables and budget are unclear or unrealistic.

_____ **Coastal Resource Management and Planning / Practicality** (Max 20 points)

11-20 points The proposed project clearly describes its application to the Georgia Coastal Management Program mission and specifically identifies practical uses for the project information or findings by coastal managers (federal, state and/or local level).

1-10 points The proposed project clearly states its application to the Georgia Coastal Management Program mission, but the application does not specifically identify the practical use of the information or findings by coastal managers.

0 points The proposed project does not state its application or utility to coastal managers.

_____ **Scientific Merit** (Max 10 points)

6-10 points The proposed project clearly demonstrates that it is based upon sound science and current research methodologies, and will generate cutting-edge information and/or technology supportive of the goals and objectives of the Georgia Coastal Management Program.

1-5 points The proposed project clearly demonstrates that it is sound science, but it is not clear how it will generate cutting-edge information and/or technology that is supportive of the goals and objectives of the Georgia Coastal Management Program.

0 points The proposed project is not sound science.

_____ **Transferability to Practical Use** (Max 20 points)

11-20 points The application has clearly set out a process for transferring results and outcomes to practical use.

1-10 points The application has clearly set out a process for transferring results, but outcomes have no practical use.

0 points The application has no process for transferring results and outcomes to practical use.

_____ **Coastal Management Need** (Max 10 points)

6-10 points The application has clearly identified and described a coastal management need to be addressed, as per the CRD Needs List.

1-5 points The application has clearly identified and described a coastal management need to be addressed, but it is not on the CRD Needs List.

0 points The application has not clearly identified and described a coastal management need.

_____ **Immediacy** (Max 10 points)

6-10 points The proposed project clearly describes and fulfills an immediate research need of coastal resource managers.

1-5 points The proposed project clearly describes and fulfills a coastal management research need, but the need is not necessarily immediate.

0 points The proposed project does not describe nor fulfill a coastal management research need.

_____ **Community Partnership and Volunteer Involvement** (Max 10 points)

6-10 points The project involves cooperation with two or more coastal municipalities, community agencies or organizations, or volunteers will contribute a substantial amount of time and effort to the project. The application clearly describes how partners will contribute and does not just make a conclusory statement.

1-5 points The project involves cooperation with one coastal municipality, community agency or organization, or volunteers will contribute a moderate amount of time and effort to the project. The application clearly describes how the partner will contribute and does not just make a conclusory statement.

0 points The project involves only the applicant agency and does not include the use of volunteers or partner organizations.

_____ **Communications Component** (Max 15 points)

8-15 points The proposed project clearly describes an educational and/or training component which provides information and findings to multiple audiences (i.e. scientific community, local governments, general public, key stakeholders, etc.).

1-7 points The proposed project clearly describes an educational and/or training component which provides information and findings to a specific targeted audience or the general public, but not to both.

0 points The proposed project does not clearly describe an educational and/or training component.

_____ **Matching of Sub-Grant Funds** (Max 10 points)

10 points The project provides other public and/or private investments (match) equal to or greater than 200% (i.e. 2:1) of the requested federal funds.

7 points The project provides other public and/or private investments (match) equal to or greater than 150% (i.e. 1.5:1) of the requested federal funds.

4 points The project provides other public and/or private investments (match) equal to or greater than 125% (i.e. 1.25:1) of the requested federal funds.

0 points The project does not provide more than the required 100% (i.e. 1:1) of requested federal funds in support of the project.

_____ **REVIEWER TOTAL** (Max 140 points)

Subject 391-2-6. CLEAN VESSEL ACT GRANT PROGRAM DESCRIPTION.

[Rule 391-2-6-.01. Clean Vessel Act Grant Program.](#)

- (1) **Statutory Basis.** The Department is authorized to protect, manage, and regulate coastal areas and waters under Article 4 of Chapter 5 of Title 12 of the Official Code of Georgia Annotated; to regulate activities and vessels upon all waters of the state under Article 1 of Chapter 7 of Title 52 of the Official Code of Georgia Annotated; and to contract with public and private entities and disperse funds under O.C.G.A. § [12-3-5](#) for these purposes and such other duties, responsibilities, or functions vested in the Department. Furthermore, the Department is authorized by the Federal Clean Vessel Act of 1992, as amended by Public Law 109-59, Title X, Section 10131, to administer grants to public and private entities for the construction, renovation, operation, and maintenance of sewage pump-out stations, waste reception and storage facilities, and pump-out vessels.
- (2) **Purpose.** The purpose of the Clean Vessel Act grants program is to encourage the construction and operation of sewage pump-out stations at marina facilities throughout Georgia. Pump-out and dump stations provide a substantial benefit to the public by promoting the responsible use of inland and coastal waters and reduces the risk of overboard discharge of untreated sewage.
- (3) **Program Administration.**
 - (a) The Georgia Department of Natural Resources, Coastal Resources Division (CRD) and Wildlife Resources Division (WRD), shall develop procedures, applications, forms, contracts, and other materials as necessary to administer the Clean Vessel Act Grants program, which shall include, but not be limited to: establishing timelines and deadlines on an annual, cyclical basis for announcing grant application availability, application due date, project awards date, project reporting dates, and project completion date; developing application and project review procedures; establishing minimum requirements for project management of grants by recipients; developing guidance and informational materials, including providing definitions; and developing policies and procedures to rescind grant awards for non-performance and to re-award recaptured funds.
 - (b) Notice of the start of the grant cycle shall be posted by the first business day in July through electronic newsletter, website posting, and by other means as determined appropriate by CRD/WRD. The notice shall include, at a minimum, a summary description of the grant program and eligibility and eligible activities requirements, date of application availability, deadline for submitting applications, and directions for obtaining an application.
 - (c) Grant application forms and instructions shall be available in electronic format; paper format application materials shall be available upon request.
 - (d) CRD shall administer coastal projects and WRD shall administer inland projects.
- (4) **Eligibility Requirements.**
 - (a) Eligible applicants include:

1. Any Georgia local government entity, including counties, municipalities, and duly authorized agencies or instrumentalities of a county or municipality, including but not limited to, local authorities and local boards;
 2. Privately owned, for profit marinas in Georgia; and
 3. Not-for profit marinas in Georgia.
- (b) Eligible Projects include those to construct, renovate, operate, and/or maintain pump-out and dump stations, including floating restrooms in the water, not connected to land or structures connected to the land, used solely by boaters. Eligible grant activities also include any activity necessary to hold and transport boaters' sewage to treatment plants, such as holding tanks, piping, hauling costs, and any activity necessary to get sewage treatment plants to accept sewage, such as installing bleed-in facilities and the production of informational or educational materials.

(5) General Terms and Conditions.

- (a) Individual grant award limits will be established and announced for each grant cycle based on available funding. Recipients must provide match equal to 25% of the approved total project cost in cash or in-kind services, as defined by CRD/WRD.
- (b) Recipients may be required to attend a grant workshop immediately after grant awards are announced.
- (c) Recipients must execute a grant agreement with CRD/WRD and comply with all its provisions, including maintaining complete financial records for all activities covered by the grant agreement and providing an audited report after completion of the project.
 1. Adequate progress toward completion of the project must be documented by the recipient and approved by CRD/WRD before payment of intermediate reimbursements.
 2. Ten (10) percent of the grant funds shall be withheld until CRD/WRD approval of the completed project.
- (d) All recreational vessels must have access to pump-out and dump stations funded under this grant program. Facilities shall be operated, maintained, and reasonably accessible to all recreational vessels for the full period of their useful life.
- (e) Project planning and construction documents and work product shall be reviewed and approved by CRD/WRD under terms established by the grant agreement.

- (f) Projects and/or project areas will be available for inspection by CRD/WRD staff during construction or the grant period, as applicable, and be facilitated by the grant recipient upon reasonable notice. Reasonable notice shall include pre-arranged scheduled visits, mutually agreed upon times, or 1-week notice of intent to visit by CRD/WRD staff.
- (g) Non-compliance with (5) (a) through (f) above and any terms & conditions of the grant agreement may result in the rescission of the grant award.

(6) Application Procedures.

- (a) Applicants shall make application to the Coastal Resources Division or the Wildlife Resources Division, Georgia Department of Natural Resources, depending on whether the project is coastal or inland, by specified deadlines, on current state fiscal year in the manner and format provided for in the grant application instructions.
- (b) At the sole discretion of CRD/WRD, a prior year application form for an unfunded project may be accepted in lieu of a current state fiscal year application form; provided that the scope of the proposed project is unchanged and other information is current or updated, including project contact and administrator information, authorized signatures, and matching fund resolution.

(7) Review Criteria.

- (a) Applications will be reviewed by a committee composed of CRD/WRD staff. Staff will review applications to ensure project meets the eligibility criteria set forth in the Federal Clean Vessel Act 50 CFR 85 and to ensure that the project is consistent with the purpose and conditions of the Act.
- (b) Proposed projects shall be evaluated by the following criteria:
 1. Project meets eligibility requirements;
 2. Project concept fits the need within the purposes of the Act;
 3. Discrete objectives are identified to be accomplished during a specific time period that addresses the need;
 4. Project provides a public benefit;
 5. Amount and source of matching funds is consistent with requirements in the Act;
 6. Fees for use of the facility are consistent with requirements in the Act;

- (c) Grants shall be awarded to the extent of established available funding based on CRD/WRD staff recommendations as approved by the Commissioner of the Georgia Department of Natural Resources or designee

History. Original Rule entitled "Clean Vessel Act Grant Program" adopted. F. Sep. 4, 2012; eff. Sept. 24, 2012.

Subject 391-2-7. BOATING INFRASTRUCTURE GRANT PROGRAM DESCRIPTION.

Rule 391-2-7-.01. Boating Infrastructure Grant Program.

- (1) **Statutory Basis.** The Department is authorized to enter into grant agreements for the establishment of tie-up facilities for recreational boats 26 feet or more in length under §O.C.G.A. [27-1-6](#); to regulate activities and vessels upon all waters of the state under Article 1 of Chapter 7 of Title 52 of the Official Code of Georgia Annotated; and to contract with public and private entities and disperse funds under O.C.G.A. § [12-3-5](#) for these purposes and such other duties, responsibilities, or functions vested in the Department.
- (2) **Purpose.** The purpose of the Boating Infrastructure Grants program is to provide states with money to construct, renovate and maintain tie-up facilities for recreational boats 26 feet or more in length.
- (3) **Program Administration.**
 - (a) The Georgia Department of Natural Resources, Coastal Resources Division (CRD) and Wildlife Resources Division (WRD), shall develop procedures, applications, forms, contracts, and other materials as necessary to administer the Boating Infrastructure Grant program, which shall include, but not be limited to: establishing timelines and deadlines on an annual, cyclical basis for announcing grant application availability, application due date, project awards date, project reporting dates, and project completion date; developing application and project review procedures; establishing minimum requirements for project management of grants by recipients; developing guidance and informational materials, including providing definitions; and developing policies and procedures to rescind grant awards for non-performance and to re-award recaptured funds.
 - (b) Notice of the start of the grant cycle shall be posted by the first business day in July through electronic newsletter, website posting, and by other means as determined appropriate by CRD/WRD. The notice shall include, at a minimum, a summary description of the grant program and eligibility and eligible activities

requirements, date of application availability, deadline for submitting applications, and directions for obtaining an application.

- (c) Grant application forms and instructions shall be available in electronic format; paper format application materials shall be available upon request.
- (d) CRD shall administer coastal projects and WRD shall administer inland projects.

(4) Eligibility Requirements.

- (a) Eligible applicants include:
 - 1. Any Georgia local government entity, including counties, municipalities, and duly authorized agencies or instrumentalities of a county or municipality, including but not limited to, local authorities and local boards;
 - 2. Privately owned, for profit marinas in Georgia; and
 - 3. Not-for profit marinas in Georgia.
- (b) Eligible Projects include those to construct, renovate and maintain boating infrastructure tie-up facilities either publicly or privately owned for non-trailerable vessels 26 feet or more in length or the production of informational or educational materials such as charts, cruising guides and brochures.

(5) General Terms and Conditions.

- (a) Individual grant award limits will be established and announced for each grant cycle based on available funding. Recipients must provide match equal to 25% of the approved total project cost in cash or in-kind services, as defined by CRD/WRD.
- (b) Recipients may be required to attend a grant workshop immediately after grant awards are announced.
- (c) Recipients must execute a grant agreement with CRD/WRD and comply with all its provisions, including maintaining complete financial records for all activities covered by the grant agreement and providing an audited report after completion of the project.
 - 1. Adequate progress toward completion of the project must be documented by the recipient and approved by CRD/WRD before payment of intermediate reimbursements.
 - 2. Ten (10) percent of the grant funds shall be withheld until CRD/WRD approval of the completed project.

- (d) Facilities shall be operated, maintained, and reasonably accessible to all members of the public operating recreational vessels including but not limited to non-trailerable vessels 26 feet or more in length for the full period of their useful life.
- (e) Project planning and construction documents and work product shall be reviewed and approved by CRD/WRD under terms established by the grant agreement.
- (f) Projects and/or project areas will be available for inspection by CRD/WRD staff during construction or the grant period, as applicable, and be facilitated by the grant recipient upon reasonable notice. Reasonable notice shall include pre-arranged scheduled visits, mutually agreed upon times, or 1-week notice of intent to visit by CRD/WRD staff.
- (g) Non-compliance with (5) (a) through (f) above and any terms & conditions of the grant agreement may result in the rescission of the grant award.

(6) Application Procedures.

- (a) Applicants shall make application to the Coastal Resources Division or the Wildlife Resources Division, Georgia Department of Natural Resources, depending on whether the project is coastal or inland, by specified deadlines, on current state fiscal year in the manner and format provided for in the grant application instructions.
- (b) At the sole discretion of CRD/WRD, a prior year application form for an unfunded project may be accepted in lieu of a current state fiscal year application form; provided that the scope of the proposed project is unchanged and other information is current or updated, including project contact and administrator information, authorized signatures, and matching fund resolution.

(7) Review Criteria.

- (a) Applications will be reviewed by a committee composed of CRD/WRD staff. Staff will review applications to ensure project meets the eligibility criteria set forth in the Boating Infrastructure Grant program, 50 CFR, Part 86 and to ensure that the project is consistent with the purpose and conditions of the Act.
- (b) Proposed projects shall be evaluated by the following criteria:
 1. Project meets eligibility requirements;
 2. Project concept fits the need within the purposes of the Act;
 3. Discrete objectives are identified to be accomplished during a specific time period that addresses the need;

4. Project provides a public benefit;
 5. Amount and source of matching funds is consistent with requirements in the Act;
 6. Fees for use of the facility are consistent with requirements in the Act;
- (c) Grants shall be awarded to the extent of established available funding based on CRD/WRD staff recommendations as approved by the Commissioner of the Georgia Department of Natural Resources or designee.

History. Original Rule entitled "Boating Infrastructure Grant Program" adopted. F. Sep. 4, 2012; eff. Sept. 24, 2012.

Chapter 391-3. ENVIRONMENTAL PROTECTION.

Subject 391-3-1. AIR QUALITY CONTROL.

Rule 391-3-1-.01. Definitions. Amended.

Unless a different meaning is required by the context, the following terms as used in these rules shall have the meaning hereinafter respectively ascribed, except that to the extent terms are not defined in these rules the Act's definitions control; and provided, that definitions within any subsequent rule, or subdivision thereof, which are expressly made applicable to the rule or subdivision within which they appear, shall apply for purposes of such specific rule or subdivision thereof; and provided the definitions appearing in Federal regulations adopted by reference shall control in the application of the related Federal regulations to which they apply under the Federal Act; and provided further, that in officially designated non-attainment areas the definitions contained in [40 CFR 51.165\(a\)\(1\)\(i\) through \(xix\)](#) shall apply. [40 CFR 51.165\(a\)\(1\)\(i\) through \(xix\)](#), as amended, is hereby incorporated and adopted by reference.

- (a) "**Act**" means Part I of Chapter 9 of Title 12 of the Official Code of Georgia Annotated (O.C.G.A. Section [12-9-1](#), et seq.) "The Georgia Air Quality Act."
- (b) "**Air-cleaning device**" means any method, process or equipment which removes, reduces, or renders less noxious air contaminants discharged into the atmosphere.
- (c) "**Air contaminant**" means solid or liquid particulate matter, dust, fumes, gas, mist, smoke, or vapor, or any matter or substance either physical, chemical, biological, or radioactive <https://cdn.extendoffice.com/images/stories/doc-word/delete-multiple-pages/doc-delete-multiple-pages-2.png>(including source material, special nuclear material, and by-product material); or any combination of any of the above.

- (d) "**Air pollution**" means the presence in the outdoor atmosphere of one or more air contaminants.
- (e) "**Black liquor solids**" means the dry weight of the solids that enter the recovery furnace in the black liquor.
- (f) "**CFR**" means the "Code of Federal Regulations."
- (g) "**Capacity factor**" means the ratio of the average load on a machine or equipment for the period of time considered, to the design capacity rating of the machine or equipment.
- (h) "**Capture system**" means the equipment (including hoods, ducts, fans, etc.) used to contain, capture, or transport a pollutant to an air-cleaning device.
- (i) "**Coating applicator**" means an apparatus used to apply a surface coating.
- (j) "**Coating line**" means one or more apparatus or operations which include a coating applicator, flash-off area, and oven wherein a surface coating is applied, dried, or cured.
- (k) "**Conditions beyond the control of**" shall mean only those conditions which, though ordinary diligence be employed, remain unforeseeable, or unpredictable, such as, strikes, walkouts, or other industrial disturbances acts of God, civil disturbances, embargoes, or other causes of like character provided, however, that this term shall not include conditions solely because they are dependent upon contingencies, that is, conditions such as but not limited to, the variable cost or availability of maintenance, equipment, labor, raw materials, fuel or energy.
- (l) "**Construction**" means any fabrication, erection or installation. The term "construction" includes any modification as defined in Section (pp).
- (m) "**Cross recovery furnace**" means a furnace used to recover chemicals consisting primarily of sodium and sulfur compounds by burning black liquor which, on a quarterly basis, contains more than seven (7) weight percent of the total pulp solids from a soda-based semi-chemical pulping process.
- (n) "**Day**" means a 24-hour period beginning at midnight or such other 24-hour period as agreed by the Director.
- (o) "**Department**" means the Department of Natural Resources of the State of Georgia.
- (p) "**Digester system**" means each continuous digester or each batch digester used for the coating of wood in white liquor, and associated flask tank(s), blow tank(s), ship steamer(s), and condenser(s).
- (q) "**Director**" means the Director of the Division of Environmental Protection, Department of Natural Resources of the State of Georgia, or his designee.

- (r) **"Division"** means the Environmental Protection Division of the Department of Natural Resources, State of Georgia.
- (s) **"Dust"** means minute solid particles caused to be suspended in air by natural forces or by mechanical processes such as but not limited to crushing, grinding, milling, drilling, demolishing, shoveling, conveying, covering, bagging, mixing, sweeping, digging, scooping, and grading.
- (t) **"EPA"** means the United States Environmental Protection Agency.
- (u) **"Emission" or "emitting"** means any discharging, giving off, sending forth, placing, dispensing, scattering, issuing, circulating, releasing or any other emanation of any air contaminant or contaminants into the atmosphere.
- (v) **The terms "Emission limitation" and "Emission standard"** means a requirement established which limits the quantity, rate, or concentration of emissions of air contaminants on a continuous basis including any requirement relating to the equipment or operation or maintenance of a source to assure continuous emission reduction.
- (w) **"Excessive emissions"** means emissions of an air pollutant in excess of an emission standard.
- (x) **"Flashoff area"** means the space between the application area and the oven.
- (y) **"Fluo-solids calciner"** means a unit other than a lime kiln used to calcine lime mud, which consist primarily of calcium carbonate, into quicklime, which is primarily calcium oxide. For the purpose of these regulations, all references or emission standards applicable to lime kilns shall also apply to fluo-solids calciners.
- (z) **"Fly ash"** means particulate matter capable of being gasborne or airborne and consisting essentially of fused ash or other burned or unburned materials resulting from a process of combustion of fuel or solid waste.
- (aa) **"Fossil fuel-fired steam generator"** means a furnace or boiler used in the process of burning a fossil fuel for the primary purpose of producing steam by heat transfer.
- (bb) **"Foundry cupola"** means a stack-type furnace used for melting of metals, consisting of, but not limited to, furnace proper, tuyeres, fans or blowers, tapping spout, charging equipment, gas cleaning devices and other auxiliaries.
- (cc) **"Fuel-burning equipment"** means equipment the primary purpose of which is the production of thermal energy from the combustion of any fuel. Such equipment is generally that used for, but not limited to, heating water, generating or super heating steam, heating air as in warm air furnaces, furnishing process heat indirectly, through transfer by fluids or transmissions through process vessel walls.

- (dd) "**Fugitive dust**" means solid airborne particulate matter emitted from any source other than through a stack, vent, or chimney.
- (ee) "**General permit**" means a Permit by Rule or a Generic Permit established in or under the Georgia Rules for Air Quality Control covering numerous similar sources.
- (ff) "**Generic permit**" means a General permit issued by the Director covering numerous similar sources.
- (gg) "**Hydrocarbon**" means any organic compound consisting predominantly of carbon and hydrogen.
- (hh) "**Incinerators**" means all devices intended or used for the reduction or destruction of solid, liquid, or gaseous waste by burning.
- (ii) "**Intermediate vapor control system**" means a vapor control system that employs an intermediate vapor holder to accumulate vapors displaced from tanks during filling. The control device treats the accumulated vapors only during automatically controlled cycles.
- (jj) "**Jobbing foundry**" means any foundry where the operation is run intermittently and for that length of time necessary to pour molds on a job-to-job basis.
- (kk) "**Kraft pulp mill**" means any stationary source which produces pulp from wood by cooking (digesting) wood chips in a water solution of sodium hydroxide and sodium sulfide (white liquor) at high temperature and pressure. Regeneration of the cooking chemicals through a recovery process is also considered part of the kraft pulp mill.
- (ll) "**Lime kiln**" means a unit used to calcine lime and, which consists primarily of calcium carbonate, into quicklime, which is calcium oxide.
- (mm) "**Loading rack**" means any aggregation or combination of gasoline loading equipment arranged so that all loading outlets in the combination can be connected to a tank truck or trailer parked in a specified loading space.
- (nn) "**Malfunction**" means mechanical and/or electrical failure of a process, or of air pollution control process or equipment, resulting in operation in an abnormal or unusual manner.
- (oo) "**Manager**" means the administrator of the small business stationary source technical and environmental compliance assistance program. The manager may be referred to as the ombudsman.
- (pp) **The term "modification"** means any change in or alteration of fuels, processes, operation or equipment, (including any chemical changes in processes or fuels) which affects the amount or character of any air pollutant emitted or which results in the emission of any air pollutant not previously emitted. [No source shall, by reason of a change which decreases emissions, become subject to the New Source Performance

Standards [42 U.S.C. Sec. 7411](#), unless required by the Federal Act. This definition does not apply where the word "modification" is used to refer to action by the Director, Division, or Board, in modifying or changing rules, regulations, orders, or permits. In that context the word has its ordinary meaning.] The following operations are not considered modifications under this definition:

1. routine maintenance, repair, and replacement.
2. an increase in production rate (not to exceed maximum production rate stated in a pertinent application), if that increase can be accomplished without a capital expenditure, unless that increase is prohibited by a permit condition.
3. an increase in the hours of operation unless that increase is prohibited by a permit condition.
4. the use of an alternative fuel or raw material that the source is designed to accommodate. A source shall be considered to be designed to accommodate an alternative fuel or raw material if that use could be accomplished under the facility's construction specifications prior to the change and that use is allowed under a current air quality permit.

(qq) **"Multiple chamber incinerator"** means any article, machine, equipment, or contrivance which is used for the reduction or destruction of solid, liquid, or gaseous waste by burning and consists of a series of three or more combustion chambers physically separated by refractory walls, interconnected by gas passages or ducts, and lined with refractories having a pyrometric cone equivalent of at least 31, tested according to ASTM Method C-24, and is designed for efficient combustion of the type and volume of material to be burned.

(rr) **"Multiple-effective evaporator system"** means the multiple-effect evaporators and associated condenser(s) and hotwell(s) used to concentrate the spent cooking liquid that is separate from the pulp (black liquor).

(ss) **"Opacity"** means the degree to which emissions reduce the transmission of light and obscure the view of an object in the background, and is expressed in terms of percent opacity. As used in these Regulations, the measurement of percent opacity does not include the measurement of the obscuration of view due to uncombined water droplets. Any determination of the percent opacity shall be made by the arithmetic average of six minutes of data. With respect to the determination of percent opacity, the six minute average shall be based on either an average of 24 or more opacity data points equally spaced over a six minute period or an integrated average of continuous opacity data over a six minute period. The six minute period for continuous opacity monitors shall be considered to be any one of ten equal parts of a one hour period commencing on the hour. Any visual observation or determination of opacity taken for the purpose of determining compliance with any requirement of this Chapter 391-3-1 shall be made by personnel certified according to procedures established for such certification by the Division or by EPA to make such observation or determination.

- (tt) **"Open-burning"** means any outdoor fire from which the products of combustion are emitted directly into the open air without passing through a stack, chimney or duct.
- (uu) **"Organic material"** means a chemical compound of carbon excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate.
- (vv) **"Oven"** means a chamber within which heat is used to bake, cure, polymerize, or dry a surface coating.
- (ww) **"Part 70 permit"** means a Title V operating permit issued by the Director under [391-3-1-.03\(10\)](#) for a facility subject to 40 CFR Part 70 requirements.
- (xx) **"Particulate matter"** means any airborne, finely divided solid or liquid material with an aerodynamic diameter smaller than 100 micrometers.
- (yy) **"Particulate matter emissions"** means all finely divided solid or liquid material, other than uncombined water, emitted to the ambient air as measured by applicable reference methods, or an equivalent or alternate method, established by the U.S. EPA. Whenever the term "Particulate Emissions" is used in these rules, it shall have the same meaning as "Particulate Matter Emissions."
- (zz) **"Permit-by-rule"** means a General permit established in the Georgia Rules for Air Quality Control [[391-3-1-.03\(11\)](#)] covering numerous similar sources.
- (aaa) **The term "person"** includes any individual, corporation, partnership, association, State, municipality, political subdivision of a State, and any agency, department, or instrumentality of the United States, or any other entity, and includes any officer, agent, or employee of any of the above.
- (bbb) **"PM₁₀"** means particulate matter with an aerodynamic diameter less than or equal to a nominal ten micrometers as measured by a reference method based on Appendix J of 40 CFR Part 50 and designated in accordance with 40 CFR Part 53 or by an equivalent method designated by the U.S. EPA.
- (ccc) **"PM₁₀ emissions"** means finely divided solid or liquid material, with an aerodynamic diameter less than or equal to a nominal ten micrometers emitted to the ambient air as measured by applicable reference methods, or an equivalent or alternate method, established by the U.S. EPA.
- (ddd) **"Potential to emit"** means the maximum capacity of a stationary source to emit any regulated air pollutant under its physical and operational design. Any physical and operational limitation on the capacity of the source to emit a regulated air pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is legally and

practically enforceable. Secondary emissions do not count in determining the potential to emit of a stationary source.

- (eee) **"Prime coat"** means the first film of coating applied in a multicoat operation.
- (fff) **"Process equipment"** means any equipment, device or contrivance for changing, melting, storing, handling, or altering chemically or physically any material, the use or existence of which may cause any discharge of air contaminants into the open air, but excluding that equipment defined herein as "Fuel-Burning Equipment."
- (ggg) **"Process input weight rate"** means a rate established as follows:
1. For continuous or long-run, steady-state source operations, the total process weight for the entire period of continuous operation or for a typical portion thereof, divided by the number of hours of such period.
 2. For cyclical or batch source operations, the total process weight for a period that covers a complete operation or an integral number of cycles, divided by the hours of actual process operation during such a period.
 3. Where the nature of any process or operation or the design of any equipment is such as to permit more than one interpretation of this definition, the interpretation that results in the minimum value for allowable emission shall apply. When recycled material is handled by the process equipment, it shall be included in the total process weight. Moisture shall not be considered as a part of process weight.
- (hhh) **"Recovery furnace"** means either a straight kraft recovery furnace or a cross recovery furnace, and includes the direct-contact evaporator for a direct-contact furnace.
- (iii) **"Reid vapor pressure"** means the absolute vapor pressure of volatile crude oil and volatile nonviscous petroleum liquids except liquefied petroleum gases as determined by American Society for Testing and Materials, Part 17, 1973, D-323-82 (Reapproved 1987).
- (jjj) **"Shutdown"** means the cessation of the operation of a source or facility for any purpose.
- (kkk) **"Small Business Compliance Advisory Panel"** means the small business stationary source technical and environmental compliance advisory panel created by Code Section [12-9-25](#).
- (lll) **"Small business stationary source or facility"** means an entity that:
1. Is owned or operated by a person employing 100 or fewer individuals;
 2. Is a small business under the federal Small Business Act;

3. Is not a major stationary source as defined in Titles I and III of the Clean Air Act;
4. Does not emit 50 tons or more per year of any regulated pollutant; and
5. Emits less than 75 tons/year of all regulated pollutants.

- (mmm) "**Small business stationary source technical and environmental compliance assistance program**" means a program established within the Department of Natural Resources.
- (nnn) "**Smelt dissolving tank**" means a vessel used for dissolving the smelt collected from the recovery furnace.
- (ooo) "**Smoke**" means small gas-borne particles resulting from incomplete combustion, consisting predominantly of carbon, ash and other combustible materials, that form a visible plume.
- (ppp) "**Soda-based semichemical pulping operation**" means any operation in which pulp is produced from wood by cooking (digesting) wood chips in a soda-based semichemical pulping solution followed by mechanical defibrating (grinding).
- (qqq) "**Solvent**" means organic materials which are liquid at standard conditions and which are used as solvers, viscosity reducers, or cleaning agents.
- (rrr) "**Soot**" means agglomerated particles consisting mainly of carbonaceous material.
- (sss) "**Source**" or "**facility**" means any property, source, facility, building, structure, location, or installation at, from, or by reason of which emissions or air contaminants are or may reasonably be expected to be emitted into the atmosphere. Such terms included both real and personal property, stationary and mobile sources or facilities, and direct and indirect sources or facilities, without regard to ownership, and both public or private property. An "indirect" source or facility is a source or facility which attracts or tends to attract activity that results in emissions of any air pollutant for which there is an ambient air standard.
- (ttt) "**Special circumstances**" shall mean only such circumstances as are caused by special physical conditions or causes and are unique or peculiar to a pollution source.
- (uuu) "**Special physical conditions or causes**" shall mean only those physical conditions or causes which are intrinsically related to the process, giving rise to a pollutant, the equipment used in such process, or the structure housing such equipment, and such term shall in no case include external conditions such as (1) the ambient air quality in the locale, area or region of the pollution source, or (2) the cost or availability of raw materials, including fuel or energy, used in the process.

- (vvv) "**Stack**" means any point in a source designed to emit solids, liquids, or gasses into the air, including a pipe or duct but not including flares.
- (www) "**Stack in existence**" means that the owner or operator had (1) begun, or caused to begin, a continuous program of physical on-site construction of the stack or (2) entered into binding agreements or contractual obligations, which could not be canceled or modified without substantial loss to the owner or operator, to undertake a program of construction of the stack to be completed within a reasonable time.
- (xxx) "**Stack height**" means the physical height of a flue, chimney, vent or other point of pollutant discharge above ground level.
- (yyy) "**Standard conditions**" means a temperature of 20°C (68°F) and pressure of 760 millimeters of mercury (29.92 inches of mercury).
- (zzz) "**Startup**" means the commencement of operation of any source.
- (aaaa) "**Stationary source**" means any source or facility emitting, either directly or indirectly, from a fixed location.
- (bbbb) "**Straight kraft recovery furnace**" means a furnace used to recover chemicals consisting primarily of sodium and sulfur compounds by burning black liquor which on a quarterly basis contains seven (7) weight percent or less of the total pulp solids from a soda-based semichemical pulping process.
- (cccc) "**Synthetic minor permit**" means a Permit issued to a facility which imposes limits that are federally enforceable or enforceable as a practical matter in order to restrict potential emissions to below major source thresholds.
- (dddd) "**Topcoat**" means the final film of coating applied in a multiple coat operation.
- (eeee) "**Total reduced sulfur (TRS)**" means the sum of the sulfur compounds hydrogen sulfide, methyl mercaptan, dimethyl sulfide, and dimethyl disulfide, that are released during the Kraft pulping operation and measured by EPA Method 16 (40 CFR 60).
- (ffff) "**Total suspended particulates**" means particulate matter as measured by the method described in Appendix B of 40 CFR Part 50.
- (gggg) "**True vapor pressure**" means the equilibrium partial pressure exerted by a petroleum liquid as determined in accordance with methods described in American Petroleum Institute Bulletin, 2597, "Evaporation Loss from Floating Roof Tanks," 1962.
- (hhhh) "**Vapor**" means the gaseous form of a substance.

- (iii) **"Vapor collection system"** means a vapor transport system which used direct displacement by the liquid loaded to force vapors from the tank into a vapor control system.
- (jjj) **"Vapor control system"** means a system that prevents release to the atmosphere of at least 90 percent by weight of organic compounds in the vapors displaced from a tank during the transfer of gasoline.
- (kkkk) **"Visible emissions"** means any emission which is capable of being perceived visually.
- (III) **"Volatile organic compound"** (also denoted as VOC) means any organic compound which participates in atmospheric photochemical reactions; that is, any organic compound other than those which the Administrator of the U.S. Environmental Protection Agency designates as having negligible photochemical reactivity, including: carbon monoxide; carbon dioxide; carbonic acid; metallic carbides or carbonates; ammonium carbonate; methane; ethane; 1,1,1-trichloroethane (methyl chloroform); methylene chloride (dichloromethane); trichlorofluoromethane (CFC-11); dichlorodifluoromethane (CFC-12); chlorodifluoromethane (HCFC-22); trifluoromethane (HFC-23); 1,1,2-trichloro-1,2,2-trifluoroethane (CFC-113); 1,2-dichloro 1,1,2,2-tetrafluoroethane (CFC-114); chloropentafluoroethane (CFC-115); 1,1,1-trifluoro 2,2-dichloroethane (HCFC-123); 2-chloro-1,1,1,2-tetrafluoroethane (HCFC-124); pentafluoroethane (HFC-125); 1,1,2,2-tetrafluoroethane (HFC-134); 1,1,1,2-tetrafluoroethane (HFC-134a); 1,1-dichloro 1-fluoroethane (HCFC-141b); 1-chloro 1,1-difluoroethane (HCFC-142b); 1,1,1-trifluoroethane (HFC-143a); 1,1-difluoroethane (HFC-152a); parachlorobenzotrifluoride (PCBTF); cyclic, branched, or linear completely methylated siloxanes; acetone; perchloroethylene (tetrachloroethylene); 3,3-dichloro-1,1,1,2,2-pentafluoropropane (HCFC-225ca); 1,3-dichloro-1,1,2,2,3-pentafluoropropane (HCFC-225cb); 1,1,1,2,3,4,4,5,5,5-decafluoropentane (HFC-43-10mee); difluoromethane (HFC-32); ethylfluoride (HFC-161); 1,1,1,3,3,3-hexafluoropropane (HFC-236fa); 1,1,2,2,3-pentafluoropropane (HFC-245ca); 1,1,2,3,3-pentafluoropropane (HFC-245ea); 1,1,1,2,3-pentafluoropropane (HFC-245eb); 1,1,1,3,3-pentafluoropropane (HFC-245fa); 1,1,1,2,3,3-hexafluoropropane (HFC-236ea); 1,1,1,3,3-pentafluorobutane (HFC-365mfc); chlorofluoromethane (HCFC-31); 1-chloro-1-fluoroethane (HCFC-151a); 1,2-dichloro-1,1,2-trifluoroethane (HCFC-123a); 1,1,1,2,2,3,3,4,4-nonafluoro-4-methoxy-butane (C₄F₉OCH₃ or HFE-7100); 2-(difluoromethoxymethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF₃)₂CFCF₂OCH₃); 1-ethoxy-1,1,2,2,3,3,4,4,4-nonafluorobutane (C₄F₉OC₂H₅ or HFE-7200); 2-(ethoxydifluoromethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF₃)₂CFCF₂OC₂H₅); methyl acetate; 1,1,1,2,2,3,3-heptafluoro-3-methoxy-propane (n-C₃F₇OCH₃, HFE-7000); 3-ethoxy-1,1,1,2,3,4,4,5,5,6,6,6-dodecafluoro-2-(trifluoromethyl) hexane (HFE-7500); 1,1,1,2,3,3,3-heptafluoropropane (HFC 227ea); methyl formate (HCOOCH₃); t-butyl acetate; 1,1,1,2,2,3,4,5,5,5-decafluoro-3-methoxy-4-trifluoromethyl-pentane (HFE-7300), propylene carbonate, dimethyl carbonate, *trans*-1,3,3,3-tetrafluoropropene; HCF₂OCF₂H (HFE-134); HCF₂OCF₂OCF₂H (HFE-236cal2); HCF₂OCF₂CF₂OCF₂H (HFE-338pcc13); HCF₂OCF₂OCF₂CF₂OCF₂H (H-

Galden 1040x or H-Galden ZT 130 (or 150 or 180)); *trans* 1-chloro-3,3,3-trifluoroprop-1-ene; 2,3,3,3-tetrafluoropropene; 2-amino-2-methyl-1-propanol (AMP); 1,1,2,2-Tetrafluoro -1-(2,2,2-trifluoroethoxy) ethane; cis-1,1,1,4,4,4- hexafluorobut-2-ene (HFO-1336mzz-Z); and perfluorocarbon compounds which fall into these classes:

1. Cyclic, branched, or linear, completely fluorinated alkanes;
2. Cyclic, branched, or linear, completed fluorinated ethers, with no unsaturations;
3. Cyclic, branched, or linear, completely fluorinated tertiary-amines with no unsaturations;
4. Sulfur containing perfluorocarbons with no unsaturations and with sulfur bonds only to carbon and fluorine; and
5. VOC may be measured by the referenced method, an equivalent method, an alternate method or by procedures specified under 40 CFR Part 60. A referenced method, an equivalent method, or an alternate method, however, may also measure non-reactive organic compounds. In such cases, an owner or operator may exclude the non-reactive organic compound when determining compliance with a standard.

(mmmm) "**Hazardous air pollutant**" (also denoted as HAP) means any air pollutant listed in or pursuant to section 112(b) of the Federal Clean Air Act, and as amended by 40 CFR Part 63, Subpart C.

(nnnn) "**Procedures for Testing and Monitoring Sources of Air Pollutants**" or "PTM" means the Georgia Department of Natural Resources **Procedures for Testing and Monitoring Sources of Air Pollutants** dated January 31, 2021.

(oooo) "**Banking**" means a system for quantifying, recording, storing and preserving Emission Reduction Credits for use or transfer at a later date.

(pppp) "**Emission reduction credit**" means a unit of reduction in actual emissions of either nitrogen oxides or VOC, expressed in tons per year that has been certified by the Director in accordance with Section [391-3-1-.03\(13\)](#) of these Rules.

(qqqq) "**Pollution control project**" (PCP) means an environmentally beneficial activity, set of work practices or project undertaken at an existing emissions unit that reduces emissions of air pollutants from such unit as listed below, provided that any associated collateral emissions increase is less than the thresholds listed in subparagraphs [391-3-1-.03\(6\)\(i\)3.\(i\)-\(v\)](#). Such qualifying activities or projects can include the replacement or upgrade of an existing emissions control technology with a more effective unit. Other changes that may occur at the source are not considered part of the PCP if they are not necessary to reduce emissions through the PCP. The replacement or reconstruction of an entire existing emissions unit with a newer or different one does not qualify as a PCP. Projects listed in subparagraphs (qqqq)1. and

2. of this subparagraph are presumed to be environmentally beneficial and qualify as a PCP. The Director has the authority to rebut the presumption that projects listed in subparagraphs (qqq)1. and 2. are environmentally beneficial if the Division determines that a particular proposed PCP project would be improperly applied or site-specific factors indicate that the project's application would not be environmentally beneficial.

1. Electrostatic precipitators, baghouses, high-efficiency multiclones, or scrubbers for control of particulate matter or other air contaminants.
2. Regenerative thermal oxidizers, catalytic oxidizers, condensers, thermal incinerators, hydrocarbon combustion flares, biofiltration, absorbers and adsorbers, and floating roofs for storage vessels for control of volatile organic compounds or hazardous air pollutants. For the purpose of this section, "hydrocarbon combustion flare" means either a flare used to comply with an applicable New Source Performance Standard (NSPS) or Maximum Available Control Technology (MACT) standard (including uses of flares during startup, shutdown, or malfunction permitted under such a standard), or a flare that serves to control emissions of waste streams comprised predominately of hydrocarbons and containing no more than 230 mg/dscm hydrogen sulfide.

(rrrr) **"PM_{2.5}" or "Fine Particulate Matter"** means particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers as measured by a reference method based on Appendix L of 40 CFR Part 50 and designated in accordance with 40 CFR Part 53 by an equivalent method.

(ssss) **"PM_{2.5} Emissions"** means finely divided solid or liquid material, with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers emitted to the ambient air as measured by applicable reference methods or an equivalent or alternate method established by the U.S. EPA.

Rule 391-3-1-.02. Provisions. Amended.

(1) General Requirement.

No person shall construct or operate any facility from which air contaminants are or may be emitted in such a manner as to fail to comply with:

- (a) **Any applicable** standard of performance or other requirements established by EPA pursuant to Section 111 of the Federal Act;
- (b) **Any applicable** emission standard or other requirement for a hazardous air pollutant established by EPA pursuant to Section 112 of the Federal Act;

- (c) **Any applicable** increment, precondition for permit, or other requirement established for the Prevention of Significant Deterioration pursuant to Part C, Title I of the Federal Act; and
- (d) **Any applicable** standard, precondition for permit, or other requirement established for sources in areas designated by the Director as being non attainment with National Ambient Air Quality Standards pursuant to, or as part of Georgia's State Implementation Plan to meet the requirements of, Part D, Title I of the Federal Act.

(2) **Emission Limitations and Standards.**

(a) **General Provisions.**

1. No person owning, leasing or controlling the operation of any air contaminant sources shall willfully, negligently or through failure to provide necessary equipment or facilities or to take necessary precautions, cause, permit, or allow the emission from said air contamination source or sources of such quantities of air contaminants as will cause, or tend to cause, by themselves or in conjunction with other air contaminants a condition of air pollution in quantities or characteristics or of a duration which is injurious or which unreasonably interferes with the enjoyment of life or use of property in such area of the State as is affected thereby. Complying with any of the other paragraphs of these rules and regulations or any subparagraphs thereof, shall in no way exempt a person from this provision.
2. In cases where more than one paragraph of these regulations applies, the paragraph allowing the least emission of air contaminants to the atmosphere shall prevail.
3. Notwithstanding any other emission limitation or other requirement provided in the regulations, more stringent emission limitations or other requirements may be required of a facility as deemed necessary by the Director to:
 - (i) meet any existing Federal laws or regulations; or
 - (ii) safeguard the public health, safety and welfare of the people of the State of Georgia.
4. Notwithstanding any other requirement of this Chapter, in no event shall that part of a stack which came into existence after December 31, 1970, which exceeds good engineering practice stack height or any other dispersion technique, be taken into account for the purpose of determining the degree of emission limitations required for control of any pollutant for which there is an ambient air standard established under the Act of the

Federal Act. The terms and definitions of "dispersion techniques", "good engineering practice (GEP)", "nearby" and "excessive concentration" are those definitions found in 40 CFR 51.100(hh), (ii), (jj) and (kk) respectively.

5. If the Director finds, after notice and opportunity for public hearing that a particular instance of violation or noncompliance by a source, owner, or operator, with any emission limitation or standard or other requirement under the Act, is de minimis (as defined pursuant to 42 U.S.C. Section 7420 as amended) in nature, and duration, he may, as allowed by the Act and the Federal Act, exempt such source, owner or operator from the noncompliance penalties provided in Section 22 of the Act.
6. VOC Emission Standards, Exemptions, Area Designations, Compliance Schedules and Compliance Determinations.
 - (i) Exemptions and Area Designations.
 - (I) Sources located outside Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale counties whose potential emissions of volatile organic compounds are not more than 100 tons per year shall not be subject to subparagraphs (u), (v), (x), (aa) through (ff) [inclusive], (hh), (kk), (ll), (nn), and (qq) of this paragraph 391-3-1-.02(2).
 - (II) Sources used exclusively for chemical or physical analysis or determination of product quality and commercial acceptance shall not be subject to subparagraphs (t) through (ff) [inclusive], (hh) through (nn) [inclusive], (qq), and (tt) of this paragraph 391-3-1-.02(2), provided:
 - I. The operation of the source is not an integral part of the production process; and provided;
 - II. The emissions from the source do not exceed 800 pounds in any calendar month; and provided;
 - III. The exemption from such source is approved in writing by the Director.
 - (III) Sources located within Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, or Rockdale counties whose actual emissions of volatile organic compounds are less than 15 pounds per day shall not be subject to subparagraphs (u), (v), (x), (aa)

through (ff) [inclusive], (kk), (ll), and (qq) of this paragraphs 391-3-1-.02(2).

- (IV) Coatings, inks and other VOC-containing materials in use at sources of VOC emissions subject to any limitations or requirements of subparagraphs (t) through (aa) [inclusive], (ii), (jj), (mm), and (tt) of this paragraph 391-3-1-.02(2) shall not be subject to any requirements of such subparagraphs, provided the source's total aggregate use of such materials is not in excess of 55 gallons per year and such exemption is approved in writing by the Division.
 - (V) Sources located within Barrow, Bartow, Carroll, Hall, Newton, Spalding, or Walton Counties whose actual emissions of volatile organic compounds are greater than or equal to 15 pounds per day shall be subject to subparagraphs (u), (v), (x), (aa) through (ff) [inclusive], (hh), (kk), (ll), (nn), and (qq) of this paragraph 391-3-1-.02(2) effective January 1, 2015. The requirements of this subparagraph (V) will no longer be applicable if the counties specified in this subparagraph (V) are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in these counties or the counties specified in subparagraph (III) above, the requirements of this subparagraph (V) will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.
 - (VI) When determining applicability for a standard specified in this subparagraph 6.(i), only those emission sources that belong to the source category covered by each specific standard shall be included when compared against the applicability thresholds and provisions included in this subparagraph 6.(i).
- (ii) Compliance Schedules.
- (I) All sources of VOC emissions subject to any limitation or requirement of, or under, paragraph 391-3-1-.02(2) prior to the effective date of this amended Rule 391-3-1-.02, shall be in compliance or on an approved compliance schedule.

(iii) Compliance Determinations.

- (I) Compliance determinations for coatings expressed as pounds of VOC per gallon of coating, excluding water, shall treat organic compounds that are not defined as VOCs as water for purposes of calculating the "excluding water" part of the coating composition.

7. Excess Emissions.

- (i) Excess emissions resulting from startup, shutdown, malfunction of any source which occur though ordinary diligence is employed shall be allowed provided that (I) the best operational practices to minimize emissions are adhered to, and (II) all associated air pollution control equipment is operated in a manner consistent with good air pollution control practice for minimizing emissions and (III) the duration of excess emissions is minimized.
- (ii) Excess emissions which are caused entirely or in part by poor maintenance, poor operation, or any other equipment or process failure which may reasonably be prevented during startup, shutdown or malfunction are prohibited and are violations of this Chapter (391-3-1).
- (iii) The provisions of this paragraph 7. shall apply only to those sources which are not subject to any requirement under section (8) of this Rule (i.e. Rule 391-3-1-.02) or any requirement of 40 CFR, Part 60, as amended concerning New Source Performance Standards.

8. Emissions Bubbles.

- (i) With respect to the emissions standards and limitations contained in this Chapter 391-3-1, as such requirements are applied to more than one process or piece of equipment at a source or sources, the Director may allow to the extent consistent with the Act and with the Federal Act under such conditions as he deems appropriate, emissions bubbles provided that:
- (I) Such emissions bubbles will not interfere with the attainment and maintenance of ambient air quality standards as expeditiously as practical and does not result in any delay in compliance by any source beyond applicable deadline dates; and

- (II) Such emissions bubbles are equivalent in pollution reduction, enforceability, and air quality impact to those individual process or equipment emission limits of State or federal requirements applicable at the time of the bubble; and
 - (III) Such emissions bubbles are consistent and in full compliance with the requirements of 40 CFR 52.21 (PSD), 40 CFR 60 (New Source Performance Standards) and 40 CFR 61 (NESHAPS); and
 - (IV) All modeling utilized in evaluating the air quality impact of emissions bubbles shall be done in accordance with modeling procedures acceptable to the Division.
- (ii) Emissions bubbles involving different pollutants, types, temporary reductions, and increases of hazardous air pollutants are prohibited.
 - (iii) The affected source or facility which proposes the use of a bubble shall have the burden of demonstrating to the satisfaction of the Director, compliance with the requirements of this paragraph (2)(a)8.
 - (iv) For the purpose of this paragraph (2)(a)8. emissions bubbles let plants decrease pollution controls at one or more emission points in exchange for compensating increases in control at other emission points.

9. [reserved]

10. At all times, including periods of startup, shutdown, and malfunction, any person owning, leasing or controlling the operation of a stationary source shall maintain and operate such source, including associated air pollution control equipment, in a manner consistent with good air pollution control practice for minimizing emissions. Determination of whether acceptable operating and maintenance procedures are being used will be based on any information available to the Division which may include, but is not limited to, monitoring results, observations of the opacity or other characteristic of emissions, review of operating and maintenance procedures or records, and inspection or surveillance of the source.

11. Startup and Shutdown Emissions for SIP-Approved Rules

- (i) Upon the effective date of EPA's final approval of GA Rules Chapter 391-3-1-.02(2)(a)11. as published in the Federal Register, the provisions of subparagraph 11.(ii) apply in lieu of GA Rule Chapter 391-3-1-.02(2)(a)7.
- (ii) The provisions of this subparagraph 11.(ii) shall apply to all sources subject to emission limitations and standards in 391-3-1-.02(2)(b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (n), (p), (q), (r), (t), (u), (v), (w), (x), (y), (z), (aa), (bb), (cc), (dd), (ee), (ff), (gg), (hh), (ii), (jj), (kk), (ll), (mm), (nn), (oo), (pp), (qq), (rr), (ss), (tt), (uu), (vv), (yy), (ccc), (ddd), (eee), (fff), (hhh), (jjj), (kkk), (lll), (mmm), (nnn), (rrr), (vvv), (yyy), (zzz), (aaaa). The provisions of this subparagraph 11.(ii) shall also apply to emission limitations established in accordance with the new source review requirements in 391-3-1-.02(7)(b) and/or [391-3-1-.03\(8\)](#) unless startup and shutdown emissions have already been specifically addressed via a federally enforceable permit.

(I) Compliance Options

- I. Compliance with the emission limitations and standards identified in paragraph 391-3-1-.02(2)(a)11.(ii) shall be achieved by either Option A or B below:
 - A. Complying with the applicable emission limitations and standards at all times, including startup and shutdown; or
 - B. Complying with the applicable emission limitations and standards for emissions resulting from normal operations, and complying with applicable alternative work practice standards in subparagraphs (I)III., and either (I)IV., (I)V., or (I)VI. to address emissions resulting from startup and/or shutdown.
- II. Excessive emissions which are caused entirely or in part by poor maintenance, poor operation, or any other equipment or process failure which may reasonably be prevented during startup or shutdown are prohibited and are violations of this Chapter (391-3-1).

III. The owner or operator of a source that chooses to comply with alternative work practice standards for startup and shutdown shall maintain the following documentation for five years in a form suitable for inspection and submission to the Division. Required monitoring data (during all periods of operation) and the following documentation shall be maintained:

A. Contemporaneous operating logs or other relevant evidence that document:

(A) The date, time and duration of each period of startup or shutdown where an alternative work practice standard was the method of compliance;

(B) Any actions taken during each period of startup and shutdown, including which option ((ii)(I)IV., (ii)(I)V., or (ii)(I)VI.) is followed; and

(C) Manufacturer's specifications and instructions, fire prevention protocols, and safety protocols relied upon to demonstrate compliance with any alternative work practice standard and records documenting implementation of such.

IV. General Alternative Work Practice Standards Option. Process equipment and air pollution control devices used for compliance with applicable rules in paragraph 391-3-1-.02(2)11.(ii), shall be operated in a manner consistent with good air pollution control practice for minimizing emissions as follows:

A. General Work Practice Standard Part 1

Applicable air pollution control devices shall be started as expeditiously as possible, providing for process and control device limitations and providing for safety

constraints for protection of personnel and equipment and fire prevention and safety protocols such as provided by Black Liquor Recovery Boiler Advisory Committee (BLRBAC) or National Fire Protection Association (NFPA) codes. Documentation of such implementation of manufacturing specifications, fire protocols, and safety protocols shall be maintained, and;

B. General Work Practice Standard Part 2

During startup and shutdown periods, the owner or operator of a source shall comply with alternative work practice standards (A) through (M) below, as applicable, for fuel burning sources and pollution control devices installed by the owner or operator to meet an emission limitation referenced in paragraph 391-3-1-.02(2)(a) 11.(ii), as applicable:

- (A) Baghouses shall be operated, except as provided in (H) for fuel burning equipment, and except as specified by the manufacturer or as required by the fire prevention or safety protocols, unless the inlet gas temperature is below the dewpoint, outside the manufacturer's recommended operating temperature range, or if the pressure differential across the baghouse exceeds the manufacturer's recommended maximum pressure differential.
- (B) Biofilters shall be operated, except as specified by the manufacturer or as required by the fire prevention or safety protocols.

- (C) Carbon Adsorption Beds shall be operated, except as specified by the manufacturer or as required by the fire prevention or safety protocols.
- (D) Condensers shall be operated, except as specified by the manufacturer or as required by fire prevention or safety protocols.
- (E) Cyclones shall be operated, except as provided in (H) for fuel burning equipment, and except as specified by the manufacturer or as required by fire prevention or safety protocols.
- (F) Electrostatic precipitators (ESP) shall be operated, except as provided in (H) for fuel burning equipment, and except as specified by the manufacturer or as required by fire prevention or safety protocols.
- (G) Exhaust streams routed from one process to another process for thermal incineration, the control process shall be operated except as specified by the manufacturer or as required by fire prevention or safety protocols.
- (H) Fuel burning sources shall burn, during startup and shutdown periods, a "clean fuel" as listed in item 5b. of Table 3 to 40 CFR Part 63 Subpart DDDDD, or the cleanest fuel the unit is permitted to burn, as practicable. Particulate matter, sulfur dioxide, and acid gas control equipment need not operate while associated fuel burning equipment is firing natural gas,

propane, distillate oil, or combinations thereof exclusively during startup or shutdown.

- (I) Selective catalytic reduction (SCR) shall be operated, except as specified by the manufacturer or as required by the fire prevention or safety protocols, if the catalyst inlet temperature is greater than 600°F, or as specified by manufacturer.
- (J) Selective non-catalytic reduction (SNCR) shall be operated, except as specified by the manufacturer or as required by the fire prevention or safety protocols, when the reaction zone temperature is above 1600°F, or as specified by manufacturer.
- (K) Scrubbers shall be operated, except as provided in (H) for fuel burning equipment, and except as specified by the manufacturer or as required by the fire prevention or safety protocols.
- (L) Sorbent injection systems (e.g. carbon, zeolite, lime, trona etc.), shall be operated, except as provided in (H) for fuel burning equipment, and except as specified by the manufacturer or as required by the fire prevention or safety protocols, when the exhaust gas stream temperature at the point of injection is greater than 300°F and exhaust gas velocity at the injection point exceeds 25 feet per second based on measurement or operating parameters.

(M) Thermal oxidizer devices (including, but not limited to, catalytic, regenerative, and recuperative systems) shall be operated, except as required by the manufacturer or in documented fire prevention or safety protocols.

V. Similar Process Equipment Alternative Work Practice Standards Option. In lieu of following the General Alternative Work Practice Standards Option in paragraph (ii)(I)IV. above, the owner or operator of a source may follow the startup and shutdown work practice standards in Federal rules included in 40 CFR Part 60 or 40 CFR Part 63 that address compliance during startup and shutdown operations for subject equipment or equipment that would be subject to the Federal rule except for rule applicability exemptions (e.g. construction date), provided that the rule contains specific work practice standards for startup and shutdown periods. These rules are adopted by Georgia as 391-3-1-.02(8) and (9). For example, coal-fired utilities may use 40 CFR 63 Subpart UUUUU (MATS rule) startup and shutdown work practice standard to comply with Georgia Rules 391-3-1-.02(2)(b) and (d).

VI. In lieu of following the startup and shutdown alternative work practices in subparagraphs (ii)(I)IV. or (ii)(I)V. above, the owner or operator of a source may comply with a source specific alternative work practice standard for startup and shutdown periods that has been incorporated into a federally enforceable operating permit. Any application to incorporate such work practice standards shall include, at a minimum, the following considerations:

A. The request is specific to the source and control device, if applicable;

- B. Demonstration that compliance with the emissions limitation during startup or shutdown is infeasible, impracticable or unsafe;
- C. The proposed alternative work practice standard is designed to minimize emissions during startup or shutdown periods, to the extent practicable;
- D. The proposed alternative work practice standard should require that the source is operated in a manner consistent with good practice for minimizing emissions through planning, design, and operating procedures; and
- E. The proposed alternative work practice standard includes provisions for monitoring and/or recordkeeping of the operator's actions during startup and shutdown to ensure practical enforceability of the proposed work practices.
- F. Such requests shall be made through the application for a permit, permit modification, or permit renewal pursuant to the permit application requirements in [391-3-1-.03](#). The public notice requirements specified in [391-3-1-.03\(2\)\(i\)](#) shall be followed for all proposed alternative work practice standards in non-Title V permits. Public notice requirements specified in [391-3-1-.03\(10\)\(e\)8.](#) and [391-3-1-.03\(10\)\(f\)1.](#) shall be followed for all proposed alternative work practice standards in Title V permits.

(iii) Paragraph 391-3-1-.02(2)(a)11.(ii) becomes void if the June 12, 2015 publication (80 FR 33839) *State Implementation Plans: Response to Petition for Rulemaking; Restatement and Update of EPA's SSM Policy Applicable to SIPs; Findings of Substantial*

Inadequacy; and SIP Calls to Amend Provisions Applying to Excess Emissions During Periods of Startup, Shutdown, and Malfunction is:

- (I) Declared or adjudged to be invalid or unconstitutional or stayed by the United States Court of Appeals for the Eleventh Circuit, the District of Columbia Circuit, or the United States Supreme Court; or
- (II) Withdrawn, repealed, revoked, or otherwise rendered of no force and effect by the United States Environmental Protection Agency, Congress, or Presidential Executive Order.

12. Malfunction Emissions

(i) Upon the effective date of EPA's final approval of GA Rule Chapter 391-3-1-.02(2)(a)12.(i) and (ii) as published in the Federal Register, the provisions of this paragraph 12. shall apply in lieu of paragraph 7. to all sources subject to emission limitations and standards in 391-3-1-.02(2)(b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (n), (p), (q), (r), (t), (u), (v), (w), (x), (y), (z), (aa), (bb), (cc), (dd), (ee), (ff), (gg), (hh), (ii), (jj), (kk), (ll), (mm), (nn), (oo), (pp), (qq), (rr), (ss), (tt), (uu), (vv), (yy), (ccc), (ddd), (eee), (fff), (hhh), (jjj), (kkk), (lll), (mmm), (nnn), (rrr), (vvv), (yyy), (zzz), (aaaa). This paragraph 12. also applies to emission limitations established in accordance with the new source review requirements in 391-3-1-.02(7)(b) and/or [391-3-1-.03\(8\)](#) unless malfunction emissions have already been specifically addressed via a federally enforceable permit.

(ii) Compliance Options

- (I) Compliance with the emission limitations and standards identified in paragraph 391-3-1-.02(2)(a)12.(i) shall be achieved by either:
 - I. Complying with the applicable emission limitations and standards at all times, including periods of malfunction or
 - II. Complying with the applicable emission limitations and standards for emissions resulting from normal operation, and complying with a source specific malfunction work practice standard approved into a

federally enforceable air quality operating permit to address emissions resulting from malfunction.

- (II) Excessive emissions which are caused entirely or in part by poor maintenance, poor operation, or any other equipment or process failure which may reasonably be prevented during malfunction are prohibited and are violations of this Chapter (391-3-1).
- (III) The owner or operator of a source that chooses to comply with a source specific malfunction work practice standard approved into a federally enforceable operating permit shall maintain the following documentation for five years in a form suitable for inspection and submission to the Division. Required monitoring data (during all periods of operation) and the following documentation shall be maintained:
 - I. Contemporaneous operating logs or other relevant evidence that document:
 - A. The date, time and duration of each period of malfunction where an approved source specific malfunction work practice standard was the method of compliance;
 - B. Any actions taken during each period of malfunction; and
 - C. Manufacturer's specifications and instructions, fire prevention protocols, and safety protocols relied upon to demonstrate compliance with any source specific malfunction work practice standard and records documenting implementation of the manufacturer specifications and fire prevention safety protocols.
- (IV) The owner or operator of a source may comply with a source specific malfunction work practice standard for malfunction periods that has been incorporated into a

federally enforceable operating permit. The request shall also include, as a minimum the following considerations:

- I. The work practice standard shall minimize emissions during the malfunction event and be designed to minimize the malfunction duration.
- II. Such requests shall be made through the application for a permit, permit modification, or permit renewal pursuant to the permit application requirements in [391-3-1-.03](#). The public notice requirements specified in [391-3-1-.03\(2\)\(i\)](#) shall be followed for all proposed alternative work practice standards in non-Title V permits. Public notice requirements specified in [391-3-1-.03\(10\)\(e\)8](#), and [391-3-1-.03\(10\)\(f\)1](#), shall be followed for all proposed alternative work practice standards in Title V permits.
- III. At all times, the source shall be operated in a manner consistent with good practice for minimizing emissions and the source uses best efforts regarding planning, design, and operating procedures. The owner or operator's actions during malfunction periods are documented by properly signed, contemporaneous operating logs or other relevant evidence.
- IV. Failure to implement or follow the source specific malfunction work practice standard during a malfunction shall be a violation of the Georgia Rules for Air Quality Control [391-3-1-.03\(2\)\(g\)](#).
- V. Any source that has a permit without a malfunction work practice standard limit will be required to comply with the applicable emission limit.
- VI. Facilities that follow an approved source specific malfunction work practice standard during a malfunction that has been addressed in the source specific malfunction work practice standard shall be deemed in compliance.

Any application requesting a source specific malfunction work practice standard shall also include the following considerations:

- A. The request is specific to the source and control device, if applicable;
 - B. Demonstration that compliance with the emissions limitation during malfunction is infeasible, impracticable or unsafe;
 - C. The proposed alternative work practice standard(s) is designed to minimize emissions during malfunction periods, to the extent practicable;
 - D. The proposed alternative work practice standard should require that the source is operated in a manner consistent with good practice for minimizing emissions through planning, design, and operating procedures; and
 - E. The proposed alternative work practice standard includes provisions for monitoring and/or recordkeeping of the operator's actions during malfunctions to ensure practical enforceability of the proposed work practices.
- (V) Malfunctions that are not specifically included in an approved source specific work practice, or are the result of poor maintenance, poor operation, or otherwise reasonably preventable control equipment or process failure, are prohibited and shall be considered violations and reported in accordance with 391-3-1-.02(6)(b)1.(iv), if the malfunction continues for 4 hours or more.

- (VI) Unless otherwise defined in 391-3-1-.02 or in an air quality operating permit, malfunction is defined as follows:

"Malfunction" means any unavoidable failure of air pollution control equipment, process equipment, or process to operate in a normal and usual manner that results in excessive emissions. Excessive emissions during periods of routine startup and shutdown of process equipment are not considered a malfunction. Failures caused entirely or in part by poor maintenance, careless operations or any other upset condition, within the control of the emission source, are not considered malfunctions.

- (iii) Paragraphs 391-3-1-.02(2)(a)12.(i) and (ii) become void if the June 12, 2015 publication (80 FR 33839) *State Implementation Plans: Response to Petition for Rulemaking; Restatement and Update of EPA's SSM Policy Applicable to SIPs; Findings of Substantial Inadequacy; and SIP Calls to Amend Provisions Applying to Excess Emissions During Periods of Startup, Shutdown, and Malfunction* is:

- (I) Declared or adjudged to be invalid or unconstitutional or stayed by the United States Court of Appeals for the Eleventh Circuit, the District of Columbia Circuit, or the United States Supreme Court; or
- (II) Withdrawn, repealed, revoked, or otherwise rendered of no force and effect by the United States Environmental Protection Agency, Congress, or Presidential Executive Order.

13. Startup, Shutdown, and Malfunction Emissions for Certain Rules

- (i) Upon the effective date of EPA's final approval of GA Rule Chapter 391-3-1-.02(2)(a)11. and/or 12. as published in the Federal Register, the provisions of this paragraph 13. shall apply in lieu of paragraph 7. to all sources subject to emission limitations and standards in 391-3-1-.02(2)(zz), (ggg), (iii), (ppp), (qqq), (sss), (uuu), and (www).
- (I) Excessive emissions resulting from startup, shutdown, malfunction of any source which occur though ordinary

diligence is employed shall be allowed provided that (I) the best operational practices to minimize emissions are adhered to, and (II) all associated air pollution control equipment is operated in a manner consistent with good air pollution control practice for minimizing emissions and (III) the duration of excessive emissions is minimized.

- (II) Excessive emissions which are caused entirely or in part by poor maintenance, poor operation, or any other equipment or process failure which may reasonably be prevented during startup, shutdown or malfunction are prohibited and are violations of this Chapter (391-3-1).
- (III) The provisions of this subparagraph 13.(i) shall not apply to emissions in excess of any requirement under section 391-3-1-.02(8) or (9) of this Rule (i.e. any requirement of 40 CFR Part 60, 40 CFR Part 61, or 40 CFR Part 63).

(b) Visible Emissions.

1. Except as may be provided in other more restrictive or specific rules or subdivisions of this Chapter, no person shall cause, let, suffer, permit, or allow emissions from any air contaminant source the opacity of which is equal to or greater than forty (40) percent.
2. Upon written application to the Director, a person owning or operating an air pollution source may request that visible emission evaluations (opacity measurements) be conducted during particulate emission tests for a source, for the purpose of demonstrating compliance with a particulate emission standard. Any such tests or evaluations shall be conducted according to methods, procedures and requirements approved by the Division. All test results shall be subject to verification by the Division. The correlated visible emissions opacity determined during any such particulate emission tests which demonstrate compliance (with results verified by the Division) may, if greater than any applicable visible emissions opacity standard of this Chapter 391-3-1, be established by the Director as the visible emissions standard (opacity standard) for the source. Such visible emissions standards if so established shall be incorporated as a condition of the operating permit for the air pollution source.
3. The visible emission limitation of this subsection applies to direct sources of emissions such as stationary structures, equipment, machinery, stacks, flues, pipes, exhausts, vents, tubes, chimneys or similar structures.

4. The provisions of this subsection (b), apply only to facilities or sources subject to some other emission limitation under this section 391-3-1-.02(2).

(c) Incinerators.

1. Except as specified in the section dealing with conical burners, no person shall cause, let, suffer, permit, or allow the emissions of fly ash and/or other particulate matter from any incinerator, in amounts equal to or exceeding the following:
 - (i) Units with charging rates of 500 pounds per hour or less of combustible waste, including water, shall not emit fly ash and/or particulate matter in quantities exceeding 1.0 pound per hour.
 - (ii) Units with charging rates in excess of 500 pounds per hour of combustible waste, including water, shall not emit fly ash and/or particulate matter in excess of 0.20 pounds per 100 pounds of charge.
2. No person shall cause, let, suffer, permit, or allow from any incinerator, visible emissions the opacity of which is equal to or greater than twenty (20) percent except for one 6-minute period per hour of not more than twenty-seven (27) percent opacity.
3. No person shall cause or allow particles to be emitted from an incinerator which are individually large enough to be visible to the unaided eye.
4. No person shall operate an existing incinerator unless:
 - (i) it is a dual or multiple chamber incinerator;
 - (ii) it is equipped with an auxiliary burner in the primary chamber for the purpose of creating a pre-ignition temperature of 800°F; and
 - (iii) it has a secondary burner to control smoke and/or odors and maintain a temperature of at least 1500°F in the secondary chamber.
5. Designs other than those mentioned in Subparagraph 4. above shall be considered on an individual basis and will be exempt from the provisions if, in the judgment of the Director, said design results in performance which meets the standard set forth in paragraphs (2)(c)1., 2. and 3. above.
6. The provisions of this Subsection (c) shall not apply to:
 - (i) any hazardous waste incinerator subject to Section 391-3-11 of the Georgia Rules for Hazardous Waste Management, 40 CFR 264,

Subpart O, as adopted by reference, "Standards for Owners and Operators of Hazardous Waste Treatment, Storage and Disposal Facilities," as amended;

- (ii) any incinerator subject to Section 391-3-1-.02(8)(b)71. of the Georgia Rules for Air Quality Control, "Standards of Performance for Municipal Waste Combustors for Which Construction is Commenced After September 20, 1994," as amended;
- (iii) any incinerator subject to the Georgia State Plan, under Section 111(d) of the federal Act, for "Municipal Waste Combustors for Which Construction is Commenced On or Before September 20, 1994," as amended;
- (iv) any incinerator subject to Section 391-3-1-.02(8)(b)73. of the Georgia Rules for Air Quality Control "Standards of Performance for New Stationary Sources: Hospital/Medical/Infectious Waste Incinerators," as amended;
- (v) any incinerator subject to Section 391-3-1-.02(2)(iii) of the Georgia Rules for Air Quality Control "Hospital/Medical/Infectious Waste Incinerators," as amended;
- (vi) any incinerator subject to Section 391-3-1-.02(8)(b)75. of the Georgia Rules for Air Quality Control "Standards of Performance for Commercial and Industrial Solid Waste Incineration Units," as amended;
- (vii) any incinerator subject to Section 391-3-1-.02(2)(ppp) of the Georgia Rules for Air Quality Control "Commercial and Industrial Solid Waste Incineration Units," as amended;
- (viii) any vent gas incineration devices that are used as air pollution control equipment and boilers and industrial furnaces that burn waste (excluding hazardous waste) as a fuel;
- (ix) any incinerator subject to Section 391-3-1-.02(8)(b)20. of the Georgia Rules for Air Quality Control "Standards of Performance for Sewage Treatment Plants," as amended;
- (x) any incinerator subject to Section 391-3-1-.02(8)(b)74. of the Georgia Rules for Air Quality Control "Standards of Performance for Small Municipal Waste Combustion Units for Which Construction is Commenced After August 30, 1999," as amended;

- (xi) any incinerator subject to Section 391-3-1-.02(8)(b)76. of the Georgia Rules for Air Quality Control "Standards of Performance for Other Solid Waste Incinerator Units for Which Construction is Commenced After December 9, 2004, or for Which Modification or Reconstruction is Commenced on or After June 16, 2006," as amended;
- (xii) any incinerator subject to Section 391-3-1-.02(8)(b)83. of the Georgia Rules for Air Quality Control "Standards of Performance for New Sewage Sludge Incineration Units" as amended; or
- (xiii) any incinerator subject to Section 391-3-1-.02(2)(www) of the Georgia Rules for Air Quality Control "Sewage Sludge Incineration Units," as amended.

(d) Fuel-Burning Equipment.

1. No person shall cause, let, suffer, permit, or allow the emission of fly ash and/or other particulate matter from any fuel-burning equipment in operation or under construction on or before January 1, 1972, in amounts equal to or exceeding the following:
 - (i) for equipment less than 10 million BTU heat input per hour:

$P = 0.7$ pounds per million BTU heat input;
 - (ii) for equipment equal to or greater than 10 million BTU heat input per hour, and equal to or less than 2,000 million BTU heat input per hour:

$P = 0.7 \left(\frac{10}{R} \right)^{0.202}$ pounds per million BTU heat input;
 - (iii) equipment larger than 2,000 million BTU heat input per hour:

$P = 0.24$ pounds per million BTU heat input.
2. No person shall cause, let, suffer, permit, or allow the emission of fly ash and/or other particulate matter from any fuel-burning equipment constructed after January 1, 1972, in amounts equal to or exceeding the following:
 - (i) for equipment less than 10 million BTU heat input per hour:

$P = 0.5$ pounds per million BTU heat input;

- (ii) for equipment equal to or greater than 10 million BTU heat input per hour, and equal to or less than 250 million BTU heat input per hour:

$$P = 0.5 \left(\frac{10}{R} \right)^{0.5} \text{ pounds per million BTU heat input;}$$

- (iii) for equipment greater than 250 million BTU heat input per hour:

$$P = 0.10 \text{ pounds per million BTU heat input}$$

P = allowable weight of emissions of fly ash and/or other particulate matter in pounds per million BTU heat input

R = heat input of fuel-burning equipment in million BTU per hour

3. No person shall cause, let, suffer, permit, or allow the emission from any fuel-burning equipment constructed or extensively modified after January 1, 1972, visible emissions the opacity of which is equal to or greater than twenty (20) percent except for one six minute period per hour of not more than twenty-seven (27) percent opacity.
4. No person shall cause, let, permit, suffer, or allow the emission of nitrogen oxides (NOx), reported as nitrogen dioxide, from any fuel-burning equipment equal to or greater than 250 million BTU per hour of heat input that is constructed or extensively modified after January 1, 1972, equal to or exceeding the following:
- (i) when firing coal-0.7 pounds of NOx per million BTUs of heat input;
 - (ii) when firing oil-0.3 pounds of NOx per million BTUs of heat input;
 - (iii) when firing gas-0.2 pounds of NOx per million BTUs of heat input;
 - (iv) when different fuels are burned simultaneously in any combination the applicable standard, expressed as pounds of NOx per million BTUs of heat input, shall be determined by proration. Compliance shall be determined by using the following formula:

$$\frac{x(0.20) + y(0.30) + z(0.70)}{x + y + z}$$

where:

x = percent of total heat input derived from gaseous fuel;

y = percent of total heat input derived from oil;

z = percent of total heat input derived from coal.

(e) Particulate Emission from Manufacturing Processes.

1. Except as may be specified in other sections of these regulations or as may be specified in a permit issued by the Director, no person shall cause, let, permit, suffer, or allow the rate of emission from any source, particulate matter in total quantities equal to or exceeding the amounts specified in subparagraphs (i) or (ii), below, as applicable. Equipment in operation, or under construction contract, on or before July 2, 1968, shall be considered existing equipment. All other equipment put in operation or extensively altered after said date is to be considered new equipment.

- (i) The following equations shall be used to calculate the allowable rates of emission from new equipment:

$E = 4.1 P^{0.67}$; for process input weight rate up to and including 30 tons per hour.

$E = 55 P^{0.11} - 40$; for process input weight rate above 30 tons per hour.

- (ii) The following equation shall be used to calculate the allowable rates of emission from existing equipment:

$$E = 4.1 P^{0.67}$$

E = emission rate in pounds per hour

P = process input weight rate in tons per hour.

(f) Normal Superphosphate Manufacturing Facilities.

1. Unit emissions of fluoride for normal superphosphate manufacturing facilities, expressed as pounds of fluoride ion per ton of P_2O_5 or equivalent, shall not exceed 0.40 pounds. The allowable emission of fluorides shall be calculated by multiplying the unit emission specified above times the expressed design capacity of the source in question.

(g) Sulfur Dioxide.

1. New fuel-burning sources capable of firing fossil fuel(s) at a rate exceeding 250 million BTUs per hour heat input, constructed or extensively modified after January 1, 1972, excluding kraft pulp mill recovery furnaces, may not emit sulfur dioxide equal to or exceeding:
 - (i) 0.8 pounds of sulfur dioxide per million BTUs of heat input derived from liquid fossil fuel or derived from liquid fossil fuel and wood residue;
 - (ii) 1.2 pounds of sulfur dioxide per million BTUs of heat input derived from solid fossil fuel or derived from solid fossil fuel and wood residue;
 - (iii) When different fossil fuels are burned simultaneously in any combination, the applicable standard expressed as pounds of sulfur dioxide per million BTUs of heat input shall be determined by proration using the following formula:

$$a = \frac{y(0.80) + z(1.2)}{y + z}$$

where:

y = percent of total heat input derived from liquid fossil fuel;

z = percent of total heat input derived from solid fossil fuel;

a = the allowable emission in pounds per million BTUs.

2. All fuel burning sources below 100 million BTUs of heat input per hour shall not burn fuel containing more than 2.5 percent sulfur, by weight. All fuel burning sources having a heat input of 100 million BTUs per hour or greater shall not burn a fuel containing more than 3 percent sulfur, by weight.
3. Notwithstanding the limitations on sulfur content of fuels stated in paragraph 2. above, the Director may allow sulfur content greater than that allowed in paragraph 2. above, provided that the source utilizes sulfur dioxide removal and the sulfur dioxide emission does not exceed that allowed by paragraph 2. above, utilizing no sulfur dioxide removal.

(h) Portland Cement Plants.

1. See Section 391-3-1-.02(8) for applicable New Source Performance Standards.

(i) **Nitric Acid Plants.**

1. No person shall cause or allow the emission of nitrogen oxides (NO_x), expressed as nitrogen dioxide, from Nitric Acid Plants equal to or exceeding:
 - (i) for plants constructed before January 1, 1972: 25 pounds of NO_x expressed as nitrogen dioxide, per ton of 100% acid produced;
 - (ii) for plants constructed after January 1, 1972, the applicable New Source Performance Standards of 391-3-1-.02(8).
2. No person shall operate a nitric acid plant unless the plant is equipped with a continuous NO_x monitor and recorder or an alternate system approved by the Director.

(j) **Sulfuric Acid Plants.**

1. No person shall cause or allow the emission of sulfur dioxide (SO₂) and acid mist from sulfuric acid plants equal to or exceeding:
 - (i) For plants constructed before January 1, 1972, 27.0 pounds of SO₂, and 0.15 pounds of acid mist per ton of 100% acid produced;
 - (ii) For plants constructed or extensively modified after January 1, 1972, the applicable New Source Performance Standards of 391-3-1.02(8).
2. No person shall operate a sulfuric acid plant unless the plant is equipped with a continuous SO₂ monitor and recorder or an approved alternate system approved by the Director.

(k) **Particulate Emission from Asphaltic Concrete Hot Mix Plants.**

1. No person shall cause, let, suffer, permit, or allow the emission of particulate matter from an Asphaltic Concrete Hot Mix Plant equal to or exceeding amounts derived from the following formulas:
 - (i) For existing plants below 45 tons per hour input- $E = P$, pounds per hour;
 - (ii) For existing plants equal to or greater than 45 tons per hour input- $E = 10P^{0.4}$ pounds per hour;
 - (iii) For new plants below 125 tons per hour input- $E = 2.1P^{0.6}$, pounds per hour;
 - (iv) For new plants equal to or greater than 125 tons per hour input- $E = 14P^{0.2}$, pounds per hour;

- (v) Equals the allowable emission of particulate matter in pounds per hour. P equals the process input weight rate in tons per hour;
 - (vi) Equipment in operation, or under construction contract, on or before January 1, 1972, shall be considered existing equipment. All equipment constructed or extensively altered after said date shall be considered new.
2. The New Source Performance Standards of 391-3-1-.02(8) for such asphaltic concrete plants apply to all such plants commencing construction on or after the effective date of such standards.

(l) **[reserved]**

(m) **Repealed.**

(n) **Fugitive Dust.**

1. All persons responsible for any operation, process, handling, transportation or storage facility which may result in fugitive dust shall take all reasonable precautions to prevent such dust from becoming airborne. Some reasonable precautions which could be taken to prevent dust from becoming airborne include, but are not limited to, the following:
 - (i) Use, where possible, of water or chemicals for control of dust in the demolition of existing buildings or structures, construction operations, the grading of roads or the clearing of land;
 - (ii) Application of asphalt, water, or suitable chemicals on dirt roads, materials, stockpiles, and other surfaces which can give rise to airborne dusts;
 - (iii) Installation and use of hoods, fans, and fabric filters to enclose and vent the handling of dusty materials. Adequate containment methods can be employed during sandblasting or other similar operations;
 - (iv) Covering, at all times when in motion, open bodied trucks, transporting materials likely to give rise to airborne dusts;
 - (v) The prompt removal of earth or other material from paved streets onto which earth or other material has been deposited.
2. The percent opacity from any fugitive dust source listed in paragraph (2)(n)1. above shall not equal or exceed 20 percent.

(o) [reserved]

(p) **Particulate Emissions from Kaolin and Fuller's Earth Processes.**

1. The following equations shall be used to calculate the allowable rates of emission from kaolin and fuller's earth process equipment constructed or extensively modified after January 1, 1972:
 - (i) $E = 3.59P^{0.62}$; for process input weight rate up to and including 30 tons per hour;
 - (ii) $E = 17.31P^{0.16}$; for process input weight rate in excess of 30 tons per hour.

2. The following equation shall be used to calculate the allowable rates of emission from kaolin and fuller's earth process equipment constructed or put in operation on or before January 1, 1972:
 - (i) $E = 4.1P^{0.67}$; for process input weight rate up to and including 30 tons per hour;
 - (ii) $E = 55P^{0.11} - 40$; for process input weight rate above 30 tons per hour.

E = allowable emission rate in pounds per hour;

P = process input weight rate in tons per hour.

(q) **Particulate Emissions from Cotton Gins.**

1. The emission of particulate matter from any cotton ginning operation shall not exceed the amounts specified below.
 - (i) The following equation shall be used to calculate the allowable rates of emission:

$$E = 7 B^{0.5}$$

E = allowable emission rate in pounds per hour

B = number of standard bales per hour-A standard bale is defined as a finished bale weighing 500 pounds.

2. In lieu of demonstrating compliance with the applicable emission standard contained in 391-3-1-.02(2)(q)1.(i) the following control devices may be utilized:

- (i) for emission control from low pressure exhausts, the use of screens with a mesh size of 80 by 80 or finer, or the use of perforated condenser drums with holes not exceeding .045 inches in diameter, or the use of a dust house.
- (ii) for emission control from high pressure exhausts, the use of high efficiency cyclones.

If compliance with the emission standard specified in 391-3-1-.02(2)(q)1.(i) is required, then the testing methodology to be utilized shall be that specified in the Georgia Department of Natural Resources Procedures for Testing and Monitoring Sources of Air Pollutants.

(r) Particulate Emissions from Granular and Mixed Fertilizer Manufacturing Units.

1. For the purpose of this regulation the ammoniator, dryer, cooler and associated equipment will be considered one unit.
2. The following equations shall be used to calculate the allowable rates of emission from granular and mixed fertilizer manufacturing units:
 - (i) $E = 3.59P^{0.62}$; for production weights up to and including 30 tons per hour;
 - (ii) $E = 17.31P^{0.16}$; for production rates above 30 tons per hour;

E = allowable emission rate in pounds per hour;

P = production rate of finished product in tons per hour. Recycle will not be included.

(s) Nitrogen Oxides. (Repealed)

(t) VOC Emissions from Automobile and Light-Duty Truck Manufacturing.

1. No person shall cause, let, permit, suffer or allow the emissions of VOC from automobile and/or light-duty truck manufacturing facilities to exceed:
 - (i) 1.2 pounds of VOC per gallon of coating excluding water, as a monthly weighted average, from each electrophoretic applied prime operation;

- (ii) 15.1 pounds of VOC per gallon of applied coating solids, as a daily weighted average, from each spray prime operation;
- (iii) 15.1 pounds of VOC per gallon of applied coating solids, as a daily weighted average, from each topcoat operation;
- (iv) 4.8 pounds of VOC per gallon of coating delivered to the coating applicator from each final repair operation. If any coating delivered to the coating applicator contains more than 4.8 pounds of VOC per gallon of coating, the limit shall be 13.8 pounds of VOC per gallon of coating solids sprayed, as a daily weighted average.
- (v) 3.5 pounds of VOC per gallon of sealer, excluding water, delivered to an applicator that applies sealers in amounts less than 25,000 gallons during a 12 consecutive month period;
- (vi) 1.0 pounds of VOC per gallon of sealer, excluding water, delivered to a coating applicator that applies sealers in amounts greater than 25,000 gallons during a 12 consecutive month period;
- (vii) 3.5 pounds of VOC per gallon of adhesive, excluding water, delivered to an applicator that applies adhesives, except body glass adhesives;
- (viii) 6.9 pounds of VOC per gallon of cleaner, excluding water, delivered to an applicator that applies cleaner to the edge of body glass prior to priming;
- (ix) 5.5 pounds of VOC per gallon of primer, excluding water, delivered to an applicator that applies primer to the body glass or to the body to prepare the glass and body for bonding;
- (x) 1.0 pounds of VOC per gallon of adhesive, excluding water, delivered to an applicator that applies adhesive to bond body glass to the body;
- (xi) 4.4 pounds of VOC per gallon of coating delivered to any applicator that applies clear coating to fascias. No coating may be used that exceeds this limit;
- (xii) 4.4 pounds of VOC per gallon of coating delivered to any applicator that applies base coat to fascias, on a daily weighted average basis;

(xiii) 3.5 pounds of VOC per gallon of material, excluding water, for all other materials not subject to some other emission limitation stated in this paragraph.

2. No person shall cause, let, permit, suffer or allow the emissions of VOC from automobile and/or light-duty truck manufacturing facilities to exceed:

(i) 0.7 pounds of VOC per gallon of coating solids applied, as a monthly weighted average, from each electrodeposition primer (EDP) operation when the solids turnover ratio is greater than or equal to 0.16. For purposes of this subsection an EDP operation includes application area, spray/rinse stations, and curing oven.

(ii) Electrodeposition Primer Operation: the value calculated by the following formula, as a monthly weighted average, from each electrodeposition primer (EDP) operation when the solids turnover ratio is less than 0.160 and greater than or equal to 0.040:

(I) pounds of VOC per gallon of coating solids applied

=

$$(8.34 \text{ lb / gal})(0.084)(350^{0.160-R_T})$$

where R_T = Solids Turnover Ratio

(iii) 12.0 pounds of VOC per gallon of deposited solids, as a daily weighted average basis from each of the following: primer-surfacer operation; topcoat operation; combined primer-surfacer and topcoat operations. For purposes of this subsection each operation includes application area, flash-off area, and oven.

(iv) 4.8 pounds of VOC per gallon of coating, less water and less exempt solvents, as a daily weighted average, from each final repair operation.

(v) 3.5 pounds of VOC per gallon of sealer, excluding water, delivered to an applicator that applies sealers in amounts less than 25,000 gallons during a 12 consecutive-month period;

(vi) 1.0 pounds of VOC per gallon of sealer, excluding water, delivered to a coating applicator that applies sealers in amounts greater than 25,000 gallons during a 12 consecutive-month period;

- (vii) 250 grams of VOC per liter of adhesive (2.08 lb/gallon), excluding water, delivered to an applicator that applies adhesives, except body glass adhesives and weatherstrip adhesives;
 - (viii) 1.0 pounds of VOC per gallon of adhesive, excluding water, delivered to an applicator that applies adhesive to bond body glass to the body;
 - (ix) 6.9 pounds of VOC per gallon of cleaner, excluding water, delivered to an applicator that applies cleaner to the edge of body glass prior to priming;
 - (x) 5.5 pounds of VOC per gallon of primer, excluding water, delivered to an applicator that applies glass bonding primer to the body glass or to the body to prepare the glass and body for bonding;
 - (xi) 4.4 pounds of VOC per gallon of coating delivered to any applicator that applies clear coating to fascias. No coating may be used that exceeds this limit;
 - (xii) 4.4 pounds of VOC per gallon of coating delivered to any applicator that applies base coat to fascias, on a daily weighted average basis;
 - (xiii) 200 grams of VOC per liter of coating (1.669 lb/gal), excluding water, delivered to an applicator that applies one of the following: gasket/gasket sealing material; bedliner;
 - (xiv) 3.5 pounds of VOC per gallon of material, excluding water, for all other materials not subject to some other emission limitation stated in this paragraph. This includes but is not limited to coatings such as cavity wax, deadener, underbody coating, interior coating, weatherstrip adhesive, and/or lubricating wax/compound.
3. The emission limits stated in paragraphs 1. and 2. shall be achieved by the application of low solvent technology or a system demonstrated to have equivalent control efficiency on the basis of pounds of VOC per gallon of solids.
4. No person shall cause, let, permit, suffer or allow the emissions of VOC from the use of wipe-off solvents to exceed 1.0 pounds per unit of production as a rolling, 12-month average. Wipe-off solvents shall include those solvents used to clean dirt, grease, excess sealer and adhesive, or other foreign matter from the car body in preparation for painting or other production-related operation.

5. No person shall cause, let, permit, suffer or allow the emission of VOCs from flush or clean paint application systems including paint lines, tanks and applicators, unless such solvents are captured to the maximum degree feasible by being directed into containers that prevent evaporation into the atmosphere.
6. No person shall store solvents or waste solvents in drums, pails, cans or other containers unless such containers have air-tight covers which are in place at all times when materials are not being transferred into or out of the container.
7. No person shall cause, let, permit, suffer or allow the emissions of VOC from the cleaning of oil and grease stains on the body shop floor to exceed 0.1 pounds per unit of production.
8. For the purpose of this subsection; the following definitions apply:
 - (i) "Adhesive" means any chemical substance that is applied for the purpose of bonding two surfaces together without regard to the substrates involved other than by mechanical means.
 - (ii) "Automobile" means all passenger cars or passenger car derivatives capable of seating a maximum of 12 or fewer passengers.
 - (iii) "Bedliner" means a multi-component coating, used at an automobile or light-duty truck assembly coating facility, applied to a cargo bed after the application of topcoat and outside of the topcoat operation to provide additional durability and chip resistance.
 - (iv) "Cavity wax" means a coating, used at an automobile or light-duty truck assembly coating facility, applied into the cavities of the vehicle primarily for the purpose of enhancing corrosion protection.
 - (v) "Deadener" means a coating, used at an automobile or light-duty truck assembly coating facility, applied to selected vehicle surfaces primarily for the purpose of reducing the sound of road noise in the passenger compartment.
 - (vi) "Electrodeposition primer" means a process of applying a protective, corrosion-resistant waterborne primer on exterior and interior surfaces that provides thorough coverage of recessed areas. It is a dip coating method that uses an electrical field to apply or deposit the conductive coating onto the part. The object being painted acts as an electrode that is oppositely charged from the particles of paint in

the dip tank. Also referred to as E-coat, Uni-Prime, and ELPO Primer.

- (vii) "Electrophoretic Applied Prime Operation" means the dip tank flash-off area and bake oven(s) which are used to apply and dry or cure the initial coating on components of automobile and light-duty truck bodies by submerging the body components in a coating bath with an electrical potential difference between the components and the bath, and drying or curing such coating on the components in bake oven(s);
- (viii) "Final repair" means the operations performed and coating(s) applied to completely-assembled motor vehicles or to parts that are not yet on a completely assembled vehicle to correct damage or imperfections in the coating. The curing of the coatings applied in these operations is accomplished at a lower temperature than that used for curing primer-surfacer and topcoat. This lower temperature cure avoids the need to send parts that are not yet on a completely assembled vehicle through the same type of curing process used for primer-surfacer and topcoat and is necessary to protect heat sensitive components on completely assembled vehicles.
- (ix) "Gasket/gasket sealing material" means a fluid, used at an automobile or light-duty truck assembly coating facility, applied to coat a gasket or replace and perform the same function as a gasket. Automobile and light-duty truck gasket/gasket sealing material includes room temperature vulcanization (RTV) seal material.
- (x) "Glass bonding primer" means a primer, used at an automobile or light-duty truck assembly coating facility, applied to windshield or other glass, or to body openings, to prepare the glass or body opening for the application of glass bonding adhesives or the installation of adhesive bonded glass. Automobile and light-duty truck glass bonding primer includes glass bonding/cleaning primers that perform both functions (cleaning and priming of the windshield or other glass, or body openings) prior to the application of adhesive or the installation of adhesive bonded glass.
- (xi) "In-line repair" means the operation performed and coating(s) applied to correct damage or imperfections in the topcoat on parts that are not yet on a completely assembled vehicle. The curing of the coatings applied in these operations is accomplished at essentially the same temperature as that used for curing the previously applied

topcoat. Also referred to as high bake repair or high bake reprocess. In-line repair is considered part of the topcoat operation.

- (xii) "Interior coating" means a coating, used at an automobile or light-duty truck assembly coating facility outside of the primer-surfacer and topcoat operations, applied to the trunk interior to provide chip protection.
- (xiii) "Light-Duty Trucks" means any motor vehicles rated 8500 pounds gross weight or less which are designed primarily for the purpose of transportation or are derivatives of such vehicles;
- (xiv) "Lubricating wax/compound" means a protective lubricating material, used at an automobile or light-duty truck assembly coating facility, applied to vehicle hubs and hinges.
- (xv) "Manufacturing Facility" means a facility which assembles twenty (20) or more automobiles or light-duty trucks per day (either separately or in combination) ready for sale to vehicle dealers. Customizers, body shops and other repainters are not part of this definition;
- (xvi) "Primer-surfacer" means an intermediate protective coating applied over the electrodeposition primer and under the topcoat. Primer-surfacer provides adhesion, protection, and appearance properties to the total finish. Primer-surfacer may also be called guide coat or surfacer. Primer-surfacer operations may include other coating(s) (e.g., anti-chip, lower-body anti-chip, chip-resistant edge primer, spot primer, blackout, deadener, interior color, basecoat replacement coating, etc.) that is (are) applied in the same spray booth(s).
- (xvii) "Sealer" means a high viscosity material, used at an automobile or light-duty truck assembly coating facility, generally, but not always, applied in the paint shop after the body has received an electrodeposition primer coating and before the application of subsequent coatings (e.g., primer-surfacer). The primary purpose of automobile and light-duty truck sealer is to fill body joints completely so that there is no intrusion of water, gases or corrosive materials into the passenger area of the body compartment. Such materials are also referred to as sealant, sealant primer, or caulk.
- (xviii) "Solids turnover ratio (R_T)" means the ratio of total volume of coating solids that is added to the EDP system in a calendar

month divided by the total volume design capacity of the EDP system.

- (xix) "Spray Prime Operation" means the spray prime booth, flash-off area and bake oven(s) which are used to apply and dry or cure a surface coating between the electrophoretic applied prime and topcoat operations on the components of automobile and light-duty truck bodies;
 - (xx) "Topcoat" means the final coating system applied to provide the final color and/or a protective finish. The topcoat may be a monocoat color or basecoat/clearcoat system. In-line repair and two-tone are part of topcoat. Topcoat operations may include other coating(s) (e.g., blackout, interior color, etc.) that is (are) applied in the same spray booth(s).
 - (xxi) "Underbody coating" means a coating, used at an automobile or light-duty truck assembly coating facility, applied to the undercarriage or firewall to prevent corrosion and/or provide chip protection.
 - (xxii) "Weatherstrip adhesive" means an adhesive, used at an automobile or light-duty truck assembly coating facility, applied to weatherstripping materials for the purpose of bonding the weatherstrip material to the surface of the vehicle.
9. Applicability: Prior to January 1, 2015, the requirements of this subparagraph (t) shall apply to facilities at which actual emissions of volatile organic compounds from the use of automobile and light-duty truck assembly coatings equal or exceed 2.7 tons per 12-month rolling period and are located in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:
- (i) All applicable facilities shall comply with the provisions of subparagraphs 1, 3, 4, 5, 6, 7, and 8.
10. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (t) shall apply to facilities at which the potential emissions of volatile organic compounds from the use of automobile and light-duty truck assembly coatings equal or exceed 100 tons per year and are located outside the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 1, 3, 4, 5, 6, 7, and 8.

- 11. Applicability: On and after January 1, 2015, the requirements of this subparagraph (t) shall apply to facilities at which actual emissions of volatile organic compounds from the use of automobile and light-duty truck assembly coatings equal or exceed 2.7 tons per 12-month rolling period and are located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 2, 3, 4, 5, 6, 7, and 8.
 - (ii) Any physical or operational changes that are necessary to comply with the provisions specified in subparagraph 2 are subject to the compliance schedule specified in subparagraph 14.

- 12. On and after January 1, 2015, the requirements of this subparagraph (t) shall apply to facilities at which the potential emissions of volatile organic compounds from the use of automobile and light-duty truck assembly coatings equal or exceed 100 tons per year and are located outside the counties of Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding and Walton as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 1, 3, 4, 5, 6, 7, and 8.

- 13. Applicability: The requirements of subparagraphs 11. and 12. will no longer be applicable by the compliance deadlines if the counties specified in those subparagraphs are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015 and such counties continue to maintain that Standard thereafter. Instead, the provisions of subparagraphs 9. and 10. will continue to apply on and after January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of subparagraphs 11. and 12. will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.

- 14. Compliance Schedule:

- (i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than **July 1, 2014**.
- (ii) On-site of construction of emission control systems and/or modification of process or coatings must be completed by **November 1, 2014**.
- (iii) Full compliance with the applicable requirements specified in subparagraph 2 must be completed before **January 1, 2015**.

(u) VOC Emissions from Can Coating.

1. No person shall cause, let, permit, suffer, or allow the emissions of VOC from can coating operations to exceed:
 - (i) 2.8 pounds per gallon of coating, excluding water, delivered to the coating applicator from sheet base coat (exterior and interior) and overvarnish or two-piece can exterior (basecoat and overvarnish) operations. If any coating delivered to the coating applicator contains more than 2.8 pounds VOC per gallon, the solids equivalent limit shall be 4.52 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (ii) 4.2 pounds per gallon of coating, excluding water, delivered to the coating applicator from two and three-piece can interior body spray and two-piece can exterior end (spray and roll coat) operations. If any coating delivered to the coating applicator contains more than 4.2 pounds VOC per gallon, the solids equivalent limit shall be 9.78 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (iii) 5.5 pounds per gallon of coating, excluding water, delivered to the coating applicator from three-piece side-seam spray operations. If any coating delivered to the coating applicator contains more than 5.5 pounds VOC per gallon, the solids equivalent limit shall be 21.8 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (iv) 3.7 pounds per gallon of coating, excluding water, delivered to the coating applicator from end seal compound operations. If any coating delivered to the coating applicator contains more than 3.7 pounds VOC per gallon, the solids equivalent limit shall be 7.44

pounds VOC per gallon of coating solids delivered to the coating applicator.

2. The emission limits in this subsection shall be achieved by:
 - (i) the application of low solvent coating technology where each and every coating meets the limit expressed in pounds VOC per gallon of coating, excluding water, stated in paragraph 1. of this subsection; or
 - (ii) the application of low solvent coating technology where the 24-hour weighted average of all coatings on a single coating line or operation meets the solids equivalent limit, expressed in pounds VOC per gallon of coating solids, stated in paragraph 1. of this subsection; averaging across lines is not allowed; or
 - (iii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the non-methane volatile organic compounds which enter the control equipment are recovered or destroyed, and that overall VOC emissions do not exceed the solids equivalent limit expressed in pounds VOC per gallon of coating solids stated in paragraph 1. of this subsection.

3. For the purpose of this subsection, the following definitions apply:
 - (i) "End sealing compound" means a synthetic rubber compound which is coated onto can ends and which functions as a gasket when the end is assembled on the can.
 - (ii) "Exterior base coating" means a coating applied to the exterior of a two-piece can body to provide protection to the metal or to provide background for the lithographic or printing operation.
 - (iii) "Sheet base coating" means a coating applied to metal in sheet form to serve as either the exterior or interior of two-piece or three-piece can bodies or can ends.
 - (iv) "Interior body spray" means a coating sprayed on the interior of the can body to provide a protective film between the product and the can.
 - (v) "Overvarnish" means a coating applied directly over ink to reduce the coefficient of friction, to provide gloss and to protect the finish against abrasion and corrosion.

- (vi) "Three-piece can side-seam spray" means a coating sprayed on the exterior and interior of a welded, cemented or solder seam to protect the exposed metal.
- (vii) "Two-piece can exterior end coating" means a coating applied by roller coating or spraying to the exterior end of a can to provide protection to the metal.

(v) VOC Emissions from Coil Coating.

1. No person shall cause, let, permit, suffer, or allow the emissions of VOC from coil coating operations to exceed:
 - (i) 2.6 pounds per gallon of coating, excluding water, delivered to the coating applicator from prime and topcoat or single coat operations. If any coating delivered to the coating applicator contains more than 2.6 pounds VOC per gallon, the solids equivalent limit shall be 4.02 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (ii) The emission limits in this subsection shall apply to the coating applicator(s), oven(s) and quench area(s) of coil coating lines involved in prime and topcoat or single coat operations.
2. The emission limits in this subsection shall be achieved by:
 - (i) the application of low solvent coating technology where each and every coating meets the limit of 2.6 pounds VOC per gallon of coating, excluding water, stated in paragraph 1. of this subsection; or
 - (ii) the application of low solvent coating technology where the 24-hour weighted average of all coatings on a single coating line or operation meets the solids equivalent limit of 4.02 pounds VOC per gallon of coating solids, stated in paragraph 1. of this subsection; averaging across lines is not allowed; or
 - (iii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the non-methane volatile organic compounds which enter the control equipment are recovered or destroyed, and that overall VOC emissions do not exceed the solids equivalent limit of 4.02 pounds VOC per gallon of coating solids stated in paragraph 1. of this subsection.

3. For the purpose of this subsection, the following definitions apply:
 - (i) "Coil Coating" means the coating of any flat metal sheet or strip that comes in rolls or coils;
 - (ii) "Quench Area" means a chamber where the hot metal exiting the oven is cooled by either a spray of water or a blast of air followed by water cooling.

(w) **VOC Emissions from Paper Coating.**

1. No person shall cause, let, permit, suffer, or allow the emissions of VOC from paper coating to exceed:
 - (i) 2.9 pounds per gallon of coating, excluding water, delivered to the coating applicator from a paper coating line. This limit shall apply to roll, knife, rotogravure and saturation coater(s) and drying oven(s) of paper coating. If any coating delivered to the coating applicator contains more than 2.9 pounds VOC per gallon, the solids equivalent limit shall be 4.79 pounds VOC per gallon of coating solids delivered to the coating applicator.
2. The emission limits in subparagraph 1. shall be achieved by:
 - (i) the application of low solvent coating technology where each and every coating meets the limit of 2.9 pounds VOC per gallon of coating, excluding water; or
 - (ii) the application of low solvent coating technology where the 24-hour weighted average of all coatings on a single coating line or operation meets the solids equivalent limit of 4.79 pounds VOC per gallon of coating solids; averaging across lines is not allowed; or
 - (iii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the non-methane volatile organic compounds which enter the control equipment are recovered or destroyed, and that overall VOC emissions do not exceed the solids equivalent limit of 4.79 pounds VOC per gallon of coating solids.
3. No person shall cause, let, permit, suffer, or allow the emissions of VOC from paper, film and foil coating unless:

- (i) VOC emission reduction equipment with an overall VOC control efficiency is 90 percent for each coating line is installed and operated; or
 - (ii) VOC emissions are less than 0.08 pounds per pound of coating for each coating line except pressure sensitive tape and label coating; or
 - (iii) VOC emissions are less than 0.40 pounds per pound of solids applied for each coating line except pressure sensitive tape and label coating.
4. No person shall cause, let, permit, suffer, or allow the emissions of VOC from pressure sensitive tape and label coating unless:
- (i) VOC emission reduction equipment with an overall VOC control efficiency is 90 percent for each coating line is installed and operated; or
 - (ii) VOC emissions are less than 0.067 pounds per pound of coating for each coating line; or
 - (iii) VOC emissions are less than 0.20 pounds per pound of solids applied for each coating line.
5. Each owner or operator of a facility that coats paper, film or foil including pressure sensitive tape and label coating shall comply with the following housekeeping requirements for any affected cleaning operation:
- (i) store all VOC-containing cleaning materials and used shop towels in closed containers;
 - (ii) ensure that storage containers used for VOC-containing cleaning materials are kept closed at all times except when depositing or removing these materials;
 - (iii) minimize spills of VOC-containing cleaning materials;
 - (iv) convey VOC-containing cleaning materials from one location to another in closed containers or pipes; and
 - (v) minimize VOC emissions from cleaning of application, storage, mixing, and conveying equipment by ensuring that equipment cleaning is performed without atomizing the cleaning solvent and all spent solvent is captured in closed containers.

6. For the purpose of this subparagraph, the following definitions apply:
 - (i) "Knife Coating" means the application of a coating material to a substrate by means of drawing the substrate beneath a knife that spreads the coating evenly over the full width of the substrate;
 - (ii) "Paper Coating" means the application of a coating on paper and pressure sensitive tapes, including plastic film and metallic foil, regardless of substrate, in which the coating is distributed uniformly across the web;
 - (iii) "Roll Coating" means the application of a coating material to a substrate by means of hard rubber or steel rolls;
 - (iv) "Rotogravure Coating" means the application of a coating material to a substrate by means of a roll coating technique in which the pattern to be applied is etched on the coating roll. The coating material is picked up in these recessed areas and is transferred to the substrate.

7. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (w) shall apply to facilities at which the actual emissions of volatile organic compounds from paper, film, and foil coating, including pressure sensitive tape and label coating, equal or exceed 15 pounds per day and are located in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 6.

8. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (w) shall apply to facilities at which the potential emissions of volatile organic compounds from paper, film, and foil coating, including pressure sensitive tape and label coating, equal or exceed 100 tons per year and are located outside the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 6.

9. Applicability. On and after January 1, 2015, the requirements of this Subparagraph (w) shall apply to facilities at which actual emissions of volatile organic compounds from paper, film, and foil coating, including

pressure sensitive tape and label coating, equal or exceed 15 pounds per day (or 2.7 tons per 12-month rolling period) for facilities located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 5. and 6.
 - (ii) Individual surface coating lines that have potential emissions of volatile organic compounds from paper, film, and foil coating, including pressure sensitive tape and label coating, that equal or exceed 25 tons per year shall comply with the provisions of subparagraphs 3. and 4.
 - (iii) Individual surface coating lines that have potential emissions of volatile organic compounds from paper, film, and foil coating, including pressure sensitive tape and label coating, that do not equal or exceed 25 tons per year and are located in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, or Rockdale County shall comply with the provisions of subparagraphs 1. and 2.
 - (iv) Individual surface coating lines that have potential emissions of volatile organic compounds from paper, film, and foil coating, including pressure sensitive tape and label coating, that do not equal or exceed 25 tons per year but are located at facilities that have potential emissions of volatile organic compounds from paper coating that equal or exceed 100 tons per year and are located in Barrow, Bartow, Carroll, Hall, Newton, Spalding, or Walton County shall comply with the provisions of subparagraphs 1. and 2.
 - (v) Any physical or operational changes that are necessary to comply with the provisions specified in subparagraphs 3., 4., or 5. are subject to the compliance schedule specified in subparagraph 12.
10. Applicability. On and after January 1, 2015, the requirements of this subparagraph (w) shall apply to facilities at which potential emissions of volatile organic compounds from paper, film, and foil coating, including pressure sensitive tape and label coating, equal or exceed 100 tons per year and are located outside of counties of Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 6.

11. Applicability. The requirements of subparagraphs 9. and 10. will no longer be applicable by the compliance deadlines if the counties specified in those subparagraphs are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015 and such counties continue to maintain that Standard thereafter. Instead, the provisions of subparagraphs 7. and 8. will continue to apply on and after January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of subparagraphs 9. and 10. will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.

12. Compliance schedule.

- (i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than **July 1, 2014**.
- (ii) On-site of construction of emission control systems and/or modification of process or coatings must be completed by **November 1, 2014**.
- (iii) Full compliance with the applicable requirements of subparagraphs 3., 4., and 5. must be completed before **January 1, 2015**.

(x) VOC Emissions from Fabric and Vinyl Coating.

1. No person shall cause, let, permit, suffer, or allow the emissions of VOC from fabric and vinyl coating operations to exceed:
 - (i) 2.9 pounds per gallon of coating, excluding water, delivered to the coating applicator from a fabric coating line. If any coating delivered to the coating applicator contains more than 2.9 pounds VOC per gallon, the solids equivalent limit shall be 4.79 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (ii) 3.8 pounds per gallon of coating, excluding water, delivered to the coating applicator from a vinyl coating line. If any coating delivered to the coating applicator contains more than 3.8 pounds VOC per

gallon, the solids equivalent limit shall be 7.86 pounds VOC per gallon of coating solids delivered to the coating applicator.

- (iii) The emission limits in this subsection shall apply to roll, knife, or rotogravure coater(s) and drying oven(s) of fabric and vinyl coating lines.

2. The emission limits in this subsection shall be achieved by:

- (i) the application of low solvent coating technology where each and every coating meets the limit, expressed in pounds VOC per gallon of coating excluding water, stated in paragraph 1. of this subsection; or
- (ii) the application of low solvent coating technology where the 24-hour weighted average of all coatings on a single coating line or operation meets the solids equivalent limit, expressed in pounds VOC per gallon of coating solids, stated in paragraph 1. of this subsection; averaging across lines is not allowed: or
- (iii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the non-methane volatile organic compounds which enter the control equipment are recovered or destroyed and that overall VOC emissions do not exceed the solids equivalent limit expressed in pounds VOC per gallon of coating solids stated in paragraph 1. of this subsection.

3. For the purpose of this subsection, the following definitions apply:

- (i) "Fabric Coating" means the coating of a textile substrate with a knife roll, or rotogravure coater to impart properties that are not initially present, such as strength, stability, water or acid repellency, or appearance;
- (ii) "Knife Coating" means the application of a coating material to a substrate by means of drawing the substrate beneath a knife that spreads the coating evenly over the full width of the substrate;
- (iii) "Roll coating" means the application of a coating material to a substrate by means of hard rubber or steel rolls;
- (iv) "Rotogravure Coating" means the application of a coating material to a substrate by means of a roll coating technique in which the pattern to be applied is etched on the coating roll. The coating

material is picked up in these recessed areas and is transferred to the substrate.

- (v) "Vinyl Coating" means applying a decorative or protective topcoat, or printing on vinyl coated fabric or vinyl sheets, but shall not mean applying plastisol coating.

(y) VOC Emissions from Metal Furniture Coating.

1. No person shall cause, let, permit, suffer, or allow the emissions of VOC from metal furniture coating operations to exceed:
 - (i) 3.0 pounds per gallon of coating, excluding water, delivered to the coating applicator from prime and topcoat or single coat operations. If any coating delivered to the coating applicator contains more than 3.0 pounds VOC per gallon, the solids equivalent limit shall be 5.06 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (ii) The emission limit in this subparagraph shall apply to the application area(s), flashoff area(s) and oven(s) of metal furniture coating lines involved in prime and topcoat or single coat operations.
2. The emission limits in subparagraph 1. shall be achieved by:
 - (i) the application of low solvent coating technology where each and every coating meets the limit of 3.0 pounds VOC per gallon of coating, excluding water; or
 - (ii) the application of low solvent coating technology where the 24-hour or monthly weighted average of all coatings on a single coating line or operation meets the solids equivalent limit of 5.06 pounds VOC-per-gallon of coating solids (averaging across lines is not allowed); or
 - (iii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the nonmethane volatile organic compounds which enter the control equipment are recovered or destroyed, and that overall VOC emissions do not exceed the solids equivalent limit of 5.06 pounds VOC per gallon of coating solids.

3. No person shall cause, let, permit, suffer, or allow the emissions of VOC from metal furniture coating operations for baked coatings to exceed:
 - (i) 2.3 pounds per gallon of coating, excluding water, delivered to the coating applicator from general one-component, and general multi-component coatings. If any coating delivered to the coating applicator contains more than 2.3 pounds VOC per gallon, the solids equivalent limit shall be 3.3 pounds VOC per gallon of coating solids as applied.
 - (ii) 3.0 pounds per gallon of coating, excluding water, delivered to the coating applicator from extreme high gloss, extreme performance, heat resistant, metallic, solar absorbent and pretreatment coatings. If any coating delivered to the coating applicator contains more than 3.0 pounds VOC per gallon, the solids equivalent limit shall be 5.06 pounds VOC per gallon of coating solids as applied.
4. No person shall cause, let, permit, suffer, or allow the emissions of VOC from metal furniture coating operations for air-dried coatings to exceed:
 - (i) 2.3 pounds per gallon of coating, excluding water, delivered to the coating applicator from general one-component coatings. If any coating contains more than 2.3 pounds VOC per gallon, the solids equivalent limit shall be 3.3 pounds VOC per gallon of coating solids as applied.
 - (ii) 2.8 pounds per gallon of coating, excluding water, delivered to the coating applicator from general multi-component, and extreme high gloss coatings. If any coating delivered to the coating applicator contains more than 2.8 pounds VOC per gallon, the solids equivalent limit shall be 4.5 pounds VOC per gallon of coating solids as applied.
 - (iii) 3.0 pounds per gallon of coating, excluding water, delivered to the coating applicator from extreme performance, heat resistant, metallic, solar absorbent and pretreatment coatings. If any coating delivered to the coating applicator contains more than 3.0 pounds VOC per gallon, the solids equivalent limit shall be 5.06 pounds VOC per gallon of coating solids as applied.
5. Each owner or operator of a facility that coats metal furniture shall ensure that all coating application systems utilize one or more of the application techniques stated below:
 - (i) Electrostatic spray application;

- (ii) High volume low pressure (HVLP) spraying;
 - (iii) Flow/curtain application;
 - (iv) Roll coating;
 - (v) Dip coat application including electrodeposition;
 - (vi) Brush coat;
 - (vii) Airless spray;
 - (viii) Air-assisted airless spray; or
 - (ix) Other coating application methods that achieve transfer efficiency equivalent to HVLP or electrostatic spray application methods, as determined by the Director.
6. Each owner or operator of a facility that coats metal furniture shall comply with the following work practice standards:
- (i) store all VOC-containing coatings, thinners, and coating-related waste materials in closed containers;
 - (ii) ensure that mixing and storage containers used for VOC-containing coatings, thinners, and coating-related waste materials are kept closed at all times except when depositing or removing these materials;
 - (iii) minimize spills of VOC-containing coatings, thinners, and coating-related waste materials; and
 - (iv) convey VOC-containing coatings, thinners, and coating-related waste materials from one location to another in closed containers or pipes.
7. Each owner or operator of a facility that coats metal furniture shall comply with the following housekeeping requirements for any affected cleaning operation:
- (i) store all VOC-containing cleaning materials and used shop towels in closed containers;

- (ii) ensure that storage containers used for VOC-containing cleaning materials are kept closed at all times except when depositing or removing these materials;
 - (iii) minimize spills of VOC-containing cleaning materials;
 - (iv) convey VOC-containing cleaning materials from one location to another in closed containers or pipes; and
 - (v) minimize VOC emissions from cleaning of application, storage, mixing, and conveying equipment by ensuring that equipment cleaning is performed without atomizing the cleaning solvent and all spent solvent is captured in closed containers.
8. The VOC limits specified in this subparagraphs 3. and 4. do not apply to the following types of metal furniture coatings and/or coating operations:
- (i) Touch-up and repair coatings;
 - (ii) Stencil coatings;
 - (iii) Safety-indicating coatings;
 - (iv) Solid-film lubricants;
 - (v) Electric-insulating and thermal-conducting coatings; and
 - (vi) Coating application utilizing hand-held aerosol cans.
9. The emission limits in subparagraphs 3. and 4. shall be achieved by:
- (i) the application of low solvent coating technology where each and every coating meets the limit expressed in pounds VOC per gallon of coating, excluding water, stated in subparagraphs 3. and 4. of this subparagraph; or
 - (ii) the application of low solvent coating technology where the 24-hour weighted average of all coatings on a single coating line or operation meets the solids equivalent limit expressed in pounds VOC per gallon of coating solids, stated in subparagraphs 3. and 4. of this subparagraph; averaging across lines is not allowed; or
 - (iii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the nonmethane volatile

organic compounds which enter the control equipment are recovered or destroyed, and that overall VOC emissions do not exceed the solids equivalent limit, expressed in pounds VOC per gallon of coating solids stated in subparagraphs 3. and 4. of this subparagraph.

10. For the purpose of this subparagraph, the following definitions apply:
 - (i) "Application Area" means the area where the coating is applied by spraying, dipping or flow coating techniques.
 - (ii) "Metal Furniture Coating" means the surface coating of any furniture made of metal or any metal part, which will be assembled with other metal wood, fabric, plastic or glass parts to form a furniture piece.
11. Applicability: Prior to January 1, 2015, the requirements of this subparagraph (y) shall apply to facilities at which the actual emissions of volatile organic compounds from the use of metal furniture coatings equal or exceed 15 pounds per day and are located in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 10.
12. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (y) shall apply to facilities at which the potential emissions of volatile organic compounds from the use of metal furniture coatings equal or exceed 100 tons per year and are located outside the counties of in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 10.
13. Applicability. On and after January 1, 2015, the requirements of this subparagraph (y) shall apply to facilities at which the actual emissions of volatile organic compounds from the use of metal furniture coatings, before controls, equal or exceed 15 pounds per day (or 2.7 tons per 12-month rolling period) for facilities located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 3., 4., 5., 6., 7., 8., 9., and 10.
 - (ii) Any physical or operational changes that are necessary to comply with the provisions specified in subparagraphs 3., 4., 5., 6., 7., 8., or 9. are subject to the compliance schedule specified in subparagraph 16.
- 14. On and after January 1, 2015, the requirements of this subparagraph (y) shall apply to facilities at which the potential emissions of volatile organic compounds from the use of metal furniture coatings equal or exceed 100 tons per year and are located outside the counties of Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 10.
- 15. Applicability. The requirements of subparagraphs 13. and 14. will no longer be applicable by the compliance deadlines if the counties specified in those subparagraphs are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015 and such counties continue to maintain that Standard thereafter. Instead, the provisions of subparagraphs 11. and 12. will continue to apply on and after January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of subparagraphs 13. and 14. will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.
- 16. Compliance schedule:
 - (i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than **July 1, 2014.**
 - (ii) On-site of construction of emission control systems and/or modification of process or coatings must be completed by **November 1, 2014.**

- (iii) Full compliance with the applicable requirements of subparagraphs 3., 4., 5., 6., 7., 8., and 9. must be completed before **January 1, 2015.**

(z) VOC Emissions from Large Appliance Surface Coating.

1. No person shall cause, let, permit, suffer, or allow the emissions of VOC from the surface coating of large appliances to exceed:
 - (i) 2.8 pounds per gallon of coating, excluding water, delivered to the coating applicator from prime single or topcoat operations. If any coating delivered to the coating applicator contains more than 2.8 pounds VOC per gallon, the solids equivalent limit shall be 4.52 pounds VOC per gallon of coating solids delivered to the coating applicator;
 - (ii) The emission limits in this subparagraph shall apply to the application area(s), flashoff area(s) and oven(s) of large appliance coating lines involved in prime, single or topcoat coating operations;
 - (iii) The emission limit in this subparagraph shall not apply to the use of quick drying lacquers used for repair of scratches and nicks.
2. The emission limits in subparagraph 1. shall be achieved by:
 - (i) the application of low solvent coating technology where each and every coating meets the limit of 2.8 pounds VOC per gallon of coating, excluding water; or
 - (ii) the application of low solvent coating technology where the 24-hour weighted average of all coatings on a single coating line or operation meets the solids equivalent limit of 4.52 pounds VOC per gallon of coating solids; averaging across lines is not allowed; or
 - (iii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the non-methane volatile organic compounds which enter the control equipment are recovered or destroyed, and that overall VOC emissions do not exceed the solids equivalent limit of 4.52 pounds VOC per gallon of coating solids.
3. No person shall cause, let, permit, suffer, or allow the emissions of VOC from the surface coating of large appliances using baked coatings to exceed:

- (i) 2.3 pounds per gallon of coating, excluding water and exempt compounds, delivered to the coating applicator general one component and general multi-component coatings. If any coating delivered to the coating applicator contains more than 2.3 pounds VOC per gallon, the solids equivalent limit shall be 3.3 pounds VOC per gallon of coating solids delivered to the coating applicator;
 - (ii) 2.8 pounds per gallon of coating, excluding water and exempt compounds, delivered to the coating applicator from extreme high gloss, extreme performance, heat resistant, metallic, and solar absorbent, and pretreatment coatings. If any coating delivered to the coating applicator contains more than 2.8 pounds VOC per gallon, the solids equivalent limit shall be 4.5 pounds VOC per gallon of coating solids delivered to the coating applicator;
- 4. No person shall cause, let, permit, suffer, or allow the emissions of VOC from the surface coating of large appliances using air-dried coatings to exceed:
 - (i) 2.3 pounds per gallon of coating, excluding water and exempt compounds, delivered to the coating applicator from general one-component coatings. If any coating delivered to the coating applicator contains more than 2.3 pounds VOC per gallon, the solids equivalent limit shall be 3.3 pounds VOC per gallon of coating solids delivered to the coating applicator;
 - (ii) 2.8 pounds per gallon of coating, excluding water and exempt compounds, delivered to the coating applicator from general multi-component, extreme high gloss, extreme performance, heat resistant, metallic, solar absorbent and pretreatment coatings. If any coating delivered to the coating applicator contains more than 2.8 pounds VOC per gallon, the solids equivalent limit shall be 4.5 pounds VOC per gallon of coating solids delivered to the coating applicator;
- 5. Each owner or operator of a facility that coats large appliances shall ensure that all coating application systems utilize one or more of the application techniques stated below:
 - (i) Electrostatic spray application;
 - (ii) High volume low pressure (HVLP) spraying;
 - (iii) Flow/curtain application;

- (iv) Roll coating;
 - (v) Dip coat application including electrodeposition;
 - (vi) Brush coat;
 - (vii) Airless spray;
 - (viii) Air-assisted airless spray; or
 - (ix) Other coating application methods that achieve transfer efficiency equivalent to HVLP or electrostatic spray application methods, as determined by the Director.
6. Each owner or operator of a facility that coats large appliances shall comply with the following work practice standards:
- (i) store all VOC-containing coatings, thinners, and coating-related waste materials in closed containers;
 - (ii) ensure that mixing and storage containers used for VOC-containing coatings, thinners, and coating-related waste materials are kept closed at all times except when depositing or removing these materials;
 - (iii) minimize spills of VOC-containing coatings, thinners, and coating-related waste materials; and
 - (iv) convey VOC-containing coatings, thinners, and coating-related waste materials from one location to another in closed containers or pipes.
7. Each owner or operator of a facility that coats large appliances shall comply with the following housekeeping requirements for any affected cleaning operation:
- (i) store all VOC-containing cleaning materials and used shop towels in closed containers;
 - (ii) ensure that storage containers used for VOC-containing cleaning materials are kept closed at all times except when depositing or removing these materials;
 - (iii) minimize spills of VOC-containing cleaning materials;

- (iv) convey VOC-containing cleaning materials from one location to another in closed containers or pipes; and
 - (v) minimize VOC emissions from cleaning of application, storage, mixing, and conveying equipment by ensuring that equipment cleaning is performed without atomizing the cleaning solvent and all spent solvent is captured in closed containers.
8. The VOC limits specified in subparagraphs 3. and 4. do not apply to the following types of large appliance coatings and/or coating operations:
- (i) Touch-up and repair coatings;
 - (ii) Stencil coatings;
 - (iii) Safety-indicating coatings;
 - (iv) Solid-film lubricants;
 - (v) Electric-insulating and thermal-conducting coatings; and
 - (vi) Coating application utilizing hand-held aerosol cans.
9. The emission limits in subparagraphs 3. and 4. shall be achieved by:
- (i) the application of low solvent coating technology where each and every coating meets the limit expressed in pounds VOC per gallon of coating, excluding water, stated in subparagraphs 3. and 4. of this subparagraph; or
 - (ii) the application of low solvent coating technology where the 24-hour weighted average of all coatings on a single coating line or operation meets the solids equivalent limit expressed in pounds VOC per gallon of coating solids, stated in subparagraphs 3. and 4. of this subparagraph (averaging across lines is not allowed); or
 - (iii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the nonmethane volatile organic compounds which enter the control equipment are recovered or destroyed, and that overall VOC emissions do not exceed the solids equivalent limit, expressed in pounds VOC per gallon of coating solids stated in subparagraphs 3. and 4. of this subparagraph.

10. For the purpose of this subparagraph, the following definitions apply:
 - (i) "Application Area" means the area where the coating is applied by spraying, dipping or flow coating techniques.
 - (ii) "Single Coat" means a single film of coating applied directly to the metal substrate omitting the primer application.
 - (iii) "Large Appliances" means doors, cases, lids, panels and interior support parts of residential and commercial washers, dryers, ranges, refrigerators, freezers, water heaters, dishwashers, trash compactors, air conditioners and other similar products.

11. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (z) shall apply to facilities at which the actual emissions of volatile organic compounds from the use of large appliance coatings equal or exceed 15 pounds per day and are located in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 10.

12. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (z) shall apply to facilities at which the potential emissions of volatile organic compounds from the use of large appliance coatings equal or exceed 100 tons per year and are located outside the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 10.

13. Applicability. On and after January 1, 2015, the requirements of this subparagraph (z) apply to facilities at which actual emissions of volatile organic compounds from the use of large appliance coatings, before controls, equal or exceed 15 pounds per day (or 2.7 tons per 12-month rolling period) for facilities located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 3., 4., 5., 6., 7., 8., 9. and 10.

- (ii) Any physical or operational changes that are necessary to comply with the provisions specified in subparagraphs 3., 4., 5., 6., 7., 8., or 9. are subject to the compliance schedule specified in subparagraph 16.

- 14. Applicability. On and after January 1, 2015, the requirements of this subparagraph (z) shall apply to facilities at which potential emissions of volatile organic compounds from the use of large appliance coatings equal or exceed 100 tons per year and are located outside of counties of Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2, and 10.

- 15. Applicability: The requirements of subparagraphs 13. and 14. will no longer be applicable by the compliance deadlines if the counties specified in those subparagraphs are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015 and such counties continue to maintain that Standard thereafter. Instead, the provisions of subparagraphs 11. and 12. will continue to apply on and after January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of subparagraphs 13. and 14. will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.

- 16. Compliance schedule: All existing facilities subject to this subparagraph shall comply with the following compliance schedule:
 - (i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than **July 1, 2014.**

 - (ii) On-site of construction of emission control systems and/or modification of process or coatings must be completed by **November 1, 2014.**

 - (iii) Full compliance with the applicable requirements of subparagraphs 3., 4., 5., 6., 7., 8., and 9. must be completed before **January 1, 2015.**

(aa) **VOC Emissions from Wire Coating.**

1. No person shall cause, let, permit, suffer, or allow the emissions of VOC from wire coating operations to exceed:
 - (i) 1.7 pounds per gallon of coating, excluding water, delivered to the coating applicator from wire coating operations. If any coating delivered to the coating applicator contains more than 1.7 pounds VOC per gallon, the solids equivalent limit shall be 2.21 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (ii) The emission limit in this subsection shall apply to the oven(s) of wire coating operations.
2. The emission limits in this subsection shall be achieved by:
 - (i) the application of low solvent coating technology where each and every coating meets the limit of 1.7 pounds VOC per gallon of coating, excluding water, stated in paragraph 1. of this subsection; or
 - (ii) the application of low solvent coating technology where the 24-hour weighted average of all coatings on a single coating line or operation meets the solids equivalent limit of 2.21 pounds VOC per gallon of coating solids, stated in paragraph 1. of this subsection; averaging across lines is not allowed; or
 - (iii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the nonmethane volatile organic compounds which enter the control equipment are recovered or destroyed, and that overall VOC emissions do not exceed the solids equivalent limit of 2.21 pounds VOC per gallon of coating solids stated in paragraph 1. of this subsection.
3. For the purpose of this subsection, the following definitions apply:
 - (i) "Wire Coating" means the process of applying a coating of electrically insulating varnish or enamel to aluminum or copper wire for use in electrical machinery.

(bb) **Petroleum Liquid Storage.**

1. No person shall cause, let, permit, suffer, or allow the use of a fixed roof storage vessel with capacities of 40,000 gallons or greater containing a volatile petroleum liquid where true vapor pressure is greater than 1.52 psia unless:

- (i) the vessel has been fitted with a floating roof; or
 - (ii) the vessel has been fitted with control equipment demonstrated to have control efficiency equivalent to or greater than required in (i) of this paragraph, and approved by the Director.
2. The requirements of this subsection shall not apply to vessels:
- (i) underground, if the total volume of petroleum liquids added to and taken from the tank annually does not exceed twice the volume of the tank; or
 - (ii) having capacities less than 425,000 gallons used to store crude oil prior to lease custody transfer.
3. For the purpose of this subsection, the following definitions shall apply:
- (i) "Crude Oil" means a naturally occurring mixture which consists of hydrocarbons and/or sulfur, nitrogen and/or oxygen derivatives of hydrocarbons and which is a liquid at standard conditions;
 - (ii) "Floating Roof" means a storage vessel cover consisting of a double deck, pontoon single deck, internal floating cover or covered floating roof, which rests upon and is supported by the petroleum liquid being contained, and is equipped with a closure seal or seals to close the space between the roof edge and tank wall;
 - (iii) "Petroleum Liquids" means crude oil, condensate, and any finished or intermediate products manufactured in a petroleum refinery;
 - (iv) "Petroleum Refinery" means any facility engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, lubricants, or other products through distillation of crude oils, or through redistillation, cracking, extraction, or reforming of unfinished petroleum derivatives;
 - (v) "True Vapor Pressure" means the equilibrium partial pressure exerted by a petroleum liquid as determined in accordance with methods described in American Petroleum Institute Bulletin 2517, "Evaporation Loss from Floating Roof Tanks," 1962.

(cc) **Bulk Gasoline Terminals.**

1. No person may load gasoline into any tank trucks or trailers from any bulk gasoline terminal unless:

- (i) The bulk gasoline terminal is equipped with vapor control equipment capable of complying with subparagraph 1.(v) of this paragraph 1., properly installed, in good working order, in operation, and consisting of one of the following:
 - (I) An adsorber or condensation equipment which processes and recovers at least 90 percent of all vapors and gases from the equipment being controlled; or
 - (II) Vapor collection equipment which directs all vapors to a fuel gas system; or
 - (III) Control equipment demonstrated to have control efficiency equivalent to or greater than required in (I) or (II) of this paragraph, and approved by the Director; and
 - (ii) All displaced vapors and gases are vented only to the vapor control equipment; and
 - (iii) Complete drainage of any loading arm will be accomplished before it is removed from the tank; and
 - (iv) All loading and vapor lines are equipped with fittings which make vapor-tight connections and which close automatically when disconnected, or a loading arm with vapor return line and hatch seal designed to prevent the escape of gases and vapor while loading;
 - (v) Sources and persons affected under this subsection may not allow mass emissions of volatile organic compounds from control equipment to exceed 4.7 grains per gallon of gasoline loaded.
2. Sources and persons affected under this subsection shall comply with the vapor collection and control system requirements of Rule 3913-1-.02(2)(ss).
 3. The requirements of this subsection shall not apply to loading of gasoline into tank trucks or trailers of less than 3000 gallons capacity outside those counties of Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Fulton, Gwinnett, Henry, Paulding, and Rockdale.
 4. The requirements of this subsection shall apply to loading of gasoline into tank trucks or trailers of less than 3000 gallons capacity inside those

counties of Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Fulton, Gwinnett, Henry, Paulding, and Rockdale after July 1, 1991.

5. For the purpose of this subsection, the following definitions apply:
 - (i) "Bulk Gasoline Terminal" means a gasoline storage facility which receives gasoline from refineries primarily by pipeline, ship, or barge, and delivers gasoline to bulk gasoline plants or to commercial or retail accounts primarily by tank truck and has an average daily throughput of more than 20,000 gallons of gasoline.
 - (ii) "Gasoline" means a petroleum distillate having a Reid vapor pressure of 4 psia or greater.

(dd) **Cutback Asphalt.**

1. After January 1, 1981, no person may cause, allow or permit the use of cutback asphalts for paving purposes except as necessary for:
 - (i) long-life stockpile storage; or
 - (ii) the use or application at ambient temperatures less than 50°F; or
 - (iii) solely as a penetrating prime coat; or
 - (iv) base stabilization.
2. For the purpose of this subsection, the following definitions shall apply:
 - (i) "Asphalt" means a dark-brown to black cementitious material (solid, semisolid, or liquid in consistency) in which the predominating constituents are bitumens which occur in nature as such or which are obtained as residue in refining petroleum;
 - (ii) "Cutback Asphalt" means asphalt cement which has been liquified by blending with petroleum solvents (diluent). Upon exposure to atmospheric conditions the diluents evaporate, leaving the asphalt cement to perform its function;
 - (iii) "Penetrating Prime Coat" means an application of low viscosity liquid asphalt to an absorbent surface. It is used to prepare an untreated base for an asphalt surface. The prime penetrates the base and plugs the voids, hardens the top, and helps bind it to the overlying asphalt course. It also reduces the necessity of maintaining an untreated base course prior to placing the asphalt pavement.

(ee) **Petroleum Refinery.**

1. Persons responsible for any vacuum producing system at a petroleum refinery shall control the emissions of any noncondensable volatile organic compound from the condensers, hot wells or accumulators by:
 - (i) Piping the noncondensable vapors to a firebox or incinerator; or
 - (ii) Compressing the vapors and adding them to the refinery fuel gas; or
 - (iii) Controlling the vapors by using control equipment demonstrated to have control efficiency equivalent to or greater than required in (i) or (ii) of this paragraph, and approved by the Director; and

2. Persons responsible for any wastewater (oil/water) separator at a petroleum refinery shall:
 - (i) Provide covers and seals approved by the Director, on all separators and forebays; and
 - (ii) Equip all openings in covers, separators, and forebays with lids or seals such that the lids or seals are in the closed position at all times except when in actual use.

3. Before January 1, 1980, the owner or operator of any affected petroleum refinery located in this State shall develop and submit to the Director for approval a detailed procedure for minimization of volatile organic compound emissions during process unit turnaround. As a minimum, the procedure shall provide for:
 - (i) Depressurization venting of the process unit or vessel to a vapor recovery system, flare or firebox; and
 - (ii) No emission of volatile organic compounds from a process unit or vessel unless its internal pressure is 19.7 psi or less.

4. For the purpose of this subsection, the following definitions shall apply:
 - (i) "Accumulator" means the reservoir of a condensing unit receiving the condensate from the condenser;
 - (ii) "Condenser" means any heat transfer device used to liquefy vapors by removing their latent heats of vaporization. Such devices include, but are not limited to, shell and tube, coil, surface, or contact condensers;

- (iii) "Firebox" means the chamber or compartment of a boiler or furnace in which materials are burned but does not mean the combustion chamber of an incinerator;
- (iv) "Forebays" means the primary sections of a wastewater separator;
- (v) "Hot Well" means the reservoir of a condensing unit receiving the warm condensate from the condenser;
- (vi) "Petroleum Refinery" means any facility engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, lubricants, or other products through distillation, cracking, extraction, or refining of unfinished petroleum derivatives;
- (vii) "Refinery Fuel Gas" means any gas which is generated by a petroleum refinery process unit and which is combusted, including any gaseous mixture of natural gas and fuel gas;
- (viii) "Turnaround" means the procedure of shutting a refinery unit down after a run to do necessary maintenance and repair work and putting the unit back on stream;
- (ix) "Vacuum Producing System" means any reciprocating, rotary, or centrifugal blower or compressor, or any jet ejector or device that takes suction from a pressure below atmospheric and discharges against atmospheric pressure;
- (x) "Vapor Recovery System" means a system that prevents releases to the atmosphere of no less than 90 percent by weight of organic compounds emitted during the operation of any transfer, storage, or process equipment;
- (xi) "Wastewater (oil/water) Separator" means any device or piece of equipment which utilizes the difference in density between oil and water to remove oil and associated chemicals from water or any device, such as a flocculation tank, clarifier, etc., which removes petroleum derived compounds from wastewater.

(ff) Solvent Metal Cleaning.

1. No person shall cause, suffer, allow, or permit the operation of a cold cleaner degreaser unless the following requirements for control of emissions of the volatile organic compounds are satisfied:

- (i) The degreaser shall be equipped with a cover to prevent the escape of volatile organic compounds during periods of non-use;
 - (ii) The degreaser shall be equipped with a facility for draining cleaned parts before removal;
 - (iii) If used, the solvent spray must be a solid, fluid stream (not a fine, atomized or shower type spray) and at a pressure which does not cause excessive splashing;
 - (iv) If the solvent volatility is 0.60 psi or greater measured at 100°F, or if the solvent is heated above 120°F, then one of the following control devices must be used:
 - (I) Freeboard that gives a freeboard ratio of 0.7 or greater;
 - (II) Water cover (solvent must be insoluble in and heavier than water);
 - (III) Other systems of equivalent control, such as a refrigerated chiller or carbon adsorption.
 - (v) Waste solvent shall be stored only in covered containers and shall not be disposed of by such a method as to allow excessive evaporation into the atmosphere.
2. No person shall cause, suffer, allow, or permit the operation of an open top vapor degreaser unless the following requirements for control of emissions of volatile organic compounds are satisfied:
- (i) The degreaser shall be equipped with a cover to prevent the escape of volatile organic compounds during periods of non-use;
 - (ii) The degreaser shall be equipped with one of the following control devices:
 - (I) Freeboard ratio greater than or equal to 0.75;
 - (II) Refrigerated chiller;
 - (III) Enclosed design (cover or door opens only when the dry part is actually entering or exiting the degreaser);
 - (IV) Carbon adsorption system, with ventilation greater than 50 cfm/ft² of air/vapor area (when cover is open), and

exhausting less than 25 ppm solvent averaged over one complete adsorption cycle; or

- (V) Control equipment demonstrated to have control efficiency equivalent to or better than any of the above.
- (iii) The degreaser shall be operated in accordance with the following procedures. Operating instructions summarizing these procedures shall be displayed on the degreaser.
 - (I) Keep cover closed at all times except when processing work loads through the degreaser;
 - (II) Minimize solvent carry-out by the following measures:
 - I. Rack parts to allow full drainage;
 - II. Degrease the work load in the vapor zone at least 30 seconds or until condensation ceases;
 - III. Tip out any pools of solvent on the cleaned parts before removal;
 - IV. Allow parts to dry within the degreaser for at least 15 seconds or until visually dry.
 - (III) Do not degrease porous or adsorbent materials, such as cloth, leather, wood or rope;
 - (IV) Work loads should not occupy more than half of the degreaser's open top area;
 - (V) The vapor level should not drop more than 4 inches when the workload enters the vapor zone;
 - (VI) Never spray above the vapor level;
 - (VII) Repair solvent leaks immediately, or shutdown the degreaser;
 - (VIII) Ventilation fans should not be used near the degreaser opening;

- (IX) Water should not be visually detectable in solvent exiting the water separator.
 - (iv) Waste solvent shall be stored only in covered containers and shall not be disposed of or transferred to another party by such a method as to allow excessive evaporation into the atmosphere.
3. No person shall cause, suffer, allow, or permit the operation of a conveyORIZED degreaser unless the following requirements for control of emissions of the volatile organic compounds are satisfied.
- (i) The degreaser shall be equipped with a cover to prevent the escape of volatile organic compounds during periods of non-use;
 - (ii) The degreaser shall be equipped with either a drying tunnel, or other means such as rotating (tumbling) basket, sufficient to prevent cleaned parts from carrying out solvent liquid or vapor;
 - (iii) The degreaser shall be equipped with one of the following:
 - (I) Refrigerated chiller;
 - (II) Carbon adsorption system, with ventilation greater than 50 cfm/ft² of air/vapor area (when down-time covers are open), and exhausting less than 25 ppm of solvent by volume averaged over a complete adsorption cycle; or
 - (III) Control equipment demonstrated to have control efficiency equivalent to or better than any of the above.
 - (iv) The degreaser shall be operated in accordance with the following procedure. Operating instructions summarizing these procedures shall be displayed on the degreaser.
 - (I) Exhaust ventilation should not exceed 65 cfm per ft² of degreaser opening, unless necessary to meet OSHA requirements. Work place fans should not be used near the degreaser opening;
 - (II) Minimize carryout emissions by:
 - I. Racking parts for best drainage; Maintaining vertical conveyor speed at less than 11 ft/min.

- (III) Repair solvent leaks immediately, or shutdown the degreaser;
 - (IV) Water should not visibly be detectable in the solvent exiting the water separator;
 - (V) Down-time cover must be placed over entrances and exits of conveyORIZED degreasers immediately after the conveyor and exhaust are shutdown and removed just before they are started up.
- (v) Waste solvent shall be stored only in covered containers and shall not be disposed of or transferred to another party by such a method as to allow excessive evaporation into the atmosphere.
4. The following requirements apply to degreasers using trichloroethylene, carbon tetrachloride, and/or chloroform in a total concentration greater than 5 percent by weight:
- (i) Degreasers constructed or reconstructed after November 29, 1993 shall comply with paragraph 391-3-1-.02(9)(b)34. "Emission Standard for Halogenated Solvent Cleaning, 40 CFR 63, Subpart T, as amended" (NESHAP) and not paragraphs 1. through 3. of this subsection (ff) (Georgia Rule).
 - (ii) Existing degreasers (constructed or reconstructed on or before November 29, 1993) shall comply with paragraphs 1. through 3. of this subsection (ff) (Georgia Rule) until December 2, 1997; after which they must comply with paragraph 391-3-1-.02(9)(b)34. (NESHAP).
 - (iii) An existing degreaser (as defined above) may elect to comply with paragraph 391-3-1-.02(9)(b)34. prior to December 2, 1997. In such case, they are not required comply with Paragraphs 1. through 3. of this subsection (ff) (Georgia Rule) once they are in compliance with paragraph 391-3-1-.02(9)(b)34. (NESHAP).
 - (iv) Any facility which currently complies with paragraphs 391-3-1-.02(2)(ff)1. through 3. (Georgia Rule) which will be changing to comply with paragraph 391-3-1-.02(9)(b)34. (NESHAP) should submit a schedule of construction/ modification for changes necessary to comply with 391-3-1-.02(9)(b)34. (NESHAP) as soon

as practically possible but no later than 60 days prior to any construction/modification.

5. For the purpose of this subsection, the following definitions shall apply:
- (i) "Cold Cleaning" means the batch process of cleaning and removing soils from metal surfaces by spraying, brushing, flushing or immersion while maintaining the solvent below its boiling point. Wipe cleaning is not included in this definition;
 - (ii) "Conveyorized Degreasing" means the continuous process of cleaning and removing soils from metal surfaces by operating with either cold or vaporized solvents;
 - (iii) "Freeboard Height" means the distance from the top of vapor zone to the top of the degreaser tank;
 - (iv) "Freeboard Ratio" means the freeboard height divided by the width (smallest dimension) of the degreaser;
 - (v) "Open Top Vapor Degreasing" means the batch process of cleaning and removing soils from metal surfaces by condensing hot solvent vapor on the colder metal parts;
 - (vi) "Solvent Metal Cleaning" means the process of cleaning soils from metal surfaces by cold cleaning, or open top vapor degreasing or conveyorized degreasing. Solvent metal cleaning does not include cleaners that use aqueous cleaning solvent or buckets, pails and beakers with capacities of two gallons or less.
 - (vii) "Aqueous Cleaning Solvent" means a cleaning solvent in which water is the primary ingredient (greater than 80 percent by weight of cleaning solvent solution as applied must be water).
6. The requirements of this subsection shall not apply to any solvent metal cleaning operation subject to Section 391-3-1-.02(2)(kkk) of the Georgia Rules for Air Quality Control "VOC Emissions from Aerospace manufacturing and Rework Facilities."

(gg) **Kraft Pulp Mills.**

1. Except as provided in paragraph 2. of this subsection, no person shall cause, let, suffer, permit, or allow the emissions of TRS from any kraft

pulp mill in operation, or under construction contract, on or before September 24, 1976, in amounts equal to or exceeding the following:

- (i) Recovery Furnaces.
 - (I) Old Recovery Furnaces: 20 parts per million of TRS on a dry basis and as a 24-hour average, corrected to 8 volume percent oxygen;
 - (II) New Recovery Furnaces: 5 parts per million of TRS on a dry basis and as a 24-hour average, corrected to 8 volume percent oxygen;
 - (III) Cross Recovery Furnaces: 25 parts per million of TRS on a dry basis and as a 24-hour average, corrected to 8 volume percent oxygen.

- (ii) Digester System or Multiple-Effect Evaporator System: 5 parts per million of TRS on a dry basis and a 24-hour average, corrected to 10 volume percent oxygen unless the following conditions are met:
 - (I) The gases are combusted in a lime kiln subject to the provisions of paragraph (iv) of this subsection; or
 - (II) The gases are combusted in a recovery furnace subject to the provisions of paragraph (i) of this subsection; or
 - (III) The gases are combusted with other gases in an incinerator or other device, or combusted in a lime kiln or recovery boiler not subject to the provisions of this subsection, and are subjected to a minimum temperature of 1200°F for at least 0.5 second; or
 - (IV) The gases are controlled by a means other than combustion. In this case, the gases discharged shall not contain TRS in excess of five parts per million on a dry basis and as a 24-hour average, corrected to the actual oxygen content of the untreated gas stream.

- (iii) Smelt Dissolving Tanks: 0.0168 pounds of TRS per ton of black liquor solids (dry weight).

- (iv) Lime Kilns: 40 parts per million of TRS on a dry basis and as a 24-hour average, corrected to 10 volume percent oxygen.

2. Nothing in paragraph 1. shall prevent the owner or operator of a kraft pulp mill subject to the provisions of this subsection (gg) from applying to the Director for permission to control TRS emissions from the kraft pulp mill under the provisions of this paragraph provided that:

(i) General Provisions.

(I) The owner or operator of such kraft pulp mill makes such application in writing no later than six months following the notification date; and

(II) In the event that the kraft pulp mill contains TRS emitting process equipment which is subject to the New Source Performance Standard for Kraft Pulp Mills, 391-3-1-.02(2)(b)23., then that TRS emitting process equipment must also comply with the applicable New Source Performance Standard TRS emission limitation(s);

(III) The owner or operator of such kraft pulp mill may not elect to control TRS emissions from process equipment not subject to the provisions of this subsection (gg) in lieu of controlling TRS emissions from those sources subject to this subsection (gg); and

(IV) For the purpose of this paragraph 2.; the maximum allowable emissions of TRS shall be calculated using the production rate (annual average or most recent 12 months of record) for the kraft pulp mill expressed as tons of air dried pulp per day, and the allowable emission rate of TRS from the kraft pulp mill shall be expressed as pounds of TRS per ton of air dried pulp.

(V) For the purpose of this paragraph, the "notification date" means September 1, 1988.

(ii) Emission Limitation: No person shall cause, let, suffer, permit, or allow the total emissions of TRS from the following processes: recovery furnace(s), lime kiln(s), smelt dissolving tank(s), digester system, multiple-effect evaporator system, equal to or exceeding the amount determined by the following formula:

$A = RB + LK + 0.065$ pounds of TRS per ton of air dried pulp;

The values for the terms RB and LK shall be determined using the following formula:

$$LK = \frac{(0.20U + 0.04V)}{U + V}$$

$$RB = \frac{(0.15W + 0.15X + 0.60Y + 0.75Z)}{W + X + Y + Z}$$

Where:

A = the total amount of allowable TRS emissions from the kraft pulp mill expressed as pounds of TRS per ton of air dried pulp;

LK = the fraction of the total allowable emission of TRS in pounds per ton of air dried pulp for lime kilns;

RB = the fraction of the total allowable emission of TRS in pounds per ton of air dried pulp for recovery furnaces;

U = tons per hour of lime mud solids calcined in lime kiln(s) not subject to the New Source Performance Standard for Kraft Pulp Mills;

V = tons per hour of lime solids calcined in lime kiln(s) subject to the New Source Performance Standard for Kraft Pulp Mills;

W = pounds per hour of black liquor solids burned in recovery furnace(s) subject to the New Source Performance Standard for Kraft Pulp Mills;

X = pounds per hour of black liquor solids burned in new recovery furnace(s);

Y = pounds per hour of black liquor solids burned in old recovery furnace(s);

Z = pounds per hour of black liquor solids burned in cross recovery furnace(s);

3. For the purpose of this subsection, the following definitions shall apply:
 - (i) "New Recovery Furnace" means a recovery furnace which had stated in the purchase contract a TRS performance guarantee or

which included in the purchase contract a statement that the control of air pollutants was a design objective and which has incorporated into its design: membrane wall or welded wall construction; and emission control air systems.

- (ii) "Old Recovery Furnace" means a recovery furnace which is not classified as a new recovery furnace.

(hh) Petroleum Refinery Equipment Leaks.

1. No person shall cause, let, suffer, or allow the use of petroleum refinery equipment unless:
 - (i) A plan is submitted to the Director by no later than July 1, 1981 for monitoring VOC leaks. Such a program must contain:
 - (I) A list of refinery units and the quarter in which they will be monitored;
 - (II) A copy of the log book format;
 - (III) The make and model of the monitoring equipment to be used.
 - (ii) Monitoring for potential VOC leaks is carried out no less frequently than:
 - (I) Yearly using detection equipment for pump seals, pipeline valves in liquid service, and process drains;
 - (II) Quarterly using detection equipment for compressor seals, pipeline valves in gaseous service, and pressure relief valves in gaseous service;
 - (III) Weekly by visible inspection for all pump seals;
 - (IV) Immediately using detection equipment for any pump seals from which liquids are observed dripping and immediately after repair of any component previously found to be leaking;
 - (V) Within 24 hours for a relief valve after it has vented to the atmosphere.

- (iii) All components which have emissions with a VOC concentration exceeding 10,000 ppm, as determined by Method 21 of the reference in Section 391-3-1-.02(3)(a) of these Rules, shall be affixed with a weatherproof and readily visible tag, bearing an identification number and the date on which the leak is located. This tag shall remain in place until the leaking component is repaired.
 - (iv) Leaking components as defined by (iii) above which can be repaired without a unit shutdown shall be repaired and retested as soon as practicable but no later than 15 days after the leak is identified.
 - (v) Leaking components as defined by (iii) above which require unit shutdown for repair may be corrected at the regularly scheduled turnaround unless the Director at his discretion requires early unit turnaround based on the number and severity of tagged leaks awaiting turnaround.
 - (vi) Except for safety pressure relief valves, no owner or operator of a petroleum refinery shall install or operate a valve at the end of a pipe or line containing volatile organic compounds unless the pipe or line is sealed with a second valve, a blind flange, a plug, or a cap. The sealing device may be removed only when a sample is being taken or during maintenance operations.
 - (vii) Pipeline valves and pressure relief valves in gaseous volatile organic compound service shall be marked in some manner that will be readily obvious to both refinery personnel performing monitoring and the Director.
 - (viii) Pressure relief devices which are connected to an operation flare header, vapor recovery device, inaccessible valves, storage tank valves, and valves that are not externally regulated are exempt from the monitoring requirements of this rule.
2. The owner or operator of a petroleum refinery shall maintain a leaking components monitoring log. Copies of the monitoring log shall be retained by the owner or operator for a minimum of two years after the date on which the record was made or the report prepared and shall immediately be made available to the Director, upon verbal or written request, at any reasonable time. The monitoring log shall contain the following data:
- (i) The name and the process unit where the component is located.

- (ii) The type of component (e.g., valve, seal).
 - (iii) The tag number of the component.
 - (iv) The date on which a leaking component is discovered.
 - (v) The date on which a leaking component is repaired.
 - (vi) The date and instrument reading of the recheck procedure after a leaking component is repaired.
 - (vii) A record of the calibration of the monitoring instrument.
 - (viii) Those leaks that cannot be repaired until turnaround.
 - (ix) The total number of components checked and the total number of components found leaking.
3. The owner or operator of a petroleum refinery shall:
- (i) Submit a report to the Director by the fifteenth day of January, April, July, and October that lists all leaking components that were located during the previous three calendar months but not repaired within fifteen days, all leaking components awaiting unit turnaround, the total number of components inspected, and the total number of components found leaking.
 - (ii) Submit a signed statement with the report attesting to the fact that, all monitoring and repairs were performed as stipulated in the monitoring program.
 - (iii) The first quarterly report shall be submitted to the Director no later than January 1, 1982.
4. The Director, upon written notice, may modify the monitoring, record keeping and reporting requirements.
5. For the purpose of this subsection, the following definitions apply:
- (i) "Petroleum refinery" means any facility engaged in producing gasoline, aromatics, kerosene, distillate fuel oils residual fuel oils, lubricants, asphalt, or other products through distillation of petroleum or through redistillation, cracking, rearrangement or reforming of unfinished petroleum derivatives.

- (ii) "Component" means any piece of equipment which has the potential to leak volatile organic compounds when tested in the manner described in subparagraph 1.(iii). These sources include, but are not limited to, pumping seals, compressor seals, seal oil degassing vents pipeline valves, pressure relief devices, process drains, and open ended pipes. Excluded from these sources are valves which are not externally regulated.
- (iii) "Liquid service" means equipment which processes, transfers or contains a volatile organic compound or mixture of volatile organic compounds in the liquid phase.
- (iv) "Gas service" means equipment which processes, transfers or contains a volatile organic compound or mixture of volatile organic compounds in the gaseous phase.
- (v) "Valves not externally regulated" means valves that have no external controls, such as in-line check valves.
- (vi) "Refinery unit" means a set of compounds which are a part of a basic process operation, such as, distillation, hydrotreating, cracking or reforming of hydrocarbons.

(ii) VOC Emissions from Surface Coating of Miscellaneous Metal Parts and Products.

1. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of miscellaneous metal parts and products to exceed:
 - (i) 4.3 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies clear coatings. If any coating delivered to the coating applicator contains more than 4.3 pounds VOC per gallon, the solids equivalent limit shall be 10.3 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (ii) 3.5 pounds per gallon of coating, excluding water, delivered to a coating applicator in a coating application system that is air dried or forced warm air dried at temperatures up to 194°F. If any coating delivered to the coating applicator contains more than 3.5 pounds VOC per gallon, the solids equivalent limit shall be 6.67 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (iii) 3.5 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies extreme performance coatings. If any

coating delivered to the coating applicator contains more than 3.5 pounds VOC per gallon, the solids equivalent limit shall be 6.67 pounds VOC per gallon of coating solids delivered to the coating applicator.

- (iv) 6.2 pounds per gallon of coating, excluding water, delivered to a coating applicator in a high performance architectural coating operation; and
 - (v) 3.0 pounds per gallon of coating, excluding water, delivered to a coating applicator for all other coatings and coating application systems. If any coating delivered to the coating applicator contains more than 3.0 pounds VOC per gallon, the solids equivalent limit shall be 5.06 pounds VOC per gallon of coating solids delivered to the coating applicator.
2. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of miscellaneous metal parts and products using air-dried coatings to exceed:
- (i) 2.8 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies anyone of the following air-dried coatings: general one component; general multi component; military specification; drum coating - new exterior. If any coating delivered to the coating applicator contains more than 2.8 pounds VOC per gallon, the solids equivalent limit shall be 4.52 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (ii) 3.5 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies any one of the following air-dried coatings: camouflage; electric-insulating varnish; etching filler; high temperature; metallic; mold-seal; pan backing; pretreatment; drum coating - new interior; drum coating - reconditioned, exterior; silicone release; vacuum-metalizing; extreme high-gloss; extreme performance; heat-resistant; drum coating - reconditioned interior; solar-absorbent; prefabricated architectural multi-component; prefabricated architectural one-component. If any coating delivered to the coating applicator contains more than 3.5 pounds VOC per gallon, the solids equivalent limit shall be 6.67 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (iii) 3.5 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies the following air-dried coating: repair and touch-up.

- (iv) 6.2 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies the following air-dried coating: high performance architectural.
3. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of miscellaneous metal parts and products using baked coatings to exceed:
- (i) 2.3 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies anyone of the following baked coatings: general one component; general multi-component; military specification; prefabricated architectural multi-component; prefabricated architectural one-component. If any coating delivered to the coating applicator contains more than 2.3 pounds VOC per gallon, the solids equivalent limit shall be 3.35 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (ii) 2.8 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies drum coating - new exterior coating. If any coating delivered to the coating applicator contains more than 2.8 pounds VOC per gallon, the solids equivalent limit shall be 4.52 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (iii) 3.0 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies anyone of the following baked coatings: drum coating - reconditioned interior; camouflage; electric-insulating varnish; etching filler; extreme high-gloss; extreme performance; heat-resistant; high temperature; metallic; mold-seal; pan backing; pretreatment; drum coating - new interior; drum coating - reconditioned exterior; silicone release; solar-absorbent; and vacuum-metalizing. If any coating delivered to the coating applicator contains more than 3.0 pounds VOC per gallon, the solids equivalent limit shall be 5.06 pounds VOC per gallon of coating solids delivered to the coating applicator.
 - (iv) 6.2 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies the following baked coating: high performance architectural.
 - (v) 3.0 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies repair and touch-up coatings.

4. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of motor vehicle materials at a facility that is not an automobile or light-duty truck manufacturing facility to exceed:
 - (i) 1.7 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies the following motor vehicle materials: gasket/gasket sealing material and bedliner.
 - (ii) 3.5 pounds per gallon of coating, excluding water, delivered to a coating applicator that applies the following motor vehicle materials: cavity wax, sealer, deadener, underbody coating, trunk interior coating, and lubricating wax/compound.
5. If more than one emission limitation in this subparagraph (ii) applies to a specific coating, then the least stringent emission limitation in this subparagraph (ii) of this subsection shall be applied.
6. All VOC emissions from solvent washings shall be considered in the emission limitations unless the solvent is directed into containers that prevent evaporation into the atmosphere.
7. The emission limits in this subsection shall be achieved by:
 - (i) the application of low solvent coating technology where each and every coating meets the limit expressed in pounds VOC per gallon of coating, excluding water, stated in paragraphs 1., 2., 3., and 4. of this subsection; or
 - (ii) the application of low solvent coating technology where the 24-hour weighted average of all coatings on a single coating line or operation meets the solids equivalent limit expressed in pounds VOC per gallon of coating solids, stated in paragraphs 1., 2., and 3. of this subsection; averaging across lines is not allowed; or
 - (iii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the nonmethane volatile organic compounds which enter the control equipment are recovered or destroyed, and that overall VOC emissions do not exceed the solids equivalent limit, expressed in pounds VOC per gallon of coating solids stated in paragraphs 1., 2., 3., and 4. of this subsection.

- (iv) for high performance architectural coatings, compliance may be achieved only as stated in subparagraph 7.(i) or 7.(iii). There is no solids equivalent limit for such coatings.
- (v) for motor vehicle materials, compliance may be achieved only as stated in subparagraph 7.(i). There is no solids equivalent limit for such coatings.
- (vi) for repair and touch-up materials, compliance may be achieved only as stated in subparagraphs 7.(i). There is no solids equivalent limit for such coatings.

8. For the purpose of this subsection, the following definitions apply:

- (i) "Air dried coating" means coatings which are dried by the use of air or forced warm air at temperatures up to 194°F.
- (ii) "Baked coating" means a coating that is cured at a temperature at or above 194°F.
- (iii) "Bedliner" means a multi-component coating, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to a cargo bed after the application of topcoat to provide additional durability and chip resistance.
- (iv) "Cavity wax" means a coating, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied into the cavities of the vehicle primarily for the purpose of enhancing corrosion protection.
- (v) "Camouflage coating" means a coating used, principally by the military, to conceal equipment from detection.
- (vi) "Clear coating" means a colorless coating which contains binders, but no pigment, and is formulated to form a transparent film.
- (vii) "Coating application system" means all operations and equipment which applies, conveys, and dries a surface coating, including, but not limited to spray booths, flow coaters, flashoff areas, air dryers and ovens.
- (viii) "Deadener" means a coating, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to

selected vehicle surfaces primarily for the purpose of reducing the source of road noise in the passenger compartment.

- (ix) "Drum" means any cylindrical metal shipping container larger than 12 gallons capacity but no larger than 110 gallons capacity.
- (x) "Electric dissipating coating" means a coating that rapidly dissipates a high-voltage electric charge.
- (xi) "Electric-insulating varnish" means a non-convertible-type coating applied to electric motors, components of electric motors, or power transformers, to provide electrical, mechanical, and environmental protection or resistance.
- (xii) "EMI/RFI Shielding" means a coating used on electrical or electronic equipment to provide shielding against electromagnetic interference, radio frequency interference, or static discharge.
- (xiii) "Etching filler" means a coating that contains less than 23 percent solids by weight, at least 0.5 percent acid by weight, and is used instead of applying a pretreatment coating followed by a primer.
- (xiv) "Extreme high-gloss coating" means a coating which, when tested by the American Society for Testing Material Test Method D-523 adopted in 1980, shows a reflectance of 75 or more on a 60 degree meter.
- (xv) "Extreme-performance coating" means a coating used on a metal or plastic surface where the coated surface is, in its intended use, subject to the following:
 - (a) Chronic exposure to corrosive, caustic or acidic agents, chemicals, chemical fumes, chemical mixtures or solutions; or
 - (b) Repeated exposure to temperatures in excess of 250°F; or
 - (c) Repeated heavy abrasion, including mechanical wear and repeated scrubbing with industrial grade solvents, cleansers or scouring agents. Extreme performance coatings include, but are not limited to, coatings applied to locomotives, railroad cars, farm machinery, and heavy duty trucks.

- (xvi) "Extreme environmental conditions" means exposure to any of: the weather all of the time, temperatures consistently above 200°F, detergents, abrasive and scouring agents, solvents, corrosive atmospheres, or similar environmental conditions;
- (xvii) "Gasket/sealing material" means a fluid, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to coat a gasket or replace and perform the same function as a gasket. Automobile and light-duty truck gasket/gasket sealing material includes room temperature vulcanization (RTV) seal material.
- (xviii) "Heat-resistant coating" means a coating that must withstand a temperature of at least 400°F during normal use.
- (xix) "High-performance architectural coating" means a coating used to protect architectural subsections and which meets the requirements of the Architectural Aluminum Manufacturer Association's publication number AAMA 2604-05 (Voluntary Specification, Performance Requirements and Test Procedures for High Performance Organic Coatings on Aluminum Extrusions and Panels) or 2605-05 (Voluntary Specification, Performance Requirements and Test Procedures for Superior Performing Organic Coatings on Aluminum Extrusions and Panels).
- (xx) "High-temperature coating" means a coating that is certified to withstand a temperature of 1000°F for 24 hours.
- (xxi) "Low solvent coating" means coatings which contain less organic solvent than the conventional coatings used by the industry. Low solvent coatings include water-borne, higher solids, electrodeposition and powder coatings.
- (xxii) "Lubricating wax/compound" means a protective lubricating material, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to vehicle hubs and hinges.
- (xxiii) "Mask coating" means thin film coating applied through a template to coat a small portion of a substrate.
- (xxiv) "Metallic coating" means a coating which contains more than five grams of metal particles per liter of coating as applied. "Metal

particles" are pieces of a pure elemental metal or combination of elemental metals.

- (xxv) "Miscellaneous metal parts and products" means surface coating of products manufactured by the following industrial source categories: large farm machinery, small farm machinery, small appliances, commercial machinery, industrial machinery, fabricated metal products and any other industrial category which coats metal parts or products under the Standard Industry Classification Code Major Groups 33, 34, 35, 36, 37, 38, 40, and 41. The miscellaneous metal parts and products source category does not include:
- (I) automobiles and light-duty trucks;
 - (II) metal cans;
 - (III) flat metal sheets and strips in the form of rolls or coils;
 - (IV) magnet wire for use in electrical machinery;
 - (V) metal furniture;
 - (VI) large appliances;
 - (VII) aerospace manufacturing and rework operations;
 - (VIII) automobile refinishing;
 - (IX) customized top coating of automobiles and trucks, if production is less than 35 vehicles per day; and
 - (X) exterior of marine vessels.
- (xxvi) "Military specification coating" means a coating which has a formulation approved by a United States Military Agency for use on military equipment.
- (xxvii) "Mold seal coating" means the initial coating applied to a new mold or a repaired mold to provide a smooth surface which, when coated with a mold release coating, prevents products from sticking to the mold.

- (xxviii) "Multi-colored coating" means a coating which exhibits more than one color when applied, and which means packaged in a single container and applied in a single coat.
- (xxix) "Multi-component coating" means a coating requiring the addition of a separate reactive resin, commonly known as a catalyst or hardener, before application to form an acceptable dry film.
- (xxx) "One-component coating" means a coating that is ready for application as it comes out of its container to form an acceptable dry film. A thinner, necessary to reduce the viscosity, is not considered a component.
- (xxxi) "Optical coating" means a coating applied to an optical lens.
- (xxxii) "Pan-backing coating" means a coating applied to the surface of pots, pans, or other cooking implements that are exposed directly to a flame or other heating elements.
- (xxxiii) "Prefabricated architectural component coatings" are coatings applied to metal parts and products which are to be used as an architectural structure.
- (xxxiv) "Pretreatment coating" means a coating which contains no more than 12 percent solids by weight, and at least 0.5 percent acid by weight, is used to provide surface etching, and is applied directly to metal surfaces to provide corrosion resistance, adhesion, and ease of stripping.
- (xxxv) "Prime coat" means the first of two or more films of coating applied to a metal surface.
- (xxxvi) "Repair coating" means a coating used to re-coat portions of a previously coated product which has sustained mechanical damage to the coating following normal coating operations.
- (xxxvii) "Sealer" means a high viscosity material, used at a facility that is not an automobile or light-duty truck assembly coating facility, generally, but not always, applied in the paint shop after the body has received an electrodeposition primer coating and before the application of subsequent coatings (e.g., primer-surfacer). The primary purpose of automobile and light-duty truck sealer is to fill body joints completely so that there is no

intrusion of water, gases or corrosive materials into the passenger area of the body compartment. Such materials are also referred to as sealant, sealant primer, or caulk.

- (xxxviii) "Shock-free coating" means a coating applied to electrical components to protect the user from electric shock. The coating has characteristics of being of low capacitance and high resistance, and having resistance to breaking down under high voltage.
- (xxxix) "Silicone-release coating" means any coating which contains silicone resin and is intended to prevent food from sticking to metal surfaces such as baking pans.
- (xl) "Single coat" means one film of coating applied to a metal surface.
- (xli) "Solar-absorbent coating" means a coating which has as its prime purpose the absorption of solar radiation.
- (xlii) "Stencil coating" means an ink or a pigmented coating which is rolled or brushed onto a template or stamp in order to add identifying letters, symbols and/or numbers.
- (xliii) "Topcoat" means the final film or series of films of coating applied in a two-coat or more operation.
- (xliv) "Touch-up coating" means a coating used to cover minor coating imperfections appearing after the main coating operation.
- (xlv) "Translucent coating" means a coating which contains binders and pigment and is formulated to form a colored, but no opaque, film.
- (xlvi) "Transfer efficiency" means the weight (or volume) of coating solids adhering to the surface being coated divided by the total weight (or volume) of coating solids delivered to the applicator.
- (xlvii) "Trunk interior coating" means a coating, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to the trunk interior to provide chip protection.
- (xlviii) "Two-component coating" means a coating requiring the addition of a separate reactive resin, commonly known as a catalyst, before application to form an acceptable dry film.

(xlix) "Underbody coating" means a coating, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to the undercarriage or firewall to prevent corrosion and/or provide chip protection.

(l) "Vacuum-metalizing coating" means the undercoat applied to the substrate on which the metal is deposited or the overcoat applied directly to the metal film. Vacuum metalizing/physical vapor deposition (PVD) is the process whereby metal is vaporized and deposited on a substrate in a vacuum chamber.

9. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (ii) shall apply to facilities at which the potential emissions of volatile organic compounds from all surface coating of miscellaneous parts and products equal or exceed 10 tons per year and are located in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:

(i) All applicable facilities shall comply with the provisions of subparagraphs 1., 5., 6., 7., and 8.

10. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (ii) shall apply to facilities at which the potential emissions of volatile organic compounds from all surface coating of miscellaneous parts and products equal or exceed 100 tons per year and are located outside the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale as follows:

(i) All applicable facilities shall comply with the provisions of subparagraphs 1., 5., 6., 7., and 8.

11. Applicability. On and after January 1, 2015, the requirements of this subparagraph (ii) shall apply to facilities at which the potential emissions of volatile organic compounds from all surface coating of miscellaneous parts and products equal or exceed 10 tons per year and are located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:

(i) All applicable facilities shall comply with the provisions of subparagraphs 2., 3., 4., 5., 6., 7., and 8.

- (ii) Any physical or operational changes that are necessary to comply with the provisions specified in subparagraphs 2., 3., or 4. are subject to the compliance schedule specified in subparagraph 14.

- 12. Applicability. On and after January 1, 2015, the requirements of this subparagraph (ii) shall apply to facilities at which the potential emissions of volatile organic compounds from all surface coating of miscellaneous parts and products equal or exceed 100 tons per year and are located outside the counties of Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale Spalding, and Walton as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 5., 6., 7., and 8.

- 13. Applicability: The requirements of subparagraphs 11. and 12. will no longer be applicable by the compliance deadlines if the counties specified in those subparagraphs are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015 and such counties continue to maintain that Standard thereafter. Instead, the provisions of subparagraphs 9. and 10. will continue to apply on and after January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of subparagraphs 11. and 12. will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.

- 14. Compliance Schedule:
 - (i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than **July 1, 2014**.
 - (ii) On-site of construction of emission control systems and/or modification of process or coatings must be completed by **November 1, 2014**.
 - (iii) Full compliance with the applicable requirements specified in subparagraphs 2., 3., and 4. must be completed before **January 1, 2015**.

- (jj) **VOC Emissions from Surface Coating of Flat Wood Paneling.**

1. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of flat wood paneling to exceed:
 - (i) 6.0 pounds per 1000 square feet of coated finished product from printed interior panels, regardless of the number of coats applied;
 - (ii) 12.0 pounds per 1000 square feet of coated finished product from natural finish hardwood plywood panels, regardless of the number of coats applied; and
 - (iii) 10.0 pounds per 1000 square feet of coated finished product from Class II finishes on hardboard panels, regardless of the number of coats applied.

2. The emission limits in this subparagraph shall be achieved by:
 - (i) the application of low solvent coating technology where the 24-hour of all coatings on a single coating line or operation meets the limits stated in subparagraph 1. of this subparagraph; averaging across lines is not allowed; or
 - (ii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the nonmethane volatile organic compounds which enter the control equipment are recovered or destroyed, and that overall VOC emissions do not exceed the limits stated in subparagraph 1. of this subparagraph.
 - (iii) control equipment demonstrated to have control efficiency equivalent to or greater or VOC emissions equal to or less than required in (i) or (ii) of this subparagraph and approved by the Director.

3. No person shall cause, let, permit, suffer, or allow the emissions of VOC from the inks, coatings, and adhesives used by flat wood paneling coating facilities to exceed:
 - (i) 2.1 lbs VOC per gallon (250 grams per liter) of coating, excluding water, and exempt compounds, or
 - (ii) 2.9 lbs VOC per gallon (350 grams per liter) of solids.

4. Averaging across lines for the VOC limits in subparagraph 3. is not permitted.

5. Should product performance requirements or other needs dictate the use of higher VOC coatings, than those specified in subparagraph 3., add-on control equipment with an overall control efficiency of 90% may be used as an alternative.
6. Each owner or operator of a facility that manufactures flat wood paneling shall comply with the following work practice standards:
 - (i) store all VOC-containing materials in closed containers;
 - (ii) ensure that mixing and storage containers used for VOC-containing materials are kept closed at all times except when depositing or removing these materials;
 - (iii) minimize spills of VOC-containing materials; and
 - (iv) convey VOC-containing materials from one location to another in closed containers or pipes.
7. For the purpose of this subparagraph, the following definitions also apply:
 - (i) "Class II hardboard paneling finish" means finishes which meet the specifications of Voluntary Product Standard PS-59-73 as approved by the American National Standards Institute.
 - (ii) "Coating application system" means all operations and equipment which apply, convey, and dry a surface coating, including, but not limited to, spray booths, flow coaters, conveyers, flashoff areas, air dryers and ovens.
 - (iii) "Flat wood paneling" means both interior and exterior panels used in construction and typically include decorative interior panels, exterior siding and tileboard. Flat wood paneling includes hardboard, hardwood plywood, natural finish hardwood plywood panels, printed interior panels, thin particleboard and tileboard.
 - (iv) "Hardboard" is a panel manufactured primarily from interfelted lignocellulosic fibers which are consolidated under heat and pressure in a hot press.
 - (v) "Hardwood plywood" is plywood whose surface layer is a veneer.
 - (vi) "Natural finish hardwood plywood panels" means panels whose original grain pattern is enhanced by essentially transparent finishes frequently supplemented by fillers and toners.

- (vii) "Thin particleboard" is a manufactured board 1/4 inch or less in thickness made of individual wood particles which have been coated with a binder and formed into flat sheets by pressure.
- (viii) "Tileboard" means paneling that has a colored waterproof surface coating.
- (ix) "Printed interior panels" means panels whose grain or natural surface is obscured by fillers and basecoats upon which a simulated grain or decorative pattern is printed.

8. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (jj) shall apply to facilities at which the actual emissions of volatile organic compounds from the surface coating of flat wood paneling equal or exceed 15 pounds per day and are located in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 7.

9. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (jj) shall apply to facilities at which the potential emissions of volatile organic compounds from the surface coating of flat wood paneling equal or exceed 100 tons per year and are located outside the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 7.

10. Applicability. On and after January 1, 2015, the requirements of this subparagraph (jj) shall apply to facilities at which actual emissions of volatile organic compounds from the surface coating of flat wood paneling, before controls, equal or exceed 15 pounds per day (or 2.7 tons per 12-month rolling period) for facilities located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 3., 4., 5., 6., and 7.

- (ii) Any physical or operational changes that are necessary to comply with the provisions specified in subparagraphs 3., 4., 5., or 6. are subject to the compliance schedule specified in subparagraph 13.

11. Applicability. On and after January 1, 2015, the requirements of this subparagraph (jj) shall apply to facilities at which potential emissions of volatile organic compounds from the surface coating of flat wood paneling equal or exceed 100 tons per year and are located outside of counties of Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 7.

12. Applicability. The requirements of subparagraphs 10. and 11. will no longer be applicable by the compliance deadlines if the counties specified in those subparagraphs are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015 and such counties continue to maintain that Standard thereafter. Instead, the provisions of subparagraphs 8. and 9. will continue to apply on and after January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of subparagraphs 10. and 11. will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.

13. Compliance Schedule:

- (i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than **July 1, 2014**.
- (ii) On-site of construction of emission control systems and/or modification of process or coatings must be completed by **November 1, 2014**.
- (iii) Full compliance with the applicable requirements specified in subparagraph 10.(i) must be completed before **January 1, 2015**.

(kk) **VOC Emissions from Synthesized Pharmaceutical Manufacturing.**

1. The owner or operator of a synthesized pharmaceutical manufacturing facility shall:
 - (i) Control the volatile organic compound emissions from all reactors, distillation operations, crystallizers, centrifuges and vacuum dryers that emit 15 pounds per day or more of VOC. Surface condensers or equivalent controls shall be used, provided that:
 - (I) If surface condensers are used, the condenser outlet gas temperature must not exceed:
 - I. -13°F when condensing VOC of vapor pressure greater than 5.8 psi, measured at 68°F;
 - II. 5°F when condensing VOC of vapor pressure greater than 2.9 psi, measured at 68°F;
 - III. 32°F when condensing VOC of vapor pressure greater than 1.5 psi, measured at 68°F;
 - IV. 50°F when condensing VOC of vapor pressure greater than 1.0 psi, measured at 68°F;
 - V. 77°F when condensing VOC of vapor pressure greater than 0.5 psi, measured at 68°F.
 - (II) If equivalent controls are used, the VOC emissions must be reduced by at least as much as they would be by using a surface condenser which meets the requirements of Part I. of this subparagraph.
 - (ii) The owner or operator of a synthesized pharmaceutical manufacturing facility subject to this regulation shall reduce the VOC emissions from all air dryers and production equipment exhaust systems;
 - (I) By at least 90 percent if emissions are 330 pounds per day or more of VOC; or
 - (II) 33 pounds per day or less if emissions are less than 330 pounds;
 - (III) The owner or operator of a synthesized pharmaceutical manufacturing facility subject to this regulation shall:

- I. Provide a vapor balance system or equivalent control that is at least 90.0 percent effective in reducing emissions from truck or railcar deliveries to storage tanks with capacities greater than 2,000 gallons that store VOC with vapor pressures greater than 4.1 psi at 68°F; and
 - II. Install pressure/vacuum conservative vents set on all storage tanks that store VOC with vapor pressure greater than 1.5 psi at 68°F unless a more effective control system is used.
- (iii) The owner or operator of a synthesized pharmaceutical facility subject to this regulation shall enclose all centrifuges, rotary vacuum filters, and other filters having an exposed liquid surface, where the liquid contains VOC and exerts a total VOC vapor pressure of 0.5 psi or more at 68°F.
 - (iv) The owner or operator of a synthesized pharmaceutical facility subject to this regulation shall install covers on all in-process tanks containing a volatile organic compound at any time. These covers must remain closed, unless production, sampling, maintenance, or inspection procedures require operator access.
 - (v) The owner or operator of a synthesized pharmaceutical manufacturing facility subject to this regulation shall repair all leaks from which liquid, containing VOC, can be observed running or dripping. The repair shall be completed the first time the equipment is off-line for a period of time long enough to complete the repair.
2. For the purpose of this regulation, the following definitions also apply:
- (i) "Condenser" means a device which cools a gas stream to a temperature which removes specific organic compounds by condensation;
 - (ii) "Control system" means any number of control devices, including condensers, which are designed and operated to reduce the quantity of VOC emitted to the atmosphere;

- (iii) "Reactor" means a vat or vessel, which may be jacketed to permit temperature control, designed to contain chemical reactions;
- (iv) "Separation operation" means a process that separates a mixture of compounds and solvents into two or more components. Specific mechanisms include extraction, centrifugation, filtration, and crystallization;
- (v) "Synthesized pharmaceutical manufacturing" means manufacture of pharmaceutical products by chemical synthesis;
- (vi) "Production equipment exhaust system" means a device for collecting and directing out of the work area VOC fugitive emissions from reactor openings, centrifuge openings, and other vessel openings for the purpose of protecting workers from excessive VOC exposure.

(II) VOC Emissions from the Manufacture of Pneumatic Rubber Tires.

1. The owner or operator of an undertread cementing, tread end cementing, or bead dipping operation subject to this regulation shall:
 - (i) Install and operate a capture system, designed to achieve maximum reasonable capture from all undertread cementing, tread and cementing and bead dipping operation; and install and operate a control device that effects at least a 90.0 percent reduction efficiency, measured across the control system, and has been approved by the Director.
 - (ii) The owner or operator of an undertread cementing operation, tread end cementing operation or bead dipping operation may, in lieu of a vapor capture and control system for those operations, make process changes which reduces emissions to a level equal to or below that which would be achieved with emission controls as specified in subparagraph (i) above.
2. The owner or operator of a green tire spraying operation subject to this regulation shall:
 - (i) Substitute water-based sprays for the normal solvent-based mold release compound; or
 - (ii) Comply with paragraph 1. of this regulation.

3. If the total volatile organic compound emissions from all undertreading cementing, tread end cementing, bead dipping and green tire spraying operations at a pneumatic rubber tire manufacturing facility do not exceed 57 grams per tire, paragraphs 1. and 2. above shall not apply.
4. For the purpose of this subsection the following definitions also apply:
 - (i) "Pneumatic rubber tire manufacture" means the undertread cementing, tread end cementing, bead dipping, and green tire spraying associated with the production of pneumatic rubber, passenger type tires on a mass production basis.
 - (ii) "Passenger type tire" means agricultural, airplane, industrial, mobile home, light and medium duty truck, and passenger vehicle tires with a bead diameter up to but excluding 20.0 inches and cross section dimension up to 12.8 inches.
 - (iii) "Undertread cementing" means the application of a solvent based cement to the underside of a tire tread.
 - (iv) "Bead dipping" means the dipping of an assembled tire bead into a solvent based cement.
 - (v) "Tread end cementing" means the application of a solvent based cement to the tire tread ends.
 - (vi) "Green tires" means assembled tires before molding and curing have occurred.
 - (vii) "Green tire spraying" means the spraying of green tires, both inside and outside, with release compounds which help remove air from the tire during molding and prevent the tire from sticking to the mold after curing.
 - (viii) "Water based spray" means release compounds, sprayed on the inside and outside of green tires, in which solids, water, and emulsifiers have been substituted for organic solvents.

(mm) VOC Emissions from Graphic Arts Systems.

1. No person shall cause, let, permit, suffer, or allow the operation of a packaging rotogravure, publication rotogravure or flexographic printing facility unless:

- (i) For packaging rotogravure and flexographic printing, the VOC content of any ink or coating as applied is equal to or less than one of the following:
 - (I) 25 percent by volume of the volatile content of the coating or ink; or
 - (II) 40 percent by volume of the coating or ink, minus water; or
 - (III) 0.5 pounds of VOC per pound of coating solids.
 - (ii) For publication rotogravure printing, the VOC content of any ink or coating as applied is equal to or less than one of the following:
 - (I) 25 percent by volume of the volatile content of the coating or ink; or
 - (II) 40 percent by volume of the coating or ink, minus water.
2. As an alternative to compliance with the limits in subparagraph 1., an owner or operator of a packaging rotogravure, publication rotogravure or flexographic printing facility may comply with the requirements of this subparagraph by:
- (i) Averaging on a 24-hour weighted basis the VOC content of all inks and coatings, as applied, on a single printing line, where the average does not exceed the limits in subparagraph 1.; averaging across lines is not allowed; or
 - (ii) Installing and operating volatile organic compound emission reduction equipment having at least 90.0 percent reduction efficiency, and a capture system approved by the Director.
3. If, as an alternative to compliance with the limits in subparagraph 1.(i), volatile organic compound emission reduction equipment is installed and operated at a flexible packaging printing facility to comply with subparagraph 2.(ii) it shall have an overall VOC control efficiency that is equal to or greater than the percentage specified in the following subparagraphs (i) through (iv).
- (i) 65 percent for a press that was first installed prior to March 14, 1995, and that is controlled by an add-on air pollution control device whose first installation date was prior to February 19, 2012;

- (ii) 70 percent for a press that was first installed prior to March 14, 1995, and that is controlled by an add-on air pollution control device whose first installation date was on or after February 19, 2012;
 - (iii) 75 percent for a press that was first installed on or after to March 14, 1995, and that is controlled by an add-on air pollution control device whose first installation date was prior to February 19, 2012; and
 - (iv) 80 percent for a press that was first installed on or after March 14, 1995, and that is controlled by an add-on air pollution control device whose first installation date was on or after February 19, 2012.
4. Each owner or operator of a facility that prints flexible packaging shall comply with the following housekeeping requirements for any affected cleaning operation:
- (i) store all VOC-containing cleaning materials and used shop towels in closed containers;
 - (ii) ensure that storage containers used for VOC-containing cleaning materials are kept closed at all times except when depositing or removing these materials;
 - (iii) minimize spills of VOC-containing cleaning materials;
 - (iv) convey VOC-containing cleaning materials from one location to another in closed containers or pipes; and
 - (v) minimize VOC emissions from cleaning of application, storage, mixing, and conveying equipment by ensuring that equipment cleaning is performed without atomizing the cleaning solvent and all spent solvent is captured in closed containers.
5. For the purpose of this subparagraph, the following definitions shall apply:
- (i) "Cleaning" for flexible packaging printing means cleaning of a press, press parts, or removing dried ink from areas around a press. It does not include cleaning electronic components of a press, cleaning in-press or post-press operations or the use of janitorial supplies to clean areas around a press.

- (ii) "Flexible packaging printing" refers to printing upon any package or part of a package the shape of which can be readily changed. Flexible packaging includes, but is not limited to, bags, pouches, liners, and wraps utilizing paper, plastic, film, aluminum foil, metalized or coated paper or film, or any combination of these materials.
 - (iii) "Flexographic printing" means the application of words, designs and pictures to a substrate by means of a roll printing technique in which the pattern to be applied is raised above the printing roll and the image carrier is made of rubber or other elastomeric materials.
 - (iv) "Packaging rotogravure printing" means rotogravure printing upon paper, paperboard, metal foil, plastic film, and other substrates, which are in subsequent operations, formed into packaging products and labels for articles to be sold.
 - (v) "Publication rotogravure printing" means rotogravure printing upon paper which is subsequently formed into books, magazines, catalogues, brochures, directories, newspaper supplements, and other types of printed materials.
 - (vi) "Rotogravure printing" means the application of words, designs and pictures to a substrate by means of a roll printing technique which involves intaglio or recessed image areas in the form of cells.
 - (vii) "Roll printing" means the application of words, designs and pictures to a substrate usually by means of a series of hard rubber or steel rolls each with only partial coverage.
6. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (mm) shall apply to facilities at which the potential emissions of volatile organic compounds from packaging rotogravure, publication rotogravure, and flexographic printing equal or exceed 25 tons per year and are located in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:
- (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 5.

7. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (mm) shall apply to facilities at which the potential emissions of volatile organic compounds from packaging rotogravure, publication rotogravure, and flexographic printing equal or exceed 100 tons per year and are located outside the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:
 - (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 5.

8. Applicability. On and after January 1, 2015, the requirements of this subparagraph (mm) shall apply to facilities at which actual emissions of volatile organic compounds from flexible package printing, before controls, equal or exceed 15 pounds per day (or 2.7 tons per 12-month rolling period) for facilities located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:
 - (i) Individual presses that have potential emissions of volatile organic compounds from flexible package printing that equal or exceed 25 tons per year shall comply with the provisions of subparagraphs 1.(i), 2., and 3.
 - (ii) Individual presses that have potential emissions of volatile organic compounds from flexible package printing that do not equal or exceed 25 tons per year shall comply with the provisions of subparagraphs 1.(i) and 2.
 - (iii) All applicable facilities shall comply with the provisions of subparagraphs 4., 5., and 14.
 - (iv) Any physical or operational changes that are necessary to comply with the provisions specified in subparagraph 8.(i) or (iii) are subject to the compliance schedule specified in subparagraph 13.

9. Applicability, On and after January 1, 2015, the requirements of this subparagraph (mm) shall apply to facilities at which potential emissions of volatile organic compounds from packaging rotogravure, publication rotogravure, and flexographic printing equals or exceeds 25 tons per year but at which the actual emissions of volatile organic compounds from flexible package printing, before controls, is less than 15 pounds per day (or 2.7 tons per 12-month rolling period) and are located in Cherokee,

Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 5.

10. Applicability. On and after January 1 2015, the requirements of this subparagraph (mm) shall apply to facilities at which potential emissions of volatile organic compounds from packaging rotogravure, publication rotogravure, and flexographic printing equal or exceeds 100 tons per year but at which the actual emissions of volatile organic compounds from flexible package printing, before controls, is less than 15 pounds per day (or 2.7 tons per 12-month rolling period) and are located Barrow, Bartow, Carroll, Hall, Newton, Spalding, and Walton Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 5.

11. Applicability. On and after January 1, 2015, the requirements of this subparagraph (mm) shall apply to facilities at which the potential emissions of volatile organic compounds from packaging rotogravure, publication rotogravure, and flexible package printing equal or exceed 100 tons per year and are located outside of counties of Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 1., 2., and 5.

12. Applicability: The requirements of subparagraphs 8., 9., 10., and 11. will no longer be applicable by the compliance deadlines if the counties specified in those subparagraphs are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015 and such counties continue to maintain that Standard thereafter. Instead, the provisions of subparagraphs 6. and 7. will continue to apply on and after January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of subparagraphs 8., 9., 10., and 11. will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.

13. Compliance schedule:

- (i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than July 1, 2014.
- (ii) On-site of construction of emission control systems and/or modification of process or coatings must be completed by November 1, 2014.
- (iii) Full compliance with the applicable requirements specified in subparagraph 8.(i) and (iii) must be completed before January 1, 2015.

14. Compliance determinations for inks shall treat volatile compounds not defined as VOCs as water for the purposes of calculating the "percent-by-volume-or-more of water" and the "less water" parts of the ink composition.

(nn) VOC Emissions from External Floating Roof Tanks.

- 1. No person shall cause, let, permit, suffer, or allow the storage of petroleum liquids in external floating roof tanks having capacities greater than 40,000 gallons unless:
 - (i) The vessel has been fitted with:
 - (I) A continuous secondary seal extending from the floating roof to the tank wall (rim-mounted secondary seal); or
 - (II) A closure or other device which controls VOC emissions with an effectiveness equal to or greater than a seal required under Part (I) of this subparagraph and approved by the Director.
 - (ii) All seal closure devices meet the following requirements:
 - (I) There are no visible holes, tears, or other openings in the seal(s) or seal fabric;
 - (II) The seal(s) are intact and uniformly in place around the circumference of the floating roof between the floating roof and the tank wall; and
 - (III) For vapor mounted primary seals, the accumulated area of gaps exceeding 1/8 inch in width between the secondary

seal and the tank wall shall not exceed 1.0 inch 2 per foot of tank diameter.

- (iii) All openings in the external floating roof, except for automatic bleeder vents, rim space vents, and leg sleeves are:
 - (I) Equipped with covers, seals, or lids in the closed position except when the openings are in actual use; and
 - (II) Equipped with projections into the tank which remain below the liquid surface at all times.
 - (iv) Automatic bleeder vents are closed at all times except when the roof is floated off or landed on the roof leg supports;
 - (v) Rim vents are set to open when the roof is being floated off leg supports or at the manufacturer's recommended setting; and
 - (vi) Emergency roof drains are provided with slotted membrane fabric covers or equivalent covers which cover at least 90 percent of the area of the opening.
2. The owner or operator of a petroleum liquid storage vessel with an external floating roof subject to this regulation shall:
- (i) Perform routine inspections semi-annually in order to insure compliance with paragraph 1. of this subsection and the inspections shall include a visual inspection of the secondary seal gap;
 - (ii) Measure the secondary seal gap annually when the floating roof is equipped with a vapor-mounted primary seal; and
 - (iii) Maintain records of the types of volatile petroleum liquids stored, the maximum true vapor pressure of the liquid as stored, and the results of the inspections performed in subparagraphs 2.(i) and (ii).
3. Copies of all records under paragraphs 2. of this subsection shall be retained by the owner or operator for a minimum of two years after the date on which the record was made.
4. Copies of all records under this section shall immediately be made available to the Director, upon verbal or written request, at any reasonable time.

5. The Director may, upon written notice, require more frequent inspections or modify the monitoring and record keeping requirements, when necessary to accomplish the purposes of this regulation.
6. This regulation does not apply to petroleum liquid storage vessels which:
 - (i) Are used to store waxy, heavy pour crude oil;
 - (ii) Have capacities less than 420,000 gallons and are used to store produced crude oil and condensate prior to lease custody transfer;
 - (iii) Contain a petroleum liquid with a true vapor pressure of less than 1.5 psia;
 - (iv) Contain a petroleum liquid with a true vapor pressure of less than 4.0 psia; and
 - (I) Are of welded construction; and
 - (II) Presently possess a metallic-type shoe seal, a liquid mounted foam seal, a liquid-mounted liquid filled type seal, or other closure device of demonstrated equivalence approved by the Director; or
 - (III) Are of welded construction, equipped with a metallic-type shoe primary seal and has a secondary seal from the top of the shoe to the tank wall (shoe-mounted secondary seal).
7. For the purpose of this subsection, the following definitions shall apply:
 - (i) "Condensate" means hydrocarbon liquid separated from natural gas which condenses due to changes in the temperature and/or pressure and remains liquid at standard conditions.
 - (ii) "Crude oil" means a naturally occurring mixture which consists of hydrocarbons and sulfur, nitrogen and/or oxygen derivatives of hydrocarbons which is a liquid at standard conditions.
 - (iii) "Lease custody transfer" means the transfer of produced crude oil and/or condensate, after processing and/or treating in the producing operations, from storage tanks or automatic transfer facilities to pipelines or any other forms of transportation.
 - (iv) "External floating roof" means a storage vessel cover in an open top tank consisting of a double deck or pontoon single deck which rests upon and is supported by the petroleum liquid being

contained and is equipped with a closure seal or seals to close the space between the roof edge and tank wall.

- (v) "Liquid-mounted seal" means a primary seal mounted in continuous contact with the liquid between the tank wall and the floating roof around the circumference of the tank.
- (vi) "Petroleum liquids" means crude oil, condensate, and any finished or intermediate products manufactured or extracted in a petroleum refinery.
- (vii) "Vapor-mounted seal" means a primary seal mounted so there is an annular vapor space underneath the seal. The annular vapor space is bounded by the bottom of the primary seal, the tank wall, the liquid surface and the floating roof.
- (viii) "Waxy, heavy pour crude oil" means a crude oil with a pour point of 50°F or higher as determined by the American Society for Testing and Materials Standards D97-66, "Test for Pour Point of Petroleum Oils."

(oo) Fiberglass Insulation Manufacturing Plants.

1. No person shall cause, let, suffer, permit or allow the emission of particulate matter from any fiberglass insulation production line to exceed a concentration of 0.04 grains per standard dry cubic foot.
2. For the purpose of this subsection, "Fiberglass insulation production line" means any combination of equipment, devices or contrivances for the manufacture of fiberglass insulation. This does not include glass melting furnaces, equipment associated with the process which is defined herein as "Fuel-burning Equipment," equipment the primary purpose of which involves the handling, storing or packaging of the fiberglass insulation or equipment the primary purpose of which involves the handling, storing or conveying of raw products for input into the glass melting furnace.

(pp) Bulk Gasoline Plants.

1. After the compliance date specified in paragraph 6. of this subsection, no owner or operator of a bulk gasoline plant may permit the receiving or dispensing of gasoline by its stationary storage tanks unless:
 - (i) Each stationary storage tank is equipped with a submerged fill pipe, approved by the Director; or

- (ii) Each stationary storage tank is equipped with a fill line whose discharge opening is at the tank bottom.
 - (iii) Each stationary storage tank has a vapor balance system consisting of the following major components:
 - (I) A vapor space connection on the stationary storage tank equipped with fittings which are vapor tight and will automatically and immediately close upon disconnection so as to prevent release of gasoline or gasoline vapors; and
 - (II) A connecting pipe or hose equipped with fittings which are vapor tight and will automatically and immediately close upon disconnection so as to prevent release of gasoline or gasoline vapors.
2. After the compliance date specified in paragraph 6. of this subsection, no owner or operator of a bulk gasoline plant, or the owner or operator of a tank truck or trailer may permit the transfer of gasoline between the tank truck or trailer and stationary storage tank unless:
- (i) The vapor balance system is in good working order and is connected and operating;
 - (ii) The gasoline transport vehicle is maintained to prevent the escape of fugitive vapors and gasses during loading operations;
 - (iii) A means is provided to prevent liquid drainage from the loading device when it is not in use or to accomplish complete drainage before the loading device is disconnected; and
 - (iv) The pressure relief valves on storage vessels and tank trucks or trailers are set to release at 0.7 psia or greater unless restricted by state or local fire codes or the National Fire Prevention Association guidelines in which case the pressure relief valve must be set to release at the highest possible pressure allowed by these codes or guidelines.
3. The requirements of this subsection shall not apply to stationary storage tanks of less than 2,000 gallons.
4. Sources and persons affected under this subsection shall comply with the vapor collection and control system requirements of subsection 391-3-1-.02(2)(ss).

5. For the purpose of this subsection, the following definitions shall apply:
- (i) "Bottom filling" means the filling of a tank truck or stationary storage tank through an opening that is located at the tank bottom.
 - (ii) "Bulk gasoline plant" means a gasoline storage and distribution facility with an average daily throughput of more than 4,000 gallons but less than 20,000 gallons which receives gasoline from bulk terminals by rail and/or trailer transport, stores it in tanks, and subsequently dispenses it via account trucks to local farms, businesses, and service stations.
 - (iii) "Bulk gasoline terminal" means a gasoline storage facility which receives gasoline from refineries primarily by pipeline, ship, or barge, and delivers gasoline to bulk gasoline plants or to commercial or retail accounts primarily by tank truck and has an average daily throughput of more than 20,000 gallons of gasoline.
 - (iv) "Gasoline" means any petroleum distillate having a Reid vapor pressure of 4.0 psia or greater.
 - (v) "Stationary Storage Tank" means all underground vessels and any aboveground vessels never intended for mobile use.
 - (vi) "Submerged filling," means the filling of a tank truck or stationary tank through a pipe or hose whose discharge opening is not more than six inches from the tank bottom.
 - (vii) "Vapor balance system" means a combination of pipes or hoses that create a closed system between the vapor spaces of an unloading tank and a receiving tank such that vapors displaced from the receiving tank are transferred to the tank being unloaded.
6. Compliance Dates.
- (i) All bulk gasoline plants located in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale counties shall be in compliance.
 - (ii) All bulk gasoline plants located in Catoosa, Richmond and Walker counties shall be in compliance with this subsection by May 1, 2006.

- (iii) All bulk gasoline plants located in Barrow, Bartow, Carroll, Hall, Newton, Spalding, and Walton counties shall be in compliance with this subsection by June 1, 2008.

(qq) VOC Emissions from Large Petroleum Dry Cleaners.

1. No person shall cause, let, permit, suffer or allow the emissions of VOC from a large petroleum dry cleaner facility to exceed 3.5 pounds per 100 pounds dry weight of articles dry cleaned.
2. The VOC content in all filtration waste shall be reduced to one pound or less per hundred pounds dry weight of articles dry cleaned before disposal and exposure to the atmosphere from a petroleum solvent filtration system;
or
3. Install and operate a cartridge filtration system and drain the filter cartridges in the sealed housing for eight hours or more before their removal.
4. Each owner or operator of a large petroleum dry cleaner shall inspect all equipment for leaks every 15 days and repair all petroleum solvent vapor and liquid leaks within three working days after identifying the source of the leaks.
5. Each owner or operator of a large petroleum dry cleaner shall maintain sufficient records to demonstrate compliance and provide them to the Division upon request, for a period of two years.
6. For the purpose of this subsection, the following definitions shall apply:
 - (i) "Cartridge filter" means perforated canisters containing filtration paper and activated carbon that are used in the pressurized system to remove solid particles and fugitive dyes from soil-laden solvents.
 - (ii) "Large petroleum dry cleaner" means any facility engaged in the process of the cleaning of textile and fabric products in which articles are washed in a nonaqua solution (solvent), then dried by exposure to a heated air stream and consumes 25 tons or more of a petroleum solvent annually.
 - (iii) "Solvent recovery dryer" means a class of dry cleaning dryers that employs a condenser to liquefy and recover solvent vapors evaporated in a closed loop recirculating stream of heated air.

(rr) Gasoline Dispensing Facility - Stage I.

1. Requirements: After the compliance date specified in subparagraph 16. of this subparagraph, no person may transfer or cause or allow the transfer of gasoline from any delivery vessel into any stationary storage tank subject to subparagraph (rr), unless:

- (i) The stationary storage tank is equipped with all of the following:
 - (I) A submerged fill pipe; and
 - (II) A Division approved Gasoline Vapor Recovery System as noted below:
 - A. An Enhanced Stage I Gasoline Vapor Recovery System as defined in subparagraph 15.(iv) that shall remain in good working condition, such as keeping the vapor return opening free of liquid or solid obstructions, and that also shall be leak tight as determined by tests conducted in accordance with test procedures as approved by the Division; or
 - B. For existing gasoline dispensing facilities in Catoosa, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, Richmond, Rockdale, and Walker counties, a Stage I Gasoline Vapor Recovery System as defined in subparagraph 15.(x) that shall remain in good working condition; and
 - (III) Vents that shall be vertical and at least 12 feet in height from the ground and shall have a Pressure/Vacuum vent valve with settings as specified by applicable Stage I or II vapor recovery CARB executive order. In systems where vents have manifolds, the manifold may be less than 12 feet.
- (ii) The vapors displaced from the gasoline stationary storage tank during filling are controlled by one of the following:
 - (I) A vapor-tight vapor return line from the gasoline stationary storage tank(s) to the delivery vessel for each product delivery line that is connected from the delivery vessel to the gasoline stationary storage tank(s) and a method or procedure that will ensure the vapor line(s) is connected before gasoline can be transferred into the gasoline stationary storage tank(s); or

- (II) If a manifold connects all gasoline stationary storage tanks vent lines, a vapor-tight vapor return line connected from a gasoline stationary storage tank being filled to the delivery vessel with sufficient return capacity to control vapors from all gasoline stationary storage tanks being filled at the time and to prevent release of said vapors from the vent line(s) or other gasoline stationary storage tank openings; however, no more than two tanks shall be filled at the same time per connected vapor-tight return line; or
 - (III) A refrigeration-condensation system or a carbon adsorption system is utilized and recovers at least 90 percent by weight of the organic compounds.
2. Applicability: The requirements contained in this subparagraph shall apply to all stationary storage tanks with capacities of 2,000 gallons or more which were in place before January 1, 1979, and stationary storage tanks with capacities of 250 gallons or more which were in place after December 31, 1978, located at gasoline dispensing facilities located in those counties of Barrow, Bartow, Carroll, Catoosa, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Paulding, Richmond, Rockdale, Spalding, Newton, Walker and Walton.
 3. Applicability: Once a gasoline dispensing facility becomes subject to this rule, it will continue to be subject even if the gasoline average throughput rate falls below the applicability threshold.
 4. Exemptions: The requirements of this subparagraph shall not apply to stationary storage tanks of less than 550 gallons capacity used exclusively for the fueling of implements of husbandry or to gasoline dispensing facilities that dispense no more than 10,000 gallons average monthly throughput rate of gasoline, provided the tanks are equipped with submerged fill pipes.
 5. Stage I Gasoline Vapor Recovery Systems installed prior to January 1, 1993 that currently utilize a co-axial Stage I vapor recovery system in which the gasoline stationary storage tanks are not manifolded in any manner and that are utilized at a facility that is not required to have a Stage II vapor recovery system shall be exempted from installing a co-axial poppetted drop tube. All co-axial Stage I Gasoline Vapor Recovery Systems must be upgraded to Enhanced Stage I Gasoline Vapor Recovery Systems before May 1, 2012.

6. Certification and Recertification Testing Requirements: All Stage I Gasoline Vapor Recovery Systems and Enhanced Stage I Gasoline Vapor Recovery Systems at gasoline dispensing facilities shall be certified by the equipment owner as being properly installed and properly functioning in accordance with the applicable CARB Executive Order. Certification and recertification testing shall be conducted by a qualified technician who has a thorough knowledge of the system. Tests shall be conducted in accordance with test procedures as approved by the Division. The fill cap and vapor cap must be removed when performing certification testing.
7. Certification and Recertification Testing Requirements: Testing may be conducted by the Division or by an installation or testing company that meets the minimum criteria established by the Division for conducting such tests. In the case where a party other than the Division will be conducting the testing, the owner or operator shall notify the Division at least five business days in advance as to when and where the testing will occur, what party will conduct the testing, and the CARB Executive Order number associated with the system to be tested. For Enhanced Stage I Gasoline Vapor Recovery Systems, a certified and trained individual is required to install and test the System in accordance with the applicable CARB Executive Order.
8. Certification, recertification, and testing and compliance reporting for all Stage I gasoline vapor recovery systems shall be required according to the following schedule:
 - (i) Certification testing is required within 30 days of system installation for any Stage I gasoline vapor recovery systems approved by the Division after December 31, 2002.
 - (ii) After June 1, 2008, recertification testing will be required within 12 months following the initial certification or recertification for any Stage I Gasoline Vapor Recovery Systems approved by the Division.
9. Reporting Requirements: Compliance reporting shall be required within 30 days of the certification or recertification test(s) required by subparagraph 8. This report shall be submitted to the Division and shall include results of all tests conducted for certification or recertification, including failed test results.
10. Maintenance Requirements: The owner or operator of the gasoline dispensing facility shall maintain the Enhanced Stage I Gasoline Vapor Recovery System or Stage I Gasoline Vapor Recovery System in proper operating condition as specified by the manufacturer and free of defects

that could impair the effectiveness of the system. For the purposes of this subparagraph, the following is a list of equipment defects that substantially impair the effectiveness of the systems in reducing gasoline bulk transfer and fugitive vapor emissions:

- (i) Absence or disconnection of any component that is a part of the approved system;
 - (ii) Pressure/vacuum relief valves or dry breaks and drain valves in the spill bucket that are inoperative; and
 - (iii) Any visible product leaks.
11. Upon identification of any of the defects as described above, the owner or operator of the gasoline dispensing facility shall immediately schedule and implement repair, replacement or adjustment by the company's repair representative as necessary.
12. Recordkeeping Requirements: The following records shall be maintained on-site for two years:
- (i) Maintenance records including any repaired or replaced parts and a description of the problems;
 - (ii) Compliance records including warnings or notices of violation issued by the Division; and
 - (iii) Gasoline throughput records that will allow the average monthly gasoline throughput rate to be continuously determined.
13. Record disposal may be approved by the Division upon a written request by the owner or operator of the gasoline dispensing facility. Approval may be granted on a case-by-case basis considering volume of records, number of times the records have been inspected by the Division, and the value of maintaining the records.
14. Compliance Inspections: Gasoline dispensing facilities equipped with Enhanced Stage I Gasoline Vapor Recovery Systems and Stage I Gasoline Vapor Recovery Systems shall be subject to annual compliance inspections and functional testing which include but are not limited to the following:
- (i) Verification that all equipment is present and maintains a certified system configuration as defined in subparagraphs 15.(iv). or 15.(x), whichever is applicable.

- (ii) Inspection of all Stage I vapor recovery related files to ensure that the gasoline dispensing facility has complied with maintenance requirements and other record keeping requirements such as inspection, compliance and volume reports as required by subparagraphs 10., 11., 12., and 13.
 - (iii) Observation of the use of equipment by facility operators and product suppliers.
 - (iv) Verification that the facility has complied with the certification and/or recertification testing requirements as specified by subparagraphs 6., 7., and 8., whichever is applicable.
15. Definitions: For the purpose of this subparagraph, the following definitions shall apply:
- (i) "Average monthly throughput rate" means the average of the gallons pumped monthly for the most recent two year period of operation excluding any inactive period. If a facility has not been in operation for two years or does not have access to records for the most recent two years of operation, the Division shall determine the length of time to determine the average of the gallons pumped monthly.
 - (ii) "CARB" means the California Air Resources Board.
 - (iii) "Delivery vessel" means tank trucks or trailers equipped with a storage tank and used for the transport of gasoline from sources of supply to stationary storage tanks of gasoline dispensing facilities.
 - (iv) "Enhanced Stage I Gasoline Vapor Recovery System" means:
 - (I) any Stage I gasoline vapor recovery system properly certified under current version of the CARB vapor recovery certification procedures and applicable executive order effective on or after April 1, 2001, and demonstrated efficiency of 98% collection of vapor; or
 - (II) any Stage I gasoline vapor recovery system whose design has been submitted to the Division, has passed any required certification tests, demonstrated an efficiency of 98% collection of vapors, and whose owner/operator has received a written approval from the Division. The submitted design shall include but may not be limited to

drawings detailing all components of the system and a written narrative describing the components and their use.

- (v) "Existing gasoline dispensing facility" means any applicable gasoline dispensing facility with an approved Stage I Gasoline Vapor Recovery System that was in operation on or before April 30, 2008.
- (vi) "Gasoline" means a petroleum distillate having a Reid vapor pressure of 4.0 psia or greater.
- (vii) "Gasoline dispensing facility" means any site where gasoline is dispensed to motor vehicle gasoline tanks from stationary storage tanks.
- (viii) "Major Modification" means the addition, replacement, or removal of a gasoline storage tank or a modification that causes the tank top of an underground storage tank to be unburied.
- (ix) "Reconstruction" means the replacement of any stationary gasoline storage tank.
- (x) "Stage I Gasoline Vapor Recovery System" means:
 - (I) any Stage I Gasoline Vapor Recovery System properly certified under the CARB vapor recovery certification procedures effective before April 1, 2001, excluding the coaxial poppetted drop tube requirement exempted by subparagraph 5.; or
 - (II) any Stage I Gasoline Vapor Recovery System whose design has been submitted to the Division, has passed any required certification tests, demonstrated an efficiency of 95% collection of vapor and whose owner/operator has received a written approval from the Division. The submitted design shall include but may not be limited to drawings detailing all components of the system and a written narrative describing the components and their use. Mixing of equipment components certified under separate certification procedures may be allowed when supported by manufacturer or independent third-party certification that the configuration meets or exceeds the applicable

performance standards and has received prior written approval from the Division.

- (xi) "Stationary storage tank" means all underground vessels and any aboveground vessels never intended for mobile use.
- (xii) "Submerged fill pipe" means any fill pipe with a discharge opening which is within a nominal distance of six inches from the tank bottom.

16. Compliance Dates

- (i) All gasoline dispensing facilities located in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale counties shall be in compliance.
- (ii) All gasoline dispensing facilities located in Catoosa, Richmond and Walker counties that dispense more than 50,000 gallons of gasoline per month shall be in compliance with this subparagraph by May 1, 2006.
- (iii) All gasoline dispensing facilities located in Catoosa, Richmond and Walker counties that dispense 50,000 gallons or less of gasoline per month shall be in compliance with this subparagraph by May 1, 2007.
- (iv) All gasoline dispensing facilities that dispense 100,000 gallons average monthly throughput of gasoline or more per month located in Barrow, Bartow, Carroll, Hall, Spalding, Newton and Walton counties shall be in compliance with this subparagraph by June 1, 2008.
- (v) All gasoline dispensing facilities that dispense greater than or equal to 50,000 gallons and less than 100,000 gallons average monthly throughput of gasoline per month located in Barrow, Bartow, Carroll, Hall, Spalding, Newton and Walton counties shall be in compliance with this subparagraph by November 1, 2008.
- (vi) All gasoline dispensing facilities that dispense greater than 10,000 gallons and less than 50,000 gallons average monthly throughput of gasoline-per-month and are located in Barrow, Bartow, Carroll,

Hall, Spalding, Newton and Walton counties shall be in compliance with this subparagraph by March 1, 2009.

- (vii) Upon the effective date of this rule, all newly constructed or reconstructed gasoline dispensing facilities located in Barrow, Bartow, Carroll, Catoosa, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Paulding, Richmond, Rockdale, Spalding, Newton, Walker and Walton shall be in compliance with this subparagraph upon startup of gasoline dispensing operations.
- (viii) Upon the effective date of this rule, all existing gasoline dispensing facilities located in Catoosa, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, Richmond, Rockdale, and Walker counties that undergo major modification shall be in compliance with the requirements of an approved Enhanced Stage I Gasoline Vapor Recovery System as defined in subparagraph 15.(iv) upon completion of the modification.
- (ix) All existing gasoline dispensing facilities located in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale counties shall be in compliance with the requirements of an approved Enhanced Stage I Gasoline Vapor Recovery System as defined in subparagraph 15.(iv) before May 1, 2012.

(ss) Gasoline Transport Vehicles and Vapor Collection Systems.

1. After the compliance date specified in paragraph 6. of this subparagraph, no person shall cause, let, permit, suffer, or allow the loading or unloading of gasoline from a gasoline transport vehicle of any size capacity unless:
 - (i) The tank sustains a pressure change of not more than three inches of water in five minutes when pressurized to 18 inches of water and evacuated to six inches of water as tested at least once per year in accordance with test procedures specified by the Division;
 - (ii) Displays a marking on the right front (passenger) side of the tank, in characters at least 2 inches high, which reads either P/V TEST DATE or EPA27 and the date on which the gasoline transport tank was last tested;

- (iii) The tank has no visible liquid leaks and no gasoline vapor leaks as measured by a combustible gas detector;
- (iv) The owner or operator of the gasoline transport vehicle has submitted to the Division within 30 days of the test date a data sheet in the format specified by the Division containing at a minimum the following information: name of person(s) or company that conducted the test, date of test, test results including a list of any repairs made to the transport vehicle to bring it into compliance and the manufacturer's vehicle identification number (VIN) of the tank truck or frame number of a trailer-mounted tank; and
- (v) The transport vehicle has been equipped with fittings which are vapor tight and will automatically and immediately close upon disconnection so as to prevent release of gasoline or gasoline vapors, with a vapor return line and hatch seal designed to prevent the escape of gasoline or gasoline vapors while loading.

2. The owner or operator of a vapor collection and vapor control system shall:

- (i) Design and operate the vapor collection and vapor control system and the gasoline loading equipment in a manner that prevents:
 - (I) Gauge pressure from exceeding 18 inches of water and vacuum from exceeding six inches of water in the gasoline tank truck;
 - (II) A reading equal to or greater than 100 percent of the lower explosive limit (LEL, measured as propane) at one inch from all points on the perimeter of a potential leak source when measured (in accordance with test procedures specified by the Division) during loading or unloading operations at gasoline dispensing facilities, bulk gasoline plants and bulk gasoline terminals; and
 - (III) Avoidable visible liquid leaks during loading and unloading operations at gasoline dispensing facilities, bulk gasoline plants and bulk gasoline terminals.
- (ii) Within 15 days, repair and retest a vapor collection or vapor control system that exceeds the limits in Subparagraph (i) above.

3. Applicability: The requirements of this subparagraph shall apply only to those gasoline transport vehicles which load or unload gasoline at bulk gasoline terminals, bulk gasoline plants, and gasoline dispensing facilities subject to VOC vapor control requirements contained under section 391-3-1-.02(2).
4. The Division may require a pressure/vacuum retest or leak check for any gasoline transport vehicle, vapor collection system, vapor control system, and/or gasoline loading equipment subject to this subparagraph. A gasoline transport vehicle, vapor collection system, vapor control system, and/or gasoline loading equipment for which the Division has required a pressure/vacuum retest or leak check shall:
 - (i) Cease loading and unloading operations within fourteen (14) days of the date of the initial retest or leak check request unless the retest or leak check has been completed to the satisfaction of the Division;
 - (ii) Provide written advance notification to the Division of the scheduled time and place of the test in order to provide the Division an opportunity to have an observer present; and
 - (iii) Supply a copy of the results of all such tests to the Division within 30 days of the test date.
5. For the purpose of this subparagraph, the following definitions shall apply:
 - (i) "Combustible Gas Detector" means a portable VOC gas analyzer with a minimum range of 0-100 percent of the LEL as propane.
 - (ii) "Gasoline" means a petroleum distillate having a Reid vapor pressure of 4.0 psia or greater.
 - (iii) "Gasoline Transport Vehicle" means any mobile storage vessel including tank trucks and trailers used for the transport of gasoline from sources of supply to stationary storage tanks of gasoline dispensing facilities, bulk gasoline plants or bulk gasoline terminals.
 - (iv) "Gasoline Vapor Leak" means a reading of 100 percent or greater of the Lower Explosive Limit (LEL) of gasoline when measured as propane at a distance of one inch.
 - (v) "Vapor Collection System" means a vapor transport system, including any piping, hoses and devices, which uses direct displacement by the gasoline being transferred to force vapors from

the vessel being loaded into either a vessel being unloaded or vapor control system or vapor holding tank.

- (vi) "Vapor Control System" means a system, including any piping, hoses, equipment and devices, that is designed to control the release of volatile organic compounds displaced from a vessel during transfer of gasoline.

6. Compliance Dates.

- (i) All gasoline transport vehicles and vapor collection systems operating in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale counties shall be in compliance.
- (ii) All gasoline transport vehicles and vapor collection systems operating in Catoosa, Richmond and Walker counties shall be in compliance with this subparagraph by May 1, 2006.
- (iii) All gasoline transport vehicles and vapor collection systems operating in Barrow, Bartow, Carroll, Hall, Newton, Spalding, and Walton counties shall be in compliance with this subparagraph by June 1, 2008.

(tt) **VOC Emissions from Major Sources.**

1. No person shall cause, let, permit, suffer or allow the emissions of VOC from any source to exceed the levels specified in paragraph 3. below unless such source has been approved by the Director as utilizing all reasonably available control technology in controlling those VOC emissions.
2. For the purpose of this subsection, "Reasonably Available Control Technology" means the utilization and/or implementation of water based or low solvent coatings, VOC control equipment such as incineration, carbon adsorption, refrigeration or other like means as determined by the Director to represent reasonably available control technology for the source category in question.
3. The requirements contained in this subsection shall apply to all such sources located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale which have potential VOC emissions exceeding 25 tons-per-year and to all such sources in the counties of Barrow, Bartow, Carroll, Hall,

Newton, Spalding, and Walton which have potential VOC emissions exceeding 100 tons-per-year.

4. Compliance Dates.
 - (i) All sources of VOC emissions subject to this subsection and located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale shall be in compliance.
 - (ii) All sources of VOC emissions subject to this subsection located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton and in operation on or before October 1, 1999, shall comply with the following compliance schedule:
 - (I) A demonstration of appropriate reasonably available control technology for controlling VOC emissions from the source must be submitted to the Division no later than October 1, 2000. Each demonstration is subject to approval, denial, or modification by the Division.
 - (II) A final control plan and application for a permit to construct for the installation of VOC emission control systems and/or modification of coatings, solvents, processes, or equipment must be submitted to the Division no later than April 1, 2001.
 - (III) On-site construction of emission control systems and/or modification of coatings, solvents, processes, or equipment must be completed by March 1, 2003.
 - (IV) Full compliance with the applicable requirements of this subsection must be demonstrated through methods and procedures approved by Division on or before May 1, 2003.
 - (iii) All sources of VOC emissions subject to this subsection located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton and which begin initial operation after October 1, 1999, shall be in compliance upon startup.
 - (iv) All sources of VOC emissions subject to this subsection and located in Barrow County shall be in compliance by March 1, 2009.
5. For the purpose of determining applicability of this subsection, the emissions of VOC from any source shall exclude all VOC emissions subject

to any other more specific VOC requirements contained in other subsections of this Rule.

6. For all Reasonably Available Control Technology demonstrations approved or determined pursuant to this subsection, the Division shall issue a public notice which provides for an opportunity for public comment and an opportunity for a hearing on the determination.
7. All Reasonably Available Control Technology demonstrations, and any modifications or changes to those determinations, approved or determined by the Division pursuant to this subsection shall be submitted by the Division to the U.S. EPA as a revision to the state implementation plan. No Reasonably Available Control Technology demonstration, nor any modification or change to a demonstration, approved or determined by the Division pursuant to this subsection shall revise the state implementation plan or be used as a state implementation plan credit, until it is approved by the U.S. EPA as a state implementation plan revision.

(uu) Visibility Protection.

1. The Director shall provide written notice of any permit application or written advance notice of a permit application for a proposed major stationary source or major modification to an existing major stationary source of emissions from which may have an impact on visibility in a Class I area to the federal land manager and the federal official charged with direct responsibility for management of any land within any such area.
2. The Director shall provide such notice within 30 days after receiving an application or written advance notice from a source as described in paragraph 1. above. The notification of a permit application shall include an analysis of the proposed source's anticipated impact on visibility in any federal Class I area and all materials in the application. In addition, the Director shall provide the Federal Land Manager a 60-day notice of any public hearing on that permit application.
3. The Director shall consider any analysis performed and/or written comments made by the Federal Land Manager in any final determination regarding the issuance of the permit provided that such analysis and/or comments are received within 30 days of having been notified by the Division. Where such analysis does not demonstrate to the satisfaction of the Director that an adverse impact will occur, the Director shall explain his decision and give notice of where the explanation can be obtained.

4. The provisions of this paragraph shall apply regardless of whether the proposed facility is to be located in an attainment, unclassified or non-attainment area.
5. The Director may require the source to monitor visibility in any Class I Federal area near the proposed new stationary source or major modification for such purposes and by such means as the Director deems necessary and appropriate.
6. For the purpose of this paragraph, major stationary source or major modification to an existing source shall be defined as in 40 CFR 51.24, but only for the pollutants of particulate matter, sulfur dioxide and nitrogen oxides.
7. Prior to the issuance of any permit, the Director shall ensure that the source's emissions will be consistent with making reasonable progress towards the national visibility goal of preventing any future, and remedying any existing, impairment of visibility in mandatory Class I areas which impairment results from manmade air pollution. The Director may take into account the cost of compliance, the time necessary for compliance, the energy and non-air quality environmental impacts of compliance, and the useful life of the source.
8. For the purpose of this paragraph, "impact on visibility" means visibility impairment (reductions in visual range and atmospheric discoloration) which interferes with the management, protection, preservation or enjoyment of the visitor's visual experience of the Federal Class I area. This determination must be made on a case-by-case basis taking into account the geographic extent, intensity, duration, frequency and time of visibility impairment, and must have these factors correlate with:
 - (i) Times of visitor use of the Federal Class I area; and
 - (ii) The frequency and timing of natural conditions that reduce visibility.

(vv) Volatile Organic Liquid Handling and Storage.

1. After the compliance date specified in section 3. of this subsection, no person subject to other VOC requirements contained in other subsections of this Rule may transfer or cause or allow the transfer of any volatile organic liquid other than gasoline from any delivery vessel into a stationary storage tank of greater than 4,000 gallons, unless the tank is equipped with submerged fill pipes.

2. For the purpose of this subsection, the following definitions shall apply:

- (i) "Delivery Vessel" means any tank truck or trailer equipped with a storage tank in use for the transport of volatile organic liquids from sources of supply to stationary storage tanks; and
- (ii) "Submerged Fill Pipe" means any fill pipe with a discharge opening which is within six inches of the tank bottom.

3. Compliance Dates.

- (i) All volatile organic liquid handling and storage facilities located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale shall be in compliance.
- (ii) All volatile organic liquid handling and storage facilities subject to this subsection; located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton; and in operation on or before October 1, 1999, shall be in compliance by May 1, 2003.
- (iii) All volatile organic liquid handling and storage facilities subject to this subsection; located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton; and which begin initial operation after October 1, 1999, shall be in compliance upon startup.
- (iv) All volatile organic liquid handling and storage facilities subject to this subsection and located in Barrow County shall be in compliance by March 1, 2009.

(ww) **Reserved.**

(xx) **Reserved.**

(yy) **Emissions of Nitrogen Oxides from Major Sources.**

- 1. No person shall cause, let, permit, suffer or allow the emissions of nitrogen oxides from any source to exceed the levels specified in paragraph 2. below unless such source has been approved by the Director as meeting the appropriate requirement for all reasonably available control technology in controlling those emissions of nitrogen oxides.
- 2. The requirements contained in this subsection shall apply to all such sources located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding,

and Rockdale which have potential emissions of nitrogen oxides, expressed as nitrogen dioxide, exceeding 25 tons-per-year and to all such sources in the counties of Barrow, Bartow, Carroll, Hall, Newton, Spalding, and Walton which have potential emissions of nitrogen oxides, expressed as nitrogen dioxide, exceeding 100 tons-per-year.

3. Compliance Dates.

- (i) All sources of nitrogen oxides emissions subject to this subsection which have potential emissions of nitrogen oxides, expressed as nitrogen dioxide, exceeding 50 tons per year; were in operation on or before April 1, 2004; and are located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale shall be in compliance.
- (ii) All sources of nitrogen oxides emissions subject to this subsection located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton and in operation on or before October 1, 1999, shall comply with the following compliance schedule:
 - (I) A demonstration of appropriate reasonably available control technology for controlling emissions of nitrogen oxides from the source must be submitted to the Division no later than October 1, 2000. Each demonstration is subject to approval, denial, or modification by the Division.
 - (II) A final control plan and application for a permit to construct for the installation of nitrogen oxides emission control systems and/or modifications of process or fuel-burning equipment must be submitted to the Division no later than April 1, 2001.
 - (III) On-site construction of emission control systems and/or modification of process or fuel-burning equipment must be completed by March 1, 2003.
 - (IV) Full compliance with the applicable requirements of this subsection must be demonstrated through methods and procedures approved by Division on or before May 1, 2003.
- (iii) All sources of nitrogen oxides emissions subject to this subsection located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton and which begin initial operation after October 1, 1999, shall be in compliance.

- (iv) All sources of nitrogen oxides emissions subject to this subsection which have potential emissions, expressed as nitrogen dioxide, not exceeding 50 tons-per-year; were in operation on or before April 1, 2004; and are located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale shall comply with the following compliance schedule:
 - (I) A demonstration of appropriate reasonably available control technology for controlling emissions of nitrogen oxides from the source must be submitted to the Division no later than October 1, 2004. Each demonstration is subject to approval, denial, or modification by the Division.
 - (II) A final control plan and application for a permit to construct for the installation of nitrogen oxides emission control systems and/or modifications of process or fuel-burning equipment must be submitted to the Division no later than April 1, 2005.
 - (III) On-site construction of emission control systems and/or modification of process or fuel-burning equipment must be completed by March 1, 2007.
 - (IV) Full compliance with the applicable requirements of this subsection must be demonstrated through methods and procedures approved by Division on or before May 1, 2007.
 - (v) All sources of nitrogen oxide emissions subject to this subsection located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale and which begin initial operation after April 1, 2004, shall be in compliance upon startup.
 - (vi) All sources of nitrogen oxide emissions subject to this subsection and located in Barrow County shall be in compliance by March 1, 2009.
4. The requirements contained in this subsection shall not apply to individual equipment at the source which have potential emissions of nitrogen oxides, expressed as nitrogen dioxide, in quantities less than a de minimis level of one ton-per-year or to air pollution control devices which are installed to effect compliance with any requirement of this Chapter.

5. The requirements contained in this subsection shall not apply to individual equipment at the source which are subject to subsections (jjj), (lll), (mmm), or (nnn) of this section 391-3-1-.02(2).
6. For the purpose of determining applicability of this subsection, the emissions of nitrogen oxides from any source shall exclude all nitrogen oxides emissions subject to subsections (jjj), (lll), (mmm), or (nnn) of this section 391-3-1-.02(2).
7. For all Reasonably Available Control Technology demonstrations approved or determined pursuant to this subsection, the Division shall issue a public notice which provides for an opportunity for public comment and an opportunity for a hearing on the determination.
8. All Reasonably Available Control Technology demonstrations, and any modifications or changes to those determinations, approved or determined by the Division pursuant to this subsection shall be submitted by the Division to the U.S. EPA as a revision to the state implementation plan. No Reasonably Available Control Technology demonstration, nor any modification or change to a demonstration, approved or determined by the Division pursuant to this subsection shall revise the state implementation plan or be used as a state implementation plan credit, until it is approved by the U.S. EPA as a state implementation plan revision.

(zz) **[reserved]**

(aaa) **[reserved]**

(bbb) **[reserved]**

(ccc) **VOC Emissions from Bulk Mixing Tanks.**

1. After the compliance date specified in section 4. of this subsection, no person shall let, permit, suffer, or allow the operation of a mixing tank unless the following requirements for control of emissions of volatile organic compounds are satisfied:
 - (i) All portable and stationary mixing tanks used for the manufacture of any VOC containing material shall be equipped with covers which completely cover the tank except for an opening no larger than necessary to allow for safe clearance of the mixer shaft. The tank opening shall be covered at all times except when operator access is necessary.

- (ii) Free fall of VOC containing material into product containers shall be accomplished by utilization of drop tubes, fill pipes or low-clearance equipment design on filling equipment unless demonstrated to the Division impractical for a specific operation.
 - (iii) Detergents or non-VOC containing cleaners shall be utilized for both general and routine cleaning operations of floors, equipment, and containers unless the cleanup cannot be accomplished without the use of VOC containing cleaners.
 - (iv) All waste solvents shall be stored in closed containers or vessels, unless demonstrated to be a safety hazard, and shall be disposed or reclaimed such solvents in a manner approved by the Division.
2. For the purpose of this subsection, the following definitions shall apply:
- (i) "Mixing Tanks" means any vessel in which resin, coating or other materials, or any combination thereof, are added to produce product blend.
3. The requirements of this subsection shall apply to facilities with potential VOC emissions exceeding 25 tons-per-year and located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale and to facilities with potential VOC emissions exceeding 100 tons-per-year and located in the counties of Barrow, Bartow, Carroll, Hall, Newton, Spalding, and Walton.
4. Compliance Dates.
- (i) All sources subject to this subsection and located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale shall be in compliance.
 - (ii) All sources subject to this subsection; located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton; and in operation on or before October 1, 1999, shall be in compliance by May 1, 2003.
 - (iii) All sources subject to this subsection; located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton; and which begin initial operation after October 1, 1999 shall be in compliance with this subsection upon startup.

- (iv) All sources subject to this subsection and located in Barrow County shall be in compliance by March 1, 2009.

(ddd) **VOC Emissions from Offset Lithography and Letterpress.**

1. No person shall cause, let, permit, suffer, or allow the operation of any offset lithography printing facility unless:
 - (i) Offset presses utilize fountain solutions containing 8 percent or less by volume VOCs; and
 - (ii) The owner or operator installs and operates a VOC emission reduction system for all heatset offset printing operations approved by the Director to have at least a 90 percent reduction efficiency and a capture system approved by the Director, or an equivalent VOC emission rate.
2. No person shall cause, let, permit, suffer, or allow the operation of any sheet-fed offset lithography printing facility unless the VOC content of the on-press (as-applied) fountain solution is:
 - (i) 5.0 percent alcohol or less (by weight); or
 - (ii) 8.5 percent alcohol or less (by weight) and the fountain solution is refrigerated to below 60°F (15.5°C); or
 - (iii) 5 percent alcohol substitute or less (by weight) and no alcohol in the fountain solution.
3. Sheet-fed offset lithography presses with a sheet size of 11 inches by 17 inches or smaller, and presses with a total fountain solution reservoir of less than 1 gallon are exempt.
4. No person shall cause, let, permit, suffer or allow the operation of any cold-set web-fed offset lithography printing facility unless the VOC content of the on-press (as applied) fountain solution is 5 percent alcohol substitute or less (by weight) and no alcohol in the fountain solution.
5. No person shall cause, let, permit, suffer, or allow the operation of any heatset web-fed offset lithography printing facility unless the VOC content of the on-press (as-applied) fountain solutions is:
 - (i) 1.6 percent alcohol or less (by weight); or

- (ii) 3.0 percent alcohol or less (by weight) and the fountain solution is refrigerated to below 60°F (15.5°C); or
 - (iii) 5.0 percent alcohol substitute or less (by weight) and no alcohol in the fountain solution.
6. For heatset web-fed offset lithographic and letterpress printing presses, the owner or operator shall install and operate a VOC emission reduction system for all dryers with a potential to emit greater than or equal to 25 tons of VOC emissions per year prior to controls.
- (i) Control devices with an initial installation date on or before January 1, 2015, shall be approved by the Director to have at least a 90 percent reduction efficiency and a capture system approved by the Director.
 - (ii) Control devices with an initial installation date after January 1, 2015, shall be approved by the Director to have at least a 95 percent reduction efficiency and a capture system approved by the Director.
 - (iii) For situations where the inlet concentration is so low that 90 or 95 percent efficiency cannot be achieved, an outlet concentration of 20 ppmv as hexane on a dry basis may be used as an alternative.
 - (iv) Heatset presses used for book printing and heatset presses with a maximum web width of 22 inches or less are exempt from the requirements in of subparagraph 6.(i) through (iii).
 - (v) The following materials are exempt from the requirements of subparagraph 6.(i) through (iii):
 - (I) sheet-fed or coldset web-fed inks;
 - (II) sheet-fed or coldset web-fed varnishes; and
 - (III) waterborne coatings or radiation (ultra-violet light or electron beam) cured materials used on offset lithographic or letterpress presses.
7. All cleaners used for blanket washing, roller washing, plate cleaners, impression cylinder cleaners, rubber rejuvenators and other cleaners used for cleaning a press, press parts, or to remove dried ink from areas around

a press shall have a VOC composite vapor pressure less than 10 mm Hg at 20°Celsius or contain less than 70 weight percent VOC. For those tasks that cannot be carried out with low VOC composite vapor pressure cleaning materials or reduced VOC content cleaning materials, 110 gallons per year of cleaning materials that do not meet the requirements of this subsection may be used.

8. All cleaning materials and used shop towels are to be kept in closed containers.
9. For the purpose of this subsection, the following definitions shall apply:
 - (i) "Cleaning Materials" means the materials used to remove excess printing inks, oils, and residual paper from press equipment. These materials are typically mixtures of organic (often petroleum-based) solvents.
 - (ii) "Fountain Solution" means the mixture of water and additional ingredients such as etchant, gum arabic and dampening aid which coats the non-image areas of the printing plate.
 - (iii) "Letterpress printing" means a printing process in which the image area is raised relative to the non-image area and the past ink is transferred to the substrate directly from the image surface.
 - (iv) "Lithographic printing" means a printing process where the image and the non-image areas are chemically differentiated; the image area is oil receptive and non-image area is water receptive.
 - (v) "Offset lithography printing" means a printing process that transfers the ink film from the lithographic plate to an intermediary surface (blanket) which then transfers the ink film to the substrate.
 - (vi) "Sheet-fed" refers to the process in which the substrate is cut into sheets before being printed.
 - (vii) "Web-fed" refers to the process in which the substrate is supplied to the press in the form of rolls.
10. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (ddd) shall apply to facilities at which the potential emissions of volatile organic compounds from offset lithography printing equal or exceed 25 tons per year and are located in Cherokee,

Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 1. and 9.

11. Applicability. Prior to January 1, 2015, the requirements of this subparagraph (ddd) shall apply to facilities at which the potential emissions of volatile organic compounds from offset lithography printing equal or exceed 100 tons per year and are located in Barrow, Bartow, Carroll, Hall, Newton, Spalding, and Walton Counties as follows:

- (i) All applicable facilities shall comply with the provisions of subparagraphs 1. and 9.

12. Applicability. Prior to January 1, 2015, all letterpress printing operations are subject to the applicability and control requirements of subparagraph 391-3-1-.02(2)(tt).

13. Applicability. On and after January 1, 2015, the requirements of this subparagraph (ddd) shall apply to facilities at which actual emissions of volatile organic compounds from offset lithographic printing and letter press printing, before controls, equal or exceed 15 pounds per day (or 2.7 tons per 12-month rolling period) for facilities located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton Counties as follows:

- (i) Individual heatset web offset lithographic printing presses and individual heatset web letterpress printing presses that have potential emissions of volatile organic compounds from the dryer, prior to controls, that equal or exceed 25 tons per year shall comply with the provisions of subparagraph 6;
- (ii) Individual heatset web offset lithographic printing presses that have potential emissions of volatile organic compounds from the dryer, prior to controls, that do not equal or exceed 25 tons per year and are located at facilities at which the potential emissions of volatile organic compounds from offset lithography printing equal or exceed 25 tons per year in Cherokee; Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale Counties shall comply with the provisions of subparagraph 1.(ii);

- (iii) Individual heatset web offset lithographic printing presses that have potential emissions of volatile organic compounds from the dryer, prior to controls, that do not equal or exceed 25 tons per year and are located at facilities at which the potential emissions of volatile organic compounds from offset lithography printing equal or exceed 100 tons per year in Barrow, Bartow, Carroll, Hall, Newton, Spalding, and Walton Counties shall comply with the provisions of subparagraph 1.(ii);
 - (iv) All applicable facilities shall comply with the provisions of subparagraphs 2., 3., 4., 5., 7., 8., and 9;
 - (v) Any physical or operational changes that are necessary to comply with the provisions specified in subparagraphs 13.(i) or (iv) are subject to the compliance schedule specified in subparagraph 15.
14. Applicability: The requirements of subparagraph 13. will no longer be applicable by the compliance deadlines if the counties specified in those subparagraphs are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015 and such counties continue to maintain that Standard thereafter. Instead, the provisions of subparagraphs 10., 11., and 12. will continue to apply on and after January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of subparagraph 13. will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.
15. Compliance Schedule:
- (i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than **July 1, 2014.**
 - (ii) On-site of construction of emission control systems and/or modification of process or coatings must be completed by **November 1, 2014.**
 - (iii) Full compliance with the applicable requirements specified in subparagraphs 13.(i) and (iv) must be completed before **January 1, 2015.**

(eee) **VOC Emissions from Expanded Polystyrene Products Manufacturing.**

1. Except as provided in sections 2., 3., and 4. of this section, after the compliance date specified in section 8. of this subsection, no person shall cause, let, permit, suffer, or allow the VOC emissions from an expandable polystyrene product manufacturing facility to exceed 0.015 lbs VOC/lb bead utilized.
2. No person shall cause, let, permit, suffer, or allow the operation of an expandable polystyrene cup manufacturing facility existing before November 1, 1987 unless the facility has installed and operates volatile organic compound emission reduction equipment on the pre-expanders having at least a 90.0 percent reduction efficiency and a capture system approved by the Director.
3. No person shall cause, let, permit, suffer, or allow the operation of an expandable polystyrene board insulation manufacturing facility existing before January 1, 1990 unless the facility has installed and operates volatile organic compound emission reduction equipment on the pre-expanders so as to achieve at least a 90.0 percent reduction efficiency and a capture system approved by the Director; or limits VOC emissions from the entire facility to no greater than 0.0175 lb VOC/lb bead utilized.
4. No person shall cause, let, permit, suffer, or allow the operation of an expandable polystyrene custom shape manufacturing facility existing before January 1, 1990, unless the facility utilizes a batch expander and reduced volatile expandable polystyrene bead containing no more than 4.5 percent initial VOC content. The monthly weighted average of all beads used shall not exceed 4.5 percent.
5. For the purposes of this subsection, VOC emitted after the average curing time shall not be considered to be emitted from the facility.
6. For the purpose of this subsection, the following definitions shall apply:
 - (i) "Expandable Polystyrene Products Manufacturing" means the manufacturing of products utilizing expandable polystyrene bead impregnated with a VOC blowing agent.
 - (ii) "Board Insulation Manufacturers" means producers of thermal insulation, display foam, or floatation products. Thermal insulation production usually requires densities as specified in ASTM C-578, the industry standard for both EPS and XPS insulation applications.

- (iii) "Custom Shape Manufacturers" means producers of a variety of different products ranging in density and size and based primarily on customer specifications.
- (iv) "Pre-expander" means the system where initial expansion of the bead occurs.
- (v) "Process" means the point from the opening of the gaylord to the end of the average curing time.

7. The requirements of this subsection shall apply to facilities with potential VOC emissions exceeding 25 tons per year and located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale and to facilities with potential VOC emissions exceeding 100 tons per year and located in the counties of Barrow, Bartow, Carroll, Hall, Newton, Spalding, and Walton.

8. Compliance Dates.

- (i) All sources subject to this subsection and located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale shall be in compliance.
- (ii) All sources subject to this subsection located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton; and in operation on or before October 1, 1999, shall be in compliance with this subsection by May 1, 2003.
- (iii) All sources subject to this subsection; located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton; and which begin initial operation after October 1, 1999, shall be in compliance with this subsection upon startup.
- (iv) All sources subject to this subsection and located in Barrow County shall be in compliance by March 1, 2009.

(fff) Particulate Matter Emissions from Yarn Spinning Operations.

1. No person shall cause, let, permit, suffer or allow the rate of particulate matter emissions from a yarn spinning operation with process input rates up to and including 30 tons per hour to equal or exceed the allowable rate of emissions calculated from the following equation.

$$E = 4.1P^{0.67}$$

where:

E = allowable emission rate in pounds per hour;

P = process input weight of raw or partially processed fiber in tons per hour.

2. For the purpose of this subparagraph, the term process, as it applies to the yarn spinning operation, shall include all of the activities from bale delivery, bale stripping, carding, drawing, spinning, twisting, to and including winding, conducted at the facility.

(ggg) Existing Municipal Solid Waste Landfills.

1. The provisions of this subsection apply to each existing municipal solid waste landfill that commenced construction, reconstruction or modification before May 30, 1991 and has accepted waste at any time since November 8, 1987, or has additional design capacity available for future waste deposition. Physical or operational changes made to an existing municipal solid waste landfill solely to comply with this subsection are not considered construction, reconstruction, or modification and would not subject an existing municipal solid waste landfill to the requirements of 391-3-1-.02(8)(b)72. which are the Federal New Source Performance Standards for Municipal Solid Waste Landfills.
2. Definitions of all Terms used, but not defined in this subsection, have the meaning given them in 40 CFR Part 60 Subpart WWW, as amended. Terms not defined therein shall have the meaning given them in the federal Clean Air Act, the Georgia Air Quality Act or 40 CFR Part 60 Subparts A and B.
 - (i) The word "Administrator" as used in regulations adopted in this subsection shall mean the Director of the Georgia Environmental Protection Division.
3. For the purposes of implementing the requirements and provisions of the Emission Guidelines of 40 CFR 60 Subpart Cc for Existing Municipal Solid Waste Landfills, each existing municipal solid waste landfill meeting the conditions of paragraph 1. of this subsection shall comply with all of the applicable standards, requirements and provisions of 40 CFR Part 60 Subpart WWW, as amended, which is hereby incorporated and adopted by reference with the exceptions as follows:

(i) Standards for air emissions from municipal solid waste landfills. The FR 60.752 apply as stated therein with the exception of the following:

(I) In lieu of 40 CFR 60.752(a)(2), the following provision applies:

When an increase in the maximum design capacity of a landfill exempted from the provisions of 40 CFR 60.752(b) through 40 CFR 60.759 on the basis of the design capacity exemption in 40 CFR 60.752(a) results in a revised maximum design capacity equal to or greater than 2.5 million megagrams and 2.5 million cubic meters, the owner or operator shall comply with the provision of 391-3-1-.02(8)(b)72. which are the Federal New Source Performance Standards for Municipal Solid Waste Landfills.

(II) In lieu of 40 CFR 60.752(b)(2)(i)(B), the following provision applies:

The collection and control system design plan shall include any alternatives to the operational standards, test methods, procedures, compliance measures, monitoring, recordkeeping or reporting provisions of 40 CFR 60.753 through 40 CFR 60.758 proposed by the owner or operator. In addition, the collection and control system design plan must specify:

- (1) the date by which contracts for control system/process modifications shall be awarded, (which shall be no later than 20 months after the date the NMOC emissions rate is first calculated to meet or exceed 50 megagrams per year);
- (2) the date by which on-site construction or installation of the air pollution control devices(s) or process changes will begin (which shall be no later than 24 months after the date the NMOC emissions rate is first calculated to meet or exceed 50 megagrams per year); and

(3) the date by which the construction or installation of the air pollution control devices(s) or process changes will be complete.

(III) In lieu of 40 CFR 60.752(c)(1) and (c)(2) which establishes the date that a landfill is subject to 40 CFR Parts 70 and 71, the following date applies:

I. June 23, 1997.

- (ii) Operational standards for collection and control systems. The provisions of 40 CFR 60.753 apply as stated therein.
- (iii) Test methods and procedures. The provisions of 40 CFR 60.754 apply as stated therein with the exception of 40 CFR 60.754(c), which does not apply.
- (iv) Compliance provisions. The provisions of 40 CFR 60.755 apply as stated therein.
- (v) Monitoring of operations. The provisions of 40 CFR 60.756 apply as stated therein.
- (vi) Reporting requirements. The provisions of 40 CFR 60.757 apply as stated therein with the exception of the following:
 - (I) In lieu of 40 CFR 60.757(a)(1), (a)(1)(i) and (a)(1)(ii), the following provision applies:

The initial design capacity report shall be submitted by October 1, 1997.

- (II) In lieu of 40 CFR 60.757(b)(1)(i), (i)(A) and (i)(B), the following provision applies:

The initial NMOC emission rate report shall be submitted by October 1, 1997 and may be combined with the initial design capacity report required in 40 CFR 60.757(a). Subsequent NMOC emission rate reports shall be submitted annually thereafter, except as provided for in 40 CFR 60.757(b)(1)(ii) and 40 CFR 60.757(b)(3).

- (vii) Recordkeeping requirements. The provisions of 40 CFR 60.758 apply as stated therein.
 - (viii) Specifications for active collection systems. The provisions of 40 CFR 60.759 apply as stated therein.
4. Subparagraphs 1. through 3. are applicable PRIOR to the approval of Georgia's state plan implementing the revised Emission Guidelines for existing Municipal Solid Waste (MSW) Landfills (40 CFR Part 60 Subpart Cf).
 5. Subparagraphs 6. through 8. are applicable AFTER the approval of Georgia's state plan implementing the revised Emission Guidelines for existing Municipal Solid Waste (MSW) Landfills (40 CFR Part 60 Subpart Cf).
 6. The provisions of this subparagraph apply to each existing municipal solid waste landfill that commenced construction, reconstruction or modification on or before July 17, 2014 and has either accepted waste at any time since November 8, 1987 or has additional design capacity available for future waste deposition. Physical or operational changes made to an existing municipal solid waste landfill solely to comply with this subparagraph are not considered construction, reconstruction, or modification and would not subject an existing municipal solid waste landfill to the requirements of 391-3-1-.02(8)(b)89., 40 CFR Part 60 Subpart XXX Standards of Performance for Municipal Solid Waste Landfills That Commenced Construction, Reconstruction, or Modification After July 17, 2014.
 7. Definitions of all Terms used, but not defined in subparagraphs 6. through 8., have the meaning given them in 40 CFR Part 60 Subpart Cf. Terms not defined therein shall have the meaning given them in the federal Clean Air Act, the Georgia Air Quality Act or 40 CFR Part 60 Subparts A and B.
 - (i) Except as noted, the word "Administrator" as used in regulations adopted by reference in subparagraphs 6. through 8. shall mean the Director of the Georgia Environmental Protection Division. For 40 CFR 60.30f(c), 40 CFR 60.35f(a)(5) and 40 CFR 60.38f(j) the word "Administrator" shall mean the Administrator of the EPA.
 8. For the purposes of implementing the requirements and provisions of the Emission Guidelines of 40 CFR Part 60 Subpart Cf for Existing Municipal Solid Waste Landfills, each existing municipal solid waste

landfill meeting the conditions of subparagraph 6. shall comply with all of the applicable standards, requirements and provisions of 40 CFR Part 60 Subpart Cf, which is hereby incorporated and adopted by reference with the exceptions as follows:

- (i) The requirements of the State to incorporate the provisions into an approvable state plan, and
- (ii) The provisions of 60.30f.
- (iii) In lieu of 40 CFR 60.33f(d)(2), the following provision applies:

When an increase in the maximum design capacity of a landfill exempted from the provisions of 40 CFR 60.33f through 40 CFR 60.40f on the basis of the design capacity exemption in 40 CFR 60.31f results in a revised maximum design capacity equal to or greater than 2.5 million megagrams and 2.5 million cubic meters, due to reconstruction or modification, that was commenced after July 17, 2014, then the owner or operator shall comply with the provision of 391-3-1-.02(8)(b)89., 40 CFR Part 60 Subpart XXX Standards of Performance for Municipal Solid Waste Landfills That Commenced Construction, Reconstruction, or Modification After July 17, 2014.

- (iv) In lieu of 40 CFR 60.38f(d)(2), the following provision applies:
 - (I) The collection and control system design plan shall include any alternatives to the operational standards, test methods, procedures, compliance measures, monitoring, recordkeeping or reporting provisions of 40 CFR 60.34f through 40 CFR 60.39f proposed by the owner or operator. In addition, the collection and control system design plan must specify:
 - I. The date by which contracts for control system/process modifications shall be awarded, which shall be no later than 20 months after the date the NMOC emissions rate is first reported to meet or exceed 34 megagrams per year, or the date the NMOC emissions rate is first reported to meet or exceed 50 megagrams per year for a landfill in the closed landfill subcategory, or the date when a surface emission concentration of 500 parts per million methane or greater is reported if conducting Tier 4 surface emissions monitoring;

II. The date by which on-site construction or installation of the air pollution control devices(s) or process changes will begin which shall be no later than 24 months after the date the NMOC emissions rate is first reported to meet or exceed 34 megagrams per year, or the date the NMOC emissions rate is first reported to meet or exceed 50 megagrams per year for a landfill in the closed landfill subcategory, or the date when a surface emission concentration of 500 parts per million methane or greater is reported if conducting Tier 4 surface emissions monitoring; and

III. The date by which the construction or installation of the air pollution control device(s) or process changes will be complete.

(II) Operational standards for collection and control systems. The provisions of 40 CFR 60.34f apply as stated therein.

(III) Test methods and procedures. The provisions of 40 CFR 60.35f apply as stated therein.

(IV) Compliance provisions. The provisions of 40 CFR 60.36f apply as stated therein.

(V) Monitoring of operations. The provisions of 40 CFR 60.37f apply as stated therein.

(VI) Reporting requirements. The provisions of 40 CFR 60.38f apply as stated therein. Except as provided in 7.(i) and 8.(iv).

(VII) Recordkeeping requirements. The provisions of 40 CFR 60.39f apply as stated therein.

(VIII) Specifications for active collection systems. The provisions of 40 CFR 60.40f apply as stated therein.

(hhh) Wood Furniture Finishing and Cleaning Operations.

1. Each owner or operator of a wood furniture finishing and cleaning operation shall limit VOC emissions from finishing operations by:

- (i) Using topcoats that contain no more than 0.8 pounds of VOC per pound of solids, as applied; or
- (ii) In lieu of complying with subsection (i), wood furniture finishing operations may comply by:
 - (I) Using a finishing system of sealers that contain no more than 1.9 pounds of VOC per pound of solids, as applied; and
 - (II) Using topcoats that contain no more than 1.8 pounds of VOC per pound of solids, as applied; or
- (iii) For wood furniture finishing operations that use acid-cured alkyd amino vinyl sealers and that use acid-cured alkyd amino conversion varnish topcoats:
 - (I) Using sealers that contain no more than 2.3 pounds of VOC per pound of solids, as applied; and
 - (II) Using topcoats that contain no more than 2.0 pounds of VOC per pound of solids, as applied; or
- (iv) For wood furniture finishing operations that do not use acid-cured alkyd amino vinyl sealers and that use acid-cured alkyd amino conversion varnish topcoats:
 - (I) Using sealers that contain no more than 1.9 pounds of VOC per pound of solids, as applied; and
 - (II) Using topcoats that contain no more than 2.0 pounds of VOC per pound of solids, as applied; or
- (v) For wood furniture finishing operations that use acid-cured alkyd amino vinyl sealers and that do not use acid-cured alkyd amino conversion varnish topcoats:
 - (I) Using sealers that contain no more than 2.3 pounds of VOC per pound of solids, as applied; and
 - (II) Using topcoats that contain no more than 1.8 pounds of VOC per pound of solids, as applied; or
- (vi) Using an averaging approach that demonstrates the wood furniture finishing operation meets the emission limits defined in

subsections (i), (ii), (iii), (iv) or (v), averaged on a daily basis throughout the facility; or

(vii) Using a control system that will achieve an equivalent reduction in emissions and meet the requirements of subsections (i), (ii), (iii), (iv) or (v) of this section; or

(viii) Using a combination of the methods presented in subsections (i), (ii), (iii), (iv), (v), (vi), and (vii).

2. Each owner or operator of a wood furniture finishing and cleaning operation shall limit VOC emissions by using strippable booth coating materials that contain no more than 0.8 pounds of VOC per pound of solids, as applied.
3. Each owner or operator of a wood furniture finishing and cleaning operation shall prepare and maintain a written work practice implementation plan that defines work practices for each wood furniture manufacturing operation and addresses each of the topics specified. The work practice implementation plan shall be submitted to the Division for approval by the compliance dates contained in section 7. This plan shall include: an operator training course; a leak inspection and maintenance plan; a cleaning and washoff solvent accounting system; a spray booth cleaning plan; a storage plan for finishing, cleaning and washoff materials; an application equipment requirement plan; a paint line and gun cleaning plan; and an outline of washoff operations.
4. Each owner or operator of a wood furniture finishing and cleaning operation shall maintain certified product data sheets for each sealer, topcoat, and strippable booth coating material that is used to meet the requirements of sections 1. and 2. of this rule. If solvent or other VOC is added to the finishing material before application, the affected source shall maintain documentation showing the VOC content of the finishing material in pounds of VOC-per-pound of solids, as applied.
5. For the purpose of this subsection the following definitions shall apply:
 - (i) "As applied" means the VOC and solids content of the finishing material that is actually used for coating the substrate. It includes the contribution of materials used for in-house dilution of the finishing material.
 - (ii) "Certified product data sheet" means documentation furnished by a coating supplier or an outside laboratory that provides the VOC

content by percent weight, the solids content by percent weight, and density of a finishing material, strippable booth coating, or solvent, measured using the EPA Method 24, or an equivalent or alternative method. The VOC content should represent the maximum VOC emission potential of the finishing material, strippable booth coating, or solvent.

- (iii) "Sealer" means a finishing material used to seal the pores of a wood substrate before additional coats of finishing material are applied. Washcoats, which are used in some finishing systems to optimize aesthetics, are not sealers.
 - (iv) "Stain" means any color coat having a solids content by weight of no more than 8.0 percent that is applied in single or multiple coats directly to the substrate. This includes, but is not limited to, nongrain raising stains, equalizer stains, sap stains, body stains, no-wipe stains, penetrating stains, and toners.
 - (v) "Strippable booth coating" means a coating that:
 - (1) is applied to a booth wall to provide a protective film to receive overspray during finishing operations;
 - (2) that is subsequently peeled off and disposed; and
 - (3) by achieving (1) and (2), reduces or eliminates the need to use organic solvents to clean booth walls.
 - (vi) "Topcoat" means the last film-building finishing material applied in a finishing system. Non-permanent final finishes are not topcoats.
 - (vii) "Wood Furniture" means any product made of wood, a wood product such as rattan or wicker, or an engineered wood product such as particleboard that is manufactured under any of the following standard industrial classification codes: 2434, 2511, 2512, 2517, 2519, 2521, 2531, 2541, 2599, or 5712.
6. The requirements of this subsection shall apply to facilities with potential VOC emissions exceeding 25 tons-per-year and located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale and to facilities with potential VOC emissions exceeding 100 tons-per-year and located in the

counties of Barrow, Bartow, Carroll, Hall, Newton, Spalding, and Walton.

7. Compliance Dates.

- (i) All sources subject to this subsection and located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale shall be in compliance.
- (ii) All sources subject to this subsection; located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton; and in operation on or before October 1, 1999, shall be in compliance with this subsection by May 1, 2003.
- (iii) All sources subject to this subsection; located in the counties of Bartow, Carroll, Hall, Newton, Spalding, and Walton; and which begin initial operation after October 1, 1999, shall be in compliance with this subsection upon startup.
- (iv) All sources subject to this subsection and located in Barrow County shall be in compliance by March 1, 2009.

(iii) **Hospital/Medical/Infectious Waste Incinerators.**

1. The provisions of this subparagraph apply to each hospital/medical/infectious waste incinerator (HMIWI) that commenced construction no later than December 1, 2008 or commenced modification no later than April 6, 2010 (hereinafter referred to as an "Existing HMIWI"). Physical or operational changes made to an Existing HMIWI solely to comply with this subparagraph are not considered construction or modification and would not subject an Existing HMIWI to the requirements of 391-3-1-.02(8)(b)73.
 - (i) A combustor is not subject to this subparagraph during periods when only pathological waste, low-level radioactive waste, and/or chemotherapeutic waste (all defined in 40 CFR 60.51c) is burned, provided the owner or operator of the combustor:
 - (I) Notifies the Director of an exemption claim; and
 - (II) Keeps records on a calendar quarter basis of the periods of time when only pathological waste, low-level radioactive waste and/or chemotherapeutic waste is burned.

- (ii) Any co-fired combustor (defined in 40 CFR 60.51c) is not subject to this subparagraph if the owner or operator of the co-fired combustor:
 - (I) Notifies the Director of an exemption claim;
 - (II) Provides an estimate of the relative amounts of hospital waste, medical/infectious waste, and other fuels and wastes to be combusted; and
 - (III) Keeps records on a calendar quarter basis of the weight of hospital waste and medical/infectious waste combusted, and the weight of all other fuels and wastes combusted at the co-fired combustor.
 - (iii) Any combustor required to have a permit under section 3005 of the Solid Waste Disposal Act is not subject to this subparagraph.
 - (iv) Any combustor which meets the applicability requirements under subpart Cb, Ea, or Eb of 40 CFR Part 60 is not subject to this subparagraph.
 - (v) Any pyrolysis unit (defined in 40 CFR 60.51c) is not subject to this subparagraph.
 - (vi) Cement kilns firing hospital waste and/or medical/infectious waste are not subject to this subparagraph.
2. Each Existing HMIWI is subject to the permitting requirements of [391-3-1-.03\(10\)](#) "Title V Operating Permits."
3. Definitions of all Terms used, but not defined in this subparagraph, shall have the meaning given to them in 40 CFR Part 60, Subpart Ec, as amended on April 4, 2011. Terms not defined therein shall have the meaning given to them in the federal Clean Air Act or 40 CFR Part 60, Subparts A and B. For the purposes of this subparagraph the following definitions also apply:
- (i) Except as noted, the word "Administrator" as used in regulations adopted by reference in this subparagraph shall mean the Director of the Georgia Environmental Protection Division. For subparagraph (iii)6. the word "Administrator" shall mean the Administrator of the EPA.

4. For the purposes of implementing the requirements and provisions of the Emission Guidelines of 40 CFR 60, Subpart Ce for Existing HMIWIs, each Existing HMIWI shall comply with the standards, requirements and provisions of 40 CFR Part 60, Subpart Ec, as amended on April 4, 2011, which is hereby incorporated and adopted by reference, with the exceptions as follows:

(i) The provisions of 40 CFR 60.50c apply to each Existing HMIWI as stated therein with the exception of the following:

(I) In lieu of 40 CFR 60.50c(a), the following provision applies:

Except as provided in 40 CFR 60.50c(b) through (h), this subparagraph shall apply to each existing HMIWI, as identified in subparagraph 1.

(II) In lieu of 40 CFR 60.50c(e), the following provision applies:

Any combustor which meets the applicability requirements under 40 CFR Part 60 Subparts Cb, Ea, or Eb is not subject to this subparagraph.

(III) The provisions of 40 CFR 60.50c(j), (k), (l), (m), and (n) do not apply to an Existing HMIWI.

(ii) Emission Limits. The provisions of 40 CFR 60.52c apply to each Existing HMIWI as stated therein with the exception of the following:

(I) In lieu of 40 CFR 60.52c(a), the following provisions apply:

I. From an affected facility constructed on or before June 20, 1996 no owner or operator of an Existing HMIWI shall cause to be discharged into the atmosphere from that affected facility any gases that contain stack emissions in excess of the applicable limits found in Table 1B of 40 CFR Part 60, Subpart Ce.

II. From an affected facility constructed after June 20, 1996 but no later than December 1, 2008 no owner or operator of an Existing HMIWI shall cause to be discharged into the atmosphere from that affected facility any gases that contain stack emissions in excess of the applicable limits found in the more stringent of the requirements listed in Table 1B of 40

CFR Subpart Ce and Table 1A of 40 CFR Part 60,
Subpart Ec.

- (II) The provisions of 40 CFR 60.52c(c), (d), and (e) do not apply to an Existing HMIWI.
 - (iii) Operator Training. The provisions of 40 CFR 60.53c apply to each Existing HMIWI as stated therein.
 - (iv) Siting Requirements. The provisions of 40 CFR 60.54c do not apply to an Existing HMIWI.
 - (v) Waste Management Plan. The provisions of 40 CFR 60.55c apply to each Existing HMIWI as stated therein.
 - (vi) Compliance and Performance Testing. In lieu of 40 CFR 60.56c, Section 2.117.2 of the Georgia Department of Natural Resources Procedures for Testing and Monitoring Sources of Air Pollutants applies to each Existing HMIWI.
 - (vii) Monitoring Requirements. In lieu of 40 CFR 60.57c, Section 2.117.3 of the Georgia Department of Natural Resources Procedures for Testing and Monitoring Sources of Air Pollutants applies to each Existing HMIWI.
 - (viii) Reporting and Record Keeping Requirements. In lieu of 40 CFR 60.58c, Section 2.117.4 of the Georgia Department of Natural Resources Procedures for Testing and Monitoring Sources of Air Pollutants applies to each Existing HMIWI.
 - (ix) Table 1B of 40 CFR Part 60, Subpart Ec does not apply to an Existing HMIWI.
5. In keeping with subparagraph (iii)4., owners and operators of existing HMIWI units must comply with Georgia's state plan for existing HMIWI units, which is required by 40 CFR Part 60, Subpart Ce. The owner operator of each existing HMIWI unit shall comply with the requirements of 391-3-1-.02(2)(iii)4. upon approval of Georgia's state plan for existing HMIWI units by EPA.
6. The owner of an existing HMIWI unit must contact EPA with respect to the following subparagraphs (i) through (v) as specified in 40 CFR 60.50c(i).

- (i) The requirements of 40 CFR 60.56c(j) establishing operating parameters when using controls other than those listed in 40 CFR 60.56c(d)
- (ii) Approval of alternative methods of demonstrating compliance under 40 CFR 60.8 including:
 - (I) Approval of CEMS for PM, HCl, multi-metals, and Hg where used for purposes of demonstrating compliance,
 - (II) Approval of continuous automated sampling systems for dioxin/ furan and Hg where used for purposes of demonstrating compliance, and
 - (III) Approval of major alternatives to test methods;
- (iii) Approval of major alternatives to monitoring;
- (iv) Waiver of recordkeeping requirements; and
- (v) Performance test and data reduction waivers under 40 CFR 60.8(b)

(jjj) NO_x Emissions from Electric Utility Steam Generating Units.

1. Effective May 1, 1999, through September 30, 1999, no person shall cause, let, permit, suffer, or allow the emissions of NO_x from an affected unit under this subsection unless:
 - (i) The NO_x emissions from each affected unit(s) do not exceed the alternative emission limit established by the Director for the unit(s). Said alternative emission limits shall be determined by the Division and established in the Title V Permit for the affected unit(s). In no case shall the alternative emission limits established pursuant to this section, averaged over all affected units on a maximum rated heat input capacity basis, be greater than the average allowable rate specified in subsection 1.(ii).
 - (ii) If the person does not comply with all alternative emission limits established under subsection 1.(i) above, the person shall demonstrate that the NO_x emissions, averaged over all affected units, do not exceed 0.34 lb/MMBTU heat input.
2. Effective May 1, 2000 through September 30, 2002, no person shall cause, let, permit, suffer, or allow the emissions of NO_x from an affected unit under this subsection unless:

- (i) The NOx emissions from each affected unit(s) do not exceed the alternative emission limit established by the Director for the unit(s). Said alternative emission limits shall be determined by the Division and established in the Title V Permit for the affected unit(s). In no case shall the alternative emission limits established pursuant to this section, averaged over all affected units on a maximum rated heat input capacity basis, be greater than the average allowable rate specified in subsection 2.(ii).
 - (ii) If the person does not comply with all alternative emission limits established under subsection 2.(i) above, the person shall demonstrate that the NOx emissions, averaged over all affected units, do not exceed 0.30 lb/MMBTU heat input.
- 3. Effective May 1, 2003, no person shall cause, let, permit, suffer, or allow the emissions of NOx from an affected unit under this subsection unless:
 - (i) The NOx emissions from each affected unit(s) do not exceed the alternative emission limit established by the Director for the unit(s). Said alternative emission limits shall be determined by the Division and established in the Title V Permit for the affected unit(s). In no case shall the alternative emission limits established pursuant to this section, averaged over all affected units using the highest 30 consecutive days of actual heat input for 1999, be greater than the average allowable rate specified in subsection 3.(ii).
 - (ii) If the person does not comply with all alternative emission limits established under subsection 3.(i) above, the person shall demonstrate that the NOx emissions, averaged over all affected units, do not exceed 0.13 lb/MMBTU heat input.
- 4. Effective May 1, 2003, through September 30, 2006, no person shall cause, let, permit, suffer, or allow the emissions of NOx from an affected unit under this subsection unless:
 - (i) The NOx emissions from each affected unit(s) do not exceed the alternative emission limit established by the Director for the unit(s). Said alternative emission limits shall be determined by the Division and established in the Title V Permit for the affected unit(s). In no case shall the alternative emission limits established pursuant to this section, averaged over all affected units using the highest 30 consecutive days of actual heat input for 1999, be greater than the average allowable rate specified in subsection 4.(ii).

- (ii) If the person does not comply with all alternative emission limits established under subsection 4.(i) above, the person shall demonstrate that the NO_x emissions, averaged over all affected units, do not exceed 0.20 lb/MMBTU heat input.

- 5. Effective May 1, 2007, no person shall cause, let, permit, suffer, or allow the emissions of NO_x from an affected unit under this subsection unless:
 - (i) The NO_x emissions from each affected unit(s) do not exceed the alternative emission limit established by the Director for the unit(s). Said alternative emission limits shall be determined by the Division and established in the Title V Permit for the affected unit(s). In no case shall the alternative emission limits established pursuant to this section, averaged over all affected units using the highest 30 consecutive days of actual heat input for 1999, be greater than the average allowable rate specified in subsection 5.(ii).
 - (ii) If the person does not comply with all alternative emission limits established under subsection 5.(i) above, the person shall demonstrate that the NO_x emissions, averaged over all affected units, do not exceed 0.18 lb/MMBTU heat input.

- 6. Effective May 1, 2007, no person shall cause, let, permit, suffer, or allow the emissions of NO_x from an affected unit under this subsection unless:
 - (i) The NO_x emissions from each affected unit(s) do not exceed the alternative emission limit established by the Director for the unit(s). Said alternative emission limits shall be determined by the Division and established in the Title V Permit for the affected unit(s). In no case shall the alternative emission limits established pursuant to this section, averaged over all affected units using the highest 30 consecutive days of actual heat input for 1999, be greater than the average allowable rate specified in subsection 6.(ii).
 - (ii) If the person does not comply with all alternative emission limits established under subsection 6.(i) above, the person shall demonstrate that the NO_x emissions, averaged over all affected units, do not exceed 0.17 lb/MMBTU heat input.

- 7. The compliance period shall be based on a 30-day rolling average beginning May 1 and ending September 30 of each year.
 - (i) The first 30-day averaging period shall begin on May 1.

- (ii) The last 30-day averaging period shall end on September 30.
- (iii) Affected units under this subsection shall be all coal-fired electric utility steam generating units with a maximum heat input greater than 250 MMBTU/hr.

8. The requirements contained in sections 1 and 2 of this subsection shall apply to all such sources located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale. The requirements contained in Section 3 of this subsection shall apply to all such sources located in the counties of Bartow, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gwinnett, Heard, Henry, Paulding, and Rockdale. The requirements contained in sections 4 and 5 of this subsection shall apply to all such sources located in the counties of Bartow, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gwinnett, Heard, Henry, Monroe, Paulding, Putnam, and Rockdale. The requirements contained in Section 6 of this subsection shall apply to sources located in Monroe County.

(kkk) VOC Emissions from Aerospace Manufacturing and Rework Facilities.

1. No person shall cause, let, permit, suffer, or allow the emissions of VOC from the coating of aerospace vehicles or components to exceed:
 - (i) 2.9 pounds per gallon of coating, excluding water and exempt solvents, delivered to a coating applicator that applies primers. For general aviation rework facilities, the VOC limitation shall be 4.5 pounds per gallon of coating, excluding water and exempt solvents, delivered to a coating applicator that applies primers.
 - (ii) 3.5 pounds per gallon of coating, excluding water and exempt solvents, delivered to a coating applicator that applies topcoats (including self-priming topcoats). For general aviation rework facilities, the VOC limitation shall be 4.5 pounds per gallon of coating, excluding water and exempt solvents, delivered to a coating applicator that applies topcoats (including self-priming topcoats).
 - (iii) The VOC content limits listed in Table (kkk) -1 below expressed in pounds per gallon of coating, excluding water and exempt solvents, delivered to a coating applicator that applies specialty coatings.

TABLE (kkk) -1 Specialty Coating VOC Limitations

Coating Type	VOC Content Limit	VOC Content Limit
	(lb/gal)	(g/L)
Ablative Coating	5.0	600
Adhesion Promoter	7.4	890
Adhesive Bonding Primers:		
Cured at 250°F or below	7.1	850
Cured above 250°F	8.6	1030
Adhesives:		
Commercial Interior Adhesive	6.3	760
Cyanoacrylate Adhesive	8.5	1,020
Fuel Tank Adhesive	5.2	620
Nonstructural Adhesive	3.0	360
Rocket Motor Bonding Adhesive	7.4	890
Rubber-based Adhesive	7.1	850
Structural Autoclavable Adhesive	0.5	60
Structural Nonautoclavable Adhesive	7.1	850
Antichafe Coating	5.5	660
Bearing Coating	5.2	620
Caulking and Smoothing Compounds	7.1	850
Chemical Agent-Resistant Coating	4.6	550
Clear Coating	6.0	720
Commercial Exterior Aerodynamic Structure Primer	5.4	650
Compatible Substrate Primer	6.5	780

Corrosion Prevention Compound	5.9	710
Cryogenic Flexible Primer	5.4	645
Cryoprotective Coating	5.0	600
Dry Lubricative Material	7.3	880
Electric or Radiation-Effect Coating	6.7	800
Electrostatic Discharge and Electromagnetic Interference (EMI) Coating	6.7	800
Elevated Temperature Skydrol Resistant Commercial Primer	6.2	740
Epoxy Polyamide Topcoat	5.5	660
Fire-Resistant (Interior) Coating	6.7	800
Flexible Primer	5.3	640
Flight-Test Coatings:		
Missile or Single Use Aircraft	3.5	420
All Other	7.0	840
Fuel-Tank Coating	6.0	720
High-Temperature Coating	7.1	850
Insulation Covering	6.2	740
Intermediate Release Coating	6.3	750
Lacquer	6.9	830
Maskants:		
Bonding Maskant	10.3	1,230
Critical Use and Line Sealer Maskant	8.5	1,020
Seal Coat Maskant	10.3	1,230
Metallized Epoxy Coating	6.2	740
Mold Release	6.5	780
Optical Anti-Reflective Coating	6.3	750
Part Marking Coating	7.1	850
Pretreatment Coating	6.5	780

Rain Erosion-Resistant Coating	7.1	850
Rocket Motor Nozzle Coating	5.5	660
Scale Inhibitor	7.3	880
Screen Print Ink	7.0	840
Sealants:		
Extrudable/Rollable/Brushable Sealant	2.3	280
Sprayable Sealant	5.0	600
Silicone Insulation Material	7.1	850
Solid Film Lubricant	7.3	880
Specialized Function Coating	7.4	890
Temporary Protective Coating	2.7	320
Thermal Control Coating	6.7	800
Wet Fastener Installation Coating	5.6	675
Wing Coating	7.1	850

- (iv) 5.2 pounds per gallon of coating, excluding water and exempt solvents, delivered to a coating applicator that applies Type I chemical milling maskants.
 - (v) 1.3 pounds per gallon of coating, excluding water and exempt solvents, delivered to a coating applicator that applies Type II chemical milling maskants.
 - (vi) The following aerospace activities are exempt from the coating emission limits in subparagraphs 1.(i) through (v): touchup coating, aerosol coating, and the application of Department of Defense classified coatings; coatings used on space vehicles; and facilities that comply with the low volume usage exemption in subparagraph 10.
2. The emission limitations in subparagraph (kkk) shall be achieved by:
- (i) The application of low solvent coating technology where each and every coating meets the specified applicable limitation expressed in pounds of VOC per gallon of coating, excluding water and exempt solvents, stated in subparagraph 1.; or

- (ii) The application of low solvent coating technology where the monthly volume-weighted average VOC content of each specified coating type meets the specified applicable limitation expressed in pounds of VOC per gallon of coating, excluding water and exempt solvents, stated in subparagraph 1.; averaging is not allowed between primers, topcoats (including self-priming topcoats), specialty coating types, Type I milling maskants, and Type II milling maskants or any combination of the above coating categories; or
 - (iii) Control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that the control system has a VOC reduction efficiency of 81 percent or greater.
- 3. Each owner or operator of an aerospace manufacturing and/or rework operation shall apply all spray applied non-exempt primers, topcoats, and specialty coatings utilizing one or more of the spray application techniques specified below:
 - (i) High-volume low-pressure (HVLP) spraying;
 - (ii) Electrostatic spray application;
 - (iii) Airless spray application;
 - (iv) Air-assisted airless spray application; or
 - (v) Other coating application methods that achieve emission reductions equivalent to HVLP, electrostatic spray application, airless spray, or air-assisted airless spray application methods, as determined by the Director.
- 4. Each owner or operator of an aerospace manufacturing and/or rework operation shall ensure that all application devices used to apply primers, topcoats (including self-priming topcoats), and specialty coatings are operated according to company procedures, local specified operating procedures, and/or the manufacturer's specifications, whichever is most stringent, at all times. Equipment modified by the owner or operator shall maintain a transfer efficiency equivalent to HVLP, electrostatic spray application, airless spray application, or air-assisted airless spray application techniques.

5. Each owner or operator of an aerospace manufacturing and/or rework operation shall comply with the following housekeeping requirements for any affected cleaning operation. Aqueous cleaning solvents and hydrocarbon-based solvents which have a maximum composite vapor pressure of 7 mm Hg at 20°C are exempt from these requirements.
 - (i) Solvent-laden cloth, paper, or any other absorbent applicators used for cleaning shall be placed in bags or other closed containers upon completing their use. These bags and containers must be kept closed at all times except when depositing or removing these materials from the container. The bags and containers used must be of such a design so as to contain the vapors of the cleaning solvent. Cotton-tipped swabs used for very small cleaning operations are exempt from this requirement.
 - (ii) All fresh and spent cleaning solvents, except semi-aqueous solvent cleaners, used in aerospace cleaning operations shall be stored in closed containers.
 - (iii) Conduct the handling and transfer of cleaning solvents to or from enclosed systems, vats, waste containers, and other cleaning operation equipment that hold or store fresh spent cleaning solvents in such a manner that spills are minimized.
6. Each owner or operator of an aerospace manufacturing and/or rework operation utilizing hand-wipe cleaning operations (excluding the cleaning of spray gun equipment performed in accordance with subparagraph 7.) shall comply with one of the following:
 - (i) Utilize cleaning solvent solutions that are classified as an aqueous cleaning solvent and/or a hydrocarbon-based cleaning solvent with a maximum composite vapor pressure of 7 mm Hg at 20°C.
 - (ii) Utilize cleaning solvent solutions that have a composite vapor pressure of 45 mm Hg or less at 20°C.
7. Each owner or operator of an aerospace manufacturing and/or rework operation shall clean all spray guns used in the application of primers, topcoats (including self-priming topcoats), and specialty coatings utilizing one or more of the following techniques:
 - (i) Enclosed System: Spray guns shall be cleaned in an enclosed system that is closed at all times except when inserting or removing the spray gun. Cleaning shall consist of forcing cleaning solvent through the gun. If leaks are found, repairs shall be made

as soon as practicable, but no later than 15 days after the leak was found. If the leak is not repaired by the 15th day after detection, the cleaning solvent shall be removed and the enclosed cleaner shall be shut down until the leak is repaired or its use is permanently discontinued.

- (ii) Nonatomized Cleaning: Spray guns shall be cleaned by placing cleaning solvent in the pressure pot and forcing it through the gun with the atomizing cap in place. No atomizing air is to be used. The cleaning solvent from the spray gun shall be directed into a vat, drum, or other waste container that is closed when not in use.
 - (iii) Disassembled Spray Gun Cleaning: Spray guns shall be cleaned by disassembling and cleaning the components by hand in a vat, which shall remain closed at all times except in use. Alternatively, the components shall be soaked in a vat, which shall remain closed during the soaking period and when not inserting or removing components.
 - (iv) Atomizing cleaning: Spray guns shall be cleaned by forcing the cleaning solvent through the gun and directing the resulting atomized spray into a waste container that is fitted with a device designed to capture the atomized cleaning solvent emissions.
8. Each owner or operator of an aerospace manufacturing and/or rework operation that includes a flush cleaning operation shall empty the used cleaning solvents each time aerospace parts or assemblies, or components of a coating unit (with the exception of spray guns) are flush cleaned into an enclosed container or collection system that is kept closed when not in use or into a system with equivalent emission control approved by the Director. Hydrocarbon-based solvents which have a maximum composite vapor pressure of 7 mm Hg at 20°C and aqueous and semi-aqueous materials are exempt from the requirements of subparagraph (kkk).
9. The following activities are not regulated by subparagraph (kkk):
- (i) Research and development;
 - (ii) Quality control;
 - (iii) Laboratory testing activities;
 - (iv) Metal finishing;

- (v) Electrodeposition (except for the electrodeposition of paints);
- (vi) Composites processing (except for cleaning and coating of composite parts or components that become part of an aerospace vehicle or component as well as composite tooling that comes in contact with such composite parts or components prior to cure);
- (vii) Electronic parts and assemblies (except for cleaning and topcoating of completed assemblies);
- (viii) Manufacture of aircraft transparencies;
- (ix) Wastewater treatment operations;
- (x) Regulated activities associated with space vehicles designed to travel beyond the limit of the earth's atmosphere, including but not limited to satellites, space stations, and the space shuttle;
- (xi) Maintenance and rework of antique aerospace vehicles and components;
- (xii) Chemical milling;
- (xiii) Rework of aircraft or aircraft components if the holder of the Federal Aviation Administration (FAA) design approval, or the holder's licensee, is not actively manufacturing the aircraft or aircraft components;
- (xiv) Parts and assemblies not critical to the vehicle's structural integrity or flight performance;
- (xv) Primers, topcoats, specialty coatings, chemical milling maskants, strippers, and cleaning solvents that meet the definition of non-VOC material, as determined from manufacturer's representations, such as in a material safety data sheet or product data sheet, or testing, except that if an owner or operator chooses to include one or more non-VOC primer, topcoat, specialty coating, or chemical milling maskant in averaging under subparagraph 2.(ii);
- (xvi) Primers, topcoats, and specialty coatings that meet the definition of "classified national security information" in subparagraph 17.(xvii).

10. The requirements for primers, topcoats, specialty coatings, and chemical milling maskants in subparagraphs 1.(i), 1.(ii), 1.(iii), 1.(iv) and 1.(v) do not apply to the use of low-volume coatings in these categories for which the rolling twelve month total of each separate formulation used at a facility does not exceed 50 gallons, and the combined rolling twelve month total of all such primers, topcoats, specialty coatings, and chemical milling maskants used at a facility does not exceed 200 gallons. Primers, topcoats, and specialty coatings exempted under subparagraphs 9. and 11. are not included in the 50 and 200 gallon limits.
11. The following situations are exempt from the requirements of subparagraphs 3. and 4.:
 - (i) Any situation that normally requires the use of an airbrush or an extension on the spray gun to properly reach limited access spaces;
 - (ii) The application of coatings that contain fillers that adversely affect atomization with HVLP spray guns and that cannot be applied by any of the application methods specified in subparagraph 3.;
 - (iii) The application of coatings that normally have a dried film thickness of less than 0.0013 centimeter (0.0005 inches) and that cannot be applied by any of the application methods specified in subparagraph 3.;
 - (iv) The spray application of no more than 3.0 fluid ounces of coating in a single application (i.e., the total volume of a single coating formulation applied during any one day to any one aerospace vehicle or component) from a hand-held device with a paint cup capacity that is equal to or less than 3.0 fluid ounces (89 cubic centimeters). Using multiple small paint cups or refilling a small paint cup to apply more than 3.0 fluid ounces under the requirements of subparagraph (kkk) is prohibited. If a paint cup liner is used in a reusable holder or cup, then the holder or cup must be designed to hold a liner with a capacity of no more than 3.0 fluid ounces. For example, a 3.0 ounce liner cannot be used in a holder that can also be used with a 6.0 ounce liner under the requirements of subparagraph (kkk);
 - (v) The use of airbrush application methods for stenciling, lettering, and other identification markings;

- (vi) The use of hand-held non-refillable spray (aerosol) can application methods;
- (vii) Touchup and repair operations;
- (viii) Adhesives, sealants, maskants, caulking materials, and inks; and
- (ix) The application of coatings that contain less than 0.17 pounds of VOC per gallon of coating.

12. The following cleaning operations are exempt from the requirements of subparagraph 6.:

- (i) Cleaning during the manufacture, assembly, installation, maintenance, or testing of components of breathing oxygen systems that are exposed to the breathing oxygen;
- (ii) Cleaning during the manufacture, assembly, installation, maintenance, or testing of parts, subassemblies, or assemblies that are exposed to strong oxidizers or reducers (e.g., nitrogen tetroxide, liquid oxygen, or hydrazine);
- (iii) Cleaning and surface activation prior to adhesive bonding;
- (iv) Cleaning of electronic parts and assemblies containing electronic parts;
- (v) Cleaning of aircraft and ground support equipment fluid systems that are exposed to the fluid including air-to-air heat exchangers and hydraulic fluid systems;
- (vi) Cleaning of fuel cells, fuel tanks, and confined spaces;
- (vii) Surface cleaning of solar cells, coating optics, and thermal control surfaces;
- (viii) Cleaning during fabrication, assembly, installation, and maintenance of upholstery, curtains, carpet, and other textile materials used in the interior of the aircraft;
- (ix) Cleaning of metallic and non-metallic materials used in honeycomb cores during the manufacture or maintenance of these cores, and cleaning of the completed cores used in the

manufacture or maintenance of aerospace vehicles or components;

- (x) Cleaning of aircraft transparencies, polycarbonate, or glass substrates;
- (xi) Cleaning and solvent usage associated with research and development, quality control, and laboratory testing;
- (xii) Cleaning operations, using nonflammable liquids, conducted within five feet of energized electrical systems. Energized electrical systems means any AC or DC electrical circuit on an assembled aircraft once electrical power is connected, including interior passenger and cargo areas, wheel wells, and tail sections; and
- (xiii) Cleaning operations identified as essential uses under the Montreal Protocol for which the U.S. EPA has allocated essential use allowances or exemptions.

13. Each owner or operator of an aerospace manufacturing and/or rework operation shall submit a monitoring plan to the Division that specifies the applicable operating parameter value, or range of values, to ensure ongoing compliance with subparagraph 2.(iii). The monitoring device shall be installed, calibrated, operated, and maintained in accordance with the manufacturer's specifications.
14. Each owner or operator of an aerospace manufacturing and/or rework operation utilizing an enclosed spray gun cleaner shall visually inspect the seals and all other potential sources of leaks at least once per month. Each inspection shall occur while the spray gun cleaner is in operation.
15. Each owner or operator of an aerospace manufacturing and/or rework operation utilizing coatings specified in subparagraph 1. shall maintain the following records:
 - (i) If following the compliance option in subparagraph 2.(i), a current list of each coating formulation including the specific category, VOC content as applied, and the annual amount used for each coating.
 - (ii) If following the compliance option in subparagraph 2.(ii), a current list of each coating formulation including the specific category, VOC content as applied, the monthly amount used for

each coating, and the calculated monthly volume-weighted average VOC content of each specified coating type expressed in pounds of VOC per gallon of coating, excluding water and exempt solvents.

- (iii) If following the compliance option in subparagraph 2.(iii), continuous records demonstrating the control device was operating at the required destruction efficiency at all times the coating process was in operation and records demonstrating the control device was achieving the required destruction efficiency while the coating process was in operation.
- (iv) If using the low volume usage exemption in subparagraph 10., a list of each separate formulation and quantity applied each month and the twelve-consecutive month total of each formulation and the twelve-consecutive month total of all materials exempted.

16. Each owner or operator of an aerospace manufacturing and/or rework operation utilizing cleaning solvents shall maintain the following records:

- (i) Maintain a current list of hand-wipe and flush cleaning solvents with documentation that demonstrates that the cleaning solvent complies with one of the composition requirements in subparagraph 6.(i) and for semi aqueous cleaning solvent used for flush cleaning. This list shall include the annual amount of each applicable solvent used.
- (ii) Maintain a current list of hand-wipe cleaning solvents with their respective vapor pressures or, for blended solvents, VOC composite vapor pressures for all vapor pressure compliant hand-wipe cleaning solvents listed in subparagraph 6.(ii). This list shall include the monthly amount of each applicable solvent used.
- (iii) Maintain a current list of all cleaning solvents with a vapor pressure greater than 45 mm Hg used in exempt hand-wipe cleaning operations. This list shall identify the applicable exemption(s) for each process and include the monthly amount of each applicable solvent used.
- (iv) Maintain a record of all leaks from enclosed gun cleaners, as found during the monthly inspection required by subparagraph

14.. The record shall include the identification of the leaking paint gun cleaner, the date the leak was discovered, and the date the leak was repaired.

17. For the purpose of subparagraph (kkk), the following definitions shall apply:

- (i) "Ablative coating" means a coating that chars when exposed to open flame or extreme temperatures, as would occur during the failure of an engine casing or during aerodynamic heating. The ablative char surface serves as an insulative barrier, protecting adjacent components from the heat or open flame.
- (ii) "Adhesion promoter" means a very thin coating applied to a substrate to promote wetting and form a chemical bond with the subsequently applied material.
- (iii) "Adhesive bonding primer" means a primer applied in a thin film to aerospace components for the purpose of corrosion inhibition and increased adhesive bond strength by attachment. There are two categories of adhesive bonding primers: primers with a design cure at 250°F or below and primers with a design cure above 250°F.
- (iv) "Aerosol coating" means a coating applied by means of a hand-held, pressurized container, which is non-refillable or which utilizes non-refillable propellant canisters and which expels an adhesive or a coating in a finely divided spray when a valve on the container is depressed.
- (v) "Aerospace facility" means any facility that produces, reworks, or repairs in any amount any commercial, civil, or military aerospace vehicle or component. Regulated activities include coating, chemical milling, solvent use, and depainting operations.
- (vi) "Aerospace vehicle or component" means any fabricated part, processed part, assembly of parts, or completed unit, with the exception of electronic components, of any aircraft.
- (vii) "Aircraft transparency" means the aircraft windshield, canopy, passenger windows, lenses and other components which are constructed of transparent materials.

- (viii) "Airless and air-assisted airless spray" mean any coating spray application technology that relies solely on the fluid pressure of the coating to create an atomized coating spray pattern and does not apply any atomizing compressed air to the coating before it leaves the spray gun nozzle. Air-assisted airless spray uses compressed air to shape and distribute the fan of atomized coating, but still uses fluid pressure to create the atomized coating.
- (ix) "Antichafe coating" means a coating applied to areas of moving aerospace components that may rub during normal operations or installation.
- (x) "Antique aerospace vehicle or component" means an aircraft or component thereof that was built at least 30 years ago. An antique aerospace vehicle would not routinely be in commercial or military service in the capacity for which it was designed.
- (xi) "Aqueous cleaning solvent" means a cleaning solvent in which water is the primary ingredient (greater than 80 percent by weight of cleaning solvent solution as applied must be water). Detergents, surfactants, and bioenzyme mixtures and nutrients may be combined with the water along with a variety of additives such as organic solvents (e.g., high boiling point alcohols), builders, saponifiers, inhibitors, emulsifiers, pH buffers, and antifoaming agents. Aqueous solutions must have a flash point greater than 93°C (200°F) (as reported by the manufacturer) and the solution must be miscible with water.
- (xii) "Bearing coating" means a coating applied to an antifriction bearing, a bearing housing, or the area adjacent to such a bearing in order to facilitate bearing function or to protect base material from excessive wear. A material shall not be classified as a bearing coating if it can also be classified as a dry lubricative material or a solid film lubricant.
- (xiii) "Bonding maskant" means a temporary coating used to protect selected areas of aerospace parts from strong acid or alkaline solutions during processing for bonding.
- (xiv) "Caulking and smoothing compounds" means semi-solid materials which are applied by hand application methods and are used to aerodynamically smooth exterior vehicle surfaces or fill cavities such as bolt hole accesses. A material shall not

be classified as a caulking and smoothing compound if it can be classified as a sealant.

- (xv) "Chemical agent-resistant coating (CARC)" means an exterior topcoat designed to withstand exposure to chemical warfare agents or the decontaminants used on these agents.
- (xvi) "Chemical milling maskants" means a coating that is applied directly to aluminum components to protect surface areas when chemical milling the component with a Type I or Type II etchant. Type I chemical milling maskants are used with a Type I etchant and Type II chemical milling maskants are used with a Type II etchant. This definition does not include bonding maskants, critical use and line sealer maskants, and seal coat maskants. Additionally, maskants that must be used with a combination of Type I or Type II etchants and any of the above types of maskants are also not included in this definition. (See also Type I and Type II etchant definitions.)
- (xvii) "Classified National Security Information" means information that has been determined pursuant to Executive Order 13526, "Classified National Security Information," December 29, 2009 or any successor order to require protection against unauthorized disclosure and is marked to indicate its classified status when in documentary form. The term "Classified Information" is an alternative term that may be used instead of "Classified National Security Information."
- (xviii) "Cleaning operation" means collectively spray-gun, hand-wipe, and flush cleaning operations.
- (xix) "Cleaning solvent" means a liquid material used for hand-wipe, spray gun, or flush cleaning. This definition does not include solutions that contain no VOCs (i.e., VOC content less than 1.0 weight percent).
- (xx) "Clear coating" means a transparent coating applied over a colored opaque coating, metallic substrate, or placard to give improved gloss and protection to the color coat. In some cases, a clearcoat refers to any transparent coating without regard to substrate.
- (xxi) "Coating" means a material that is applied to a substrate for decorative, protective, or functional purposes. Such materials

include, but are not limited to, paints, sealants, liquid plastic coatings, caulks, inks, adhesives, and maskants. Decorative, protective, or functional materials that consist only of protective oils for metal, acids, bases, or any combination of these substances; paper film or plastic film which may be precoated with an adhesive by the film manufacturer; or pre-impregnated composite sheets are not considered coatings for the purposes of subparagraph (kkk). Materials in handheld non-refillable aerosol containers, touch-up markers, and marking pens are also not considered coatings for the purposes of subparagraph (kkk). A liquid plastic coating means a coating made from fine particle-size polyvinyl chloride (PVC) in solution (also referred to as a plastisol).

- (xxii) "Coating operation" means using a spray booth, tank, or other enclosure or any area, such as a hangar, for applying a single type of coating (e.g., primer); using the same spray booth for applying another type of coating (e.g., topcoat) constitutes a separate coating operation for which compliance determinations are performed separately.
- (xxiii) "Coating unit" means a series of one or more coating applicators and any associated drying area and/or oven wherein a coating is applied, dried, and/or cured. A coating unit ends at the point where the coating is dried or cured, or prior to any subsequent application of a different coating. It is not necessary to have an oven or flashoff area to be included in this definition.
- (xxiv) "Commercial exterior aerodynamic structure primer" means a primer used on aerodynamic components and structures that protrude from the fuselage, such as wings and attached components, control surfaces, horizontal stabilizers, vertical fins, wing-to-body fairings, antennae, landing gear, and doors, for the purpose of extended corrosion protection and enhanced adhesion.
- (xxv) "Commercial interior adhesive" means materials used in the bonding of passenger cabin interior components. These components must meet FAA fireworthiness requirements.
- (xxvi) "Compatible substrate primer" means either compatible epoxy primer or adhesive primer.

- (xxvii) "Corrosion prevention compound" means a compound that provides corrosion protection by displacing water and penetrating mating surfaces, forming a protective barrier between the metal surface and moisture. Coatings containing oils or waxes are excluded from this category.
- (xxviii) "Critical use and line sealer maskant" means a temporary coating, not covered under other maskant categories, used to protect selected areas of aerospace parts from strong acid or alkaline solutions such as those used in anodizing, plating, chemical milling and processing of magnesium, titanium, or high-strength steel, high-precision aluminum chemical milling of deep cuts, and aluminum chemical milling of complex shapes. Materials used for repairs or to bridge gaps left by scrubbing operations are also included in this category.
- (xxix) "Cryogenic flexible primer" means a primer designed to provide corrosion resistance, flexibility, and adhesion of subsequent coating systems when exposed to loads up to and surpassing the yield point of the substrate at cryogenic temperatures (-275°F and below).
- (xxx) "Cryoprotective coating" means a coating that insulates cryogenic or subcooled surfaces to limit propellant boil-off, maintain structural integrity of metallic structures during ascent or reentry, and prevent ice formation.
- (xxxi) "Cyanoacrylate adhesive" means a fast-setting, single component adhesive that cures at room temperature. Also known as "super glue."
- (xxxii) "Depainting operation" means the use of a chemical agent, media blasting, or any other technique to remove permanent coatings from the outer surface of an aerospace vehicle or components. The depainting operation includes washing of the aerospace vehicle or component to remove residual stripper, media, or coating residue.
- (xxxiii) "Dry lubricative material" means a coating consisting of lauric acid, cetyl alcohol, waxes, or other noncross linked resin-bond materials that act as a dry lubricant.

- (xxxiv) "Electric or radiation-effect coating" means a coating or coating system engineered to interact, through absorption or reflection, with specific regions of the electromagnetic energy spectrum, such as the ultraviolet, visible, infrared, or microwave regions. Uses include, but are not limited to, lighting strike protection, electromagnetic pulse (EMP) protection, and radar avoidance. Coatings that have been designated as "classified" by the Department of Defense are exempt.
- (xxxv) "Electrostatic discharge and electromagnetic interference (EMI) coating" means a coating applied to space vehicles, missiles, aircraft radomes, and helicopter blades to disperse static energy or reduce electromagnetic interference.
- (xxxvi) "Elevated-temperature Skydrol-resistant commercial primer" means a primer applied primarily to commercial-type aircraft that must withstand immersion in phosphate-ester (PE) hydraulic fluid (Skydrol 500b or equivalent) at the elevated temperature of 150°F for 1,000 hours.
- (xxxvii) "Epoxy polyamide topcoat" means a coating used where harder films are required or in some areas where engraving is accomplished in camouflage colors.
- (xxxviii) "Exempt solvent" means a specified organic compound that has been determined by the EPA to have negligible photochemical reactivity and is listed in 40 CFR 51.100 and/or [391-3-1-.01\(III\)](#).
- (xxxix) "Fire-resistant (interior) coating" means for civilian aircraft, fire-resistant coatings are used on passenger cabin interior parts that are subject to the FAA fire-worthiness requirements. For military aircraft, fire-resistant interior coatings are used on parts that are subject to the flammability requirements of MIL-STD-1630A and MIL-A-87721. For space applications, these coatings are used on parts that are subject to the flammability requirements of SE-R-0006 and SSP 30233.
- (xl) "Flexible primer" means a primer that meets flexibility requirements such as those needed for adhesive bond primer fastener heads or on surfaces expected to contain fuel. The flexible coating is required because it provides a compatible,

flexible substrate over bonded sheet rubber and rubber-type coatings as well as a flexible bridge between fasteners, skin, and skin-to-skin joints on outer aircraft skins.

- (xli) "Flight test coating" means a coating applied to aircraft other than missiles or single-use aircraft prior to flight testing to protect the aircraft from corrosion and to provide required marking during flight test evaluation.
- (xlii) "Flush cleaning" means the removal of contaminants such as dirt, grease, and coatings from an aerospace vehicle or component or coating equipment by passing solvent over, into, or through the item being cleaned. The solvent may simply be poured into the item cleaned and then drained, or be assisted by air or hydraulic pressure, or by pumping. Hand-wipe cleaning operations where wiping, scrubbing, mopping, or other hand actions used are not included in this definition.
- (xliii) "Fuel tank adhesive" means a non-rubber based adhesive used to bond components exposed to fuel and which must be compatible with fuel tank coatings.
- (xliv) "Fuel tank coating" means a coating applied to fuel tank components for the purpose of corrosion and/or bacterial growth inhibition and to assure sealant adhesion in extreme environmental conditions.
- (xlv) "General aviation" means that segment of civil aviation that encompasses all facets of aviation except air carriers, commuters, and military. General aviation includes charter and corporate-executive transportation, instruction, rental, aerial application, aerial observation, business, pleasure, and other special uses.
- (xlvi) "General aviation rework facility" means any aerospace facility with the majority of its revenues resulting from the reconstruction, repair, maintenance, repainting, conversion, or alteration of general aviation aerospace vehicles or components.
- (xlvii) "Hand-wipe cleaning operation" means removing contaminants such as dirt, grease, oil, and coatings from an aerospace vehicle or component by physically rubbing it with

a material such as a rag, paper, or cotton swab that has been moistened with a cleaning solvent.

- (xlviii) "High temperature coating" means a coating designed to withstand temperatures of more than 350°F.
- (xlix) "High volume low pressure (HVLP) spray equipment" means spray equipment that is used to apply coating by means of a spray gun that operates at 10.0 psig of atomizing air pressure or less at the air cap.
- (l) "Hydrocarbon-based cleaning solvent" means a cleaning solvent that is composed of a mixture of photochemically reactive hydrocarbons and oxygenated hydrocarbons and have a maximum vapor pressure of seven mm Hg at 20°C. These cleaners also contain no hazardous air pollutants.
- (li) "Insulation covering" means material that is applied to foam insulation to protect the insulation from mechanical or environmental damage.
- (lii) "Intermediate release coating" means a thin coating applied beneath topcoats to assist in removing the topcoats in depainting operations and generally to allow the use of less hazardous depainting methods.
- (liii) "Lacquer" means a clear or pigmented coating formulated with a nitrocellulose or synthetic resin to dry by evaporation without a chemical reaction. Lacquers are resolvable in their original solvent.
- (liv) "Leak" means any visible leakage, including misting and clouding.
- (lv) "Metallized epoxy coating" means a coating that contains relatively large quantities of metallic pigmentation for appearance and/or added protection.
- (lvi) "Mold release" means a coating applied to a mold surface to prevent the molded piece from sticking to the mold as it is removed.

- (lvii) "Non-VOC material" means a primer, topcoat, specialty coating, chemical milling maskant, cleaning solvent, or stripper that contains no more than 1.0 percent by mass VOC.
- (lviii) "Nonstructural adhesive" means an adhesive that bonds nonload bearing aerospace components in noncritical applications and is not covered in any other specialty adhesive categories.
- (lix) "Optical antireflection coating" means a coating with a low reflectance in the infrared and visible wavelength ranges that is used for antireflection on or near optical and laser hardware.
- (lx) "Part marking coating" means coatings or inks used to make identifying markings on material, components, and/or assemblies. These markings may be either permanent or temporary.
- (lxi) "Pretreatment coating" means an organic coating that contains at least 0.5 percent acids by weight and is applied directly to metal or composite surfaces provide surface etching, corrosion resistance, adhesion, and ease of stripping.
- (lxii) "Primer" means the first layer and any subsequent layers of identically formulated coating applied to the surface of an aerospace vehicle or component. Primers are typically used for corrosion prevention, protection from the environment, functional fluid resistance, and adhesion of subsequent coatings. Primers that are defined as specialty coatings are not included under this definition.
- (lxiii) "Rain erosion-resistant coating" means a coating or coating system used to protect leading edges of parts such as flaps, stabilizers, radomes, engine inlet nacelles, etc., against erosion caused by rain impact during flight.
- (lxiv) "Research and development" means an operation whose primary purpose is for research and development of new processes and products and that is conducted under the close supervision of technically trained personnel and is not involved in the manufacture of final or intermediate products for commercial purposes, except in a de minimis manner.

- (lxv) "Rocket motor bonding adhesive" means an adhesive used in rocket motor bonding applications.
- (lxvi) "Rocket motor nozzle coating" means a catalyzed epoxy coating system used in elevated temperature applications on rocket motor nozzles.
- (lxvii) "Rubber-based adhesive" means a quick setting contact cement that provide a strong, yet flexible bond between two mating surfaces that may be of dissimilar materials.
- (lxviii) "Scale Inhibitor" means a coating that is applied to the surface of a part prior to thermal processing to inhibit the formation of scale.
- (lxix) "Screen print ink" means an ink used in screen printing processes during fabrication of decorative laminates and decals.
- (lxx) "Sealant" means a material used to prevent the intrusion of water, fuel, air, or other liquids or solids from certain areas of aerospace vehicles or components.
- (lxxi) "Seal coat maskant" means an overcoat applied over a maskant to improve abrasion and chemical resistance during production operations.
- (lxxii) "Self-priming topcoat" means a topcoat that is applied directly to an uncoated aerospace vehicle or component for purposes of corrosion prevention, environmental protection, and functional fluid resistance. More than one layer of identical coating formulation may be applied to the vehicle or component.
- (lxxiii) "Semi-aqueous cleaning solvent" means a solution in which water is a primary ingredient (greater than 60 percent by weight of the solvent solution as applied must be water).
- (lxxiv) "Silicone insulation material" means an insulating material applied to exterior metal surfaces for protection from high temperatures caused by atmospheric friction or engine exhaust. These materials differ from ablative coatings in that they are not "sacrificial."

- (lxxv) "Solid film lubricant" means a very thin coating consisting of a binder system containing as its main pigment material one or more of the following: molybdenum, graphite, polytetrafluoroethylene (PTFE), or other solids that act as a dry lubricant between faying surfaces.
- (lxxvi) "Specialty coating" means a coating that, even though it meets the definition of a primer, topcoat, or self-priming topcoat, has additional performance criteria beyond those of primers, topcoats, and self-priming topcoats for specific applications. These performance criteria may include, but are not limited to, temperature or fire resistance, substrate compatibility, antireflection, temporary protection or marking, sealing, adhesively joining substrates, or enhanced corrosion protection.
- (lxxvii) "Specialized function coating" means a coating that fulfills extremely specific engineering requirements that are limited in application and are characterized by low volume usage. This category excludes coatings covered in other Specialty coating categories.
- (lxxviii) "Spray-applied coating operation" means coatings that are applied using a device that creates an atomized mist of coating and deposits the coating on a substrate. For the purposes of subparagraph (kkk), spray-applied coatings do not include the following materials or activities:
- (I) Coatings applied from a hand-held device with a paint cup capacity that is equal to or less than 3.0 fluid ounces (89 cubic centimeters) in which no more than 3.0 fluid ounces of coating is applied in a single application (i.e., the total volume of a single coating formulation applied during any one day to any one aerospace vehicle or component). Under this definition, the use of multiple small paint cups and the refilling of a small paint cup to spray apply more than 3.0 fluid ounces of a coating is a spray-applied coating operation. Under this definition, the use of a paint cup liner in a reusable holder or cup that is designed to hold a liner with a capacity of more than 3.0 fluid ounces is a spray-applied coating operation.

(II) Application of coating using powder coating, hand-held non-refillable aerosol containers, or non-atomizing application technology, including but not limited to paint brushes, rollers, flow coating, dip coating, electrodeposition coating, web coating, coil coating, touch-up markers, marking pens, trowels, spatulas, daubers, rags, sponges, mechanically and/or pneumatic-driven syringes, and inkjet machines.

(III) Application of adhesives, sealants, maskants, caulking materials, and inks.

(lxxix) "Spray gun" means a device that atomizes a coating or other material and projects the particulates or other material onto a substrate.

(lxxx) "Stripper" means a liquid that is applied to an aerospace vehicle or component to remove permanent coatings such as primers, topcoats, and specialty coatings.

(lxxxii) "Structural autoclavable adhesive" means an adhesive used to bond load-carrying aerospace components that is cured by heat and pressure in an autoclave.

(lxxxiii) "Structural nonautoclavable adhesive" means an adhesive used to bond load-carrying aerospace components that is cured under ambient conditions.

(lxxxiiii) "Surface preparation" means the removal of contaminants from the surface of an aerospace vehicle or component or the activation or reactivation of the surface in preparation for the application of a coating.

(lxxxv) "Temporary protective coating" means a coating applied to provide scratch or corrosion protection during manufacturing, storage, or transportation. Two types include peelable protective coatings and alkaline removable coatings. These materials are not intended to protect against strong acid or alkaline solutions.

- (lxxxv) "Thermal control coating" means a coating formulated with specific thermal conductive or radiative properties to permit temperature control of the substrate.
- (lxxxvi) "Topcoat" means a coating that is applied over a primer on a aerospace vehicle or component for appearance, identification, camouflage, or protection. Topcoats that are defined as specialty coatings are not included under this definition.
- (lxxxvii) "Touch-up and repair coating" means a coating used to cover minor coating imperfections appearing after the main coating operation.
- (lxxxviii) "Touch-up and repair operation" means that portion of the coating operation that is the incidental application of coating used to cover minor imperfections in the coating finish or to achieve complete coverage. This definition includes out-of-sequence or out-of-cycle coating.
- (lxxxix) "Type I etchant" means a chemical milling etchant that contains varying amounts of dissolved sulfur and does not contain amines.
- (xc) "Type II etchant" means a chemical milling etchant that is a strong sodium hydroxide solution containing amines.
- (xci) "Wet fastener installation coating" means a primer or sealant applied by dipping, brushing, or daubing to fasteners that are installed before the coating is cured.
- (xcii) "Wing coating" means a corrosion-resistant topcoat that is resilient enough to withstand the flexing of the wings.

18. Applicability.

- (i) The requirements of subparagraph (kkk) shall apply to all aerospace facilities with potential emissions of volatile organic compounds exceeding 100 tons per year, except in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale, where facilities with potential emissions of volatile organic compounds exceeding 25 tons per year are subject to subparagraph (kkk).

- (ii) Effective January 1, 2015, the requirements of subparagraph (kkk) shall apply to all aerospace facilities with potential emissions of volatile organic compounds exceeding 25 tons per year in Barrow, Bartow, Carroll, Hall, Newton, Spalding, or Walton County. The requirements of this subparagraph (ii) will no longer be applicable if the counties specified in this subparagraph (ii) are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in these counties or the counties specified in subparagraph (i) above, the requirements of this subparagraph (ii) will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.

19. Compliance Dates.

- (i) All aerospace facilities subject to subparagraph (kkk) and located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale shall be in compliance.
- (ii) All aerospace facilities subject to subparagraph (kkk); located outside Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale counties; and in operation on or before October 1, 1999, shall be in compliance by January 1, 2001.
- (iii) All aerospace facilities subject to subparagraph (kkk); located outside Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale counties; and which begin initial operation after October 1, 1999, shall be in compliance upon startup.
- (iv) All aerospace facilities subject to subparagraph (kkk) and utilizing specialty coatings that begin operation after the effective date of this rule shall be in compliance upon startup. All aerospace facilities subject to subparagraph (kkk) and utilizing specialty coatings that are in operation on or before the effective date of this rule shall be in compliance on or before March 31, 2019.

(III) NO_x Emissions From Fuel-Burning Equipment.

1. No person shall cause, let, suffer, permit, or allow the emission of nitrogen oxides (NO_x) from an affected unit under this subparagraph that is installed or modified on or after May 1, 1999, to exceed 30 ppm at 3% oxygen on a dry basis.
2. The requirements of this subparagraph shall apply during the period May 1 through September 30 of each year.
3. All affected units subject to this subparagraph shall be in compliance on or before May 1, 2000.
4. The requirements contained in Subparagraph 1. shall apply to all such affected units as defined in subparagraph 5.(i) that are located in the counties of Banks, Barrow, Bartow, Butts, Carroll, Chattooga, Cherokee, Clarke, Clayton, Cobb, Coweta, Dawson, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gordon, Gwinnett, Hall, Haralson, Heard, Henry, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Newton, Oconee, Paulding, Pickens, Pike, Polk, Putnam, Rockdale, Spalding, Troup, Upson, and Walton.
5. For the purpose of this subparagraph, the following definitions apply:
 - (i) "Affected Unit" means fuel-burning equipment with a maximum design heat input capacity equal to or greater than 10 MMBTU/hr and less than or equal to 250 MMBTU/hr.
 - (ii) "Annual Capacity Factor" as used in this subparagraph means the ratio between the actual heat input to the fuel-burning equipment from fuels other than wood during a period of 12 consecutive calendar months and the potential heat input to the fuel-burning equipment from all fuels had the fuel-burning equipment been operated 8,760 hours during that 12-month period at the maximum design heat input capacity.
 - (iii) "Modified" as used in subparagraph 1. shall be as defined in 40 CFR 60.14.
 - (iv) "Wood" means wood, wood residue, bark, or any derivative fuel or residue thereof, in any form, including, but not limited to, sawdust, sanderdust, wood chips, scraps, slabs, millings, shavings, and processed pellets made from wood or other forest residues.
6. The requirements of this subparagraph do not apply to the following:

- (i) Fuel-burning equipment, which was permitted under [391-3-1-.03\(1\)](#) on or before May 1, 1999, or which was brought onto the facility on or before May 1, 1999.
- (ii) Duct burners associated with combined cycle gas turbines.
- (iii) Fuel-burning equipment located in any of the following counties: Banks, Butts, Chattooga, Clarke, Dawson, Floyd, Gordon, Haralson, Heard, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Oconee, Pickens, Pike, Polk, Putnam, Troup, and Upson that combusts either:
 - (I) wood alone; or
 - (II) wood in combination with any other fuel and has annual capacity factor for the other fuels of 10 percent (0.10) or less and is subject to an enforceable requirement limiting operation of the equipment to an annual capacity factor for the other fuels of 10 percent (0.10) or less.

(mmm) **NO_x Emissions from Stationary Gas Turbines and Stationary Engines used to Generate Electricity.**

1. No person shall cause, let, suffer, permit, or allow the emission of nitrogen oxides (NO_x), from any stationary gas turbine or any stationary engine used to generate electricity whose nameplate capacity is greater than or equal to 100 kilowatts (KWe) and is less than or equal to 25 megawatts (MWe), to exceed the following:
 - (i) For stationary engines in operation before April 1, 2000:

160 ppm @ 15% O₂, dry basis
 - (ii) For stationary engines installed or modified on or after April 1, 2000:

80 ppm @ 15% O₂, dry basis
 - (iii) For stationary gas turbines in operation on or after January 1, 1999 and before October 1, 1999:

42 ppm @ 15% O₂, dry basis

- (iv) For stationary gas turbines installed or modified on or after October 1, 1999:

30 ppm @ 15% O₂, dry basis

- 2. The requirements of this subsection shall apply during the period May 1 through September 30 of each year.

3. Compliance Dates.

- (i) For stationary engines in operation before April 1, 2000, the affected unit shall comply with the applicable standard under paragraph 1 above by May 1, 2003.
- (ii) For stationary engines installed or modified on or after April 1, 2000, the affected unit shall comply with the applicable standard under paragraph 1 upon startup of the affected unit.
- (iii) For stationary gas turbines in operation on or after January 1, 1999 and before October 1, 1999, the affected unit shall comply with the applicable standard under paragraph 1 above by May 1, 2000.
- (iv) For stationary gas turbines in installed or modified on or after October 1, 1999, the affected unit shall comply with the applicable standard under paragraph 1 upon startup of the affected unit.

4. For the purpose of this subsection, the following definitions apply:

- (i) "Emergency standby stationary gas turbines and stationary engines" means any stationary gas turbine or stationary engine that operates only when electric power from the local utility is not available and which operates less than 200 hours per year.
- (ii) "Modified" shall be as defined in 40 CFR 60.14.
- (iii) "Stationary engine" means any spark or compression ignited internal combustion engine which is either attached to a foundation at a facility or is portable equipment located at a specific facility.
- (iv) "Stationary gas turbine" means any gas turbine that is gas and/or liquid fueled with or without power augmentation. It is

either attached to a foundation at a facility or is portable equipment located at a specific facility.

5. Exemptions.

The following units are exempt from the provisions of this subsection:

- (i) Stationary engines used to power portable rock crushing plants.
 - (ii) Stationary engines used directly and exclusively for agricultural operation necessary for the growing of crops or the raising of fowl or animals.
 - (iii) Stationary gas turbines and stationary engines not connected to an electrical generator.
 - (iv) Laboratory engines or gas turbines used for research and testing purposes.
 - (v) Engines or gas turbines operated by the manufacturer or distributor of such equipment for purposes of performance verification and testing at the production facility.
 - (vi) Portable, temporary generators used for special events (i.e. county fair, circus) provided the event does not last more than 14 days.
 - (vii) Nonroad engines as defined in 40 CFR 89.2.
6. The requirements contained in this subsection shall apply to all such sources located in the counties of Banks, Barrow, Bartow, Butts, Carroll, Chattooga, Cherokee, Clarke, Clayton, Cobb, Coweta, Dawson, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gordon, Gwinnett, Hall, Haralson, Heard, Henry, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Newton, Oconee, Paulding, Pickens, Pike, Polk, Putnam, Rockdale, Spalding, Troup, Upson, and Walton.
7. Emergency standby stationary gas turbines and stationary engines which meet the definition stated in paragraph 4.(i) are not subject to the emission limitations of paragraph 1.

8. Stationary engines at data centers that meet all of the following criteria are not subject to the emission limitations in subparagraph 1:
 - (i) Operate only for routine testing and maintenance, when electric power from the local utility is not available, or during internal system failures;
 - (ii) Total annual operation for the engine is less than 500 hours per year;
 - (iii) Operation for routine testing and maintenance during the months of May through September occurs only between 10 p.m. to 4 a.m. Operation for routine testing and maintenance during the months of January through April and October through December may be done during any time of day; and
 - (iv) The facility maintains records of all operation, including the reason for the operation.

(nnn) NOx Emissions from Large Stationary Gas Turbines.

1. No person shall cause, let, suffer, permit, or allow the emission of nitrogen oxides (NOx), from any stationary gas turbine whose nameplate capacity is greater than 25 megawatts (MWe), to exceed the following:
 - (i) For stationary gas turbines permitted under [391-3-1-.03\(1\)](#) before April 1, 2000:

30 ppm @ 15% O₂, dry basis
 - (ii) [reserved]
 - (iii) For stationary gas turbines permitted under [391-3-1-.03\(1\)](#) on or after April 1, 2000:

6 ppm @ 15% O₂, dry basis
2. The requirements of this subsection shall apply during the period May 1 through September 30 of each year.
3. Compliance Dates.
 - (i) Stationary gas turbines subject to paragraph 1.(i) above shall comply by May 1, 2003.

- (ii) Stationary gas turbines subject to paragraph 1.(iii) above shall be in compliance upon startup.
- 4. The requirements contained in subparagraph 1.(iii) of this subsection shall not apply to individual units which are subject to [391-3-1-.03\(8\)\(c\)14.](#) or [391-3-1-.03\(8\)\(c\)15.](#)
- 5. By no later than May 1, 2003, the owner/operator of an affected unit may submit actual operating performance data on the affected unit, with the emission reduction technologies, as approved by the Director, in place and optimized on the affected unit, sufficient to allow the Director to determine if the NOx emission limit in subparagraph 1.(i) is technically achievable taking into account the cost and feasibility of available control options. Based on the Director's review of the data provided, this rule may be modified.
- 6. The requirements contained in this subsection shall apply to all such sources located in the counties of Banks, Barrow, Bartow, Butts, Carroll, Chattooga, Cherokee, Clarke, Clayton, Cobb, Coweta, Dawson, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gordon, Gwinnett, Hall, Haralson, Heard, Henry, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Newton, Oconee, Paulding, Pickens, Pike, Polk, Putnam, Rockdale, Spalding, Troup, Upson, and Walton.
- 7. Exemptions.

The following units are exempt from the provisions of this subsection provided that they only operate under the following conditions:

- (i) Units operating for purposes of routine testing, to maintain operability, not to exceed three (3) hours per month.
- (ii) Units operating under one of the following emergency conditions. For the purpose of restarting the steam-electric generating units when all steam-electric generating units at a facility are down and off-site power is not available (also known as a "Black Start"). Or, when power problems on the grid would necessitate implementing manual load shedding procedures for retail customers (Note: This does not apply to special rate structure conditions).

(ooo) **Reserved.**

(ppp) **Commercial and Industrial Solid Waste Incineration Units.**

1. The provisions of this subparagraph apply to each commercial and industrial solid waste incinerator (CISWI) unit that commenced construction on or before June 4, 2010, or commenced modification or reconstruction after June 4, 2010 but no later than August 7, 2013 (hereinafter referred to as "existing CISWI unit").

(i) For the purposes of this subparagraph, a "CISWI unit" means any unit that meets the definition of "Commercial and industrial solid waste incineration (CISWI) unit" in 40 CFR Part 60, Subpart DDDD. The types of CISWI units include the following: incinerators; air curtain incinerators; small, remote incinerators; waste-burning kilns; and energy recovery units. Physical or operational changes made at an existing CISWI unit solely to comply with this subparagraph are not considered construction, reconstruction, or modification and would not subject an existing CISWI unit to the requirements of Georgia rule 391-3-1-.02(8)(b)75.

(ii) The following units are exempt from the requirements of this subparagraph:

(I) This subparagraph exempts the types of units described in subparagraphs I. through XI., but some units are required to provide notifications. Air curtain incinerators are exempt from the requirements in this subparagraph except for the provisions in 40 CFR 60.2805, 60.2860, and 60.2870.

I. Pathological waste incineration units. Incineration units burning 90 percent or more by weight (on a calendar quarter basis and excluding the weight of auxiliary fuel and combustion air) of pathological waste, low level radioactive waste, and/or chemotherapeutic waste as defined in 40 CFR 60.2875 are not subject to this subpart if you meet the two requirements specified in subparagraphs I.A. and B.

A. Notify the Administrator that the unit meets these criteria.

B. Keep records on a calendar quarter basis of the weight of pathological waste, low-level radioactive waste, and/ or chemotherapeutic

waste burned, and the weight of all other fuels and wastes burned in the unit.

- II. Municipal waste combustion units. Incineration units that are subject to 40 CFR Part 60, Subpart Ea (Standards of Performance for Municipal Waste Combustors); 40 CFR Part 60, Subpart Eb (Standards of Performance for Large Municipal Waste Combustors); 40 CFR Part 60, Subpart Cb (Emission Guidelines and Compliance Time for Large Municipal Combustors); 40 CFR Part 60, Subpart AAAA (Standards of Performance for Small Municipal Waste Combustion Units); or 40 CFR Part 60, Subpart BBBB (Emission Guidelines for Small Municipal Waste Combustion Units).
- III. Medical waste incineration units. Incineration units regulated under 40 CFR Part 60, Subpart Ec (Standards of Performance for Hospital/Medical/Infectious Waste Incinerators for Which Construction is Commenced After June 20, 1996) or 40 CFR Part 60, Subpart Ce (Emission Guidelines and Compliance Times for Hospital/Medical/Infectious Waste Incinerators).
- IV. Small power production facilities as specified below.
 - A. The unit qualifies as a small power-production facility under section 3(17)(C) of the Federal Power Act (16 U.S.C. 796(17)(C)).
 - B. The unit burns homogeneous waste (not including refuse-derived fuel) to produce electricity.
 - C. You submit documentation to the Director and notify the EPA Administrator that the qualifying small power production facility is combusting homogenous waste.

D. You maintain the records specified in 40 CFR 60.2740(v).

V. Cogeneration facilities as specified below.

- A. The unit qualifies as a cogeneration facility under section 3(18)(B) of the Federal Power Act (16 U.S.C. 796(18)(B)).
- B. The unit burns homogeneous waste (not including refuse-derived fuel) to produce electricity and steam or other forms of energy used for industrial, commercial, heating, or cooling purposes.
- C. You submit documentation to the Director and notify the EPA Administrator that the qualifying cogeneration facility is combusting homogenous waste.
- D. You maintain the records specified in 40 CFR 60.2740(w).

VI. Hazardous waste combustion units. Units for which you are required to get a permit under section 3005 of the Solid Waste Disposal Act.

VII. Materials recovery units. Units that combust waste for the primary purpose of recovering metals, such as primary and secondary smelters.

VIII. Air curtain incinerators. Air curtain incinerators that burn only the materials listed in paragraphs VIII.A. through C. of this section are only required to meet the requirements under "Air Curtain Incinerators" (40 CFR 60.2810 through 60.2870).

- A. 100 percent wood waste.
- B. 100 percent clean lumber.

C. 100 percent mixture of only wood waste, clean lumber, and/or yard waste.

IX. Sewage treatment plants. Incineration units regulated under Subpart O of 40 CFR Part 60 (Standards of Performance for Sewage Treatment Plants).

X. Sewage sludge incineration units. Incineration units combusting sewage sludge for the purpose of reducing the volume of the sewage sludge by removing combustible matter that are subject to 40 CFR Part 60, Subpart LLLL (Standards of Performance for Sewage Sludge Incineration Units) or 40 CFR Part 60, Subpart MMMM (Emission Guidelines for Sewage Sludge Incineration Units).

XI. Other solid waste incineration units. Incineration units that are subject to 40 CFR Part 60, Subpart EEEE (Standards of Performance for Other Solid Waste Incineration Units) or 40 CFR Part 60, Subpart FFFF (Emission Guidelines and Compliance Times for Other Solid Waste Incineration Units).

2. Each existing CISWI unit shall comply with the model rule standards, requirements, and provisions of 40 CFR Part 60, Subpart DDDD (Emissions Guidelines and Compliance Times for Commercial and Industrial Solid Waste Incineration Units), as amended June 23, 2016, which are hereby incorporated and adopted by reference.

(i) For the purposes of implementing the requirements and provisions of 40 CFR Part 60, Subpart DDDD, the following provisions are hereby incorporated and adopted by reference:

(I) 40 CFR 60.2575 through 40 CFR 60.2615, Increments of Progress except that in 40 CFR 60.2580, "table 1 of this subpart" is replaced with " 391-3-1-.02(2)(ppp)6. "; and in 40 CFR 60.2595, "for that increment of progress in table 1 of this subpart" is replaced with "in 391-3-1-.02(2)(ppp)6. ".

- (II) 40 CFR 60.2620 through 40 CFR 60.2630, Waste Management Plan except that in 40 CFR 60.2625, "table 1 of this subpart for submittal of the final control plan" is replaced with " 391-3-1-.02(2)(ppp)6. " .
- (III) 40 CFR 60.2635 through 40 CFR 60.2665, Operator Training and Qualification.
- (IV) 40 CFR 60.2670 through 60.2680, Emission Limitations and Operating Limits.
- (V) 40 CFR 60.2690 through 60.2695, Performance Testing.
- (VI) 40 CFR 60.2700 through 60.2706, Initial Compliance Requirements except that in 40 CFR 60.2705(a), "table 1 of this subpart" is replaced with " 391-3-1-.02(2)(ppp)6. " .
- (VII) 40 CFR 60.2710 through 60.2725, Continuous Compliance Requirements.
- (VIII) 40 CFR 60.2730 through 60.2735, Monitoring.
- (IX) 40 CFR 60.2740 through 60.2800, Recordkeeping and Reporting with the exception of the following:
 - I. In 40 CFR 60.2755, "table 1 of this subpart for submittal of the final control plan" is replaced with " 391-3-1-.02(2)(ppp)6. " .
 - II. In lieu of 40 CFR 60.2795(b)(1)&(2):
 - A. Within 60 days after the date of completing each performance test as required by this subparagraph, each owner or operator must submit the results of the performance test required by this subparagraph to the Director. Performance test results required to be submitted to EPA must follow provision 40 CFR 60.2795(b)(1).
 - B. Within 60 days after the date of completing each CEMS performance evaluation test, as defined in this subparagraph and required by this subparagraph, each owner or operator

must submit the relative accuracy test audit (RATA) data, to the Director. RATA data required to be submitted to EPA must follow provision 40 CFR 60.2795(b)(2).

- (X) 40 CFR 60.2805, Title V Operating Permits.
 - (XI) 40 CFR 60.2810 through 60.2870, Air Curtain Incinerators except that in 40 CFR 60.2820, "table 1 of this subpart" is replaced with " 391-3-1-.02(2)(ppp)6. "; and in 40 CFR 60.2835, "for that increment of progress in table 1 of this subpart" is replaced with " 391-3-1-.02(2)(ppp)6. ".
 - (XII) 40 CFR 60.2875, Definitions.
 - (XIII) 40 CFR Part 60 Subpart DDDD Tables 2 through 9 except that in Table 5, in the Due Date column for the Waste Management Plan report, "table 1 for the submittal of the final control plan" is replaced with " 391-3-1-.02(2)(ppp)6. ".
3. The owner of an existing CISWI unit must contact EPA with respect to the authorities specified in 40 CFR Part 60.2542.
 4. Each Existing CISWI unit is subject to the permitting requirements of [391-3-1-.03\(10\)](#) "Title V Operating Permits".
 5. Definitions of all terms used, but not defined in this subparagraph, shall have the meaning given to them in 40 CFR Part 60, Subpart DDDD, as amended. Terms not defined therein shall have the meaning given to them in the federal Clean Air Act or 40 CFR Part 60, Subparts A and B. For the purposes of this subparagraph the following definitions also apply:
 - (i) Except as noted, the word "Administrator" as used in regulations adopted by reference in this subparagraph shall mean the Director of the Georgia Environmental Protection Division. For subparagraph (ppp)3. the word "Administrator" shall mean the Administrator of the EPA.
 - (ii) The term "Air Curtain Incinerator" as used in regulations adopted in this subparagraph shall mean an incinerator that operates by

forcefully projecting a curtain of air across an open chamber or pit in which combustion occurs. Incinerators of this type can be constructed above or below ground and with or without refractory walls and floor. (Air curtain incinerators are not to be confused with conventional combustion devices with enclosed fireboxes and controlled air technology such as mass burn, modular, and fluidized bed combustors.)

(iii) The term "You" means the owner or operator of a CISWI unit subject to this rule.

6. In keeping with subparagraph (ppp)2., owners and operators of existing CISWI units must comply with Georgia's state plan for existing CISWI units, which is required by 40 CFR Part 60, Subpart DDDD. The owner operator of each existing CISWI unit shall comply with the requirements of 391-3-1-.02(2)(ppp)2. upon approval of Georgia's state plan for existing CISWI units by EPA.

(qqq) **VOC Emissions from Extruded Polystyrene Products Manufacturing Utilizing a Blowing Agent.**

1. No person shall cause, let, permit, suffer, or allow the three-month rolling average VOC emissions from an existing extruded polystyrene (XPS) products manufacturing facility that utilizes a blowing agent, to exceed 0.8 lbs per 100 lbs of raw material processed during any month. Compliance with this limit shall be calculated as follows:

$$\text{Final VOC Emissions} = (\text{Facility VOC Emissions})/(\text{Raw Material})$$

2. No person shall cause, let, permit, suffer, or allow the three-month rolling average VOC emissions from any new or reconstructed extruded polystyrene (XPS) products manufacturing facility that utilizes a blowing agent, to exceed 0.3 lbs per 100 lbs of raw material processed during any month. Compliance with this limit shall be calculated as follows:

$$\text{Final VOC Emissions} = (\text{Facility VOC Emissions})/(\text{Raw Material})$$

3. For the purposes of subparagraphs 1 and 2 above, the VOC emissions from the product manufacturing operations and the post-manufacturing operations are to be calculated as follows:

$$\text{Facility VOC Emissions} =$$

$$\sum_{i=1}^n$$

$$B_i(1 - OCE_i) +$$

$$\sum_{i=1}^n$$

$$C_i(1 - OCE_i) +$$

$$\sum_{i=1}^p$$

$$E_i(1 - OCE_i)$$

$$B = A - C - D$$

A = VOC Blowing Agent Used (pounds per any consecutive three-month period)

B = VOC Emissions Primary Extrusion, Roll Storage, and Thermoforming (Uncontrolled) for each control device (pounds per any consecutive three-month period)

C = VOC in the Reclaim Material (pounds per any consecutive three-month period)

D = VOC in the Final Product (pounds per any consecutive three-month period)

E = VOC Emissions from Finished Goods Warehouses (Uncontrolled) (pounds per any consecutive three-month period)

OCE = Overall Control Efficiency of a control device = [(CE)/100*(DE)/100*(UT)/100]

CE = Capture Efficiency of a Control Device (percent VOC captured)

DE = Destruction Efficiency of a Control Device (percent VOC destruction)

UT = Percentage of operating time for the control device (for the consecutive three-month period)

n = Total number of control device systems associated with primary extrusion, roll storage, and thermoforming

m = Total number of control device systems associated with the reclaim system

p = Total number of control device systems associated with the finished goods warehouses

4. Exemptions.

(i) The provisions of subparagraphs 1 and 2 above shall not apply to Extruded Polystyrene Products Manufacturing facilities at any single site that processes less than 200 pounds per day of raw material.

(ii) The provisions of subparagraphs 1 and 2 above shall not apply to any single site that contains one or more XPS post-manufacturing operations and does not contain any XPS product manufacturing operations.

5. Any owner or operator subject to subparagraphs 1 or 2 above shall maintain a record of operations, including but not limited to the amount of raw material processed, the equipment used, the type of blowing agent used, and operation and maintenance records of all VOC emission control systems such as temperature, pressure, flow rate, and other measures to demonstrate compliance with subparagraphs 1 or 2, as applicable. Such records shall be maintained in a format specified by the Division and shall be retained on site for a period of five years from the date of record and shall be made available to the Division upon request.

6. For the purpose of this rule, the following definitions shall apply:

(i) "Affected Facility" means the entire Extruded Polystyrene (XPS) manufacturing operations and post-manufacturing operations at a single site.

(ii) "Blowing Agent" means a liquid, gaseous or solid material that facilitates the formation of a cellular product from raw polymeric material.

- (iii) "Existing Extruded Polystyrene (XPS) Products Manufacturing Facility" means any such facility that begins initial operation on or before April 16, 2003.
- (iv) "Extruded Polystyrene (XPS) Products Manufacturing Facility" means a series of processes, where a blowing agent is injected into an extruded polystyrene resin and processed through cup, block, or shape molding into low-density, closed cell, cellular products. XPS products include but are not limited to insulation board, product and food packaging material. For the purposes of the applicability thresholds in subparagraph 7 below, all of the potential VOC emissions from the affected facility at a single site should be counted toward the emission thresholds. XPS product manufacturing facility includes all product manufacturing operations as well as post-manufacturing operations.
- (v) "Facility VOC Emissions" means VOC emissions from the product manufacturing operation and the post-manufacturing operation during any consecutive three-month period as calculated per subparagraph 3 above.
- (vi) "Final VOC Emissions" means VOC emission calculations that are expressed in pounds VOC emitted from the facility per 100 pounds of raw material processed during any consecutive three-month period as calculated per subparagraphs 1 and 2 above.
- (vii) "New Extruded Polystyrene (XPS) Products Manufacturing Facility" means any such facility that begins initial operation after April 16, 2003.
- (viii) "Product Manufacturing Operation" means every step of the processing of a polymeric material from the delivery of the raw material, up until the storage of the final cellular product.
- (ix) "Post-Manufacturing Operation" means the storage of the final cellular product.
- (x) "Raw Material" means all polystyrene (including recycle polystyrene from reclaim systems), additives, and blowing agent used in the manufacture of polymeric cellular products during any consecutive three-month period.
- (xi) "Reconstructed" means the replacement or addition of components at an existing affected facility in which the fixed

capital cost of the new components exceeds 50 percent of the fixed capital cost that would be required to construct a comparable affected facility.

- (xii) "Reconstructed Extruded Polystyrene (XPS) Products Manufacturing Facility" means any existing facility that is reconstructed after April 16, 2003.
- (xiii) "Single Site" means any stationary source or group of stationary sources that are located on one or more contiguous or adjacent properties and are under common control.

7. The requirements of this rule shall apply to all Extruded Polystyrene (XPS) Products Manufacturing facilities, at a single site, with potential VOC emissions from product manufacturing and post-manufacturing operations equal to or exceeding 25 tons per year in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale. In the counties of Bartow, Carroll, Hall, Newton, Spalding and Walton, facilities, at a single site, with potential VOC emissions from product manufacturing and post-manufacturing operations equal to or exceeding 100 tons per year are subject to this rule.

8. Compliance Dates.

- (i) All existing facilities shall be subject to the following compliance schedule:
 - (I) Existing facilities shall submit a letter to the Division no later than May 1, 2003, indicating the option they are considering to comply with the limit in subparagraph 1. These options shall be either installation and use of additional VOC emission control systems or a blowing agent substitution.
 - (II) Existing facilities that choose to install and operate additional VOC emission control systems shall do the following:
 - 1. An application for a permit to construct for the installation of VOC emission control systems shall be submitted no later than November 1, 2003.

2. Full compliance with the limit in subparagraph 1 above shall be demonstrated no later than November 1, 2004.

(III) Existing facilities that choose a blowing agent substitution shall do the following:

1. Two six-month progress reports shall be submitted to the Division no later than November 1, 2003, and May 1, 2004.
2. Full compliance with the limit in subparagraph one above shall be demonstrated no later than November 1, 2004.
3. If the facility cannot comply with the limit, then an application for a permit to construct for the installation of VOC emission control systems shall be submitted no later than November 1, 2004, and full compliance with the limit in subparagraph 1 above shall be demonstrated no later than January 1, 2006.
 - (i) All new or reconstructed facilities shall be subject to the limit in subparagraph 2 upon startup.

(rrr) NOx Emissions from Small Fuel-Burning Equipment.

1. The owner or operator of an affected unit as defined in subparagraph 4. shall:
 - (i) Perform an annual tune-up of each affected unit, no earlier than February 1 and no later than May 1 of each calendar year. The annual tune-up shall be performed using the manufacturer's recommended settings for reduced NOx emissions, or using a NOx analyzer so that NOx emissions are minimized in a manner consistent with good combustion practices and safe fuel-burning equipment operation.
 - (ii) Fire only natural gas, LPG or propane in an affected unit during the calendar months of May through September of each year. If an

affected unit is not equipped to fire LPG or propane, the owner or operator shall be excused from this requirement only during periods of natural gas curtailment as defined in subparagraph 5.

- (iii) Maintain records of all tune-ups required to be performed in accordance with subparagraph 1.(i). These records shall indicate the date and time the tune-up was performed, state what burner settings were implemented to minimize NOx emissions, and explain how those settings were determined. All documents and calculations used to determine reduced NOx fuel-burning equipment settings shall be kept as part of the tune-up, maintenance and adjustments records. All records required by this subparagraph shall be retained available for inspection or submittal either in written or electronic form for at least five years from the date of record.
2. The owner or operator shall cause all affected units in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, or Rockdale County to be in compliance with the requirements of this paragraph on or before May 15, 2005, and the owner or operator shall cause all affected units in Barrow, Bartow, Carroll, Hall, Newton, Spalding or Walton County to be in compliance with the requirements of this paragraph on or before March 1, 2009.
 3. As an alternative to complying with the requirements of this paragraph, the owner or operator of any affected emissions unit(s) may elect to comply with the requirements of paragraph 391-3-1-.02(2)(yy).
 4. For the purposes of this paragraph, the term "affected unit" means individual fuel burning equipment that:
 - (i) is not subject to the requirements of paragraphs 391-3-1-.02(2)(jjj) or 391-3-1-.02(2)(lll); and
 - (ii) is located at a facility having (from all emission sources combined) potential emissions of nitrogen oxides, expressed as nitrogen dioxide, exceeding 25 tons-per-year in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, or Rockdale County or any facility having (from all emission sources combined) potential emissions of nitrogen oxides, expressed as nitrogen dioxide, exceeding 100 tons-per-year in Barrow, Bartow, Carroll, Hall, Newton, Spalding or Walton County; and

- (iii) has potential emissions (from the individual fuel burning equipment) of nitrogen oxides, expressed as nitrogen dioxide, equal to or exceeding one ton per year; and either
 - (iv) was installed before May 1, 1999 and has a maximum design heat input capacity of less than 100 million BTU-per-hour, or
 - (v) was installed on or after May 1, 1999 and has a maximum design heat input capacity of less than 10 million BTU-per-hour.
5. For the purposes of this paragraph, the term "natural gas curtailment" means any period during which the supply of natural gas is not available for firing in an affected unit, for reasons beyond the control of and not related to any action or decision of the owner or operator.
6. An affected unit shall be exempt from the requirements of subparagraph 1, provided the owner or operator submits such documentation as specified in the facility's air quality permit confirming that the affected unit will not be operated during the months of May through September.

(sss) **Multipollutant Control for Electric Utility Steam Generating Units.**

1. **Effective December 31, 2008**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:
- (i) Plant Bowen Unit 4 unless such source is equipped and operated with selective catalytic reduction and flue gas desulfurization.
 - (ii) Plant Bowen Unit 3 unless such source is equipped and operated with selective catalytic reduction and flue gas desulfurization.
 - (iii) Plant Wansley Unit 1 unless such source is equipped and operated with selective catalytic reduction and flue gas desulfurization.
 - (iv) Plant Hammond Unit 1 unless such source is equipped and operated with flue gas desulfurization.
 - (v) Plant Hammond Unit 2 unless such source is equipped and operated with flue gas desulfurization.
 - (vi) Plant Hammond Unit 3 unless such source is equipped and operated with flue gas desulfurization.

- (vii) Plant Hammond Unit 4 unless such source is equipped and operated with selective catalytic reduction and flue gas desulfurization.
 - (viii) Plant Yates Unit 1 unless such source is equipped and operated with flue gas desulfurization.
2. **Effective June 1, 2009**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:
- (i) Plant Bowen Unit 2 unless such source is equipped and operated with selective catalytic reduction (SCR) and flue gas desulfurization (FGD).
 - (ii) Plant Scherer Unit 2 unless such source is equipped and operated with sorbent injection and a baghouse.
 - (iii) Plant Scherer Unit 3 unless such source is equipped and operated with sorbent injection and a baghouse.
3. **Effective December 31, 2009**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:
- (i) Plant Scherer Unit 1 unless such source is equipped and operated with sorbent injection and a baghouse.
 - (ii) Plant Wansley Unit 2 unless such source is equipped and operated with selective catalytic reduction and flue gas desulfurization.
4. **Effective April 30, 2010**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:
- (i) Plant Scherer Unit 4 unless such source is equipped and operated with sorbent injection and a baghouse.
5. **Effective June 1, 2010**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:
- (i) Plant Bowen Unit 1 unless such source is equipped and operated with selective catalytic reduction (SCR) and flue gas desulfurization (FGD).

6. **Effective July 1, 2011**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:
 - (i) Plant Scherer Unit 3 unless such source is equipped and operated with selective catalytic reduction, flue gas desulfurization, sorbent injection, and a baghouse; provided that the owner or operator is not required to operate the selective catalytic reduction system during the months of January through April and October through December of each year.

7. **Effective December 31, 2011**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:
 - (i) [reserved]
 - (ii) Plant McDonough Unit 2 unless such source is equipped and operated with selective catalytic reduction (SCR) and flue gas desulfurization (FGD).

8. **Effective April 30, 2012**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:
 - (i) Plant McDonough Unit 1 unless such source is equipped and operated with selective catalytic reduction (SCR) and flue gas desulfurization (FGD).

9. **Effective December 31, 2012**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:
 - (i) Plant Scherer Unit 4 unless such source is equipped and operated with selective catalytic reduction, flue gas desulfurization, sorbent injection, and a baghouse, provided that the owner or operator is not required to operate the selective catalytic reduction system during the months of January through April and October through December of each year.

10. **Effective October 1, 2013**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:

- (i) Plant Branch Unit 2 unless such source is equipped and operated with selective catalytic reduction (SCR) and flue gas desulfurization (FGD).

11. **Effective December 31, 2013**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:

- (i) [reserved]
- (ii) Plant Scherer Unit 2 unless such source is equipped and operated with selective catalytic reduction, flue gas desulfurization, sorbent injection, and a baghouse, provided that the owner or operator is not required to operate the selective catalytic reduction system during the months of January through April and October through December of each year.
- (iii) [reserved]

12. **Effective December 31, 2014**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:

- (i) [reserved]
- (ii) [reserved]
- (iii) Plant Scherer Unit 1 unless such source is equipped and operated with selective catalytic reduction, flue gas desulfurization, sorbent injection, and a baghouse; provided that the owner or operator is not required to operate the selective catalytic reduction system during the months of January through April and October through December of each year.

13. **Effective April 16, 2015**, no person shall cause, let, permit, suffer or allow the operation of the following affected units except as specified below:

- (i) Plant Yates Unit 6 unless such source is operated as a natural gas-fired electric utility steam generating unit or is equipped and operated with selective catalytic reduction (SCR) and flue gas desulfurization (FGD).

- (ii) Plant Yates Unit 7 unless such source is operated as a natural gas-fired electric utility steam generating unit or is equipped and operated with selective catalytic reduction (SCR) and flue gas desulfurization (FGD).
- (iii) Plant Yates Units 2, 3, 4, and 5 unless such sources are operated as natural gas-fired electric steam generating units.
- (iv) Plant Branch Unit 1 unless such source is equipped and operated with selective catalytic reduction (SCR) and flue gas desulfurization (FGD).
- (v) Plant Branch Unit 3 unless such source is equipped and operated with selective catalytic reduction (SCR) and flue gas desulfurization (FGD).
- (vi) Plant Branch Unit 4 unless such source is equipped and operated with selective catalytic reduction (SCR) and flue gas desulfurization (FGD).
- (vii) Plant Yates Unit 1 unless such source is operated as a natural gas-fired electric utility steam generating unit and is equipped and operated with flue gas desulfurization when burning coal.

14. [reserved]

15. [reserved]

16. **Effective January 1, 2018**, should the annual heat input (from coal combustion) of the following unit or group of units exceed the levels specified in each Subparagraphs 16.(i) through 16.(iii), the owner/operator will comply with the requirements specified in Subparagraph 16.(v):

- (i) Plant Kraft Units 1, 2, and 3 with a total annual heat input of 17,911,898 million Btu;
- (ii) Plant McIntosh Unit 1 with a total annual heat input of 14,557,638 million Btu;
- (iii) Plant Mitchell Unit 3 with a total annual heat input of 8,621,580 million Btu;
- (iv) [reserved]

- (v) The owner/operator shall evaluate the economic and technical feasibility of additional mercury controls on the applicable unit(s) specified in Subparagraphs 16.(i) through 16.(iii), and submit a report on their findings to the Division no later than September 1 of the calendar year following the calendar year that the annual heat input exceeded the applicable level specified in Subparagraphs 16.(i) through 16.(iii).
- (vi) The Division will review the report submitted in accordance with Subparagraph 16.(v) and determine if additional mercury controls are required and, if additional mercury controls are required, establish deadlines for submission of a permit application(s) to the Division and for start-up of such mercury controls.
- (vii) The Division will document the results of its evaluation conducted in accordance with Subparagraph 16.(vi) and notify the owner and/or operator within a timely fashion whether additional mercury controls are required.

17. **Control Equipment Monitoring Design:** For the anticipated range of operations of the affected units specified in Subparagraphs 1. through 13., the designated representative shall follow the procedures given in Section 2.124 of the Division's **Procedures for Testing and Monitoring Sources of Air Pollutants** for the establishment of optimized operating parameters for the applicable control equipment installed as required in Subparagraphs 1. through 13.
18. **Alternative Control Technology:** The owner/operator of an affected unit specified in Subparagraphs 1. through 13. may operate alternative control technology or alternative method of emissions reductions from that which is specified in the applicable Subparagraphs 1. through 13. if the following requirements are met:
 - (i) The Division has approved the operation of the alternative control technology or the alternative method of emission reductions as being capable of achieving reductions of NO_x, SO₂ and/or mercury emissions equivalent to or greater than the control technology requirement specified in applicable Subparagraphs 1. through 13. for an individual emissions unit or the respective plant site as a whole; and
 - (ii) The owner/operator has obtained the appropriate permit(s) from the Division prior to operating the alternative control technology.

19. **The owner or operator** of any electric utility steam generating unit subject to this subsection may submit a request to the Director to delay implementation of any of the controls required by Subparagraphs 1. through 13. for a specific electric utility steam generating unit if there is a delay caused by reasonably unforeseen circumstances beyond the control of the owner operator. Any delay allowed under this subparagraph is subject to review and approval by the Division. Reasonably unforeseen circumstances beyond the control of the owner or operator shall include, without limitation, the following:
- (i) Failure to secure timely and necessary federal, state or local approvals, responses, notifications or permits to install the controls, provided that such approvals or permits have been timely and diligently sought;
 - (ii) Act of God, act of war, insurrection, civil disturbance, flood or other extraordinary weather conditions, vandalism, contractor or supplier strikes or bankruptcy, or unanticipated breakage or accident to machinery or equipment despite diligent maintenance; and
 - (iii) Any other delay caused by unforeseeable circumstances beyond the reasonable control of owner or operator as reasonably determined by the Director.
20. **On and after the effective date** of each Subparagraph 1. through 13. for an affected unit, the applicable owner or operator is not required to operate the required control technology under the following conditions:
- (i) Restarting an electric utility steam generating unit when all electric utility steam generating units [as listed in Subparagraphs 1. through 13.] at a facility are down and off-site power is not available (also known as a "Black Start").
 - (ii) Periods of startup of an electric utility steam generating unit provided that such periods are consistent with the requirements of Paragraph 391-3-1-.02(2)(a)7.
 - (iii) Periods of shutdown of an electric utility steam generating unit provided that such periods are consistent with the requirements of Paragraph 391-3-1-.02(2)(a)7.
 - (iv) Periods of scheduled and/or preventative maintenance of control technology equipment if such maintenance cannot reasonably be

performed during a scheduled outage of the respective electric utility steam generating unit.

- (v) Periods of malfunction of electric utility steam generating unit and/or control technology equipment provided that such periods are consistent with the requirements of Paragraph 391-3-1-.02(2)(a)7.
- (vi) Periods when the owner/operator is required to conduct the Relative Accuracy Test Audit and any other necessary periodic quality assurance procedures on the Continuous Emissions Monitoring System located on the bypass stack pursuant to 40 CFR Part 75 or the Georgia Department of Natural Resources **Procedures for Testing and Monitoring Sources of Air Pollutants**.
- (vii) Periods when the owner/operator is required to conduct any performance tests on the bypass stack as required by state or federal air quality rules, air quality operating permits, or as ordered by the Division.
- (viii) Division-approved periods of research and development of emission control technologies, provided that the unit does not exceed other applicable emission limits. For purposes of this subparagraph, the owner/operator shall submit a request for approval under this subparagraph at least 120 days prior to such date as well as including the following items:
 - (1) length of time of research and development (R&D) period;
 - (2) identification of steps to take to minimize emissions in accordance with best operational practices during R&D period;
 - (3) for periods of R&D lasting more than 48 hours during any 5-day period, a demonstration that any increase in emissions resulting from the R&D project that are above that which is allowed by this subparagraph (sss) will not cause or significantly contribute to a violation of any national ambient air quality standard or prevent compliance with any other applicable provisions.

(ix) Any other occasion not covered by Subparagraphs 20.(i) through (viii), as approved by the Division.

21. **The requirements** of Subparagraph 20 do not relieve the owner or operator from the requirement to comply with any other applicable requirements of Georgia Rules for Air Quality Control Chapter 391-3-1.

22. **Technology and Mercury Impact Review - Periodic Evaluation:** The Director shall submit a report to the Georgia Department of Natural Resources Board by December 31, 2023. The report shall constitute an evaluation of available and relevant information to determine if additional reductions of mercury emissions from electric utility steam generating units are necessary or appropriate. This report shall include an evaluation that includes, but is not limited to, the following:

- (i) mercury concentrations in fish tissue in water bodies in the State and any changes or trends of such concentrations over time;
- (ii) the sources of mercury (including air, land, and water sources) that might influence in-state mercury concentrations in fish tissue;
- (iii) the state of the science regarding the relationship among sources of mercury, mercury speciation and mercury concentrations in fish tissue in water bodies in the State;
- (iv) the health impact of mercury contamination in fish tissue;
- (v) technically- and economically-feasible controls for the reduction of mercury emissions from coal-fired EGUs or other sources;
- (vi) whether additional reductions of mercury from coal-fired electric utility steam generating units or other sources and/or whether additional time or study is appropriate and necessary in light of items (i) through (v);
- (vii) recommendations for any necessary revisions to Paragraph (sss) or other actions as needed to address other sources; and
- (viii) recommendations for an appropriate timeline for the development of any such additional regulations; provided, however, that implementation and operation of any such additional controls shall be required no earlier than January 1, 2027.

23. **Effective January 1, 2013**, no person shall cause, let, permit, suffer or allow the operation of the following units affected except as specified below:

- (i) Plant Branch Units 3 and 4, combined, shall not emit more than 11,165 tons of nitrogen oxides annually in 2013, 2014, and 2015 only.
- (ii) Plant Branch Units 3 and 4, combined, shall not emit more than 52,988 tons of sulfur dioxide annually in 2013, 2014, and 2015 only.

24. **Definitions.** For the purpose of this subparagraph (sss), the following definitions apply:

- (i) "Affected Unit" means electric utility steam generating units at Plants Bowen 1, 2, 3, and 4; Plants Branch Units 1, 2, 3, and 4; Plant Hammond Units 1, 2, 3, and 4; Plant McDonough Units 1 and 2; Plant Scherer Units, 1, 2, 3, and 4; Plant Wansley Units 1 and 2; and Plant Yates Units 1, 2, 3, 4, 5, 6, and 7.
- (ii) The definition of natural gas-fired electric utility steam generating unit specified in 40 CFR 63.10042 is hereby incorporated and adopted by reference.

(ttt) [reserved]

(uuu) **SO₂ Emissions from Electric Utility Steam Generating Units.**

1. Effective January 1, 2010, no person shall cause, let, permit, suffer or allow any gases which contain sulfur dioxide in excess of 10 percent (0.10) of the potential combustion concentration (90 percent reduction) from the following affected unit: Plant Yates Unit 1.
2. Effective on the dates established below, no person shall cause, let, permit, suffer or allow any gases which contain sulfur dioxide in excess of 5 percent (0.05) of the potential combustion concentration (95 percent reduction) from the following affected units: Plant Bowen Units 1 through 4, Plant Branch Units 1 through 4, Plant Hammond Units 1 through 4, Plant McDonough Units 1 and 2, Plant Scherer Units 1 through 4, Plant Wansley Units 1 and 2, and Yates Units 6 and 7.

The limit established in this subparagraph shall become effective beginning:

- (i) January 1, 2010, for Plant Bowen Units 2, 3 and 4, and Plant Wansley Units 1 and 2.
 - (ii) July 1, 2011, for Plant Scherer Unit 3.
 - (iii) January 1, 2012, for Plant Bowen Unit 1, Plant Hammond Units 1, 2, 3, and 4, and Plant McDonough Unit 2.
 - (iv) May 1, 2012, for Plant McDonough Unit 1.
 - (v) January 1, 2013, for Plant Scherer Unit 4.
 - (vi) October 1, 2013, for Plant Branch Unit 2.
 - (vii) January 1, 2014, for Plant Scherer Unit 2.
 - (viii) January 1, 2015, for Plant Scherer Unit 1.
 - (ix) April 16, 2015, for Plant Yates Units 6 and 7, and Plant Branch Units 1, 3, and 4.
 - (x) [reserved]
 - (xi) [reserved]
3. Compliance with Subparagraphs 1 and 2 shall be determined on a 30-day rolling average basis. The first 30-day averaging period for each Affected Unit shall begin on the effective date specified in Subparagraphs 1 and 2.
4. The requirements of Subparagraphs 1 and 2 do not apply during the following periods:
- (i) Restarting an Electric Utility Steam Generating Unit specified in subparagraphs 1 or 2 when all Electric Utility Steam Generating Units at a facility are down and off-site power is not available (also known as a "Black Start").
 - (ii) Periods of startup of an Electric Utility Steam Generating Unit provided that such periods are consistent with the requirements of Paragraph 391-3-1-.02(2)(a)7.
 - (iii) Periods of shutdown of an Electric Utility Steam Generating Unit provided that such periods are consistent with the requirements of Paragraph 391-3-1-.02(2)(a)7.

- (iv) Periods of scheduled and/or preventative maintenance of control technology equipment if such maintenance cannot reasonably be performed during a scheduled outage of the respective Electric Utility Steam Generating Unit.
- (v) Periods of malfunction of an Electric Utility Steam Generating Unit and/or control technology equipment provided that such periods are consistent with the requirements of Paragraph 391-3-1-.02(2)(a)7.
- (vi) Periods when the owner/operator is required to conduct the Relative Accuracy Test Audit and any other necessary periodic quality assurance procedures on the Continuous Emissions Monitoring System located on the bypass stack pursuant to 40 CFR Part 75 or the Georgia Department of Natural Resources **Procedures for Testing and Monitoring Sources of Air Pollutants**.
- (vii) Periods when the owner/operator is required to conduct any performance tests on the bypass stack as required by State or Federal air quality rules, air quality operating permits, or as ordered by the Division.
- (viii) Division-approved periods of research and development of emission control technologies, provided that the unit does not exceed other applicable emission limits. For purposes of this subparagraph, the owner/operator shall submit a request for approval under this subparagraph at least 120 days prior to such date, as well as include the following items:
 - (1) length of time of research and development (R&D) period;
 - (2) identification of steps to take to minimize emissions in accordance with best operational practices during R&D period;
 - (3) for periods of R&D lasting more than 48 hours during any 5-day period, a demonstration that any increase in emissions resulting from the R&D project that are above that which is allowed by this subparagraph (uuu) will not cause or significantly contribute to an violation of any national ambient air quality standard or prevent compliance with any other applicable provisions.

5. For the purpose of this subsection, the following definitions apply:
- (i) "Potential combustion concentration" means the theoretical sulfur dioxide emissions (lb/MMBtu heat input) that would result from combusting fuel without using emission control systems.
 - (ii) "Affected Unit" means electric utility steam generating units Plant Bowen Units 1, 2, 3, and 4; Plant Branch Units 1, 2, 3, and 4; Plant Hammond Units 1, 2, 3, and 4; Plant McDonough Units 1 and 2; Plant Wansley Units 1 and 2; Plant Scherer Units 1, 2, 3, and 4; and Plant Yates Units 1, 6, and 7, except when operated as a natural gas-fired electric utility steam generating unit. The definition of natural gas-fired electric generating unit notwithstanding, Plant Yates Unit 1 shall be treated as an affected unit whenever it burns any coal.
 - (iii) The definition of natural gas-fired electric steam generating units specified in 40 CFR 63.10042 is hereby incorporated and adopted by reference.

(vvv) **VOC Emissions from Surface Coating of Miscellaneous Plastic Parts and Products.**

1. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of miscellaneous plastic parts and products that does not fall under subparagraphs 2., 3., 4., 5., 6., 7., and/or 8. of this subsection to exceed:
- (i) 2.3 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a general one-component coating. If any coating delivered to the coating application system contains more than 2.3 pounds VOC per gallon, the solids equivalent limit shall be 3.35 pounds VOC per gallon of coating solids delivered to the coating application system.
 - (ii) 2.8 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a military specification (1-pack) coating. If any coating delivered to the coating application system contains more than 2.8 pounds VOC per gallon, the solids equivalent limit shall be 4.52 pounds VOC per gallon of coating solids delivered to the coating application system.
 - (iii) 3.5 pounds per gallon of coating, excluding water, delivered to a coating application system that applies one or more of the following coatings: general multi-component; extreme-

performance (2-pack) coating; metallic coating; and military specification (2-pack) coating. If any coating delivered to the coating application system contains more than 3.5 pounds VOC per gallon, the solids equivalent limit shall be 6.67 pounds VOC per gallon of coating solids delivered to the coating application system.

- (iv) 5.7 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a multi-colored coating. If any coating delivered to the coating application system contains more than 5.7 pounds VOC per gallon, the solids equivalent limit shall be 25.3 pounds VOC per gallon of coating solids delivered to the coating application system.
 - (v) 6.3 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a mold-seal coating. If any coating delivered to the coating application system contains more than 6.3 pounds VOC per gallon, the solids equivalent limit shall be 43.7 pounds VOC per gallon of coating solids delivered to the coating application system.
 - (vi) 6.7 pounds per gallon of coating, excluding water, delivered to a coating application system that applies an electric dissipating coating, shock-free coating, optical coating, or vacuum metalizing coating. If any coating delivered to the coating application system contains more than 6.7 pounds VOC per gallon, the solids equivalent limit shall be 74.7 pounds VOC per gallon of coating solids delivered to the coating application system.
2. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of plastic parts of automobiles and trucks at a facility that is not an automobile or light-duty truck manufacturing facility using baked coatings for interior and exterior parts to exceed:
- (i) 3.5 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a non-flexible primer. If any non-flexible primer coating delivered to the coating application system contains more than 3.5 pounds VOC per gallon, the solids equivalent limit shall be 6.67 pounds VOC per gallon of coating solids delivered to the coating application system.
 - (ii) 4.0 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a clear coat. If any clear

coat coating delivered to the coating application system contains more than 4.0 pounds VOC per gallon, the solids equivalent limit shall be 8.76 pounds VOC per gallon of coating solids delivered to the coating application system.

- (iii) 4.3 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a base coat or non-base coat/clear coat. If any one of these coatings delivered to the coating application system contains more than 4.3 pounds VOC per gallon, the solids equivalent limit shall be 8.76 pounds VOC per gallon of coating solids delivered to the coating application system.
 - (iv) 4.5 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a flexible primer. If any coating delivered to the coating application system contains more than 4.5 pounds VOC per gallon, the solids equivalent limit shall be 11.58 pounds VOC per gallon of coating solids delivered to the coating application system.
3. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of plastic parts of automobiles and trucks at a facility that is not an automobile or light-duty truck manufacturing facility using air dried coatings for exterior parts to exceed:
- (i) 4.0 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a clear coat. If any coating delivered to the coating application system contains more than 4.0 pounds VOC per gallon, the solids equivalent limit shall be 11.58 pounds VOC per gallon of coating solids delivered to the coating application system.
 - (ii) 4.8 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a primer. If any coating delivered to the coating application system contains more than 4.8 pounds VOC per gallon, the solids equivalent limit shall be 13.80 pounds VOC per gallon of coating solids delivered to the coating application system.
 - (iii) 4.0 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a base coat or a non-basecoat/clear coat. If any coating delivered to the coating application system contains more than 4.0 pounds VOC per gallon, the solids equivalent limit shall be 13.4 pounds VOC per

gallon of coating solids delivered to the coating application system.

4. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of plastic parts of automobile and trucks at a facility that is not an automobile or light-duty truck manufacturing facility using air dried coatings for interior parts to exceed:
 - (i) 5.0 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a coating. If any coating delivered to the coating application system contains more than 5.0 pounds VOC per gallon, the solids equivalent limit shall be 15.59 pounds VOC per gallon of coating solids delivered to the coating application system.

5. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of plastic parts of automobile and trucks at a facility that is not an automobile or light-duty truck manufacturing facility using touchup and repair coatings to exceed:
 - (i) 5.2 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a coating. If any coating delivered to the coating application system contains more than 5.2 pounds VOC per gallon, the solids equivalent limit shall be 17.72 pounds VOC per gallon of coating solids delivered to the coating application system.

6. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of plastic parts of business machines to exceed:
 - (i) 2.2 pounds per gallon of coating, excluding water, delivered to a coating application system that applies a fog coat. If any coating delivered to the coating application system contains more than 2.2 pounds VOC per gallon, the solids equivalent limit shall be 3.14 pounds VOC per gallon of coating solids delivered to the coating application system.

 - (ii) 2.9 pounds per gallon of coating, excluding water, delivered to a coating application system that applies one or more of the following coatings: primer. topcoat. texture coat. touchup and repair. If any coating delivered to the coating application system contains more than 2.9 pounds VOC per gallon, the solids equivalent limit shall be 4.80 pounds VOC per gallon of coating solids delivered to the coating application system.

7. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of miscellaneous motor vehicle plastic parts and products at a facility that is not an automobile or light-duty truck manufacturing facility to exceed:
 - (i) 1.7 pounds per gallon of coating, excluding water, delivered to a coating application system that applies the following motor vehicle materials: gasket/gasket sealing material and bedliner.
 - (ii) 3.5 pounds per gallon of coating, excluding water, delivered to a coating application system that applies the following motor vehicle materials: cavity wax, sealer, deadener, underbody coating, trunk interior coating, and lubricating wax/compound.

8. No person shall cause, let, permit, suffer, or allow the emissions of VOC from surface coating of plastic parts of automobile and trucks at a facility that is not an automobile or light-duty truck manufacturing facility using red or black coatings to exceed 1.15 times the applicable limit in this subsection except in the case of touch-up and repair coatings in which the applicable limit shall apply.

9. Each owner or operator of a facility that coats plastic parts shall ensure that all coating application systems utilize one or more of the application techniques stated below:
 - (i) Electrostatic spray application;
 - (ii) High volume low pressure (HVLP) spraying;
 - (iii) Flow/curtain application;
 - (iv) Roll coating;
 - (v) Dip coat application including electrodeposition;
 - (vi) Airless spray;
 - (vii) Air-assisted airless spray; or
 - (viii) Other coating application methods that achieve transfer efficiency equivalent to HVLP or electrostatic spray application methods, as determined by the Director.

10. Each owner or operator of a facility that coats plastic parts shall comply with the following work practice standards:

- (i) store all VOC-containing coatings, thinners, and coating-related waste materials in closed containers;
 - (ii) ensure that mixing and storage containers used for VOC-containing coatings, thinners, and coating-related waste materials are kept closed at all times except when depositing or removing these materials;
 - (iii) minimize spills of VOC-containing coatings, thinners, and coating-related waste materials; and
 - (iv) convey VOC-containing coatings, thinners, and coating-related waste materials from one location to another in closed containers or pipes.
11. Each owner or operator of a facility that coats plastic parts shall comply with the following housekeeping requirements for any affected cleaning operation:
- (i) store all VOC-containing cleaning materials and used shop towels in closed containers;
 - (ii) ensure that storage containers used for VOC-containing cleaning materials are kept closed at all times except when depositing or removing these materials;
 - (iii) minimize spills of VOC-containing cleaning materials;
 - (iv) convey VOC-containing cleaning materials from one location to another in closed containers or pipes; and
 - (v) minimize VOC emission from cleaning of application, storage, mixing, and conveying equipment by ensuring that equipment cleaning is performed without atomizing the cleaning solvent and all spent solvent is captured in closed containers.
12. The VOC limits specified in this subsection do not apply to the following types of plastics coatings and/or coating operations:
- (i) Touch-up and repair coatings;
 - (ii) Stencil coatings applied on clear or transparent substrates;
 - (iii) Clear or translucent coatings;

- (iv) Coatings applied at a paint manufacturing facility while conducting performance tests on the coatings;
- (v) Any individual coating category used in volumes less than 50 gallons in any one year, if substitute compliant coatings are not available, provided that the total usage of all such coatings does not exceed 200 gallons per year, per facility;
- (vi) Reflective coating applied to highway cones;
- (vii) Mask coatings that are less than 0.5 millimeter thick (dried) and the area coated is less than 25 square inches;
- (viii) EMI/RFI shielding coatings; and
- (ix) Heparin-benzalkonium chloride (HBAC)-containing coatings applied to medical devices, provided that the total usage of all such coatings does not exceed 100 gallons per year, per facility.

The recommended application methods and work practice standards specified in this subsection still apply.

13. Airbrush operations using five gallons or less per year of coating are exempt from the application technique requirements of this subsection but must comply with the VOC limits and work practices specified.
14. The VOC limits specified in this subsection do not apply to the coating of plastic parts of automobiles and trucks or the coating of plastic parts of business machines of the following types of coatings and/or coating operations:
 - (i) Texture coatings;
 - (ii) Vacuum metalizing coatings;
 - (iii) Gloss reducers;
 - (iv) Texture topcoats;
 - (v) Adhesion primers;
 - (vi) Electrostatic preparation coatings;
 - (vii) Resist coatings; and

(viii) Stencil coatings.

The application methods and work practice standards specified in this subsection still apply.

15. All VOC emissions from solvent washings shall be considered in the emission limitations unless the solvent is directed into containers that prevent evaporation into the atmosphere.
16. The emission limits in this subsection shall be achieved by:
 - (i) the application of low solvent coating technology where each and every coating meets the limit expressed in pounds VOC per gallon of coating, excluding water, stated in paragraphs 1., 2., 3., 4., 5., 6., 7., and 8. of this subsection; or
 - (ii) the application of low-solvent coating technology where the 24-hour weighted average of all coatings on a single coating line or operation meets the solids equivalent limit expressed in pounds VOC per gallon of coating solids stated in paragraphs 1., 2., 3., 4., 5., 6., and 8. of this subsection. Averaging across lines is not allowed; or
 - (iii) control equipment, including but not limited to incineration, carbon adsorption and condensation, with a capture system approved by the Director, provided that 90 percent of the nonmethane volatile organic compounds which enter the control equipment are recovered or destroyed, and that overall VOC emissions do not exceed the solids equivalent limit, expressed in pounds VOC per gallon of coating solids stated in paragraphs 1., 2., 3., 4., 5., 6., and 8. of this subsection; and
 - (iv) for motor vehicle plastic parts, compliance may be achieved only as stated in subparagraph 7. of this section. There is no solids equivalent limit for such coatings.
17. Definitions: For the purpose of this subsection, the following definitions apply:
 - (i) "2-pack coating" means a coating requiring the addition of a separate reactive resin, commonly known as a catalyst, before application to form an acceptable dry film. 2-pack coating may also be known as a "two-component coating".

- (ii) "Adhesion primer" means a coating that is applied to a polyolefin part to promote the adhesion of a subsequent coating. An adhesion primer is clearly identified as an adhesion primer or adhesion promoter on its accompanying material safety data sheet.
- (iii) "Air brush operations" means the application of a coating with a small, air-operated tool.
- (iv) "Air-dried coating" means a coating that is dried by the use of air or forced warm air at temperatures up to 194°F.
- (v) "Baked Coating" means a coating that is cured at a temperature at or above 90°C (194°F).
- (vi) "Base Coat" means an initial coat of paint, generally after a primer, that is applied for protection or as a background color.
- (vii) "Bedliner" means a multi-component coating, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to a cargo bed after the application of topcoat to provide additional durability and chip resistance.
- (viii) "Black coating" means a coating which meets both of the following criteria:
 - (1) maximum lightness: 23 units; and
 - (2) saturation: less than 2.8, where saturation equals the square root of $A^2 + B^2$. These criteria are based on Cielab color space, 0/45 geometry. For spherical geometry, specular included, maximum lightness is 33 units.
- (ix) "Business machine" means a device that uses electronic or mechanical methods to process information, perform calculations, print or copy information or convert sound into electrical impulses for transmission, including devices listed in standard industrial classification numbers 3572, 3573, 3579, and 3661 and photocopy machines, a subcategory of standard industrial classification number 3861.
- (x) "Cavity wax" means a coating, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied

into the cavities of the vehicle primarily for the purpose of enhancing corrosion protection.

- (xi) "Clear coating" means a coating which lacks color and opacity or is transparent and uses the undercoat as a reflectant base or undertone color;
- (xii) "Coating application system" means all operations and equipment which applies, conveys, and dries a surface coating including, but not limited to, spray booths, flow coaters, flashoff areas, air dryers and ovens.
- (xiii) "Coating of plastic parts of automobiles and trucks" means the coating of any plastic part that is or shall be assembled with other parts to form an automobile or truck.
- (xiv) "Coating of plastic parts of business machines" means the coating of any plastic part that is or shall be assembled with other parts to form a business machine.
- (xv) "Deadener" means a coating, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to selected vehicle surfaces primarily for the purpose of reducing the source of road noise in the passenger compartment.
- (xvi) "Electric dissipating coating" means a coating that rapidly dissipates a high-voltage electric charge.
- (xvii) "Electrostatic prep coat" means a coating that is applied to a plastic part solely to provide conductivity for the subsequent application of a primer, a topcoat, or other coating through the use of electrostatic application methods. An electrostatic prep coat is clearly identified as an electrostatic prep coat on its accompanying material safety data sheet.
- (xviii) "EMI/RFI shielding coating" means a coating used on plastic electronics enclosures to reduce or eliminate electromagnetic or radio frequency interference.
- (xix) "Extreme-performance coating" means a coating used on a plastic surface where the coated surface is, in its intended use, subject to the following:

- (a) chronic exposure to corrosive, caustic or acidic agents, chemicals, chemical fumes, chemical mixtures or solutions; or
 - (b) repeated exposure to temperatures in excess of 250°F; or
 - (c) repeated heavy abrasion, including mechanical wear and repeated scrubbing with industrial grade solvents, cleansers or scouring agents. Extreme-performance coatings include, but are not limited to, coatings applied to locomotives, railroad cars, farm machinery, and heavy duty trucks.
- (xx) "Flexible coating" means any coating including but not limited to primer, base coat, clear coat or topcoat that is required to comply with engineering specifications for impact resistance, mandrel bend, or elongation as defined by the original equipment manufacturer.
- (xxi) "Fog coat" means a coating that is applied to a plastic part for the purpose of color matching without masking a molded-in texture. A fog coat shall not be applied at a thickness of more than 0.5 mils of coating solids.
- (xxii) "Gasket/sealing material" means a fluid, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to coat a gasket or replace and perform the same function as a gasket. Automobile and light-duty truck gasket/gasket sealing material includes room temperature vulcanization (RTV) seal material.
- (xxiii) "Gloss reducer" means a coating that is applied to a plastic part solely to reduce the shine of the part. A gloss reducer shall not be applied at a thickness of more than 0.5 mils of coating solids.
- (xxiv) "Lubricating wax/compound" means a protective lubricating material, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to vehicle hubs and hinges.

- (xxv) "Metallic coating" means a coating which contains more than five grams of metal particles per liter of coating as applied. "Metal particles" are pieces of a pure elemental metal or combination of elemental metals.
- (xxvi) "Miscellaneous plastic parts and products" means surface coating of products manufactured by the following industrial source categories: large farm machinery, small farm machinery, small appliances, commercial machinery, industrial machinery, fabricated plastic products and any other industrial category which coats plastic parts or products under the Standard Industry Classification Code Major Groups 33, 34, 35, 36, 37, 38, 40, and 41. The miscellaneous plastic parts and products source category does not include:
- (I) automobiles and light-duty trucks;
 - (II) metal cans;
 - (III) flat metal sheets and strips in the form of rolls or coils;
 - (IV) magnet wire for use in electrical machinery;
 - (V) metal furniture;
 - (VI) large appliances;
 - (VII) aerospace manufacturing and rework operations;
 - (VIII) automobile refinishing;
 - (IX) customized top coating of automobiles and trucks, if production is less than 35 vehicles per day;
 - (X) exterior of marine vessels;
 - (XI) gel coats applied to fiber reinforced plastic (fiberglass composite) products removed from the mold or used as in-mold coatings in the production of fiberglass parts;
 - (XII) fiberglass boat manufacturing materials; and
 - (XIII) miscellaneous industrial adhesives.

- (xxvii) "Military specification coating" means a coating which has a formulation approved by a United States Military Agency for use on military equipment.
- (xxviii) "Mold-seal coating" means the initial coating applied to a new mold or a repaired mold to provide a smooth surface which, when coated with a mold release coating, prevents products from sticking to the mold.
- (xxix) "Multi-colored coating" means a coating which exhibits more than one color when applied and is packaged in a single container and applied in a single coat.
- (xxx) "Multi-component coating" means a coating requiring the addition of a separate reactive resin, commonly known as a catalyst or hardener, before application to form an acceptable dry film.
- (xxxi) "Non-flexible Coating" means any coating that does not meet the definition of "flexible coating" as specified in this subsection.
- (xxxii) "One-component coating" or "1-pack coating" means a coating that is ready for application as it comes out of its container to form an acceptable dry film. A thinner, necessary to reduce the viscosity, is not considered a component.
- (xxxiii) "Optical coating" means a coating applied to an optical lens.
- (xxxiv) "Primer" means the first layer and any subsequent layers of identically-formulated coating applied to the surface of a plastic part or product. Primers are typically used for corrosion prevention, protection from the environment, functional fluid resistance, and adhesion of subsequent coatings.
- (xxxv) "Red coating" means a coating which meets all of the following criteria:
 - (I) Yellow limit: the hue of hostaperm scarlet.
 - (II) Blue limit: the hue of monastrel red-violet.

- (III) Lightness limit for metallics: 35 percent aluminum flake.
 - (IV) Lightness limit for solids: 50 percent titanium dioxide white.
 - (V) Solid reds: hue angle of -11 to 38 degrees and maximum lightness of 23 to 45 units.
 - (VI) Metallic reds: hue angle of -16 to 35 degrees and maximum lightness of 28 to 45 units.
 - (VII) These criteria are based on Cielab color space, 0/45 geometry. For spherical geometry, specular included, the upper limit is 49 units. The maximum lightness varies as the hue moves from violet to orange. This is a natural consequence of the strength of the colorants, and real colors show this effect.
-
- (xxxvi) "Sealer" means a high viscosity material, used at a facility that is not an automobile or light-duty truck assembly coating facility, that is generally, but not always, applied in the paint shop after the body has received an electrodeposition primer coating and before the application of subsequent coatings (e.g., primer-surfacer). The primary purpose of automobile and light-duty truck sealer is to fill body joints completely so that there is no intrusion of water, gases or corrosive materials into the passenger area of the body compartment. Such materials are also referred to as sealant, sealant primer, or caulk.
 - (xxxvii) "Repair coating" means a coating used to re-coat portions of a previously coated product which has sustained mechanical damage to the coating following normal coating operations.
 - (xxxviii) "Resist coat" means a coating that is applied to a plastic part before metallic plating to prevent deposits of metal on portions of the plastic part.
 - (xxxix) "Shock-free coating" means a coating applied to electrical components to protect the user from electric shock. The coating has characteristics of being of low capacitance, high

resistance, and having resistance to breaking down under high voltage.

- (xl) "Stencil coating" means an ink or a pigmented coating which is rolled or brushed onto a template or stamp in order to add identifying letters, symbols and/or numbers.
- (xli) "Texture coating" means a coating that is applied to a plastic part which, in its finished form, consists of discrete raised spots of the coating.
- (xlii) "Topcoat" means any final coating applied to a plastic part or product.
- (xliii) "Touch-up coating" means a coating used to cover minor coating imperfections appearing after the main coating operation.
- (xliv) "Translucent coating" means a coating which contains binders and pigment and is formulated to form a colored, but no opaque, film.
- (xlv) "Transfer efficiency" means the weight (or volume) of coating solids adhering to the surface being coated divided by the total weight (or volume) of coating solids delivered to the applicator.
- (xlvi) "Trunk interior coating" means a coating, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to the trunk interior to provide chip protection.
- (xlvii) "Underbody coating" means a coating, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to the undercarriage or firewall to prevent corrosion and/or provide chip protection.
- (xlviii) "Vacuum-metalizing coating" means the undercoat applied to the substrate on which the metal is deposited or the overcoat applied directly to the metal film. Vacuum metalizing/physical vapor deposition (PVD) is the process whereby metal is vaporized and deposited on a substrate in a vacuum chamber.

18. Applicability: On and after January 1, 2015, the requirements of this subparagraph (vvv) shall apply to facilities at which the potential emissions of volatile organic compounds from all surface coating of miscellaneous plastic parts and products categories covered in subparagraphs 1. through 8. of this subparagraph equal or exceed 10 tons per year and are located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton counties. Any physical or operational changes that are necessary to comply with the provisions specified in this subparagraph are subject to the compliance schedule specified in subparagraph 20. Prior to January 1, 2015, such facilities shall comply with the provisions of subparagraph 391-3-1-.02(2)(tt), if applicable.
19. Applicability: The requirements of this Subparagraph (vvv) will no longer be applicable by the compliance deadlines if the counties specified in subparagraph 18. are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of this Subparagraph (vvv) will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.
20. Compliance Schedule:
 - (i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than **July 1, 2014**.
 - (ii) On-site construction of emission control systems and/or modification of process or coatings must be completed by **November 1, 2014**.
 - (iii) Full compliance with the applicable requirements specified this subparagraph (vvv) must be completed before **January 1, 2015**.

(www) **Sewage Sludge Incineration Units.**

1. The provisions of this subparagraph apply to each sewage sludge incineration (SSI) unit that is located at a wastewater treatment facility and that commenced construction on or before October 14, 2010 (hereinafter referred to as "existing SSI unit"). Physical or operational changes made at an existing SSI unit solely to comply with this

subparagraph are not considered construction, reconstruction, or modification and would not subject an existing SSI unit to the requirements of 40 CFR Part 60, Subpart LLLL, which contains the "Standards of Performance for Sewage Sludge Incineration Units for Which Construction is Commenced After October 14, 2010".

2. For the purposes of implementing the requirements and provisions of 40 CFR Part 60, Subpart MMMM (Emission Guidelines and Compliance Times for Existing Sewage Sludge Incineration Units), each existing SSI unit shall comply with the model rule standards, requirements, and provisions of 40 CFR Part 60, Subpart MMMM, as promulgated March 21, 2011, which are hereby incorporated and adopted by reference.
 - (i) For the purposes of implementing the requirements and provisions of 40 CFR Part 60, Subpart MMMM, the following provisions are hereby incorporated and adopted by reference. The emission limits and standards apply at all times and during periods of malfunction. The operating limits apply at all times that sewage sludge is in the combustion chamber.
 - (I) 40 CFR 60.5085 through 40 CFR 60.5125, Increments of Progress with the exception of 40 CFR 60.5090 and Table 1 which do not apply to an Existing SSI.
 - (II) 40 CFR 60.5130 through 40 CFR 60.5160, Operator Training and Qualification.
 - (III) 40 CFR 60.5240 and 60.5245, Title V Operating Permits.
 - (IV) 40 CFR Part 60, Subpart MMMM Tables 2 through 6 and 60.5181.
 - (ii) With the following exceptions:
 - (I) Emission Limits, Emission Standards, and Operating Limits and Requirements. In lieu of 40 CFR 60.5165 through 60.5180, Sections 2.130.2 through 2.130.4 of the Georgia Department of Natural Resources Procedures for Testing and Monitoring Sources of Air Pollutants shall apply to each existing SSI unit.
 - (II) Initial and Continuous Compliance Requirements. In lieu of 40 CFR 60.5185 through 60.5215, Sections 2.130.2 through 2.130.4 of the Georgia Department of Natural

Resources Procedures for Testing and Monitoring Sources of Air Pollutants shall apply to each existing SSI unit.

(III) Performance Testing, Monitoring, and Calibration Requirements. In lieu of 40 CFR 60.5220 through 60.5225, Sections 2.130.2 through 2.130.4 of the Georgia Department of Natural Resources Procedures for Testing and Monitoring Sources of Air Pollutants shall apply to each existing SSI unit.

(IV) Record keeping and Reporting Requirements. In lieu of 40 CFR 60.5230 and 60.5235, Sections 2.130.2 through 2.130.4 of the Georgia Department of Natural Resources Procedures for Testing and Monitoring Sources of Air Pollutants shall apply to each existing SSI unit.

3. In keeping with subparagraph 2., owners and operators of existing SSI units must comply with Georgia's state plan for existing SSI units, which is required by 40 CFR Part 60, Subpart M. The owner or operator of each existing SSI unit shall comply with the requirements of 391-3-1-.02(2)(www) 2. upon approval of Georgia's state plan for existing SSI units by EPA.
4. Each existing SSI unit is subject to the permitting requirements of [391-3-1-.03\(10\)](#) "Title V Operating Permits".
5. Definitions of all terms used but not defined in this subparagraph shall have the meaning given to them in 40 CFR Part 60, Subpart M, as promulgated on March 21, 2011. Terms not defined therein shall have the meaning given to them in the federal Clean Air Act or 40 CFR Part 60, Subparts A and B. For the purposes of this subsection the following definitions also apply:
 - (i) Except as noted, the word "Administrator" as used in regulations adopted by reference in this subparagraph shall mean the Director of the Georgia Environmental Protection Division. For subparagraph (www)6. the word "Administrator" shall mean the Administrator of the EPA.
 - (ii) The term "You" means the owner or operator of an affected sewage sludge incineration unit subject to this rule.

6. The owner of an existing SSI facility must contact EPA with respect to the following subparagraphs (i) through (vii) as specified in 40 CFR 60.5050.
 - (i) Approval of alternatives to the emission limits and standards in Tables 2 and 3 to 40 CFR Part 60, Subpart M and operating limits established under provisions of 40 CFR 60.5175 or 60.5190.
 - (ii) Approval of major alternatives to test methods.
 - (iii) Approval of major alternatives to monitoring.
 - (iv) Approval of major alternatives to recordkeeping and reporting.
 - (v) The requirements in provision 40 CFR 60.5175.
 - (vi) The requirements in provision 40 CFR 60.5155(b)(2).
 - (vii) Performance test and data reduction waivers under provision 40 CFR 60.8(b).

(xxx) **Reserved.**

(yyy) **VOC Emissions from the Use of Miscellaneous Industrial Adhesives.**

1. No person shall cause, let, permit, suffer or allow the emissions of VOC from the use of miscellaneous industrial adhesives with general adhesive application processes to exceed:
 - (i) 0.3 pounds per gallon of adhesive or adhesive primer, excluding water, when used with one of the following substrates: metal; wood.
 - (ii) 1.0 pounds per gallon of adhesive or adhesive primer, excluding water, when used with porous material (except wood) substrates.
 - (iii) 1.7 pounds per gallon of adhesive or adhesive primer, excluding water, when used with reinforced plastic composite substrates.
 - (iv) 2.1 pounds per gallon of adhesive or adhesive primer, excluding water, when used with flexible vinyl or rubber substrates.
 - (v) 2.1 pounds per gallon of adhesive or adhesive primer, excluding water, when used with a substrate not specified in paragraphs 1.(i) through 1.(iv).

2. No person shall cause, let, permit, suffer, or allow the emissions of VOC from the use of miscellaneous industrial adhesives with specialty adhesive application processes to exceed:
 - (i) 0.8 pounds per gallon of adhesive or adhesive primer, excluding water, when used with one of the following: structural glazing; tire repair.
 - (ii) 1.1 pounds per gallon of adhesive or adhesive primer, excluding water, when used in ceramic tile installation.
 - (iii) 1.3 pounds per gallon of adhesive or adhesive primer, excluding water, when used with one of the following: cove base installation; indoor floor covering installation.
 - (iv) 1.4 pounds per gallon of adhesive or adhesive primer, excluding water, when used with waterproof resorcinol glue.
 - (v) 1.7 pounds per gallon of adhesive or adhesive primer, excluding water, when used with multipurpose construction.
 - (vi) 2.1 pounds per gallon of adhesive or adhesive primer, excluding water, when used with one of the following: contact bond adhesive; outdoor floor covering installation; motor vehicle adhesive; single-ply roof membrane installation/repair (except ethylene propylenediene monomer (EPDM) roof membrane installation/repair).
 - (vii) 3.3 pounds per gallon of adhesive or adhesive primer, excluding water, when used with plastic solvent welding (containing acrylonitrile-butadiene-styrene or ABS).
 - (viii) 4.2 pounds per gallon of adhesive or adhesive primer, excluding water, when used with plastic solvent welding (except ABS).
 - (ix) 5.5 pounds per gallon of adhesive or adhesive primer, excluding water, when used with perimeter-bonded sheet vinyl (floor covering installation).
 - (x) 6.3 pounds per gallon of adhesive or adhesive primer, excluding water, when used with motor vehicle weatherstrip adhesive.
 - (xi) 6.5 pounds per gallon of adhesive or adhesive primer, excluding water, when used with thin metal laminating.

- (xii) 7.1 pounds per gallon of adhesive or adhesive primer, excluding water, when used with one of the following: metal to urethane/rubber molding or casting; sheet rubber lining installation.
3. No person shall cause, let, permit, suffer, or allow the emissions of VOC from the use of miscellaneous industrial adhesives with adhesive primer application processes to exceed:
- (i) 7.5 pounds per gallon of adhesive or adhesive primer, excluding water, when used as motor vehicle glass bonding primer.
 - (ii) 5.4 pounds per gallon of adhesive or adhesive primer, excluding water, when used as a plastic solvent welding adhesive primer.
 - (iii) 2.1 pounds per gallon of adhesive or adhesive primer, excluding water, when used as an adhesive primer for an application process not specified in paragraphs 3.(i) through 3.(ii).
4. All volatile organic compounds containing materials applied by each miscellaneous industrial adhesive application process shall be used in one of the following application methods in conjunction with using low volatile organic compound adhesives or adhesive primers:
- (i) Electrostatic spray;
 - (ii) High Volume-Low Pressure (HVLP) spray;
 - (iii) Flow coat;
 - (iv) Roll coat or hand application, including non-spray application methods similar to hand or mechanically-powered caulking gun, brush, or direct hand application;
 - (v) Dip coat (including electrodeposition);
 - (vi) Airless spray;
 - (vii) Air-assisted airless spray; or
 - (viii) Other adhesive application method capable of achieving a transfer efficiency equivalent to or better than achieved by HVLP spraying.

5. The VOC emission limits and the recommended application methods of this subsection do not apply to the following adhesives and adhesives primer application processes:
 - (i) Adhesives or adhesive primers being tested or evaluated in any research and development, quality assurance, or analytical laboratory.
 - (ii) Adhesives or adhesive primers used in the assembly, repair, or manufacture of aerospace or undersea-based weapon systems.
 - (iii) Adhesives or adhesive primers used in medical equipment manufacturing operations.
 - (iv) Cyanoacrylate adhesive application processes.
 - (v) Aerosol adhesive and aerosol adhesive primer application processes.
 - (vi) Processes using polyester bonding putties to assemble fiberglass parts at fiberglass boat manufacturing facilities and at other reinforced plastic composite manufacturing facilities.
 - (vii) Processes using adhesives and adhesive primers that are supplied to the manufacturer in containers with a net volume of 16 ounces or less, or a net weight of one pound or less,

The recommended work practice standards specified in this subsection still apply.

6. The emission limits in this subsection shall be achieved by the application of adhesive or adhesive primer where each and every adhesive meets the limit expressed in pounds VOC per gallon of coating, excluding water, stated in paragraphs 1., 2., and 3. of this subsection; or
7. Any miscellaneous industrial adhesive application process subject to this subsection, which chooses to use control equipment for adhesive application processes rather than to comply with the emission limits and requirements established in paragraphs 1., 2., 3., and 4. of this subsection, shall install control equipment with an overall control efficiency of at least 85 percent or use a combination of adhesives and add-on control equipment on an application process to meet limits established in paragraph 1. of this subsection.

8. If an adhesive is used to bond dissimilar substrates together in general adhesive application processes, then the applicable substrate category with the highest volatile organic compounds emission limit shall be established as the limit for such application.
9. For the purpose of this subsection; the following definitions apply:
 - (i) "Acrylonitrile-butadiene-styrene" or "ABS welding" means any process to weld acrylonitrile-butadiene-styrene pipe.
 - (ii) "Adhesive" means any chemical substance that is applied for the purpose of bonding two surfaces together other than by mechanical means.
 - (iii) "Adhesive primer" means any product intended by the manufacturer for application to a substrate, prior to the application of an adhesive, to provide a bonding surface.
 - (iv) "Adhesive primer application process" means any one of the following: motor vehicle glass bonding primer; plastic solvent welding adhesive primer; single-ply roof membrane adhesive primer; other adhesive primer.
 - (v) "Aerosol adhesive" means an adhesive or adhesive primer packaged as an aerosol product in which the spray mechanism is permanently housed in a non-refillable can designed for handheld application without the need for ancillary hoses or spray equipment.
 - (vi) "Air-assisted airless spray" means a system that consists of an airless spray gun with a compressed air jet at the gun tip to atomize the adhesive.
 - (vii) "Airless spray" means the application of an adhesive through an atomizing nozzle at high pressure (1,000 to 6,000 pounds per square inch) by a pump force.
 - (viii) "Ceramic tile installation adhesive" means any adhesive intended by the manufacturer for use in the installation of ceramic tiles.
 - (xi) "Contact bond adhesive" means an adhesive that:
 - (1) is designed for application to both surfaces to be bonded together,

- (2) is allowed to dry before the two surfaces are placed in contact with each other,
 - (3) forms an immediate bond that is impossible, or difficult, to reposition after both adhesive-coated surfaces are placed in contact with each other, and
 - (4) does not need sustained pressure or clamping of surfaces after the adhesive-coated surfaces have been brought together using sufficient momentary pressure to establish full contact between both surfaces. Contact bond adhesive also does not include rubber cements that are primarily intended for use on paper substrates. Contact bond adhesive also does not include vulcanizing fluids that are designed and labeled for tire repair only.
-
- (xii) "Cove base" means a flooring trim unit, generally made of vinyl or rubber, having a concave radius on one edge and a convex radius on the opposite edge that is used in forming a junction between the bottom wall course and the floor or to form an inside corner.
 - (xiii) "Cove base installation adhesive" means any adhesive intended by the manufacturer to be used for the installation of cove base or wall base on a wall or vertical surface at floor level.
 - (xiv) "Cyanoacrylate adhesive" means any adhesive with a cyanoacrylate content of at least 95 percent by weight.
 - (xv) "Dip coating" means application where substrates are dipped into a tank containing the adhesive. The substrates are then withdrawn from the tank and any excess adhesive is allowed to drain.
 - (xvii) "Electrostatic spray" means application where the adhesive and substrate are oppositely charged.
 - (xviii) "EPDM roof membrane" means a prefabricated single sheet of elastomeric material composed of ethylene propylenediene monomer (EPDM) and that is field applied to a building roof using one layer or membrane material.

- (xix) "Flexible vinyl" means non-rigid polyvinyl chloride plastic with a 5 percent by weight plasticizer content.
- (xx) "Flow coating" means conveying the substrate over an enclosed sink where the adhesive is applied at low pressure as the item passes under a series of nozzles.
- (xxi) "General adhesive application processes" means the use of adhesive on any one of the following substrates: reinforced plastic composite; flexible vinyl; metal; porous material (except wood); rubber; wood; other substrates.
- (xxii) "HVLP" means a system with specialized nozzles that provide better air and fluid flow at lower air pressure, shape spray pattern, and guide high volumes of atomized adhesive particles to the substrate using lower air pressure (10 pounds per square inch or less at the spray cap).
- (xxiii) "Indoor floor covering installation adhesive" means any adhesive intended by the manufacturer for use in the installation of wood flooring, carpet, resilient tile, vinyl tile, vinyl backed carpet, resilient sheet and roll or artificial grass. Adhesives used to install ceramic tile and perimeter bonded sheet flooring with vinyl backing onto a non-porous substrate, such as flexible vinyl, are excluded from this category.
- (xxv) "Metal to urethane/rubber molding or casting adhesive" means any adhesive intended by the manufacturer to bond metal to high density or elastomeric urethane or molded rubber materials, in heater molding or casting processes, to fabricate products such as rollers for computer printers or other paper handling equipment.
- (xxvi) "Miscellaneous industrial adhesive application" means an application process which consists of a series of one or more adhesive applicators and any associated drying area and/or oven wherein an adhesive is applied, dried, and/or cured. An application process ends at the point where the adhesive is dried or cured, or prior to any subsequent application of a different adhesive. It is not necessary for an application process to have an oven or flash-off area.
- (xxvii) "Motor vehicle adhesive" means an adhesive, including glass bonding adhesive, used at a facility that is not an automobile

or light-duty truck assembly coating facility, applied for the purpose of bonding tow vehicle surfaces together without regard to the substrates involved.

- (xxviii) "Motor vehicle glass bonding primer" means a primer, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to a windshield or other glass, or to body openings, to prepare the glass or body opening for the application of glass bonding adhesives or the installation of adhesive bonded glass. Motor vehicle glass bonding primer includes glass bonding/cleaning primers that perform both functions (cleaning and priming of the windshield or other glass, or body openings) prior to the application of adhesive or the installation of adhesive bonded glass.
- (xxix) "Motor vehicle weatherstrip adhesive" means an adhesive, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to weatherstripping materials for the purpose of bonding the weatherstrip material to the surface of the vehicle.
- (xxx) "Multipurpose construction adhesive" means any adhesive intended by the manufacturer for use in the installation or repair of various construction materials, including but not limited to drywall, subfloor, panel, fiberglass reinforced plastic (FRP), ceiling tile and acoustical tile.
- (xxxii) "Outdoor floor covering installation adhesive" means any adhesive intended by the manufacturer for use in the installation of floor covering that is not in an enclosure and that is exposed to ambient weather conditions during normal use.
- (xxxiii) "Panel installation" means the installation of plywood, pre-decorated hardboard (or tileboard), fiberglass reinforced plastic, and similar pre-decorated or non-decorated panels to studs or solid surfaces using an adhesive formulated for that purpose.
- (xxxiiii) "Perimeter bonded sheet vinyl installation" means the installation of sheet flooring with vinyl backing onto a nonporous substrate using an adhesive designed to be applied only to a strip of up to four inches wide around the perimeter of the sheet flooring.

- (xxxiv) "Plastic solvent welding adhesive" means any adhesive intended by the manufacturer for use to dissolve the surface of plastic to form a bond between mating surfaces.
- (xxxv) "Plastic solvent welding adhesive primer" means any primer intended by the manufacturer for use to prepare plastic substrates prior to bonding or welding.
- (xxvi) "Plastics" means synthetic materials chemically formed by the polymerization of organic (carbon-based) substances. Plastics are usually compounded with modifiers, extenders, and/or reinforcers and are capable of being molded, extruded, cast into various shapes and films, or drawn into filaments.
- (xxxvii) "Porous material" means a substance that has tiny openings, often microscopic, in which fluids may be absorbed or discharged, including, but not limited to, paper and corrugated paperboard. For the purpose of this section, porous material does not include wood.
- (xl) "Reinforced plastic composite" means a composite material consisting of plastic reinforced with fibers.
- (xli) "Roll coating", "brush coating", and "hand application" means application of high viscosity adhesives onto small surface area.
- (xlii) "Rubber" means any natural or manmade rubber substrate, including but not limited to, styrene-butadiene rubber, polychloroprene (neoprene), butyl rubber, nitrile rubber, chlorosulfonated polyethylene and ethylene propylene diene terpolymer.
- (xliii) "Sheet rubber lining installation" means the process of applying sheet rubber liners by hand to metal or plastic substrates to protect the underlying substrate from corrosion or abrasion. These operations also include laminating sheet rubber to fabric by hand.
- (xliv) "Single-ply roof membrane" means a prefabricated single sheet or rubber, normally ethylene-propylenediene terpolymer, that is field applied to a building roof using one layer of membrane material. For the purposes of this section, single-ply roof membrane does not include membranes prefabricated from ethylene-propylenediene monomer (EPDM).

- (xlv) "Single-ply roof membrane installation and repair adhesive" means any adhesive labeled for use in the installation or repair of single-ply roof membrane. Installation includes, as a minimum, attaching the edge of the membrane to the edge of the roof and applying flashings to vents, pipes and ducts that protrude through the membrane. Repair includes gluing the edges of torn membrane together, attaching a patch over a hole and reapplying flashings to vents, pipes or ducts installed through the membrane.
- (xlvi) "Single-ply roof membrane adhesive primer" means any primer labeled for use to clean and promote adhesion of the single-ply roof membrane seams or splices prior to bonding.
- (xlvii) "Specialty adhesive application processes" means any one of the following: ceramic tile installation; contact bond adhesive; cove base installation; floor covering installation (indoor); floor covering installation (outdoor); floor covering installation (perimeter bonded sheet vinyl); metal to urethane/rubber molding or casting; motor vehicle adhesive; motor vehicle weatherstrip adhesive; multipurpose construction; plastic solvent welding (ABS); plastic solvent welding (except ABS); sheet rubber lining installation; single-ply roof membrane installation/repair (except EPDM); structural glazing; thin metal laminating; tire repair; and waterproof resorcinol glue.
- (xlviii) "Structural glazing" means a process that includes the application of adhesive to bond glass, ceramic, metal, stone or composite panels to exterior building frames.
- (xlix) "Thin metal laminating adhesive" means any adhesive intended by the manufacturer for use in bonding multiple layers of metal to metal or metal to plastic in the production of electronic or magnetic components in which the thickness of the bond line(s) is less than 0.25 millimeters.
- (l) "Tire repair" means a process that includes expanding a hole, tear, fissure or blemish in a tire casing by grinding or gouging, applying adhesive and filling the hole or crevice with rubber.
- (li) "Waterproof resorcinol glue" means a 2-part resorcinol-resin-based adhesive designed for applications where the bond line must be resistant to conditions of continuous immersion in fresh or salt water.

10. Applicability: On and after January 1, 2015, the requirements of this Subparagraph (yyy) shall apply:
- (i) to facilities at which the actual emissions of volatile organic compounds from all miscellaneous industrial adhesive application processes at a facility equal or exceed 2.7 tons per 12-month rolling period for facilities located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton counties;
 - (ii) the facility is not subject to Georgia Rules 391-3-1-.02(2)(t), (u), (v), (w), (x), (y), (z), (jj), (ll), (mm), (ddd), or (kkk); and
 - (iii) any physical or operational changes that are necessary to comply with the provisions specified in this subparagraph are subject to the compliance schedule specified in Subparagraph 12.

Prior to January 1, 2015, facilities that meet the applicability provisions of subparagraphs 10.(i) and (ii) shall comply with the provisions of Subparagraph 391-3-1-.02(2)(tt), if applicable.

11. Applicability: The requirements of this Subparagraph (yyy) will no longer be applicable by the compliance deadlines if the counties specified in subparagraph 10. are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of this Subparagraph (yyy) will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.
12. Compliance Schedule:
- (i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than **July 1, 2014**.
 - (ii) On-site of construction of emission control systems and/or modification of process or coatings must be completed by **November 1, 2014**.

- (iii) Full compliance with the applicable requirements specified in this Subparagraph (yyy) must be completed before **January 1, 2015**.

(zzz) VOC Emissions from the Fiberglass Boat Manufacturing.

1. No person shall cause, let, permit, suffer or allow the emissions of monomer VOC from open molding resin and gel coat operations to exceed the limit specified by Equation 1 of this section, based on a 12-month rolling average.

Equation 1:

$$\text{Monomer VOC Limit} = 46(M_R) + 159(M_{PG}) + 291(M_{CG}) + 54(M_{TR}) + 214(M_{TG})$$

where:

Monomer VOC Limit = total allowable monomer VOC that can be emitted from the open molding operations included in the average, kilograms per 12 consecutive-month period.

M_R = mass of production resin used in the previous 12 consecutive months, excluding any materials that are exempt (megagrams).

M_{PG} = mass of pigmented gel coat used in the previous 12 consecutive months, excluding any materials that are exempt (megagrams).

M_{CG} = mass of clear gel coat used in the previous 12 consecutive months, excluding any materials that are exempt (megagrams).

M_{TR} = mass of tooling resin used in the previous 12 consecutive months, excluding any materials that are exempt (megagrams).

M_{TG} = mass of tooling gel coat used in the previous 12 consecutive months, excluding any materials that are exempt (megagrams).

2. The emission limit specified by Equation 1 of this subsection shall be achieved by one or more of the options listed in paragraphs 2.(i) through 2.(iii) of this subsection:
- (i) Emissions averaging option: Demonstrate that emissions from the open molding resin and gel coat operations included in the average meet the emission limit specified by Equation 1 of this subsection

using the procedures described in subparagraph 3. of this subsection.

- (I) Compliance with this option is based on a 12-month rolling average; and
 - (II) Those operations and materials not included in the emissions average must comply with either paragraph 2.(ii) or 2.(iii) of this subsection.
- (ii) Compliant materials option: Demonstrate compliance by using resins and gel coats that meet the monomer VOC content requirements specified in subparagraph 4. of this subsection.
- (I) Compliance with this option is based on a 12-month rolling average.
- (iii) Add-on control option: Use an enclosure and add-on control device, and demonstrate that the resulting emissions meet the emission limit specified by Equation 1 of this subsection.
- (I) Compliance with this option is based on control device performance testing and control device monitoring.

3. Emissions Averaging Option:

- (i) Compliance using this option is demonstrated on a 12-month rolling average basis and is determined at the end of every month (12 times per year).
- (ii) At the end of the first twelfth month after initial operation and at the end of every subsequent month, use Equation 2 of this subsection to demonstrate that the monomer VOC emissions from those operations included in the average do not exceed the emission limit specified by Equation 1 of this subsection for the same 12-month period. (Include terms in Equation 1 and Equation 2 of this subsection only for those operations and materials included in the average.)

Equation 2:

Monomer VOC emissions =

$$(PV_R)(M_R) + (PV_{PG})(M_{PG}) + (PV_{CG})(M_{CG}) + (PV_{TR})(M_{TR}) + (PV_{TG})(M_{TG})$$

where:

Monomer VOC emissions = Monomer VOC emissions calculated using the monomer VOC emission equations for each operation included in the average (kilograms).

PV_R = Weighted-average monomer VOC emission rate for production resin used in the past 12 months (kilograms per megagram).

M_R = Mass of production resin used in the past 12 months (megagrams).

PV_{PG} = Weighted-average monomer VOC emission rate for pigmented gel coat used in the past 12 months (kilograms per megagram).

M_{PG} = Mass of pigmented gel coat used in the past 12 months (megagrams).

PV_{CG} = Weighted-average monomer VOC emission rate for clear gel coat used in the past 12 months (kilograms per megagram).

M_{CG} = Mass of clear gel coat used in the past 12 months (megagrams).

PV_{TR} = Weighted-average monomer VOC emission rate for tooling resin used in the past 12 months (kilograms per megagram).

M_{TR} = Mass of tooling resin used in the past 12 months (megagrams).

PV_{TG} = Weighted-average monomer VOC emission rate for tooling gel coat used in the past 12 months (kilograms per megagram).

M_{TG} = Mass of tooling gel coat used in the past 12 months (megagrams).

- (iii) At the end of every calendar month, use Equation 3 of this subsection to compute the weighted average monomer VOC emission rate for each open molding resin and gel coat operation included in the average:

Equation 3:

$$PV_{OP} = \left[\frac{\sum_{i=1}^n [(M_i)(PV_i)]}{\sum (M_i)} \right]$$

where:

PV_{OP} = Weighted-average monomer VOC emission rate for each open molding operation (PV_R , PV_{PG} , PV_{CG} , PV_{TR} , PV_{TG}) included in the average, kilograms of monomer VOC per megagram of material applied.

M_i = Mass of resin or gel coat used within an operation in the past 12 months, megagrams.

n = Number of different open molding resins and gel coats used within an operation in the past 12 months.

PV_i = The monomer VOC emission rate for resin or gel coat used within an operation in the past 12 months, kilograms of monomer VOC per megagram of material applied.

- (iv) The monomer VOC emission rate (PV_i) from the atomization of production resin or tooling resin is computed by the following equation:

$$\left[(0.014)(\text{Resin VOC}\%^{2.425}) \right]$$

- (v) The monomer VOC emission rate (PV_i) from the atomization plus vacuum bagging with roll-out of production resin or tooling resin is computed by the following equation:

$$\left[(0.01185)(\text{Resin VOC}\%^{2.425}) \right]$$

- (vi) The monomer VOC emission rate (PV_i) from the atomization plus vacuum bagging without roll-out of production resin or tooling resin is computed by the following equation:

$$\left[(0.00945) (\text{Resin VOC}\%^{2.425}) \right]$$

- (vii) The monomer VOC emission rate (PV_i) from the non-atomization of production resin or tooling resin is computed by the following equation:

$$\left[(0.014) (\text{Resin VOC}\%^{2.275}) \right]$$

- (viii) The monomer VOC emission rate (PV_i) from the non-atomization plus vacuum bagging with roll-out of production resin or tooling resin is computed by the following equation:

$$\left[(0.0110) (\text{Resin VOC}\%^{2.275}) \right]$$

- (ix) The monomer VOC emission rate (PV_i) from the non-atomization plus vacuum bagging without roll-out of production resin or tooling resin is computed by the following equation:

$$\left[(0.0076) (\text{Resin VOC}\%^{2.275}) \right]$$

- (x) The monomer VOC emission rate (PV_i) from the application of any pigmented gel coat, clear gel coat or tooling gel coat is computed by the following equation:

$$\left[(0.445) (\text{Gel Coat VOC}\%^{1.675}) \right]$$

4. Compliant Coating Option: For each open molding operation complying using the compliant materials option:

- (i) The monomer VOC content requirements are specified in paragraphs 4.(i)(I) through 4.(i)(VII).
- (I) The weighted-average monomer VOC content requirement for spray atomized production resin operations is 28 percent (weight percent).
- (II) The weighted-average monomer VOC content requirement for nonatomized production resin operations is 35 percent (weight percent).

- (III) The weighted-average monomer VOC content requirement for pigmented gel coat operations applied using any method is 33 percent (weight percent).
 - (IV) The weighted-average monomer VOC content requirement for clear coat gel operations using any method is 48 percent (weight percent).
 - (V) The weighted-average monomer VOC content requirement for atomized tool resin operations is 30 percent (weight percent).
 - (VI) The weighted-average monomer VOC content requirement for nonatomized tooling resin operations is 39 percent (weight percent).
 - (VII) The weighted-average monomer VOC content requirement for tooling gel coat operations applied using any method is 40 percent (weight percent).
- (ii) Compliance using the monomer VOC content requirements listed in paragraph 4.(i)(I) through 4.(i)(VII) is based on a 12-month rolling average that is calculated at the end of every month.
 - (iii) At the end of the first twelfth month and at the end of every subsequent month, if all resins and gel coats used in an operation have monomer VOC contents no greater than the applicable monomer VOC content limits specified in paragraph 4.(i)(I) through 4.(i)(VII), then:
 - (I) Compliance with the emission limit specified by Equation 1 of this subsection for the particular operation is achieved; and
 - (II) There is no need to complete the calculations required by paragraph 4.(iv) for that operation.
 - (iv) If compliance as specified in subparagraph 4.(iii) is not achieved, calculate the weighted-average monomer VOC content for all resins and gel coats [excluding filled resins] used in the previous 12 months at the end of every month using Equation 4:

Equation 4:

Weighted-Average Monomer VOC Content (%) =

$$\left[\frac{\sum_{i=1}^n [(M_i)(VOC_i)]}{n} \right]$$

where:

M_i = Mass of open molding resin or gel coat used in the past 12 months in an operation (megagrams).

VOC_i = Monomer VOC content, by weight percent, of open molding resin or gel coat used in the past 12 months in an operation.

n = Number of different open molding resins or gel coats used in the past 12 months in an operation.

- (v) The monomer VOC emissions from the use of filled production resins and filled tooling resins shall be calculated using Equation 5:

(I) Equation 5:

$$(PV_F) = (PV_U) \left[\frac{(100 - \% \text{ Filler})}{100} \right]$$

where:

PV_F = The as-applied monomer VOC emission rate for the filled production resin or tooling resin (kilograms monomer VOC per megagram of filled material).

PV_U = The monomer VOC emission rate for the neat (unfilled) resin, before filler is added, as calculated using paragraphs 3.(iv) through 3.(x), whichever is applicable.

% Filler = The weight-percent of filler in the as-applied filled resin system.

- (II) The value of PV_F calculated by Equation 5 shall not exceed 46 kilograms of monomer VOC per megagram of filled resin, as applied, if the filled resin used is a production resin.
 - (III) The value of PV_F calculated by Equation 5 shall not exceed 54 kilograms of monomer VOC per megagram of filled resin, as applied, if the filled resin used is a tooling resin.
 - (IV) The facility shall use the value of PV_F calculated using Equation 5 if the facility is including a filled resin in Equation 3 of this subsection.
5. Add-On Control Option: If product performance requirements or other needs dictate the use of higher monomer VOC materials than those that would meet the recommended emission limits specified in subparagraph 4. of this subsection, a fiberglass boat manufacturing facility shall:
- (i) Install and operate a thermal oxidizer as an add-on control device and meet the operating limits specified in Table 4 of 40 CFR Part 63 Subpart VVV, as amended, that apply to the emission capture system and thermal oxidizer.
 - (ii) Use of an add-on control device other than a thermal oxidizer, or monitoring an alternative parameter and complying with a different operating limit must be approved by the Director.
6. The non-monomer VOC content of filled resins shall not exceed 5 percent (weight percent) for all resins and gel coats included in VOC limits described in paragraphs 1. through 5. of this subsection.
7. All resin and gel coat mixing containers with a capacity equal to or greater than 55 gallons, including those used for on-site mixing of putties and polyputties, shall have a cover with no visible gaps in place at all times except during the following operations:
- (i) When mixing is being manually added to or removed from a container; and
 - (ii) When mixing or pumping equipment is being placed or removed from a container.

8. The VOC content of cleaning solvents for routine application equipment cleaning shall not contain in excess of 5 percent VOC by weight.
9. For the purpose of this subsection, the definitions specified in 40 CFR Part 63.5779, as amended, are hereby incorporated and adopted by reference with the following additions:
 - (i) "Fiberglass boat manufacturing" means a facility that manufacturers hulls or decks of boats and related parts, builds molds to make fiberglass boat hulls or decks and related parts from fiberglass, or makes polyester resin putties for assembling fiberglass parts. For purposes of this subsection, fiberglass boat manufacturing does not include facilities that manufacture solely parts of boats (such as hatches, seats, or lockers), or boat trailers, but not manufacture hulls or decks of boats from fiberglass, or build molds to make fiberglass boat hulls or decks. If a facility manufactures hulls or decks, or molds for hulls or decks, then the manufacture of all other fiberglass boat parts, including small parts such as hatches, seats, and lockers is also covered.
 - (ii) "Monomer" means a volatile organic compound that partly combines with itself, or other similar compounds, by a cross-linking reaction to become a part of the cured resin.
10. Applicability: On and after January 1, 2015, the requirements of this subparagraph (zzz) shall apply to facilities at which the actual emissions of volatile organic compounds from all non-exempt fiberglass boat manufacturing processes at a facility equal or exceed 2.7 tons per 12-month rolling period for facilities located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton counties. Any physical or operational changes that are necessary to comply with the provisions specified in this subparagraph are subject to the compliance schedule specified in subparagraph 12. Prior to January 1, 2015, such facilities shall comply with the provisions of subparagraph 391-3-1-.02(2)(tt), if applicable.
11. Applicability: The requirements of this Subparagraph (zzz) will no longer be applicable by the compliance deadlines if the counties specified in subparagraph 10. are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of this Subparagraph (zzz) will only be reinstated if the Director determines that

the measure is necessary to meet the requirements of the contingency plan.

12. Compliance Schedule:
 - (i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than **July 1, 2014**.
 - (ii) On-site of construction of emission control systems and/or modification of process or coatings must be completed by **November 1, 2014**.
 - (iii) Full compliance with the applicable requirements specified Subparagraph (zzz) must be completed before **January 1, 2015**.
13. Applicability: The requirements of this subsection apply to the following operations at a fiberglass boat manufacturer:
 - (i) open molding and gel coat operations (including pigmented gel coat, clear gel coat, production resin, tooling gel coat, and tooling resin);
 - (ii) resins and gel coat mixing operations; and
 - (iii) resins and gel coat application equipment cleaning operations.
14. Applicability: The requirements of this subsection do not apply to the following operations at a fiberglass boat manufacturer:
 - (i) Surface coating applied to fiberglass boats;
 - (ii) Surface coating for fiberglass and metal recreational boats (pleasure craft); and
 - (iii) industrial adhesives used in the assembly of fiberglass boats.
15. Exemptions: The following activities are exempt from the open molding emission limit specified in subparagraph 1. of this subsection:
 - (i) Production resins (including skin coat resins) that shall meet specifications for use in military vessels or shall be approved by the U.S. Coast Guard for use in the construction of lifeboats, rescue boats, and other life saving appliances approved under 46 CFR Subchapter Q, or the construction of small passenger vessels

regulated by 46 CFR Subchapter T. Production resins for which this exemption is used must be applied with nonatomizing (non-spray) resin application equipment. You must keep a record of the resins for which you are using this exemption.

- (ii) Pigmented, clear, and tooling gel coat used for part or mold repair and touch up. The total gel coat materials included in this exemption must not exceed 1 percent by weight of all gel coat used at the facility on a 12-month rolling average basis. You must keep a record of the amount of gel coats used per month for which you are using this exemption and copies of calculations showing that the exempt amount does not exceed 1 percent of all gel coat used.
- (iii) Pure, 100 percent vinylester resin used for skin coats. This exemption does not apply to blends of vinylester and polyester resins used for skin coats. The total resin materials included in the exemption cannot exceed 5 percent by weight of all resin used at the facility on a 12-month rolling-average basis. You must keep a record of the amount of 100 percent vinylester skin coat resin used per month that is eligible for this exemption and copies of calculations showing that the exempt amount does not exceed 5 percent of all resin used.

(aaaa) **Industrial Cleaning Solvents.**

1. No person shall cause, suffer, allow, or permit the use of organic solvents for cleaning operations such as mixing vessels (tanks), spray booths, parts drums or for other cleaning activities performed for the removal of material from substrate including actions such as wiping, flushing or spraying, unless the following requirements for control of emissions of the volatile organic compounds are satisfied:
 - (i) All containers used for organic solvent-related materials are kept closed at all times except when depositing or removing these materials;
 - (ii) All organic cleaning solvents and used solvent-related materials including shop towels shall be stored in closed containers;
 - (iii) Air circulation around cleaning-related operations and waste materials shall be minimized;

- (iv) All used solvent materials and shop towels shall be disposed of in a manner that minimizes emissions (e.g., moving these items from one location to another in closed containers or pipes); and
 - (v.) Equipment shall be maintained in such a way that minimizes emissions (e.g., keeping parts cleaners covered, maintaining cleaning equipment to repair solvent leaks, etc.).
2. No person shall cause, suffer, allow, or permit volatile organic compound emissions from each cleaning process, spray gun cleaning, spray booth cleaning, large manufactured components cleaning, parts cleaning, equipment cleaning, line cleaning, floor cleaning, tank cleaning or small manufactured components cleaning to exceed 0.42 lbs of VOC per gallon (50 g/liter) of cleaning material unless the cleaning operation is equipped with an emission control system with an overall control efficiency of at least 85 percent. Alternatively, a VOC composite vapor pressure limit of 8 millimeters of mercury (mmHg) at 20° Celsius may be used as a replacement limit for VOC content limit.
 3. The requirements of this subparagraph shall not apply to any cleaning operations in categories subject to other more specific VOC requirements contained in other subparagraphs of this Rule. The requirements of this subparagraph shall not apply to cleaners used for low temperature (below 40°F) applications, or the use of janitorial cleaners as relating to cleaning offices, bathrooms or other similar areas.
 4. For the purpose of this subparagraph, the following definition shall apply:
 - (i) "Industrial cleaning solvents" means a variety of products that are used to remove contaminants such as adhesives, inks, paint, dirt, soil, oil, and grease from parts, products, tools, machinery, equipment, vessels, floors, walls, and other production related work areas for a variety of reasons including safety, operability, and to avoid product contamination.
 5. Applicability: On and after January 1, 2015, the requirements of this Subparagraph (aaaa) shall apply to facilities at which actual emissions of volatile organic compounds from the use of organic solvents for cleaning operations equal or exceed 15 pounds per day for facilities located in Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding, and Walton counties. Any physical or operational changes that are necessary to comply with the provisions

specified in this Subparagraph (aaaa) are subject to the compliance schedule specified in Subparagraph 7. Prior to January 1, 2015, such facilities shall comply with the provisions of Subparagraph 391-3-1-.02(2)(tt), if applicable.

6. Applicability: The requirements of this Subparagraph (aaaa) will no longer be applicable by the compliance deadlines if the counties specified in subparagraph 5. are re-designated to attainment for the 1997 National Ambient Air Quality Standard for ozone prior to January 1, 2015. In the event the 1997 National Ambient Air Quality Standard for ozone is violated in the specified counties, the requirements of this Subparagraph (aaaa) will only be reinstated if the Director determines that the measure is necessary to meet the requirements of the contingency plan.

7. Compliance Schedule:

(i) An application for a permit to construct and operate volatile organic compound emission control systems and/or modifications of process and/or coatings used must be submitted to the Division no later than **July 1, 2014**.

(ii) On-site construction of emission control systems and/or modification of process or coatings must be completed by **November 1, 2014**.

(iii) Full compliance with the applicable requirements specified this Subparagraph (aaaa) must be completed before **January 1, 2015**.

(3) Sampling.

(a) Any sampling, computation and analysis to determine the compliance with any of the emissions limitations or standards set forth herein shall be in accordance with applicable procedures and methods specified in the Georgia Department of Natural Resources **Procedures for Testing and Monitoring Sources of Air Pollutants**. When no applicable test method or procedure is published therein, the Director shall specify or approve an applicable method or procedure prior to its use.

(b) The owner or operator of any equipment which is being sampled for the purpose of determining compliance with the Regulations shall operate such equipment during the sampling period at the maximum expected operating capacity, or at other specific operating conditions prescribed in the applicable operating permit or as otherwise may be required by the Director.

(c) The owner or operator of any source shall provide performance testing facilities as follows:

1. Sampling ports adequate for test methods applicable to such source;
2. Safe sampling platform;
3. Safe access to sampling platforms; and
4. Electric power for sampling and testing equipment.

(4) **Ambient Air Standards.**

(a) **No person** shall cause, suffer, permit, or allow the emission from any source the quantities of compounds listed below which would cause the ambient air standards listed to be exceeded. This does not exempt such sources from controlling their emissions to a point equal to or lower than the levels required to comply with a specific emission standard enumerated in other sections of these Rules.

(b) **Sulfur Dioxide.**

1. The level of the 2010 1-hour ambient air quality primary standard for oxides of sulfur is 75 parts per billion (ppb), measured in the ambient air as sulfur dioxide (SO₂).
 - (i) The 1-hour primary standard is attained when the three-year average of the annual (99th percentile) of the daily maximum 1-hour average concentrations is less than or equal to 75 ppb, as determined in accordance with Appendix T of 40 CFR Part 50.
 - (ii) The level of the 2010 1-hour ambient air quality primary standard shall be measured by a reference method based on Appendix A or A-1 of 40 CFR Part 50, or by a Federal Equivalent Method (FEM) designated in accordance with 40 CFR Part 53.
2. The level of the 1971 3-hour ambient air quality secondary standard for oxides of sulfur for any successive nonoverlapping calendar day three-hour period starting at midnight each calendar day is 0.5 ppm, measured in the ambient air as sulfur dioxide (SO₂).
 - (i) The 3-hour secondary standard is attained when the second-highest 3-hour average, as determined in accordance with 40 CFR 50.5(c), is less than or equal to 0.5 ppm. The standard shall not be exceeded more than once per calendar year.

- (ii) The level of the 1971 3-hour ambient air quality secondary standard shall be measured in the ambient air as sulfur dioxide by the reference method described in Appendix A of 40 CFR Part 50, or by a FEM designated in accordance with 40 CFR Part 53.

(c) **Particulate Matter.**

1. PM₁₀

- (i) The level of the 24-hour ambient air quality standard for PM₁₀ is 150 micrograms per cubic meter, 24-hour average concentration.
 - (I) The standard is attained when the expected number of days per calendar year with a 24-hour average concentration above 150 micrograms per cubic meter, as determined in accordance with Appendix K of 40 CFR 50, is equal to or less than 1.
 - (II) PM₁₀ shall be measured in the ambient air as PM₁₀ (particles with an aerodynamic diameter less than or equal to a nominal ten micrometers) by a reference method based upon 40 CFR 50, Appendix J.

2. PM_{2.5}

- (i) The level of the annual ambient air quality standard of PM_{2.5} (particles with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers) in the ambient air is 12.0 micrograms per cubic meter, annual arithmetic mean.
 - (I) The annual standard is attained when the annual arithmetic mean concentration, as determined in accordance with Appendix N of 40 CFR 50 is less than or equal to 12.0 micrograms per cubic meter.
 - (II) PM_{2.5} shall be measured in the ambient air as PM_{2.5} by reference method based upon 40 CFR 50, Appendix L.
- (ii) The level of the 24-hour ambient air quality standard of PM_{2.5} in the ambient air is 35 micrograms per cubic meter, 24-hour average concentration.
 - (I) The 24-hour standard is attained when the 98th percentile 24-hour concentration, as determined in accordance with

Appendix N of 40 CFR 50, is less than or equal to 35 micrograms per cubic meter.

- (II) PM_{2.5} shall be measured in the ambient air as PM_{2.5} by reference method based upon 40 CFR 50, Appendix L.

(d) Carbon Monoxide.

1. The level of the ambient air quality standard for carbon monoxide is 35 ppm (40 milligrams per cubic meter) for a one-hour average or 9 ppm (10 milligrams per cubic meter) for an eight-hour average.
 - (i) These standards are not to be exceeded more than once per year.
 - (ii) Carbon monoxide shall be measured in the ambient air as CO by reference method based upon 40 CFR 50, Appendix C.

(e) Ozone.

1. The level of the 2008 8-hour ambient air standard for ozone is 0.075 ppm, daily maximum 8-hour average.
 - (i) The standard is attained when the 3-year average of the annual fourth-highest daily maximum 8-hour average ozone concentration is less than or equal to 0.075 ppm, as determined in accordance with Appendix P of 40 CFR 50.
 - (ii) Ozone shall be measured in the ambient air by a reference method based upon 40 CFR 50, Appendix D or an equivalent method designated in accordance with 40 CFR 53.
2. The level of the 2015 8-hour ambient air standard for ozone is 0.070 ppm, daily maximum 8-hour average.
 - (i) The standard is attained when the 3-year average of the annual fourth highest daily maximum 8-hour average ozone concentration is less than or equal to 0.070 ppm, as determined in accordance with Appendix U of 40 CFR 50.
 - (ii) Ozone shall be measured in the ambient air by a reference method based upon 40 CFR 50, Appendix D or an equivalent method designated in accordance with 40 CFR 53.

(f) Lead.

1. The level of ambient air quality standard of lead and its compounds at ground level shall not exceed 0.15 micrograms per cubic meter, arithmetic mean concentration over a 3-month period.
 - (i) The standard is attained when the maximum arithmetic 3-month mean concentration for a 3-year period, as determined in accordance with Appendix R of this 40 CFR 50, is less than or equal to 0.15 micrograms per cubic meter.
 - (ii) The specified standard procedure for measuring ambient air concentrations of lead shall be a reference method based upon 40 CFR 50, Appendix G or an equivalent method designated in accordance with 40 CFR 53.

(g) Nitrogen Dioxide.

1. The level of the annual air quality standards for oxides of nitrogen at ground level is 53 ppb, annual average concentration, measured in the ambient air as nitrogen dioxide.
 - (i) The annual standard is met when the annual average concentration in a calendar year is less than or equal to 53 ppb, as determined in accordance with Appendix S of 40 CFR 50.
 - (ii) The level of the standard shall be measured by a reference method based on Appendix F or by a FEM designated in accordance with 40 CFR 53.
2. The level of the 1-hour ambient air quality standard for oxides of nitrogen is 100 ppb, 1-hour average concentration, measured in the ambient air as nitrogen dioxide.
 - (i) The 1-hour standard is met when the three-year average of the annual 98th percentile of the daily maximum 1-hour average concentration is less than or equal to 100 ppb, as determined in accordance with Appendix S of 40 CFR 50.
 - (ii) The level of the standard shall be measured by a reference method based on Appendix F or by a FEM designated in accordance with 40 CFR 53.

(h) Standard Conditions for Temperature and Pressure.

1. All measurements of air quality that are expressed as mass per unit volume (e.g., micrograms per cubic meter) other than for particulate matter (PM_{2.5})

standards contained in 391-3-1-.02(4)(c)2., and lead standards contained in 391-3-1-.02(4)(f) shall be corrected to a reference temperature of 25 (deg) C and a reference pressure of 760 millimeters of mercury (1,013.2 millibars).

2. Measurements of PM_{2.5} for purposes of comparison to the standards contained in 391-3-1-.02(4)(c)2., and of lead for purposes of comparison to the standards contained in 391-3-1-.02(4)(f) shall be reported based on actual ambient air volume measured at the actual ambient temperature and pressure at the monitoring site during the measurement period.

(5) Open Burning.

- (a) **No person shall cause**, suffer, allow, or permit open burning in any area of the State except as follows:
 1. Reduction of leaf piles, yard debris, or hand-piled natural vegetation on the premises on which they fall by the person in control of the premises, unless prohibited by local ordinance and/or regulation.
 2. Carrying out recognized agricultural procedures necessary for production or harvesting of crops, if the agricultural tract, lot, or parcel is less than or equal to five acres.
 3. Burning over any agricultural tract, lot, or parcel greater than five acres for purposes of any existing, expanded, or new agricultural operations as such term is defined by O.C.G.A. Section [1-3-3](#), provided that such burning is consistent with the requirements of the Federal Act and is limited to vegetative material.
 4. The "prescribed burning" of any land by the owners or the owner's designee.
 5. For recreational purposes or cooking food for immediate human consumption.
 6. Fires set for purposes of training fire-fighting personnel when authorized by the appropriate governmental entity.
 7. Acquired structure burns provided that an Authorization to Burn certificate has been issued by the Division.
 8. Disposal of vegetative debris from storm damage.
 9. For weed abatement, disease, and pest prevention.
 10. Operation of devices using open flames such as tar kettles, blow torches, welding torches, portable heaters and other flame-making equipment.

11. Open burning for the purpose of land clearing or construction or right-of-way maintenance provided the following conditions are met:
 - (i) Prevailing winds at the time of the burning are away from the major portion of the area's population;
 - (ii) The location of the burning is at least 1,000 feet from any occupied structure, or lesser distance if approved by the Division;
 - (iii) The amount of dirt on or in the material being burned is minimized;
 - (iv) Heavy oils, asphaltic materials, items containing natural or synthetic rubber, or any materials other than plant growth are not being burned; and
 - (v) No more than one pile 60 feet by 60 feet, or equivalent, is being burned within a 9-acre area at one time.
12. Disposal of all packaging materials previously containing explosives, in accordance with U.S. Department of Labor Safety Regulations.
13. Open burning of vegetative material for the purpose of land clearing using an air curtain destructor provided the following conditions are met:
 - (i) Authorization for such open burning is received from the fire department, if required, having local jurisdiction over the open burning location prior to initiation of any open burning at such location;
 - (ii) The location of the air curtain destructor is at least 300 feet from any occupied structure or public road. Air curtain destructors used solely for utility line clearing or road clearing may be located at a lesser distance upon approval by the Division;
 - (iii) No more than one air curtain destructor is operated within a ten (10) acre area at one time or there must be at least 1000 feet between any two air curtain destructors;
 - (iv) Only wood waste consisting of trees, logs, large brush and stumps which are relatively free of soil are burned in the air curtain destructor;

- (v) Tires or other rubber products, plastics, heavy oils or asphaltic based or impregnated materials are not used to start or maintain the operation of the air curtain destructor;
- (vi) The air curtain destructor is constructed, installed and operated in a manner consistent with good air pollution control practice for minimizing emissions of fly ash and smoke;
- (vii) The cleaning out of the air curtain destructor pit is performed in a manner to prevent fugitive dust; and
- (viii) Whenever feasible, the air curtain destructor should not be fired before 10:00 a.m. and the fire should be completely extinguished, using water or by covering with dirt, at least one hour before sunset.

(b) Specific County Restrictions.

1. In the counties of Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry, Newton, Paulding, Rockdale, Spalding and Walton, the only legal exceptions to the general prohibition against open burning during the months of May, June, July, August and September shall be:
 - (i) exceptions numbered 2, 5, 6, 10 and 12 under subparagraph (a) above provided, however, that such burning, whenever feasible, be conducted between 10:00 a.m. and one hour before sunset; and
 - (ii) exception number 3 under subparagraph (a) above.
2. In the counties of Banks, Barrow, Bibb, Butts, Catoosa, Chattooga, Clarke, Columbia, Crawford, Dawson, Floyd, Gordon, Haralson, Heard, Houston, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Oconee, Peach, Pickens, Pike, Polk, Putnam, Richmond, Troup, Twiggs, Upson, and Walker the only legal exceptions to the general prohibition against open burning during the months of May, June, July, August and September shall be:
 - (i) exceptions numbered 2, 4, 5, 6, 10 and 12 under subparagraph (a) above provided, however, that such burning, whenever feasible, be conducted between 10:00 a.m. and one hour before sunset; and
 - (ii) exception number 3 under subparagraph (a) above.

3. [reserved]
 4. In counties listed in subparagraphs 1 or 2 above whose total population, as listed in the 2010 Census, exceeds 65,000 (Barrow, Bartow, Bibb, Carroll, Cherokee, Clarke, Clayton, Cobb, Columbia, Coweta, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gwinnett, Hall, Henry, Houston, Newton, Paulding, Richmond, Rockdale, Troup, Walker and Walton), the only legal exceptions to the general prohibition against open burning during the months of January, February, March, April, October, November, and December are:
 - (i) exceptions numbered 1, 2, 4, 5, 6, 7, 10, 12, and 13 under subparagraph (a) above, provided, however, that such burning, whenever feasible, be conducted between 10:00 a.m. and one hour before sunset and does not cause air pollution in quantities or characteristics or of a duration which is injurious or which unreasonably interferes with the enjoyment of life or use of property in such area of the state as is affected thereby; and
 - (ii) exception number 3 under subparagraph (a) above.
- (c) **Except for a reasonable period** to get a fire started, no smoke the opacity of which is equal to or greater than 40 percent, shall be emitted from any source of open burning listed in subparagraphs (a) and (b) above except as follows. Prescribed burning, agricultural burning and acquired structure burning are not subject to the 40 percent opacity standard in this paragraph.
- (d) **The Director** may allow open burning prohibited under paragraphs (a) and (b), upon a determination that such open burning is necessary to protect the public health, safety or welfare of the people of the State of Georgia, or there are no reasonable alternatives to the open burning.
- (e) **Prescribed burning** conducted under subparagraph (b)2. is subject to authorization by the Georgia Forestry Commission to include burning restrictions during periods that are conducive to the formation of ozone. Federal facilities which conduct prescribed burning in accordance with subparagraph (b)2. that are not required to obtain authorization from the Georgia Forestry Commission for such burning shall institute measures to ensure that prescribed burning is not conducted during periods conducive to the formation of ozone.
- (f) **Definitions.**
1. "Prescribed burning" means the controlled application of fire to existing vegetative fuels under specified environmental conditions and following appropriate precautionary measures, which causes the fire to be confined to

a predetermined area and accomplishes one or more planned land management objectives as specified in the Georgia Prescribed Burning Act (Georgia Code Title 12. Conservation and Natural Resources § [12-6-146](#)) or to mitigate catastrophic wildfires.

2. [reserved]
3. "Acquired structure burn" is the burning of a house, building or structure for the exclusive purpose of providing training to fire-fighting personnel or arson investigators.

(6) Source Monitoring.

(a) Specific Monitoring and Reporting Requirements for Particular Sources.

1. Sources, and owners and operators of sources, subject to any of the Standards of Performance for New Stationary Sources of or pursuant to 42 U.S.C. Section 7411, as amended, or National Emission Standards for Hazardous Air Pollutants of or pursuant to U.S.C. Section 7412, as amended, shall meet the monitoring and related requirements specified in the applicable standard, unless the Director specifies additional or more stringent requirements, in which case all requirements must be met.
2. Certain specific sources, as herein designated, shall provide for the continuous monitoring of emissions as prescribed below:
 - (i) Fossil Fuel-Fired Steam Generators. The owner or operator of any fossil fuel-fired steam generator, except as provided for in subparagraph (iv) of this paragraph, with an annual average capacity factor of greater than 30 percent, as reported to the Federal Power Commission for calendar year 1974, or as otherwise demonstrated to the Director by the owner or operator, shall install, calibrate, operate, and maintain all monitoring equipment necessary for the continuous monitoring of the following:
 - (I) Opacity, if such steam generator has a heat input greater than 250 million BTUs per hour, except where:
 - I. Gaseous fuel is the only fuel burned; or
 - II. Oil or mixture of gas and oil are the only fuels burned and the source is able to comply with the applicable particulate matter and opacity regulations without utilization of particulate matter collection equipment, and the source has never been found, through any

administrative or judicial proceedings, to be in violation of any visible emission standard;

- (II) Sulfur dioxide, if such steam generator has a heat input greater than 250 million BTUs per hour and has installed sulfur dioxide emission control equipment;
- (III) The percent oxygen, or carbon dioxide, in the flue gas as necessary to accurately convert sulfur dioxide continuous emission monitoring data to the units of the emission standard.

(ii) Sulfuric Acid Plants.

- (I) The owner or operator of any sulfuric acid plant of greater than 300 tons per day production capacity, the production being expressed as 100 percent acid, shall, except as provided for in subparagraph (iv) of this paragraph, install, calibrate, maintain, and operate a continuous monitoring system for the measurement of sulfur dioxide for each sulfuric acid production facility within such plant.

(iii) Wood Waste Fired Combination Boilers.

- (I) The owner or operator of any boiler which fires wood waste or wood waste in combination with fossil fuel(s) with a total heat input equal to or greater than 100 million BTUs per hour shall, except as provided for in paragraph (iv) of this subsection, install, calibrate, operate and maintain a continuous monitoring system for the measurement of opacity;
- (II) Boilers subject to this subparagraph (iii) shall comply with the opacity monitoring requirements as specified for fossil fuel fired steam generators. In any rule or subdivision thereof dealing with opacity monitoring requirements for fossil fuel-fired steam generators, where reference is made to "Fossil Fuel Fired Steam Generators" the term "Wood Waste Fired Combination Boilers" should be inserted for the purpose of this subparagraph.

- (iv) Exemptions. A facility is exempt from the requirements otherwise imposed by this paragraph (a)2. if:
 - (I) It is subject to any of the Standards of Performance for New Stationary Sources promulgated in 40 CFR, Part 60 or National Emission Standards for Hazardous Air Pollutants promulgated in 40 CFR Part 61, pursuant to Section 111 of the Federal Act; or
 - (II) It is not subject to an applicable emission standard.

- (v) Monitoring Equipment.
 - (I) The monitoring equipment required pursuant to the previous subparagraphs (i) through (iv) shall be demonstrated by the owners or operators of such monitoring equipment to meet the performance specifications specified in the Georgia Department of Natural Resources **Procedures for Testing and Monitoring Sources of Air Pollutants**.

- (vi) Data Reporting.
 - (I) The owner or operator of a facility subject to the requirements of this paragraph (a)2. shall submit a written report for each calendar quarter and, if excess emissions have occurred, the report shall state the nature and cause of the excess emissions, if known, and the corrective action taken. The averaging period used for data reporting shall correspond to the averaging period specified in the emission test method used to determine compliance with an emission standard for the pollutant/source category in question. The required report shall include, as a minimum, the data specified in this subsection.
 - I. For opacity measurements, the summary shall consist of the magnitude in actual percent opacity of each 6-minute average of opacity which is greater than the opacity standard applicable to the source. If more than one opacity standard applies, excess emissions data must be submitted in relation to all such standards.
 - II. For gaseous measurements, the summary shall consist of emission averages in the units of the applicable

standard, for each averaging period during which the applicable standard was exceeded.

- III. The data and time identifying each period during which the continuous monitoring system was inoperative, except for zero and span checks, and the nature of system repairs or adjustments shall be reported. The Director may require proof of continuous monitoring system performance whenever system repairs or adjustments have been made.
 - IV. When no excess emissions have occurred and the continuous monitoring system(s) have not been inoperative, repaired, or adjusted, such information shall be included in the report.
 - V. The owners or operators of sources or facilities subject to this paragraph (a)2. shall maintain a file of all information reported in the quarterly summaries, and all other data collected either by the continuous monitoring system or as necessary to convert monitoring data to the units of the applicable standard for a minimum of two years from the date of collection of such data or submission of such summaries.
- (vii) Data Conversion. The owner or operator of a source subject to this paragraph (a)2. shall use the following procedures for converting monitoring data to units of the applicable standard:
- (I) For fossil fuel-fired steam generators, the procedures of Paragraph 2.1 of the Georgia Department of Natural Resources **Procedures for Testing and Monitoring Sources of Air Pollutants** shall be used to convert gaseous emissions monitoring data in ppm to pounds/million BTU where necessary.
 - (II) For sulfuric acid plants the owner or operator shall:
 - I. Establish a conversion factor three times daily according to the procedures in Paragraph 2.5 of the Georgia Department of Natural Resources

Procedures for Testing and Monitoring Sources of Air Pollutants.

- II. Multiply the conversion factor by the average sulfur dioxide concentration in the flue gases to obtain average sulfur dioxide emissions in lb/ton, and;
 - III. Report the average sulfur dioxide emission for each averaging period in excess of the applicable emission standard in the quarterly report.
- (III) The owner or operator of a source subject to this regulation may employ data reporting or reduction procedures varying from those specified in this subparagraph (a)2.(vii) if such owner or operator shows to the satisfaction of the Director that such procedures are at least as accurate as the procedures identified in this subparagraph. Such procedures may include, but are not limited to, the following:
- I. Alternative procedures for computing emission averages that do not require integration of data (e.g., some facilities may demonstrate that the variability of their emissions is sufficiently small to allow accurate reduction of data based upon computing averages from equally spaced data points over the averaging period);
 - II. Alternative methods of converting pollutant concentration measurements to the units of the emission standards.
- (viii) In cases where the owner or operator of a source subject to this paragraph wishes to utilize different, but equivalent, procedures for continuous monitoring systems and/or alternative monitoring and data reporting procedures or other alternative equivalents to comply with the intent of this paragraph then:
- (I) The owner or operator must submit:
 - I. A detailed summary of the limitations prohibiting the installation of a continuous monitor, and;

II. Alternative and/or equivalent emission monitoring and reporting requirements (e.g., periodic manual stack tests) to satisfy the intent of this paragraph.

(II) The use of any alternative or equivalent method for compliance with any requirement of this paragraph (a)2. shall be subject to approval of the Director.

(ix) Monitor Malfunction.

(I) The requirements of this paragraph shall not apply during any period of monitoring system malfunction, provided that the source owner or operator shows, to the satisfaction of the Director, that the malfunction was unavoidable and is being or was repaired as expeditiously as practicable.

(x) [reserved]

(xi) Kraft Pulp Mills.

(I) On or before March 1, 1984, unless otherwise specified in an alternate compliance schedule as provided for in paragraph 391-3-1-.02(2)(a)9., the owner or operator of any kraft pulp mill subject to any limitation or requirement of, or under subsection (gg) of section 391-3-1-.02(2) shall, except as provided in Part (II) of this subparagraph, install, calibrate, operate, and maintain a system to continuously measure and record the concentration of TRS emissions on a dry basis and the percent of oxygen by volume on a dry basis in the gases discharged from any lime kiln, recovery furnace, digester system, or multiple-effect evaporator system.

(II) The owner or operator of any kraft pulp mill which incinerates effluent gases emitted from any digester system or multiple-effect evaporator system subject to any limitation or requirement of, or under subsection (gg) of section 391-3-1-.02(2) shall install, calibrate, operate, and maintain a system to continuously measure and record the combustion temperature at the point of incineration.

(xii) Fuel Burning Equipment.

- (I) The owner or operator of any fuel burning equipment with a maximum design heat input capacity equal to or greater than 100 million BTU/hr subject to the provisions of subsection (III) of section 391-3-1-.02(2) shall install, calibrate, operate, and maintain a continuous emissions monitoring system (CEMS) for the measurement of the concentration of nitrogen oxides (NO_x) and the percent oxygen and shall record the output of the system.
 - (II) For any fuel burning equipment which only combusts gas residual oil with a nitrogen content less than 0.30 percent, or distillate oil or a combination of those fuels, the owner or operator may monitor equipment operating conditions to predict the concentration of nitrogen oxides, (Predictive Emissions Monitoring System) in lieu of the CEMS required in paragraph (I) provided such system meets the requirements of Section 2.119 of the **Procedures for Testing and Monitoring Sources of Air Pollutants**.
3. All sources, and owners and operators of sources, subject to any limitation of paragraphs (2)(t) through (2)(aa) [inclusive]; (2)(ii); (2)(jj); (2)(11); (2)(mm); and (2)(tt) [inclusive] shall maintain, as specified by the Director, at the source, for a period of at least two years, records containing the following information for each production line:
- (i) Process information, including, but not limited to, hours of operation, method of application, and drying method.
 - (ii) Coating formulation and analytical data, including, but not limited to, the name of inks or coatings, coating or ink density, VOC content (weight or volume percent), and solids content (volume percent).
 - (iii) Coating consumption data, including, but not limited to, name of ink or coating used, amount of ink or coating used, name of diluent and amount of diluent used.
 - (iv) Capture and control equipment data, including, but not limited to, the destruction and removal efficiency, emission test results, and the capture efficiency.
 - (v) Transfer Efficiency Data, including, but not limited to, baseline transfer efficiency, actual transfer efficiency, and results of efficiency test.

4. Emission Statements.

- (i) Owners and operators of stationary sources of nitrogen oxides or volatile organic compounds shall provide the Director with a statement, in such form as the Director may prescribe, for classes or categories of sources determined by the Director, showing the actual emissions of nitrogen oxides and volatile organic compounds from that source.
- (ii) Statements shall be submitted by June 15 of every year and shall show the actual emissions of the previous calendar year.
- (iii) The requirements of this paragraph shall apply to all stationary sources of nitrogen oxides or volatile organic compounds which emit equal to or more than 25 tons per calendar year of either pollutant and are located in Bartow, Clayton, Cobb, DeKalb, Fulton, Gwinnett, or Henry counties.

(b) General Monitoring and Reporting Requirements.

1. All Sources.

- (i) Any person engaged in operations which cause emissions to be released into the atmosphere which may result in air pollution may be required to install, maintain, and use emission monitoring devices, to sample such specific emissions as prescribed by the Director; to make periodic reports on the nature and amounts of emissions and provide such other information as the Director may reasonably require; and to maintain such records as the Director may prescribe so as to determine whether emissions from such operations are in compliance with the provisions of the Act or any rules and regulations promulgated there under.
- (ii) Specific types of information and/or equipment installation which may be requested may include, but are not limited to, the following:
 - (I) Detectors and recorders for continuous measurement and recording of the opacity of emissions;
 - (II) Composition and analysis of fuels of any nature, the determination of which shall be conducted in accordance with acceptable and appropriate procedures of the American Society for Testing and Materials or by other procedures specified or approved by the Director;

- (III) As technology permits, instrumentation for continuously monitoring particulate matter and gaseous emissions;
 - (IV) Production and process feed rates, process charging rates, burning rates, hours of operation and periodic summaries of this information.
- (iii) Records of information requested shall be submitted on forms supplied by the Director, or when forms are not supplied, in a format acceptable to and approved by the Director. The information obtained on request of the Director shall be retained for a period and shall be reported at time intervals to be specified. Records shall be kept current and be available for inspection at the discretion of the Director.
- (iv) In the event of any malfunction or breakdown of process, fuel burning, or emission control equipment for a period of four hours or more which results in excessive emissions for a major source, the owner or operator of such major source shall notify the Division by a written report which would describe the cause of the breakdown, the corrective actions taken, and the plans to prevent future occurrences. Unless otherwise specified in a permit or order, the report must be submitted no later than seven (7) days after the occurrence. The information submitted shall be adequate to allow the Director to determine whether the excessive emissions were due to a sudden and unavoidable breakdown. The reporting requirements of this subparagraph (iv) shall be in addition to any other reporting requirement under these rules (Chapter 391-3-1), and such reporting shall in no event serve to excuse, otherwise justify or in any manner affect any potential liability or enforcement action.
- (v) All data gathered in the process of enforcing this or other Air Quality Control Rule or Regulation shall be considered public information and shall be made available upon request, except such information which is required to be kept confidential by Ga. Code Ann. Section [12-9-19](#), as amended.
- (vi) Any continuous monitoring system or monitoring device shall be installed, operated, calibrated and maintained and information reported in accordance with the applicable procedures and performance specifications of the Georgia Department of Natural Resources **Procedures for Testing and Monitoring Sources of**

Air Pollutants. Where no applicable procedure or performance specification for such installation, operation or reporting of data is published therein, the Director shall, as needed, specify or approve an applicable procedure or performance specification prior to operation of the monitoring system or monitoring device.

(7) Prevention of Significant Deterioration of Air Quality.

(a) General Requirements.

1. The provisions of paragraph (7) shall apply to any source and the owner or operator of any source subject to any requirement under 40 Code of Federal Regulations (hereinafter, CFR) Part 52.21. The subparagraphs of Paragraph (7) that incorporate by reference paragraphs of 40 CFR Part 52.21 are as promulgated on January 17, 2017, unless otherwise specified. The dates associated with the incorporation by reference of federal rules into this paragraph (7) refer to the dates of publication of the promulgated rules in the Federal Register.

2. Definitions: For the purpose of this paragraph, 40 CFR Part 52.21(b) as amended, is hereby incorporated by reference with the following exceptions:

(i) In lieu of the definition of "baseline actual emissions" as specified in paragraph (b)(48) of 40 CFR Part 52.21, the following shall apply:

"Baseline actual emissions" means the rate of emissions, in tons per year, of a regulated NSR pollutant, as determined in accordance with subparagraphs (7)(a)2.(i)(I) through (IV) of this rule.

(I) For any existing electric utility steam generating unit, baseline actual emissions means the average rate, in tons per year, at which the unit actually emitted the pollutant during any consecutive 24-month period selected by the owner or operator within the 5-year period immediately preceding when the owner or operator begins actual construction of the project. The Director shall allow the use of a different time period upon a determination that it is more representative of normal source operation.

I. The average rate shall include fugitive emissions to the extent quantifiable, and emissions associated with startups, shutdowns, and malfunctions. However, fugitive emissions and/or emissions associated with

startups, shutdowns, and malfunctions shall or may be excluded in accordance with the following subparagraphs A and B.

A. If fugitive emissions or emissions from startups, shutdowns, and/or malfunctions during the consecutive 24-month period selected by the owner or operator are not quantifiable and are therefore not included in the calculation of baseline actual emissions, then fugitive emissions or emissions from startups, shutdowns, and/or malfunctions, respectively, shall not be included in the calculation of projected actual emissions [as defined in subparagraph (7)(a)2.(ii) of this rule].

B. The owner or operator may elect to omit malfunctions from the calculation of baseline actual emissions. If the owner or operator elects to do so, then malfunctions shall also be omitted from the calculation of projected actual emissions [as defined in subparagraph (7)(a)2.(ii) of this rule].

II. The average rate shall be adjusted downward to exclude any non-compliant emissions that occurred while the source was operating above an emission limitation that was legally enforceable during the consecutive 24-month period.

III. For a regulated NSR pollutant, when a project involves multiple emissions units, only one consecutive 24-month period may be used to determine the baseline actual emissions for the emissions units being changed. A different consecutive 24-month period can be used for each regulated NSR pollutant.

IV. The average rate shall not be based on any consecutive 24-month period for which there is inadequate information for determining annual emissions, in tons per year, or for which there is inadequate information for adjusting this amount downward to exclude any

non-compliant emissions as required by subparagraph (7)(a)2.(i)(I)II. of this rule.

- V. If any physical change(s) or change(s) in the method of operation subsequent to the consecutive 24-month period selected by the owner or operator resulted in a permanent change in the basic design parameter [as defined in subparagraph (7)(a)2.(viii) of this rule], not including the voluntary addition of air pollution control equipment or increase in removal or collection efficiency of existing air pollution control equipment, and thus resulted in a corresponding reduction in actual emissions of a regulated NSR pollutant, the baseline actual emissions shall be adjusted downward by a proportional reduction in emissions in tons per year or lbs/unit of production.
 - VI. The average rate shall be adjusted downward to exclude any emissions that would have exceeded an emission limitation with which the major stationary source must currently comply, had such major source been required to comply with such limitations during the consecutive 24-month period. However, if an emission limitation is part of a Maximum Available Control Technology (MACT) standard that the Administrator of U.S. EPA has proposed or promulgated under 40 CFR, Part 63, the baseline actual emissions need only be adjusted if the Division has taken credit for such emission reductions in an attainment demonstration or maintenance plan consistent with the requirements of 40 CFR Part 51.165(a)(3)(ii)(G).
- (II) For an existing emissions unit (other than an electric utility steam generating unit), baseline actual emissions means the average rate, in tons per year, at which the emissions unit actually emitted the pollutant during any consecutive 24-month period selected by the owner or operator within the 10-year period immediately preceding either the date the owner or operator begins actual construction of the project, or the date a complete permit application is received by the Division

for a permit required under this paragraph or by the reviewing authority for a permit required by a plan, whichever is earlier.

I. The average rate shall include fugitive emissions to the extent quantifiable, and emissions associated with startups, shutdowns, and malfunctions. However, fugitive emissions and/or emissions associated with startups, shutdowns, and malfunctions shall or may be excluded in accordance with the following subparagraphs A and B.

A. If fugitive emissions or emissions from startups, shutdowns, and/or malfunctions during the consecutive 24-month period selected by the owner or operator are not quantifiable and are therefore not included in the calculation of baseline actual emissions, then fugitive emissions or emissions from startups, shutdowns, and/or malfunctions, respectively, shall not be included in the calculation of projected actual emissions (as defined in subparagraph (7)(a)2.(ii) of this rule).

B. The owner or operator may elect to omit malfunctions from the calculation of baseline actual emissions. If the owner or operator elects to do so, then malfunctions shall also be omitted from the calculation of projected actual emissions [as defined in subparagraph (7)(a)2.(ii) of this rule].

II. The average rate shall be adjusted downward to exclude any non-compliant emissions that occurred while the source was operating above an emission limitation that was legally enforceable during the consecutive 24-month period.

III. The average rate shall be adjusted downward to exclude any emissions that would have exceeded an emission limitation with which the major stationary source must currently comply, had such major stationary source been required to comply with such limitations during the consecutive 24-month period.

However, if an emission limitation is part of a Maximum Achievable Control Technology (MACT) standard that the Administrator of U.S. EPA has proposed or promulgated under 40 CFR, Part 63, the baseline actual emissions need only be adjusted if the Division has taken credit for such emissions reductions in an attainment demonstration or maintenance plan consistent with the requirements of 40 CFR Part 51.165(a)(3)(ii)(G).

- IV. For a regulated NSR pollutant, when a project involves multiple emissions units, only one consecutive 24-month period may be used to determine the baseline actual emissions for all the emissions units being changed. A different consecutive 24-month period can be used for each regulated NSR pollutant.
 - V. The average rate shall not be based on any consecutive 24-month period for which there is inadequate information for determining annual emissions, in tons per year, or for which there is inadequate information for adjusting this amount downward to exclude any non-compliant emissions as required by subparagraph (7)(a)2.(i)(II)II. or III. of this rule.
 - VI. If any physical change(s) or change(s) in the method of operation subsequent to the consecutive 24-month period selected by the owner or operator resulted in a permanent change in the basic design parameter [as defined in subparagraph (7)(a)2.(viii) of this Rule], not including the voluntary addition of air pollution control equipment or increase in removal or collection efficiency of existing air pollution control equipment, and thus resulted in a corresponding reduction in actual emissions of a regulated NSR pollutant, the baseline actual emissions shall be adjusted downward by a proportional reduction in emissions in tons per year or lbs/unit of production.
- (III) For a new emissions unit, the baseline actual emissions for purposes of determining the emissions increase that will

result from the initial construction and operation of such unit shall equal zero; and thereafter, for all other purposes, shall equal the unit's potential to emit [as long as the unit remains a "new emissions unit" as defined in 40 CFR Part 52.21(b)(7)(i)].

- (IV) For a PAL for a stationary source, the baseline actual emissions shall be calculated for existing electric utility steam generating units in accordance with the procedures contained in subparagraph (7)(a)2.(i)(I) of this rule, for other existing emissions units in accordance with the procedures contained in subparagraph (7)(a)2.(i)(II) of this rule, and for a new emissions unit in accordance with the procedures contained in subparagraph (7)(a)2.(i)(III) of this rule. For existing emission units, the baseline actual emissions shall be based on any consecutive 24-month period selected by the operator within the appropriate PAL baseline period. For existing electric steam generating units, the PAL baseline period is the 5-year period (or different period allowed by the Director that is more representative or normal source operation) immediately preceding submission of a complete PAL application to the Division. For other existing emission units, the PAL baseline period is the 10-year period immediately preceding submission of a complete PAL permit application to the Division.

- (ii) In lieu of the definition of "projected actual emissions" as specified in paragraph (b)(41) of 40 CFR Part 52.21, the following shall apply:
 - (I) "Projected actual emissions" means the maximum annual rate, in tons per year, at which an existing emissions unit is projected to emit a regulated NSR pollutant in any one of the five years (12-month period) following the date the unit resumes regular operation after the project, or in any one of the 10 years following that date, if the project involves increasing the emissions unit's design capacity or its potential to emit that regulated NSR pollutant and full utilization of the unit would result in a significant emissions increase or a significant net emissions increase at the major stationary source.

 - (II) In determining the projected actual emissions under subparagraph (7)(a)2.(ii)(I) (before beginning actual

construction), the owner or operator of the major stationary source:

- I. Shall consider all relevant information, including but not limited to, historical operational data, the company's own representations, the company's expected business activity and the company's highest projections of business activity, the company's filings with the State or Federal regulatory authorities, and compliance plans under the approved State Implementation Plan; and
- II. Shall include fugitive emissions to the extent quantifiable and emissions associated with startups, shutdowns, and malfunctions. However, fugitive emissions and/or emissions associated with startups, shutdowns, and malfunctions shall or may be excluded in accordance with the following subparagraphs A., B., and C.
 - A. If projected fugitive emissions or emissions from startups, shutdowns, and/or malfunctions are not quantifiable and are therefore not included in the calculation of projected actual emissions, then fugitive emissions or emissions from startups, shutdowns, and/or malfunctions, respectively, shall not be included in the calculation of baseline actual emissions [as defined in subparagraph (7)(a)2.(i) of this rule].
 - B. The owner or operator may elect to omit malfunctions from the calculation of projected actual emissions. If the owner or operator elects to do so, then malfunctions shall also be omitted from the calculation of baseline actual emissions [as defined in subparagraph (7)(a)2.(i) of this rule].
 - C. If the project involves increasing the emissions unit's design capacity or its potential to emit that regulated NSR pollutant and the increase in projected emissions associated with startups, shutdowns, and malfunctions is not

proportional to the increase in the emission unit's design capacity or its potential to emit that regulated NSR pollutant, the owner or operator must include with the information required under subparagraph (7)(b)15.(i)(I) of this rule documentation that supports the projected emissions associated with startups, shutdowns, and malfunctions subsequent to completion of the project; and

- III. May exclude, in calculating any increase in emissions that results from the particular project, that portion of the unit's emissions following the project that an existing unit could have accommodated during the consecutive 24-month period used to establish the baseline actual emissions under subparagraph (7)(a)2.(i) of this rule and that is also unrelated to the particular project, including any increased utilization due to product demand growth (the increase in emissions that may be excluded under this subparagraph shall hereinafter be referred to as "demand growth emissions");
 - A. If the project involves increasing the emissions unit's design capacity or its potential to emit that regulated NSR pollutant, the owner or operator shall either:
 - (A) not exclude demand growth emissions, or
 - (B) must include in the information required under subparagraph (7)(b)15.(i)(I) of this paragraph, documentation that demand growth emissions are emissions that the emissions unit could have accommodated during the consecutive 24-month period used to establish the baseline actual emissions, are not related to the particular project, and are

due to product demand growth; must have documentation supporting the portion of the emissions increase that is due to demand growth; and, following the change, must be able to track the emissions increase due to demand growth; or

IV. In lieu of using the method set out in subparagraphs (7)(a)2.(ii)(II)I. through III. of this rule, may elect to use the emissions unit's potential to emit, in tons per year, as defined under paragraph (b)(4) of 40 CFR Part 52.21.

(iii) The definition of "major stationary source" contained in 40 CFR Part 52.21(b)(1) is hereby incorporated by reference except as follows:

(I) Subparagraph (i)(b) shall read as follows: Notwithstanding the stationary source size specified in paragraph (b)1.(i)(a) of this section, any stationary source which emits, or has the potential to emit, 250 tons-per-year or more of a regulated NSR pollutant; or

(iv) The definition and use of the term "subject to regulation" in 40 CFR Part 52.21 is hereby incorporated by reference; provided, however, that in the event all or any portion of 40 CFR Part 52.21 containing that term is:

(I) declared or adjudged to be invalid or unconstitutional or stayed by the United States Court of Appeals for the Eleventh Circuit or for the District of Columbia Circuit; or

(II) withdrawn, repealed, revoked or otherwise rendered of no force and effect by the United States Environmental Protection Agency, Congress, or Presidential Executive Order.

Such action shall render the regulation as incorporated herein, or that portion thereof that may be affected by such

action, as invalid, void, stayed, or otherwise without force and effect for purposes of this rule upon the date such action becomes final and effective; provided, further, that such declaration, adjudication, stay, or other action described herein shall not affect the remaining portions, if any, of the regulation as incorporated herein, which shall remain of full force and effect as if such portion so declared or adjudged invalid or unconstitutional or stayed or otherwise invalidated or effected were not originally a part of this rule. The Board declares that it would have incorporated the remaining parts of the federal regulation if it had known that such portion thereof would be declared or adjudged invalid or unconstitutional or stayed or otherwise rendered of no force and effect;

- (v) The definition of "potential to emit" contained in 40 CFR Part 52.21(b)(4), shall be modified as follows:
 - (I) The phrase "is federally enforceable" shall read "is federally enforceable or enforceable as a practical matter."

- (vi) The definition of "allowable emissions" contained in 40 CFR Part 52.21(b)(16), shall be modified as follows:
 - (I) The phrase "unless the source is subject to federally enforceable limits which restrict the operating rate, or hours of operation, or both" shall read, "unless the source is subject to enforceable limits which restrict the operating rate, or hours of operation, or both."
 - (II) paragraph (iii) shall read as follows: The emissions rate specified as an enforceable permit condition, including those with a future compliance date.

- (vii) The following shall be added to the definition of "major source baseline date" contained in 40 CFR Part 52.21(b)(14):
 - (I) Baseline dates established prior to April 19, 2006, will remain in effect.

- (viii) In lieu of paragraph (b)(33)(iii) of the definition of "replacement unit" as specified in paragraph (b)(33) of 40 CFR Part 52.21, the following shall apply:

The replacement does not alter the basic design parameters of the process unit. Basic design parameters are defined as follows:

- (I) Except as provided in subparagraph (7)(a)2.(viii)(III) of this rule, for a process unit at a steam electric generating facility, the owner or operator may select as its basic design parameters either maximum hourly heat input and maximum hourly fuel consumption rate or maximum hourly electric output rate and maximum steam flow rate. When establishing fuel consumption specifications in terms of weight or volume, the minimum fuel quality based on British Thermal Units content shall be used for determining the basic design parameter(s) for a coal-fired electric utility steam generating unit.
- (II) Except as provided in subparagraph (7)(a)2.(viii)(III) of this rule, the basic design parameter(s) for any process unit that is not at a steam electric generating facility are maximum rate of fuel or heat input, maximum rate of material input, or maximum rate of product output. Combustion process units will typically use maximum rate of fuel input. For sources having multiple end products and raw materials, the owner or operator should consider the primary product or primary raw material when selecting a basic design parameter.
- (III) If the owner or operator believes the basic design parameter(s) in subparagraphs (7)(a)2.(viii)(I) and (II) of this rule is (are) not appropriate for a specific industry or type of process unit, the owner or operator may propose to the Division an alternative basic design parameter(s) for the source's process unit(s). If the Director approves of the use of an alternative basic design parameter(s), he or she shall issue a permit that is legally enforceable that records such basic design parameter(s) and requires the owner or operator to comply with such parameter(s).
- (IV) The owner or operator shall use credible information, such as results of historic maximum capability tests, design information from the manufacturer, or engineering calculations, in establishing the magnitude of the basic

design parameter(s) specified in subparagraphs (7)(a)2.(viii)(I) and (II) of this rule.

(V) If design information is not available for a process unit, then the owner or operator shall determine the process unit's basic design parameter(s) using the maximum value achieved by the process unit in the 5-year period immediately preceding the planned activity.

(VI) Efficiency of a process unit is not a basic design parameter.

(ix) [reserved]

(x) [reserved]

(xi) In the definition of "net emissions increase" as specified in paragraph (b)(3) of 40 CFR Part 52.21, paragraphs (iii)(b) and (vi)(d), related to increases and decreases at a clean unit, are not adopted.

3. Applicability procedures: 40 CFR Part 52.21(a)(2), as amended, is hereby incorporated and adopted by reference.

4. Except as noted below, the word "Administrator" as used in regulations adopted by reference in this paragraph shall mean the "Director" as defined in [391-3-1-.01\(q\)](#). For the following provisions adopted by reference in this paragraph, the word "Administrator" shall mean the Administrator of the U.S. Environmental Protection Agency or, where allowable, his or her designee.

(i) 40 CFR Part 52.21(b)(17), Definition of "Federally Enforceable"

(ii) 40 CFR Part 52.21(b)(37)(i), First Paragraph within the Definition of "Repowering"

(iii) 40 CFR Part 52.21(b)(43), Definition of "Prevention of Significant Deterioration (PSD)"

(iv) 40 CFR Part 52.21(b)(51), Definition of "Reviewing Authority"

(v) 40 CFR Part 52.21(g), Redesignation

(vi) 40 CFR Part 52.21(l), Air Quality Models

(vii) 40 CFR Part 52.21(p)(2), Federal Land Manager

(viii) 40 CFR Part 52.21(o)(3), Visibility Monitoring

(b) Prevention of Significant Deterioration Standards.

1. Ambient air increments: 40 CFR Part 52.21(c), as amended, is hereby incorporated and adopted by reference.
2. Ambient air ceilings: 40 CFR Part 52.21(d), as amended, is hereby incorporated and adopted by reference.
3. Restrictions on area classifications: 40 CFR Part 52.21(e), as amended, is hereby incorporated and adopted by reference.
4. Redesignation: 40 CFR Part 52.21(g), as amended, is hereby incorporated and adopted by reference.
5. Stack heights: 40 CFR Part 52.21(h), as amended, is hereby incorporated and adopted by reference.
6. Exemptions: 40 CFR Part 52.21(i), as amended, is hereby incorporated and adopted by reference.
7. Control technology review: 40 CFR Part 52.21(j), as amended, is hereby incorporated and adopted by reference.
8. Source impact analysis: 40 CFR Part 52.21(k), as amended, is hereby incorporated and adopted by reference.
9. Air quality models: 40 CFR Part 52.21(l), as amended, is hereby incorporated and adopted by reference.
10. Air quality analysis: 40 CFR Part 52.21(m), as amended, is hereby incorporated and adopted by reference.
11. Source information: 40 CFR Part 52.21(n), as amended, is hereby incorporated and adopted by reference with the following exception:
 - (i) The first sentence of paragraph (n)(1) shall read as follows, "With respect to a source or modification to which paragraphs (j), (l), (o) and (p) of this section apply, such information shall include:"
12. Additional impact analyses: 40 CFR Part 52.21(o), as amended, is hereby incorporated and adopted by reference.

13. Sources impacting federal class I areas - additional requirements: 40 CFR Part 52.21(p), as amended, is hereby incorporated and adopted by reference with the following exception:

- (i) The beginning of paragraph (p)(8) should read "In the case of a permit issued pursuant to paragraph (p) (6) or (7) of this section."

14. Public participation: 40 CFR Part 52.21(q), as amended, is hereby incorporated and adopted by reference.

15. Source obligation: 40 CFR Part 52.21(r), as amended, is hereby incorporated and adopted by reference with the following exceptions:

- (i) In lieu of the provisions of paragraph (r)(6), the following shall apply:

The provisions of this subparagraph 15(i) apply to projects at an existing emissions unit at a major stationary source (other than projects at a source with a PAL) that are required to obtain a permit under the Construction (SIP) Permit requirements of paragraph [391-3-1-.03\(1\)](#) of these rules and the owner or operator elects to use the method specified in Subparagraph (7)(a)2.(ii)(II)I. through III. of this rule for calculating projected actual emissions.

- (I) Before beginning actual construction of the project, the owner or operator shall document and maintain a record of the following information:

- I. A description of the project;
- II. Identification of the emissions unit(s) whose emissions of a regulated NSR pollutant could be affected by the project; and
- III. A description of the applicability test used to determine that the project is not a major modification for any regulated NSR pollutant, including the baseline actual emissions, the projected actual emissions, the amount of emissions excluded under Subparagraph (7)(a)2.(ii)(II)III. of this rule and an explanation for why such amount was excluded, and any netting calculations, if applicable.

- IV. The records required in subparagraph (7)(b)15.(i)(I) of this rule shall be retained for a period of 10 years following resumption of regular operations after the change, or for a period of 15 years following resumption of regular operations after the change if the project increases the design capacity of or potential to emit of a regulated NSR pollutant at such emissions unit.
- (II) The owner or operator shall provide a copy of the information set out in Subparagraph (7)(b)15.(i)(I) of this rule with the application for construction required under paragraph [391-3-1-.03\(1\)](#) of these rules.
- (III) The owner or operator shall monitor the emissions of any regulated NSR pollutant that could increase as a result of the project and that is emitted by any emissions unit identified in subparagraph (7)(b)15.(i)(I)II. of this rule, and calculate and maintain a record of the annual emissions, in tons-per-year on a calendar year basis, for a period of five years following resumption of regular operations after the change, or for a period of ten years following resumption of regular operations after the change if the project increases the design capacity of or potential to emit that regulated NSR pollutant at such emissions unit. These records shall be retained for a period of five years past the end of each calendar year. If an owner or operator is required to or elects to exclude emissions associated with startups, shutdowns, and/or malfunctions from estimations of projected actual emissions for PSD applicability purposes as allowed by subparagraph (7)(a)2.(ii)(II)II. of this rule, the owner or operator may exclude such emissions from the calculation of annual emissions.
- (IV) If the owner or operator excluded demand growth emissions from the projected actual emissions for a project and that project is subject to the requirements of subparagraph (7)(a)2.(ii)(II)III.A.(B) of this rule, the owner or operator shall calculate the actual increase in emissions due to demand growth, in tons per year on a calendar year basis, for a period 10 years following resumption of regular

operations after the change. These records shall be retained for a period of five years past the end of each calendar year.

- (V) The owner or operator shall submit a report to the Division within 60 days after the end of each year during which records must be generated under subparagraphs (7)(b)15.(i)(III) and (IV) of this rule setting out the unit's annual emissions and, if applicable, the unit's actual increase in emissions due to demand growth during the calendar year that preceded submission of the report.

- 16. Innovative control technology: 40 CFR Part 52.21(v), as amended, is hereby incorporated and adopted by reference.
- 17. Permit rescission: 40 CFR Part 52.21(w), as amended, is hereby incorporated and adopted by reference with the following exceptions:
 - (i) Paragraph (1) of 40 CFR Part 52.21(w) shall read as follows: Any permit issued under this section or a prior version of this section shall remain in effect, unless and until it expires under paragraph (r) of this section or is rescinded.
 - (ii) Paragraph (3) of 40 CFR Part 52.21(w) shall read as follows: The Director may grant an application for rescission if the application shows that this section, as it existed at the time the permit was issued, would not apply to the source or modification.
- 18. [reserved]
- 19. [reserved]
- 20. [reserved]
- 21. Actuals PALs: 40 CFR, Part 52.21(aa), as amended, is hereby incorporated by reference with the following exceptions:
 - (i) [reserved]
 - (ii) In lieu of the public participation requirements for PALs of 40 CFR Part 52.21(aa)(5), PALs for existing major stationary sources shall be established, renewed, or increased through the procedures for Title V Permit issuance, renewal, and reopenings, and revisions specified in subparagraph [391-3-1-.03\(10\)\(e\)](#) of these rules.

- (iii) In addition to the provisions for setting the 10-year actual PAL level specified in 40 CFR Part 52.21(aa)(6)(i), the PAL level shall be adjusted downward to exclude any non-compliant emissions that occurred while the source was operating above any emission limitation that was legally enforceable during the consecutive 24-month period used to determine the baseline actual emissions for the PAL pollutant.
- (iv) In lieu of the provisions of 40 CFR Part 52.21(aa)(6)(ii), the following shall apply:

For newly constructed units (which do not include modifications to existing units) on which actual construction began after the consecutive 24-month period selected for setting the 10-year actuals PAL level, in lieu of adding the baseline emissions as specified in paragraph (aa)(6)(i) of 40 CFR Part 52.21, the emissions must be added to the PAL level as follows:

- (I) For an emissions unit on which actual operation commenced less than 36 months prior to submission of a complete PAL permit application, the emissions must be added to the PAL level in an amount equal to the potential to emit of the unit.
- (II) For an emissions unit on which actual operation commenced greater than or equal to 36 months and less than 48 months prior to submission of a complete PAL permit application, the emissions must be added in an amount equal to the rate, in tons per year, at which the unit actually emitted the PAL pollutant during any consecutive 12-month period, selected by the owner or operator, that preceded submission of the PAL permit application.
- (III) For an emissions unit on which actual operation commenced greater than or equal to 48 months prior to submission of a complete PAL permit application, the emissions must be added in an amount equal to the average rate, in tons per year, at which the unit actually emitted the PAL pollutant during any consecutive 24-month period, selected by the owner or operator, that preceded submission of the PAL permit application.

(v) In addition to the contents of the PAL permit specified in 40 CFR Part 52.21(aa)(7), the PAL permit must contain a requirement that emissions calculations for compliance purposes must include non-compliant emissions that occurred while the source was operating above any emission limitation that was legally enforceable and that were in excess of that allowed by any state or Federal air quality regulation or permit condition.

(vi) In lieu of the provisions of 40 CFR Part 52.21(aa)(8)(ii)(c), the following shall apply:

All reopenings shall be carried out in accordance with the procedures for Title V Permit issuance, renewal, and reopenings, and revisions specified in subparagraph [391-3-1-.03\(10\)\(e\)](#) of these rules.

(vii) In lieu of the provisions for PAL adjustment in 40 CFR Part 52.21(aa)(10)(iv), the following shall apply:

PAL adjustment. The Director shall set the PAL level for a renewed PAL permit in accordance with subparagraphs (7)(b)21.(vii)(I) and (II) of this rule. However, in no case may any PAL level fail to comply with subparagraph (7)(b)21.(vii)(III) of this rule.

(I) If the emissions level calculated in accordance with paragraph (aa)(6) of 40 CFR Part 52.21 and subparagraphs (7)(b)21.(iii) and (iv) of this rule is equal to or greater than 80 percent of the PAL level, the Director may renew the PAL at the same level. If the emissions level calculated in accordance with (aa)(6) of 40 CFR Part 52.21 and subparagraphs (7)(b)21.(iii) and (iv) of this rule is less than 80 percent of the PAL level, the Director may renew the PAL at a level determined using the procedures set forth in 40 CFR Part 52.21(aa)(6) and subparagraphs (7)(b)21.(iii) and (iv) of this rule.

(II) The Director may set the PAL at a level that he or she determines to be more representative of the source's baseline actual emissions, or that he or she determines to be more appropriate considering air quality needs, advances in control technology, anticipated economic

growth in the area, desire to reward or encourage the source's voluntary emissions reductions, or other factors as specifically identified by the Director in his or her written rationale.

(III) Notwithstanding subparagraphs (7)(b)21.(vii)(I) and (II) of this rule:

- I. If the potential to emit of the major stationary source is less than the PAL, the Director shall adjust the PAL to a level no greater than the potential to emit of the source; and
- II. The Director shall not approve a renewed PAL level higher than the current PAL, unless the major stationary source has complied with the provisions of paragraph (aa)(11) of 40 CFR Part 52.21 (increasing a PAL).

(viii) The following is added to the list of acceptable general monitoring approaches listed in 40 CFR Part 52.21(aa)(12)(ii).

(I) Mass balance calculations for sulfur dioxide emissions from fuel combustion.

(ix) The mass balance calculation requirements of 40 CFR Part 52.21(aa)(12)(iii) shall apply for mass balance calculations for sulfur dioxide emissions from fuel combustion.

(x) The data relied upon, including, but not limited to, any quality assurance or quality control data, in calculating the monthly and annual PAL pollutant emissions shall not be submitted with the semiannual report as specified in paragraph (aa)(14)(i)(c) of 40 CFR Part 52.21, but shall be retained in permanent form suitable for inspection and submission to the Division. The records shall be retained for at least five years following the end of each calendar year.

(xi) Paragraph 40 CFR Part 52.21(aa)(12)(i)(b) shall read as follows: The PAL monitoring system must employ one of the general monitoring approaches meeting the minimum requirements set forth in paragraph (aa)(12)(ii) of this section and must be approved by the Director.

(8) New Source Performance Standards.

(a) **General Requirement.** No person shall construct or operate any facility or source which fails to comply with the New Source Performance Standards contained in 40 Code of Federal Regulations (hereinafter, CFR), Part 60, as amended, including but not limited to (unless specifically excluded below), the subparts hereby adopted through incorporation by reference in paragraph (b) of this subsection.

(b) **New Source Performance Standards.**

1. General Provisions. For purposes of applying New Source Performance Standards, 40 CFR Part 60 Subpart A (excluding 60.4 and 60.9), as amended October 7, 2020, is hereby incorporated and adopted by reference. The word "Administrator" as used in regulations adopted in this paragraph shall mean the Director of EPD.
2. Standards of Performance for Fossil-fuel Fired Steam Generators: 40 CFR Part 60 Subpart D, as amended February 16, 2012, is hereby incorporated and adopted by reference.
3. Standards of Performance for Electric Utility Steam Generating Units: 40 CFR Part 60 Subpart Da, as amended April 6, 2016, is hereby incorporated and adopted by reference.
4. Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units: 40 CFR Part 60 Subpart Db, as amended February 16, 2012, is hereby incorporated and adopted by reference.
5. Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units: 40 CFR Part 60 Subpart Dc, as amended February 16, 2012, is hereby incorporated and adopted by reference.
6. Standards of Performance for Incinerators: 40 CFR Part 60 Subpart E, as amended May 10, 2006, is hereby incorporated and adopted by reference.
7. Standards of Performance for Municipal Waste Combustors: 40 CFR Part 60 Subpart Ea, as amended October 17, 2000, is hereby incorporated and adopted by reference.
8. Standards of Performance for Portland Cement Plants: 40 CFR Part 60 Subpart F, as amended July 27, 2015, is hereby incorporated and adopted by reference.
9. Standards of Performance for Nitric Acid Plants: 40 CFR Part 60 Subpart G, as amended May 6, 2014, is hereby incorporated and adopted by reference.

10. Standards of Performance for Sulfuric Acid Plants: 40 CFR Part 60 Subpart H, as amended October 17, 2000, is hereby incorporated and adopted by reference.
11. Standards of Performance for Asphalt Concrete Plants: 40 CFR Part 60 Subpart I, as amended February 14, 1989, is hereby incorporated and adopted by reference.
12. Standards of Performance for Petroleum Refineries: 40 CFR Part 60 Subpart J, as amended December 1, 2015, is hereby incorporated and adopted by reference.
13. Standards of Performance for Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction, or Modification Commenced After June 11, 1973, and Prior to May 19, 1978: 40 CFR Part 60 Subpart K, as amended October 17, 2000, is hereby incorporated and adopted by reference.
14. Standards of Performance for Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction, or Modification Commenced After May 18, 1978, and Prior to July 23, 1984: 40 CFR Part 60 Subpart Ka, as amended December 14, 2000, is hereby incorporated and adopted by reference.
15. Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984: 40 CFR Part 60 Subpart Kb, as amended January 19, 2021, is hereby incorporated and adopted by reference.
16. Standards of Performance for Secondary Lead Smelters: 40 CFR Part 60 Subpart L, as amended October 17, 2000, is hereby incorporated and adopted by reference.
17. Standards of Performance for Secondary Brass and Bronze Ingot Production Plants: 40 CFR Part 60 Subpart M, as amended October 17, 2000, is hereby incorporated and adopted by reference.
18. Standards of Performance for Iron and Steel Plants: 40 CFR Part 60 Subpart N, as amended October 17, 2000, is hereby incorporated and adopted by reference.
19. Standards of Performance for Secondary Emissions from Basic Oxygen Process Steelmaking Facilities for Which Construction is Commenced

After January 20, 1983: 40 CFR Part 60 Subpart Na, as amended October 17, 2000, is hereby incorporated and adopted by reference.

20. Standards of Performance for Sewage Treatment Plants: 40 CFR Part 60 Subpart O, as amended October 17, 2000, is hereby incorporated and adopted by reference.
21. Standards of Performance for Primary Copper Smelters: 40 CFR Part 60 Subpart P, as amended October 17, 2000, is hereby incorporated and adopted by reference.
22. Standards of Performance for Primary Zinc Smelters: 40 CFR Part 60 Subpart Q, as amended February 14, 1989, is hereby incorporated and adopted by reference.
23. Standards of Performance for Primary Lead Smelters: 40 CFR Part 60 Subpart R, as amended February 14, 1989, is hereby incorporated and adopted by reference.
24. Standards of Performance for Primary Aluminum Reduction Plants: 40 CFR Part 60 Subpart S, as amended October 17, 2000, is hereby incorporated and adopted by reference.
25. Standards of Performance for the Phosphate Fertilizer Industry: Wet-Process Phosphoric Acid Plants: 40 CFR Part 60 Subpart T, as amended August 19, 2015, is hereby incorporated and adopted by reference.
26. Standards of Performance for the Phosphate Fertilizer Industry: Superphosphoric Acid Plants: 40 CFR Part 60 Subpart U, as amended August 19, 2015, is hereby incorporated and adopted by reference.
27. Standards of Performance for the Phosphate Fertilizer Industry: Diammonium Phosphate Plants: 40 CFR Part 60 Subpart V, as amended August 19, 2015, is hereby incorporated and adopted by reference.
28. Standards of Performance for the Phosphate Fertilizer Industry: Triple Superphosphate Plants: 40 CFR Part 60 Subpart W, as amended August 19, 2015, is hereby incorporated and adopted by reference.
29. Standards of Performance for the Phosphate Fertilizer Industry: Granular Triple Superphosphate Storage Facilities: 40 CFR Part 60 Subpart X, as amended August 19, 2015, is hereby incorporated and adopted by reference.

30. Standards of Performance for Coal Preparation Plants: 40 CFR Part 60 Subpart Y, as amended October 8, 2009, is hereby incorporated and adopted by reference.
31. Standards of Performance for Ferroalloy Production Facilities: 40 CFR Part 60 Subpart Z, as amended October 17, 2000, is hereby incorporated and adopted by reference.
32. Standards of Performance for Steel Plants: Electric Arc Furnaces: 40 CFR Part 60 Subpart AA, as amended February 22, 2005, is hereby incorporated and adopted by reference.
33. Standards of Performance for Steel Plants: Electric Arc Furnaces and Argon-Oxygen Decarburization Vessels Constructed After August 17, 1983: 40 CFR Part 60 Subpart AAa, as amended February 22, 2005, is hereby incorporated and adopted by reference.
34. Standards of Performance for Kraft Pulp Mills: 40 CFR Part 60 Subpart BB, as amended September 21, 2006, is hereby incorporated and adopted by reference.
35. Standards of Performance for Glass Manufacturing Plants: 40 CFR Part 60 Subpart CC, as amended October 17, 2000, is hereby incorporated and adopted by reference.
36. Standards of Performance for Grain Elevators: 40 CFR Part 60 Subpart DD, as amended October 17, 2000, is hereby incorporated and adopted by reference.
37. Standards of Performance for Surface Coating of Metal Furniture: 40 CFR Part 60 Subpart EE, as amended October 17, 2000, is hereby incorporated and adopted by reference.
38. Standards of Performance for Stationary Gas Turbines: 40 CFR Part 60 subpart GG, as amended June 30, 2016, is hereby incorporated and adopted by reference.
39. Standards of Performance for Lime Manufacturing Plants: 40 CFR Part 60 subpart HH, as amended October 17, 2000, is hereby incorporated and adopted by reference.
40. Standards of Performance for Lead-Acid Battery Manufacturing Plants: 40 CFR Part 60 subpart KK, as amended October 17, 2000, is hereby incorporated and adopted by reference.

41. Standards of Performance for Metallic Mineral Processing Plants: 40 CFR Part 60 Subpart LL, as amended October 17, 2000, is hereby incorporated and adopted by reference.
42. Standards of Performance for Automobile and Light-Duty Truck Coating Operations: 40 CFR Part 60 Subpart MM, as amended October 17, 2000, is hereby incorporated and adopted by reference.
43. Standards of Performance for Phosphate Rock Plants: 40 CFR Part 60 Subpart NN, as amended October 17, 2000, is hereby incorporated and adopted by reference.
44. Standards of Performance for Ammonium Sulfate Manufacture: 40 CFR Part 60 Subpart PP, as amended October 17, 2000, is hereby incorporated and adopted by reference.
45. Standards of Performance for Graphic Arts Industry: Publication Rotogravure Printing: 40 CFR Part 60 Subpart QQ, as amended April 9, 2004, is hereby incorporated and adopted by reference.
46. Standards of Performance for Pressure Sensitive Tape and Label Surface Coating Operations: 40 CFR Part 60 Subpart RR, as amended October 17, 2000, is hereby incorporated and adopted by reference.
47. Standards of Performance for Industrial Surface Coating: Large Appliances: 40 CFR Part 60 Subpart SS, as amended October 17, 2000, is hereby incorporated and adopted by reference.
48. Standards of Performance for Metal Coil Surface Coating: 40 CFR Part 60 Subpart TT, as amended October 17, 2000, is hereby incorporated and adopted by reference.
49. Standards of Performance for Asphalt Processing and Asphalt Roofing Manufacture: 40 CFR Part 60 Subpart UU, as amended October 17, 2000, is hereby incorporated and adopted by reference.
50. Standards of Performance for Equipment Leaks of VOC in the Synthetic Organic Chemicals Manufacturing Industry for Which Construction, Reconstruction, or Modification Commenced After January 5, 1981, and On or Before November 7, 2006: 40 CFR Part 60 Subpart VV, as amended June 2, 2008, is hereby incorporated and adopted by reference.
51. Standards of Performance for Beverage Can Surface Coating Industry: 40 CFR Part 60 Subpart WW, as amended October 17, 2000, is hereby incorporated and adopted by reference.

52. Standards of Performance for Bulk Gasoline Terminals: 40 CFR Part 60 Subpart XX, as amended December 19, 2003, is hereby incorporated and adopted by reference.
53. Standards of Performance for Rubber Tire Manufacturing Industry: 40 CFR Part 60 Subpart BBB, as amended June 30, 2016, is hereby incorporated and adopted by reference.
54. Standards of Performance for Volatile Organic Compound (VOC) Emission from Polymer Manufacturing Industry: 40 CFR Part 60 Subpart DDD, as amended June 30, 2016, is hereby incorporated and adopted by reference.
55. Standards of Performance for Flexible Vinyl and Urethane Printing and Coating: 40 CFR Part 60 Subpart FFF, as amended October 17, 2000, is hereby incorporated and adopted by reference.
56. Standards of Performance for Equipment Leaks of VOC in Petroleum Refineries for Which Construction, Reconstruction, or Modification Commenced After January 4, 1983, and On or Before November 7, 2006: 40 CFR Part 60 Subpart GGG, as amended June 2, 2008, is hereby incorporated and adopted by reference.
57. Standards of Performance for Synthetic Fiber Production Facilities: 40 CFR Part 60 Subpart HHH, as amended October 17, 2000, is hereby incorporated and adopted by reference.
58. Standards of Performance for Volatile Organic Compounds (VOC) Emissions from the Synthetic Organic Chemical Manufacturing Industry (SOCMI) Air Oxidation Unit Processes: 40 CFR Part 60 Subpart III, as amended June 30, 2016, is hereby incorporated and adopted by reference.
59. Standards of Performance for Petroleum Dry Cleaners: 40 CFR Part 60 Subpart JJJ, as amended October 17, 2000, is hereby incorporated and adopted by reference.
60. Standards of Performance for Equipment Leaks of VOC from Onshore Natural Gas Processing Plants: 40 CFR Part 60 Subpart KKK, as amended August 16, 2012, is hereby incorporated and adopted by reference.
61. Standards of Performance for Onshore Natural Gas Processing: 40 CFR Part 60 Subpart LLL, as amended June 30, 2016, is hereby incorporated and adopted by reference.

62. Standards of Performance for Volatile Organic Compounds (VOC) Emissions from the Synthetic Organic Chemical Manufacturing Industry (SOCMI) Distillation Operation: 40 CFR Part 60 Subpart NNN, as amended June 30, 2016, is hereby incorporated and adopted by reference.
63. Standards of Performance for Nonmetallic Mineral Processing Plants: 40 CFR Part 60 Subpart OOO, as promulgated April 28, 2009, is hereby incorporated and adopted by reference.
64. Standards of Performance for Wool Fiberglass Insulation Manufacturing Plants: 40 CFR Part 60 Subpart PPP, as amended October 17, 2000, is hereby incorporated and adopted by reference.
65. Standards of Performance for VOC Emissions from Petroleum Refinery Wastewater Systems: 40 CFR Part 60 Subpart QQQ, as amended October 17, 2000, is hereby incorporated and adopted by reference.
66. Standards of Performance for Volatile Organic Compound (VOC) Emissions from Synthetic Organic Chemical Manufacturing Industry (SOCMI) Reactor Process: 40 CFR Part 60 Subpart RRR, as amended December 14, 2000, is hereby incorporated and adopted by reference.
67. Standards of Performance for Magnetic Tape Coating: 40 CFR Part 60 Subpart SSS, as amended February 12, 1999, is hereby incorporated and adopted by reference.
68. Standards of Performance for Plastic Parts for Business Machine Coatings: 40 CFR Part 60 Subpart TTT, as amended October 17, 2000, is hereby incorporated and adopted by reference.
69. Standards of Performance for Calciners and Dryers in Mineral Industries: 40 CFR Part 60 Subpart UUU, as amended October 17, 2000, is hereby incorporated and adopted by reference.
70. Standards of Performance for Polymeric Coating of Supporting Substrates Facilities: 40 CFR Part 60 Subpart VVV, as promulgated September 11, 1989, is hereby incorporated and adopted by reference.
71. Standards of Performance for Municipal Waste Combustors for Which Construction is Commenced after September 20, 1994: 40 CFR Part 60 Subpart Eb, as amended May 10, 2006, is hereby incorporated and adopted by reference.
72. Standards of Performance for Municipal Solid Waste Landfills That Commenced Construction, Reconstruction, or Modification on or After

May 30, 1991, but Before July 18, 2014: 40 CFR Part 60 Subpart WWW, as amended October 13, 2020, is hereby incorporated and adopted by reference.

73. Standards of Performance for New Stationary Sources: Hospital/Medical/Infectious Waste Incinerators: 40 CFR Part 60 Subpart Ec, as amended September 6, 2013, is hereby incorporated and adopted by reference.
74. Standards of Performance for Small Municipal Waste Combustion Units for Which Construction is Commenced After August 30, 1999 or for Which Modification or Reconstruction is Commenced After June 6, 2001: 40 CFR Part 60 Subpart AAAA, as promulgated December 6, 2000, is hereby incorporated and adopted by reference.
75. Standards of Performance for Commercial and Industrial Solid Waste Incineration Units: 40 CFR Part 60 Subpart CCCC, as amended October 7, 2020, is hereby incorporated and adopted by reference.
76. Standards of Performance for Other Solid Waste Incinerator Units for Which Construction is Commenced After December 9, 2004, or for Which Modification or Reconstruction is Commenced On or After June 16, 2006: 40 CFR Part 60 Subpart EEEE, as amended November 24, 2006, is hereby incorporated and adopted by reference.
77. Standards of Performance for Stationary Compression Ignition Internal Combustion Engines: 40 CFR Part 60 Subpart IIII, as amended June 29, 2021, is hereby incorporated and adopted by reference.
78. Standards of Performance for Stationary Combustion Turbines: 40 CFR Part 60 Subpart KKKK, as amended October 7, 2020, is hereby incorporated and adopted by reference.
79. Standards of Performance for Stationary Spark Ignition Internal Combustion Engines: 40 CFR Part 60 Subpart JJJJ, as amended June 29, 2021, is hereby incorporated and adopted by reference.
80. Standards of Performance for Equipment Leaks of VOC in the Synthetic Organic Chemicals Manufacturing Industry for Which Construction, Reconstruction, or Modification Commenced After November 7, 2006: 40 CFR Part 60 Subpart VVa, as amended August 16, 2012, is hereby incorporated and adopted by reference.
81. Standards of Performance for Equipment Leaks of VOC in Petroleum Refineries for Which Construction, Reconstruction, or Modification

Commenced After November 7, 2006: 40 CFR Part 60 Subpart GGGa, as amended June 2, 2008, is hereby incorporated and adopted by reference.

82. Standards of Performance for Petroleum Refineries for Which Construction, Reconstruction, or Modification Commenced After May 14, 2007: 40 CFR Part 60 Subpart Ja, as amended November 26, 2018, is hereby incorporated and adopted by reference.
83. Standards of Performance for New Sewage Sludge Incineration Units: 40 CFR Part 60 Subpart LLLL, as promulgated March 21, 2011, is hereby incorporated and adopted by reference.
84. Standards of Performance for Crude Oil and Natural Gas Facilities for Which Construction, Modification, or Reconstruction Commenced After August 23, 2011, and on or Before September 18, 2015: 40 CFR Part 60 Subpart OOOO, as amended September 14, 2020, is hereby incorporated and adopted by reference.
85. Standard of Performance for Kraft Pulp Mill Affected Sources for Which Construction, Reconstruction, or Modification Commenced After May 23, 2013: 40 CFR Part 60 Subpart BBa, as amended November 5, 2020, is hereby incorporated and adopted by reference.
86. Standards of Performance for New Residential Wood Heaters: 40 CFR Part 60 Subpart AAA, as amended October 7, 2020, is hereby incorporated and adopted by reference.
87. Subpart PPPP - [reserved]
88. Standards of Performance for New Residential Hydronic Heaters and Forced-Air Furnaces: 40 CFR Part 60 Subpart QQQQ, as amended October 7, 2020, is hereby incorporated and adopted by reference.
89. Standards of Performance for Municipal Solid Waste Landfills That Commenced Construction, Reconstruction, or Modification After July 17, 2014: 40 CFR Part 60 Subpart XXX, as amended October 7, 2020, is hereby incorporated and adopted by reference.
90. Standards of Performance for Crude Oil and Natural Gas Facilities for which Construction, Modification or Reconstruction Commenced After September 18, 2015: 40 CFR Part 60 Subpart OOOOa, as amended September 15, 2020, is hereby incorporated and adopted by reference.

(9) Emission Standards for Hazardous Air Pollutants.

(a) **General Requirements.** The provisions of this section shall apply to any stationary source and to the owner or operator of any stationary source for which a standard is prescribed under 40 Code of Federal Regulations (hereinafter CFR), Parts 61 and 63, including, but not limited to (unless specifically excluded below) the subparts hereby adopted through incorporation by reference in subsection (b) of this section. For purposes of applying emission standards for hazardous air pollutants, 40 CFR, Parts 61 and 63 (excluding 61.04 and 61.16), as amended, are hereby incorporated by reference. The word "Administrator" as used in regulations adopted in this section shall mean the Director of EPD.

(b) **Emission Standards for Hazardous Air Pollutants.**

1. Emission Standard for Beryllium: 40 CFR Part 61 Subpart C, as amended October 17, 2000, is hereby incorporated and adopted by reference.
2. Emission Standard for Beryllium Rocket Motor Firing: 40 CFR Part 61 Subpart D, as amended October 17, 2000, is hereby incorporated and adopted by reference.
3. Emission Standard for Mercury: 40 CFR Part 61 Subpart E, as amended October 17, 2000, is hereby incorporated and adopted by reference.
4. Emission Standard for Vinyl Chloride: 40 CFR Part 61 Subpart F, as amended October 17, 2000, is hereby incorporated and adopted by reference.
5. Emission Standard for Equipment Leaks (Fugitive Emission Sources) of Benzene: 40 CFR Part 61 Subpart J, as amended December 14, 2000, is hereby incorporated and adopted by reference.
6. Emission Standard for Benzene Emissions from Coke Byproduct Recovery Plants: 40 CFR Part 61 Subpart L, as amended October 17, 2000, is hereby incorporated and adopted by reference.
7. Emission Standard for Asbestos (Including Work Practices): 40 CFR Part 61 Subpart M, as amended June 10, 2019, is hereby incorporated and adopted by reference.
8. Emission Standard for Inorganic Arsenic Emissions from Glass Manufacturing Plants: 40 CFR Part 61 Subpart N, as amended October 17, 2000, is hereby incorporated and adopted by reference.
9. Emission Standard for Inorganic Arsenic Emissions from Primary Copper Smelters: 40 CFR Part 61 Subpart O, as amended October 17, 2000, is hereby incorporated and adopted by reference.

10. Emission Standard for Inorganic Arsenic Emissions from Arsenic Trioxide and Metallic Arsenic Production Facilities: 40 CFR Part 61 Subpart P, as amended October 3, 1986, is hereby incorporated and adopted by reference.
11. Emission Standard for Equipment Leaks (Fugitive Emission Sources) [of VHAP]: 40 CFR Part 61 Subpart V, as amended December 14, 2000, is hereby incorporated and adopted by reference.
12. Emission Standard for Benzene Emissions from Benzene Storage Vessels: 40 CFR Part 61 Subpart Y, as amended December 14, 2000, is hereby incorporated and adopted by reference.
13. Emission Standard for Benzene Emissions from Benzene Transfer Operations: 40 CFR Part 61 Subpart BB, as amended December 14, 2000, is hereby incorporated and adopted by reference.
14. Emission Standard for Benzene Waste Operations: 40 CFR Part 61 Subpart FF, as amended December 4, 2003, is hereby incorporated and adopted by reference.
15. General Provisions. For purposes of applying Emission Standards for Hazardous Air Pollutants, 40 CFR Part 63 Subpart A, as amended November 19, 2021, [excluding 63.13, and 63.15(a)(2)] is hereby incorporated and adopted by reference, subject to the following provisions:
 - (i) The definition of "Potential to Emit" in 40 CFR Part 63.2 shall be modified as follows:
 - (I) The phrase "is federally enforceable" shall read "is federally enforceable or enforceable as a practical matter."
16. Requirements for Control Technology Determinations for Major Sources in Accordance with Clean Air Act Paragraph 112(g): 40 CFR Parts 63.40 through 63.44, as amended June 30, 1999, is hereby incorporated and adopted by reference, subject to the following provisions:
 - (i) Terms used in this paragraph shall have the meaning given to them in the Clean Air Act, 40 CFR Part 63 Subparts A and B, and the Georgia Air Quality Act.
 - (ii) The "Effective Date of Paragraph 112(g)(2)(B)," as defined in 40 CFR Part 63.41, shall be June 29, 1998.

- (iii) The "Notice of MACT Approval," as defined in 40 CFR Part 63.41, shall be the air construction permit issued by the Division.
 - (iv) The "Permitting Authority," as defined in 40 CFR Part 63.41, shall be the Division.
 - (v) In lieu of the administrative procedures for review of the Notice of MACT Approval, as set forth in 40 CFR Parts 63.43(f)(1) through (5), the Division will act in accordance with the permitting requirements as set forth in Chapter [391-3-1-.03](#) Permits, as amended, and administrative procedures for preconstruction review and approval established by the Division.
 - (vi) In lieu of the opportunity for public comment on the Notice of MACT Approval, as set forth in 40 CFR Part 63.43(h), the Division will provide opportunity for public comment on the Notice of MACT Approval pursuant to Chapter [391-3-1-.03\(2\)\(i\)](#).
 - (vii) The Notice of MACT Approval shall become effective upon issuance of the air construction permit by the Division.
17. Requirements for Control Technology Determinations for Major Sources in Accordance with the Clean Air Act sections 112(j): 40 CFR Part 63 Subpart B, Sections 63.50 through 63.56, as amended July 11, 2005, is hereby incorporated and adopted by reference.
 18. [reserved]
 19. Compliance Extensions for Early Reductions: 40 CFR Part 63 Subpart D, as amended November 21, 1994, is hereby incorporated and adopted by reference.
 20. Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry: 40 CFR Part 63 Subpart F, as amended November 19, 2020, is hereby incorporated and adopted by reference.
 21. Emission Standards for Organic Hazardous Air Pollutants from Synthetic Organic Chemical Manufacturing Industry for Process Vents, Storage Vessels, Transfer Operations, and Wastewater: 40 CFR Part 63 Subpart G, as amended November 19, 2020, is hereby incorporated and adopted by reference. Only procedures listed in 63.112(e) of 40 CFR Part 63 Subpart G, shall be used to comply with the emission standard in 63.112(a) unless otherwise specifically approved by the Director.

22. Emission Standards for Organic Hazardous Air Pollutants for Equipment Leaks: 40 CFR Part 63 Subpart H, as amended November 19, 2020, is hereby incorporated and adopted by reference.
23. Emission Standards for Organic Hazardous Air Pollutants for Certain Processes Subject to the Negotiated Regulation for Equipment Leaks: 40 CFR Part 63 Subpart I, as amended June 23, 2003, is hereby incorporated and adopted by reference.
24. Emission Standards for Polyvinyl Chloride and Copolymers Production: 40 CFR Part 63 Subpart J, as amended November 19, 2020, is hereby incorporated and adopted by reference.
25. [reserved]
26. Emission Standards for Coke Oven Batteries: 40 CFR Part 63 Subpart L, as amended November 19, 2020, is hereby incorporated and adopted by reference.
27. Perchloroethylene Air Emission Standards for Dry Cleaning Facilities: 40 CFR Part 63 Subpart M, as amended November 19, 2020, is hereby incorporated and adopted by reference.
28. Emission Standards for Chromium Emissions from Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks: 40 CFR Part 63 Subpart N, as amended November 19, 2020, is hereby incorporated and adopted by reference.
29. Ethylene Oxide Emissions Standards for Sterilization Facilities: 40 CFR Part 63 Subpart O, as amended November 19, 2020, is hereby incorporated and adopted by reference.
30. [reserved]
31. Emission Standards for Hazardous Air Pollutants for Industrial Process Cooling Towers: 40 CFR Part 63 Subpart Q, as amended November 19, 2020, is hereby incorporated and adopted by reference.
32. Emission Standards for Gasoline Distribution Facilities (Bulk Gasoline Terminals and Pipeline Breakout Stations): 40 CFR Part 63 Subpart R, as amended December 4, 2020, is hereby incorporated and adopted by reference.

33. Emission Standards for Pulp & Paper Industries: 40 CFR Part 63 Subpart S, as amended November 19, 2020, is hereby incorporated and adopted by reference.
34. Emission Standards for Halogenated Solvent Cleaning: 40 CFR Part 63 Subpart T, as amended November 19, 2020, is hereby incorporated and adopted by reference.
35. Emission Standards for Hazardous Air Pollutant Emissions: Group I Polymers and Resins: 40 CFR Part 63 Subpart U, as amended November 19, 2020, is hereby incorporated and adopted by reference.
36. [reserved]
37. Emission Standards for Hazardous Air Pollutants for Epoxy Resins Production and Non-Nylon Polyamides Production: 40 CFR Part 63 Subpart W, as amended November 19, 2020, is hereby incorporated and adopted by reference.
38. Emission Standards for Hazardous Air Pollutants from Secondary Lead Smelting: 40 CFR Part 63 Subpart X, as amended November 19, 2020, is hereby incorporated and adopted by reference.
39. Emission Standards for Marine Tank Vessel Loading Operations: 40 CFR Part 63 Subpart Y, as amended November 19, 2020, is hereby incorporated and adopted by reference.
40. [reserved]
41. Emission Standards for Hazardous Air Pollutants from Phosphoric Acid Manufacturing Plants: 40 CFR Part 63 Subpart AA, as amended November 19, 2020, is hereby incorporated and adopted by reference.
42. Emission Standards for Hazardous Air Pollutants from Phosphate Fertilizers Production Plants: 40 CFR Part 63 Subpart BB, as amended November 19, 2020, is hereby incorporated and adopted by reference.
43. Emission Standards for Hazardous Air Pollutants from Petroleum Refineries: 40 CFR Part 63 Subpart CC, as amended November 19, 2020, is hereby incorporated and adopted by reference. Only procedures listed in 63.642(k) of 40 CFR Part 63 Subpart CC shall be used to comply with the emission standard in 63.642(g).

44. Emission Standards for Hazardous Air Pollutants from Off-Site Waste and Recovery Operations: 40 CFR Part 63 Subpart DD, as amended November 19, 2020, is hereby incorporated and adopted by reference.
45. Emission Standards for Magnetic Tape Manufacturing Operations: 40 CFR Part 63 Subpart EE, as amended December 28, 2020, is hereby incorporated and adopted by reference.
46. [reserved]
47. Emission Standards for Aerospace Manufacturing and Rework Facilities: 40 CFR Part 63 Subpart GG, as amended November 19, 2020, is hereby incorporated and adopted by reference.
48. Emission Standards for Hazardous Air Pollutants for Source Categories: Oil & Natural Gas Production Facilities: 40 CFR Part 63 Subpart HH, as amended November 19, 2020, is hereby incorporated and adopted by reference.
49. Emission Standards for Shipbuilding and Ship Repair (Surface Coating): 40 CFR Part 63 Subpart II, as amended November 19, 2020, is hereby incorporated and adopted by reference.
50. Emission Standards for Wood Furniture Manufacturing Operations: 40 CFR Part 63 Subpart JJ, as amended November 19, 2020, is hereby incorporated and adopted by reference.
51. Emission Standards for the Printing and Publishing Industry: 40 CFR Part 63 Subpart KK, as amended November 19, 2020, is hereby incorporated and adopted by reference.
52. Emission Standards for Hazardous Air Pollutants for Source Categories: Primary Aluminum Reduction Plants: 40 CFR Part 63 Subpart LL, as amended November 19, 2020, is hereby incorporated and adopted by reference.
53. Emission Standards for Hazardous Air Pollutants for Source Categories: Chemical Recovery Combustion Sources at Kraft, Soda, Sulfite, and Stand-Alone Semichemical Pulp Mills: 40 CFR Part 63 Subpart MM, as amended November 19, 2020, is hereby incorporated and adopted by reference.
54. Emission Standards for Hazardous Air Pollutants for Wool Fiberglass Manufacturing at Area Sources: 40 CFR Part 63 Subpart NN, as amended July 29, 2015, is hereby incorporated and adopted by reference.

55. Emission Standards for Tanks-Level 1: 40 CFR Part 63 Subpart OO, as amended June 23, 2003, is hereby incorporated and adopted by reference.
56. Emission Standards for Containers: 40 CFR Part 63 Subpart PP, as amended June 23, 2003, is hereby incorporated and adopted by reference.
57. Emission Standards for Surface Impoundments: 40 CFR Part 63 Subpart QQ, as amended June 23, 2003, is hereby incorporated and adopted by reference.
58. Emission Standards for Individual Drain Systems: 40 CFR Part 63 Subpart RR, as amended June 23, 2003, is hereby incorporated and adopted by reference.
59. Emission Standards for Hazardous Air Pollutants from: Closed Vent Systems, Control Devices, Recovery Devices and Routing to a Fuel Gas System or a Process: 40 CFR Part 63 Subpart SS, as amended July 6, 2020, is hereby incorporated and adopted by reference.
60. Emission Standards for Hazardous Air Pollutants from Equipment Leaks-Control Level 1: 40 CFR Part 63 Subpart TT, as amended July 12, 2002, is hereby incorporated and adopted by reference.
61. Emission Standards for Hazardous Air Pollutants from Equipment Leaks-Control Level 2 Standards: 40 CFR Part 63 Subpart UU, as amended July 12, 2002, is hereby incorporated and adopted by reference.
62. Emission Standards for Oil-Water Separators and Organic-Water Separators: 40 CFR Part 63 Subpart VV, as amended June 23, 2003, is hereby incorporated and adopted by reference.
63. Emission Standards for Hazardous Air Pollutants from Storage Vessels (Tanks)-Control Level 2: 40 CFR Part 63 Subpart WW, as amended July 12, 2002, is hereby incorporated and adopted by reference.
64. Emission Standards for Ethylene Manufacturing Process Units: Heat Exchange Systems and Waste Operations: 40 CFR Part 63 Subpart XX, as amended July 6, 2020, is hereby incorporated and adopted by reference.
65. Emission Standards for Hazardous Air Pollutants for Source Categories: Generic Maximum Achievable Control Technology Standards: 40 CFR Part 63 Subpart YY, as amended November 19, 2021, is hereby incorporated and adopted by reference.
66. [reserved]

67. [reserved]
68. [reserved]
69. Emission standards for Hazardous Air Pollutants for Source Categories: Steel Pickling - HCl Process Facilities and Hydrochloric Acid Regeneration Plants: 40 CFR Part 63 Subpart CCC, as amended November 19, 2020, is hereby incorporated and adopted by reference.
70. Emission Standards for Hazardous Air Pollutants for Source Categories: Mineral Wool Production: 40 CFR Part 63 Subpart DDD, as amended December 28, 2020, is hereby incorporated and adopted by reference.
71. Emission Standards for Hazardous Air Pollutants for Source Categories: Hazardous Waste Combustors: 40 CFR Part 63 Subpart EEE, as amended November 19, 2020, is hereby incorporated and adopted by reference.
72. [reserved]
73. Emission Standards for Hazardous Air Pollutants for Source Categories: Pharmaceuticals Production: 40 CFR Part 63 Subpart GGG, as amended November 19, 2020, is hereby incorporated and adopted by reference.
74. Emission Standards for Hazardous Air Pollutants for Source Categories: Natural Gas Transmission and Storage Facilities: 40 CFR Part 63 Subpart HHH, as amended November 19, 2020, is hereby incorporated and adopted by reference.
75. Emission Standards for Hazardous Air Pollutants for Source Categories: Flexible Polyurethane Foam Production: 40 CFR Part 63 Subpart III, as amended November 19, 2020, is hereby incorporated and adopted by reference.
76. Emission Standards for Hazardous Air Pollutant Emissions: Group IV Polymers and Resins: 40 CFR Part 63 Subpart JJJ, as amended November 19, 2020, is hereby incorporated and adopted by reference.
77. [reserved]
78. Emission Standards for Hazardous Air Pollutants from the Portland Cement Manufacturing Industry: 40 CFR Part 63 Subpart LLL, as amended November 19, 2020, is hereby incorporated and adopted by reference.

79. Emission Standards for Hazardous Air Pollutants for Source Categories: Pesticide Active Ingredient Production: 40 CFR Part 63 Subpart MMM, as amended November 19, 2020, is hereby incorporated and adopted by reference.
80. Emission Standards for Hazardous Air Pollutants for Source Categories: Wool Fiberglass Manufacturing: 40 CFR Part 63 Subpart NNN, as amended December 28, 2020, is hereby incorporated and adopted by reference.
81. Emission Standards for Hazardous Air Pollutant Emissions: Manufacture of Amino/Phenolic Resins: 40 CFR Part 63 Subpart OOO, as amended November 19, 2020, is hereby incorporated and adopted by reference.
82. Emission Standards for Hazardous Air Pollutants for Source Categories: Polyether Polyols Production: 40 CFR Part 63 Subpart PPP, as amended November 19, 2020, is hereby incorporated and adopted by reference.
83. Emission Standards for Hazardous Air Pollutants for Primary Copper Smelting: 40 CFR Part 63 Subpart QQQ, as amended November 19, 2020, is hereby incorporated and adopted by reference.
84. Emission Standards for Hazardous Air Pollutants for Secondary Aluminum Production: 40 CFR Part 63 Subpart RRR, as amended November 19, 2020, is hereby incorporated and adopted by reference.
85. [reserved]
86. Emission Standards for Hazardous Air Pollutants for Source Categories: Primary Lead Smelting: 40 CFR Part 63 Subpart TTT, as amended November 19, 2020, is hereby incorporated and adopted by reference.
87. Emission Standards for Hazardous Air Pollutants for Petroleum Refineries: Catalytic Cracking Units, Catalytic Reforming Units, and Sulfur Recovery Units: 40 CFR Part 63 Subpart UUU, as amended November 19, 2020, is hereby incorporated and adopted by reference.
88. Emission Standards for Hazardous Air Pollutants for Source Categories: Publicly Owned Treatment Works: 40 CFR Part 63 Subpart VVV, as amended November 19, 2020, is hereby incorporated and adopted by reference.
89. [reserved]

90. Emission Standards for Hazardous Air Pollutants for Source Categories: Ferroalloys Production: Ferromanganese and Silicomanganese: 40 CFR Part 63 Subpart XXX, as amended November 19, 2020, is hereby incorporated and adopted by reference.
91. [reserved]
92. [reserved]
93. Emission Standards for Hazardous Air Pollutants for Source Categories: Municipal Solid Waste Landfills: 40 CFR Part 63 Subpart AAAA, as amended October 13, 2020, is hereby incorporated and adopted by reference.
94. [reserved]
95. Emission Standards for Hazardous Air Pollutants for Source Categories: Manufacturing of Nutritional Yeast: 40 CFR Part 63 Subpart CCCC, as amended October 16, 2017, is hereby incorporated and adopted by reference.
96. Emission Standards for Hazardous Air Pollutants: Plywood and Composite Wood Products: 40 CFR Part 63 Subpart DDDD, as amended November 19, 2020, is hereby incorporated and adopted for reference.
97. Emission Standards for Hazardous Air Pollutants: Organic Liquid Distribution (non-gasoline): 40 CFR Part 63 Subpart EEEE, as amended November 19, 2020, is hereby incorporated and adopted for reference.
98. Emission Standards for Hazardous Air Pollutants: Miscellaneous Organic Chemical Manufacturing: 40 CFR Part 63 Subpart FFFF, as amended November 19, 2020, is hereby incorporated and adopted by reference.
99. Emission Standards for Hazardous Air Pollutants for Source Categories: Vegetable Oil Production: 40 CFR Part 63 Subpart GGGG, as amended November 19, 2020, is hereby incorporated and adopted by reference.
100. Emission Standards for Hazardous Air Pollutants for Wet Formed Fiberglass Mat Production: 40 CFR Part 63 Subpart HHHH, as amended November 19, 2020, is hereby incorporated and adopted by reference.
101. Emission Standards for Hazardous Air Pollutants: Surface Coating of Automobiles and Light-Duty Trucks: 40 CFR Part 63 Subpart IIII, as amended November 19, 2021, is hereby incorporated and adopted by reference.

102. Emission Standards for Hazardous Air Pollutants for Paper and Other Web Coatings: 40 CFR Part 63 Subpart JJJJ, as amended November 19, 2020, is hereby incorporated and adopted by reference.
103. Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Cans: 40 CFR Part 63 Subpart KKKK, as amended November 19, 2021, is hereby incorporated and adopted by reference.
104. [reserved]
105. Emission Standards for Hazardous Air Pollutants: Surface Coating of Miscellaneous Metal Parts and Products: 40 CFR Part 63 Subpart MMMM, as amended November 19, 2020, is hereby incorporated and adopted by reference.
106. Emission Standards for Hazardous Air Pollutants: Surface Coating of Large Appliances: 40 CFR Part 63 Subpart NNNN, as amended November 19, 2020, is hereby incorporated and adopted by reference.
107. Emission Standards for Hazardous Air Pollutants: Printing, Coating, and Dyeing of Fabrics and Other Textiles: 40 CFR Part 63 Subpart OOOO, as amended November 19, 2020, is hereby incorporated and adopted by reference.
108. Emission Standards for Hazardous Air Pollutants: Surface Coating of Plastic Parts and Products: 40 CFR Part 63 Subpart PPPP, as amended November 19, 2020, is hereby incorporated and adopted by reference.
109. Emission Standards for Hazardous Air Pollutants: Surface Coating of Wood Building Products: 40 CFR Part 63 Subpart QQQQ, as amended November 19, 2020, is hereby incorporated and adopted by reference.
110. Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Furniture: 40 CFR Part 63, Subpart RRRR, as amended November 19, 2020, is hereby incorporated and adopted by reference.
111. Emission Standards for Hazardous Air Pollutants for Metal Coil Surface Coating Operations: 40 CFR Part 63 Subpart SSSS, as amended November 19, 2020, is hereby incorporated and adopted by reference.
112. Emission Standards for Hazardous Air Pollutants for Leather Finishing Operations: 40 CFR Part 63 Subpart TTTT, as amended November 19, 2020, is hereby incorporated and adopted by reference.

113. Emission Standards for Hazardous Air Pollutants for Cellulose Products Manufacturing: 40 CFR Part 63 Subpart UUUU, as amended November 19, 2020, is hereby incorporated and adopted by reference.
114. Emission Standards for Hazardous Air Pollutants for Source Categories: Boat Manufacturing: 40 CFR Part 63 Subpart VVVV, as amended November 19, 2021, is hereby incorporated and adopted by reference.
115. Emission Standards for Hazardous Air Pollutants: Reinforced Plastic Composites Production: 40 CFR Part 63 Subpart WWWW, as amended November 19, 2020, is hereby incorporated and adopted by reference.
116. Emission Standards for Hazardous Air Pollutants for Tire Manufacturing: 40 CFR Part 63 Subpart XXXX, as amended November 19, 2020, is hereby incorporated and adopted by reference.
117. Emission Standards for Hazardous Air Pollutants for Stationary Combustion Engines: 40 CFR Part 63 Subpart YYYY, as amended November 19, 2020, is hereby incorporated and adopted by reference.
118. Emission Standards for Hazardous Air Pollutants for Reciprocating Internal Combustion Engines: 40 CFR Part 63 Subpart ZZZZ, as amended December 4, 2020, is hereby incorporated and adopted by reference.
119. Emission Standards for Hazardous Air Pollutants for Lime Manufacturing Plants: 40 CFR Part 63 Subpart AAAAA, as amended December 28, 2020, is hereby incorporated and adopted by reference.
120. Emission Standards for Hazardous Air Pollutants: Semiconductor Manufacturing: 40 CFR Part 63 Subpart BBBB, as amended November 19, 2020, is hereby incorporated and adopted by reference.
121. Emission Standards for Hazardous Air Pollutants for Coke Ovens: Pushing, Quenching, and Battery Stacks: 40 CFR Part 63 Subpart CCCC, as amended November 19, 2020, is hereby incorporated and adopted by reference.
122. Emission Standards for Hazardous Air Pollutants for Major Sources: Industrial, Commercial, and Institutional Boilers and Process Heaters: 40 CFR Part 63 Subpart DDDD, as amended December 28, 2020, is hereby incorporated and adopted by reference.

123. Emission Standards for Hazardous Air Pollutants for Iron and Steel Foundries: 40 CFR Part 63 Subpart EEEEE, as amended November 19, 2020, is hereby incorporated and adopted by reference.
124. Emission Standards for Hazardous Air Pollutants: Integrated Iron and Steel Manufacturing: 40 CFR Part 63 Subpart FFFFF, as amended November 19, 2020, is hereby incorporated and adopted by reference.
125. Emission Standards for Hazardous Air Pollutants: Site Remediation, 40 CFR Part 63 Subpart GGGGG: as amended November 19, 2020, is hereby incorporated and adopted by reference.
126. Emission Standards for Hazardous Air Pollutants: Miscellaneous Coating Manufacturing: 40 CFR Part 63 Subpart HHHHH, as amended November 25, 2020, is hereby incorporated and adopted by reference.
127. Emission Standards for Hazardous Air Pollutants: Mercury Emissions from Mercury Cell Chlor-Alkali Plants: 40 CFR Part 63 Subpart IIIII, as amended December 28, 2020, is hereby incorporated and adopted by reference.
128. Emission Standards for Hazardous Air Pollutants: Brick and Structural Clay Products Manufacturing: 40 CFR Part 63 Subpart JJJJJ, as amended November 19, 2020, is hereby incorporated and adopted by reference.
129. Emission Standards for Hazardous Air Pollutants for Clay Ceramics Manufacturing: 40 CFR Part 63 Subpart KKKKK, as amended November 19, 2021, is hereby incorporated and adopted by reference.
130. Emission Standards for Hazardous Air Pollutants: Asphalt Processing and Asphalt Roofing Manufacturing: 40 CFR Part 63 Subpart LLLLL, as amended November 19, 2020, is hereby incorporated and adopted by reference.
131. Emission Standards for Hazardous Air Pollutants: Flexible Polyurethane Foam Fabrication Operations: 40 CFR Part 63 Subpart MMMMM, as amended November 18, 2021, is hereby incorporated and adopted by reference.
132. Emission Standards for Hazardous Air Pollutants: Hydrochloric Acid Production: 40 CFR Part 63 Subpart NNNNN, as amended November 19, 2020, is hereby incorporated and adopted by reference.
133. [reserved]

134. Emission Standards for Hazardous Air Pollutants: Engine Test Cells/Stands: 40 CFR Part 63 Subpart P P P P P, as amended November 19, 2020, is hereby incorporated and adopted by reference.
135. Emission Standards for Hazardous Air Pollutants for Friction Materials Manufacturing Facilities: 40 CFR Part 63 Subpart Q Q Q Q Q, as amended November 19, 2020, is hereby incorporated and adopted by reference.
136. Emission Standards for Hazardous Air Pollutants: Taconite Iron Ore Processing: 40 CFR Part 63 Subpart R R R R R, as amended November 19, 2020, is hereby incorporated and adopted by reference.
137. Emission Standards for Hazardous Air Pollutants for Refractory Products Manufacturing: 40 CFR Part 63 Subpart S S S S S, as amended November 19, 2021, is hereby incorporated and adopted by reference.
138. Emission Standards for Hazardous Air Pollutants for Primary Magnesium Manufacturing: 40 CFR Part 63 Subpart T T T T T, as amended November 19, 2020, is hereby incorporated and adopted by reference.
139. Emission Standards for Hazardous Air Pollutants: Coal- and Oil-Fired Electric Utility Steam Generating Units: 40 CFR Part 63 Subpart U U U U U, as amended September 9, 2020, is hereby incorporated and adopted by reference.
140. [reserved]
141. Emission Standards for Hospital Ethylene Oxide Sterilizers: 40 CFR Part 63 Subpart W W W W W, as amended November 19, 2020, is hereby incorporated and adopted by reference.
142. [reserved]
143. Emission Standards for Hazardous Air Pollutants for Area Sources: Electric Arc Furnace Steelmaking Facilities: 40 CFR Part 63 Subpart Y Y Y Y Y, as amended June 24, 2015, is hereby incorporated and adopted by reference.
144. Emission Standards for Hazardous Air Pollutants for Iron and Steel Foundries Area Sources: 40 CFR Part 63 Subpart Z Z Z Z Z, as amended September 10, 2020, is hereby incorporated and adopted by reference.
145. [reserved]

146. Emission Standards for Hazardous Air Pollutants for Source Category: Gasoline Bulk Terminals, Bulk Plants, and Pipeline Facilities: 40 CFR Part 63 Subpart BBBBBB, as amended November 19, 2020, is hereby incorporated and adopted by reference.
147. Emission Standards for Hazardous Air Pollutants for Source Category: Gasoline Dispensing Facilities: 40 CFR Part 63 Subpart CCCCCC, as amended November 19, 2020, is hereby incorporated and adopted by reference.
148. Emission Standards for Hazardous Air Pollutants for Polyvinyl Chloride and Copolymers Production Area Sources: 40 CFR Part 63 Subpart DDDDDD, as amended February 4, 2015, is hereby incorporated and adopted by reference.
149. Emission Standards for Hazardous Air Pollutants for Primary Copper Smelting Area Sources: 40 CFR Part 63 Subpart EEEEEEE, as amended July 3, 2007, is hereby incorporated and adopted by reference.
150. Emission Standards for Hazardous Air Pollutants for Secondary Copper Smelting Area Sources: 40 CFR Part 63 Subpart FFFFFFF, as amended July 3, 2007, is hereby incorporated and adopted by reference.
151. Emission Standards for Hazardous Air Pollutants for Primary Nonferrous Metals Area Sources - Zinc, Cadmium, and Beryllium: 40 CFR Part 63 Subpart GGGGGG, as promulgated January 23, 2007, is hereby incorporated and adopted by reference.
152. Emission Standards for Hazardous Air Pollutants: Paint Stripping and Miscellaneous Surface Coating Operations at Area Sources: 40 CFR Part 63 Subpart HHHHHH, as amended November 19, 2020, is hereby incorporated and adopted by reference.
153. [reserved]
154. Emission Standards for Hazardous Air Pollutants: Industrial, Commercial, and Institutional Boilers, Area Sources: 40 CFR Part 63 Subpart JJJJJ, as amended September 14, 2016, is hereby incorporated and adopted by reference.
155. [reserved]
156. Emission Standards for Hazardous Air Pollutants for Acrylic and Modacrylic Fibers Production Area Sources: 40 CFR Part 63 Subpart

LLLLLL, as amended March 26, 2008, is hereby incorporated and adopted by reference.

157. Emission Standards for Hazardous Air Pollutants for Carbon Black Production Area Sources: 40 CFR Part 63 Subpart MMMMMM, as amended March 26, 2008, is hereby incorporated and adopted by reference.
158. Emission Standards for Hazardous Air Pollutants for Chemical Manufacturing Area Sources: Chromium Compounds: 40 CFR Part 63 Subpart NNNNNN, as amended March 26, 2008, is hereby incorporated and adopted by reference.
159. Emission Standards for Hazardous Air Pollutants for Flexible Polyurethane Foam Production and Fabrication Area Sources: 40 CFR Part 63 Subpart OOOOOO, as amended November 18, 2021, is hereby incorporated and adopted by reference.
160. Emission Standards for Hazardous Air Pollutants for Lead Acid Battery Manufacturing Area Sources: 40 CFR Part 63 Subpart PPPPPP, as amended November 19, 2020, is hereby incorporated and adopted by reference.
161. Emission Standards for Hazardous Air Pollutants for Wood Preserving Area Sources: 40 CFR Part 63 Subpart QQQQQQ, as amended November 19, 2020, is hereby incorporated and adopted by reference.
162. Emission Standards for Hazardous Air Pollutants for Clay Ceramics Manufacturing Area Sources: 40 CFR Part 63 Subpart RRRRRR, as amended November 19, 2020, is hereby incorporated and adopted by reference.
163. Emission Standards for Hazardous Air Pollutants for Glass Manufacturing Area Sources: 40 CFR Part 63 Subpart SSSSSS, as promulgated December 26, 2007, is hereby incorporated and adopted by reference.
164. Emission Standards for Hazardous Air Pollutants for Secondary Nonferrous Metals Processing Area Sources: 40 CFR Part 63 Subpart TTTTTT, as amended November 19, 2020, is hereby incorporated and adopted by reference.
165. [reserved]

166. Emission Standards for Hazardous Air Pollutants for Chemical Manufacturing Area Sources: 40 CFR Part 63 Subpart VVVVVV, as amended December 21, 2012, is hereby incorporated and adopted by reference.
167. Emission Standards for Hazardous Air Pollutants: Area Source Standards for Plating and Polishing Operations: 40 CFR Part 63 Subpart WWWWWW, as amended November 19, 2020, is hereby incorporated and adopted by reference.
168. Emission Standards for Hazardous Air Pollutants: Area Source Standards for Nine Metal Fabrication and Finishing Source Categories: 40 CFR Part 63 Subpart XXXXXX, as amended November 19, 2020, is hereby incorporated and adopted by reference.
169. Emission Standards for Hazardous Air Pollutants for Area Sources: Ferroalloys Production Facilities: 40 CFR Part 63 Subpart YYYYYY, as amended November 19, 2020, is hereby incorporated and adopted by reference.
170. Emission Standards for Hazardous Air Pollutants: Area Source Standards for Aluminum, Copper, and Other Nonferrous Foundries: 40 CFR Part 63 Subpart ZZZZZZ, as amended September 10, 2009, is hereby incorporated and adopted by reference.
171. Emission Standards for Hazardous Air Pollutants for Area Sources: Asphalt Processing and Asphalt Roofing Manufacturing: 40 CFR Part 63 Subpart AAAAAAA, as amended November 19, 2020, is hereby incorporated and adopted by reference.
172. Emission Standards for Hazardous Air Pollutants for Area Sources: Chemical Preparations Industry: 40 CFR Part 63 Subpart BBBBBB, as amended November 19, 2020, is hereby incorporated and adopted by reference.
173. Emission Standards for Hazardous Air Pollutants for Area Sources: Paints and Allied Products Manufacturing: 40 CFR Part 63 Subpart CCCCCC, as amended November 19, 2020, is hereby incorporated and adopted by reference.
174. Emission Standards for Hazardous Air Pollutants: Area Source Standards for Prepared Feeds Manufacturing: 40 CFR Part 63 Subpart DDDDDD, as amended December 23, 2011, is hereby incorporated and adopted by reference.

175. Emission Standards for Hazardous Air Pollutants: Gold Mine Ore Processing and Production Area Source Category: 40 CFR Part 63 Subpart EEEEEEE, as promulgated February 17, 2011, is hereby incorporated and adopted by reference.
176. [reserved]
177. [reserved]
178. Emission Standards for Hazardous Air Pollutants: Polyvinyl Chloride and Copolymers Production: 40 CFR Part 63 Subpart HHHHHHH, as amended November 19, 2020, is hereby incorporated and adopted by reference.

(10) Chemical Accident Prevention Provisions.

(a) General Requirements.

1. The provisions of this section (10) shall apply to any stationary source and to the owner or operator of any stationary source subject to any requirement under 40 Code of Federal Regulations (hereinafter CFR), Parts 68, as amended. The word "Administrator" as used in regulations adopted in this section shall mean the Director of EPD.
2. Definitions: For the purpose of this section, 40 CFR, Section 68.3, as amended, is hereby incorporated and adopted by reference.

(b) Chemical Accident Prevention Standards.

1. General: 40 CFR 68, Subpart A, as amended, is hereby incorporated and adopted by reference.
2. Hazard Assessment, 40 CFR 68, Subpart B, as amended, is hereby incorporated and adopted by reference.
3. Program 2 Prevention Program, 40 CFR 68, Subpart C, as amended, is hereby incorporated and adopted by reference.
4. Program 3 Prevention Program, 40 CFR 68, Subpart D, as amended, is hereby incorporated and adopted by reference.
5. Emergency Response, 40 CFR 68, Subpart E, as amended, is hereby incorporated and adopted by reference.
6. Regulated Substances for Accidental Release Prevention, 40 CFR 68, Subpart F, as amended, is hereby incorporated and adopted by reference.

7. Risk Management Plan, 40 CFR 68, Subpart G, as amended, is hereby incorporated and adopted by reference.
8. Other Requirements, 40 CFR 68, Subpart H, as amended, is hereby incorporated and adopted by reference.

(11) **Compliance Assurance Monitoring**

- (a) **General Requirements.** The provisions of this section (11) shall apply to any stationary source and to the owner or operator of any stationary source subject to any requirement under 40 CFR Part 64 as amended, which is incorporated and adopted herein by reference.
- (b) **The word "Administrator"** as used in regulations adopted in this section shall mean the Director of EPD.

(12) **Cross State Air Pollution Rule NOx Annual Trading Program**

- (a) **General Requirements.** The provisions of this paragraph (12) except as provided in sub-paragraphs (f) and (g) shall apply to any source and the owner and operator of any such source subject to any requirements under 40 Code of Federal Regulations (hereinafter, 40 CFR), Part 97 Subpart AAAAA, as amended (at 81 FR 74604-07, October 26, 2016). The term "Permitting Authority" as used in regulations adopted in this paragraph shall mean, for a unit located in Georgia, the Environmental Protection Division of the Georgia Department of Natural Resources. For a unit located outside the State of Georgia participating in the trading program, the "Permitting Authority" is as defined in 40 CFR Part 97.402.
- (b) **General Provisions.** 40 CFR Part 97.401 through 40 CFR Part 97.408, as amended is hereby incorporated and adopted by reference.
- (c) **Designated Representative.** 40 CFR Part 97.413 through 40 CFR Part 97.418, as amended is hereby incorporated and adopted by reference.
- (d) **[reserved]**
- (e) **[reserved]**
- (f) **Allowance Allocations.** 40 CFR Part 97.411 through 40 CFR Part 97.412, as amended is hereby incorporated and adopted by reference with the following exceptions: 40 CFR 97.411(b)(2), 40 CFR 97.411(c)(5)(iii) and 97.412(b).

For purposes of this paragraph (12), the Georgia NOx Annual trading budget and new unit set-aside for allocations of CSAPR NOx Annual allowances, and the

variability limit for the Georgia NOx Annual trading budget, for the control periods in 2017 and thereafter are as follows:

1. The NOx Annual trading budget is 53,738 tons.
 2. The new unit set-aside is 1,075 tons.
 3. The variability limit is 9,673 tons.
 4. The Georgia NOx Annual trading budget in this subparagraph includes any tons in the new unit set-aside but does not include any tons in the variability limit.
- (g) **Allowance Tracking System.** 40 CFR Part 97.420 through 40 CFR Part 97.421 and 40 CFR Part 97.424 through 40 CFR Part 97.428, as amended is hereby incorporated and adopted by reference with the following exceptions: 40 CFR 97.421(h) and 40 CFR 97.421(j).
- (h) **Allowance Transfers.** 40 CFR Part 97.422 through 40 CFR Part 97.423, as amended is hereby incorporated and adopted by reference.
- (i) **Monitoring and Reporting.** 40 CFR Part 97.430 through 40 CFR Part 97.435, as amended is hereby incorporated and adopted by reference.

(13) **Cross State Air Pollution Rule SO₂ Annual Trading Program**

- (a) **General Requirements.** The provisions of this paragraph (13) except as provided in sub-paragraphs (f) and (g) shall apply to any source and the owner and operator of any such source subject to any requirements under 40 Code of Federal Regulations (hereinafter, 40 CFR), Part 97 Subpart DDDDD, as amended (at 81 FR 74618-21, October 26, 2016). The term "Permitting Authority" as used in regulations adopted in this paragraph shall mean, for a unit located in Georgia, the Environmental Protection Division of the Georgia Department of Natural Resources. For a unit located outside the State of Georgia participating in the trading program, the "Permitting Authority" is as defined in 40 CFR Part 97.702.
- (b) **General Provisions.** 40 CFR Part 97.701 through 40 CFR Part 97.708, as amended is hereby incorporated and adopted by reference.
- (c) **Designated Representative.** 40 CFR Part 97.713 through 40 CFR Part 97.718, as amended is hereby incorporated and adopted by reference.
- (d) [reserved]
- (e) [reserved]

- (f) **Allowance Allocations.** 40 CFR Part 97.711 through 40 CFR Part 97.712, as amended is hereby incorporated and adopted by reference with the following exceptions: 40 CFR 97.711(b)(2), 40 CFR 97.711(c)(5)(iii) and 97.712(b).

For purposes of this paragraph (13), the Georgia SO₂ Group 2 trading budget and new unit set-aside for allocations of CSAPR SO₂ Group 2 allowances, and the variability limit for the Georgia SO₂ Group 2 trading budget, for the control periods in 2017 and thereafter are as follows:

1. The SO₂ Group 2 trading budget is 135,565 tons.
2. The new unit set-aside is 2,711 tons.
3. The variability limit is 24,402 tons.
4. The Georgia SO₂ Group 2 trading budget in this subparagraph includes any tons in the new unit set-aside but does not include any tons in the variability limit.

- (g) **Allowance Tracking System.** 40 CFR Part 97.720 through 40 CFR Part 97.721 and 40 CFR Part 97.724 through 40 CFR Part 97.728, as amended is hereby incorporated and adopted by reference with the following exceptions: 40 CFR 97.721(h) and 40 CFR 97.721(j).

- (h) **Allowance Transfers.** 40 CFR Part 97.722 through 40 CFR Part 97.723, as amended is hereby incorporated and adopted by reference.

- (i) **Monitoring and Reporting.** 40 CFR Part 97.730 through 40 CFR Part 97.735, as amended is hereby incorporated and adopted by reference.

(14) **Cross State Air Pollution Rule NOx Ozone Season Trading Program**

- (a) **General Requirements.** The provisions of this paragraph (14) except as provided in sub-paragraphs (f) and (g) shall apply to any source and the owner and operator of any such source subject to any requirements under 40 Code of Federal Regulations (hereinafter, 40 CFR), Part 97 Subpart BBBBBB as amended (at 81 FR 74607-14, October 26, 2016). The term "Permitting Authority" as used in regulations adopted in this paragraph shall mean, for a unit located in Georgia, the Environmental Protection Division of the Georgia Department of Natural Resources. For a unit located outside the State of Georgia participating in the trading program, the "Permitting Authority" is as defined in 40 CFR Part 97.502.
- (b) **General Provisions.** 40 CFR Part 97.501 through 40 CFR Part 97.508, as amended is hereby incorporated and adopted by reference.

- (c) **Designated Representative.** 40 CFR Part 97.513 through 40 CFR Part 97.518, as amended is hereby incorporated and adopted by reference.
- (d) **[reserved]**
- (e) **[reserved]**
- (f) **Allowance Allocations.** 40 CFR Part 97.511 through 40 CFR Part 97.512, as amended is hereby incorporated and adopted by reference with the following exceptions: 40 CFR 97.511(b)(2), 40 CFR 97.511(c)(5)(iii) and 97.512(b).

For purposes of this paragraph (14), the Georgia NOx Ozone Season Group 1 trading budget and new unit set-aside for allocations of CSAPR NOx Ozone Season Group 1 allowances, and the variability limit for the Georgia NOx Ozone Season Group 1 trading budget, for the control periods in 2017 and thereafter are as follows:

1. The NOx Ozone Season Group 1 trading budget is 24,041 tons.
 2. The new unit set-aside is 481 tons.
 3. The variability limit is 5,049 tons.
 4. The Georgia NOx Ozone Season Group 1 trading budget in this subparagraph includes any tons in the new unit set-aside but does not include any tons in the variability limit.
- (g) **Allowance Tracking System.** 40 CFR Part 97.520 through 40 CFR Part 97.521 and 40 CFR Part 97.524 through 40 CFR Part 97.528, as amended is hereby incorporated and adopted by reference with the following exceptions: 40 CFR 97.521(h) and 40 CFR 97.521(j).
 - (h) **Allowance Transfers.** 40 CFR Part 97.522 through 40 CFR Part 97.523, as amended is hereby incorporated and adopted by reference.
 - (i) **Monitoring and Reporting.** 40 CFR Part 97.530 through 40 CFR Part 97.535, as amended is hereby incorporated and adopted by reference.

Amended: (i.e., paragraphs (4), (5), (8), and (9), as specified by the Agency.) F. Aug. 30, 2022; eff. Sep. 19, 2022.

Rule 391-3-1-.03. Permits. Amended.

(1) Construction (SIP) Permit.

- (a) Any person** prior to beginning the construction or modification of any facility which may result in air pollution shall obtain a permit for the construction or modification of such facility from the Director.
- (b) The application** for a construction permit shall be made on forms supplied by the Director, and shall be signed by the applicant. Said application shall be filed with the Director well in advance of any critical date involved in the construction or modification of such facility, so that adequate time will be available for review, discussion, and revision where necessary. Said application shall include and/or be accompanied by all pertinent information as the Director may require for a full evaluation of the proposed construction or modification of the facility, such as: process flow diagrams; plot plans; description of control devices; description of the proposed new or modified operation; type of operation; raw materials and chemicals to be used, the finished products; type, quantity and peak output of fuels to be used; the amount of combustible waste that will be generated and the method of disposing of same; characteristics and amounts of emissions into the atmosphere; engineering reports; plans and specifications; time schedules and

reports of progress; records; information regarding any Emission Reduction Credits on which the applicant intends to rely; and related information.

- (c) **The permit** for the construction or modification of any facility shall be issued upon a determination by the Director that the facility can reasonably be expected to comply with all the provisions of the Act and the rules and regulations promulgated thereunder.

(2) **Operating (SIP) Permit.**

- (a) **Any person** operating a facility or performing an activity which is not exempted under 391-3-1-.03(6) from which air contaminants are or may be emitted shall obtain an Operating (SIP) Permit from the Director.
- (b) **Application** for an operating permit must be made within thirty (30) days after commencement of normal operations. Said application for an operating permit shall be accompanied by such plans, specifications, and other information deemed necessary by the Director to make full evaluation of the performance of the facility. If any of the necessary information cannot be provided within the required time, the application shall include a schedule, subject to the approval of the Director, for submission of all such information as soon as practicable.
- (c) **An operating permit** will be issued upon evidence satisfactory to the Director of compliance with the provisions of the Act and the rules and regulations promulgated thereunder. Said permit shall specify the conditions under which the facility shall be operated in order to comply with the Act and rules and regulations. As a condition for the issuance of an operating permit, the Director may require the applicant to conduct performance tests and monitoring and provide reports concerning operations, to demonstrate compliance with the Act and the rules and regulations. Such tests and monitoring shall be conducted, and such required reports submitted, in accordance with methods and procedures approved by the Director.
- (d) **The Director** may grant a temporary operating permit for such period of time and under such conditions as he shall specify in the permit, in order to allow the applicant a reasonable period of time in which to correct deficiencies in any existing facility. The temporary operating permit shall specify a schedule for bringing the existing facility into compliance with the Act and rules and regulations in the shortest practical time period.
- (e) **The requirements** of this section (2) shall not apply to any emissions unit as defined in 40 CFR 70.2 which has been issued a part 70 permit under the requirements of section (10), unless there is a modification to such unit.
- (f) **Any person** operating a facility or performing an activity from which air contaminants are or may be emitted, may be required to obtain a Permit by Rule, a

Generic Permit or a Part 70 Permit from the Director in addition to an Operating (SIP) Permit.

- (g) **Under penalty** of law, the holder of any Air Quality Permit must adhere to the terms, limitations, and conditions of that permit and subsequent revisions of that permit.
- (h) **The limitations**, controls, and requirements in federally enforceable operating permits are permanent, quantifiable, and otherwise enforceable as a practical matter.
- (i) **Prior to the issuance** of any federally enforceable operating permit, EPA and the public will be notified and given a chance for comment on the draft permit.

(3) **Revocation, Suspension, Modification or Amendment of Permits.**

- (a) **Any permit** issued by the Director shall be subject to periodic review and the Director may revoke, suspend, modify or amend any permit issued, for cause, including but not limited to, the following:
 1. Violation of any condition of said permit, or failure to comply with a final order of the Director;
 2. Failure to comply with any applicable rules or regulations in effect pursuant to this Chapter;
 3. Obtaining a permit by misrepresentation, or failure to disclose fully all relevant facts, or failure to inform the Division of modifications affecting emissions;
 4. Modifications which affect emissions. In the event of modification, amendment, suspension or revocation of a permit, the Director shall serve written notice of such action on the permit holder and shall set forth in such notice the reason for the action.
 5. The Director may amend any permit to establish an emission limitation based on existing equipment design and reasonable operation and maintenance practices. Such limitation shall not allow emissions greater than those allowed by other provisions and emission limits specified elsewhere in the Rules, Chapter 391-3-1.

(4) **Permits Not Transferable.**

A permit is not transferable from one person to another nor from one facility to another facility.

(5) **Permits Public Records.**

Except as to information required to be kept confidential by O.C.G.A. Section [12-9-19](#), as amended all applications for construction permits and operating permits shall be public record.

(6) **Exemptions.**

Unless otherwise required by the Director, SIP permits shall not be required for the following source activities. These exemptions may not be used to avoid any emission limitations or standards of the Rules for Air Quality Control Chapter [391-3-1-.02](#), lower the potential to emit below "major source" thresholds or to avoid any "applicable requirement" (i.e., NSPS, NESHAP, etc.) as defined in 40 CFR Part 70.2.

(a) **Mobile Sources.**

Mobile sources, such as automobiles, trucks, buses, locomotives, airplanes, boats and ships, whether or not designated as subject to mandatory inspection, maintenance, or emission requirements pursuant O.C.G.A. Section [12-9-40](#), et seq., as amended, the Georgia Motor Vehicle Emission Inspection and Maintenance Act. This exemption relates only to the requirement for a permit issued under the Act, not to any other requirement under the Act, and in no way affects any requirement for a permit, license, or a certificate under any other law. This limited exemption from the permit requirements of the Act shall in no way affect the applicability of any other requirement related to mobile sources, or any other requirement or limitation which may affect mobile sources.

(b) **Combustion Equipment.**

1. Fuel-burning equipment having a total heat input capacity of less than 10 MMBtu/hr burning only natural gas, LPG and/or distillate fuel oil containing 0.50% sulfur by weight or less.
2. Fuel-burning equipment rated at less than 5 MMBtu/hr burning a wood or fossil fuel.
3. Any fuel-burning equipment with a rated input capacity of 2.5 MMBtu/hr or less.
4. Equipment used for cooking food for immediate human consumption.
5. Blacksmith forges.
6. Clean steam condensate and steam relief vents.
7. Funeral homes and crematories of any size.

8. Air curtain destructor used for land clearing at a construction site.
9. Open burning.
10. Small incinerators operating as follows:
 - (i) less than 8 MMBtu/hr input, firing types 0, 1, 2 and/or 3 waste; or
 - (ii) less than 8 MMBtu/hr input with no more than 10% pathological (type 4) waste by weight combined with types 0, 1, 2 and/or 3 waste; or
 - (iii) less than 4 MMBtu/hr heat input firing Type 4 waste.
11. Stationary engines
 - (i) Burning natural gas, LPG, gasoline, dual fuel, or diesel fuel which are used exclusively as emergency generators;
 - (ii) Burning natural gas, LPG, and/or diesel fuel and used for peaking power (including emergency generators used for peaking power) where the peaking power use does not exceed 200 hours-per-year except in the counties of Banks, Barrow, Bartow, Butts, Carroll, Chattooga, Cherokee, Clarke, Clayton, Cobb, Coweta, Dawson, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gordon, Gwinnett, Hall, Haralson, Heard, Henry, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Newton, Oconee, Paulding, Pickens, Pike, Polk, Putnam, Rockdale, Spalding, Troup, Upson, and Walton where such engines with a rated capacity equal to or greater than 100 kilowatts are not exempt; or
 - (iii) Used for other purposes provided that the total horsepower of all non-gasoline burning engines combined are less than 1500 engine horsepower and no individual engine operates for more than 1000 hours-per-year; or
 - (iv) Used for other purposes provided that the total horsepower of all gasoline burning engines combined are less than 225 horsepower and no individual engine operates for more than 1000 hours-per-year.
 - (v) For the purpose of this subsection, the following definitions shall apply:

- (I) An "emergency generator" means a generator whose function is to provide back-up power when electric power from the local utility is interrupted and which operates for less than 500 hours-per-year, except in the counties of Banks, Barrow, Bartow, Butts, Carroll, Chattooga, Cherokee, Clarke, Clayton, Cobb, Coweta, Dawson, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gordon, Gwinnett, Hall, Haralson, Heard, Henry, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Newton, Oconee, Paulding, Pickens, Pike, Polk, Putnam, Rockdale, Spalding, Troup, Upson, and Walton where such generator operates less than 200 hours-per-year.
- (II) "Used for peaking power" means used to reduce the electrical power requirements on the local utility grid. This could be for supplying power during the local utility's peak demand periods, or for peak shaving by the facility.

- 12. Boiler water treatment operations.
- 13. Firefighting equipment, including fire pumps or other emergency/safety equipment used to fight fires or train firefighters or other emergency personnel.
- 14. Temporary stationary engines used to generate electricity that are used to replace main stationary engines during periods of maintenance or repair (provided the actual and potential emissions of the temporary sources do not exceed that of the main sources).
- 15. Temporary fuel-burning equipment (i.e., boilers) that are used to replace main fuel-burning equipment during periods of maintenance or repair (provided the actual and potential emissions of the temporary sources do not exceed that of the main sources.) Temporary fuel-burning equipment that remains at a location for more than 180 consecutive days is no longer considered to be a temporary boiler. Temporary fuel-burning equipment that replaces temporary fuel-burning equipment at a location and is intended to perform the same or similar function will be included in calculating the consecutive time period.
- 16. Onsite air curtain incinerators with mist controls used for the purpose of decontamination and disposal of livestock and materials contaminated with the avian flu virus where on-site composting and burial are not viable methods of disposal.

(c) Storage Tanks.

1. All petroleum liquid storage tanks storing a liquid with a true vapor pressure of equal to or less than 0.50 psia as stored.
2. All petroleum liquid storage tanks with a capacity of less than 40,000 gallons storing a liquid with a true vapor pressure of equal to or less than 2.0 psia as stored.
3. All petroleum liquid storage tanks with a capacity of less than 10,000 gallons storing a petroleum liquid.
4. Pressurized vessels designed to operate in excess of 30 psig storing a petroleum fuel.
5. Gasoline storage and handling equipment at loading facilities handling less than 20,000 gallons per day or at vehicle dispensing facilities.
6. Portable drums and barrels provided that the volume of each container does not exceed 550 gal.
7. All chemical storage tanks used to store a chemical with a true vapor pressure of less than or equal to 10 millimeters of mercury.

(d) Agricultural Operations.

1. Farm equipment used for soil preparation, livestock handling, crop tending and harvesting and for other farm related activities.
2. Herbicide and pesticide mixing and application activities for on site use.

(e) Maintenance, Cleaning & Housekeeping.

1. Heating, air conditioning and ventilation systems not designed to remove air contaminants generated by or released from process or fuel-burning equipment.
2. Routine housekeeping activities such as painting buildings, roofing or paving parking lots, all clerical activities and all janitorial activities.
3. Maintenance activities such as: vehicle repair shops, brazing, soldering and welding equipment, carpenter shops, electrical charging stations, grinding and polishing operations maintenance shop vents, miscellaneous non-production surface cleaning, preparation and painting operations.
4. Miscellaneous activities such as: aerosol spray cans; air compressors; cafeteria vents; copying, photographic and blueprint machines;

decommissioned equipment; dumpsters; fire training activities; fork lifts; railroad flares; refrigerators; space heaters.

5. Cold storage refrigeration equipment.
6. Vacuum-cleaning systems used exclusively for industrial, commercial, or residential housekeeping purposes.
7. Equipment used for portable steam cleaning.
8. Blast-cleaning equipment using a suspension of abrasive in water and any exhaust system or collector serving them exclusively.
9. Portable blast-cleaning equipment.
10. Laundry dryers, extractors, or tumblers for fabric cleaned with only water solutions of bleach or detergents.
11. Non-Perchloroethylene Dry-cleaning equipment with a capacity of 100 pounds per hour or less of clothes.
12. Cold cleaners having an air/vapor interface of not more than 10 square feet and that do not use a halogenated solvent.
13. Steam sterilizers.
14. Portable equipment used for the on site painting of buildings, towers, bridges and roads.
15. Non-routine clean out of tanks and equipment for the purposes of worker entry or in preparation for maintenance or decommissioning.
16. Equipment used for the washing or drying of fabricated products provided that no VOCs are used in the process and that no oil or solid fuels are burned.
17. Devices used exclusively for cleaning metal parts or surfaces by burning off residual amounts of paint, varnish, or other foreign material, provided that such devices are equipped with afterburners.
18. Fresh water cooling towers provided that the total potential emissions from the entire source remain below 10 tons per year of any single hazardous air pollutant and below 25 tons per year of any combination of hazardous air pollutants.

(f) Laboratories and Testing.

1. Laboratory equipment used exclusively for chemical or physical analyses;
2. Sampling connections used exclusively to withdraw materials for testing and analysis, including air contaminant detectors and vent lines;
3. Vacuum producing devices;
4. Research and development facilities, quality control testing facilities and/or small pilot projects, where combined daily emissions from all operations are below all of the following thresholds:
 - (i) Less than 125 pounds per day of carbon monoxide;
 - (ii) Less than 0.8 pounds per day of lead;
 - (iii) Less than 50 pounds per day of particulate matter, PM₁₀, or sulfur dioxide;
 - (iv) Less than 50 pounds per day of nitrogen oxides or VOCs except in the Counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, or Rockdale, where less than 15 pounds per day of nitrogen oxides; or VOCs; and
 - (v) Less than 5 pounds per day of any single hazardous air pollutant and less than 12.5 pounds per day of any combination of hazardous air pollutants.

(g) Pollution Control.

1. Sanitary wastewater collection and treatment systems, except incineration equipment, that are not subject to any standard, limitation or other requirement under section 111 or section 112 (excluding section 112(r)) of the federal Clean Air Act.
2. On site soil or groundwater decontamination units that are not subject to any standard, limitation or other requirement under Section 111 or 112 [excluding 112(r)] of the Federal Act.
3. Bioremediation operations.
4. Garbage compactors and garbage handling equipment.
5. Municipal Solid Waste Landfills which meet the following criteria:

- (i) The total design capacity of the landfill is less than or equal to 2.756 million tons (2.5 million megagrams) or 3.27 million cubic yards (2.5 million cubic meters) of solid waste; and
- (ii) The emissions of VOC are less than 25 tons per year for landfills located within Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, or Rockdale counties; and
- (iii) The emissions of nitrogen oxides (NO_x) from operations other than the final control device are less than 25 tons per year for landfills located within Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, or Rockdale counties.

(h) Industrial Operations.

1. Concrete block, brick plants, concrete products plants, and ready mix concrete plants producing less than 125,000 tons per year of product.
2. Small aluminum scrap metal reclaimers (non-smelters).
3. Any of the following processes or process equipment which are electrically heated or which fire natural gas, LPG or distillate (#2) fuel oil at a maximum total heat input rate of not more than 10 MMBtu/hr.
 - (i) Furnaces for heat treating glass or metals, the use of which does not involve molten materials, oil-coated parts, or oil quenching.
 - (ii) Porcelain enameling furnaces or porcelain enameling drying ovens.
 - (iii) Kilns for firing ceramic ware.
 - (iv) Crucible furnaces, pot furnaces, or induction melting and holding furnaces with a capacity of 1,000 pounds or less each, in which sweating or distilling is not conducted and in which fluxing is not conducted utilizing free chlorine, chloride or fluoride derivatives, or ammonium compounds.
 - (v) Bakery ovens and confection cookers.
 - (vi) Feed mill or grain mill ovens.
 - (vii) Surface coating drying ovens.

4. Grain, metal, or mineral extrusion process.
5. Equipment used exclusively for rolling, forging, pressing, stamping, spinning, or extruding either hot or cold metals or plastic such as drop hammers or hydraulic presses for forging or metalworking.
6. Die casting machines.
7. Equipment used exclusively for sintering of glass or metals, but not exempting equipment used for sintering metal-bearing ores, metal scale, clay, fly ash, or metal compounds.
8. Equipment for the mining and screening of uncrushed native sand and gravel.
9. Ozonization process or process equipment.
10. Electrostatic powder coating booths with an appropriately designed and operated particulate control system.
11. Equipment used for the application of a hot melt adhesive.
12. Equipment used exclusively for mixing and blending water-based adhesives and coating at ambient temperatures.
13. Equipment used for compression, molding and injection of plastics.
14. Wood products operations in the following SIC categories (combustion equipment and coatings operations are not included in this exemption):
 - (i) 2426 Dimensional Hardwood Lumber Mills,
 - (ii) 2431 Lumber Millwork,
 - (iii) 2434 Wood Kitchen Cabinets,
 - (iv) 2439 Structural Wood Trusses,
 - (v) 2441 Wood Boxes,
 - (vi) 2448 Wood Pallets,
 - (vii) 2449 Wood Containers, and
 - (viii) 2499 Miscellaneous Wood Products.

15. Industrial process equipment used exclusively for educational purposes at educational institutions.

(i) **Other.**

1. Facilities where the combined emissions from all non-exempt source activities [i.e., not listed in 391-3-1-.03(6)(a)-(h)] are below the following for all pollutants:
 - (i) 50 tons per year of carbon monoxide;
 - (ii) 300 pounds per year of lead total; with a 3.0 pound per day maximum emission;
 - (iii) 20 tons per year of particulate matter, PM₁₀, or sulfur dioxide;
 - (iv) 20 tons per year of nitrogen oxides or VOCs except in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, or Rockdale, where less than 5 tons per year of nitrogen oxides or VOCs is exempted; and
 - (v) 2 tons per year total with a 15 pound per day maximum emission of any single hazardous air pollutant and less than 5 tons per year of any combination of hazardous air pollutants.

2. Facilities where the combined emissions from all source activities are below the thresholds in "1" above for one or more pollutants, are not required to list those pollutants in the permit application.

3. Cumulative modifications not covered in an existing permit to an existing permitted facility where the combined emission increases (excluding any contemporaneous emission decreases, i.e., "netting" is not allowed) from all nonexempt modified activities are below the following thresholds for all pollutants:
 - (i) 25 tons per year of carbon monoxide;
 - (ii) 150 pounds-per-year total with a 1.5 pound-per-day maximum emission of lead;
 - (iii) 10 tons per year of particulate matter, PM₁₀ or sulfur dioxide;
 - (iv) 10 tons per year of nitrogen oxides or VOCs except in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, or Rockdale, where less than 2.5 tons per year of nitrogen oxides or VOCs is exempted; and

- (v) 2 tons per year total with a 15 pound per day maximum emission of any single hazardous air pollutant and less than 5 tons per year of any combination of hazardous air pollutants.
4. As an alternative to subparagraph 3, cumulative modifications not covered in an existing permit to an existing permitted facility where the combined emissions increases, including any contemporaneous emission decreases (i.e., "netting is allowed") from all nonexempt modified activities are less than 10 tons per year of particulate matter and PM₁₀. For the purpose of this subparagraph, "contemporaneous" means within that period beginning on the date of issuance of the most recent permit through the date of reissuance of such permit. This shall exclude any amendment to such permit unless such amendment incorporates the previously exempted modification(s) in which case the amendment shall be considered a reissuance of such permit for the purpose of this subparagraph. Facilities using this exemption shall maintain records of all emissions increases and decreases and shall notify the Division, in writing, within 7 days after making any modification covered by this subparagraph. The Division may require the use of a Division approved form for tracking the emissions increases and decreases. If a facility elects to use this subparagraph in lieu of subparagraph 3, it shall not use subparagraph 3 with respect to particulate matter and PM₁₀ until such time that all modifications exempted from SIP permitting under subparagraph 4 have been incorporated into the permit. A facility may use subparagraph 3 with respect to any pollutant other than particulate matter and PM₁₀ while using this subparagraph. Only the following facilities are eligible for this exemption:
- (i) Facilities with an SIC code of 1422 or 1423 that are not a major source subject to the provisions of 391-3-1-.03(10) (i.e., a minor or synthetic minor source).
5. Changes in a process or process equipment which do not involve installing, constructing, or reconstructing an emission unit or the primary air cleaning device of an air pollution control system provided that such changes do not result in the increase of emissions from any emission unit or the emissions of a pollutant not previously emitted. Examples of such changes in a process or process equipment include the following:
- (i) Change in the supplier or formulation of similar raw materials, fuels, or paints and other coatings;
 - (ii) Changes in product formulations;
 - (iii) Change in the sequence of the process;

- (iv) Change in the method of raw material addition;
- (v) Change in the method of product packaging;
- (vi) Change in process operating parameters;
- (vii) Replacement of a fuel burner in a boiler with a more efficient burner; or
- (viii) Lengthening a paint drying oven to provide additional curing time.

6. Sources of minor significance as specified by the Director.

7. Sources for which there is no applicable emission limit, standard or other emission requirement established under, by, or pursuant to the Act.

(j) Construction Permit Exemption for Pollution Control Projects.

Projects listed in subparagraphs [391-3-1-.01\(qqqq\)1. and 2.](#) of these rules are exempt from the requirement to obtain a construction (SIP) permit as specified in paragraph 391-3-1-.03(1) of this rule provided that the project is not subject to the provisions of paragraph [391-3-1-.02\(7\)](#), Prevention of Significant Deterioration of Air Quality, or the non-attainment new source review permitting requirements of subparagraph 391-3-1-.03(8)(c). The Director has the authority to rebut the presumption that projects listed in subparagraphs (qqqq)1. and 2. are environmentally beneficial in accordance with the criteria specified in subparagraph (qqqq) and thus exempt from the requirement to obtain a construction (SIP) permit. Owners and operators of projects exempt from the requirement to obtain a construction (SIP) permit under this subparagraph (6)(j) shall obtain an operating permit or amendment under either paragraph 391-3-1-.03(2) or 391-3-1-.03(10) of this rule, whichever is applicable, prior to commencement of operation of the project.

(7) Combined Permits and Applications.

The Director may combine the requirements of and the permits for construction and operation (temporary or otherwise) into one permit. He may likewise combine the requirements of and applications for construction and operating permits into one application.

(8) Permit Requirements.

- (a) **Each application** for a permit to construct a new stationary source or modify an existing stationary source shall be subjected to a preconstruction or

premodification review by the Director. The Director shall determine prior to issuing any permit that the proposed construction or modification will not cause or contribute to a failure to attain (as expeditiously as practicable) or maintain any ambient air quality standard, a significant deterioration of air quality, or a violation of any applicable emission limitation or standard of performance or other requirement under the Act or this Chapter (391-3-1). Each person applying to the Director for a permit to construct a new stationary source or modify an existing stationary source shall provide information required by the Director to make such determination.

- (b) **In addition** to any other requirement under the Act, or this Chapter (391-3-1), no permit to construct a new stationary source or modify an existing stationary source shall be issued unless such proposed source meets all the requirements for review and for obtaining a permit prescribed in Title I, Part C of the Federal Act, and Section [391-3-1-.02\(7\)](#) of these Rules.
- (c) **In addition** to any other requirement under the Act or this Chapter (391-3-1), no permit to construct a new or modified major stationary source to be located in any area of the State determined and designated by the U.S. EPA Administrator or the Director as not attaining a National Ambient Air Quality Standard or in areas contributing to the ambient air levels of such pollutants in such areas of non-attainment shall be issued unless the following provisions are met. The provisions of [391-3-1-.02\(7\)](#) apply to projects subject to this subparagraph as specified in Subparagraph (g) of this paragraph.
 1. The Director determines that by the time the source is to commence operation, sufficient offsetting emissions reductions have been obtained, such that total allowable emissions from existing sources in the non-attainment area or areas designated by the Director as contributing to ambient air levels of such pollutants in the non-attainment area, from new or modified sources which are not major emitting facilities, and from the proposed sources, will be sufficiently less than total emissions from existing sources allowed prior to the application for such permit to construct or modify, so as to represent (when considered together with other air pollution control measures legally enforced in such area or region) reasonable further progress (as defined in Section 171 of the Federal Act); and
 2. The proposed source is required to comply with the lowest achievable emission rate; and
 3. The owner or operator of the proposed new or modified source has demonstrated that all major stationary sources owned or operated by such person (or by an entity controlling, controlled by, or under common control with such person) in this State, are subject to emission limitations and are in

compliance, or on a schedule for compliance, with all applicable emission limitations and standards under the Act; and

4. An analysis (by the person proposing such construction or modification) of alternative sites, sizes, production processes and environmental control techniques for such proposed source demonstrates to the satisfaction of the Director that benefits of the proposed source significantly outweigh the environmental and social costs imposed as a result of its proposed location, construction, or modification; and
5. The State's Implementation Plan (approved by the Administrator pursuant to the Federal Act) is being carried out in the non-attainment area or an area designated by the Director as contributing to the ambient air level of any such pollutant in a non-attainment area in which the proposed source is to be constructed or modified in accordance with the requirements of Title I, Part D of the Federal Act.
6. The offset baseline for determining credits for emission reductions at a source is either the applicable emission limits in the Chapter or the actual emissions, in tons per year, at the time the application to construct is filed, whichever is less. The time period used to calculate the baseline emissions shall be the 24-month period immediately preceding the date the application to construct is filed. The Division may allow the use of a different time period upon a determination that such period is more representative of normal source operation.
7.
 - (i) Emission reductions achieved by shutting down an existing source or permanently curtailing production or operating hours below baseline levels may be credited provided that the work force to be affected has been notified of the proposed shutdown or curtailment.
 - (ii) In addition, emissions reductions achieved by shutting down an existing emission unit or curtailing production or operating hours may be generally credited for offsets if they meet the requirements in subparagraphs (I) and (II) of this subparagraph:
 - (I) Such reductions are surplus, permanent, quantifiable, and federally enforceable.
 - (II) The shutdown or curtailment occurred after the last day of the base year for the most recently submitted attainment demonstration, maintenance plan, reasonable further progress plan, or rate of progress plan. For purposes of this paragraph, the Division may choose to consider a prior shutdown or

curtailment to have occurred after the last day of the base year if the projected emissions inventory used to develop the attainment demonstration, maintenance plan, reasonable further progress plan, or rate of progress plan explicitly includes the emissions from such previously shutdown or curtailed emission units. However, in no event may credit be given for shutdowns that occurred before August 7, 1977.

- (iii) Emission reductions achieved by shutting down an existing emission unit or curtailing production or operating hours and that do not meet the requirements in subparagraph 7.(ii)(II) of this subparagraph may be generally credited only if:
 - (I) The shutdown or curtailment occurred on or after the date the construction permit application is filed; or
 - (II) The applicant can establish that the proposed new emissions unit is a replacement for the shutdown or curtailed emissions unit, and the emissions reductions achieved by the shutdown or curtailment met the requirements of subparagraph 7.(ii)(I) of this subparagraph.
8. No emission offset credit may be allowed for replacing one VOC compound with another of less reactivity.
9. Procedures relating to the permissible location of offsetting emissions shall be followed which are at least as stringent as those contained in 40 CFR, Part 51, Appendix S, Section IV.D.
10. Offset credit for an emission reduction can be claimed to the extent that the Director has not relied on it in issuing any other permit or has not relied on it in demonstrating attainment of reasonable further progress.
11. The Director may elect not to consider fugitive emissions, to the extent they are quantifiable, in calculating the potential to emit from a stationary source or modification in determining whether the source is major and the source does not belong to any of the following categories:
- (i) Coal cleaning plants (with thermal dryers);
 - (ii) Kraft pulp mills;
 - (iii) Portland cement plants;

- (iv) Primary zinc smelters;
- (v) Iron and steel mills;
- (vi) Primary aluminum ore reduction plants;
- (vii) Primary copper smelters;
- (viii) Municipal incinerators capable of charging more than 250 tons of refuse per day;
- (ix) Hydrofluoric, sulfuric, or nitric acid plants;
- (x) Petroleum refineries;
- (xi) Lime plants;
- (xii) Phosphate rock processing plants;
- (xiii) Coke oven batteries;
- (xiv) Sulfur recovery plants;
- (xv) Carbon black plants (furnace process);
- (xvi) Primary lead smelters;
- (xvii) Fuel conversion plants;
- (xviii) Sintering plants;
- (xix) Secondary metal production plants;
- (xx) Chemical process plants;
- (xxi) Fossil-fuel boilers (or combination thereof) totaling more than 250 million British thermal units per hour heat input;
- (xxii) Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;
- (xxiii) Taconite ore processing plants;
- (xxiv) Glass fiber processing plants;
- (xxv) Charcoal production plants;

- (xxvi) Fossil fuel-fired steam electric plants for more than 250 million British thermal units per hour heat input; and
- (xxvii) Any other stationary source category which, as of August 7, 1980, is being regulated under Section 111 or 112 of the Act.

12. Offsets.

- (i) The owner or operator of a new or modified major stationary source may comply with any offset requirement in effect under this subsection for increased emissions of any air pollutant only by obtaining emission reductions of such air pollutants from the same source or other sources in the same non-attainment area, except that the Director may allow the owner or operator of a source to obtain such emission reductions in another non-attainment area if:
 - (I) The other area has an equal or higher non-attainment classification than the area in which the source is located;
 - (II) Emissions from such other area contribute to a violation of the national ambient air quality standard in the non-attainment area in which the source is located; and
 - (III) Such emission reductions shall be, by the time a new or modified source commences operation, in effect and enforceable and shall assure that the total tonnage of increased emissions of the air pollutant from the new or modified source shall be offset by an equal or greater reduction, as applicable, in the actual emissions of such air pollutant from the same or other sources in the area.
- (ii) Emission reductions otherwise required by the Federal Act shall not be creditable as emissions reductions for purposes of any such offset requirement. Incidental emission reductions that are not otherwise required by the Federal Act shall be creditable as emission reductions for such purposes if such emission reductions meet the requirements of subparagraph (8)(c)1.
- (iii) In order to be used as an offset under this subsection, emission reductions must satisfy the criteria in section (13), subsections (a) and (b).
- (iv) At least 30 days prior to commencement of operation of the new or modified stationary source permitted under this subparagraph, the

owner or operator shall provide documentation to the Division of the possession of sufficient offsets required under subparagraph (c)1. and as specified under subparagraph (c)14. or 15., whichever is applicable, as follows:

- (I) If offsets are obtained from the Emission Reduction Credit Banking Program specified under paragraph 391-3-1-.03(13), the owner or operator shall submit an application or applications for Use of Emission Reduction Credits as required under 391-3-1-.03(13)(f) using forms specified by the Division. If said offsets are not currently owned by the owner or operator, the current owner/operator must submit an application or applications to Transfer Ownership of Emission Reduction Credits as required under 391-3-1-.03(13)(g) using forms specified by the Division simultaneously with or prior to submittal of the application or applications to withdraw Emission Reduction Credits.
- (II) If offsets are not obtained from the Emission Reduction Credit banking program, the owner or operator shall submit the following information. (If offsets are obtained from one or more enforceable mechanisms, items I through VI shall be submitted for each enforceable mechanism.):
 - I. The name of the permittee that generated the offsets.
 - II. The name of the plant or facility at which the offsets were generated.
 - III. The address (street address, city, state, zip code, and county) of the plant or facility at which the offsets were generated. (This should be for the physical location of the plant or facility.)
 - IV. Identification of the enforceable mechanism (permit number and date of issuance, permit amendment number and date of issuance, or date of permit revocation) that resulted from creation of the offsets.
 - V. The number of offsets from the permit, permit amendment, or permit revocation identified in IV, above, that will be used for the new or modified stationary source permitted under this subparagraph.

VI. If the offsets were created by an owner or operator other than the owner or operator which will be using the offsets for the new or modified stationary source permitted under this paragraph, a letter from the owner or operator that created the offsets shall be submitted to the Division stating that the offsets have been transferred to the owner or operator that will be using the offsets, the date of such transfer, the number of offsets transferred, and the information contained in I through IV above.

(v) [reserved]

(vi) When multiple new or modified emissions units are permitted at the same time but commence operation on different dates, the documentation required under subparagraph (iv) shall be submitted to the Division at least 30 days prior to commencement of each new or modified emissions unit in order to demonstrate that adequate offsets have been obtained for each new or modified emissions unit prior to commencement.

13. [reserved]

14. Additional Provisions for Ozone Non-Attainment Areas.

(i) In Bartow, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Newton, Paulding, and Rockdale counties the terms "major source" and "major stationary source" include any stationary source or group of sources located within a contiguous area and under common control that emits, or has the potential to emit, at least 100 tons per year of volatile organic compounds or nitrogen oxides. Any physical change that would occur at a stationary source not qualifying as a major stationary source as defined in this subparagraph shall be considered a "major stationary source" if the change would constitute a major stationary source by itself.

(ii) Any physical change in or change in the method of operation of a major stationary source located in these counties that results in a net emissions increase of volatile organic compounds or nitrogen oxides equal to or exceeding 40 tons per year of such air pollutant shall be considered a modification when determining the

applicability of the permit requirements established by this subsection. "Net emissions increase" shall have the meaning defined in subparagraph (8)(g)1.(iii) of this rule.

(iii) [reserved]

(iv) For purposes of satisfying the emission offset requirements of this subsection, the ratio of total emission reductions of volatile organic compounds or nitrogen oxides to total increased emissions of such pollutants shall be at least 1.15 to 1 for emission offsets external or internal to the contiguous area under common control at which the proposed new emission point is located.

15. Additional Provisions for Electrical Generating Units Located in Areas Contributing to the Ambient Air Level of Ozone in the Metropolitan Atlanta Ozone Non-Attainment Area.

(i) In Banks, Barrow, Butts, Carroll, Chattooga, Clarke, Dawson, Floyd, Gordon, Hall, Haralson, Heard, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Oconee, Pickens, Pike, Polk, Putnam, Spalding, Troup, Upson, and Walton counties, the terms "major source" and "major stationary source" include any stationary source or group of sources located within a contiguous area and under common control, containing an electrical generating unit, and that emits, or has the potential to emit, at least 100 tons per year of nitrogen oxides from electrical generating units. Any physical change that would occur at a stationary source not qualifying as a major stationary source as defined in this subparagraph shall be considered a "major stationary source" if the change would constitute a major stationary source by itself.

(ii) Any physical change or change in the method of operation at a major stationary source in these counties that results in a net emissions increase of nitrogen oxides equal to or exceeding 40 tons per year of such air pollutant from the installation or modification of one or more electrical generating units shall be considered a modification when determining the applicability of the permit requirements established by this subsection. "Net emissions increase" shall have the meaning defined in subparagraph (8)(g)1.(iii) of this rule.

(iii) In the case of any new electrical generating unit or modified existing electrical generating unit located at a new or modified major stationary source in these counties, the requirements of 391-

3-1-.03(8)(c)2. shall only apply to that electrical generating unit and best available control technology (BACT), as defined by the Federal Act, shall be substituted for the lowest achievable emission rate (LAER).

- (iv) For purposes of satisfying the emission offset requirements of this subsection, the ratio of total emission reductions of nitrogen oxides to total increased emissions of such pollutant from the new or modified electrical generating units shall be at least 1.1 to 1 for emission offsets external or internal to the contiguous area under common control at which the proposed new or modified major stationary source is located.
- (v) [reserved]
- (vi) [reserved]
- (vii) For the purpose of this subsection, "electrical generating unit" means a fossil fuel fired stationary boiler, combustion turbine, or combined cycle system that serves a generator that produces electricity for sale.

16. [reserved]

(d) **[reserved]**

(e) **The Director** shall, upon analysis of the ambient air in the State, determine, and so designate, those areas of the State, if any, which are not attaining any National Ambient Air Quality Standards specified under the Federal Act, and any area contributing to the ambient air level of any such pollutant (for which such a standard has been established) in such areas of non-attainment. The Director's analyses determinations, and designations hereunder shall be used for the purpose of implementing the requirements of this section, shall be continuing, and shall be conducted in a manner sufficient to meet the requirements of Title 1, Part D of the Federal Act.

1. The counties of Banks, Barrow, Butts, Carroll, Chattooga, Clarke, Dawson, Floyd, Gordon, Hall, Haralson, Heard, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Oconee, Pickens, Pike, Polk, Putnam, Spalding, Troup, Upson, and Walton have been determined by the Director as areas contributing to the ambient air level of ozone in the following metropolitan Atlanta counties: Bartow, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Newton, Paulding, and Rockdale. No permit to construct an electric

generating unit at a new or modified major stationary source in this area shall be issued unless such proposed source meets all the requirements of Subsection (8)(c).

- (f) **In addition** to any other requirement under the Act, or this Chapter 391-3-1, no permit to construct a new stationary source or modify an existing stationary source shall be issued unless such proposed source or modification meets all the requirements for review and for obtaining a permit prescribed in Paragraph [391-3-1-.02\(9\)\(b\)16](#). of this Rule.
- (g) **The following provisions** of paragraph [391-3-1-.02\(7\)](#) apply to projects subject to the permitting requirements of subparagraph (c) of this paragraph with respect to those pollutants subject to Subparagraph (c).
1. [391-3-1-.02\(7\)\(a\)2](#). Definitions, with the following exceptions and additions:
 - (i) The definition of "Major Stationary Source" does not apply.
 - (ii) Within the definition of "Major Modification,"
 - (I) The date within the "capable of accommodating" provision shall be December 21, 1976; and
 - (II) Paragraphs 40 CFR 52.21(b)(2)(iii)(j) and (k) do not apply.
 - (iii) The definition of "Net Emissions Increase," as it pertains to subparagraphs 8(c)14.(ii) and 8(c)15.(ii) of this rule, shall have the meaning defined in 40 CFR 51.165(a)(1)(vi) with the following exceptions:
 - (I) In lieu of (a)(1)(vi)(A)(1), the following shall apply: The increase in emissions from a particular change or change in the method of operation at a stationary source pursuant to paragraph 52.21(a)(2)(iv) as adopted in subparagraph (7)(a)3. of this rule; and
 - (II) In (a)(1)(vi)(A)(2), baseline actual emissions shall be determined as provided in subparagraph (7)(a)2.(i) of this rule, except that sub paragraphs (7)(a)2.(i)(I)III. and (7)(a)2.(i)(II)IV. do not apply.
 - (iv) To the definition of "Secondary Emissions," the following sentence is added: "Secondary emissions must be specific, well defined,

quantifiable, and impact the same general area as the stationary source or modification which causes the secondary emissions."

- (v) The definition of "Significant" does not apply.
 - (vi) "Lowest achievable emission rate" or "LAER" means, for any source, the more stringent rate of emissions is based on the following:
 - (I) The most stringent emission limitation which is contained in the implementation plan of any State for such class or category of stationary source, unless the owner or operator of the proposed stationary source demonstrates that such limitations are not achievable; or
 - (II) The most stringent emission limitation which is achieved in practice by such class or category of stationary sources. This limitation, when applied to a modification, means the lowest achievable emission rate for the new or modified emission units within the stationary source. In no event shall the application of this term permit a proposed new or modified stationary source to emit any pollutant in excess of the amount allowable under applicable new source standards of performance.
2. [391-3-1-.02\(7\)\(a\)3.](#), Applicability procedures, with the following exception:
 - (i) The term "significant amount" in subparagraph (7)(a)3. shall mean an increase that is considered as a modification as specified in 391-3-1-.03(8)(c)14.(ii) or 15.(ii).
 3. [391-3-1-.02\(7\)\(a\)4.](#)
 4. [391-3-1-.02\(7\)\(b\)14.](#), Public participation.
 5. [391-3-1-.02\(7\)\(b\)15.](#), Source obligation, with the following exception:
 - (i) The term "significant amount" in subparagraph (7)(b)15.(i)(V) shall mean an increase that is considered as a modification as specified in 391-3-1-.03(8)(c)14.(ii) or 15.(ii).
 6. [391-3-1-.02\(7\)\(b\)21.](#), Actual PALs, with the following exception:
 - (i) Under the provision for "Setting the 10-year actual PAL level" specified in paragraph 40 CFR 52.21(aa)(6), the amount added to the

baseline actual emissions shall be the amount that is considered not to be a modification as specified in 391-3-1-.03(8)(c)14.(ii) or 15.(ii).

(9) **Permit Fees.**

- (a) **The owner** or operator of any stationary source subject to the provisions of Georgia Air Quality Rule 391-3-1-.03 "Permits. Amended." shall pay to the Division an annual fee or its equivalent (e.g. quarterly payments).
- (b) **The dollar-per-ton fee** rate for each calendar year is specified in the table below. Each calendar year's emissions and annual permit fees shall be determined and submitted in accordance with the Georgia Department of Natural Resources' Fee Manual specified below.

Calendar Year	\$/Ton Rate	Fee Manual
1991	\$25/Ton	"Procedures for Calculating Air Permit Fees" dated July 1, 1992.
1992	\$25/Ton	"Procedures for Calculating 1992 Air Permit Fees" dated May 1, 1993.
1993	\$25/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 1993" dated February 1, 1994.
1994	\$25/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 1994" dated May 1, 1995.
1995	\$25/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 1995" dated April 2, 1996.
1996	\$25/Ton	"Procedures for Calculating Air Permit Fees for Calendar Years 1996 and 1997" dated August 1, 1997.

1997	\$28/Ton	"Procedures for Calculating Air Permit Fees for Calendar Years 1996 and 1997" dated August 1, 1997.
1998	\$28/Ton	"Procedures for Calculating Air Permit Fees for Calendar Years 1998 and 1999" dated January 19, 1999.
1999	\$28/Ton	"Procedures for Calculating Air Permit Fees for Calendar Years 1998 and 1999" dated January 19, 1999.
2000	\$31/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 2000" dated April 30, 2001.
2001	\$31/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 2001" dated February 26, 2002.
2002	\$32.50/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 2002" dated March 25, 2003.
2003	\$32.50/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 2003" dated April 20, 2004.
2004	\$32.50/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 2004" dated March 22, 2005.
2005	\$33.00/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 2005" dated March 15, 2006.
2006	\$28.50/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 2006" dated February 7, 2007.

2007	\$34.00/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 2007" dated April 2, 2008.
2008	\$34.00/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 2008" dated February 12, 2009.
2009	\$34.00/Ton	"Procedures for Calculating Air Permit Fees for Calendar Year 2009" dated January 26, 2010.
2010	\$35.84/Ton for coal-fired electric generating units; \$34/Ton for all other sources	"Procedures for Calculating Air Permit Fees for Calendar Year 2010" dated January 31, 2011.
2011	\$35.84/Ton for coal-fired electric generating units; \$34/Ton for all other sources	"Procedures for Calculating Air Permit Fees for Calendar Year 2011" dated March 2, 2012.
2012	\$37.34/Ton for coal-fired electric generating units; \$35.50/Ton for all other sources	"Procedures for Calculating Air Permit Fees for Calendar Year 2012" dated February 5, 2013.
2013	\$37.34/Ton for coal-fired electric generating units; \$35.50/Ton for all other sources	"Procedures for Calculating Air Permit Fees for Calendar Year 2013" dated January 14, 2014.
2014	\$37.34/Ton for coal-fired electric generating units; \$35.50/Ton for all other sources	"Procedures for Calculating Air Permit Fees for Calendar Year 2014" dated January 12, 2015.

2015	\$37.34/Ton for coal-fired electric generating units; \$35.50/Ton for all other sources	"Procedures for Calculating Air Permit Fees for Calendar Year 2015" dated February 22, 2016.
2016	\$37.34/Ton for coal-fired electric generating units; \$35.50/Ton for all other sources	"Procedures for Calculating Air Permit Fees for Calendar Year 2016" dated February 8, 2017.
2017	\$37.34/Ton for coal-fired electric generating units; \$35.50/Ton for all other sources	"Procedures for Calculating Air Permit Application & Annual Permit Fees for Calendar Year 2017" dated February 8, 2018.
2018	\$37.34/Ton for coal-fired electric generating units; \$35.50/Ton for all other sources	"Procedures for Calculating Air Permit Application & Annual Permit Fees for Fees Due Between July 1, 2019 and June 30, 2020" dated December 26, 2018.
2019	\$37.34/Ton for coal-fired electric generating units; \$35.50/Ton for all other sources	"Procedures for Calculating Air Permit Application & Annual Permit Fees for Fees Due Between July 1, 2020 and June 30, 2021" dated February 3, 2020.
2020	\$37.34/Ton for coal-fired electric generating units; \$35.50/Ton for all other sources	"Procedures for Calculating Air Permit Application & Annual Permit Fees for Fees Due Between July 1, 2021 and June 30, 2022" dated February 3, 2021.
2021	\$37.34/Ton for coal-fired electric generating units; \$35.50/Ton for all other sources	"Procedures for Calculating Air Permit Application & Annual Permit Fees for Fees Due Between July 1, 2022 and June 30, 2023" dated February 3, 2022.

When no applicable calculation method or procedure is published therein, the Director may specify or approve an applicable method or procedure prior to its use.

- (c) **For the purpose** of this section, the following definitions shall apply:
1. "Criteria Pollutant" means volatile organic compounds, sulfur dioxide, particulate matter, and nitrogen oxides.
 2. "Stationary source" means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control) except the activities of any vessel. Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same "Major Group" (i.e., which have the same first two digit code) as described in the most recent Standard Industrial Classification Manual, published by the U.S. Government Printing Office.
- (d) **No annual fee shall** be collected for more than 4,000 tons per year per stationary source of any individual criteria pollutant as calculated in accordance with the Fee Manual.
- (e) **The Director** may reduce any permit fee required under this Chapter to take into the account the financial resources of small businesses stationary sources.
- (f) **The collection** of fees pursuant to this Chapter shall preclude collection of any air quality control permit fee by any other state or local government authority.
- (g) **The collection** of annual fees pursuant to this section shall begin on or after July 1, 1995, and shall be for the calendar year ending December 31, 1994. Thereafter, annual permit fees for each calendar year are due no later than September 1 of the following calendar year. Fees shall be paid in accordance with the procedures specified in the Fee Manual.
- (h) **The owner** of a stationary source subject to this paragraph (9), "Permit Fees" shall make a one-time payment on or before April 30, 2001, in accordance with the following schedule. This one-time payment shall serve as a credit toward the calendar year 2000 permit fees (which are to be adopted at a later date). The procedures and methods contained in the Georgia Department of Natural Resources **Procedures for Calculating Air Permit Fees for Calendar Years 1998 and 1999 dated January 19, 1999** (1998/1999 Fee Manual), which is hereby incorporated by reference, along with calendar year 2000 activities and emissions shall be used to determine which, if any, of the following one-time payments are applicable to each stationary source.

1. Any Stationary Source subject to one or more Federal Standard of Performance for New Stationary Sources (NSPS) that is not classified as a Part 70 major source is defined in 40 CFR 70.2 shall pay a one-time payment of \$400 unless ALL of the equipment at the stationary source that is subject to an NSPS standard is listed in the exception list found in section 2.0(a) of the 1998/1999 Fee Manual and/or did not operate during calendar year 2000.
2. Any Stationary Source that is classified as a Part 70 major source, as defined in 40 CFR 70.2, that operated for any period of time in calendar year 2000, and whose calculated emissions (calculated using the Methods of Calculation contained in section 3.2 of the 1998/1999 Fee Manual and calendar year 2000 activities) of EACH OF THE FOUR criteria pollutants (as defined in section 1.0 of the 1998/1999 Fee Manual: particulate matter, sulfur dioxide, volatile organic compounds, and nitrogen oxides) are less than or equal to the threshold values listed in section 3.16 of the 1998/1999 Fee Manual shall pay a one-time payment of \$600.
3. Any Stationary Source that is classified as a Part 70 major source, as defined in 40 CFR 70.2, that operated for any period of time in calendar year 2000, whose calculated emissions (calculated using the Methods of Calculation contained in section 3.2 of the 1998/1999 Fee Manual and calendar year 2000 activities) of AT LEAST ONE of the four criteria pollutants (as defined in section 1.0 of the 1998/1999 Fee Manual: particulate matter, sulfur dioxide, volatile organic compounds, and nitrogen oxides) are above the applicable threshold value listed in section 3.16 of the 1998/1999 Fee Manual, and whose COMBINED calculated emissions (calculated using the Methods of Calculation contained in section 3.2 of the 1998/1999 Fee Manual and calendar year 2000 activities) is less than 700 tons shall pay a one-time payment of \$1150. For the purpose of determining this one-time payment, the calculated emissions of any single criteria pollutant shall not be considered when determining if the calculated emissions are less than 700 tons if the calculated emissions for that criteria pollutant are less than or equal to the applicable threshold value listed in section 3.16 of the 1998/1999 Fee Manual.
4. Any Stationary Source that is classified as a Part 70 major source, as defined in 40 CFR 70.2, that operated for any period of time in calendar year 2000, whose total calculated emissions (calculated using the Methods of Calculation contained in section 3.2 of the 1998/1999 Fee Manual and calendar 2000 activities) of AT LEAST ONE of the four criteria pollutants (as defined in section 1.0 of the 1998/1999 Fee Manual: particulate matter, sulfur dioxide, volatile organic compounds, and nitrogen oxides) is above the applicable threshold value listed in section 3.16 of the 1998/1999 Fee

Manual, and whose COMBINED calculated emissions (calculated using the Methods of Calculation contained in section 3.2 of the 1998/1999 Fee Manual and calendar year 2000 activities) are greater than or equal to 700 tons shall pay a one-time payment of \$3000. For the purpose of determining this one-time payment, the calculated emissions of any single criteria pollutant shall not be considered when determining if the calculated emissions are greater than or equal to 700 tons if the calculated emissions for that criteria pollutant are less than or equal to the applicable threshold value listed in section 3.16 of the 1998/1999 Fee Manual.

- (i) **As part of the annual permit fees** required under this paragraph, the owner or operator of any stationary source shall also pay administrative fees in accordance with the following subparagraphs in addition to the permit fees determined in accordance with the Fee Manual(s) specified in Subparagraph (b) of this paragraph.
 1. The owner or operator shall pay an administrative fee of 0.05 percent of the total fee due determined in accordance with the Fee Manual(s) specified in Subparagraph (b) of this paragraph for each calendar day in which the air permit fee form is submitted to the Division after October 1 of the calendar year in which the fee was due or October 1, 2010, which is later.
 2. For air permit fee forms submitted using the online Georgia air emissions fee reporting form, that date on which the air permit fee form is submitted to the Division shall be the date in which the owner or operator completes a final submittal on the online reporting form. For air permit fee forms that were submitted using a hard-copy paper form, the date on which the air permit fee form is submitted to the Division shall be the date on which the permit fee form and required payment are received at the address specified in the Fee Manual or at the office of the Division's Air Protection Branch.

- (j) **Beginning with calendar year 2009 fees**, when the ownership of any stationary source is transferred to a new owner or operator, the new owner or operator of the stationary source shall be responsible for paying any past due fees.

- (k) **Beginning on March 1, 2019**, the owner or operator of any stationary source subject to the provisions of Georgia Air Quality Rule 391-3-1-.03 "Permits. Amended" shall pay to the Division a processing fee when submitting an application for the following permit application types:

Permit Type
Minor Source Permit or Amendment
Synthetic Minor Source Permit or Amendment
Major Source Permit or Amendment (but not subject to PSD or 112(g))

Name Change
Permit-by-Rule
Title V 502(b)(10) Permit Amendment
Title V Minor Modification with Construction
Title V Minor Modification without Construction
Title V Significant Modification with Construction
Title V Significant Modification without Construction
PSD Permit per 391-3-1-.02(7)
Nonattainment New Source Review Permit per 391-3-1-.03(8)(c)
112(g) permit per 391-3-1-.02(9)(b)16.

1. Fees shall be paid in accordance with the procedures specified in the Fee Manual.
2. No final action of the Director shall occur until complete fee payment is received, unless the fee payment is waived or partially waived in accordance with subparagraph 391-3-1-.03(9)(e).
3. Application fees shall not be refunded as the fee is used to cover application processing labor.
4. Title V modification application fees are waived for applicants submitting PSD/112(g) or Nonattainment NSR permit applications via Title V permit applications. The PSD/112(g) or Nonattainment NSR fee still applies.

(l) **Beginning on July 1, 2020**, the owner or operator of any stationary source subject to the provisions of Georgia Air Quality Rule 391-3-1-.03(10) "Title V Operating Permits" shall pay to the Division an annual maintenance fee for Title V sources. Fees shall be paid in accordance with the procedures specified in the Fee Manual.

(10) Title V Operating Permits.

(a) General Requirements.

1. The provisions of this paragraph (10) shall apply to any source and the owner and operator of any such source subject to any requirements under 40 Code of Federal Regulations (hereinafter, 40 CFR), Part 70.
2. All sources subject to this paragraph (10) shall have a Part 70 Permit to operate that assures compliance by the source with all applicable requirements. Such Part 70 Permits will be issued consistent with the timing established in subparagraph (10)(c).

3. The requirements of this paragraph (10), including provisions regarding schedules for submission and approval or disapproval of permit applications, shall apply to the permitting of affected sources under the federal acid rain program except as provided herein or modified in federal regulations promulgated under Title IV of the federal Clean Air Act.
4. Definitions: For the purpose of this paragraph (10), 40 CFR Part 70.2 is hereby incorporated and adopted by reference, with the following exception(s):
 - (i) "Potential to emit" shall have the meaning ascribed in subparagraph (ddd) of rule [391-3-1-.01](#).
 - (ii) [Reserved.]
 - (iii) The definition and use of the term "subject to regulation" in 40 CFR, Part 70.2 is hereby incorporated by reference; provided, however, that in the event all or any portion of 40 CFR, Part 70.2 containing that term is:
 - (I) declared or adjudged to be invalid or unconstitutional or stayed by the United States Court of Appeals for the Eleventh Circuit or for the District of Columbia Circuit; or
 - (II) withdrawn, repealed, revoked, or otherwise rendered of no force and effect by the United States Environmental Protection Agency, Congress, or Presidential Executive Order.

Such action shall render the regulation as incorporated herein, or that portion thereof that may be affected by such action as invalid, void, stayed, or otherwise without force and effect for purposes of this rule upon the date such action becomes final and effective; provided, further, that such declaration, adjudication, stay, or other action described herein, shall not affect the remaining portions, if any, of the regulation as incorporated herein, which shall remain of full force and effect as if such portion so declared or adjudged invalid or unconstitutional or stayed or otherwise invalidated or effected were not originally a part of this rule. The Board declares that it would have incorporated the remaining parts of the federal regulation if it had known that such portion hereof would be declared or adjudged invalid or unconstitutional or stayed or otherwise rendered of no force and effect.

5. The subparagraphs of paragraph (10) that incorporate by reference portions of 40 CFR, Part 70 are as promulgated and published in the Federal Register through October 18, 2016, unless otherwise specified.

(b) Applicability.

1. The following sources shall be subject to this paragraph (10):
 - (i) Any major source as defined in 40 CFR Part 70.2, which is incorporated by reference in subparagraph (a)4;
 - (ii) Any source, including an area source, subject to a standard, limitation, or other requirement under Section 111 of the federal Act;
 - (iii) Any source, including an area source, subject to a standard or other requirement under Section 112 of the federal Act, except that a source is not required to obtain a permit solely because it is subject to regulations or requirements under Section 112(r) of the federal Act;
 - (iv) Any affected source as defined in 40 CFR Part 70.2, which is incorporated by reference in subparagraph (a)4; and
 - (v) Any source in a source category designated by the EPA Administrator pursuant to 40 CFR Part 70.3.
2. The following sources shall not be subject to this paragraph (10):
 - (i) Any source listed in subparagraph 10(b)1.(ii) that is not a major source;
 - (ii) Any source required to obtain a permit solely because they are subject to 40 CFR Part 61, Subpart M, National Emission Standard for Hazardous Air Pollutants for Asbestos, 61.145, Standard for Demolition and Renovation, or solely because they are subject to 40 CFR Part 60, Subpart AAA Standards of Performance for New Residential Wood Heaters; and
 - (iii) Any source listed in subparagraph (10)(b)1.(iii) that is an area source except those subject to an Emission Standard for Hazardous Air Pollutants under 40 CFR Part 63 that does not exempt the owner or operator from the obligation to obtain a Part 70 permit.
3. Emission units and Part 70 permits.

- (i) For major sources, Part 70 permits shall include all applicable requirements for all relevant emission units in the major source.
 - (ii) For any non-major source subject to the requirements of this paragraph (10), Part 70 permits shall include all applicable requirements applicable to emission units that cause the source to be subject to this paragraph (10).
- 4. Fugitive emissions from a source subject to the requirements of this paragraph (10) shall be included in the permit application and the Part 70 permit in the same manner as stack emissions, regardless of whether the source category in question is included in the list of sources contained in the definition of major source.
- 5. Any Part 70 source may make Section 502(b)(10) changes as defined in 40 CFR 70.2, which is incorporated by reference in subparagraph (a)4, without requiring a Part 70 permit revision, if the changes are not modifications under any provisions of Title I of the federal Act and the changes do not exceed the emissions allowable under the permit (whether expressed therein as a rate of emissions or in terms of total emissions). For each such change, the source shall provide the Director and the EPA Administrator with written notification as required below in advance of the proposed changes and shall obtain any permits required under Rules 391-3-1-.03(1) and (2). The source and the Director shall attach each such notice to their copy of the relevant permit.
 - (i) For each such change, the source's written notification and application for a construction permit shall be submitted well in advance of any critical date (construction date, permit issuance date, etc.) involved in the change, but no less than seven days in advance of such change and shall include a brief description of the change within the permitted facility, the date on which the change is proposed to occur, any change in emissions, and any permit term or condition that is no longer applicable as a result of the change.
 - (ii) The permit shield described in subparagraph (d)6. shall not apply to any change made pursuant to this paragraph.
- 6. Off-permit Changes: Any Part 70 source may make changes that are not addressed or prohibited by the permit, other than those described in subparagraph 7., without a Part 70 permit revision, provided the following requirements are met:

- (i) Each such change shall meet all applicable requirements and shall not violate any existing permit term or condition.
 - (ii) Sources must provide contemporaneous written notice to the Director and EPA Administrator of each such change, except for changes that qualify as insignificant as specified in subparagraph (g). Such written notice shall describe each such change, including the date, any change in emissions, pollutants emitted, and any applicable requirement that would apply as a result of the change.
 - (iii) The change shall not qualify for the shield under subparagraph (10)(d)6.
 - (iv) The permittee shall keep a record describing changes made at the source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from those changes.
 - (v) The source shall obtain any permits required under Rules 391-3-1-.03(1) and (2).
7. No Part 70 source may make, without a permit revision, any changes that are not addressed or prohibited by the Part 70 permit, if such changes are subject to any requirements under Title IV of the federal Act or are modifications under any provision of Title I of the federal Act.

(c) Permit Applications

1. For each Part 70 source, the owner or operator shall submit a complete application:
 - (i) Within 12 months after the U. S. EPA grants approval of this paragraph (10) or on or before such earlier date as the Director may establish, for a source applying for the first time;
 - (ii) Within 12 months after commencing operation, for a source required to meet the requirements under Section 112(g) of the federal Clean Air Act or to have a permit under the preconstruction review program requirements of Rule 391-3-1-.03(8)(b) or Rule 391-3-1-.03(8)(c). Where an existing Part 70 permit would prohibit such construction or change in operation, the source must obtain a permit revision before commencing operation;

- (iii) At least six months, but not more than 18 months prior to the date of permit expiration, for a source subject to permit renewal; or
 - (iv) By January 1, 1996, for initial Phase II sulfur dioxide acid rain permits and by January 1, 1998, for initial Phase II nitrogen oxide acid rain permits.
 - (v) within 12 months after commencing operation for a major source which commences operation after the date specified in subparagraph (10)(c)1.(i).
2. Standard Permit Application and Required Information. The application shall be made in a format specified by the Director. It shall be signed by a responsible official, as defined in 40 CFR 70.2, which is incorporated by reference in subparagraph (a)4, certifying its truthfulness, accuracy and completeness. For the purpose of this paragraph (10), 40 CFR 70.5(c) and 40 CFR 70.5(d) are hereby incorporated and adopted by reference. The application may require additional pertinent information which is not specified in 40 CFR 70.5(c), as incorporated by reference in this subparagraph, as the Director may require. To be deemed complete, an application must provide all information required pursuant to this subparagraph and subparagraph (g), except that applications for permit revision need supply such information only if it is related to the proposed change.
 3. Unless the Director determines that an application, including renewal applications, is not complete within 60 days of receipt of the application, such application shall be deemed to be complete, except as otherwise provided in 40 CFR 70.7(a)(4) which is hereby incorporated by reference.
 4. If, while processing an application that has been determined or deemed to be complete, the Director determines that additional information is necessary to evaluate or take final action on that application the Director may request such information in writing and set a reasonable deadline for a response. The source's ability to operate without a Part 70 permit shall be in effect from the date the application is determined or deemed to be complete until the final permit is issued, provided that the applicant submits any requested additional information by the deadline specified by the Director.
 5. Any applicant who fails to submit any relevant facts or who has submitted incorrect information in a permit application shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrected information. In addition, an applicant shall provide

additional information as necessary to address any requirements that become applicable to the source after the date it filed a complete application but prior to release of a draft permit.

(d) Permit Content.

1. Standard Permit Requirements.

- (i) For the purposes of this paragraph (10), 40 CFR Part 70.6(a) and 40 CFR 70.7(f) are hereby incorporated and adopted by reference.
- (ii) The permit may include terms and conditions allowing for the trading of emissions changes in the permitted facility solely for the purpose of complying with a federally enforceable emissions cap that is established in the permit independent of otherwise applicable requirements. The permit applicant shall include in its application proposed replicable procedures and permit terms that ensure that the emissions trades are quantifiable and enforceable. The Director shall not be required to include in the emissions trading provisions any emissions units for which emissions are not quantifiable or for which there are no replicable procedures to enforce the emissions trades. The following conditions apply to the emissions trades:
 - (I) The permittee shall provide written notification to the Director and EPA no less than seven days in advance of any change made pursuant to this subparagraph. The written notification shall state when the change will occur and shall describe the changes in emissions that will result and how these increases and decreases in emissions will comply with the terms and conditions of the permit.
 - (II) The permit shield described in subparagraph (d)6. may extend to the permit terms and conditions that allow for the emissions increases and decreases described in this subparagraph.
- (iii) The permit may include additional elements not specified in 40 CFR Part 70.6(a), which is incorporated by reference in subparagraph (d)1.(i), as required by the Director.

2. The Director shall specifically designate as not being federally enforceable under the federal Clean Air Act any terms and conditions included in the permit that are not required under the federal Clean Air Act or under any of its applicable requirements. If the Director does not so designate a term or condition, it shall be deemed federally enforceable.

3. Compliance Requirements. For the purposes of this paragraph (10), 40 CFR 70.6(c) is hereby incorporated and adopted by reference.
4. General Permits: For the purpose of this paragraph (10), 40 CFR 70.6(d) is hereby incorporated and adopted by reference.
5. The Director may issue a single permit authorizing emissions from similar operations by the same source owner or operator at multiple temporary locations. The operation must be temporary and involve at least one change of location during the term of the permit. No affected source shall be permitted as a temporary source. Permits for temporary sources shall include:
 - (i) Conditions that will assure compliance with all applicable requirements at all authorized locations;
 - (ii) Requirements that the owner or operator notify the Director at least 30 days in advance of each change in location; and
 - (iii) Conditions that assure compliance with all of the provisions of this paragraph.
6. Permit Shield.
 - (i) Except as provided in this paragraph (10), the Director may expressly include in a Part 70 permit a provision stating that a source which is in compliance with the conditions of the permit shall be deemed to be in compliance with any applicable requirements as of the date of the permit issuance, provided that:
 - (I) Such applicable requirements are included and are specifically identified in the permit; or
 - (II) The Director, in acting on the permit application or revision, determines in writing that other requirements specifically identified are not applicable to the source, and the permit includes the determination or a concise summary thereof.
 - (ii) A Part 70 permit that does not expressly state that a permit shield exists shall be presumed not to provide such a shield.
 - (iii) Nothing in this paragraph or in any Part 70 permit shall alter or affect the following:

- (I) The provisions of Section 303 of the federal Clean Air Act (emergency orders), including the authority of the Administrator under that section or the provisions of O.C.G.A. Section [12-9-14](#);
- (II) The liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance; or
- (III) The applicable requirements of the acid rain program, consistent with Section 408(a) of the federal Clean Air Act; or
- (IV) The ability of EPA to obtain information from a source pursuant to Section 114 of the federal Clean Air Act or of the Director to obtain information from a source pursuant to paragraph [391-3-1-.02\(6\)](#).

7. Emergency Provision: For the purpose of subparagraph (d)7., 40 CFR Part 70.6(g) is hereby incorporated and adopted by reference.

(e) Permit Issuance, Renewal, Reopenings and Revisions.

1. Action on application.

- (i) A permit, permit modification, or renewal may be issued only if all of the following conditions have been met:
 - (I) The Director has received a complete application, except that a complete application need not be received before issuance of a general permit under subparagraph (d);
 - (II) Except for modifications qualifying for minor permit modification procedures under subparagraphs (e)5.(i) or (e)5.(ii), the Director has complied with the requirements for public participation under subparagraph (e)8.;
 - (III) The Director has complied with the requirements for notifying and responding to affected States under subparagraph (f);
 - (IV) The conditions of the permit provide for compliance with all applicable requirements; and

- (V) The EPA Administrator has received a copy of the proposed permit and any notices required under subparagraph (f) and has not objected to issuance of the permit under subparagraph (f) within the time period specified therein.
- (ii) Except as provided under the initial transition plan or under regulations promulgated under Title IV of the federal Clean Air Act, the Director shall take final action on each permit application (including request for permit modification or renewal) within 18 months after receiving a complete application.
- (iii) The Director shall provide a statement that sets forth the legal and factual basis for the draft permit conditions (including references to the applicable statutory or regulatory provisions). The Director shall send this statement to EPA and to any other person who requests it.
- (iv) The submittal of a complete application shall not affect the requirement that any source have a preconstruction permit under paragraph 391-3-1-.03(8).

2. Requirement for a permit.

Except as provided in subparagraphs (b)5., (e)5.(i)(V) and (e)5.(ii)(V), no Part 70 source may operate after the time that it is required to submit a timely and complete application, except in compliance with a permit issued under this paragraph (10). If a Part 70 source submits a timely and complete application for permit issuance (including for renewal), the source's failure to have a Part 70 permit is not a violation until the Director takes final action on the permit application. This protection shall cease to apply if, subsequent to the completeness determination, the applicant fails to submit by the deadline specified in writing by the Director any additional information identified as being needed to process the application.

3. Permit renewal and expiration.

- (i) Permits being renewed are subject to the same procedural requirements, including those for public participation, affected State and EPA review, that apply to initial permit issuance.
- (ii) Permit expiration terminates the source's right to operate unless a timely and complete renewal application has been submitted.

- (iii) If a timely and complete application for permit renewal is submitted, but the Director has failed to issue or deny the renewal permit before the end of the term of the previous permit, then the permit shall not expire until the renewal permit has been issued or denied and any permit shield that may be granted pursuant to subparagraph (d)6. shall extend beyond the original permit term until renewal.

4. Administrative permit amendments.

- (i) Definitions: For the purpose of this paragraph, 40 CFR, Part 70.7(d)(1) is incorporated and adopted by reference.
- (ii) Administrative permit amendments for purposes of the acid rain portion of the permit shall be governed by regulations promulgated under Title IV of the federal Clean Air Act.
- (iii) An administrative permit amendment may be made by the Director consistent with the following:
 - (I) The Director shall take no more than 60 days from receipt of a request for an administrative permit amendment to take final action on such request, and may incorporate such changes without providing notice to the public or affected States provided that it designates any such permit revisions as having been made pursuant to this subparagraph.
 - (II) The Director shall submit a copy of the revised permit to the EPA Administrator.
 - (III) The source may implement the changes addressed in the request for an administrative amendment immediately upon submittal of the request.
- (iv) The Director may, upon taking final action granting a request for an administrative permit amendment, allow coverage by the permit shield for administrative permit amendments made pursuant to 40 CFR Part 70.7(d)(1)(v), which is incorporated by reference in subparagraph (e)4.(i) of this rule, which meet the requirements for significant permit modifications.

5. Permit modification.

A permit modification is any revision to a Part 70 permit that cannot be accomplished under subparagraph 4. A permit modification for purposes of the acid rain program shall be governed by regulations promulgated under Title IV of the federal Clean Air Act.

- (i) Minor permit modification procedures.
 - (I) Minor permit modification procedures may be used only for those permit modifications that:
 - I. Do not violate any applicable requirement;
 - II. Do not involve significant changes to existing monitoring, reporting, or recordkeeping requirements in the permit;
 - III. Do not require or change a case-by-case determination of an emission limitation or other standard, or a source specific determination for temporary sources of ambient impacts, or a visibility or increment analysis;
 - IV. Do not seek to establish or change a permit term or condition for which there is no corresponding underlying applicable requirement and that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject, including a federally enforceable emissions cap assumed to avoid classification as a modification under any provision of 391-3-1-.03(8), and an alternative emissions limit approved pursuant to regulations promulgated under Section 112(j)(5) of the federal Clean Air Act;
 - V. Are not modifications under any provision of 391-3-1-.03(8); and
 - VI. Are not required by this paragraph (10) to be processed as a significant modification.
 - (II) An application requesting the use of minor permit modification procedures shall meet the requirements of paragraph (8) and shall include the following:

- I. A description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;
 - II. The source's suggested draft permit;
 - III. Certification by a responsible official, consistent with subparagraph (c), that the proposed modification meets the criteria for use of minor modification procedures and a request that such procedures be used; and
 - IV. Completed forms for the Director to use to notify the EPA Administrator and affected States as required under subparagraph (f).
- (III) Within five working days of receipt of a complete minor permit modification application, the Director shall meet his obligation under subparagraph (f)(1) and subparagraph (f)(2)(i) to notify the EPA Administrator and affected States of the requested permit modification. The Director shall promptly send any notice required under subparagraph (f)(2)(ii) to the EPA Administrator.
- (IV) The Director may not issue a final permit modification until after EPA's 45-day review period or until EPA has notified the Director that EPA will not object to issuance of the permit modification, whichever is first, although the Director can approve the permit modification prior to that time. Within 90 days of the Director's receipt of an application under minor permit modification procedures or 15 days after the end of the EPA Administrator's 45-day review period under subparagraph (f)(3), whichever is later, the Director shall:
- I. Issue the permit modification as proposed;
 - II. Deny the permit modification application;
 - III. Determine that the requested modification does not meet the minor permit modification criteria and

should be reviewed under the significant modification procedures; or

- IV. Revise the draft permit modification and transmit to the EPA Administrator the new proposed permit modification as required by subparagraph (f).
- (V) The source may make changes proposed in its minor permit modification application as follows:
- I. For proposed changes that require a permit in accordance with 391-3-1-.03(1), the source may make the change proposed in its minor permit modification application immediately after obtaining a permit for the modification pursuant to the requirements of 391-3-1-.03(1). After the source makes such change and until the Director takes any of the actions specified in subparagraph (IV), the source must comply with the applicable requirements governing the change, the proposed permit terms and conditions, and requirements of the construction permit issued under 391-3-1-.03(1). During this time period, the source need not comply with the existing permit terms and conditions it seeks to modify. However, if the source fails to comply with its proposed permit terms and conditions and the requirements of the construction permit issued under 391-3-1-.03(1) during this time period, the existing permit terms and conditions it seeks to modify and the requirements of the construction permit issued under 391-3-1-.03(1) may be enforced against it.
 - II. For proposed changes that do not require a permit in accordance with 391-3-1-.03(1), the source may make the change proposed in its minor permit modification application upon receipt of a letter from the Division acknowledging receipt of said application. If the Director denies the permit modification application in accordance with subparagraph (IV)II, the existing terms and conditions that the applicant seeks to modify may be enforced by the Division.

- (VI) The permit shield may not extend to minor permit modifications.
- (ii) Group processing of minor permit modifications. The Director may modify the procedure outlined in subparagraph (e)5.(i) to process groups of a source's applications for certain modifications eligible for minor permit modification processing.
 - (I) Group processing of modifications may be used only for those permit modifications:
 - I. That meet the criteria for minor permit modification procedures under subparagraph (e)5.(i); and
 - II. That collectively are below 10 percent of the emissions allowed by the permit for the emissions unit for which the change is requested, 20 percent of the applicable definition of major source in subparagraph (a)4., or 5 tons per year, whichever is least.
 - (II) An application requesting the use of group processing procedures shall meet the requirements of subparagraph (c)2. and shall include the following:
 - I. A description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs.
 - II. The source's suggested draft permit.
 - III. Certification by a responsible official that the proposed modification meets the criteria for use of group processing procedures under a request that such procedures be used.
 - IV. A list of the source's other pending applications awaiting group processing, and determination of whether the requested modification, aggregated with these other applications, equals or exceeds the threshold set under subparagraph (e)5.(ii)(I)II.

- V. Certification that the source has notified EPA of the proposed modification. Such notification need only contain a brief description of the proposed modification.
 - VI. Completed forms for the Director to use to notify the EPA Administrator and affected States as required under subparagraph (f).
- (III) On a quarterly basis or within five business days of receipt of an application demonstrating that the aggregate of a source's pending applications equals or exceeds the threshold level set in subparagraph (e)5.(ii)(I)II., whichever is earlier, the Director promptly shall comply with subparagraphs (f)(1) and (f)(2). The Director shall send any notice required under subparagraph (f)(2)(ii) to the EPA Administrator.
- (IV) The provisions of subparagraph (e)5.(i)(IV) shall apply to modifications eligible for group processing, except that the Director shall take one of the actions specified in subparagraphs (e)5.(i)(IV)I through IV. within 180 days of receipt of the application or 15 days after the end of the EPA Administrator's 45-day review period under subparagraph (f)(3), whichever is later.
- (V) The provisions of subparagraph 5.(i)(V) shall apply to modifications eligible for group processing.
- (VI) The provisions of subparagraph 5.(i)(VI) shall also apply to modifications eligible for group processing.
- (iii) Significant modification procedures.
- (I) Significant modification procedures shall be used for applications requesting permit modifications that do not qualify as minor permit modifications or as administrative amendments. At a minimum, every significant change in existing monitoring permit terms or conditions and every relaxation of reporting or recordkeeping permit terms or conditions shall be considered significant. Nothing herein shall be construed to preclude the permittee from making

changes consistent with this paragraph (10) that would render existing permit compliance terms and conditions irrelevant.

- (II) Significant permit modifications shall meet all requirements of this paragraph (10), including those for applications, public participation, review by affected States, and review by EPA, as they apply to permit issuance and permit renewal.

6. Reopening for cause.

- (i) A permit shall be reopened and revised under any of the following circumstances:
 - (I) Additional applicable requirements become applicable to a major Part 70 source with a remaining permit term of three or more years. Such a reopening shall be completed not later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended under subparagraph (e)3.(iii).
 - (II) Additional requirements (including excess emissions requirements) become applicable to an affected source under the acid rain program. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit.
 - (III) The Director determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.
 - (IV) The Director determines that the permit must be revised or revoked to assure compliance with the applicable requirements.
- (ii) Proceedings to reopen and issue a permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of the permit for which cause to reopen exists.

- (i) Reopenings shall not be initiated before a notice of such intent is provided to the source by the Director at least 30 days in advance of the date that the permit is to be reopened, except that the Director may provide a shorter time period in the case of an emergency.

7. Reopenings for cause by EPA.

- (i) If the EPA Administrator finds that cause exists to terminate, modify or revoke and reissue a permit pursuant to subparagraph 6. and notifies the Director of such finding in writing, the Director shall, within 90 days after receipt of such notification, forward to EPA a proposed determination of termination, modification, or revocation and reissuance, as appropriate. If the EPA Administrator finds that a new or revised permit application is necessary or that the Director must require the permittee to submit additional information and extends this 90 day period, the Director shall forward the subject determination within 180 days of receipt of EPA's notification.
- (ii) Within 90 days from receipt of an EPA objection, the Director shall resolve such objection and terminate, modify, or revoke and reissue the permit in accordance with EPA's objection.

8. Public participation.

40 CFR Part 70.7(h) is hereby incorporated and adopted by reference.

(f) Permit review by EPA and affected states.

1. The Director shall provide the EPA Administrator a copy of each permit application (including any application for permit modification), each proposed permit, and each final Part 70 permit. The Director may require the applicant to provide a copy of the permit application (including the compliance plan) directly to the EPA Administrator. Upon approval by the EPA Administrator, the Director may submit to the EPA Administrator a permit application summary form and any relevant portion of the permit application and compliance plan, in place of the complete permit application and compliance plan.
2. Review by affected States.

- (i) The Director shall give notice of each draft permit to any affected State on or before the time that the Director provides this notice to the public under subparagraph (e)8., except to the extent that subparagraphs (e)5.(i) or (e)5.(ii) require the timing of the notice to be different.
- (ii) The Director, as part of the submittal of the proposed permit to the EPA Administrator [or as soon as possible after the submittal for minor permit procedures allowed under subparagraphs (e)5.(i) or (e)5.(ii)], shall notify the EPA Administrator and any affected State in writing of any refusal by the Director to accept all recommendations for the proposed permit that the affected State submitted during the public or affected State comment period. The notice shall include the Director's reasons for not accepting any such recommendation. The Director is not required to accept recommendations that are not based on applicable requirements or the requirements of this paragraph (10).

3. EPA objection.

- (i) No permit for which an application must be transmitted to the EPA Administrator under subparagraph (f)1. shall be issued if the EPA Administrator objects to its issuance in writing within a timely manner pursuant to 40 CFR 70.8(c) and 40 CFR 70.8(d) which are hereby incorporated by reference.

(g) Insignificant Activities List

Unless otherwise required by the Director, the following air pollutant sources/activities must be listed, but need not be described in detail, in the Part 70 permit application. Exclusion of these emissions from detailed reporting does not exclude them from inclusion in any applicability determination. Additionally, this insignificant listing may not be used to avoid any applicable requirement (i.e. NESHAP, NSPS, etc.) as defined in 40 CFR Part 70.2, which is incorporated by reference in subparagraph (a)4.

1. Mobile Sources.

- (i) Cleaning and sweeping of streets and paved surfaces.

2. Combustion Equipment.

- (i) Firefighting equipment, including fire pumps or other emergency/safety equipment used to fight fires or train firefighters or other emergency personnel.
- (ii) Small incinerators that are not subject to any standard, limitation or other requirement under Section 111 or 112 [excluding 112(r)] of the Federal Act and are not considered a "designated facility" as specified in 40 CFR 60.32e of the Federal emissions guidelines for Hospital/Medical/ Infectious Waste Incinerators, that are operating as follows:
 - (I) Less than 8 million BTUs per hour heat input, firing types 0, 1, 2 and/or 3 waste; or
 - (II) Less than 8 million BTUs per hour heat input with no more than 10% pathological (Type-4) waste by weight combined with types 0, 1, 2 and/or 3 waste; or
 - (III) Less than 4 million BTUs per hour heat input firing Type 4 waste.
 - (IV) For the purpose of this subparagraph, the following definitions apply:
 - I. "Type 0 waste" means trash. This refers to a mixture of combustible waste such as paper, cardboard, wood and floor sweepings; which contains up to 10% petrochemical waste, 5% non-combustibles and 10% moisture, by weight; which is generated from commercial activities; and having a higher heat value (HHV) of approximately 8,500 BTU/lb.
 - II. "Type 1 waste" means rubbish. This refers to a mixture of combustible waste such as paper, cardboard, wood foliage and floor sweepings; which contains up to 10% petrochemical waste, 5% non-combustibles and 10% moisture, by weight; which is generated from domestic and commercial activities; and having a HHV of approximately 6,500 BTU/lb.
 - III. "Type 2 waste" means refuse. This refers to an evenly distributed mixture of rubbish and garbage as usually received in municipal waste; which

contains up to 50% moisture content, by weight and 7% non-combustible solids; and having a HHV of approximately 4,300 BTU/lb.

IV. "Type 3 waste" means garbage. This refers to animal and vegetable wastes from restaurants, cafeterias, hotels, markets, and like installations; which contains up to 70% moisture, by weight, and 5% non-combustible solids; and having a HHV of approximately 2,500 BTU/lb.

V. "Type 4 waste" means human and animal remains. This refers to carcasses, organs, and solid organic wastes from hospitals, laboratories, abattoirs, animal pounds; and having a HHV of approximately 1,000 BTU/lb.

(iii) Open burning in compliance with Georgia Rule [391-3-1-.02\(5\)](#).

(iv) Stationary Engines Burning:

(I) Natural gas, gasoline, diesel fuel, or dual fuels which are used exclusively as emergency generators; or

(II) Natural gas, LPG, and/or diesel fuel and used for peaking power (including emergency generators used for peaking power) where the peaking power use does not exceed 200 hours-per-year, except in the counties of Banks, Barrow, Bartow, Butts, Carroll, Chattooga, Cherokee, Clarke, Clayton, Cobb, Coweta, Dawson, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gordon, Gwinnett, Hall, Haralson, Heard, Henry, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Newton, Oconee, Paulding, Pickens, Pike, Polk, Putnam, Rockdale, Spalding, Troup, Upson, and Walton where such engines with a rated capacity equal to and greater than 100 kilowatts are not insignificant activities; or

(III) Natural gas, LPG, and/or diesel fuel used for other purposes, provided that the output of each engine does not exceed 400 horsepower and that no individual engine operates for more than one thousand hours-per-year; or

- (IV) Gasoline used for other purposes, provided that the output of each engine does not exceed 100 horsepower and that no individual engine operates for more than 500 hours-per-year except in the counties of Banks, Barrow, Bartow, Butts, Carroll, Chattooga, Cherokee, Clarke, Clayton, Cobb, Coweta, Dawson, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gordon, Gwinnett, Hall, Haralson, Heard, Henry, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Newton, Oconee, Paulding, Pickens, Pike, Polk, Putnam, Rockdale, Spalding, Troup, Upson, and Walton where such engines with a rated capacity equal to and greater than 100 kilowatts used for peaking power are not insignificant activities.
- (V) For the purpose of this subparagraph, the following definitions shall apply:
 - I. An "emergency generator" means a generator whose function is to provide back-up power when electric power from the local utility is interrupted and which operates for less than 500 hours-per-year, except in the counties of Banks, Barrow, Bartow, Butts, Carroll, Chattooga, Cherokee, Clarke, Clayton, Cobb, Coweta, Dawson, DeKalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gordon, Gwinnett, Hall, Haralson, Heard, Henry, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Newton, Oconee, Paulding, Pickens, Pike, Polk, Putnam, Rockdale, Spalding, Troup, Upson, and Walton where such generator operates less than 200 hours-per-year.
 - II. "Used for peaking power" means used to reduce the electrical power requirements on the local utility grid. This could be for supplying power during the local utility's peak demand periods or for peak shaving by the facility.

3. Trade Operations.

- (i) Brazing, soldering and welding equipment, and cutting torches related manufacturing and construction activities whose emissions

of hazardous air pollutants (HAPs) fall below 1,000 pounds per year.

4. Maintenance, Cleaning, and Housekeeping.
 - (i) Blast-cleaning equipment using a suspension of abrasive in water and any exhaust system (or collector) serving them exclusively.
 - (ii) Portable blast-cleaning equipment.
 - (iii) Non-Perchloroethylene Dry-cleaning equipment with a capacity of 100 pounds per hour or less of clothes.
 - (iv) Cold cleaners having an air/vapor interface of not more than 10 square feet and that do not use a halogenated solvent.
 - (v) Non-routine clean out of tanks and equipment for the purposes of worker entry or in preparation for maintenance or decommissioning.
 - (vi) Devices used exclusively for cleaning metal parts or surfaces by burning off residual amounts of paint, varnish, or other foreign material, provided that such devices are equipped with afterburners.
 - (vii) Cleaning Operations: Alkaline/phosphate cleaners and associated cleaners and burners.
5. Laboratories and Testing.
 - (i) Laboratory fume hoods and vents associated with bench-scale laboratory equipment used for physical or chemical analysis.
 - (ii) Research and development facilities, quality control testing facilities and/or small pilot projects, where combined daily emissions from all operations are not individually major and are not support facilities making significant contributions to the product of a collocated major manufacturing facility.
6. Pollution Control.
 - (i) Sanitary wastewater collection and treatment systems, except incineration equipment or equipment subject to any standard, limitation or other requirement under Section 111 or 112 [excluding 112(r)] of the Federal Act.

- (ii) On site soil or groundwater decontamination units that are not subject to any standard, limitation or other requirement under Section 111 or 112 [excluding 112(r)] of the Federal Act.
- (iii) Bioremediation operations units that are not subject to any standard, limitation or other requirement under Section 111 or 112 [excluding 112(r)] of the Federal Act.
- (iv) Landfills that are not subject to any standard, limitation or other requirement under Section 111 or 112 [excluding 112(r)] of the Federal Act.

7. Industrial Operations.

- (i) Concrete block and brick plants, concrete products plants, and ready mix concrete plants producing less than 125,000 tons per year.
- (ii) Any of the following processes or process equipment which are electrically heated or which fire natural gas, LPG or distillate fuel oil at a maximum total heat input rate of not more than five million BTUs per hour:
 - (I) Furnaces for heat treating glass or metals, the use of which do not involve molten materials or oil-coated parts.
 - (II) Porcelain enameling furnaces or porcelain enameling drying ovens.
 - (III) Kilns for firing ceramic ware.
 - (IV) Crucible furnaces, pot furnaces, or induction melting and holding furnaces with a capacity of 1,000 pounds or less each, in which sweating or distilling is not conducted and in which fluxing is not conducted utilizing free chlorine, chloride or fluoride derivatives, or ammonium compounds.
 - (V) Bakery ovens and confection cookers.
 - (VI) Feed mill or grain mill ovens.
 - (VII) Surface coating drying ovens.
- (iii) Carving, cutting, routing, turning, drilling, machining, sawing, surface grinding, sanding, planing, buffing, shot blasting, shot peening, or polishing; ceramics, glass, leather, metals, plastics,

rubber, concrete, paper stock or wood, also including roll grinding and ground wood pulping stone sharpening, provided that:

- (I) The activity is performed indoors; and
 - (II) No significant fugitive particulate emissions enter the environment; and
 - (III) No visible emissions enter the outdoor atmosphere.
- (iv) Photographic process equipment by which an image is reproduced upon material sensitized to radiant energy (e.g., blueprint activity, photographic developing and microfiche).
 - (v) Grain, food, or mineral extrusion processes.
 - (vi) Equipment used exclusively for sintering of glass or metals, but not including equipment used for sintering metal-bearing ores, metal scale, clay, fly ash, or metal compounds.
 - (vii) Equipment for the mining and screening of uncrushed native sand and gravel.
 - (viii) Ozonization process or process equipment.
 - (ix) Electrostatic powder coating booths with an appropriately designed and operated particulate control system.
 - (x) Activities involving the application of hot melt adhesives where VOC emissions are less than 5 tons per year and HAP emissions are less than 1,000 pounds per year.
 - (xi) Equipment used exclusively for mixing and blending water-based adhesives and coatings at ambient temperatures.
 - (xii) Equipment used for compression, molding and injection of plastics where VOC emissions are less than 5 tons per year and HAP emissions are less than 1,000 pounds per year.
 - (xiii) Ultraviolet curing processes where VOC emissions are less than five tons per year and HAP emissions are less than 1,000 pounds per year.

8. Storage Tanks and Equipment.

- (i) All petroleum liquid storage tanks storing a liquid with a true vapor pressure of equal to or less than 0.50 psia as stored.
- (ii) All petroleum liquid storage tanks with a capacity of less than 40,000 gallons storing a liquid with a true vapor pressure of equal to or less than 2.0 psia as stored that are not subject to any standard, limitation or other requirement under Section 111 or 112 [excluding 112(r)] of the Federal Act.
- (iii) All petroleum liquid storage tanks with a capacity of less than 10,000 gallons storing a petroleum liquid.
- (iv) All pressurized vessels designed to operate in excess of 30 psig storing petroleum fuels that are not subject to any standard, limitation or other requirement under Section 111 or 112 [excluding 112(r)] of the Federal Act.
- (v) Gasoline storage and handling equipment at loading facilities handling less than 20,000 gallons per day or at vehicle dispensing facilities that are not subject to any standard, limitation or other requirement under Section 111 or 112 [excluding 112(r)] of the Federal Act.
- (vi) Portable drums, barrels, and totes provided that the volume of each container does not exceed 550 gallons.
- (vii) All chemical storage tanks used to store a chemical with a true vapor pressure of less than or equal to 10 millimeters of mercury (0.19 psia).

(11) Permit by Rule.

(a) General Requirements.

1. Accepting a Permit by Rule does not exempt that facility from the obligation to apply for and obtain a Construction (SIP) Permit and/or an Operating (SIP) Permit unless specifically exempted in the permit by rule. Complying with the requirements of a Permit by Rule does not relieve a facility of having to comply with other requirements of the Rules.
2. The permitting authority may, after notice and opportunity for public participation, issue a Permit by Rule covering numerous similar sources. Any Permit by Rule shall identify criteria and standards by which sources may qualify for the Permit by Rule. Any facility wishing to operate under a

Permit by Rule shall certify that in writing to the permitting authority, unless specifically exempted from this requirement in the specific Permit by Rule. To sources that qualify, the permitting authority shall grant the conditions and terms of the Permit by Rule by Certification letter. Notwithstanding the shield provisions of 40 CFR Part 70.6(f), the source shall be subject to enforcement action for operation without a Part 70 Permit if the source is later determined not to qualify for the conditions and terms of the Permit by Rule.

3. It is the responsibility of any facility accepting a "Permit by Rule" to submit a report within 15 days following the last day of any month in which the facility exceeds the annual limit during the previous 12 months or monthly limit during the previous month. The report shall include the following:
 - (i) Facility name, ID, and location.
 - (ii) The "Permit by Rule" name, number and applicable limits.
 - (iii) A summary of the records showing the exceedance along with an explanation.
 - (iv) What the facility plans to do to prevent future occurrences.

(b) Permit by Rule Standards.

1. Fuel-Burning Equipment Burning Natural Gas/LPG and/or Distillate Oil.
 - (i) Notwithstanding any other provision of these Rules, this standard applies to facilities with external combustion fuel burning equipment rated at less than or equal to 100 million BTU per hour, with a potential to emit in excess of the Part 70 major source threshold, without existing permit conditions that are federally enforceable or enforceable as a practical matter limiting the source to below Part 70 major source thresholds. Facilities for which the only source of regulated air pollutants from external combustion fuel-burning equipment (excluding turbines) is from equipment permitted to burn natural gas/LPG and/or distillate oil exclusively shall be deemed to have a Permit by Rule if the conditions in paragraph (I) and (II) are met. Facilities that have potential emissions of greater than major source thresholds even after this rule is met or are not able to meet the conditions in paragraphs (I) and (II) shall obtain a Part 70 Permit. All facilities located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale,

which were granted a Permit by Rule by certification letter dated prior to January 1, 2004 and which seek to continue to operate under this Permit by Rule, shall submit a new written certification of compliance with revised paragraphs (I) and (II) by no later than October 31, 2004.

- (I) Monitoring and Record keeping. A log of the monthly fuel use must be kept. The total fuel usage for the previous twelve consecutive months must be included in each month's log. Consumption of distillate oil shall be recorded in gallons, consumption of LPG shall be recorded in gallons and consumption of natural gas shall be recorded in cubic feet. This log shall be kept for five years from the date of last entry. The log shall be available for inspection or submittal to the Division.

- (II) Fuel Usage. Facility fuel usage shall be limited to 900 million cubic feet of natural gas (or 7.0 million gallons of LPG) and 1.6 million gallons of distillate oil during any twelve consecutive months except in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale, where fuel usage shall be limited to 300 million cubic feet of natural gas (or 1.5 million gallons of LPG) and 500,000 gallons of distillate oil during any twelve consecutive months.

2. Fuel-Burning Equipment Burning Natural Gas/LPG and/or Residual Oil.

- (i) Notwithstanding any other provision of these Rules, this standard applies to facilities with external combustion fuel burning equipment rated at less than or equal to 100 million BTU per hour, with a potential to emit in excess of the Part 70 major source threshold without existing permit conditions that are federally enforceable or enforceable as a practical matter limiting the source to below Part 70 major source thresholds. Facilities for which the only source of regulated air pollutants from external combustion fuel burning equipment is from equipment permitted to burn only natural gas/LPG and/or residual fuel oil exclusively shall be deemed to have a Permit by Rule if the conditions in paragraph (I) and (II) are met. Facilities that have potential emissions greater than major source thresholds even after this rule is met or are not able to meet the conditions in paragraphs (I) and (II) shall obtain a Part 70 Permit. All facilities located in the counties of Cherokee, Clayton,

Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale, which were granted a Permit by Rule by certification letter dated prior to January 1, 2004 and which seek to continue to operate under this Permit by Rule, shall submit a new written certification of compliance with revised paragraphs (I) and (II) by no later than October 31, 2004.

- (I) Monitoring and Recordkeeping. A log of the monthly fuel use must be kept. The total fuel usage for the previous twelve consecutive months must be included in each month's log. Consumption of residual fuel oil shall be recorded in gallons, consumption of LPG shall be recorded in gallons and consumption of natural gas shall be recorded in cubic feet. This log shall be kept for five years past the date of last entry. The log shall be available for inspection or submittal to the Division.

- (II) Fuel Usage. Annual facility fuel usage shall be limited to 1,000 million cubic feet of natural gas (or 7.5 million gallons of LPG) and 400,000 gallons residual fuel oil during any twelve consecutive months except in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, or Rockdale, where fuel usage shall be limited to 300 million cubic feet of natural gas (or 1.5 million gallons of LPG) and 200,000 gallons of residual fuel oil.

3. On-Site Power Generation.

- (i) Notwithstanding any other provision of these Rules, this standard applies to facilities with a potential to emit in excess of the Part 70 major source threshold without existing permit conditions that are federally enforceable or enforceable as a practical matter limiting the source to below Part 70 major source thresholds. Facilities that operate internal combustion engines for purposes of generating emergency power, peaking power, and/or temporary on-site power and where such equipment burns natural gas/LPG, #1 fuel oil (kerosene/JP4 or JP5) and/or #2 fuel oil/diesel exclusively shall be deemed to have a Permit by Rule if the conditions in paragraph (I) and (II) are met. Facilities that have potential emissions of greater than major source thresholds even after this rule is met or are not able to meet the conditions in paragraphs (I) and (II) shall obtain a Part 70 Permit. All facilities located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton,

Gwinnett, Henry, Paulding, and Rockdale, which were granted a Permit by Rule by certification letter dated prior to January 1, 2004 and which seek to continue to operate under this Permit by Rule, shall submit a new written certification of compliance with revised paragraphs (I) and (II) by no later than October 31, 2004.

- (I) **Monitoring and Record Keeping.** A log of the monthly total horsepower-hours for the facility based on the number of hours of operation of each unit per month times the maximum horsepower rating of that unit must be included in each month's log. The total horsepower-hours for the previous twelve consecutive months must be included in each month's log. This log shall be kept for five years from the date of last entry. The log shall be available for inspection or submittal to the Division.
- (II) **Power Production Limits.** A facility's power generation is limited to a total of no more than 6.7 million horsepower-hours during any twelve consecutive months except in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale counties, where the total is no more than 1.675 million horsepower-hours during any twelve consecutive months.

4. Concrete Mixing Plants.

- (i) Notwithstanding any other provision of these Rules, this standard applies to facilities with a potential to emit in excess of the Part 70 major source threshold without existing permit conditions that are federally enforceable or enforceable as a practical matter limiting the source to below Part 70 major source thresholds. Concrete mixing plants shall be deemed to have a Permit by Rule if the conditions in paragraph (I) and (II) are met. Facilities that would otherwise have potential emissions of greater than major source thresholds even after this rule is met or are not able to meet the conditions in paragraphs (I) and (II) shall obtain a Part 70 Permit.
 - (I) **Monitoring and Recordkeeping.** A log of the monthly production must be kept. The total production for the previous twelve consecutive months must be included in each month's log. This log shall be kept for five years from the date of last entry. The log shall be available for inspection or submittal to the Division.

- (II) Annual Production. Production on the plant site shall be limited to 600,000 cubic yards during any twelve consecutive months.

5. Hot Mix Asphalt Plants.

- (i) Notwithstanding any other provision of these Rules, this standard applies to hot mix asphalt facilities with a potential to emit in excess of the Part 70 major source threshold without existing permit conditions that are federally enforceable or enforceable as a practical matter limiting the source to below Part 70 major source thresholds. Hot mix asphalt plants shall be deemed to have a Permit by Rule if the conditions in paragraph (I) and (II) are met. Facilities that would otherwise have potential emissions of greater than major source thresholds or are not able to meet the conditions in paragraphs (I) and (II) shall obtain a Part 70 Permit. All facilities located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale, which were granted a Permit by Rule by certification letter dated prior to January 1, 2004 and which seek to continue to operate under this Permit by Rule, shall submit a new written certification of compliance with revised paragraphs (I) and (II) by no later than October 31, 2004.

- (I) Monitoring and Record Keeping.

- I. New asphalt plants (which commenced construction or modification after June 11, 1973) permitted to burn natural gas/LPG and/or distillate oil only shall maintain a monthly log of production and hours of operation. The total production and hours of operation for the previous twelve consecutive months must be included in each month's log. These logs shall be kept for five years from the date of last entry and shall be available for inspection and/or submittal to the Division.
- II. New and existing asphalt plants permitted to burn natural gas/LPG, distillate oil, and residual oil in any combination shall maintain a monthly log of production, hours of operation and monthly fuel use. The total production, hours of operation and fuel oil usage for the previous twelve consecutive months must be included in each month's log. Fuel oil

certifications showing sulfur content equal to or less than 1.5% shall also be maintained. These logs and certifications shall be kept for five years from the date of last entry and shall be available for inspection and/or submittal to the Division.

(II) Annual Production.

- I. New asphalt plants (which commenced construction or modification after June 11, 1973) permitted to burn natural gas/LPG and/or distillate oil only shall limit:
 - A. Production to 400,000 tons during any twelve consecutive months; and
 - B. Operations to 3000 hours during any twelve consecutive months.

- II. New and existing asphalt plants permitted to burn natural gas/LPG, distillate oil, and residual oil in any combination shall limit:
 - A. Production to 200,000 tons during any twelve consecutive months;
 - B. Fuel sulfur content to less than or equal to 1.5%;
 - C. Operation to 3000 hours during any twelve consecutive months; and
 - D. Fuel oil usage to 678,000 gallons during any twelve consecutive months.

- III. New asphalt plants (which commenced construction or modification after June 11, 1973) permitted to burn natural gas/LPG and/or distillate oil only, which are located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale shall limit:

- A. Production to 300,000 tons during any twelve consecutive months; and
- B. Operations to 3000 hours during any twelve consecutive months.

IV. New and existing asphalt plants permitted to burn natural gas/LPG, distillate oil, and residual oil in any combination, which are located in the counties of Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding and Rockdale shall limit:

- A. Production to 125,000 tons during any twelve consecutive months;
- B. Fuel sulfur content to less than or equal to 1.5%;
- C. Operation to 3000 hours during any twelve consecutive months; and
- D. Fuel oil usage to 250,000 gallons during any twelve consecutive months.

6. Cotton Ginning Operations.

(i) Notwithstanding any other provision of these Rules, this standard applies to facilities with a potential to emit in excess of the Part 70 major source threshold without existing permit conditions that are federally enforceable or enforceable as a practical matter limiting the source to below Part 70 major source thresholds. Cotton ginning operations shall be deemed to have a Permit by Rule if the conditions in paragraph (I) and (II) are met. Facilities that have potential emissions greater than major source thresholds even after this rule is met or are not able to meet the conditions in paragraphs (I) and (II) shall obtain a Part 70 Permit.

(I) Monitoring and Record keeping. A log of the monthly production must be kept. The total production for the previous twelve consecutive months must be included in each month's log. This log shall be kept for five years from the

date of last entry. The log shall be available for inspection or submittal to the Division.

- (II) Annual Production. Production shall be limited to 120,000 standard bales of cotton during any twelve consecutive months.

7. Coating and/or Gluing Operations.

- (i) Notwithstanding any other provision of these Rules, this standard applies to facilities with a potential to emit in amounts equal to or exceeding the Part 70 and Part 63 major source thresholds without existing permit conditions that are federally enforceable or enforceable as a practical matter limiting the source to below Part 70 or Part 63 major source thresholds. This standard applies only to facilities:
 - (I) Where the actual VOC emissions from coating and/or gluing operations represent at least 90 percent of the plant wide actual VOC emissions; and
 - (II) Where the actual HAP emissions from coating and/or gluing operations represent at least 90 percent of the plant wide actual HAP emissions or where the actual HAP emissions from non-coating and non-gluing operations are less than 1.0 tons per year.
- (ii) This standard establishes federally enforceable conditions limiting the potential to emit for VOC and HAPs. Coating and/or gluing operations shall be deemed to have a Permit by Rule if the conditions in one of the following paragraphs (I), (II), (III) or (IV) are met. Facilities that have potential emissions of greater than major source thresholds even after this rule is met or are not able to meet the conditions in paragraphs (I), (II), (III), or (IV) and the remainder of this subsection shall obtain a Part 70 Permit. In accordance with the General Requirements in subparagraph (11)(a)2., the owner or operator of a facility wishing to operate under this Permit-by-Rule must also declare which of the four options are going to be met.
 - (I) The owner or operator of the source shall consume less than 20,000 pounds of any VOC and/or HAP containing materials during any twelve consecutive months. A log of

the monthly consumption of VOC and/or HAP containing material must be kept. The total consumption for the previous twelve consecutive months must be included in each month's log. Records for materials (including but not limited to coatings, thinners, and solvents) shall be recorded in pounds. These records shall be maintained and made readily available for inspection for a minimum of five years upon date of entry and shall be submitted to the Division upon request.

- (II) The owner or operator of the facility shall use less than 250 total gallons each month, of coating, gluing, cleaning, and washoff materials at the facility. The owner or operator shall demonstrate compliance by maintaining records of the total gallons of coating, gluing, cleaning, and washoff materials used each month. These records shall be maintained and made readily available for inspection for a minimum of five years upon date of entry and shall be submitted to the Division upon request.
- (III) The owner or operator of the source shall use less than 3,000 total gallons per rolling 12-month period, of coating, gluing, cleaning, and washoff materials at the facility. A rolling 12-month period includes the previous 12 months of operation. The owner or operator of the facility shall demonstrate compliance by maintaining records of the total gallons of coating, gluing, cleaning, and washoff materials used each month and the total gallons used each rolling 12-month period. These records shall be maintained and made readily available for inspection for a minimum of five years upon date of entry and shall be submitted to the Division upon request.
- (IV) The owner or operator of the facility shall use materials containing less than 5 tons of any one HAP per rolling 12-month period, less than 12.5 tons of any combination of HAPs per rolling 12-month period, less than 25 tons of VOC per rolling 12-month period for sources located in ozone non-attainment counties (Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale counties), and less than 50 tons of VOC per rolling 12-month period for facilities not located in ozone non-attainment counties. The

owner or operator shall demonstrate compliance by maintaining records that demonstrate that annual emissions do not exceed these levels, including monthly usage records for each finishing, gluing, cleaning, and washoff material used to include the VOC and individual HAP content of each material; certified product data sheets for these materials; summation of VOC and individual and total HAP usage on a monthly basis; and the total VOC and individual and total HAP usage each rolling 12-month period and any other records necessary to document emissions. These records shall be maintained and made readily available for inspection for a minimum of five years upon date of entry and shall be submitted to the Division upon request.

- (iii) The owner or operator that chooses to comply with this Permit by Rule for Coating and/or Operations shall maintain all purchase orders and/or invoices of materials containing VOC's and HAP's for a minimum of five years. These purchase orders and/or invoices must be made available to the Division upon request for use in confirming the general accuracy of the records retained and reports submitted.
- (iv) For the purpose of this paragraph, the following definitions apply:
 - (I) "Certified product data sheet (CPDS)" means documentation furnished by coating or adhesive suppliers or an outside laboratory that provides the Volatile Hazardous Air Pollutant (VHAP), as listed in Table 2 of 40 CFR Part 63, Subpart JJ, content of a finishing material, contact adhesive, or solvent, by percent weight, measured using Method 311 of the Georgia Department of Natural Resources Procedures for Testing and Monitoring Sources of Air Pollutants (PTM), or an equivalent or alternative method [or formulation data if the coating meets the criteria specified in 40 CFR 63.805(a)]; the solids content of a finishing material or contact adhesive by percent weight, determined using data from Method 24 of the Georgia PTM as referenced in this section, or an alternative or equivalent method [or formulation data if the coating meets the criteria specified in 40 CFR 63.805(a)]; and the density, measured by Method 24 of the Georgia PTM as referenced in this section or an alternative or equivalent method. Therefore,

the reportable VHAP content shall represent the maximum aggregate emissions potential of the finishing material, adhesive, or solvent in concentrations greater than or equal to 1.0 percent by weight or 0.1 percent for VHAP that are carcinogens, must be reported on the CPDS. The purpose of the CPDS is to assist the affected source in demonstrating compliance with the emission limitations presented in subparagraph (11)(b)7.(ii)(IV).

(Note: Because the optimum analytical conditions under Method 311 vary by coating, the coating or adhesive supplier may also choose to include on the CPDS the optimum analytical conditions for analysis of the coating, adhesive, or solvent using Method 311. Such information may include, but not be limited to, separation column, oven temperature, carrier gas, injection port temperature, extraction solvent, and internal standard.)

- (II) "Coating" means a protective, decorative, or functional film applied in a thin layer to a surface. Such materials include, but are not limited to, paints, topcoats, varnishes, sealers, stains, washcoats, basecoats, enamels, inks, and temporary protective coatings. Aerosol spray paints used for touch-up and repair are not considered coatings under this section of the rule.
- (III) "Gluing" means those operations in which adhesives are used to join components, for example, to apply a laminate to a wood substrate or foam to fabric.

8. Printing Operations.

- (i) Notwithstanding any other provision of these Rules, this standard applies to facilities with a potential to emit in excess of the Part 70 major source threshold without existing permit conditions that are federally enforceable or enforceable as a practical matter limiting the source to below Part 70 major source thresholds. Printing operations shall be deemed to have a Permit by Rule if the conditions in paragraph (I), and (II) are met. Facilities that have potential emissions of greater than major source thresholds even after this rule is met or are not able to meet the conditions in paragraphs (I) and (II) shall obtain a Part 70 Permit.

- (I) Monitoring and Record keeping. A log of the monthly consumption of VOC and/or Hazardous Air Pollutant containing material must be kept. The total consumption for the previous twelve consecutive months must be included in each month's log. Records for materials (including but not limited to inks, thinners, and solvents) shall be recorded in pounds. This log shall be kept for five years from the date of last entry. The log shall be available for inspection or submittal to the Division.
- (II) Annual consumption. The consumption of any VOC and/or Hazardous Air Pollutant emitting materials (including but not limited to inks, thinners, and solvents) by the facility shall be limited to 20,000 pounds during any twelve consecutive months.

9. Non-Reactive Mixing Operations.

- (i) Notwithstanding any other provision of these Rules, this standard applies to facilities with a potential to emit in excess of the Part 70 major source threshold without existing permit conditions that are federally enforceable or enforceable as a practical matter limiting the source to below Part 70 major source thresholds. Non-reactive mixing operations shall be deemed to have a Permit by Rule if the conditions in paragraphs (I) through (V) are met. Facilities that have potential emissions of greater than major source thresholds even after this rule is met or are not able to meet the conditions in this rule shall obtain a Part 70 Permit.
 - (I) Monitoring and Record keeping. A monthly log of materials mixed must be kept. The mixing total for the previous twelve consecutive months must be included in each month's log. Records for materials (including but not limited to coatings, thinners, and solvents) shall be recorded in pounds. This log shall be kept for five years from the date of last entry. The log shall be available for inspection or submittal to the Division.
 - (II) Annual mixing limit. Materials mixed shall be limited to 500 tons during any twelve consecutive months.
 - (III) Mixing/blending tanks shall be equipped with lids.

- (IV) Tank lids must be closed at all times during operation except when charging raw materials, retrieving samples, or discharging finished product.
- (V) Mixing tanks must be maintained at a temperature of less than 150°F.

10. Fiberglass Molding and Forming Operations.

- (i) Notwithstanding any other provision of these Rules, this standard applies to facilities with a potential to emit in excess of the Part 70 major source threshold without existing permit conditions that are federally enforceable or enforceable as a practical matter limiting the source to below Part 70 major source thresholds. Fiberglass molding operations shall be deemed to have a Permit by Rule if the conditions in paragraph (I) and (II) are met. Facilities that have potential emissions greater than major source thresholds even after this rule is met or are not able to meet the conditions in paragraphs (I) and (II) shall obtain a Part 70 Permit.

- (I) Monitoring and Record keeping. A log of the combined monthly usage of polyester resin and gel coat must be kept. The previous twelve consecutive month material usage total must be included in each month's log. Records for the combined weight of polyester resin and gel coat shall be recorded in pounds. This log shall be kept for five years from the date of last entry. The log shall be available for inspection or submittal to the Division.

- (II) Material Usage. Annual facility material usage shall be limited to 89,000 pounds during any twelve consecutive months for any combination of hand and spray lay-up operations. Annual facility material usage shall be limited to 120,000 pounds during any twelve consecutive months for spray lay-up operations only. This material input must represent the combined weight of polyester resin and gel coat used during any twelve consecutive months.

11. Peanut/Nut Shelling Operation.

- (i) Notwithstanding any other provision of these Rules, this standard applies to facilities with a potential to emit in excess of the Part 70 major source threshold without existing permit conditions that are

federally enforceable or enforceable as a practical matter limiting the source to below Part 70 major source threshold. Peanut/nut shelling facilities shall be deemed to have a Permit by Rule if the conditions in paragraph (I), (II) and (III) are met. Facilities that have potential emissions greater than major source thresholds even after this rule is met or are not able to meet the conditions in paragraph (I), (II) and (III) shall obtain a Part 70 Permit.

- (I) **Monitoring and Recordkeeping.** A log of the monthly unshelled peanuts/nuts processed must be kept. The total amount of unshelled peanuts/nuts processed for the previous 12 consecutive months must be included in each month's log. This log shall be kept for five years from the date of last entry. The log shall be available for inspection or submittal to the Division.
 - (II) **Annual Process input:** Facility process input shall be limited to 130,000 tons of unshelled nuts during any twelve consecutive months.
 - (III) **Annual hours of operation** shall not exceed 5000 hours during any twelve consecutive months.
- (ii) For the purposes of this standard, the term process, as it applies to peanut/nut shelling facilities, shall include all of the activities associated with the nut shelling process from nut drying, cleaning, shelling, to and including product and waste material handling at the facility.

(12) **Generic Permit.**

- (a) **Under penalty** of law, the holder of any Air Quality General Generic Permit must adhere to the terms, limitations, and conditions of that permit and subsequent revisions of that permit.
- (b) **The limitations,** controls, and requirements in federally enforceable operating permits are permanent, quantifiable, and otherwise enforceable as a practical matter.
- (c) **Prior to the issuance** of any federally enforceable operating permit, EPA and the public will be notified and given a chance for comment on the draft permit.

(13) **Emission Reduction Credits.**

(a) **Applicability.**

This section provides for the creation, banking, transfer, and use of nitrogen oxides and VOC Emission Reduction Credits in Federally designated ozone non-attainment areas in Georgia and any areas designated by the Director as contributing to the ambient air level of ozone in Federally designated ozone non-attainment areas in Georgia. The following sources are eligible to create and bank nitrogen oxides and VOC Emission Reduction Credits:

1. [reserved]
2. Any stationary source located within the counties of Bartow, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Newton, Paulding, and Rockdale and which has the potential to emit nitrogen oxides or VOCs in amounts greater than 100 tons-per-year.
3. Electrical Generating Units located at any stationary source within the counties of Banks, Barrow, Butts, Carroll, Chattooga, Clarke, Dawson, Floyd, Gordon, Hall, Haralson, Heard, Jackson, Jasper, Jones, Lamar, Lumpkin, Madison, Meriwether, Monroe, Morgan, Oconee, Pickens, Pike, Polk, Putnam, Spalding, Troup, Upson, and Walton and which has the potential to emit nitrogen oxides in amounts greater than 100 tons-per-year.

(b) **Eligibility of Emission Reductions.**

1. In order to be approved by the Division as an Emission Reduction Credit, a reduction in emissions must be real, permanent, quantifiable, enforceable, and surplus and shall have occurred after December 31, 1996.
2. To be eligible for consideration as Emission Reduction Credits, emission reductions may be created by any of the following methods:
 - (i) Installation of control equipment;
 - (ii) A change in process inputs, formulations, products or product mix, or raw materials;
 - (iii) A reduction in actual emission rate;
 - (iv) A reduction in operating hours;
 - (v) Production curtailment;

- (vi) Shutdown of emitting sources or facilities; or
- (vii) Any other enforceable method as determined by the Division.

(c) Quantification of Emission Reduction Credits.

1. For purposes of calculating the amount of emission reduction that can be quantified as an Emission Reduction Credit, the following procedures must be followed:
 - (i) The source must calculate its average actual annual emissions prior to the emission reduction. Actual emissions prior to the reduction shall be calculated in tons per year. In calculating average actual annual emissions prior to the emission reduction, the source shall use data from the 24-month period immediately preceding the reduction in emissions. The Division may allow the use of a different time period upon determination that such period is more representative of normal source operation.
 - (ii) The Emission Reduction Credit generated by the emission reduction shall be calculated by subtracting the allowable annual emissions rate following the reduction from the average actual annual emissions prior to the reduction.

(d) Discounting and Revocation of Emission Reduction Credits.

1. Except as provided below, the Director shall not discount or otherwise reduce the value of Emission Reduction Credits banked under this section.
 - (i) [reserved]
 - (ii) Discounting Based on Time Banked.

Emission Reduction Credits banked under this section will not expire at any time. However, Emission Reduction Credits will be discounted at a rate of 10 percent of the original Emission Reduction Credit value per year beginning on the 11th anniversary of the date on which the reduction in emissions initially occurred, up to a maximum total discount of 50 percent of the original Emission Reduction Credit value on the 15th anniversary of the date on which the reduction in emissions initially occurred. Annual discounting under this subsection (ii) shall not occur if the affected Emission Reduction Credits have already been discounted by 50% or more under the following subsection (iii) due to the

promulgation of more stringent regulations affecting the source category that created the Emission Reduction Credits.

(iii) Discounting for More Stringent Regulations.

If any State or Federal statute, rule, or regulation decreases an allowable emission rate or otherwise requires a reduction in nitrogen oxides or VOC from a particular source category or categories, any banked nitrogen oxides or VOC Emission Reduction Credits created by that source category or categories shall be reduced to reflect the new more stringent allowable emission limit or required reduction.

(iv) Discounting or Revocation for Cause.

The Director may revoke, suspend, or reduce the value of Emission Reduction Credits for cause, including evidence of noncompliance with permit conditions imposed to make the emission reductions permanent and enforceable; failure to achieve in practice the emission reductions on which the Emission Reduction Credits are based; or misrepresentations made in the Emission Reduction Credit application or any other applications on which the Emission Reduction Credits are based, supporting data entered therein or attached thereto, or any subsequent submittal or supporting data.

2. The owner of a Certificate of Emissions Reduction Credit may submit an application to re-evaluate a Certificate of Emission Reduction Credit to determine whether the amount of credits specified in the Certificate of Emission Reduction Credit has been discounted or revoked in accordance with subparagraph 1., above. Such application shall be submitted on forms and contain information specified by the Division.

(e) Creation and Banking of Emission Reduction Credits.

1. Sources seeking to create and bank Emission Reduction Credits must submit an application on forms supplied by the Division and signed by the applicant. The application shall include, at a minimum, the following information:
 - (i) The company name, contact person and phone number, and street address of the source seeking the Emission Reduction Credit;

- (ii) A description of the type of source, including SIC code, where the proposed emission reduction shall occur;
 - (iii) A detailed description of the method or methods to be employed by the source to create the emission reduction;
 - (iv) The date the emission reduction occurred or is to occur;
 - (v) Quantification of the Emission Reduction Credit, as required under subsection (c);
 - (vi) The proposed method for ensuring the reductions are permanent and enforceable, including any necessary application to amend the source's operating permit or, in the case of a shutdown of process equipment or an entire source, request for permit revocation;
 - (vii) Whether any portion of the reduction in emissions to be used to create the Emission Reduction Credit has previously been used to avoid New Source Review through a "netting demonstration;" and
 - (viii) Any other information that may be required to demonstrate that the reduction in emissions is real, permanent, quantifiable, enforceable, and surplus, as defined in subsection (b).
2. The Division will determine whether the application is complete and will notify the source seeking the Emission Reduction Credit of its determination. A Certificate of Emission Reduction Credit will be issued to the source upon a determination by the Director that the emission reduction meets the requirements of this section. Upon issuance of the Certificate, the Division will simultaneously take any action required to ensure the reduction is permanent and enforceable, including issuance of a revised permit or revocation of a permit.
3. Certificates of Emission Reduction Credit shall be issued by the Director and shall contain the following information:
- (i) The amount of the credit, in tons per year;
 - (ii) The pollutant reduced (nitrogen oxides or VOC);
 - (iii) The date the reduction occurred;
 - (iv) The street address and county of the source where the reduction occurred; and

(v) The date of issuance of the Certificate.

4. The Division shall maintain an Emission Reduction Credit registry that constitutes the official record of all Certificates of Emission Reduction Credit issued and all withdrawals made. The registry shall be available for public review. For each certificate issued, the registry will indicate the amount of the Emission Reduction Credit, the pollutant reduced, the location of the facility generating the Emission Reduction Credit, and the facility contact person.

(f) Use of Emission Reduction Credits.

1. Emission Reduction Credits may be used in any manner authorized under this subsection (f).
2. Persons holding Emission Reduction Credits may withdraw the Emission Reduction Credits and may dispose of them in any manner not inconsistent with this Section.
3. An Emission Reduction Credit may be withdrawn only by the owner of record or by the Director and may be withdrawn in whole or in part. In the case of a partial withdrawal, the Division shall issue a revised certificate of Emission Reduction Credit to the owner of record reflecting the new amount of the credit and shall revoke the original Certificate.
4. Emission Reduction Credits may be used for the following purposes:
 - (i) As offsets required by Section 391-3-1-.03(8) for a major new source of nitrogen oxides or VOC in a federally designated ozone non-attainment area, or an area designated by the Director as an area contributing to the ambient concentration of ozone in a federally designated ozone non-attainment area;
 - (ii) As offsets required by Section 391-3-1-.03(8) for a major modification to an existing major source of nitrogen oxides or VOC in a federally designated ozone non-attainment area, or an area designated by the Director as an area contributing to the ambient concentration of ozone in a federally designated ozone non-attainment area;
 - (iii) As part of a netting demonstration under the following conditions:

- (I) The source using the Emission Reduction Credits is the same source that created and banked the Emission Reduction Credits, and;
 - (II) The emission reduction represented by the Emission Reduction Credits occurred within the five-year period before construction commences on the modification; or
- (iv) As internal offsets under Section 391-3-1-02(8)(c)(13)(iii) and (iv) of these Rules provided that the source using the Emission Reduction Credits is the same source that created and banked the Emission Reduction Credits.
5. Emission Reduction Credits can only be used to offset emissions of the same pollutant that was reduced by the source that created and banked the Emission Reduction Credit.
6. Emission reduction credits used as offsets as required by Section 391-3-1-.03(8) within a federally designated ozone non-attainment area shall have been created within that federally designated ozone non-attainment area. Emission reduction credits created within any area designated by the Director as contributing to the ambient air level of ozone in a federally designated ozone non-attainment area may not be used as offsets as required by Section 391-3-1-.03(8) in that federally designated non-attainment area.

(g) Transfer of Certificates of Emission Reduction Credit.

1. If the owner of a Certificate of Emission Reduction Credit transfers the Certificate to a new owner, the Division shall issue a Certificate of Emission Reduction Credit to the new owner and shall revoke the certificate held by the current owner of record.
2. If the owner of a Certificate of Emission Reduction Credit transfers part of the Emission Reduction Credits represented by the Certificate to a new owner, the Division shall issue a Certificate of Emission Reduction Credit to the new owner reflecting the transferred amount and shall issue a Certificate of Emission Reduction Credit to the current owner of record reflecting the amount of Emission Reduction Credit remaining after the transfer. The original Certificate of Emission Reduction credit shall be revoked.

(h) Administrative Fees.

1. Any Source or person seeking to create, certify, bank, use, transfer, or re-evaluate Emission Reduction Credits shall pay fees to the Division in accordance with the following schedule:
 - (i) \$6000 per application to create, certify and bank emission credits in accordance with subparagraph (e) of this paragraph.
 - (ii) \$3500 per application to use a banked emission credit in accordance with subparagraph (f)4. of this paragraph. If the Certificate of Emission Reduction Credit has either been transferred in accordance with subparagraph (g) of this paragraph or re-evaluated in accordance with subparagraph (d)2. of this paragraph, or both, within 12 months prior to submission of an application to use a banked emission credit, the administrative fee to use a banked emission credit shall be reduced by the amount administrative fee(s) paid to the Division for transfer and re-evaluation. The 12-month period shall be based on the date of issuance of the new Certificate of Emission Reduction Credit to the new owner (for a transfer) or the date of written notification of the owner of the results of the re-evaluation by the Division (for a re-evaluation).
 - (iii) \$3000 per application to transfer a Certificate of Emission Reductions Credit as per subparagraph (g) of this paragraph. If a re-evaluation of the Certificate of Emission Reduction Credit has been completed by the Division in accordance with subparagraph (d)2. of this paragraph within 12 months prior to submission of an application to transfer the Certificate of Emission Reduction Credit, the administrative fee to transfer the Certificate of Emission Reduction Credit shall be reduced by the amount administrative fee paid for re-evaluation. The 12-month period shall be based on the date of written notification of the owner of the results of the re-evaluation by the Division.
 - (iv) \$2500 per application to re-evaluate an Certificate of Emission Reduction Credit as per subparagraph (d)2. of this paragraph.
2. Payment of administrative fees required by this subsection shall be submitted along with an application to create, certify, bank, use, transfer, or re-evaluate Emission Reduction Credits.

(i) **Definitions.**

For the purposes of this section, the following definitions shall apply:

1. "Electrical Generating Unit" means a fossil fuel fired stationary boiler, combustion turbine, or combined cycle system that serves a generator that produces electricity for sale.
2. "Enforceable" means enforceable by the Division. Methods for ensuring that Emission Reduction Credits are enforceable shall include, but not be limited to, conditions in air quality construction or operating permits issued by the Division.
3. "Netting Demonstration" means the act of calculating a "net emissions increase" under the preconstruction review requirements of Title I, Part D of the Federal Act and the regulations promulgated thereunder.
4. "Permanent" means assured for the life of the corresponding Emission Reduction Credit through an enforceable mechanism such as a permit condition or revocation.
5. "Quantifiable" means that the amount, rate and characteristics of the Emission Reduction Credit can be estimated through a reliable method and are approved by the Division.
6. "Real" means a reduction in actual emissions emitted into the air.
7. "Surplus" means not required by any local, state, or federal law, regulation, order, or requirement and in excess of reductions used by the Division in issuing any other permit or to demonstrate attainment of federal ambient air quality standards or reasonable further progress towards achieving attainment of federal ambient air quality standards. For the purpose of determining the amount of surplus emission reductions, any seasonal emission limitation or standard shall be assumed to apply throughout the year. Emission reductions which have previously been used to avoid New Source Review through a netting demonstration are not considered surplus.

Rule 391-3-1-.04. Air Pollution Episodes.

(1) **General:** In order to prevent the excessive buildup of air contaminant concentrations during an Air Pollution Episode great enough to cause danger to the public health, the Director will proclaim that an Air Pollution Episode exists when the accumulation of air contaminants in any place is attaining or has attained levels which could, if such levels are sustained or exceeded, lead to a substantial threat to the health of persons in the specific area affected. The proclamation of an Air Pollution Episode can be for a specific, limited area affected by certain emissions. In making this determination, the Director will be guided by the following criteria:

(a) **Alert:** The Director will proclaim that an Air Pollution Alert exists when any one of the following air contaminant concentrations is measured at any monitoring site and meteorological conditions are such that pollutant concentrations can be expected to remain at these levels for 12 or more hours or can be expected to increase, or, for ozone, when the situation is likely to recur within the next 24 hours:

1. Sulfur Dioxide - 800 micrograms per cubic meter (0.3 parts per million), 24-hour average.
2. Particulate Matter 10 microns or less (PM₁₀) - 350 micrograms per cubic meter, 24-hour average.
3. Particulate Matter 2.5 microns or less (PM_{2.5}) - 150 micrograms per cubic meter, 24-hour average.
4. Carbon Monoxide - 17 milligrams per cubic meter (15 parts per million), 8-hour average.
5. Ozone (O₃) - 170 parts per billion, 8-hour average.
6. Nitrogen Dioxide
 - (i) 1130 micrograms per cubic meter (1.2 parts per million), 1-hour average.
 - (ii) 282 micrograms per cubic meter (0.3 parts per million), 24-hour average.

(b) **Warning:** The Director will proclaim that an Air Pollution Warning exists when any one of the following air contaminant concentrations is measured at any monitoring site and meteorological conditions are such that pollutant concentrations can be expected to remain at these levels for 12 or more hours or can be expected to increase, or for ozone, when the situation is likely to recur within the next 24 hours, unless control actions are taken:

1. Sulfur Dioxide - 1,600 micrograms per cubic meter (0.6 parts per million), 24-hour average.

2. Particulate Matter 10 microns or less (PM₁₀) - 420 micrograms per cubic meter, 24-hour average.
3. Particulate Matter 2.5 microns or less (PM_{2.5}) - 200 micrograms per cubic meter, 24-hour average.
4. Carbon Monoxide - 34 milligrams per cubic meter (30 parts per million), 8-hour average.
5. Ozone (O₃) - 200 parts per billion, 8-hour average.
6. Nitrogen Dioxide
 - (i) 2,260 micrograms per cubic meter (1.2 parts per million), 1-hour average.
 - (ii) 565 micrograms per cubic meter (0.3 parts per million), 24-hour average.

(c) **Episode Criteria - Emergency:** The Director will proclaim that an Air Pollution Emergency exists when any one of the following contaminant concentrations is measured at any monitoring site and meteorological conditions are such that pollutant concentrations can be expected to remain at these levels for 12 or more hours or can be expected to increase, or for ozone, when the situation is likely to recur within the next 24 hours, unless control actions are taken:

1. Sulfur Dioxide - 2,100 micrograms per cubic meter (0.8 parts per million), 24-hour average.
2. Particulate Matter 10 microns or less (PM₁₀) - 500 micrograms per cubic meter, 24-hour average.
3. Particulate Matter 2.5 microns or less (PM_{2.5}) - 210 micrograms per cubic meter, 24-hour average.
4. Carbon Monoxide - 46 milligrams per cubic meter (40 parts per million), 8-hour average.
5. Ozone (O₃) - 250 parts per billion, 8-hour average.
6. Nitrogen Dioxide
 - (i) 3,000 micrograms per cubic meter (1.6 parts per million), 1-hour average.

(ii) 750 micrograms per cubic meter (0.4 parts per million), 24-hour average.

- (d) **Episode Criteria - Termination:** Once proclaimed by the Director, an air pollution episode level will remain in effect until the criteria for air contaminant concentrations applicable to the respective level are no longer met. At such time, the next lower status will be assumed.
- (e) **Status Declaration Authority:** The Director shall have the authority to make public declarations of Air Pollution Alert, Air Pollution Warning, and Air Pollution Emergency Status [as defined in **Emergency Air Episode Plan for the State of Georgia** (dated July 2008)] as the Director or agent deems appropriate.

(2) **Emission Reduction Standby Plans:**

- (a) Upon the request of the Director, any source owner, operator, or lessee shall prepare and furnish to the Director a written Emission Reduction Standby Plan for use in reducing the emission of air contaminants when the source is notified of the existence of an Air Pollution Warning or Emergency in its area of influence. Such plans shall identify the sources of air contaminants, the amount of reduction to be achieved, the method by which the reduction will be accomplished, and the times required to put each such reduction step into effect. The plan will specify progressively more stringent control actions to be taken at each of the air pollution episode levels. The submitted Emission Reduction Standby Plan shall be subject to review and approval by the Director. If the plan is judged to be inadequate by the Director, it shall be disapproved and an amended plan will be prepared and resubmitted by the source owner, operator, or lessee.
- (b) When notified by the Director of the existence of an Air Pollution Episode of Warning or Emergency in an area influenced by its emissions, the source owner, operator, or lessee shall immediately put into effect the control actions enumerated in the approved Emission Reduction Standby Plan on file with the Director, as appropriate for the specific episode level in effect.
- (c) During an Air Pollution Episode of Warning or Emergency Status, Emission Reduction Standby Plans as required by subparagraph (2) shall be made available on the premises to any person authorized to enforce the provisions of applicable rules and regulations.

- (3) **Emission Reduction Measures:** Emission reduction measures outlined in the **Emergency Air Episode Plan for the State of Georgia** (dated July 2008) may be taken by the Director upon his or her declaration that an Air Pollution Episode exists for any air contaminants for which air standards have been adopted.

Rule 391-3-1-.12. Duties of the Small Business Stationary Source Technical and Environmental Compliance Assistance Program.

The small business stationary source technical and environmental compliance assistance program, in order to effectively assist small businesses with stationary sources, shall carry out the following duties or responsibilities:

- (a) Participate in and/or sponsor meetings and conferences with small business representatives, State regulatory officials, and/or industry groups to promote cooperation and further compliance by small business stationary sources with the Act and Rules;
- (b) Develop, collect, coordinate, and/or disseminate information to small businesses concerning compliance methods and technologies for small business stationary sources;
- (c) Assist small business stationary sources in understanding compliance requirements, pollution prevention and accidental release detection and prevention, including providing information concerning alternative technologies, process changes, products and/or methods of operation that help reduce air pollution, and other areas concerning technical and environmental compliance;
- (d) Assist small business stationary sources in determining applicable requirements and obtaining permits under the Act and Rules;
- (e) Facilitate the participation of small businesses in the development of new regulations that impact small business stationary sources;
- (f) Assure that the language in public information documents regarding proposed and final Rules applicable to small business stationary sources is readily understandable by the lay person;
- (g) Assist small business stationary sources in assuring receipt of notices of their rights under the Act to assure reasonably adequate time for evaluation of compliance methods and applicable proposed and/or final regulations;
- (h) Provide information to small business stationary sources regarding their obligations under the Act and Rules, including the referral of such sources to qualified auditors for providing audits of the operations of such sources to determine compliance with the Act and Rules;

- (i) Serve as the Secretariat for the development and dissemination of small business compliance advisory panel reports and advisory opinions, and provide administrative and logistical support to the small business compliance advisory panel; and
- (j) Carry out any and all duties and responsibilities which may be delegated to the small business stationary source technical and environmental compliance assistance program pursuant to O.C.G.A. Section [12-9-25](#).

[Rule 391-3-1-.13. Acid Rain.](#)

40 CFR part 72 and 40 CFR part 76, as amended, are hereby adopted and incorporated by reference for purposes of implementing an acid rain program that meets the requirements of Title IV of the Clean Air Act. The term "permitting authority" shall mean the Director of the Environmental Protection Division, Department of Natural Resources, State of Georgia and the term "Administrator" shall mean the Administrator of the United States Environmental Protection Agency. If the provisions or requirements of 40 CFR part 72 conflict with or are not included in Section [391-3-1-.03\(10\)](#) of these Rules, the part 72 provisions and requirements shall apply and take precedence.

Subject 391-3-2. GROUNDWATER USE.

Rule 391-3-2-.01. Purpose.

The purpose of this Chapter is to establish procedures to be followed to obtain a permit to withdraw, obtain or utilize ground water and for the submission of information concerning the amount of ground water withdrawal, its intended use, and the proposed aquifer or aquifers of withdrawal to the Environmental Protection Division of the Department of Natural Resources (hereinafter the Division). It is also intended to outline the procedures of the Division in the granting, denial, revocation, modification and granting with conditions of permits to withdraw ground water. These regulations also provide for the gathering of information on the geologic and hydrologic character of the rock at and below the surface of the earth, well data, ground water levels and related material. The Regulations include implementation of water conservation in conjunction with the withdrawal of ground water.

Cite as Ga. Comp. R. & Regs. R. 391-3-2-.01

Authority: O.C.G.A. Sec. [12-5-91](#).

History. Original Rule entitled "Purpose" adopted. F. May 13, 1974; eff. June 3, 1974, as specified by the Agency.

Amended: F. Apr. 3, 1990; eff. Apr. 23, 1990.

Rule 391-3-2-.02. Definitions.

All terms used in this Chapter shall be interpreted in accordance with the definitions set forth in the Ground Water Use Act, (O.C.G.A. [12-5-90](#)*et seq.*), and as otherwise herein defined:

- (a) "Aquifer" means a geologic formation, group of such formations, or a part of such a formation that is water bearing. An aquifer may consist of a stratum or zone of rock below the surface of the earth capable of containing and producing water as from a well. (Authority O.C.G.A. Section [12-5-92\(1\)](#))

- (b) "Consumptive use" means any use of water withdrawn from the ground other than "nonconsumptive use" as herein defined.
- (c) "Nonconsumptive use" means the use of water withdrawn from the ground water system or aquifer in such a manner that it is returned to the ground water system or aquifer from which it was withdrawn without substantial diminution in quantity or substantial impairment in quality at or near the point from which it was withdrawn.
- (d) "Farm use" means irrigation of any land used for general farming, forage, aquaculture, pasture, turf production, orchards, or tree and ornamental nurseries; provisions for water supply for farm animals, poultry farming, or any other activity conducted in the course of a farming operation. Farm use shall also include the processing of perishable agricultural products and the irrigation of recreational turf except in Chatham, Effingham, Bryan, and Glynn counties where irrigation of recreational turf shall not be considered a farm use. (Authority O.C.G.A. Section [12-5-92](#), paragraph 5.1)
- (e) "Division" means the Environmental Protection Division of the Department of Natural Resources.
- (f) "Drawdown" means the extent to which the ground water level is being lowered when a well is being pumped or when the water is discharging from a flowing well, and is the difference, in feet, between the static water level and pumping level.
- (g) "Geologic Information" means the information relative to the origin, history of the rock, which includes a description of the lithology, age, stratigraphic sequence, structural relationship, areal distribution and thickness of the rock at or below the surface of the earth, and which is obtained by examination of the rock exposed at the ground surface and from well cuttings, well cores, and geophysical logging from drilled wells.
- (h) "Hydrologic information" means information related to water standing or moving in porous media and includes hydraulic conductivity, transmissivity, porosity, storage coefficient, specific capacity, chemical quality of the water, potentiometric surface, water recharge of the rock at or below the surface of the earth, water levels, drawdown, and radius of influence of the cone of depression in areas of ground water withdrawal, and which is obtained by pumping tests, flowmeter, laboratory tests, water surface measurements, observation wells, and accepted mathematical formulas.
- (i) "Pumping level" means the distance, in feet, from the land surface or other permanent specified datum, preferably the top of the casing to the water surface (water level) in the well when water is being pumped from the well.
- (j) "Rock" means the material that forms the essential part of the earth's solid crust, and includes loose, incoherent masses, such as a bed of sand, gravel, clay or volcanic ash, as well as firm, hard, solid masses of granite, metamorphics, sandstone, limestone, and shale.
- (k) "Specific conductance" means the water's capacity to convey an electric current and is related to the total concentration of the ionized substances in the water and the

temperature at which the measurement is made and is generally reported as micromhos/cm or microSiemens/cm.

- (l) "Static water level" means the distance, in feet, from the land surface or other permanent specified datum, preferably the top of the casing, to the water level in a well or to the pressure head (shut-in head) after the flow is shut off from a flowing well, when no water is being pumped from the well and the water level has reached equilibrium.
- (m) "Water table" means the surface of an unconfined water body at which the pressure is atmospheric. It is defined by the levels at which water stands in wells that penetrate the water body far enough to hold standing water.
- (n) "Monthly average withdrawal" means the total amount of water pumped by a water source or water system in any one month of the same year in which the "annual average withdrawal" is measured, divided by the number of days in that month. This amount is expressed in gallons per day (gpd).
- (o) "Annual average withdrawal" means the total yearly amount of water pumped by a water source or water system divided by the number of days in that year. This amount is expressed in gallons per day (gpd).
- (p) "Maximum day withdrawal" means the highest total amount of water pumped by a water source or water system in a 24-hour period. This amount is expressed in gallons per day (gpd).
- (q) "Design pumping capacity" means the actual rate that a well pump will produce water at the time the well pump was installed. This rate will vary with the horsepower of the pump motor, total dynamic head, and size of discharge pipe.
- (r) "Chemigation" means the injection of chemicals, fertilizers, fungicides, herbicides, insecticides, or nematicides into irrigation water.
- (s) "Unaccounted for Water" (UAW) means the difference between the total amount of water pumped into the water system from the source(s) and the amount of metered water use by the customers of the water system expressed as a percentage of the total water pumped into the system. UAW generally includes system leakage and unmetered uses such as fire fighting, flushing, broken water mains, etc.

Authority: Ga. Laws 1972, p. 976 *et seq.*, as amended by Ga. Laws 1973, p. 1273 *et seq.* Effective June 3, 1974. O.C.G.A. Secs. [12-5-90](#), [12-5-91](#).

History. Original Rule was filed on May 13, 1974; effective June 3, 1974, as specified by the Agency.

Amended: F. Apr. 3, 1990; eff. Apr. 23, 1990.

Amended: F. Dec. 9, 1994; eff. Dec. 29, 1994.

Rule 391-3-2-.03. Permit Required.

- (1) No person shall after December 1, 1974, withdraw, obtain or utilize ground water in excess of one hundred thousand (100,000) gallons per day for any purpose unless such person has first obtained a permit therefor from the Division, unless exempted by law or these Regulations. For farm use, no person shall after July 1, 1991 withdraw, obtain, or utilize ground water in excess of 100,000 gallons per day on a monthly average unless such person has obtained a permit from the Division. (Authority O.C.G.A. Section [12-5-105](#))
- (2) Pending the issuance or denial of a permit, any person who has applied for a ground water use permit and who was withdrawing or using ground water prior to April 18, 1973 (or July 1, 1988 in the case of farm use), may continue the same use which existed prior to that date.
- (3) Any combination of farm and non-farm use, or nonconsumptive ground water use, shall be considered a non-farm ground water use, unless the Director determines that the predominant use to which the water is put is farm use.

Authority: Ga. Laws 1972, pp. 976, 982, 986, as amended by Ga. Laws 1973, p. 1273, 1277, 1281. Effective June 3, 1974; O.C.G.A. Sec. [12-5-95](#).

History. Original Rule was filed on May 13, 1974; effective June 3, 1974, as specified by the Agency.

Amended: F. Apr. 3, 1990; eff. Apr. 23, 1990.

Rule 391-3-2-.04. Permit Application. Amended.

- (1) Any person who was withdrawing, obtaining or utilizing ground water prior to April 18, 1973 (or July 1, 1988 in the case of farm use), and who is required under Rule [391-3-2-.03](#) of this Chapter to obtain a permit shall submit an application for a permit to use ground water to the Division, on forms prepared and furnished, upon request, by the Division. The applicant shall furnish the Division with sufficient documented evidence as set forth in Paragraphs (5) or (6) of this Rule to evaluate the effects of the described water use upon the water resources of the area.
- (2) Any person who started to withdraw, obtain, or utilize ground water after April 18, 1973 (or July 1, 1988 in the case of the farm use), and who is required under the Rule [391-3-2-.03](#) of this Chapter to obtain a permit, shall submit an application for a permit to use ground water to the Division, on forms prepared and furnished, upon request, by the Division. The applicant shall furnish the Division with sufficient documented evidence as set forth in Paragraphs (5) or (6) of this Rule to evaluate the proposed water use upon the water resources of the area. (Authority O.C.G.A. Sec. [12-5-105](#))
- (3) Any person intending to withdraw, obtain, or utilize ground water and who is required under the Rule [391-3-2-.03](#) of this Chapter to obtain a permit, shall submit an application for a permit to use ground water to the Division, on forms prepared and furnished, upon request, by the Division. No ground water shall be withdrawn, obtained, or utilized until a

permit has been granted. The applicant shall furnish the Division with sufficient documented evidence as set forth in Paragraphs (5) or (6) of the Rule to evaluate the impacts of the proposed water use upon the water resources of the area.

- (4) During the early stages of planning for a proposed ground water withdrawal, and in any case prior to the start of well construction, the intended user should have a conference with representatives of the Division to determine the acceptability of the proposed well or wells, the aquifer or aquifers to be utilized, the well spacing and well depth, and the amount of intended ground water use. Such conference shall be granted within thirty (30) days after request therefor. The intended user should furnish the Division with such available documented evidence as set forth in Paragraphs (5), (6), or(7) of this Rule for presentation at the conference or for later submittal, but prior to well construction. Based in part on the information furnished by the intended user and upon other considerations, a letter of concurrence may be issued by the Division setting forth such terms and conditions as the Division deems necessary. Upon completion of the construction of the well or wells and prior to any ground water use, the intended user shall submit an application for a ground water use permit to the Division pursuant to Rules [391-3-2-.05](#) and [391-3-2-.06](#) of this Chapter. The proposed water user proceeds at his own risk if he does not obtain a letter of concurrence from the Division prior to well construction.
- (5) Sufficient documented evidence shall include, but not be limited to, the following (except for farm use permit applications):
 - (a) name and address of the applicant;
 - (b) the location of the existing or proposed well(s), identified by number, for which the permit is requested, marked on the best map available;
 - (c) the latitude and longitude, to the nearest ten (10) seconds, of the wells, obtained from the location map;
 - (d) the county in which the well(s) is located;
 - (e) the ground elevation of the well(s), if available;
 - (f) the amount of water withdrawn or proposed to be withdrawn or used, and a statement to indicate the extent to which such use or withdrawal is reasonably necessary to meet the needs of the applicant;
 - (g) any present or anticipated unreasonable adverse effects or potential unreasonable adverse effects on other water uses or users, including but not limited to, adverse effects on public or farm use;
 - (h) a statement specifying the beneficial use of the ground water withdrawn or to be withdrawn and whether the water use is a consumptive or non consumptive use, as herein defined;

- (i) if the water use is, or proposes to be, a non consumptive use, the applicant shall state the following:
 - 1. the treatment of the water and procedure used, or the proposed treatment of the water and the procedure to be used, to return the water to the aquifer or ground water system from which it is, or is proposed to be, withdrawn;
 - 2. the location of the injection well or wells to be shown on the same map as the existing, or proposed, withdrawal wells;
 - 3. the chemical, physical and bacteriological quality; and any other specified water quality analysis the Division may require, of the returned water, noting specifically any substantial impairment of the water quality from the water withdrawn;
 - 4. the aquifer or ground water system from which the ground water is withdrawn, or intended to be withdrawn, and the amount of water to be returned to the aquifer or groundwater system; and
 - 5. any substantial decrease in quantity as originally withdrawn from the aquifer or groundwater system.

- (j) the aquifer or aquifers from which the ground water is withdrawn, or intended to be withdrawn;

- (k) for existing wells, the well construction data for each well, on forms provided by the Division, including but not limited to, the following information:
 - 1. name of driller;
 - 2. date of drilling;
 - 3. total well depth in feet;
 - 4. diameter of drilled hole;
 - 5. diameter and depth of casing, including casing material;
 - 6. depth of grouting;
 - 7. diameter and depth of the setting of the well screen or well screens, if used, and the material and type of screen;
 - 8. type of permanent pump, size, horsepower, and yield;
 - 9. static water level and pumping level; and

10. number of hours the well is pumped per day.

- (6) For farm use, sufficient documented evidence shall include, but not be limited to, the following:
- (a) applicant's full name;
 - (b) mailing address;
 - (c) county in which existing or proposed well is located;
 - (d) purpose of withdrawal;
 - (e) well construction data including, but not limited to the following:
 - 1. well depth;
 - 2. depth of pump intake below ground surface;
 - 3. design pumping capacity of well; and
 - 4. depth of well casing.
 - (f) month and year of well pump installation;
 - (g) number of acres irrigated from this well and average number of inches of water applied from this well per year;
 - (h) whether or not chemicals, fertilizers, fungicides, herbicides, insecticides, or nematicides are injected into the irrigation water; and
 - (i) county map supplied by the Division (or equivalent) showing the location of the water source. (Authority O.C.G.A. Sec. [12-5-105](#))
- (7) Any person submitting an application for a ground water use permit who is at the time of application withdrawing, obtaining, or utilizing ground water, and who is unable to furnish accurate information concerning the amounts of ground water being withdrawn or used shall be required, as the Division deems necessary, to do the following:
- (a) install one or more water meters; or
 - (b) some other more economical means acceptable to the Division, for measuring the ground water withdrawn or used.
- (8) The Division, in determining the amount of ground water withdrawn or used by an applicant, may use one or more of the following:

- (a) the rated capacity of the pump or pumps;
 - (b) the rated capacity of the cooling system;
 - (c) the standards or methods employed by the United States Geological Survey indetermining such quantities; or
 - (d) any other acceptable method.
- (9) Except for farm use, those applicants intending to withdraw, obtain or utilize groundwater from wells constructed after April 18, 1973, shall submit, in addition to the information required in paragraph (5) of this Rule, well construction details and specifications, as the Division deems necessary, including, but not limited to, the following:
- (a) total depth of well, in feet;
 - (b) size of drilled hole;
 - (c) size and depth of casing and type of casing material;
 - (d) size and depth of the placing of the well screen or screens and the type of material, if used;
 - (e) depth of grouting;
 - (f) deep well air line of steel, iron or heavy gage copper material, with screw cap, for water level measurements; and
 - (g) filling, plugging and sealing procedures for any well or wells that are to be abandoned.
- (10) Due to the corrosive nature of the ground water in certain areas of the State, proposed well construction specifications and casing material may require modification as the Division deems necessary to avoid any potential unreasonable adverse effects on the aquifer or ground water system, or of other water uses.
- (11) In the preparation of a permit application for a new permit or modification of an existing permit which includes an increase in the permitted water use (except for a farm use permit application) the applicant must submit to the Director for approval a water conservation plan prepared in accordance with the following guidelines. The plan must address the following items (or contain a statement why the item is not an appropriate part of the plan).
- (a) System management;
 - 1. Within the most recent 24 month period a minimum of twelve consecutive months of UAW data;

2. A description of current and planned programs to reduce UAW such as those listed below (include proposed schedules for planned activities);
 - (i) Leak detection and elimination;
 - (ii) Availability of accurate maps of the water system;
 - (iii) Meter maintenance, testing, replacement, calibration, etc.;
 - (iv) Prevention of tank overflows;
 - (v) Flushing programs without degradation of water quality;
 - (vi) Prevention of unauthorized water use--fire hydrants, fire lines etc.;
 - (vii) A list of unmetered service connections including publicly owned facilities, churches, etc.,
 - (viii) Other;
 3. A list of inter-connections with other water systems and a description of any contractual agreements, type (emergency back-up, wholesale sale or purchase) and purchase amounts;
 4. Any additional current or planned activities pertaining to system management that will contribute to water conservation.
- (b) Treatment plant management;
1. The condition, calibration frequency, type, etc. of raw and finished water metering;
 2. An analysis of in-plant water use for filter backwashing, overflows, laboratory use, etc. as a percentage of total plant production. Also, the plan must outline any ongoing or planned plant improvements (including schedules for planned improvements) and/or revised operational procedures to reduce in-plant use;
 3. A description of any recycling or reuse of filter backwash water.
- (c) Rate making policies;
1. A list of non-billed service connections. Also, if available, a breakdown by number of meters or % of total production for each class of customer, e.g., residential, commercial, industrial, wholesale;

2. A copy of the water rate structure currently in use including any surcharges, demand charges, etc., which may apply to certain customers and a description of the effects of this rate structure on water conservation;
 3. A description of any system policies concerning second meters for landscape irrigation and any use of sewer meters for billing;
 4. A statement in response to the following questions:
 - (i) Is the water system self-supporting?
 - (ii) Are water system expenditures subsidized by non-water/sewer system revenues?
- (d) A drought contingency plan submitted for approval by the Director and prepared in accordance with the following guidelines. The plan should include alternative system and resource management strategies to be implemented under drought conditions that may severely reduce the availability of the resource. The plan shall be consistent with Chapter 391-3-30 with respect to restrictions on outdoor water use. If there are conflicts between this plan and Chapter 391-3-30 with respect to restrictions on outdoor water use, Chapter 391-3-30 shall prevail. The applicant must provide the following items in the plan (or a statement as to why the item is not an appropriate part of the plan):
1. Drought conditions or events that put the drought contingency plan into effect;
 - (i) The applicant must develop a system for determining drought severity based on some approved indicator, e.g.:
 - (I) System demands;
 - (II) Ground water levels;
 - (III) Other;
 2. Potable water use priorities program;
 - (i) The following order of potable water use priorities is generally recommended but maybe modified as needed based on local conditions:
 - (I) Emergency facilities for essential life support measures;
 - (II) Domestic and personal uses, including drinking, cooking, washing, sanitary and health related;

- (III) Farm uses;
- (IV) Industrial uses (including those industries on public water systems);
- (V) Other uses such as lawn sprinkling, non-commercial car washing, garden watering, etc.;
- (VI) Outdoor recreational uses;

- 3. Restrictions on lower priority uses (including enforcement procedures);
- 4. Rationing and/or other emergency procedures.

(e) Plumbing ordinances and/or codes;

- 1. Description of compliance with State Water Conservation Law which requires the use of ultra-low flow plumbing fixtures. The applicant may include copies of adopted ordinances if applicable;
- 2. Ordinances/codes or other special requirements pertaining to outside water use such as landscape irrigation systems, commercial car washes, etc.;

(f) Recycling--reuse; A description or accounting of any recycling or reuse of treated wastewater;

(g) A description of current and planned education programs for the promotion of water conservation.

(h) Progress report;

Five years after issuance of a new or modified Ground Water Use Permit, the permittee must submit to the Director a progress report that outlines actions and/or improvements made to conserve water and reduce water loss, e.g., leak detection/repair, meter installation, calibration, or replacement, summer and peak use surcharges, enforcement of ultra-low flow plumbing fixture requirements, etc. Permittees with a total permitted withdrawal less than one million gallons per day may use a simplified reporting form as supplied by the Division.

(i) Water use data;

Permittees must submit to the Director an annual water use data report that includes information on unaccounted for water for the past 12 months. The report

must be submitted annually starting 12 months after new or modified permit issuance.

(j) Long range planning;

All permittees must incorporate water conservation into long term water demand and supply planning. Permittees must develop water demand projections covering a 20 year time period using a method or methods approved by the Director. The demand projects must reflect the effects (demand reduction) inherent in the implementation of new or enhanced water conservation programs.

(k) A description of any additional water conservation activities.

(12) Permitted capacities of applicant's water treatment and wastewater treatment plants, existing or planned, that will treat water and wastewater to be generated by new or increased use.

(13) Any other information deemed necessary; provided, however, any information already provided to the Director in connection with prior dealings, with the Division may be incorporated into the application by specific and detailed reference and a statement that the information is still valid and correct.

History. Original Rule entitled "Permit Application" was filed on May 13, 1974; effective June 3, 1974, as specified by the Agency.

Amended: F. Apr. 3, 1990; eff. Apr. 23, 1990.

Amended: F. Dec. 9, 1994; eff. Dec. 29, 1994.

Amended: F. July 15, 2015; eff. August 4, 2015.

Rule 391-3-2-.05. Division Consideration of Permit Applications, Modifications, Revocations and Denials.

(1) In considering permit applications, revocations, and modifications, the Division shall consider.

- (a) the number of persons using an aquifer and the object, extent, and necessity of their respective withdrawals or uses;
- (b) the nature and size of aquifer;
- (c) the physical and chemical nature of any impairment of the aquifer, adversely affecting its availability or fitness for other water uses (including public and farm use);

- (d) the probable severity and duration of such impairment under foreseeable conditions;
 - (e) the injury to public health, safety or welfare which results if such impairment were not prevented or abated;
 - (f) the kinds of businesses or activities to which the various uses are related;
 - (g) the importance and necessity of the uses claimed by the permit applicants, or of the water uses of the area and the extent of any injury or detriment caused or expected to be caused to other water uses (including public and farm use);
 - (h) diversion from or reduction of flows in other water courses or aquifers;
 - (i) any other relevant factors, such as, but not limited to, the best geologic and hydrologic information available on the aquifer or ground water system of the area;
 - (j) documentation of effective water conservation. (Authority O.C.G.A. Section [12-5-91](#))
- (2) In any case where a permit applicant can prove to the Division's satisfaction that the applicant was withdrawing or using water prior to April 18, 1973 (or July 1, 1988 in the case of the farm use), the Division shall take into consideration the extent to which prior use or withdrawal was reasonably necessary in the judgement of the Division to meet his needs, and shall grant a permit which shall meet those reasonable needs. Provide d, however, that the granting of such permit shall not have unreasonably adverse effects upon other uses in the area, including public and farm use, and including potential as well as present use. In determining whether a permit will have an unreasonable adverse effect, the Division shall consider the factors set forth in Paragraph (1) of this Rule.
- (3) The Division shall also take into consideration in the granting of any permit the prior investments of any person in lands, and plans for the usage of water in connection with such lands which plans have been submitted to the Division within reasonable time after July 1, 1973. Provided, however, that the granting of such permit shall not have unreasonably adverse effects upon other water uses in the area, including public use, and including potential as well as present use. In determining whether a permit will have an unreasonable adverse effect, the Division will consider the factors set forth in Paragraph (1) of this Rule.
- (4) In the case of farm use, where a permit applicant can prove to the Division's satisfaction that a well pumping capacity was installed prior to July 1, 1988 the Division shall grant a permit for such capacity from this well. The application for such capacity must be received by the Division on or before July 1, 1991. (Authority O.C.G.A. Section [12-5-105](#))
- (5) The Division shall have the power to:

- (a) modify or revoke any permit when the Division deems necessary upon not less than sixty (60) days written notice to any person affected when the ground water use or withdrawal is not in compliance with the terms of the permit, or when there is found to be an unreasonable adverse effect upon the water uses or users in the area, including public and farm use, and including potential as well as present use, based upon the considerations set forth in Paragraph (1) of this Rule, except that this paragraph will not apply to farm use permits issued after initial use has commenced; or
- (b) deny a permit application if the application therefor or the effect of the water use proposed or described therein upon the water resources of the area is found to be contrary to the public interest or general welfare; such a decision shall be based upon the considerations set forth in Paragraph (1) of this Rule.

Rule 391-3-2-.06. Granting of a Permit to Use Ground Water.

- (1) When sufficient evidence is provided by the applicant that the water withdrawn or used, or intended to be withdrawn or used, is a nonconsumptive use, as defined in Paragraph (c) of Rule [391-3-2-.02](#) of this Chapter, a permit therefore shall be issued by the Division without the conditions set forth in Paragraph (4) of this Rule; provided, however, that in determining whether a use of ground water is nonconsumptive, the Division may take into consideration, based on the best geologic and hydrologic information available, whether any material injury or detriment to other water users of the area by reason of the reduction of water pressure in the aquifer or system has not been adequately compensated by the permit applicant who caused or substantially contributed to such injury or detriment. Any permit issued for a nonconsumptive use does not imply consent to inject any waste or pollutant material into the ground water system.
- (2) When the water withdrawn or used, or proposed to be withdrawn or used, by the permit applicant, is a consumptive use, and when there are not unreasonable adverse effects on other water uses, including public and farm use, and including potential as well as present use, based upon the consideration set forth in Rule [391-3-2-.05](#) of this Chapter, a permit to use ground water shall be issued by the Division containing such conditions as set forth in Paragraph (5) of this Rule as the Division deems necessary to the development and use of the water resources. The permit will become final unless a request for hearing is made within thirty (30) days from the date of service of such permit.

- (3) The Division may grant any temporary permit for such period of time as the Division shall specify where conditions make such temporary permit essential, even though the action allowed by such permit may not be consistent with this Chapter. A temporary permit may be issued whenever the Division has insufficient information to evaluate the effects of a permit application as set forth in Paragraph (1) of Rule [391-3-2-.05](#) of this Chapter.
- (4) A permit for a consumptive use may contain, but not be limited to, one or more of the following conditions:
 - (a) total permitted well depth in feet;
 - (b) the aquifer(s) or ground water system to be utilized;
 - (c) maximum pumping rate;
 - (d) pumping level (elevations below which water may not be pumped);
 - (e) amount of ground water to be withdrawn or used;
 - (f) well spacing to minimize well interference;
 - (g) time of withdrawal;
 - (h) require observation or monitoring well(s) to be installed for monitoring ground water levels and water quality.
- (5) Water withdrawn under any permit shall be used only for the purposes set forth in the permit.
- (6) The permit holder shall notify the Division by registered letter of any changes in the beneficial use, or if a greater amount of water is to be withdrawn. A permit may be modified by the Division at the request of the permit holder after the Division has considered the factors set forth in Paragraph (1) of Rule [391-3-2-.05](#) of this Chapter.
- (7) Except for farm use, a permit to use ground water shall expire and be of no further effect if the purposed ground water use has not been exercised within two (2) years of the effective date of the permit, unless such period is extended for good cause by the Division.

[Rule 391-3-2-.07. Duration of Permit and Renewal.](#)

- (1) Except for farm use, no permit granted under Rule [391-3-2-.06](#) of this Chapter shall be issued for a longer period than the longest of the following:
 - (a) ten years; or
 - (b) the period found by the Division to be necessary for reasonable amortization of the applicant's withdrawal or water-using facilities.
- (2) A permit may be renewed following its expiration upon compliance with the provisions for the submitting a new permit application.
- (3) Permits for farm use shall carry no expiration date.
- (4) Except for farm use, a permit shall not be transferred except with the approval of the Division. The Division shall transfer farm use permits upon written notification that a change in ownership has occurred.

History. Original Rule was filed on May 13, 1974; effective June 3, 1974, as specified by the Agency.

Amended: F. Apr. 23, 1990; eff. Apr. 23, 1990.

Rule 391-3-2-.08. Submission of Ground Water Use Report.

- (1) Every person who has obtained a permit to use ground water (except a permit for farm use) shall file with the Division a certified statement of the quantities of water used or withdrawn, sources of water, and the nature of the use thereof. The statement shall be on forms prepared and furnished by the Division and shall be submitted to the Division semiannually, starting sixty (60) days after the effective date of the permit and every six (6) months thereafter, unless otherwise designated by the Division, and shall be submitted not later than fifteen (15) days after the reporting date. The report shall include, but not be limited to, the following:
 - (a) name of permit holder and permit number;
 - (b) beneficial use of ground water used;
 - (c) source of ground water, identifying the aquifer or aquifers utilized and identify the well or wells using each aquifer;
 - (d) quantity of water used or withdrawn monthly from each aquifer (if a well penetrates more than one aquifer, it is to be noted);
 - (e) average hours pumped per day;

- (f) the static and pumping levels of each aquifer utilized and the date the water levels were measured; the measurements are to be made during the last month of the reporting period; and
 - (g) for a nonconsumptive use, the amount of water returned to the aquifer or ground water system from which the water is withdrawn.
- (2) The permit holder shall have a specific conductance analysis of the ground water from the well or wells performed by a laboratory acceptable to the Division, starting sixty (60) days after the date of the permit, and annually thereafter, unless otherwise designated by the Division, and a copy of the report shall be submitted to the Division not later than fifteen (15) days after the reporting date and may accompany the Ground Water Use Report. The Division may specify which well or wells are to be tested. The Division may collect water samples from the well or wells and perform specific conductance analyses as it deems necessary. The specific conductance analysis shall be according to a method acceptable to the Division. (Authority O.C.G.A. Section [12-5-97](#))
- (3) If any person who is required to submit a Ground Water Use Report is unable to furnish accurate information concerning the amounts of ground water being withdrawn or used (in the case of farm use "withdrawal" or "use" means design pumping capacity), or if there is evidence that a report is false or inaccurate or if a person is withdrawing or using a larger quantity or under different conditions than permitted, the Division shall take such actions as it deems necessary including, but not limited to, any one of the following: (Authority O.C.G.A. Section [12-5-105](#))
- (a) in determining the amount of ground water being withdrawn or used:
 - 1. require the person to install one or more water meters (except farm use);
 - 2. require the person (including farm use) to use some other economical means acceptable to the Division for measuring the ground water used;
 - 3. require the person to use the rated capacity of the pump or pumps;
 - 4. require the person to use the rated capacity of the cooling system;
 - 5. require the person to use the standards or methods employed by the United States Geological Survey in determining such quantities;
 - 6. any other acceptable method.
 - (b) require the person to withdraw or use only the amount of ground water permitted;
or
 - (c) revoke or amend the permit.

Rule 391-3-2-.09. Dewatering Wells.

- (1) Any person withdrawing ground water in excess of 100,000 gallons per day for dewatering the subsurface rock to a depth of not more than thirty (30) feet, or to a greater depth if approved by the Division, for the purpose of construction of trenches for sewer or water pipes, or excavation for foundations, or utility construction shall be excluded from obtaining a permit to withdraw ground water, provided such use is for a period of not more than sixty (60) days, unless an extension of time is approved by the Division for a justifiable reason.
- (2) Any person withdrawing in excess of 100,000 gallons per day for dewatering the subsurface rock for any purpose other than stated in Paragraph (1) of this Rule shall make application for a permit to withdraw, obtain or utilize ground water to the Division as required in Rule [391-3-2-.04](#) of this Chapter.

Amended: F. Apr. 3, 1990; eff. Apr. 23, 1990.

Rule 391-3-2-.10. Salt Water Encroachment or Deterioration of Water Quality.

To protect against or abate salt water encroachment or deterioration of the water quality of the ground water, the Division shall take into consideration the best information on the geologic and hydrologic characteristics of the rocks and the ground water withdrawals of the area involved and shall require the user to take such action as it deems necessary for control of brackish or salt water intrusion into fresh water aquifers. The control measures may include, but not be limited to, the following:

- (a) pumping arrangements to reduce ground water withdrawal in areas of concentrated pumping;
- (b) rearrangement of the location of wells to eliminate or reduce concentrated areas of ground water withdrawals;

- (c) requirement of selective withdrawal from other available fresh water aquifers than presently used;
- (d) curtailment of ground water withdrawal of proposed water users in the area;
- (e) selective curtailment or reduction of ground water withdrawal where it is found to be in the public interest or general welfare to protect the water resources;
- (f) conjunctive use of fresh water or brackish water or salt water aquifers, or waters of less desirable quality where water quality of a specific character is not essential;
- (g) use of observation or monitoring wells, drilled into fresh water aquifers between areas of ground water withdrawal and the seacoast, to detect the inward movement of salt water or to detect the deterioration of water quality;
- (h) use of interceptor wells, drilled into the area of encroachment, to intercept the brackish or salt water moving toward the center of excessive ground water withdrawal;
- (i) use of relief wells, drilled into the brackish or salt water aquifer, to relieve hydraulic pressure in the aquifer causing encroachment;
- (j) plugging with cement of deep wells that have penetrated brackish or salt water zones or zones of undesirable quality water, where hydraulic pressure cause leakage and contaminate fresh water aquifers of lower pressures;
- (k) abandonment of wells, which are then to be filled, plugged and sealed; and
- (l) Such other control or abatement techniques as are technically feasible and proven to be successful in other areas and nationally.

Rule 391-3-2-.11. Unreasonable Adverse Effects on Ground Water Withdrawal.

In order to protect against or abate unreasonable adverse or potential adverse effects on other water users within the area, including but not limited to adverse effects on public and farm use, the Division shall take into consideration the best information available on the geologic and hydrologic characteristics of the rocks and ground water withdrawals of the area and shall require the user to take such actions as it deems necessary. The control measures which the Division may require the user to take may include, but not be limited to, the following:

- (a) selective withdrawal from other fresh water aquifers than presently utilized;
- (b) pumping arrangements to reduce ground water withdrawal in areas concentrated pumping;
- (c) selective curtailment or reduction of ground water withdrawal where it is found to be in the public interest to protect the water resources; and
- (d) such other control techniques as are technically feasible and proven successful in other areas and nationally.

Rule 391-3-2-.12. Geologic and Hydrologic Information.

- (1) The Division shall gather and obtain all necessary geologic and hydrologic information on the characteristics of the aquifer or ground water system of the State for the purpose of evaluation, control and management of the ground water resources.
- (2) Any person who drills a well to obtain ground water and who is required under this Chapter to obtain a permit to use ground water shall furnish the Division at the time of application for a permit to use ground water such geologic and hydrologic information and well construction data as the Division requires.

Amended: F. Apr. 3, 1990; eff. Apr. 23, 1990.

Rule 391-3-2-.13. Test Wells.

Any person drilling a well for the purpose of obtaining geologic and hydrologic information for the study of ground water availability should submit to the Division all information obtained from the testing program. Prior approval of the testing program should be obtained from the Division. Test wells drilled and not developed for ground water use and not used as observation wells, shall be plugged and sealed in compliance with Rule [391-3-2-.14](#), Abandoned Wells. Test wells drilled by the Division, or its authorized agent, shall be exempt from the permit requirements, but shall meet the other requirements of this Rule.

Authority: Ga. Laws 1972, pp. 976, 981, as amended by Ga. Laws 1973, pp. 1273, 1275 *et seq.* Effective June 3, 1974; O.C.G.A. Sec [12-5-96](#).

History. Original Rule was filed on May 13, 1974; effective June 3, 1974, as specified by the Agency.

Amended: F. Apr. 3, 1990; eff. Apr. 23, 1990.

Rule 391-3-2-.14. Abandoned Wells.

- (1) Any existing well or wells which have been abandoned and no longer put to beneficial use and which have been deemed by the Division to have an unreasonable or potential unreasonable adverse effect on other water uses or users, or which result, or may result, in physical or chemical impairment of the aquifer or ground water system, shall be filled, plugged and sealed at the owner's expense in a manner acceptable to and approved by the Division.
- (2) Whenever the Division deems an abandoned well to be an imminent danger to health, safety or welfare of the public or to the ground water quality, the well may be plugged, filled, and sealed by the Division. Such action shall be taken only after notice to the owner and after a period of five days from such notice, during which period the owner may file an objection to such action. If such an objection is filed, the Division shall not permanently plug, fill and seal the well, but may install a temporary plug or seal.
- (3) Upon the filing, plugging and sealing of an abandoned well or wells, the Division shall be informed by certified statement from the contractor within thirty (30) days after the sealing that the well or wells have been sealed according to the procedure approved by the Division.
- (4) Observation wells used for the investigation or management of ground water by the Division or approved for this purpose shall not be considered "abandoned" so long as they are maintained for this purpose. Wells without shall be covered with a secure cap when measurements are not being made.

Rule 391-3-2-.16. Permitting Based on Regional Water Development and Conservation Plans.

- (1) **Purpose.** The purpose of Section 391-3-2-.16 is to provide minimum uniform statewide regulations for the issuance of any permit for the use of groundwater based on Regional Water Development And Conservation Plans. As authorized by O.C.G.A. §§ [12-5-31](#) and [12-5-96](#), in a manner consistent with O.C.G.A. §§ [12-5-520](#), *et seq.*, and as provided in the Comprehensive State-wide Water Management Plan, Regional Water Development And Conservation Plans shall promote the sustainable use of Georgia's waters through the selection of an array of management practices, to support the State's economy, to protect public health and natural systems, and to enhance the quality of life for all citizens.
- (2) **Policy.** As provided in the Comprehensive State-wide Water Management Plan, the characteristics of water resources and water users vary significantly in differing regions across Georgia. Protecting the ability of the State's water resources to meet needs for water supply and assimilation of waterborne contaminants requires regional, resource-based plans that identify the management practices appropriate to the resources and users in each region.
- (3) **Definitions.** All terms used in this Section shall be interpreted in accordance with the definitions as set forth in this Paragraph, or in any other Paragraph of this Section:
 - (a) "Comprehensive State-wide Water Management Plan" is the plan provided for by O.C.G.A. §§ [12-5-520](#) *et seq.* whose purpose is to help guide the stewardship of Georgia's water resources to ensure that those resources continue to support the State's economy while maintaining healthy natural systems. The Comprehensive State-wide Water Management Plan mandates preparation of regional Water Development and Conservation Plans;
 - (b) "Instream uses" means all those human and ecological uses of water which occur within the banks of rivers and streams, including, without limitation, waste assimilation, hydropower production, recreation, maintenance of aquatic habitats, and support of biological integrity;
 - (c) "Offstream uses" means the purposes for which water is withdrawn from streams, rivers, lakes, or aquifers;
 - (d) "Water Development and Conservation Plan," as provided in O.C.G.A. §§ [12-5-31\(h\)](#) and [12-5-96\(e\)](#), means a regional resource-based plan, developed in accordance with O.C.G.A. §§ [12-5-520](#) *et seq.*, that promotes the efficient use of

water resources, promotes the conservation and reuse of water, guards against a shortage of water, and is consistent with the public welfare of the state, or an addendum to any statutorily required water management plan(s) prepared to satisfy the purposes of this rule and the Comprehensive State-wide Water Management Plan. Such plans include water development, conservation, and sustainable use and are based upon detailed scientific analysis of water sources, the projected future condition of the resources, current demand, and estimated future demands on the resources. Furthermore, as provided in the Comprehensive State-wide Water Management Plan, such plans identify the water management practices to be employed in each Water Planning Region to ensure that current and future needs for water supply and assimilative capacity are met within the capacity of the water resources;

- (e) "Water Planning Region" is a defined area that includes one or more water quantity and/or quality resources;
 - (f) "Water resource" is a body of surface water or groundwater that is available or potentially available for offstream and/or instream use, including, without limitation, agricultural, industrial, residential, recreational, or environmental activities, among others. Water resources may include freshwater bodies, brackish waters, and ocean water;
- (4) Use by Division of adopted Regional Water Development and Conservation Plans.
- (a) As provided in O.C.G.A. §§ [12-5-31](#), [12-5-96](#), and [12-5-522](#), the Director shall ensure that the issuance of any permit for the use of water is based upon the Comprehensive State-wide Water Management Plan and all applicable Water Development and Conservation Plans. Additionally, any political subdivision or local water authority not in compliance with the Comprehensive State-wide Water Management Plan shall be ineligible for state grants or loans for water projects, except for those projects designed to bring such political subdivision or local water authority into compliance with the plan.

Subject 391-3-3. SURFACE MINING.

Rule 391-3-3-.01. Authority and Administration.

- (1) **Authority.** Rules and regulations regarding surface mining and reclamation of affected lands are adopted pursuant to the Georgia Surface Mining Act of 1968, as amended.

- (2) **Definitions.** All terms used in the rules and regulations shall be interpreted in accordance with the definitions as set forth in the Georgia Surface Mining Act of 1968, as amended, unless otherwise defined in the rules and regulations:
- (a) "Act" means the Georgia Surface Mining Act of 1968, as amended;
 - (b) "Director" means the Director of the Division of Environmental Protection of the Department of Natural Resources, State of Georgia;
 - (c) "Division" means the Division of Environmental Protection of the Department of natural Resources, State of Georgia.
- (3) **Enforcement.** The administration and enforcement of any rules and regulations shall be in accordance with the Georgia Surface Mining Act of 1968, as amended, the Executive Reorganization Act of 1972, as amended, and the Georgia Administrative Procedure Act, as amended.
- (4) **Powers and Duties of the Director.** Powers and duties vested in the Director pursuant to Act include, but are not limited to, the following:
- (a) To administer and enforce the provisions of the Act and all rules and regulations promulgated thereunder;
 - (b) To issue such orders as may be necessary to enforce compliance with the Act all rules and regulations promulgated thereunder;
 - (c) To examine and pass upon permit applications and Mining Land Use Plans;
 - (d) To revoke permits of mining operators who refuse to carry out their Mining Land Use Plans;
 - (e) To deny a new permit to a mining operator whose permit has been revoked, until the mining operator gives assurance satisfactory to the Director of his ability and intent to fully comply with the Act with respect to affected land under the revoked permit.
 - (f) To forfeit bonds or cash of mining operators who refuse to carry out their Mining Land User Plans;
 - (g) To carry out land use projects on lands where bonds or cash have been forfeited, using funds available for such purposes;
 - (h) To institute and prosecute all such court actions as may be necessary to obtain the enforcement of any order issued by the Director in carrying out the provisions of the Act;
 - (i) To seek civil penalties in accordance with the Act;

- (j) To decline to assert jurisdiction under the Act over any class or category of mines when the effect of the operation of such mines is not sufficiently substantial to warrant the exercise of jurisdiction;
- (k) To exercise all incidental powers necessary to carry out the purposes of the Act.

History. Original Rule was filed on September 6, 1973; effective September 26, 1973.

Amended: Original Rule entitled "Organization and Administration" repealed and a new Rule entitled "Organization" adopted. Filed October 23, 1974; effective November 12, 1974.

Amended: Rule repealed and a new Rule entitled "Authority and Administration" adopted. Filed July 19, 1976; effective August 8, 1976.

Amended: F. Jul. 23, 1992; eff. Aug. 12, 1992.

Rule 391-3-3-.02. Permits.

- (1) **General Requirement.** Prior to commencing any surface mining operation, a mining operator shall be required to obtain from the Director a permit to conduct such surface mining operation.
- (2) **Application for Permit**The application for a permit shall be made on forms supplied by the Director, and shall be signed by the applicant. The application shall contain the name of the Applicant; certification that the Mining Operator is the rightful owner or holds a valid lease or option to purchase or lease the affected lands which, at a minimum, extends two years beyond the final reclamation date shown in the Mining Land Use Plan; a certification that the information provided in or submitted by the mining operator as part of the Application and Mining Land Use Plan is true and correct, and the Mining Operator agrees to comply with provisions of the Mining Land Use Plan, provisions of the Act and Rules, and conditions of the permit; a statement granting to the Environmental Protection Division or any authorized representative of the Director the right of entry and travel upon affected lands; and such other information as is required by the Director. Such application shall be filed with the Director well in advance of the date on which the mining operator desires to commence mining, so that adequate time will be available to the Director to review the application and accompanying documents. Said application shall be accompanied by a Mining Land Use Plan, which shall be prepared in accordance with the provisions of the Act and these rules and regulations.
- (3) **Issuance of Permit.** A permit will be issued by the Director on evidence satisfactory to the Director of compliance with the provisions of the Act and these rules and regulations. No such permit will be issued until a mining operator files with the Division the appropriate performance bond, government securities, irrevocable letter of credit, cash or any combination thereof, unless said mining operator has been exempted from this

requirement by the Director in accordance with the Act and these rules and regulations. A permit, once issued, shall be valid from the date of issuance until the completion of mining, unless otherwise revoked pursuant to the Act and these rules and regulations. Such permit shall be conditioned upon the permittee's compliance with the approved Mining Land Use Plan.

- (4) **Revocation of Permit.** If a mining operator fails to comply with the Mining Land Use Plan, the Division will notify said operator in writing of the specific items of noncompliance and request that corrections be made. If the mining operator thereafter fails to comply within a reasonable time, the Director may revoke said mining operator's permit in accordance with the Act, as amended. The decision to revoke a permit is left to the discretion of the Director and will be based on violation of the Act, Rules, permit conditions, or Mining Land Use Plan. Mining by a permitted operator on an unauthorized site (lands not permitted) while holding other valid permits shall constitute prima facie evidence of violation of an approved Mining Land Use Plan and all permits that an operator holds may be suspended or revoked.
- (5) **Transferability of Permit.** A permit, once issued, is not transferable from one mining operator to another. Whenever the legal ownership of a mining operation changes, the new owner may continue such operation provided that, within 60 days of such change in ownership, the new operator files with the Director an approveable application, Mining Land Use Plan, and appropriate bonding. In such cases of change in ownership, the original owner shall be held responsible for lands affected by the operation unless written proof of the assumption of responsibility by the new owner, satisfactory to the Director, is filed with the Division.
- (6) **Exemption.** Tunnels, shafts and dimension stone quarries are by law exempted from the provision of the Act.

Authority: Ga. L. 1968, p. 9, *et seq.*, as amended, specifically by Ga. L. 1976, p. 527; Ga. L. 1972, p. 1015, as amended; p. 1098 *et seq.*, as amended.

History. Original Rule was filed on September 6, 1973; effective September 26, 1973.

Amended: Filed October 23, 1974; effective November 12, 1974.

Amended: Original Rule entitled "Licensing" repealed and a new Rule entitled "Permits" adopted. Filed July 19, 1976; effective August 8, 1976.

Amended: F. Jul. 23, 1992; eff. Aug. 12, 1992.

Rule 391-3-3-.03. Bonding.

- (1) Upon approval by the Director of a Mining Land Use Plan or an amended Mining Land Use Plan submitted by the mining operator, the Division shall furnish approved surety bond forms to the mining operator, and advise said mining operator as to the amount of bond that will be required. A mining operator shall submit to the Director an acceptable performance bond, payable to the Governor of Georgia or his successor, within 60 days

from the date of mail receipt or personal delivery to the operator such forms, unless otherwise exempted from the bonding requirement by the Director. Mining operators shall have the option of posting a surety bond, government securities, irrevocable letter of credit, cash or any combination thereof. If a cash bond is to be submitted, the mining operator shall submit a cashier's check or money order payable to the Georgia Department of Natural Resources. A mining operator submitting government securities shall purchase securities having a current market value equal to the full amount of the required bond. Additionally, government securities that contain interest coupons shall have all outstanding coupons attached thereto.

- (2) Bond requirements will be fixed in an amount of not less than \$1,000 nor more than \$2,500 per acre or fraction thereof of the area affected land. When determining the amount of bond required, the Director will consider the character and nature of the land reclamation requirements as approved in the operator's Mining Land Use Plan or amended Mining Land Use Plan and the degree to which the mining operator has complied with the provisions of any existing or past approved Mining Land Use Plan.
- (3) **Exemption from the Bonding Requirement.** Any mining operator who desires an exemption from the bonding requirements of this section shall make a written request for such an exemption from the Director. The Director, in determining whether such a request should be granted, will consider (1) the financial responsibility of the mining operator; (2) the degree to which the mining operator has complied with the provision of any existing or past approved Mining Land Use Plan; and (3) such other matters as the Director may deem appropriate and relevant. In considering the financial responsibility of the mining operator, the Director may require a mining operator to submit the latest available financial statement.
- (4) The bond, government securities, irrevocable letter of credit, or cash shall be held until the affected lands or any portion thereof are satisfactorily reclaimed. The Division shall inspect and evaluate affected lands to determine if the provisions of the Act, the rules and regulations promulgated thereunder, and the operator's approved Mining Land Use Plan have been properly fulfilled. The operator shall notify the Division by filing a final reclamation report when the provisions of his Mining Land Use Plan have been fulfilled. Upon receipt of the operator's final reclamation report advising that the provisions of the Mining Land Use Plan have been fulfilled, the Division will have the site(s) covered by said Plan inspected for compliance. Within 60 days from the date of such inspection, the Division will notify the mining operator in writing as to whether said operator has fulfilled the reclamation responsibility under his Plan. If said reclamation responsibility has been fulfilled, a mining operator who has not been granted an exemption from the bonding requirement will have his bonding obligation terminated.
- (5) Any mining operator who has been granted an exemption from the bonding requirement and who subsequently violates any provision of the Act or these rules and regulations, or who defaults on his obligations under any Mining Land Use Plan, may be required by the Director to post a bond.

Rule 391-3-3-.04. Substitution of Previously Mined Site.

An operator may desire to substitute and reclaim an area mined in the past for lands currently being mined. Such substitution may be made on an acre for acre basis, and an operator's request for same shall be prepared as to form and content in a manner acceptable to the Division. Reclamation shall be initiated on substituted acres the first growing season following the commencement of mining on the land for which substitution is being made and must be completed no later than the three years from that date, unless a period of other duration is approved by the Division as a part of the mining operator's approved Mining Land Use Plan.

Amended: F. Jul. 23, 1992; eff. Aug. 12, 1992.

Rule 391-3-3-.05. Mining Land Use Plan.

- (1) **Plan Submittal.** Each surface mining operator, prior to being issued a permit to engage in surface mining, shall submit a Mining Land Use Plan that is acceptable to the Division and which meets the requirements of the Act and Rules, including provisions for protection of the environment and resources of the State and reclamation of affected lands in a reasonable period of time. Operators will submit an original and two (2) copies of an application and Mining Land Use Plan on forms provided by the Division, along with all engineering drawings, specifications, maps or other attachments as necessary.
- (2) **Preparation of Plan.** Mining Land Use Plans will be prepared as to form and content in a manner acceptable to the Division and will comply with the rules and regulations. The plan will contain a specific plan of action, being based on sound engineering and conservation principles, for accomplishing the operator's reclamation objective and for protection of adjacent watersheds from effects of erosion and siltation. The Mining Land Use Plan shall be consistent with land use in the area of the mine. The Mining Land Use Plan shall include, but not be limited to, a description of the company; the minerals or materials to be mined; mining methods; lands and community to be affected; reclamation objective; estimated schedule of mining advancement; schedule of reclamation, including time to accomplish reclamation; affected acreage; natural drainage and water disposal;

provisions for erosion and siltation control, including adequate measures to control erosion on the periphery of affected land where mining ceases or becomes inactive; protection of contiguous natural and other resources, including properties on the National Register of Historic Places; topsoil use; overburden (spoil) or refuse disposal placement or use; backfilling; highwall reduction, grading and sloping; lake development; site cleanup; and revegetation of reclaimed lands.

- (3) **National Register of Historic Places.** Adverse effects on historic places include, but are not limited to, the following: physical destruction, damage or alteration of all or part of the property; isolation of the property from or alteration of the character of the property's setting when that character contributes to the property's qualification for the National Register; introduction of visual, audible or atmospheric elements that are out of character with the property or alter its setting.
- (4) **Amended Mining Land Use Plan.** If it is determined to be desirable to vary from an approved Mining Land Use Plan, any changes in the Plan must be submitted in writing to the Division for approval as an amendment to the original Plan prior to changing or varying from such Plan. Amended Plans submitted by the operator will be complete in all details necessary to correctly show the operator's new plan of action and will show by map all lands to be affected and reclaimed.
- (5) **Disapproval of Plan.** Mining Land Use Plans submitted by mining operators that are not prepared in a manner acceptable to the Division and that do not contain the required supporting documents and maps will be disapproved. In the event an operation has submitted a Mining Land Use Plan for approval that is not acceptable to the Division, the Plan shall be disapproved. The operator will be advised of the various elements of the Plan that are not acceptable, and the operator's disapproved Plan will be returned to the operator for revision and resubmission. It is the operator's responsibility to provide a properly prepared, acceptable and sufficient Mining Land Use Plan that will provide for the protection of the environment in the development and operation of the site and reclamation of mined lands.

Amended: Rule retitled: "Mining Land Use Plan". F. Jul. 23, 1992; eff. Aug. 12, 1992.

Rule 391-3-3-.06. Final Acceptable Reclamation.

Following the removal or disposal of all structures, equipment, stockpiles, mining refuse and all other materials associated with surface mining, the affected land will be reclaimed in accordance with the provision of the mining operator's approved Mining Land Use Plan. All lands, except

those specifically exempted by the Division in the operator's approved Mining Land Use Plan, will have a neat, clean appearance and contain a high quality, permanent vegetative cover.

Amended: F. Jul. 23, 1992; eff. Aug. 12, 1992.

Rule 391-3-3-.07. Maps and Aerial Photographs.

- (1) **Location Map.** The operator will include as a part of his Mining Land Use Plan an accurate location map of affected lands.
- (2) **Land Use Map.** The operator will prepare and submit as a part of his Mining Land Use Plan a detailed Land Use Map, prepared in a manner acceptable to the Division. Said Map shall include, but not be limited to, details of anticipated mining advancement and provision for drainage and erosion control measures.
- (3) **Aerial Photographs.** Aerial photographs or reproductions thereof that accurately portray affected lands to be mined may be submitted by the operator in lieu of the required maps provided the operator has plotted and correctly identified all land use data on the photograph. Aerial photographs or reproductions thereof, which have a scale of less than 330 feet per inch or more that 660 feet per inch (unless a scale of another size is approved by the Division) and which are not of adequate photo interpretation quality are unacceptable. Operators will submit the most recent available photograph that correctly shows the various physical features of lands being affected.

Amended: F. Jul. 23, 1992; eff. Aug. 12, 1992.

Rule 391-3-3-.08. Protection of the Public Interest.

The mining operator's plan shall incorporate sound engineering and conservation measures for protecting the health and welfare of the people of this State from adverse effects of surface mining. Operators will be required to grade all peaks, ridges, and valleys resulting from surface

mining, and to backfill all pits and trenches resulting from same in a manner to minimize any hazardous effects of mining adjacent to any State or county-maintained public road. If the original ground elevation of the area mined was at or below the road elevation, operators will be required to grade to the original elevation and plane, a strip of land of a reasonable width, lying adjacent and parallel to the public road involved. If the original ground elevation of the area mined was above the road elevation and mining caused the resulting elevation to be below the road elevation, operators will be required to grade to at least the same elevation and plane as the road a strip of land of a reasonable width, lying adjacent and parallel to the public road involved.

Rule 391-3-3-.09. Protection of the Environment and Contiguous Natural and Other Resources.

Whenever a mining site lies contiguous to any waters of the State or whenever, in the judgement of the Division, proposed mining at such site will adversely affect any portion of the watershed of the State, an operator will be required to follow sound engineering and conservation measures to provide protective barriers, such as dams, berms, silt ponds, or other similar structures, between the lands to be affected and waters or watersheds involved. All structures are to be approved by the Division as a part of the operator's Mining Land Use Plan and are to be substantial for the protection of contiguous natural resources of the State. All structures referred to above are to be constructed a reasonable distance from waters of the State, or that portion of a watershed of the State adversely affected, as determined by the Division. Before natural creeks, streams, rivers, lakes, or other bodies of water may be altered in course or relocated, the plan for such alteration or relocation must be approved by the Division as part of the operator's approved Mining Land Use Plan. Where a mining site is to be located on lands or adjacent to lands containing natural or other resources which may be adversely affected by the mining operation, the mining operator shall include as an attachment to the Mining Land Use Plan, a plan to alleviate and/or mitigate adverse effects of such impacts.

History. Original Rule was filed on September 6, 1973; effective September 26, 1973.

Amended: Original Rule entitled "Confidentiality of Information" repealed and a new Rule entitled "Protection of the Public Interest" adopted. Filed October 23, 1974; effective November 12, 1974.

Amended: Rule repealed and a new Rule entitled "Confidentiality of Information" adopted. Filed July 19, 1976; effective August 8, 1976.

Repealed: New Rule entitled "Protection of the Environment and Contiguous Natural and Other Resources" adopted. F. Jul. 23, 1992; eff. Aug. 12, 1992.

Rule 391-3-3-10. Confidentiality of Information.

Any information relating to secret mining methods obtained by the Division or its employees while carrying out the provision of the Act or these rules and regulations shall, at the request of the mining operator, be kept confidential.

Subject 391-3-4. SOLID WASTE MANAGEMENT.

Rule 391-3-4-01. Definitions.

- (1) "Active Life" means the period of operation beginning with the initial receipt of solid waste and ending at completion of closure activities.
- (2) "Active Portion" means that part of a solid waste handling facility or landfill unit that has received or is receiving wastes and that has not been closed.
- (3) "Aquifer" means a geological formation, group of formations, or portion of a formation capable of yielding significant quantities of ground water to wells or springs.
- (4) "Affected County" means, in addition to the county in which a facility is or is proposed to be located, each county contiguous to the host county and each county and municipality within a county that has a written agreement with the facility to dispose of solid waste.
- (5) "Asbestos-Containing Waste" means any solid waste containing more than 1 percent, by weight, of naturally occurring hydrated mineral silicates separable into commercially used fibers, specifically the asbestiform varieties of serpentine, chrysotile, cummingtonite-grunerite, amosite, riebeckite, crocidolite, anthophyllite, tremolite, and actinolite, using the method specified in Appendix A, Subpart F, 40 CFR Part 763, Section 1.

- (6) "Baling" means a volume reduction technique whereby solid waste is compressed into bales.
- (7) "Biomedical Waste" means any solid waste which contains pathological waste, biological waste, cultures, and stocks of infectious agents and associated biologicals, contaminated animal carcasses (body parts, their bedding, and other waste from such animals), chemotherapy waste, discarded medical equipment and parts, not including expendable supplies and materials, which have not been decontaminated, as further defined in Rule [391-3-4-.15](#).
- (8) "Boiler" means a device as defined in Chapter 391-3-11, the Rules for Hazardous Waste Management.
- (9) "Bulking Agent" means the non-reactive, solid material that is used to reduce the moisture content of waste via a physical process such that the waste no longer meets the definition of Liquid Waste as defined in these rules.
- (10) "CCR Landfill" means an area of land or an excavation that receives CCR and which is not a surface impoundment, an underground injection well, a salt dome formation, a salt bed formation, an underground or surface coal mine, or a cave. For purposes of this Chapter, a CCR landfill also includes sand and gravel pits and quarries that receive CCR, CCR piles, and any practice that does not meet the definition of a beneficial use of CCR. This definition includes both active and inactive landfills.
- (11) "CCR Surface Impoundment" means a natural topographic depression, man-made excavation, or diked area owned or operated by an electric utility or independent power producer, which is designed to hold an accumulation of CCR and liquids, and the unit treats, stores, or disposes of CCR. This definition includes both active and inactive surface impoundments, new and lateral expansions of surface impoundments, dewatered surface impoundments, and NPDES-CCR surface impoundments.
- (12) "CCR Unit" means any CCR landfill, CCR surface impoundment, or the lateral expansion of such landfill or impoundment, or a combination of more than one of these units, based on the context of the paragraph(s) in which it is used. This term includes both new and existing units, unless otherwise specified.
- (13) "Certificate" means a document issued by a college or university of the University System of Georgia or other organization approved by the Director, stating that the operator has met the requirements of the Board for the specified operator classification of the certification program.
- (14) "Closure" means a procedure approved by the Division which provides for the cessation of waste receipt at a solid waste disposal site and for the securing of the site in preparation for post-closure.

- (15) "Coal Combustion Residuals (CCR)" means fly ash, bottom ash, boiler slag, and flue gas desulfurization materials generated from burning coal for the purpose of generating electricity by electric utilities and independent power producers.
- (16) "Collector" means the person or persons as defined herein who, under agreements, verbal or written, with or without compensation does the work of collecting and/or transporting solid wastes, from industries, offices, retail outlets, businesses, institutions, and/or similar locations, or from residential dwellings, provided however, that this definition shall not include an individual collecting and/or transporting waste from his own single family dwelling unit.
- (17) "Commercial solid waste" means all types of solid waste generated by stores, offices, restaurants, warehouses, and other nonmanufacturing activities, excluding residential and industrial wastes.
- (18) "Composting" means the controlled biological decomposition of organic matter into a stable, odor free humus.
- (19) "Construction/Demolition Waste" means waste building materials and rubble resulting from construction, remodeling, repair, and demolition operations on pavements, houses, commercial buildings and other structures. Such waste include, but are not limited to asbestos containing waste, wood, bricks, metal, concrete, wall board, paper, cardboard, inert waste landfill material, and other non-putrescible wastes which have a low potential for groundwater contamination.
- (20) "Construction/Demolition Waste Landfill" means a landfill unit that accepts construction/demolition waste. A Construction/Demolition Waste unit also may receive inert waste and yard trimmings and may be publicly or privately owned.
- (21) "Contaminant which is likely to pose a danger to human health" means any constituent in Appendix I, II, III, or IV or other site specific constituents as specified by the Division in the Groundwater Monitoring or Corrective Action Plan that is found at levels statistically confirmed above a groundwater protection standard.
- (22) "Detected" means statistically significant evidence of contamination has been determined to exist by using methods specified in Rule [391-3-4-.14](#).
- (23) "Director" means the Director of Environmental Protection Division of the Department of Natural Resources.
- (24) "Disposal Facility" means any facility or location where the final disposition of solid waste occurs and includes, but is not limited to, landfilling and solid waste thermal treatment technology facilities.
- (25) "Division" means the Environmental Protection Division of the Department of Natural Resources.

- (26) "Generator" means any person in Georgia or in any other state who creates solid waste.
- (27) "Garbage" means food waste including waste accumulations of animal or vegetable matter used or intended for use as food, or that attends the preparation, use, cooking, dealing in or storing of meat, fish, fowl, fruit or vegetables.
- (28) "Groundwater" means water below the land surface in a zone of saturation.
- (29) "Hazardous Waste" means any solid waste which has been defined as hazardous waste in regulations promulgated by the Board of Natural Resources, Chapter 391-3-11.
- (30) "High Moisture Content Waste" means sludge, non-hazardous solidified liquids and bulking agents and/or solidification/stabilization agents with moisture content greater than 40%. The moisture content of non-hazardous household waste is excluded from this definition.
- (31) "Household waste" means any solid waste (including garbage, trash, and sanitary waste in septic tanks) derived from households (including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas).
- (32) "Host Local Government" means the host county or other local governmental jurisdiction within whose boundaries a municipal solid waste disposal facility is located.
- (33) "Industrial Furnace" means a device as defined in Chapter 391-3-11, the Rules for Hazardous Waste Management.
- (34) "Industrial Waste" means solid waste generated by manufacturing or industrial processes that is not a hazardous waste regulated under the Hazardous Waste Management Act and regulations promulgated by the Board of Natural Resources, Chapter 391-3-11. Such waste includes, but is not limited to, wastes resulting from the following manufacturing processes: Electric power generation; fertilizer/agricultural chemicals; food and related products/by-products; inorganic chemicals; iron and steel manufacturing; leather and leather products; nonferrous metals manufacturing/foundries; inorganic chemicals; plastics and resins manufacturing; pulp and paper industry; rubber and miscellaneous plastic products; stone, glass, clay, and concrete products; textile manufacturing; transportation equipment; and water treatment. This term does not include mining waste or oil or gas waste.
- (35) "Inert Waste Landfill" means a disposal facility accepting only wastes that will not or are not likely to cause production of leachate of environmental concern. Such wastes are limited to earth and earth-like products, concrete, cured asphalt, rock, bricks, yard trimmings, stumps, limbs, and leaves. This definition excludes industrial and demolition waste not specifically listed above.
- (36) "Lateral expansion" means a horizontal expansion of the waste boundaries of an existing MSWLF unit or landfill unit.

- (37) "Leachate" means a liquid that has passed through or emerged from solid waste and contains soluble, suspended, or miscible materials removed from such wastes.
- (38) "Landfill Unit" means an area of land of which or an excavation in which solid waste is placed for permanent disposal and which is not a land application unit, surface impoundment, injection well, or compost pile. Permanent disposal requires the placement of daily, intermediate, and/or final earth, synthetic, or a combination of earth and synthetic cover over the solid waste.
- (39) "Leachate Collection System" means a system at a landfill for collection of the leachate which may percolate through the waste and into the soils surrounding the landfill.
- (40) "Liner" means a continuous layer of natural or man-made materials beneath or on the sides of a disposal site or disposal site cell which restricts the downward or lateral escape of solid waste constituents, or leachate.
- (41) "Liquid Waste" means any waste material that is determined to contain "free liquids" as defined by Method 9095 (Paint Filter Liquids Test), as described in "Test Methods for the Evaluation of Solid Wastes, Physical/Chemical Methods" (EPA Pub. No. SW-846).
- (42) "Materials Recovery Facility" means a solid waste handling facility that provides for the extraction from solid waste of recoverable materials, materials suitable for use as a fuel or soil amendment, or any combination of such materials.
- (43) "Monofill" means a method of solid waste disposal that involves the landfilling of one waste type or wastes having very similar characteristics in a segregated trench or area which is physically separated from dissimilar or incompatible waste.
- (44) "Mulch" means a product produced by grinding, shredding or chipping of yard trimmings, land-clearing debris, untreated and unpainted wood, or any combination thereof, that has not undergone controlled aerobic decomposition to produce a stabilized organic product.
- (45) "Mulching" means the grinding, shredding or chipping of yard trimmings, land-clearing debris, untreated and unpainted wood, or any combination thereof, that has not undergone controlled aerobic decomposition to produce a stabilized organic product.
- (46) "Municipal Solid Waste" means any solid waste derived from households, including garbage, trash, and sanitary waste in septic tanks and means solid waste from single-family and multifamily residences, hotels and motels, bunkhouses, campgrounds, picnic grounds, and day use recreation areas. The term includes yard trimmings and commercial solid waste, but does not include solid waste from mining, agricultural, or silvicultural operations or industrial processes or operations.
- (47) "Municipal Solid Waste Landfill (MSWLF) Unit" means a discrete area of land or an excavation that receives household waste, and that is not a land application unit, surface impoundment, injection well, or waste pile, as those terms are defined under [40 CFR](#)

[Part 257.2](#). A MSWLF unit also may receive other types of solid waste, such as commercial solid waste, nonhazardous sludge, small quantity generator waste and industrial solid waste. Such a landfill may be publicly or privately owned.

- (48) "Municipal Solid Waste Disposal Facility" means any facility or location where the final deposition of any amount of municipal solid waste occurs, whether or not mixed with or including commercial or industrial solid waste, and includes, but is not limited to, municipal solid waste landfills and solid waste thermal treatment technology facilities.
- (49) "Municipal Solid Waste Disposal Facility Operator" means the operator certified in accordance with Rule [391-3-4-.18](#) and stationed on the site who is in responsible charge of and has direct supervision of the daily field operations of a municipal solid waste disposal facility to ensure that the facility operates in compliance with the permit.
- (50) "Municipal Solid Waste Landfill" means a disposal facility where any amount of municipal solid waste, whether or not mixed with or including commercial waste, industrial waste, nonhazardous sludges, or small quantity generator hazardous wastes, is disposed of by means of placing an approved cover thereon.
- (51) "Open Burning" means the combustion of solid waste without:
 - (a) Control of combustion air to maintain adequate temperature for efficient combustion;
 - (b) Containment of the combustion reaction in an enclosed device to provide sufficient residence time and mixing for complete combustion; and
 - (c) Control of the emission of the combustion products.
- (52) "Open Dump" means a disposal facility at which solid waste from one or more sources is left to decompose, burn or to otherwise create a threat to human health or the environment.
- (53) "Operating Records" means written records including, but not limited to, permit applications, monitoring reports, inspection reports, and other demonstrations of compliance with this Chapter, which records are kept on file at the facility or at an alternative location as approved by the Division.
- (54) "Operator" means the person(s) responsible for the overall operation of a facility or part of a facility.
- (55) "Owner" means the person(s) who owns a facility or part of a facility.
- (56) "Person" means the State of Georgia or any other state or any agency or institution thereof, and any municipality, county, political subdivision, public or private corporation, solid waste authority, special district empowered to engage in solid waste management activities, individual, partnership, association or other entity in Georgia or

any other state. This term also includes any officer or governing or managing body of any municipality, political subdivision, solid waste authority, special district empowered to engage in solid waste activities, or public or private corporation in Georgia or any other state. This term also includes employees, departments, and agencies of the federal government.

- (57) "Post-closure" means a procedure approved by the Division to provide for long- term financial assurance, monitoring and maintenance of a solid waste disposal facility to protect human health and the environment.
- (58) "Private Industry Solid Waste Disposal Facility" means a disposal facility which is operated exclusively by and for a private solid waste generator for the purpose of accepting solid waste generated exclusively by said private solid waste generator.
- (59) "Processing Operation" means any method, system or other treatment designed to change the physical form or chemical content of solid waste and includes all aspects of its management (administration, personnel, land, equipment, buildings and other elements).
- (60) "Putrescible Wastes" means wastes that are capable of being quickly decomposed by microorganisms. Examples of putrescible wastes include but are not necessarily limited to kitchen wastes, animal manure, offal, hatchery and poultry processing plant wastes, dead animals, garbage and wastes which are contaminated by such wastes.
- (61) "Qualified Ground water Scientist" means a professional engineer or geologist registered to practice in Georgia who has received a baccalaureate or post-graduate degree in the natural sciences or engineering and has sufficient training and experience in groundwater hydrology and related fields that enable that individual to make sound professional judgments regarding groundwater monitoring, contaminant fate and transport, and corrective action.
- (62) "Run-off" means any rainwater, leachate, or other liquid that drains over land from any part of a facility.
- (63) "Run-on" means any rainwater, leachate, or other liquid that drains over land onto any part of a facility.
- (64) "Recovered Materials" means those materials which have known use, reuse, or recycling potential; can be feasibly used, reused or recycled; and have been diverted or removed from the solid waste stream for sale, use, reuse, or recycling, whether or not requiring subsequent separation and processing.
- (65) "Recovered Materials Processing Facility" means a facility engaged solely in the storage, processing, recycling, and resale or reuse of recovered materials. Such facility shall not be considered a solid waste handling facility; provided, however, any solid waste generated by such facility shall be subject to all applicable laws and regulations relating to such solid waste.

- (66) "Recycling" means any process by which materials which would otherwise become solid waste are collected, separated, or processed and reused or returned to use in the form of raw materials, intermediates, or products which can be used as a substitute for products not derived by such processes.
- (67) "Regional Landfill or Regional Solid Waste Disposal Facility" means a facility owned by a county, municipality, or special district empowered to engage in solid waste management activities, or any combination thereof, which serves two or more any combination of counties, municipalities, or special solid waste districts.
- (68) "Release" means the discharge, deposit, injection, dumping, spilling, emitting, releasing, leaking, or placing of any substance into or on any land or water of the state.
- (69) "Relevant Point of Compliance" is a vertical surface located at the hydraulically downgradient limit of the waste management unit boundary that extends down into the uppermost aquifer underlying the facility. This point will be specified by the Director and shall be no more than 150 meters from the waste management unit boundary and shall be located on land owned by the owner of the landfill unit. The downgradient monitoring system must be installed at this point, and monitoring conducted to ensure that the concentration values listed in Table 1 of Rule [391-3-4-.07](#) will not be exceeded in the uppermost aquifer.
- (70) "Saturated Zone" means that part of the earth's crust in which all voids are filled with water.
- (71) "Scavenge" means the unpermitted removal of solids waste from a solid waste handling facility.
- (72) "Shredding" means the process by which solid waste is cut or torn into smaller pieces for final disposal or further processing.
- (73) "Significant Groundwater Recharge Areas" means any area as designated on Hydrologic Atlas 18 Most Significant Ground-Water Recharge Areas of Georgia, 1989, as published by the Georgia Geologic Survey, Environmental Protection Division, Georgia Department of Natural Resources, unless an applicant for a solid waste handling permit or other interested party can demonstrate to the satisfaction of the Director that an area designated on Hydrologic Atlas 18 is or is not, in fact, a significant groundwater recharge area.
- (74) "Site" means the entire property a permitted solid waste handling facility is located within and includes all activities within that property.
- (75) "Sludge" means any solid, semi-solid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant.

- (76) "Solid Waste" means any garbage or refuse; sludge from a wastewater treatment plant, water supply treatment plant, or air pollution control facility; and other discarded material including solid, liquid, semisolid, or contained gaseous material resulting from industrial, commercial, mining, and agricultural operations and from community activities, but does not include recovered materials; post-use plastics and nonrecycled feedstock that are subsequently processed using a pyrolysis or gasification to fuels and chemicals process; solid or dissolved materials in domestic sewage; solid or dissolved materials in irrigation return flows or industrial discharges that are point sources subject to permit under [33 U.S.C. Section 1342](#); or source, special nuclear, or by-product material as defined by the federal Atomic Energy Act of 1954, as amended (68 Stat. 923).
- (77) "Solid Waste Handling" means the storage, collection, transportation, treatment, utilization, processing, or disposal of solid waste, or any combination of such activities but does not include recovered materials processing or pyrolysis or gasification to fuels and chemicals processes, or the holding of post-use plastics or nonrecycled feedstock at a pyrolysis facility or gasification to fuels and chemicals facility prior to processing at the facility where those materials are being held to ensure production is not interrupted.
- (78) "Solid Waste Handling Facility" means any facility, the primary purpose of which is the storage, collection, transportation, treatment, utilization, processing, or disposal, or any combination thereof, of solid waste but does not include recovered materials processing facilities or pyrolysis or gasification to fuels and chemicals facilities.
- (79) "Solid Waste Handling Permit" means written authorization granted to a person by the Director to engage in solid waste handling.
- (80) "Solid Waste Management Act" or the "Act", wherever referred to in these Rules, means the Georgia Comprehensive Solid Waste Management Act, O.C.G.A. [12-8-20](#), *et seq.*
- (81) "Solid Waste Thermal Treatment Technology" means any solid waste handling facility, the purpose of which is to reduce the amount of solid waste to be disposed of through a process of combustion, with or without the process of waste to energy.
- (82) "Solidification" means the process of:
- (a) mixing non-hazardous liquid wastes with bulking agents in order to produce a bulked waste with a low moisture content, or
 - (b) adding a solidification/stabilization (S/S) agent to bind the liquid waste into a solid form.
- (83) "Solidification/stabilization (S/S) agents" means binders and/or supplemental additives that chemically react with the liquid waste, resulting in a solid material with structural integrity where the liquid waste is bound and cannot be separated from the solid material.

- (84) "Tire" means a continuous solid or pneumatic rubber covering designed for encircling the wheel of a motor vehicle and which is neither attached to the motor vehicle nor a part of the motor vehicle as original equipment.
- (85) "Transfer Station" means a facility used to transfer solid waste from one transportation vehicle to another for transportation to a disposal facility or processing operation.
- (86) "Uppermost Aquifer" means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected with this aquifer within the solid waste handling facility's property boundary.
- (87) "Vertical Expansion" means the expansion of landfill beyond the approved maximum final elevations and within the approved waste management boundaries of the existing permit.
- (88) "Waste Management Unit Boundary" means a vertical surface located at the hydraulically downgradient limit of the unit. This vertical surface extends down into the uppermost aquifer.
- (89) "Waste-to Energy Facility" means a solid waste handling facility that provides for the extraction and utilization of energy from municipal solid waste through a process of combustion.
- (90) "Yard Trimmings" means leaves, brush, grass, clippings, shrub and tree prunings, discarded Christmas trees, nursery and greenhouse vegetative residuals, and vegetative matter resulting from landscaping development and maintenance other than mining, agricultural, and silvacultural operations.

Amended: F. Mar. 8, 2018; eff. Mar. 28, 2018.

Amended: F. June 10, 2021; eff. June 30, 2021.

Rule 391-3-4-.02. Solid Waste Handling Permits.

(1) Solid Waste Handling Permits Required. No person shall engage in solid waste handling or construct or operate a solid waste handling facility, except those individuals exempted from the provisions of the Georgia Comprehensive Solid Waste Management Act, under the provisions of O.C.G.A. [12-8-30.10](#) or O.C.G.A. [12-8-40](#) or those individuals who have a permit-by-Rule under Rule [391-3-4-.06](#), without first obtaining a permit from the Director authorizing such activity.

(a) Applicability. All new and existing solid waste handling permits.

(b) Application Completeness. The Director may issue permits for solid waste handling provided the application is judged complete and meets the requirements of the Georgia Comprehensive Solid Waste Management Act and these Rules. Solid Waste Handling Permits shall be required for, but are not limited to, persons engaged in the collection, transportation, treatment, utilization, storage, processing, or disposal of solid wastes, or any combination thereof, except as exempted by O.C.G.A. [12-8-30.10](#) or O.C.G.A. [12-8-40](#) and these Rules and shall be required for the construction or operation of all solid waste handling facilities, except as exempted by O.C.G.A. [12-8-30.10](#) or O.C.G.A. [12-8-40](#) and these Rules.

(c) Permit Review and Schedule. As of July 1, 2018, all new permits shall be reviewed every five years. All permits issued prior to July 1, 2018 will be reviewed within five years and will then be placed on a corresponding five year review schedule.

(d) Permit Review. Each permit for a solid waste handling facility will be reviewed by the Division every five years and shall be modified to assure that the facility continues to comply with the currently applicable requirements of these Rules. The permit review will require that the permittee submit and revise Design and Operational Plans and other supporting documents, as necessary, to include any changes to reflect the facility's current construction and operation. Permit reviews shall be filed with the Division as either a minor modification or a major modification.

1. In order for permits to remain in effect, applications for permit review shall be filed at least six (6) months, but not more than eighteen (18) months prior to the date of scheduled permit review.
2. Existing solid waste handling permits shall remain in effect during the review period.
3. If a timely and complete review package has not been submitted, the solid waste handling facility's right to operate ceases until a complete application has been submitted.

(2) Modification or Revocation of Permits for Cause: the Director may modify or revoke any permit issued pursuant to O.C.G.A. [12-8-24](#) if the holder of the permit found to be in

violation of any of the permit conditions; or if the holder of the permit fails to perform such activity in accordance with the approved plan; or if such activity creates a threat to human health or the environment. In the event of modification or revocation of a permit, the Director shall serve written notice of such action on the permit holder and shall set forth in such notice the reason for such action.

- (3) Permit Modifications at the Request of the Permittee: all modifications of existing solid waste handling permits shall be classified as follows:
- (a) Major Modifications include those changes which substantially alter the design of the facility, management practices, the types of wastes being handled, or the method of waste handling, and due to the nature of the changes, would likely have an impact on the ability of the facility to adequately protect human health and the environment. Major modifications therefore require closer review and public input than minor modifications. Major modifications shall include, but are not limited to, the following:
 - 1. A modification which involves an expansion of an existing landfill's capacity.
 - 2. A modification which involves a lateral expansion of a CCR surface impoundment.
 - 3. A modification which adds a new solid waste handling process. This shall include but not be limited to the addition of an air curtain destructor, a materials recovery facility, a baling operation, a shredding operation, a processing operation, a municipal solid waste or sewage sludge composting operation, or a liquid solidification operation.
 - 4. A modification which involves the change of a site suitability requirement which could have impacted the original siting of the facility.
 - 5. Any other modification which the Director, in the exercise of his discretion, determines to meet the criteria set forth in Section (3)(a) of this Rule.
 - (b) Minor modifications include changes that do not substantially alter the permit conditions, that do not reduce the capacity of the facility to protect human health or the environment, or that enable a permittee to respond in a timely manner to common variations in the type and quantities of wastes managed, technological advancements, or changes necessary to comply with new Rules where these changes can be implemented without substantially changing design specifications or management practices in the permit. Minor modifications shall include, but are not limited to, the following:
 - 1. Changing the name of a facility.

2. A modification which involves a change in administrative and operational information and maintenance of operational records.
3. A modification which involves a change in the sequence of operation.
4. A modification which involves the relocation of access roads.
5. A modification which adds or deletes on-site structures.
6. A modification which involves the addition of or a change to a groundwater or surface water monitoring system.
7. A modification which involves the addition of or a change to a landfill gas monitoring system.
8. A modification which involves the addition or deletion of a permit-by-Rule facility.
9. A modification which involves the deletion of any solid waste handling facility.
10. A modification which involves the deletion of permitted capacity or acreage.
11. A modification which involves the addition of or a change to an erosion and sedimentation control system.
12. A modification which involves the addition of or a change to a closure or post- closure plan.
13. A modification which involves the addition of or a change to a method of leachate handling.
14. A modification which involves the addition of or a change to a quality assurance plan.
15. A modification which involves the change of any compliance schedule which is part of the permit.
16. A modification which involves the addition of a corrective action plan.
17. A modification which involves a change in ownership, or in the case of a corporation of over five (5) percent of the stock in a corporation holding a permit, but does not involve the transfer of the permit.

18. A modification which involves the addition of acreage for the purpose of installing monitoring systems or installing structures for mitigating environmental impacts, where the original permitted acreage provides insufficient area to complete required improvements. This modification request must be accompanied by a hydrogeological assessment as specified in Rule [391-3-4-.05\(1\)\(j\)](#).
 19. A modification which involves the addition of or change in a soil or synthetic liner and leachate collection system to a waste unit holding a valid solid waste handling permit, if it does not require other significant site redesign.
 20. A modification which involves the removal or recovery of CCR from a CCR unit for the purpose of beneficial use.
- (c) All modifications of solid waste handling permits which are major modifications shall be subject to the following requirements:
1. Submission of a completed application for a permit modification.
 2. Submission of supporting documents which accompany the application for a permit modification which describe the exact change to be made to the permit conditions and supporting documents referenced by the permit and which explain why the change is needed.
 3. Submission of a revised design for the requested change.
 4. Submission of written verification by the applicant, as required by subparagraph (1)(a) of Rule [391-3-4-.05](#), that the facility, as proposed to be modified, conforms to all local zoning/land use ordinances, if any.
 5. Except for Private Industry Solid Waste Disposal Facilities, after July 1, 1992, submission of written verification by the applicant that the facility, as proposed to be modified, is consistent with the local or regional solid waste management plans and that the host jurisdiction and the jurisdictions generating solid waste destined to the facility can demonstrate that they are actively involved in and have a strategy for meeting the State-wide goal of waste reduction by July 1, 1996. The verification shall consist of letters from the host jurisdiction and generating jurisdictions verifying consistency with the approved local solid waste plan.
 6. Except for Private Industry Solid Waste Disposal Facilities, submission of written verification that a public hearing was held by the governing authority of the county or municipality in which the solid waste facility requesting the modification is located, not less than two weeks prior to

granting approval of the modification. Submission of written verification that notice of such hearing was posted at the site of such facility and advertised in a newspaper of general circulation serving the county or counties in which the facility is located at least thirty (30) days prior to such hearing. A typed transcript of the hearing must be provided to the Division.

7. Any application for a solid waste disposal facility vertical expansion shall meet the criteria as established in O.C.G.A. [12-8-24\(e\)\(3\)](#). Any operation of a vertical expansion shall be in accordance with conditions set forth in the modified permit. Conditions to be included in any such modified permit shall, at a minimum, include the following:
 - (i) A minimum 200 foot buffer shall be provided between the property line and the waste disposal boundary established by the vertical expansion.
 - (ii) Site survey control shall be provided to ensure compliance with the approved permit modification.
 - (iii) Erosion and sedimentation control devices shall be installed, rehabilitated, and maintained as appropriate to control all surface runoff and sediments from disturbed areas.
 - (iv) All areas exposed for more than three (3) months shall be vegetated.
 - (v) Closure plans, post-closure plan, and appropriate financial responsibility shall be maintained and updated as provided for in the approved permit modification.
 - (vi) All other conditions of the existing permit not in conflict with conditions (i) through (v) above.
 8. With the exception of major modifications granted under subparagraph (c)7. of this Rule, all major modifications shall meet the siting and design standards applicable to new permit applications in effect on the date the modification is approved.
- (d) All modifications of solid waste handling permits which are minor modifications shall be subject to the following requirements:
1. Submission of a written request by the permit holder requests a minor modification.
 2. Submission of supporting documents which accompany the written modification request which describe the exact change to be made to the

permit conditions and supporting documents referenced by the permit and which explain why the change is needed.

3. If applicable, submission of a revised design for the requested change.
 4. For a modification involving a change in ownership covered in subparagraph (4)(b)17. above, documentation must be provided to insure compliance with subparagraph (7)(a) below.
- (4) Transfer of Permits: permits are not transferable from one site or facility to another. Permits are transferable from one person to another provided a new permit application is completed by the proposed permittee, and the proposed permittee agrees to abide by all the permit conditions or outstanding orders in effect at the time of the requested transfer. Prior to the transfer of the permit, the new permittee must demonstrate compliance with [Rule 391-3-4.13](#). Until such time as this is demonstrated, the original permittee shall be fully responsible for financial responsibility for the facility. Unless notified otherwise by the Director, within 45 days of receipt by the Division of a properly completed request for transfer of the permit, the permit transfer shall stand approved.
- (5) Applications for permits and major permit modifications under O.C.G.A. [12-8-24](#) shall be on forms as may be prescribed and furnished from time to time by the Division and shall be accompanied by all pertinent information as the Division may require.
- (6) Material submitted shall be complete and accurate.
- (7) Application for a permit or for the transfer of a permit shall contain, but shall not be limited, to the following:
- (a) A sworn statement that the applicant and owner or operator, if different than applicant, for a permit or, in the case of a corporation, partnership, or association, an officer, Director, manager, or shareholder of five percent or more of stock or financial interest in said corporation, partnership, or association:
 1. Has not intentionally misrepresented or concealed any material fact in the application submitted to the Director;
 2. Is not attempting to obtain the permit by misrepresentation or concealment;
 3. Has not been finally convicted in the State of Georgia or any federal court of any felony involving moral turpitude within three years immediately preceding the application for a permit;
 4. Has not been convicted of any violations of any environmental laws punishable as a felony in any state or federal court within five years preceding the application for a permit;

5. Has not knowingly, willfully, and consistently violated the prohibitions specified in O.C.G.A. [12-8-30.7](#); and
 6. Has not been adjudicated in contempt of any court order enforcing any federal environmental laws or any environmental laws of the State of Georgia within five years preceding the application for a permit.
- (b) For a permit application, a statement that the applicant either owns the property on which the facility is to be located or had the permission of the owner to use the property for solid waste handling.
 - (c) For a permit application, in the case of a regional landfill or a landfill serving more than one county, a list of the areas to be served.
 - (d) For a permit application, written verification of zoning compliance as required by Rule [391-3-4-.05](#) paragraph (1)(a).
 - (e) For a permit application, a site assessment as required by Rule [391-3-4-.05](#), except CCR units which must meet criteria in [391-3-4-.10](#).
- (8) Applications for permits will be reviewed together with such other information as may be necessary to ascertain the effect of such solid waste handling upon air, water, and land resources and human health. Conditions under which the handling will be permitted will be specified in the permit issued.
 - (9) Except for Private Industry Solid Waste Disposal Facilities, each applicant for a permit shall provide verification that the facility is consistent with the local or regional solid waste management plans. The verification shall consist of letters from the host jurisdiction and generating jurisdictions verifying consistency with the approved local solid waste plans.
 - (10) Changes to Permit Status. The Director may approve a request to modify an existing solid waste handling permit to reflect the change of a facility's operational status. Such changes can include operating, closure, and post-closure.

Authority: O.C.G.A. § [12-8-20](#) et seq., as amended.

History. Original Rule entitled "General" was filed as [391-1-1-.02](#) on November 21, 1972; effective December 12, 1972, as specified by the Agency.

Amended: Rule renumbered as 391-3-4-.02. Filed September 6, 1973; effective September 26, 1973.

Amended: Rule repealed a new Rule entitled "Solid Waste Handling Permit" adopted. Filed September 19, 1974; effective October 9, 1974.

Amended: F. Jun. 9, 1989; eff. Jun. 29, 1989.

Amended: F. Sept. 4, 1991; effective Sept. 24, 1991.

Amended: F. Jun. 7, 1993 eff. Jun. 27, 1993.

Amended: F. Nov. 2, 2016; eff. Nov. 22, 2016.

Amended: F. Mar. 8, 2018; eff. Mar. 28, 2018.

Amended: F. June 10, 2021; eff. June 30, 2021.

Rule 391-3-4-.03. Public Participation.

- (1) Any city, county, group of counties, or authority beginning a process to select a site for a municipal solid waste disposal facility shall first call a public meeting as described herein.
 - (a) Notice such meeting shall be published at least once per week for two weeks immediately preceding the public meeting in a newspaper of general circulation serving such municipality or county.
 - (b) Where such proposed facility will serve a regional solid waste management authority established pursuant to O.C.G.A. [12-8-53](#), the notice procedure outlined in subparagraph (a) above shall be followed in each jurisdiction participating in such authority.
 - (c) The purpose of the public meeting shall be to discuss the waste management needs of the local government or region and to describe the siting process to be followed.
- (2) The governing authority of any county or municipality taking action resulting in a municipal solid waste disposal facility siting decision shall notify the public as follows:
 - (a) Cause to be published in a newspaper of general circulation serving such city or county at least once per week for two weeks immediately preceding the date of such meeting, notice of the meeting at which the siting decision is to be made.
 - (b) Such notices shall state the time, place, and purpose of the meeting.
 - (c) The meeting shall be conducted by the governing authority taking the action.
- (3) Upon submission of an application to the Division for any municipal solid waste disposal facility for which a permit (other than a permit-by-Rule) is required, the applicant, within fifteen (15) days of the submission of said application, shall take the following actions:
 - (a) Publish public notice of the application in a newspaper of general circulation serving the host county if the proposed facility or expanded facility is to serve no more than one county;
 - (b) Publish public notice of the application in a newspaper of general circulation serving each affected if the proposed facility or expanded facility is to serve more than one county;
 - (c) Provide written notice of the permit application to the governing body of each affected county in subparagraph (a) or (b) above; to the governing body of each

local government within subparagraph (a) or (b) above; and to the regional development center;

- (d) Request that the public notice outlined herein to be displayed prominently in the courthouse of each county notified in (c) above.
 - (e) Upon notification by the Division that a proposed facility is suitable for the intended purpose, the host local government shall initiate a local notification and negotiation process as required in O.C.G.A. [12-8-32](#).
- (4) The governing authority of the county or municipality will hold a public hearing not less than two weeks prior to the issuance of any permit, except for a private industry disposal facility, and notice of such hearing shall be posted at the proposed site and advertised in a newspaper of general circulation serving the county or counties in which the proposed activity will be conducted, at least thirty (30) days prior to such hearing. A typed copy of the hearing transcript shall be submitted to the Division.
- (5) Whenever the Director issues, denies, revokes, suspends, or transfers, a permit or approves a major modification of a permit for a facility, he shall notify the chief elected official of the host local government in which the facility is located or is proposed to be located.

Amended: F. Nov. 2, 2016; eff. Nov. 22, 2016.

Amended: F. Mar. 8, 2018; eff. Mar. 28, 2018.

Amended: F. June 10, 2021; eff. June 30, 2021.

Rule 391-3-4-.04. General. Amended.

- (1) No person shall engage in solid waste handling in a manner which will be conducive to insect and rodent infestation or the harboring and feeding of wild dogs or other animals; impair the air quality; impair the quality of the ground or surface waters; impair the quality of the environment; or likely create other hazards to the public health, safety, or well-being as may be determined by the Director.

- (2) Provisions of these Rules apply to all persons presently engaged in solid waste handling as well as all persons proposing to engage in solid waste handling.
- (3) **Exemptions:** provisions of these Rules shall not apply to any individual disposing of solid wastes originating from his own residence onto land or facilities owned by him when disposal of such wastes does not thereby adversely affect the public health. These Rules shall not apply to any individual, corporation, partnership, or cooperative disposing of livestock feeding facility waste from facilities with a total capacity of up to 1,000 cattle or 5,000 swine. Provided that if such individual, corporation, partnership, or cooperative shall provide an approved waste disposal system which is capable of properly disposing of the run-off from a "ten year storm" such individual, corporation, partnership or cooperative shall be further exempt regardless of total per head capacity. Nothing in these Rules shall limit the right of any person to use poultry or other animal manure for fertilizer.
- (4) Prohibited Acts:
 - (a) **Burning:** no solid waste may be burned at a solid waste handling facility, except by thermal treatment technology facility approved by the Division.
 - (b) **Scavenging:** no person owning or operating a solid waste handling facility shall cause, suffer, allow or permit scavenging at such site.
 - (c) **Open Dump:** no solid waste may be disposed of by any person in an open dump, nor may any person cause, suffer, allow or permit open dumping on his property.
 - (d) **Asphalt Shingles:** no roofing shingles which contain asphalt may be disposed of except in construction and demolition or municipal solid waste landfills.
- (5) The owner or occupant of any premises, office, business establishment, institution, industry, or similar facilities shall be responsible for the collection and transportation of all solid waste accumulated at the premises, office, business establishment, institution, or similar facility to a solid waste handling facility operating in compliance with these Rules unless arrangements have been made for such service with a collector operating in compliance with these Rules.
- (6) Prohibited Wastes Disposal:
 - (a) If, because of unusual physical or chemical properties, or geological or hydrogeological conditions, or for other reasons, the Division finds that solid waste should not be accepted at a solid waste handling facility, the Division may require that such waste be prohibited, and that a proposal for disposal of such waste, with supporting data as may be deemed necessary, be submitted by the generator of such waste for consideration of approval by the Division. The prohibition of such waste shall continue in effect until an acceptable procedure for processing or disposal has been developed and approved.

- (b) The following solid wastes are specifically prohibited from disposal at solid waste disposal facilities in Georgia:
1. lead acid batteries;
 2. liquid waste in landfills, except as allowed in (9) below;
 3. regulated quantities of hazardous waste as defined in Rules promulgated by the Board of Natural Resources, Chapter 391-3-11;
 4. radioactive waste as defined in Rules promulgated by the Board of Natural Resources, Chapter 391-3-9, Radioactive Waste Material Disposal; and
 5. polychlorinated biphenyls (PCB) waste as defined in 40 CFR, Part 761.
- (c) Any generator who disposes of a prohibited waste or person who accepts for disposal a prohibited waste shall be deemed to be in violation of these Rules.

(7) Recovered Materials:

- (a) Recovered materials and recovered materials processing facilities are excluded from regulation as solid wastes and solid waste handling facilities. To be considered exempt from regulation, the material must have a known use, reuse, or recycling potential; must be feasibly used, reused, or recycled; and must have been diverted or removed from the solid waste stream for sale, use, reuse, or recycling, whether or not requiring subsequent separation and processing. Stockpiles of unprocessed yard trimmings, land-clearing debris, untreated and unpainted wood, or any combination thereof and mulch are considered recovered materials if the requirements for facilities with mulching operations as set forth in 391-3-4-.04(7)(g) are met.
- (b) Materials accumulated speculatively are solid waste and must comply with all applicable provisions of these regulations.
- (c) A recovered material is not accumulated speculatively if the person accumulating it can show that there is a known use, reuse, or recycling potential for the material, that the material can be feasibly sold, used, reused, or recycled and that during a rolling 12 month period seventy-five percent (75%), by weight or volume, of the recovered material stored at a facility is recycled, sold, used, or reused. Any material that is accumulated speculatively and not in accordance with these requirements must be handled as solid waste.
- (d) Proof of recycling, sale, use, or reuse shall be provided in the form of bills of sale, or other records showing adequate proof of movement of the material in question to a recognized recycling facility or for proper use or reuse from the accumulation point. In addition, proof must be provided that there is a known market or

disposition for the recovered material. Persons claiming that they are owners or operators of recovered materials processing facilities must show that they have the necessary equipment to do so.

- (e) A recovered material is "sold" if the generator of the recovered material or the person who recovered the material from the solid waste stream received consideration or compensation for the material because of its inherent value.
- (f) A recovered material is "used, reused or recycled" if it is either:
 - 1. Employed as an ingredient (including use as an intermediate) in a process to make a product (for example, utilizing old newspaper to make new paper products) or
 - 2. Employed in the same or different fashion as its original intended purpose without physically changing its composition (for example, use of old automobiles for spare parts or donation of clothing or furniture to charitable organizations) or
 - 3. Employed in a particular function or application as an effective substitute for a commercial product (for example, utilizing shredded tires in asphalt or utilizing refuse - derived fuel as a substitute for fuel oil, natural gas, coal, or wood in a boiler or industrial furnace) as long as such substitution does not pose a threat to human health or the environment and so long as the facility is not a solid waste thermal treatment facility.
 - 4. A material is not "used, reused or recycled" when it is applied to or placed on or in the land in a manner that constitutes disposal which, in the opinion of the Director, may pose a threat to human health and the environment (for example, utilizing soil containing levels of hazardous constituents, as listed in Chapter 391-3-11, 40 CFR Part 261, Appendix VIII for fill material when those levels are greater than the background levels in the area to be filled, land applying sludge in excess of generally accepted agricultural practices or use of inherently waste-like materials as fill material).
- (g) Mulching is considered a recovered material operation at facilities demonstrating compliance with the following criteria:
 - 1. A stockpile must have no greater than the following maximum dimensions:
 - (I) Area: 25,000 square feet
 - (II) Height: 25 feet

2. Unprocessed yard trimmings, land-clearing debris, untreated and unpainted wood or any combination thereof, must be processed no later than 90 days after receipt, unless otherwise stated in the Solid Waste Handling Permit.
 3. Mulch is not accumulated speculatively if the person accumulating it can show that there is a known use, reuse, or recycling potential for the material; that the material can be feasibly sold, used, reused, or recycled; and that during a rolling 12 month period seventy-five percent (75%) by weight or volume of the products stored at a facility are recycled, sold, used, or reused. Any material that is accumulated speculatively and not in accordance with these requirements must be handled as solid waste.
 4. The facility shall have on site a fire plan detailing steps to prevent, contain and extinguish a fire. The fire plan shall include documentation that the local fire authority or a Georgia State Certified Fire Inspector conducted a fire safety survey.
 5. Activities involving open flames and other flammable materials (oil, gas, fuel) shall not be allowed within 25 feet of a stockpile, with the exception of maintenance activities involving torches and welding equipment, as long as a fireproof barrier is used.
 6. The facility must provide a buffer between unprocessed yard trimmings, land-clearing debris, untreated and unpainted wood, mulch, and any combination thereof and the property line. The buffer shall be set by the local fire authority or a Georgia State Certified Fire Inspector and documented in the fire plan. If the local fire authority or a Georgia State Certified Fire Inspector does not establish a buffer, the minimum buffer shall be 50 feet. The buffer may include the fire lane.
 7. The facility shall utilize best management practices from the most recent edition of the Georgia Stormwater Management Manual to minimize the exposure of material storage areas to rain, snow, snowmelt, and runoff.
 8. The facility shall have erosion and sediment control measures adequate to prevent the escape of sediment from the facility property into Waters of the State. Construction and operating areas must utilize best management practices from the most recent edition of the Manual for Erosion and Sedimentation Control in Georgia.
- (h) Existing facilities producing mulch that have stockpiles of unprocessed yard trimmings, land clearing debris, untreated and unpainted wood, mulch, or any combination thereof on the effective date of this rule shall comply with the above sections (g) 1.- 8. within 6 months of the effective date of the rule.

(8) Asbestos Containing Waste.

(a) Collection.

1. Vehicles used for the transportation of containerized asbestos waste shall have an enclosed carrying compartment or utilize a covering sufficient to contain the transported waste, prevent damage to containers, and prevent release or spillage from the vehicle.
2. Vehicles used to reduce waste volume by compaction shall not be used.
3. Vacuum trucks used to transport waste slurry must be constructed and operated to ensure that liquids do not leak from the truck.

(b) Disposal.

1. Asbestos containing waste is to be disposed of only in a permitted landfill or other facility authorized by the Division for acceptance of asbestos containing waste.
2. Asbestos containing waste shall be sealed in leak-proof containers labeled with "Caution - Contains Asbestos Fibers - Avoid Opening or Breaking Container - Breathing Asbestos is Hazardous to Your Health.
3. Asbestos containing waste shall be disposed of in such a manner as not to destroy the integrity of the asbestos containing materials containers prior to the placement of cover material. This waste shall be completely covered immediately after deposition with a minimum of six (6) inches of non-asbestos material.

(9) Liquid Waste Restrictions at Landfills.

(a) Bulk or noncontainerized liquid waste may not be placed in landfill units unless:

1. The waste is household waste other than septic waste; or
2. The waste is leachate or gas condensate derived from the landfill unit, whether it is a new or existing landfill or lateral expansion, is designed with a composite liner and leachate collection system as described in paragraph (1)(d) of Rule [391-3-4.07](#). The owner or operator must place the demonstration in the operating record and notify the Director that it has been placed in the operating record.

(b) Containers holding liquid waste may not be placed in a landfill unit unless:

1. The container is a small container similar in size to that normally found in household waste;

2. The container is designed to hold liquids for use other than storage; or
3. The waste is household waste.

(c) For purposes of this section:

1. "Liquid waste" means any waste material that is determined to contain "free liquids" as defined by Method 9095 (Paint Filter Liquids Test), as described in "Test Methods for Evaluating Solid Wastes, Physical/Chemical Methods" (EPA Pub. No. SW-846).
2. "Gas condensate" means the liquid generated as a result of gas recovery process(es) at the landfill unit.

- (10) Variances, waivers, and alternative compliance schedules which may be granted under these Rules, Chapter 391-3-4, may not allow for the waiver or modification of a requirement found in 40 CFR, Part 258, as amended, 56 Fed. Reg. 51016-51039 (October 9, 1991), 80 Fed. Reg. 21468 (April 17, 2015); as amended at 80 Fed. Reg. 37991 (July 2, 2015) and 81 Fed. Reg. 51807 (August 5, 2016), except as provided in [391-3-4.10\(11\)](#).
- (11) Compliance with the Rules for Solid Waste Management, Chapter 391-3-4, does not relieve any person from complying with all other applicable local, state, or federal rules or statutes.

Amended: F. June 10, 2021; eff. June 30, 2021.

Rule 391-3-4-.05. Criteria for Siting.

- (1) The following criteria must be met for a site proposed as a solid waste handling facility:

- (a) Zoning. The site must conform to all local zoning/land use ordinances. Written verification must be submitted to the Division by the applicant demonstrating that the proposed site complies with local zoning and land use ordinances, if any. This verification shall include a letter from the local governmental authority stating that the proposed site complies with local zoning or land use ordinances, if any. This verification shall be provided at the time of submission of a permit application and reaffirmed by the governmental authority prior to permit issuance.
- (b) Disposal Facility Siting Decision. Whenever any county, municipality group of counties, or authority begins a process to select a site for a municipal solid waste disposal facility, documentation shall be submitted which demonstrates compliance with O.C.G.A. [12-8-26\(a\)](#), and whenever the governing authority of any county or municipality takes action resulting in a publicly- or privately-owned municipal solid waste disposal facility siting decision, documentation shall be submitted which demonstrates compliance with O.C.G.A. [12-8-26\(b\)](#).
- (c) Airport Safety:
1. New MSWLF units or lateral expansions of existing units shall not be located within 10,000 feet (3,048 meters) of any public-use or private-use airport runway end used by turbojet aircraft or within 5,000 feet (1,524 meters) of any public-use or private-use airport runway end used by only piston-type aircraft.
 2. Owners or operators of existing MSWLF units, that are located within 10,000 feet (3,048 meters) of any public- use or private-use airport runway end used by turbojet aircraft or within 5,000 feet (1,524 meters) of any public- use or private-use airport runway end used by only piston-type aircraft must demonstrate that the units are designed and operated so that the MSWLF units do not pose a bird hazard to aircraft.
 3. Owners or operators proposing to site new MSWLF units and lateral expansions within a five-mile radius of any public-use or private-use airport runway end used by turbojet or piston-type aircraft must notify the affected airport and the Federal Aviation Administration (FAA).
 4. The owner or operator must place the demonstration in paragraph 2. of this section in the operating record and notify the Director that it has been placed in the operating record not later than October 1, 1993.
 5. For purposes of this section:
 - a. "Public-use airport" means an airport open to the public without prior permission and without restrictions within the physical capacities of available facilities.

- b. "Private-use airport" means an airport that is not open to the public and which may not be used without prior permission of the airport owner and which has restrictions other than the physical capacities of available facilities and such airport is shown on the Sectional Aeronautical Charts published by the U.S. Department of Commerce for Atlanta, Jacksonville, or New Orleans, which charts are dated at least one year prior to the submission of a MSWLF permit or major permit modification application.
 - c. "Bird hazard" means an increase in the likelihood of bird/aircraft collisions that may cause damage to the aircraft or injury to its occupants.
- (d) Floodplains. A solid waste handling facility located in the 100-year floodplain shall not restrict the flow of the 100-year flood, reduce the temporary water storage capacity of the floodplain, or result in a washout of solid waste so as to pose a hazard to human health and the environment. The owner or operator must place a demonstration of compliance in the operating record and notify the Director that it has been placed in the operating record.
- 1. For purposes of this section:
 - a. "Floodplains" means the low land and relatively flat areas adjoining inland and coastal waters, including flood-prone areas of offshore islands, that are inundated by the 100-year flood.
 - b. "100-year flood" means a flood that has a 1-percent or greater chance of recurring in any given year or a flood of a magnitude equalled or exceeded once in 100 years on the average over a significantly long period.
 - c. "Washout" means the carrying away of solid waste by waters of the base flood.
- (e) Wetlands. A solid waste handling facility shall not be located in wetlands, as defined by the U.S. Corps. of Engineers, unless evidence is provided to the Director, by the applicant, that use of such wetlands has been permitted or otherwise authorized under all other applicable state and federal laws and rules. The owner or operator must place a demonstration of compliance in the operating record and notify the Directory that it has been placed in the operating record.
- (f) Fault Areas.

1. New landfill units and lateral expansions of existing landfills shall not be located within 200 feet (60 meters) of a fault that has had displacement in Holocene time unless the owner or operator demonstrates to the Director that an alternative setback distance of less than 200 feet (60 meters) will prevent damage to the structural integrity of the landfill unit and will be protective of human health and the environment.
2. For the purposes of this section.
 - a. "Fault" means a fracture or a zone of fractures in any material a long which strata on one side have been displaced with respect to that on the other side.
 - b. "Displacement" means the relative movement of any two sides of a fault measured in any direction.
 - c. "Holocene" means the most recent epoch of the Quaternary period, extending from the end of the Pleistocene Epoch to the present.

(g) Seismic Impact Zones.

1. New landfill units and lateral expansions shall not be located in seismic impact zones, unless the owner or operator demonstrates to the Director that all containment structures, including liners, leachate collection systems, and surface water control systems, are designed to resist the maximum horizontal acceleration in lithified earth material for the site. The owner or operator must place the demonstration in the operating record and notify the Director that it has been placed in the operating record.
2. For the purposes of this section:
 - a. Seismic impact zone means an area with a ten percent or greater probability that the maximum horizontal acceleration in lithified earth material, expressed as a percentage of the earth's gravitational pull will exceed 0.10g in 250 years.
 - b. Maximum horizontal acceleration in lithified earth material means the maximum expected horizontal acceleration depicted on a seismic hazard map, with a 90 percent or greater probability that the acceleration will not be exceeded in 250 years, or the maximum expected horizontal acceleration based on a site -specific seismic risk assessment.
 - c. Lithified earth material means all rock, including all naturally occurring and naturally formed aggregates or masses of minerals or

small particles of older rock that formed by crystallization of magma or by induration of loose sediments. This term does not include man-made materials, such as fill, concrete, and asphalt, or unconsolidated earth materials, soil, or regolith lying at or near the earth surface.

(h) Unstable areas.

1. Owners or operators of new landfill units, existing landfill units, and lateral expansions located in an unstable area must demonstrate that engineering measures have been incorporated into the landfill unit's design to ensure that the integrity of the structural components of the landfill unit will not be disrupted. The owner or operator must place the demonstration in the operating record and notify the Director that it has been placed in the operating record. The owner or operator must consider the following factors, at a minimum, when determining whether an area is unstable:
 - a. On-site or local soil conditions that may result in significant differential settling;
 - b. On-site or local geologic or geomorphologic features; and
 - c. On-site or local human-made features or events (both surface and subsurface).
2. For the purposes of this section:
 - a. "Unstable area" means a location that is susceptible to natural or human-induced events or forces capable of impairing the integrity of some or all of the landfill structural components responsible for preventing releases from a landfill. Unstable areas can include poor foundation conditions, areas susceptible to mass movements, and karst terrains.
 - b. "Structural components" means liners, leachate collection systems, final covers, run-on/run-off systems, and any other component used in the construction and operation of the landfill that is necessary for protection of human health and the environment.
 - c. "Poor foundation conditions" means those areas where features exist which indicate that a natural or man-induced event may result in inadequate foundation support for the structural components of a landfill unit.

- d. "Areas susceptible to mass movement" mean those areas of influence (i.e., areas characterized as having an active or substantial possibility of mass movement) where the movement of earth material at, beneath, or adjacent to the landfill unit, because of natural or man-induced events, results in the downslope transport of soil and rock material by means of gravitational influence. Areas of mass movement include, but are not limited to, landslides, avalanches, debris slides and flows, soil fluctuation, block sliding, and rock fall.
 - e. "Karst terrains" means areas where karst topography, with its characteristic surface and subterranean features, is developed as the result of dissolution of limestone, dolomite, or other soluble rock. Characteristic physiographic features present in karst terrains include, but are not limited to, sinkholes, sinking streams, caves, large springs, and blind valleys.
- (i) Significant Groundwater Recharge Areas. A new municipal solid waste landfill or lateral expansion of an existing municipal solid waste landfill shall not have any part of such site located within two miles of any area that has been designated by the Director as a significant groundwater recharge area unless such municipal solid waste landfill will have a liner and leachate collection system. In the case of a regional landfill which accepts solid waste generated outside the counties or special districts constituting the region or a municipal solid waste landfill which accepts solid waste generated outside the county in which the landfill is located, no part of such site shall be within any area that has been designated as a significant groundwater recharge area.
- (j) Hydrogeological Assessment. A hydrogeological site investigation shall be conducted with the following factors, as a minimum, evaluated:
1. Distance to nearest point of public or private drinking water supply: all public water supply wells or surface water intakes within two miles and private (domestic) water supply wells within one-half mile of a landfill must be identified;
 2. Depth to the upper most aquifer: for landfills, the thickness and nature of the unsaturated zone and its ability for natural contamination control must be evaluated;
 3. Uppermost aquifer gradient: for landfills, the direction and rate of flow of groundwater shall be determined in order to properly evaluate the potential for contamination at a specific site. Measurements of water levels in site exploratory borings and the preparation of water table maps are required.

Borings to water are required to estimate the configuration and gradient of the uppermost aquifer;

4. Topographic setting: features which shall be provided include, but are not limited to, all upstream and downstream drainage areas affecting or affected by the proposed site, floodplains, gullies, karst conditions, wetlands, unstable soils and percent slope;
 5. Geologic setting: for landfills, the depth to bedrock, the type of bedrock and the amount of fracturing and jointing in the bedrock shall be determined. In limestone or dolostone regions, karst terrain shall not be used for waste disposal. This consideration does not preclude the siting of landfills in limestone terrains, but rather is intended to prevent landfills from being sited in or adjacent to sink-holes, provided, however, that the demonstration required by subparagraph (h) has been made.
 6. Hydraulic conductivity: evaluation of landfill sites shall take into consideration the hydraulic conductivity of the surface material in which the wastes are to be buried, as well as the hydraulic conductivity of the subsurface materials underlying the fill;
 7. Sorption and attenuation capacity: for landfills, the sorptive characteristics of an earth material and its ability to absorb contaminants shall be determined; and
 8. Distance to surface water: municipal solid waste landfills shall not be situated within two miles upgradient of any surface water intake for a public drinking water source unless engineering modifications such as liners and leachate collection systems and ground-water monitoring systems are provided.
- (k) New MSWLF units shall not be located within two miles of a federally restricted military air space which is used for a bombing range unless the MSWLF was permitted and operational on July 1, 1997.
- (2) Construction/Demolition waste landfills must comply with the siting criteria specified in "Criteria for Performing Site Acceptability Studies for Solid Waste Landfills in Georgia", Circular 14, Appendix B.
 - (3) Industrial waste landfills permitted to receive only a single type industrial waste (monofill) or receive only a single industry's waste, must comply with the siting criteria specified in "Criteria for Performing Site Acceptability Studies for Solid Waste Landfills in Georgia", Circular 14, Appendix A. Commercial industrial waste landfills must meet the same siting criteria as municipal solid waste landfills.

- (4) A site assessment report addressing the criteria listed above shall be prepared by a geologist registered in Georgia or a geotechnical engineer registered in Georgia and submitted to the Division for review at the time of submitting a permit application. The site assessment report shall be prepared in accordance with Circular 14, 1991, (amended 1997) as published by the Georgia Geologic Survey, Georgia Environmental Protection Division.
- (5) Monitoring wells and borings shall be constructed by a driller having a valid and current bond with the Water Well Standards Advisory Council.
- (6) CCR units must meet the siting criteria in [391-3-4-10](#).

Rule 391-3-4-.06. Permit by Rule for Collection, Transportation, Processing, and Disposal.

- (1) Permit-by-Rule. Notwithstanding any other provision of these Rules, collection operations, transfer station operations, inert waste landfill operations, waste processing and thermal treatment operations, wastewater treatment and pretreatment plant sludge disposal operations, and yard trimmings waste landfill operations shall be deemed to have a solid waste handling permit if the conditions in paragraph (2) are met and the conditions in paragraph (3), for that particular category of operation are met.
- (2) **Notification.** Within 30 days of commencing solid waste handling activities which are covered under a permit-by-Rule, notification must be made to the Director of such activity. Notification shall be made on such forms as are provided by the Director. Persons failing to notify the Director of such activities shall be deemed to be operating without a permit.
- (3) Categories of Operations:
 - (a) Collection Operations:
 1. Vehicle construction: vehicles or containers used for the collection and transportation of garbage and similar putrescible wastes, or mixtures

containing such wastes, shall be covered, substantially leakproof, durable, and of easily cleanable construction.

2. Vehicle maintenance: solid waste collection and transportation vehicles shall be cleaned frequently and shall be maintained in good repair.
3. Littering and spillage: vehicles or containers used for the collection and transportation of solid waste shall be loaded and moved in such manner that the contents will not fall, leak or spill therefrom and shall be covered when necessary to prevent blowing of material from the vehicle.
4. No regulated quantities of hazardous wastes may be collected and transported except in accordance with the provisions of the Georgia Hazardous Waste Management Act, O.C.G.A. [12-8-60](#) *et seq.*
5. Local ordinances: it is the responsibility of the collector to comply with all local rules, regulations, and ordinances pertaining to operation of solid waste collection systems.
6. All wastewater from cleaning of vehicles must be handled in a manner which meets all applicable environmental laws and regulations.
7. All collected solid waste must be deposited only in a permitted solid waste handling facility authorized to receive the applicable waste types.

(b) Transfer Station operations:

1. Solid Waste shall be confined to the interior of transfer station buildings, and not allowed to scatter to the outside. Waste shall not be allowed to accumulate, and floors shall be kept clean and well drained.
2. Sewage solids shall be excluded from transfer stations.
3. Dust, odors and similar conditions resulting from transfer operations shall be controlled at all times.
4. Rodents, insects and other such pests shall be controlled.
5. Any contaminated runoff from washwater shall be discharged to a wastewater treatment system and, before final release, shall be treated in a manner approved by the Division.
6. Hazardous Waste: no person owning or operating a transfer station shall cause, suffer, allow, or permit the handling of regulated quantities of hazardous waste.

7. Liquid wastes restricted from landfill disposal by Rule [391-3-4-.04\(9\)](#) shall be excluded from transfer stations. Transfer stations in existence on August 1, 2004 and in compliance with all other regulations applicable to permit by rule transfer stations may continue to handle such liquid wastes until a solid waste processing facility permit is issued or August 1, 2006, whichever occurs first.
- (c) Inert Waste Landfill Operations: Inert Waste Landfills in existence on the effective date of this Rule and in compliance with all other regulations applicable to permit by rule for inert waste landfill operations may continue to operate under the conditions below until a solid waste handling permit is issued or December 1, 2014, whichever occurs first. Provided a complete permit application is submitted by June 1, 2014, the Director may extend the deadline for permitting until a final decision on permit issuance or denial is made. If the requirements for a permit cannot be met by December 1, 2014, or other deadline established by the Director, the operator must cease receipt of waste on that date and complete closure by June 1, 2015, or six months from the Director's denial of the requested permit application. Any inert waste landfill which, as of January 1, 2014, has been certified by a professional engineer registered in accordance with Chapter 15 of Title 43 as being in full compliance with all permit by rule requirements established in the rules and regulations of the division as they existed on January 1, 2012, may continue to operate under such permit by rule requirements. Except as provided in sub-paragraph (f), no person may begin operating a new inert waste landfill after the effective date of this rule without first obtaining a site specific solid waste handling permit for an inert waste landfill.
1. Only waste that will not or is not likely to produce leachate of environmental concern may be disposed of in an inert waste landfill. Only earth and earth-like products, concrete, cured asphalt, rock, bricks, yard trimmings, and land clearing debris such as stumps, limbs and leaves, are acceptable for disposal in an inert waste landfill.
 2. No portion of waste disposal area shall be located within one hundred (100) linear feet of any property line or enclosed structure.
 3. Materials placed in inert waste landfills shall be spread in layers and compacted to the least practical volume; and, a uniform compacted layer of clean earth cover no less than one (1) foot in depth shall be placed over all exposed inert waste material at least monthly.
 4. The inert waste landfill site shall be graded and drained to minimize runoff onto the landfill surface, to prevent erosion and to drain water from the surface of the landfill.

5. Access to inert waste landfills shall be limited to authorized entrances which shall be closed when the site is not in operation.
6. Suitable means shall be provided to prevent and control fires. Stockpiled soil is considered to be the most satisfactory fire fighting material.
7. A uniform compacted layer of final cover not less than two (2) feet in depth and a vegetative cover shall be placed over the final lift not later than one month following final placement of inert waste within that lift.
8. Notice of final closure must be provided to the Director within 30 days of receiving the final load of waste. Any site not receiving waste for in excess of 180 days shall be deemed abandoned and in violation of these Rules unless properly closed. Notice of closure must include the date of final waste receipt and an accurate legal description of the boundaries of the landfill.
9. All deeds for real property which have been used for landfilling shall include notice of the landfill operations, the date the landfill operation commenced and terminated, an accurate legal description of the actual location of the landfill, and a description of the type of solid wastes which have been deposited in the landfill. Concurrent with the submission of notice of final closure to the Director, the owner or operator must submit to the Director confirmation that the information required in this section has been noticed on the property deed.
10. All wastes received at the landfill must be measured and reported as required by Rule [391-3-4-.17](#).
11. All other applicable federal, state, and local laws, rules, and ordinances, including erosion and sediment control, and any applicable federal wetlands permits, must be fully complied with prior to commencement of landfilling operations.

(d) On-site Waste Processing and Thermal Treatment Operations:

1. For purposes of this Rule, "On-site Processing or Thermal Treatment Facility" shall mean a facility that processes or thermally treats, no less than 75 percent, by weight, solid waste generated at the permit-by-Rule facility location or facilities owned by the same person who owns the property containing the permit-by-Rule facility. On-site facilities may include fixed or mobile facilities either owned or under contract with the solid waste generator of 75 percent of the solid waste so long as the solid waste generator maintains legal control of the solid waste while at the permit-by-Rule facility.

2. Capacity: the on-site waste processing and thermal treatment technology facility shall be adequate in size and capacity to manage the projected volume of solid waste and residue generated.
3. Residue: on-site thermal treatment technology facilities shall be designed in such a manner to expedite the routine sampling of bottom and fly ash. Temperature and combustion time shall be sufficient to produce a satisfactory residue, essentially free of odors and unstable organic matter, and such residue shall be promptly deposited in a municipal solid waste landfill having a liner and leachate collection system and operated and maintained as provided herein, handled in such other manner as may be approved by the Division, or if shown by testing to be hazardous, handled in accordance with the provisions of the Georgia Hazardous Waste Management Act, O.C.G.A. [12-8-60](#), *et seq.* Residue from thermal treatment technology facilities that burn only biomedical wastes may be deposited in any permitted municipal solid waste landfill. Residue from the burning of any wastes, other than biomedical wastes, must, if landfilled, be placed in landfills having liners and leachate collection systems unless the Division grants an exemption.
4. Storage: the areas for storing wastes prior to processing must be clearly defined and the maximum capacity specified. No waste may be stored in excess of the designated capacity.
5. Disposal of waste: treated waste from on-site processing facilities and any material not sold or used, reused, or recycled must be disposed in a permitted disposal facility.
6. Air quality: on-site processing and thermal treatment technology facilities shall be designed and operated in such manner as to meet any air quality standards of the Division.
7. Wastewater: on-site processing and thermal treatment technology facilities shall be designed so that any wastewater generated will be discharged to a wastewater treatment system and, before final release, will be treated in a manner approved by the Division.
8. Fire protection: on-site processing and thermal treatment technology facility designs shall provide for fire control equipment placed near the storage and charging area, and elsewhere as needed.
9. Supervision: operation and management of on-site thermal treatment technology facilities shall be under the direct supervision and control of an operator who is present at all times of operation and is qualified in thermal treatment technology management by training, education or experience.

Operation and management of on-site processing facilities shall be under the supervision and control of a responsible individual properly trained in the operation of such facilities at all times during operation.

10. Prohibited waste: no lead acid batteries, radioactive waste, or regulated quantities of hazardous waste or polychlorinated biphenyls may be accepted. The operator must have a plan for excluding these wastes.
11. Cleanliness and sanitation: on-site processing and thermal treatment technology facilities shall be maintained in a clean and sanitary condition. Solid waste shall be confined to the designated storage area.
12. Record keeping: accurate written, daily records by actual weight or by the methods approved in accordance with O.C.G.A. [12-8-31.1\(g\)](#) shall be kept of all waste processed or disposed at the on-site processing and thermal treatment technology facility. Such records shall include the source of the waste, by facility name and location. Copies of such records shall be maintained for a period of at least three (3) years and shall be submitted to the Division quarterly on such forms as prescribed by the Division.
13. Local ordinances: it is the responsibility of the operator of on-site processing and thermal treatment technology facilities to comply with all local rules, regulations, and ordinances pertaining to operation of these facilities and all other applicable federal and state laws and rules.
14. All facilities handling biomedical waste must, in addition to this Rule, meet any requirements of Rule [391-3-4.15](#).

(e) Wastewater Treatment or Pretreatment Plant Sludge Disposal:

1. All wastewater treatment or pretreatment plant sludges that are not beneficially used, reused, or recycled in accordance with Rule [391-3-4.04](#) or that are not disposed of by landfilling in accordance with Rule [391-3-4.07](#), must be handled in accordance with an approval or a permit issued by the Division under authority of the Georgia Water Quality Control Act, O.C.G.A. [12-5-20](#), *et seq.* or the Georgia Air Quality Act, O.C.G.A. [12-9-1](#) *et seq.*

(f) Yard Trimmings Waste Landfill Operations: Landfill Operations with 5 acres or less of waste disposal area and located in counties with a population less than 65,000 people and accepting exclusively yard trimmings as defined by these Rules can be permitted under the following conditions:

1. Only yard trimmings are acceptable for disposal in a yard trimmings waste landfill. Vegetative matter from land clearing operations shall not be disposed in a yard trimmings waste landfill.
2. No portion of the waste disposal area shall be located within two hundred (200) linear feet of any property line or enclosed structure.
3. Materials placed in yard trimmings waste landfills shall be spread in layers and compacted to the least practical volume; and, a uniform compacted layer of clean earth cover no less than one (1) foot in depth shall be placed over all exposed yard trimmings waste material at least monthly.
4. The yard trimmings waste landfill site shall be graded and drained to minimize runoff onto the landfill surface, to prevent erosion and to drain water from the surface of the landfill.
5. Access to yard trimmings waste landfills shall be limited to authorized entrances which shall be closed when the site is not in operation.
6. Suitable means shall be provided to prevent and control fires. Stockpiled soil is considered to be the most satisfactory firefighting material.
7. A uniform compacted layer of final cover not less than two (2) feet in depth and a vegetative cover shall be placed over the final lift not later than one month following final placement of yard trimmings waste within that lift.
8. Notice of final closure must be provided to the Director within 30 days of receiving the final load of waste. Any site not receiving waste for in excess of 180 days shall be deemed abandoned and in violation of these Rules unless properly closed. Notice of closure must include the date of final waste receipt and an accurate legal description of the boundaries of the landfill.
9. All deeds for real property which have been used for landfilling shall include notice of the landfill operations, the date the landfill operation commenced and terminated, an accurate legal description of the actual location of the landfill, and a description of the type of solid wastes which have been deposited in the landfill. Concurrent with the submission of notice of final closure to the Director, the owner or operator must submit to the Director confirmation that the information required in this section has been noticed on the property deed.
10. All wastes received at the landfill must be measured and reported as required by Rule [391-3-4-.17](#).

11. All other applicable federal, state, and local laws, rules, and ordinances, including erosion and sediment control, and any applicable federal wetlands permits, must be fully complied with prior to commencement of landfilling operations.

Rule 391-3-4-.07. Landfill Design and Operations.

- (1) All landfills must be designed by a professional engineer registered to practice in Georgia and designed in accordance with the following criteria:
 - (a) Site limitations: the landfill must be designed in such a manner as to comply with the specific site limitations issued by the Division as a part of a site approval.
 - (b) Buffers: Facilities must provide a minimum 200 foot buffer between the waste disposal boundary and the property line and a minimum 500 foot buffer between the waste disposal boundary and any occupied dwelling and the dwelling's operational private, domestic water supply well in existence of the date of permit application. The 500-foot buffer may be reduced if the current owner of the dwelling provides a written waiver consenting to the waste disposal boundary being closer than 500 feet. The waste disposal boundary is defined as the limit of all waste disposal areas, appurtenances, and ancillary activities (including but not limited to internal access roads and drainage control devices). No land disturbing activities are to take place in these buffers, except for construction of groundwater monitoring wells and access roads for direct ingress or egress, unless otherwise specified in a facility design and operation plan or corrective action plan approved by the Division.
 - (c) Site survey control shall be provided to ensure the operation will be on permitted lands. Survey control will be accomplished through use of permanent, accessible

benchmarks, survey control stakes, and/or boundary markers which designate and/or delineate all permitted areas. Survey control shall be as indicated on the design and operational plan. Where necessary for construction or operational purposes, vertical as well as horizontal survey control will be established and maintained to delineate fill boundaries, buffers, and property boundaries.

- (d) Liners and Leachate Collection Systems: new MSWLF units and lateral expansions shall be constructed with liners and leachate collection systems. The liner and leachate collection system must ensure that the concentration values listed in Table 1 will not be exceeded in the uppermost aquifer at the relevant point of compliance. The liner and leachate collection system must be designed and installed under the supervision of a professional engineer registered to practice in Georgia who shall certify the installation.

TABLE 1

Chemical	MCL (mg/l)
Arsenic	0.05
Barium	1.0
Benzene	0.005
Cadmium	.01
Carbon tetrachloride	0.005
Chromium (hexavalent)	0.05
2, 4 - Dichlorophenoxy acetic acid	0.1
1, 4 - Dichlorobenzene	0.075
1, 2 - Dichloroethane	0.005
1, 1 - Dichloroethylene	0.007
Endrin	0.0002
Fluoride	4
Lindane	0.004
Lead	0.05
Mercury	0.002
Methoxychlor	0.1

Nitrate	10
Selenium	0.01
Silver	0.05
Toxaphene	0.005
1, 1, 1- Trichloromethane	0.2
Trichloroethylene	0.005
2, 4, 5- Trichlorophenoxy acetic acid	0.01
Vinyl Chloride	0.002

1. If the MSWLF is located in an area of higher pollution susceptibility, as defined by Hydrologic Atlas #20, A Pollution Susceptibility Map of Georgia, or in a significant ground water recharge area as designated by Hydrologic Atlas #18, the liner and leachate collection system must, at a minimum, be designed with:
 - a. a composite liner, as defined in paragraph c. of this section and a leachate collection system that is designed and constructed to maintain less than a 30-cm depth of leachate over the liner.
 - b. at least a five foot separation between the liner system and the seasonal high ground water elevation.
 - c. For purposes of this section, "composite liner" means a system consisting of two components; the upper component must consist of a minimum 30-mil flexible membrane liner (FML), and the lower component must consist of at least a two-foot layer of compacted soil with a hydraulic conductivity of no more than 1×10^{-7} cm/sec. FML components consisting of High Density Polyethylene (HDPE) shall be at least 60- mil thick. The FML component must be installed in direct and uniform contact with the compacted soil component.

2. The relevant point of compliance shall be no more than 150 meters from the waste management unit boundary and shall be located on land owned by the owner of the MSWLF unit. In determining the relevant point of compliance, the Division shall consider at least the following factors:
 - a. The hydrogeologic characteristics of the facility and surrounding land;
 - b. The volume and physical and chemical characteristics of the leachate;
 - c. The quantity, quality, and direction, of flow of ground water;

- d. The proximity and withdrawal rate of the ground-water users;
 - e. The availability of alternative drinking water supplies;
 - f. The existing quality of the ground water, including other sources of contamination and their cumulative impacts on the ground water and whether groundwater is currently used or reasonably expected to be used for drinking water;
 - g. Public health, safety, and welfare effects; and
 - h. Practicable capability of the owner or operator.
3. For MSWLF units not located in significant ground water recharge areas or areas of higher pollution susceptibility, liners and leachate collection systems may meet a design standard other than that specified in subparagraph (1)(d) 1. of this Rule, so long as such design ensures that the concentration values listed in Table 1 of this Rule will not be exceeded in the uppermost aquifer at the relevant point of compliance. The factors listed in subparagraph 2. above for determining the relevant point of compliance, shall also be used in determining the suitability of the liner and leachate collection system design.
- (e) Erosion and Sedimentation Control: all surface runoff from disturbed areas must be controlled by the use of appropriate erosion and sedimentation control measures or devices. Sediment basins must be designed to handle both the hydraulic loading for the 25 year, 24-hour storm and the sediment loading from the drainage basin for the life of the site. Runoff from the facility must be designed for flow through permanent sediment control impoundments which are designed to assure discharges meeting the requirements of O.C.G.A. [12-7-6](#).
 - (f) Vegetation: the plan must call for the vegetation of any disturbed area that will remain exposed for more than three (3) months. Vegetation of final cover must take place within two (2) weeks after final cover placement.
 - (g) Sequence of Filling: the plan must define a sequence of filling showing a detailed progression of filling the entire site that minimizes any problems with drainage and all weather access roads to the working face.
 - (h) Limited Access: a gate or other barrier shall be maintained at potential vehicular access points to block unauthorized access to the site when an operator is not on duty. A fence or other suitable barrier must be provided around the site, including impoundments, leachate collection and treatment systems and gas venting and processing facilities, sufficient to prevent unauthorized access.

- (i) Final Grading: the grade of final slopes shall be designed to:
 - 1. insure permanent slope stability;
 - 2. control erosion due to rapid water velocity and other factors;
 - 3. allow compaction, seeding, and vegetation of cover material placed on the slopes;
 - 4. minimize percolation of precipitation into final cover and provide diversion of surface runoff from disposal area; and
 - 5. meet the final closure requirements of Rule [391-3-4-.11](#);
 - 6. the grade of the final surface of the facility may not be less than 3 percent nor greater than 33 percent.

- (j) Access Roads: access roads shall be designed to provide for the orderly egress and ingress of vehicular traffic when the facility is in operation, including during inclement weather.

- (k) Fire Protection: the disposal site must be designed to prevent and minimize the potential for fire or explosion. A minimum supply of one day of cover material must be maintained within 200 feet of the working face for fire fighting purpose, unless other acceptable means have been provided and approved by the Director.

- (l) Ground water and Surface water Monitoring Plan: the design must provide for a groundwater monitoring plan in accordance with the requirements for Groundwater Monitoring and Corrective Action as provided in Rule [391-3-4-.14](#). A surface water monitoring plan which will determine the impact of the facility on all adjacent surface waters must also be included.

- (m) Closure Criteria: the design must provide for proper closure in accordance with Rule [391-3-4-.11](#).

- (n) Post-Closure Care: the design must provide for Post-closure care in accordance with Rule [391-3-4-.12](#).

- (o) Financial Responsibility: the design must provide for financial responsibility in accordance with Rule [391-3-4-.13](#).

- (2) Construction Certification: upon receipt of a final and effective solid waste handling permit, construction may commence in accordance with the approved design and operational plan and permit conditions. Prior to receipt of solid waste, the Division must be provided with written certification by a professional engineer licensed to practice in Georgia, that the facility has been constructed in accordance with the approved permit.

Unless notified otherwise by the Division, within 15 days of receipt by the Division of the written certification, the facility owner or operator may commence disposal of solid waste. This process shall be repeated for each subsequent major construction phase, including but not limited to, new cells, additional monitoring wells, sediment ponds, leachate treatment systems, modifications adding a new solid waste handling process, and application of final cover.

- (3) Any person engaged in the operation of landfills shall comply with the following performance requirements:
- (a) Air Criteria.
 - 1. Owners or operators of all landfills must ensure that the units not violate any applicable requirements developed under a State Implementation Plan (SIP) approved or promulgated by the U.S. Environmental Protection Agency pursuant to Section 110 of the Clean Air Act, as amended.
 - 2. Open burning of solid waste, except for the infrequent burning of agricultural wastes, silvicultural wastes, land clearing debris, diseased trees, or debris from emergency cleanup operations, is prohibited at all landfills.
 - (b) Unloading: solid waste unloading shall be restricted to the working face of the operation in such manner that waste may be easily incorporated into the landfill with available equipment.
 - (c) Procedures for excluding receipt of prohibited wastes:
 - 1. Not later than October 1, 1993, owners or operators of all landfills must implement a program at the facility for detecting and preventing the disposal of regulated quantities of hazardous wastes as defined in the Rules for Hazardous Waste Management, Chapter 391-3-4-11, polychlorinated biphenyls (PCB) wastes as defined in 40 CFR, Part 761, and other wastes prohibited by Rule [391-3-4-.04](#), or the facility's permit. This program must include, at a minimum:
 - a. random inspections of incoming loads unless the owner or operator takes other steps to ensure that incoming loads do not contain prohibited wastes:
 - b. records of any inspections:
 - c. training of facility personnel to recognize prohibited wastes; and d. notification of the Director if a prohibited waste is discovered at the facility.
 - 2. The procedures must be made a part of the operating record.

- (d) Spreading and Compaction: solid waste shall be spread in uniform layers and compacted to its smallest practical volume before covering with earth.
- (e) Daily Cover:
 - 1. Except as provided in paragraph 2. of this section, the owner or operator of all MSWLF units must cover disposed solid waste with six inches of earthen material at the end of each operating day, or at more frequent intervals if necessary, to control disease vectors, fires, odors, blowing litter, and scavenging.
 - 2. Alternative materials (such as foams or tarps) of an alternative thickness (other than at least six inches of earthen material) may be approved by the Director if the owner or operator demonstrates that the alternative material and thickness control disease vectors, fires, odors, blowing litter, and scavenging without presenting a threat to human health and the environment.
- (f) Disease Vector Control.
 - 1. Owners or operators of all landfills must prevent or control on-site populations of disease vectors using techniques appropriate for the protection of human health and environment.
 - 2. For purposes of this Rule, "disease vectors" means any rodents, flies, mosquitoes, or other animals, including insects, capable of transmitting disease to humans.
- (g) Intermediate Cover: a uniform compacted layer of clean earth cover not less than one (1) foot in depth shall be placed over each portion of any intermediate lift following completion of that lift.
- (h) Explosive Gases Control.
 - 1. Owners or operators of all landfills that are required to do methane monitoring under their permits must ensure that:
 - a. The concentration of methane gas generated by the facility does not exceed 25 percent of the lower explosive limit for methane in facility structures (excluding gas control or recovery system components); and
 - b. The concentration of methane gas does not exceed the lower explosive limit for methane at the facility property boundary.

2. Owners or operators of all landfills that are required to do methane monitoring must implement a routine methane monitoring program to ensure that the standards of this section are met. Copies of the monitoring results must be provided to the Division within 14 days of completion of the event. Results must be submitted on forms provided by the Division.
 - a. The type and frequency of monitoring must be determined based on the following factors:
 - (i) Soil conditions;
 - (ii) The hydrogeologic conditions surrounding the facility;
 - (iii) The hydraulic conditions surrounding the facility;
 - (iv) The location of facility structures and property boundaries.
 - b. The minimum frequency of monitoring must be quarterly.
3. If methane gas levels exceeding the limits specified in this section are detected, the owner or operator must:
 - a. Immediately take all necessary steps to ensure protection of human health and notify the Director;
 - b. Within seven days of detection, place in the operating record the methane gas levels detected and a description of the steps taken to protect human health; and
 - c. Within 60 days of detection, implement a remediation plan for the methane gas releases, place a copy of the plan in the operating record, and notify the Director that the plan has been implemented. The plan shall describe the nature and extent of the problem and the proposed remedy.
4. For purposes of this section, lower explosive limit means the lowest percent by volume of a mixture of explosive gases in air that will propagate a flame at 25°C and atmospheric pressure.
 - (i) Run-on/Run-off Control.
 1. Owners or operators of all landfills must design, construct, and maintain:
 - a. A run-on control system to prevent flow onto the active portion of the landfill during the peak discharge from a 25-year storm;

- b. A run-off control system from the active portion of the landfill to collect and control at least the water volume resulting from a 24-hour, 25-year storm.
 - 2. Run-off from the active portion of the landfill unit must be handled in accordance with section 391-3-4-.07(1)(e), Erosion and Sedimentation Control of this Rule.
- (j) Surface water requirements; All landfill units shall not:
- 1. Cause a discharge of pollutants into waters of the state or the United States, including wetlands, that violates any requirements of the Clean Water Act, including, but not limited to, the National Pollutant Discharge Elimination system (NPDES) requirements pursuant to section 402:
 - 2. Cause the discharge of a nonpoint source of pollution to waters of the state or the United States, including wetlands, that violates any requirement of an area-wide or State-wide water quality management plan that has been approved under section 208 or 319 of the Clean Water Act, as amended.
- (k) Continuity of Operation: all-weather access roads shall be provided to the working face of the disposal operation and provisions shall be made for prompt equipment repair or replacement when needed.
- (l) Environmental Protection: the landfill shall be operated in such manner as to prevent air, land, or water pollution, and public health hazards.
- (m) Prohibited Waste: no liquids, except as allowed in subparagraph (9) of Rule [391-3-4-.04](#) lead acid batteries, radioactive waste, or regulated quantities of hazardous waste may be accepted. The operator must have a plan for excluding these wastes.
- (n) Supervision: the disposal facility shall be under the supervision of an operator who is properly trained in the operation of landfills and the implementation of Design and Operational Plans and who, if the facility is a municipal solid waste disposal facility, is certified in accordance with O.C.G.A. [12-8-24.1](#) and these Rules.
- (o) Limited Access: access to landfills shall be limited to authorized entrances which shall be closed when the site is not in operation. Owners and operators of all landfills must control public access and prevent unauthorized vehicular traffic and illegal dumping of wastes by using artificial barriers, natural barriers, or both, as appropriate to protect human health and the environment.

- (p) Litter Control: scattering of wastes by wind shall be controlled by fencing or other barriers and the entire site shall be inspected daily and all litter removed.
- (q) Fire Protection: suitable measures to control fires that may start shall be provided. Stockpiled soil is considered to be the most satisfactory fire fighting material.
- (r) Erosion and Sedimentation Control: all erosion and sedimentation control measures or facilities, whether temporary or permanent, shall be continuously maintained by the operator so as to be effective. Runoff from the facility must be directed to permanent sediment control impoundments which are designed to assure discharges meeting the requirements of O.C.G.A. [12-7-6](#). Erosion and sedimentation control measures and facilities will be employed prior to and concurrent with clearing, grading, overburden removal, access or other land disturbing activities for preparation of the site for landfilling. Immediate measures must be implemented to establish vegetation on disturbed exposed soil which will not be a part of the waste disposal area or which will remain exposed for more than three (3) months.
- (s) Information Posted: signs shall be posted at the entrance to landfills indicating the days and hours of operation.
- (t) Prohibited Acts: the landfill shall be operated and maintained to prevent open burning, scavenging, and the open dumping of wastes.
- (u) Recordkeeping Requirements.
 - 1. Not later than October 1, 1993, the owner or operator of a MSWLF unit must record and retain near the facility in an operating record or in an alternative location approved by the Director the following information as it becomes available:
 - a. Any location restriction demonstration required under Rule [391-3-4-.05](#);
 - b. Inspection records, training procedures, and notification procedures required in subparagraph (c) of this Rule;
 - c. Gas monitoring results from monitoring and any remediation plans required by paragraph (h) of this section;
 - d. Any MSWLF unit design documentation for placement of leachate or gas condensate in a MSWLF unit as required under paragraph (9) of Rule [391-3-4-.04](#);
 - e. Any demonstration, certification, finding, monitoring, testing, or analytical data required by Rule [391-3-4-.14](#);

- f. Closure and post-closure care plans and any monitoring, testing, or analytical data as required by Rule [391-3-4-.11](#) and Rule [391-3-4-.12](#); and
 - g. Any cost estimates and financial assurance documentation required by Rule [391-3-4-.13](#).
 - 2. The owner/operator must notify the Director when the documents from paragraph 1. of this section have been placed or added to the operating record, and all information contained in the operating record must be furnished on request to the Director or be made available at all reasonable times for inspection by the Director.
 - 3. The Director can set alternative schedules for recordkeeping and notification requirements as specified in paragraphs 1. and 2. of this section, except for the notification requirements in Rule [391-3-4-.05\(1\)\(c\)](#), Airport Safety, and Rule [391-3-4-.14\(30\)\(ac\)3](#), Assessment Monitoring.
- (v) Groundwater, Underdrain Discharge, and Surface Water Monitoring: all water monitoring points shall be sampled in accordance with the approved plans or with any directive issues by the Division. Analytical results must be submitted to the Division in accordance with the approved time schedules. It shall be the responsibility of the facility owner or operator to promptly report any exceedance of established standards. All monitoring reports must be accompanied by a certified statement by a qualified groundwater scientist, for those constituents which have established standards, that established standards have been complied with or certifying noncompliance. Underdrain discharge shall comply with surface water monitoring standards.
- (w) Survey Control: survey control shall be provided by the owner and/or operator as indicated on the approved design and operational plan. Site survey control shall be provided to ensure the operation will be on permitted lands. Survey control will be accomplished through use of permanent, accessible benchmarks, survey control stakes, and/or boundary markers which designate and/or delineate all permitted areas. Where necessary for construction or operational purposes, vertical as well as horizontal survey control will be established and maintained to delineate fill boundaries, buffers, structural designs, and property boundaries.
- (x) Buffers: Buffers are evaluated and approved based on the design criteria in effect at the time of the permit issuance. Any future expansion of a landfill unit will be evaluated in accordance with applicable design criteria at the time of landfill unit expansion submittal. Buffers reflected in an approved permit must be maintained as stated in the facility's approved Design and Operational Plan.

- (y) Additional Stipulations: notwithstanding the above, additional stipulations for owning or operating a landfill may be imposed by the Director as deemed necessary to carry out the purposes of O.C.G.A. [12-8-20](#), *et seq.*

(4) Other Disposal Operations.

- (a) Industrial Waste Disposal Facilities: industrial waste disposal facilities permitted to receive only a single type industrial waste (monofill) or receive only a single industry's waste may be given a variance by the Director from installing liners and leachate collection systems, applying daily cover, installing ground water and surface water monitoring systems and monitoring for methane gas if the applicant can demonstrate to the satisfaction of the Director that the waste to be disposed of would not cause odors or be attractive to disease vectors or birds or generate methane gas. Unless a variance is granted, the applicant must demonstrate compliance with all applicable provisions of this Rule. Disposal facilities accepting wastes from more than one industrial source, unless the facility is a monofill, must meet all standards applicable to municipal solid waste landfills in Chapter 391-3-4. CCR Units are exempt from the requirements of this Rule and must meet requirements in Rule [391-3-4.10](#).
- (b) Construction/Demolition Facilities: disposal facilities permitted to receive only construction and demolition wastes, unless such waste includes household waste, may be given a variance by the Director from installing liners and leachate collection systems and applying daily cover if the applicant can demonstrate to the satisfaction of the Director that the waste to be disposed of would not cause odors or be attractive to disease vectors or birds. Unless a variance is granted, the applicant must demonstrate compliance with all applicable provisions of this Rule. All other provisions of Chapter 391-3-4 applicable to municipal solid waste landfills must be met.
- (c) Inert Waste Landfill Facilities: disposal facilities are permitted to receive only waste that will not or is not likely to produce leachate of environmental concern. Only earth and earth-like products, concrete, cured asphalt, rock, bricks, yard trimmings, and land clearing debris such as stumps, limbs and leaves, are acceptable for disposal in an inert waste landfill. Inert waste landfill facilities must be designed by a professional engineer registered to practice in Georgia to comply with the following standards:
 1. Buffers: No portion of waste disposal area shall be located within one hundred (100) linear feet of any property line or enclosed structure.
 2. Survey Control: site survey control shall be provided to ensure the operation will be on permitted lands. Survey control will be accomplished through use of permanent, accessible benchmarks, survey control stakes, and/or boundary markers which designate and/or delineate all permitted areas. Survey control shall be as indicated on the design and operational plan.

Where necessary for construction or operational purposes, vertical as well as horizontal survey control will be established and maintained to delineate fill boundaries, buffers, and property boundaries.

3. Siting: waste shall not be located in wetlands or floodplains, and waste shall not be placed within five feet of the permanent water table. A demonstration must be included in the design and operational plan on how these requirements will be met.
4. Explosive Gases Control: the plan must implement a routine methane monitoring program to ensure that the concentration of methane gas generated by the facility does not exceed 25 percent of the lower explosive limit for methane for on-site enclosed structures and does not exceed the lower explosive limit for methane at the facility property boundary. The type of monitoring must be determined based on the following factors: soil conditions; the hydrogeologic conditions surrounding the facility; the hydraulic conditions surrounding the facility; and the location of facility structures and property boundaries. The minimum frequency of monitoring must be quarterly. If methane gas levels exceeding the limits specified in this section are detected, the owner or operator must: immediately take all necessary steps to ensure protection of human health and notify the Director; within seven days of detection, place in the operating record the methane gas levels detected and a description of the steps taken to protect human health; and within 60 days of detection, implement a remediation plan for the methane gas releases, place a copy of the plan in the operating record, and notify the Director that the plan has been implemented. The plan shall describe the nature and extent of the problem and the proposed remedy. If a facility can demonstrate that no organic component of the inert waste stream has been accepted or will be accepted in the future, a variance from the explosive gases control requirements may be requested for review with the application for inert waste landfill permit request.
5. Sequence of Filling: the plan must define a sequence of filling showing a detailed progression of filling the entire site that minimizes any problems with drainage and all weather access roads to the working face.
6. Spreading/Compaction/Monthly Cover: materials placed in inert waste landfills shall be spread in layers and compacted to the least practical volume; and, a uniform compacted layer of clean earth cover no less than one (1) foot in depth shall be placed over all exposed inert waste material at least monthly.
7. Erosion and Sedimentation Control: all surface runoff from disturbed areas must be controlled by use of appropriate erosion and sedimentation control

measures or devices. Best management practices (BMPs) from the Manual for Erosion and Sediment Control in Georgia should be utilized.

8. Vegetation: the plan must call for the vegetation of any disturbed area that will remain exposed for more than three (3) months. Vegetation of final cover must take place within two (2) weeks after final cover placement.
9. Fire Protection: suitable means shall be provided to prevent and control fires. Stockpiled soil is considered to be the most satisfactory fire fighting material. A minimum of one month of cover material must be maintained within 200 feet of the working face for fire fighting purpose, unless other acceptable means have been provided and approved by the Director.
10. Limited Access: access to inert waste landfills shall be limited to authorized entrances which shall be closed when the site is not in operation.
11. Final Grading: the inert waste landfill site shall be graded and drained to minimize runoff onto the landfill surface, to prevent erosion and to drain water from the surface of the landfill. The grade of the final surface of the facility may not be less than 3 percent nor greater than 33 percent.
12. Final Cover: a uniform compacted layer of final cover not less than two (2) feet in depth and a vegetative cover shall be placed over the final lift not later than one month following final placement of inert waste within that lift.
13. Final Closure: notice of final closure must be provided to the Director within 30 days of receiving the final load of waste. Any site not receiving waste for in excess of 180 days shall be deemed abandoned and in violation of these Rules unless properly closed. Notice of closure must include the date of final waste receipt and an accurate legal description of the boundaries of the landfill.
14. Deed Notice: all deeds for real property which have been used for landfilling shall include notice of the landfill operations, the date the landfill operation commenced and terminated, an accurate legal description of the actual location of the landfill, and a description of the type of solid wastes which have been deposited in the landfill. Concurrent with the submission of notice of final closure to the Director, the owner or operator must submit to the Director confirmation that the information required in this section has been noticed on the property deed.
15. Reporting: all wastes received at the landfill must be measured and reported as required by Rule [391-3-4-.17](#).

16. Post-Closure Care: the design must provide for post-closure care for a minimum of thirty (30) years. If a demonstration can be made that the site is no longer producing methane, the post closure care period may be reduced, but in no circumstance shall it be reduced to less than 5 years.
 17. Financial Responsibility: the design must provide for financial responsibility in accordance with Rule [391-3-4-13](#).
 18. Other Laws: compliance with all other applicable federal, state, and local laws, rules, and ordinances, including local zoning, land use ordinances, and any applicable federal wetlands permits, must be demonstrated in the application for solid waste handling.
- (d) Construction and operation of a solid waste handling facility for which specific rules have not been developed is prohibited unless same are consistent with the policies and intent of O.C.G.A. [12-8-20](#), et. seq., and are permitted by the Director.
- (5) CCR Management Plan. Owners or operators of MSWLs and Commercial Industrial Landfills must incorporate a CCR management plan into the facility's Design and Operational Plan before the initial receipt of CCR. MSWLs and Commercial Industrial Landfills that accepted CCR before the effective date of the Rule and will continue to accept CCR after the effective date must incorporate a CCR management plan into the facility's Design and Operational Plan by minor modification 180 days from the effective date of the Rule. The owner or operator shall notify the local governing authorities of any city and county in which the landfill is located upon the submittal of the CCR Management Plan by EPD.
- (6) High Moisture Content Waste Management Plan. Owners or operators of MSWLs and Commercial Industrial Landfills must incorporate a High Moisture Content Waste (HMCW) management plan into the facility's Design and Operational Plan by major modification before the initial receipt of HMCW if planning to accept greater than 5% HMCW by weight. MSWLs and Commercial Industrial Landfills that accepted High Moisture Content Waste before the effective date of the Rule and will continue to accept HMCW greater than 5% by weight after the effective date must incorporate a HMCW management plan into the facility's Design and Operational Plan by minor modification as part of the facility's permit review required by [391-3-4-02](#).

Rule 391-3-4-.08. Solid Waste Thermal Treatment Operations.

- (1) Except as otherwise noted in (2) below, any person engaged in thermal treatment technology of solid waste, in addition to the requirements of O.C.G.A. [12-8-24\(i\)](#) relating to Federal New Source Performance Standards, shall comply with the following requirements:
 - (a) Design Criteria: a design and operational plan prepared as a part of the permit application must be prepared by a professional engineer registered in Georgia and must include, but is not limited to, the following criteria:
 1. Capacity: the thermal treatment technology facility shall be adequate in size and capacity to manage the projected incoming solid waste and residue volumes.
 1. Storage Time: the facility shall provide for a minimum storage capacity of not less than three (3) times the daily capacity of the thermal treatment technology equipment. No waste shall be stored in excess of the permitted capacity.
 2. Types of Waste: the application must include the sources, types and weight or volumes of solid waste to be processed, including data on the moisture content of the waste, and information concerning special environmental pollution or handling problems that may be created by the solid waste.
 3. Residue Analysis: the facility shall be designed in such a manner as to provide for such devices to expedite the routine sampling of bottom and fly ash.
 4. Air Quality: the facility shall be designed in such manner as to meet any air quality standards of the Division.
 5. Wastewater: the facility shall be designed so that any wastewater generated will be discharged to a wastewater system and, before final release, will be treated in a manner approved by the Division.

6. Fire Protection: facility design shall provide for fire control equipment placed near the storage and charging area, and elsewhere as needed, and additional fire fighting equipment shall be made available for emergencies.
 7. Residue Acceptability: the facility shall provide for sufficient temperature and combustion times to produce a residue essentially free of odors and unstable organic matter.
- (b) Construction Certification: upon receipt of a final and effective solid waste handling permit, construction may commence in accordance with the approved design and operational plan and permit conditions. Prior to the receipt of solid waste, the Division must be provided with written certification, by a professional engineer licensed to practice in Georgia, that the facility has been constructed in accordance with the approved permit. Unless notified otherwise by the Division within 15 days of receipt by the Division of the written certification, the facility owner or operator may commence disposal of solid waste.
- (c) All persons owning or operating thermal treatment technology facilities shall comply with the following performance requirements:
1. Supervision: operation and management of thermal treatment technology facilities shall be under the direct supervision and control of an operator who is present at all times of operation and is qualified in thermal treatment technology management by training, education or experience and who, after July 1, 1992, is certified in accordance with O.C.G.A. [12-8-24.1](#) and these Rules.
 2. Residue: temperature and combustion time shall be sufficient to produce a satisfactory residue, essentially free of odors and unstable organic matter, and such residue shall be promptly deposited in a municipal solid waste landfill having a liner and leachate collection system and operated and maintained as provided herein, handled in such other manner as may be approved by the Division, or if shown by testing to be hazardous, handled in accordance with the provisions of the Georgia Hazardous Waste Management Act, O.C.G.A. [12-8-60](#), et seq.
 3. Waste Water: waste water shall be discharged into a waste water treatment system and, before final release, shall be treated in a manner approved by the Division.
 4. Information Posted: signs shall be posted at the entrance to the plant indicating the days and hours of operation. Access to the plant shall be limited to those times when authorized personnel are on duty.

5. Cleanliness and Sanitation: plants shall be maintained in a clean and sanitary condition. Solid waste shall be confined to the unloading area, which shall be maintained free of dust and nuisances. Accumulations of putrescible materials and rubbish shall be controlled in a manner so as to minimize odors and prevent infestation by insects or rodents, and insect and rodent control measures shall be applied as needed. Sanitary facilities shall be provide for employees and shall be kept clean and good repair.
 6. Fire Control: fire control equipment shall be available near the storage area and charging area, and elsewhere as needed, and additional fire fighting equipment shall be made available for emergencies.
 7. Sampling requirements: sampling of ash residues must be conducted at frequencies and in such a manner as prescribed below:
 - (i) Prior to the initial disposal of ash or residue from a facility.
 - (ii) At a minimum, monthly for the first six (6) months of operations at the facility, and annually during the remaining life of the facility.
 - (iii) A sampling and analysis plan shall be submitted to, and approved by, the Director.
 - (iv) Fly ash and bottom ash shall be sampled and analyzed separately.
 8. Prohibited Waste: no lead acid batteries, radioactive waste, or regulated quantities of hazardous waste may be accepted. The operator must have a plan for excluding these wastes.
 9. Record Keeping: accurate written, daily records by actual weight or by the methods approved in accordance with O.C.G.A. [12-8-31.1\(g\)](#) shall be kept of all waste received at the thermal treatment facility. Copies of such records shall be maintained for a period of at least three (3) years and shall be made available to the Division upon request.
 10. Additional Stipulations: notwithstanding the above, additional stipulations for owning or operating a thermal treatment facility may be imposed by the Director as deemed necessary to carry out the purposes of O.C.G.A. [12-8-20](#), et seq.
- (2) Any person engaged in the operation of an Air Curtain Destructor (ACD) shall comply with the following requirements: for purposes of these Rules, an "Air Curtain Destructor" means a forced air pit thermal treatment technology for the burning of wood wastes.

- (a) Design Criteria: a design and operational plan prepared as a part of the permit application must be prepared by a professional engineer registered in Georgia and must include, but is not limited to, the following criteria:
1. Location: the ACD must be at least 500 feet from any occupied dwelling. The distance may increased or decreased on a site-specific basis at the discretion of the Division.
 2. Storage: areas for storing wastes prior to treatment must be clearly defined and maximum capacity specified.
 3. Types of Wastes: only wood wastes consisting of trees, logs, brush, stumps relatively free of soil, and natural wood products free of wood preserving chemicals, paints, and other contaminants may be burned. Fallen leaves, sawdust, other densely packed wood wastes, and paper (any type) may not be burned.
 4. Air Quality: the facility shall be designed in such a manner as to meet applicable air quality standards of the Division. No smoke emissions exceeding 20 percent opacity may be produced during operation except for a specified ignition period.
 5. Disposal of Ash and Residue: ash and residue shall be removed from the facility, handled as a recovered material or and disposed in a permitted facility.
 6. Fire Protection: facility design shall provide for fire control equipment placed near the storage and ACD area. Additional fire fighting equipment shall be made available for emergencies.
- (b) Construction Certification: upon receipt of a final and effective solid waste handling permit, construction may commence in accordance with the approved design and operational plan and permit conditions. Prior to the receipt of solid waste, the Division must be provided with written certification, by a professional engineer licensed to practice in Georgia, that the facility has been constructed in accordance with the approved permit. Unless notified otherwise by the Division within 15 days of receipt by the Division of the written certification, the facility owner or operator may commence disposal of solid waste.
- (c) All persons owning or operating an air curtain destructor shall comply with the following performance requirements:
1. Supervision: operation and management of air curtain destructors shall be under the direct supervision and control of an operator who is present at all times of operation and is qualified in air curtain distracter management by

training, education or experience and who, after July 1, 1992, is certified in accordance with O.C.G.A. [12-8-24.1](#) and these Rules.

2. Residue: temperature and combustion time shall be sufficient to produce a satisfactory residue, and such residue shall be promptly deposited in a landfill operated and maintained as provided herein or handled in such other manner as may be allowed by these Rules. Ashes may not be allowed to build up on the combustion pit to higher than one-third the pit depth to the point where combustion is impeded, whichever comes first.
3. Access: facility access shall be restricted to prohibit unauthorized storage or disposal of wastes and to prevent injury during ACD operation.
4. Inspection and Maintenance: the ACD and all operating appurtenances must be routinely inspected and adequately maintained to ensure proper working order. Storage areas must be inspected and maintained to exclude unauthorized wastes and minimize any fire hazard.

(d) No ACD may burn any household waste or yard trimmings.

Rule 391-3-4-.09. Shredding, Baling, Materials Recovery Facilities, and Other Processing Operations.

- (1) Any person engaged in shredding, baling, or the recovery of materials from solid waste, shall comply with the following requirements:
 - (a) Design Standards: a design and operational plan prepared by a professional engineer registered to practice in Georgia and proposed as a part of the permit application must include, but is not limited to, the following standards:
 1. Capacity. The facility shall be adequate in size and capacity to manage the projected incoming solid waste and residue volumes.
 2. Baling Equipment. The equipment must be capable of producing a relatively uniform bale size and shape which can be easily handled by equipment at

the baling facility. The bales must have sufficient stability to withstand transportation to the disposal site and handling necessary to position them for final disposal.

3. Storage Time. The facility shall provide for a minimum storage capacity of not less than three (3) times the daily capacity of the shredding, baling or materials recovery equipment. No waste shall be stored in excess of the permitted capacity.
 4. Types of Waste. The application must include the sources, types, and weight of solid waste to be processed, and information concerning special environmental pollution or handling problems that may be created by the solid waste.
 5. Air Quality. The facility shall be designed in such a manner as to meet any air quality standards of the Division.
 6. Wastewater. Any wastewater generated by the facility shall be contained fully on the facility and discharged or delivered to a wastewater treatment system and, before final release, shall be treated in a manner approved by the Division.
 7. Fire Protection. Facility design shall provide for fire control equipment placed near the storage area and elsewhere as needed, and additional fire fighting equipment shall be made available for emergencies.
 8. Disposal of Waste. Shredded and baled waste and any material not sold or used, reused, or recycled as recovered material must be disposed in a permitted facility.
- (b) Construction Certification: upon receipt of a final and effective solid waste handling permit, construction may commence in accordance with the approved design and operational plan and permit conditions. Prior to receipt of solid waste, the Division must be provided with written certification, by a professional engineer licensed to practice in Georgia, that the facility has been constructed in accordance with the approved permit. Unless notified otherwise by the Division within 15 days of receipt by the Division of the written certification, the facility owner or operator may commence processing of solid waste.
- (c) Performance Standards. All persons owning or operating shredding, baling, or materials recovery facilities shall comply with the following requirements:
1. Supervision. Operation and management of the facility shall be under the supervision and control of a responsible individual properly trained in the operation of such facilities at all times during operation.

2. Shredding Plant Residue: The shredded material shall be deposited in a municipal solid waste landfill or handled in such a manner as may be approved by the Division.
3. Bales. The baling operation shall be controlled to produce a uniform bale size and shape which can be easily handled by equipment at the baling facility and at the disposal facility. The bales must have sufficient stability to withstand transportation to the disposal facility and handling necessary to position them for final disposal. Baled solid waste shall be deposited in a municipal solid waste landfill or handled in such other manner as may be approved by the Division.
4. Wastewater. Wastewater shall be contained fully on the facility and discharged or delivered to a wastewater treatment system and, before final release, shall be treated in a manner approved by the Division.
5. Air Quality. Atmospheric emissions shall be controlled so as not to exceed air quality standards of the Division.
6. Information Posted. Signs shall be posted at the entrance to the plant indicating the days and hours of operation. Access to the plant shall be limited to those times when authorized personnel are on duty.
7. Cleanliness and Sanitation. Facilities shall be maintained in a clean and sanitary condition. Solid waste shall be confined to the unloading area, which shall be maintained free of liquids, dust and nuisances. Accumulations of liquids, putrescible materials and rubbish shall be controlled in a manner to minimize odors and prevent infestation by insects or rodents, and insect and rodent control measures shall be applied as needed. Sanitary facilities shall be provided for employees and shall be kept clean and in good repair.

- (2) Construction and operation of solid waste processing facilities for which specific rules have not been developed are prohibited unless same are consistent with the policies and intent of O.C.G.A. [12-8-20](#), *et seq.*, and are permitted by the Director.

Rule 391-3-4-10. Coal Combustion Residuals.

(1) Applicability.

(a) This Rule applies to the following:

1. Owners and operators of new and existing landfills and surface impoundments, including any lateral expansions of such units that dispose or otherwise engage in solid waste management of CCR generated from the combustion of coal at electric utilities and independent power producers. Unless otherwise provided in this Rule, these requirements also apply to disposal units located off-site of the electric utility or independent power producer.
2. All CCR units.
3. Any practice that does not meet the definition of a beneficial use of CCR.

(b) This Rule does not apply to the following:

1. Wastes, including fly ash, bottom ash, boiler slag, and flue gas desulfurization materials generated at facilities that are not part of an electric utility or independent power producer, such as manufacturing facilities, universities, and hospitals.
2. Fly ash, bottom ash, boiler slag, and flue gas desulfurization materials, generated primarily from the combustion of fuels (including other fossil fuels) other than coal, for the purpose of generating electricity unless the fuel burned consists of more than fifty percent (50%) coal on a total heat input or mass input basis, whichever results in the greater mass feed rate of coal.
3. CCR placement at active or abandoned underground or surface coal mines.
4. Municipal Solid Waste Landfills and Commercial Industrial Landfills that receive CCR.

(c) Standards for the Disposal of Coal Combustion Residuals in Landfills and Surface Impoundments [40 CFR 257.60](#) through [257.107](#), 80 Fed. Reg. 21468 (April 17, 2015); as amended at 80 Fed. Reg. 37988 (July 2, 2015), 81 Fed. Reg. 51807 (August 5, 2016), 83 Fed. Reg. 36451 (July 30, 2018), and 85 Fed. Reg. 53561 (August 28, 2020), are hereby incorporated.

- (d) Any reference to 40 C.F.R. Parts in any provisions adopted by reference shall be construed to refer to the provisions contained in the following sections of these Rules:

Federal Regulation Reference	Georgia Rule Reference
40 C.F.R. Part 257.53	391-3-4-.10(2)
40 C.F.R. Parts 257.60 - 257.64	391-3-4-.10(3)
40 C.F.R. Parts 257.70 - 257.74	391-3-4-.10(4)
40 C.F.R. Parts 257.80 - 257.84	391-3-4-.10(5)
40 C.F.R. Parts 257.90 - 257.98	391-3-4-.10(6)
40 C.F.R. Parts 257.100 - 257.104	391-3-4-.10(7)
40 C.F.R. Parts 257.105 - 107	391-3-4-.10(8)

(2) Definitions.

- (a) Definitions in [40 CFR 257.53](#) are incorporated by reference into this section and are applicable to CCR units with the following additions and revision:

1. "Dewatered Surface Impoundment" means a CCR surface impoundment that no longer receives CCR on or after October 19, 2015 and does not contain liquids on or after October 19, 2015.
2. "NPDES -CCR Surface Impoundment" means a CCR surface impoundment that no longer receives CCR on or after October 19, 2015 which still contains both CCR and liquids and is located at an electric utility or independent power producer that has ceased producing electricity prior to October 19, 2015.
3. "Inactive CCR Landfill" means a CCR landfill that no longer receives CCR and other wastes on or after October 19, 2015.
4. The following text shall be substituted for the fourth condition in the definition of Beneficial use of CCR "(4) For unencapsulated use of CCR, the user must demonstrate to the Division and provide documentation to the Division that environmental releases to groundwater, surface water, soil, and air are comparable to or lower than those from analogous products made without CCR, or that environmental releases to groundwater, surface water, soil, and air will be at or below relevant regulatory and health-based benchmarks for human and ecological receptors during use."

(3) Location Restrictions.

- (a) New CCR landfills, existing and new CCR surface impoundments, and all lateral expansions of CCR units must meet the location restrictions in [40 CFR 257.60](#), [40 CFR 257.61](#), [40 CFR 257.62](#), and [40 CFR 257.63](#).

- (b) Existing or new CCR landfills, existing or new CCR surface impoundments, or lateral expansions of a CCR unit must meet the location restrictions in [40 CFR 257.64](#).
 - (c) For new and lateral expansions of CCR units, the hydrogeological evaluation for a specific site must be performed by a qualified groundwater scientist.
 - (d) For new and lateral expansions of CCR units, when the geological and hydrogeological data so indicate, the Division may specify greater separation distances to protect groundwater.
 - (e) Buffers: New CCR units and lateral expansions of CCR units must provide a 200-foot undisturbed buffer between the waste disposal boundary and the boundary of the permitted facility and a minimum 500-foot buffer between the waste disposal boundary and any occupied dwelling and the dwelling's operational private, domestic water supply well in existence on the date of the permit application. The 500-foot buffer may be reduced if the current owner of the dwelling provides a written waiver consenting to the waste disposal boundary being closer than 500 feet. No disposal or storage practices for waste shall take place in the buffer zones.
- (4) Design Criteria.
- (a) New CCR landfills and lateral expansions of CCR landfills shall be designed in accordance with [40 CFR 257.70](#).
 - (b) Existing CCR surface impoundments shall comply with liner design criteria in [40 CFR 257.71](#) and the structural integrity criteria in [40 CFR 257.73](#).
 - (c) New CCR surface impoundments and lateral expansions of CCR surface impoundments shall be designed and comply with requirements in [40 CFR 257.72](#) and [40 CFR 257.74](#).
- (5) Operating Criteria.
- (a) CCR landfills shall be operated in accordance with the criteria in [40 CFR 257.80](#), [40 CFR 257.81](#), and [40 CFR 257.84](#).
 - (b) CCR surface impoundments shall be operated in accordance with the criteria in [40 CFR 257.80](#), [40 CFR 257.82](#), and [40 CFR 257.83](#).
 - (c) The operation and use of the CCR unit shall be as stipulated in the solid waste handling permit.
- (6) Groundwater Monitoring and Corrective Action.

- (a) CCR units are subject to the groundwater monitoring and corrective action requirements in [40 CFR 257.90](#), [40 CFR 257.91](#), [40 CFR 257.93](#), [40 CFR 257.94](#), [40 CFR 257.95](#), [40 CFR 257.96](#), [40 CFR 257.97](#), and [40 CFR 257.98](#).
 - (b) When referenced in this Rule, Appendix III and Appendix IV constituents shall refer to those constituents as listed in Appendix III and IV of 40 CFR Part 257, Subpart D, 80 FR 21468, (Apr. 17, 2015), which are hereby incorporated by reference.
 - (c) The owner or operator of a CCR unit must submit a semi-annual report to the Division to coincide with the semi-annual sampling event. A qualified groundwater scientist must certify the report.
 - (d) The Division must provide concurrence with the following actions in order for them to be complete:
 - 1. Groundwater monitoring system design
 - 2. Groundwater sampling and analysis plan
 - 3. Groundwater monitoring well installation
 - 4. Alternate source demonstration
 - 5. Selection of remedy
 - 6. Completion of remedy
 - (e) The Director may require the analysis of additional parameters based on waste descriptions.
 - (f) An owner or operator of a CCR unit shall continue to monitor for Appendix I or II constituents if these constituents have previously been detected at statistically significant levels above background concentrations.
 - (g) Monitoring wells require replacement after two dry sampling events, unless an alternate schedule has been approved by the Division. A minor modification shall be submitted in accordance with Rule [391-3-4.02](#) prior to the installation or decommissioning of monitoring wells. Well installation must be directed by a qualified groundwater scientist.
- (7) Closure and Post-Closure Care.
- (a) Inactive surface impoundments are subject to the requirements in [40 CFR 257.100](#).

1. The following additional requirements apply to inactive surface impoundments:
 - (i) Permitting requirements in Rule 391-3-4-.10(9)
 - (ii) Groundwater monitoring and corrective action requirements in Rule 391-3-4-.10(6)
 2. CCR surface impoundments that complete closure through removal of CCR are subject only to the requirements in subparagraph (9)(c)6(v)(I) of Rule 391-3-4-.10.
- (b) Closure or retrofit of existing, new, and lateral expansions of CCR units shall be conducted in accordance with [40 CFR 257.101](#), [40 CFR 257.102](#), and [40 CFR 257.103](#).
 - (c) The owner or operator must close the CCR unit in accordance with the written closure plan.
 - (d) A notice of intent to close must be provided to the Director after receipt of the final load of waste.
 - (e) Upon completion of closure activities, a professional engineer registered in Georgia shall prepare and submit a closure report to the Director. The closure report must be completed on forms provided by the Division. If the Director concurs with the closure report, closure will be deemed complete and the facility may begin the post-closure care period.
 - (f) Concurrent with the submission of this closure report to the Director, the owner or operator must submit confirmation to the Director that a notation on the property deed has been recorded. This recording must in perpetuity notify any potential purchaser of the property that the land has been used as a CCR unit and that its use is restricted under the post-closure care requirements of this Rule. This requirement does not apply to CCR units closed by removal.
 - (g) Post-Closure care for existing, new, and lateral expansions of CCR units shall be conducted in accordance with [40 CFR 257.104](#) with the following additions:
 1. CCR units must comply with the conditions of the solid waste handling permit.
 2. The release of CCR units from post-closure care must be approved by the Division.
- (8) Recordkeeping, Notification, and Posting of Information to the Internet.

(a) The requirements of [40 CFR 257.105](#), [40 CFR 257.106](#), and [40 CFR 257.107](#) are incorporated by reference with the following addition:

1. Electronic mail sent to a designated EPD recipient is an authorized form of notification when approved by EPD.

(9) Permits.

(a) CCR Permit Applications: After the effective date of this Rule, owners and operators of all CCR units are required to submit to the director a permit application that meets the requirements of this Rule. Separate permits are required for each CCR unit.

1. Owners and operators of new CCR units are required to submit to the director a complete permit application prior to the initial receipt of CCR.
2. Owners and operators of existing and inactive CCR units shall submit a complete permit application no later than two years from the effective date of the Rule.

(b) All CCR unit permit applications must include the following:

1. A completed form designated by EPD.
2. Written verification that the site conforms to all local zoning or land use ordinances.
3. Property boundary survey and legal description.
4. Financial assurance mechanism meeting the criteria in Rule [391-3-4-.13](#).
5. A qualified professional engineer's certification that all application requirements have been met.

(c) Additional permit application requirements for CCR Units by Facility Type:

1. New CCR landfills or lateral expansion of CCR landfills
 - (i) Technical data and report to comply with location restrictions in [40 CFR 257.60](#), [40 CFR 257.61](#), [40 CFR 257.62](#), [40 CFR 257.63](#), and [40 CFR 257.64](#).
 - (ii) Siting report that meets the criteria specified in "Criteria for Performing Site Acceptability Studies for Solid Waste Landfills in Georgia", Circular 14, Appendix A. The report shall be prepared by a qualified groundwater scientist.

- (iii) Plan and profile sheets of the disposal area. The plan and profile sheets shall include topographical maps at contour intervals of not more than five feet for the existing ground surface elevations, initial disposal area elevations, final disposal area elevations, and buffers.
- (iv) Design of a liner and leachate collection system as required by [40 CFR 257.70](#).
- (v) Quality assurance/quality control (QA/QC) plan for the construction of the liner system, leachate collection system, and the final cover system.
- (vi) An operation plan that includes at a minimum:
 - (I) A fugitive dust plan in compliance with [40 CFR 257.80](#).
 - (II) A run-on and run-off control plan in compliance with [40 CFR 257.81](#).
 - (III) Inspection requirements in compliance with [40 CFR 257.84](#).
 - (IV) Identification of any uniquely associated wastes as listed in [40 CFR 261.4\(b\)\(4\)](#), the estimated quantities generated by the facility, and a description of how these wastes will be managed.
 - (V) Procedures for compliance with recordkeeping, notification, and posting of information to the internet as required by [40 CFR 257.105](#), [40 CFR 257.106](#), and [40 CFR 257.107](#).
 - (VI) Procedures for updating all plans and assessments periodically as required by 40 CFR Part 257.
- (vii) A groundwater monitoring plan in accordance with Rule 391-3-4-4.10(6).
- (viii) A closure and post-closure plan in accordance with Rule 391-3-4.10(7).
- (ix) Any additional information that may be required by the Division.

2. New Surface Impoundments or lateral expansions of surface impoundments

- (i) Technical data and report to comply with location restrictions in [40 CFR 257.60](#), [40 CFR 257.61](#), [40 CFR 257.62](#), [40 CFR 257.63](#), and [40 CFR 257.64](#).
- (ii) Siting report that meets the criteria specified in "Criteria for Performing Site Acceptability Studies for Solid Waste Landfills in Georgia", Circular 14, Appendix A. The report shall be prepared by a qualified groundwater scientist.
- (iii) Technical report for the hazardous potential classifications as outlined in [40 CFR 257.74](#) and the emergency action plan if required by [40 CFR 257.74](#).
- (iv) For a new CCR surface impoundment that has a height of five feet or more and a storage volume of 20 acre-feet or more, or a surface impoundment with a height of 20 feet or more, the application shall include the following:
 - (I) Design and construction plan requirements in [40 CFR 257.74](#).
 - (II) Structural stability assessment as required by [40 CFR 257.74](#).
 - (III) Safety factor assessment as required by [40 CFR 257.74](#).
- (v) Design of a liner system as required by [40 CFR 257.72](#).
- (vi) Quality assurance/quality control (QA/QC) plan for the construction of the liner system, leachate collection system, and the final cover system.
- (vii) An operation plan that includes at a minimum:
 - (I) A fugitive dust plan in compliance with [40 CFR 257.80](#).
 - (II) An inflow design flood control system in compliance with [40 CFR 257.82](#).
 - (III) Inspection requirements in compliance with [40 CFR 257.83](#).
 - (IV) Identification of any uniquely associated wastes as listed in [40 CFR 261.4\(b\)\(4\)](#), the estimated quantities generated by

the facility, and a description of how these wastes will be managed.

- (V) Procedures for compliance with recordkeeping, notification, and posting of information to the internet as required by [40 CFR 257.105](#), [40 CFR 257.106](#), and [40 CFR 257.107](#).
 - (VI) Procedures for updating all plans and assessments periodically as required by 40 CFR Part 257.
- (viii) A groundwater monitoring plan in accordance with Rule 391-3-4-.10(6).
- (ix) A closure and post-closure plan in accordance with Rule 391-3-4-.10(7).
- (x) Any additional information that may be required by the Division.
3. Existing CCR landfills
- (i) Location restriction demonstration requirements in [40 CFR 257.64](#).
 - (ii) Description of how the CCR landfill's operating criteria requirements in [40 CFR 257.80](#), [40 CFR 257.81](#), and [40 CFR 257.84](#) are met.
 - (iii) Groundwater monitoring plan in accordance with 391-3-4-.10(6). Explanation of how groundwater monitoring and corrective action criteria requirements in [40 CFR 257.90](#), [40 CFR 257.91](#), [40 CFR 257.93](#), [40 CFR 257.94](#), [40 CFR 257.95](#), [40 CFR 257.96](#), [40 CFR 257.97](#), and [40 CFR 257.98](#) are met.
 - (iv) Explanation of how closure and post-closure care requirements in [40 CFR 257.101](#), [40 CFR 257.102](#), [40 CFR 257.103](#), and [40 CFR 257.104](#) will be met.
 - (v) Website address for information required to be posted by [40 CFR 257.105](#), [40 CFR 257.106](#), and [40 CFR 257.107](#).
4. Inactive CCR landfills must meet requirements subparagraphs (9)(c)3.(i) - (iv) of this Rule for an existing CCR landfill.
5. Existing Surface Impoundments

- (i) Location restriction demonstrations required by [40 CFR 257.60](#), [40 CFR 257.61](#), [40 CFR 257.62](#), [40 CFR 257.63](#), and [40 CFR 257.64](#).
 - (ii) Description of the CCR surface impoundment's design criteria required by [40 CFR 257.71](#) and [40 CFR 257.73](#).
 - (iii) Description of how the CCR surface impoundment's operating criteria required by [40 CFR 257.80](#), [40 CFR 257.82](#), and [40 CFR 257.83](#) are met.
 - (iv) Groundwater monitoring plan in accordance with Rule 391-3-4-.10(6). Explanation of how groundwater monitoring and corrective action criteria required by [40 CFR 257.90](#), [40 CFR 257.91](#), [40 CFR 257.93](#), [40 CFR 257.94](#), [40 CFR 257.95](#), [40 CFR 257.96](#), [40 CFR 257.97](#), and [40 CFR 257.98](#) are met.
 - (v) Explanation of how closure and post-closure care requirements found in [40 CFR 257.101](#), [40 CFR 257.102](#), [40 CFR 257.103](#), and [40 CFR 257.104](#) will be met.
 - (vi) Website address for information required to be posted by [40 CFR 257.105](#), [40 CFR 257.106](#), and [40 CFR 257.107](#).
6. Inactive Surface Impoundments. An owner or operator of an inactive surface impoundment shall complete closure of the CCR unit as specified in [40 CFR 257.100](#), including:
- (i) Technical data and report showing compliance with [40 CFR 257.100](#).
 - (ii) Technical report of geological and hydrogeological units within the disposal site.
 - (iii) Potentiometric surface map of the water table.
 - (iv) Siting report which includes identification of wetlands, floodplains, and seismic impact zones.
 - (v) Written closure plan that includes at a minimum:
 - (I) Narrative describing how the CCR unit will be closed including the elimination of free liquids and stabilization of remaining waste or by closure through removal of CCR.

- (II) Identification of any pipes, utilities, or other penetrations through or beneath the impoundment. The inspection frequency and method of evaluation should be provided.
- (II) Final cover analysis.
- (vi) Stability analysis that, at a minimum, includes the following:
 - (I) On-site or local soil conditions that may result in significant differential settling.
 - (II) On-site or local geologic or geomorphologic features.
 - (III) On-site or local human-made features or events, both surface and subsurface.
- (vii) Groundwater monitoring plan in accordance with Rule 391-3-4-.10(6).
- (viii) Closure through removal of CCR is subject only to (v)(I) above and is not subject to the financial assurance requirements of Rule [391-3-4-.13](#).

7. NPDES - CCR Surface Impoundments

- (i) Technical report of geological and hydrogeological units within the disposal site.
- (ii) Potentiometric surface map of the water table.
- (iii) Siting report which includes identification of wetlands, floodplains, and seismic impact zones.
- (iv) Closure plan that includes at a minimum:
 - (I) Narrative describing how the CCR unit will be closed including the elimination of free liquids and stabilization of remaining waste or by closure through removal of CCR.
 - (II) Identification of any pipes, utilities, or other penetrations through or beneath the impoundment. The inspection frequency and method of evaluation should be provided.
 - (III) Final cover analysis.

- (v) Stability analysis that at a minimum includes the following:
 - (I) On-site or local soil conditions that may result in significant differential settling.
 - (II) On-site or local geologic or geomorphologic features.
 - (III) On-site or local human-made features or events, both surface and subsurface.
- (vi) Groundwater monitoring plan in accordance with Rule 391-3-4-.10(6).
- (vii) Closure through removal of CCR is subject only to (iv)(I) above and is not subject to the financial assurance requirements of Rule [391-3-4-.13](#).

8. Dewatered Surface Impoundments

- (i) Demonstration that closure procedures have minimized the threat to human health and the environment.
- (ii) Stability analysis.
- (iii) Final cover analysis.
- (iv) Groundwater monitoring plan in accordance with Rule 391-3-4-.10(6).

(10) Financial Assurance.

- (a) All CCR units must meet requirements in Rule [391-3-4-.13](#).

(11) Variances.

- (a) A compliance schedule variance for dewatered surface impoundments and inactive CCR landfills not meeting the minimum criteria in 391-3-4-.10 may be considered upon the following:
 1. A demonstration that no alternative units meeting the minimum requirement either on-site or off-site can be used to dispose of the CCR or non-CCR wastewater;
 2. A demonstration that the owner or operator is unable to use other public or private alternatives to manage the waste in the non-compliant unit; and

3. The schedule of compliance must specify remedial measures and an enforceable sequence of actions or operations leading to compliance within a reasonable time not to exceed time frames as specified in [40 CFR 257.102](#).
4. Variances may be granted under Rule 391-3-4-.10 which are not less stringent than those found in [40 CFR 257.60](#) through [257.107](#).

Effective Aug. 10, 2018.

Amended: F. Mar. 22, 2022; eff. Apr. 11, 2022.

Rule 391-3-4-.11. Closure Criteria.

- (1) 40 CFR Part 258, Subpart F, Section 258.60, as amended, 56 Fed. Reg. 51016, (October 9, 1991); 57 Fed. Reg. 28628 (June 26, 1992), as amended at 62 Fed. Reg. 40713 (July 29, 1997) is hereby incorporated by reference.
- (2) This Rule shall be applicable to all solid waste handling facilities.
- (3) A closure plan required by paragraph (1) of this Rule must be submitted as part of the application for a permit.
- (4) Notice of final closure must be provided to the Director within 30 days of receiving the final load of waste. Any site not receiving waste for in excess of 180 days, unless otherwise approved by the Division, shall be deemed closed and in violation of these Rules unless properly closed. Notice of closure must include the date of final waste receipt and an accurate legal description of the boundaries of the landfill.
- (5) All deeds for real property which have been used for landfilling shall include notice of the landfill operations, the date the landfill operation commenced and terminated, an accurate legal description of the actual location of the landfill, and a description of the type of solid wastes which have been deposited in the landfill. Concurrent with the submission of notice of final closure to the Director, the owner or operation must submit to the Director

confirmation that the information required in this section has been noticed on the property deed.

- (6) The owner or operator must close the solid waste disposal facility in accordance with a closure plan approved by the Division. Upon completing all requirements specified to close the facility outlined in the closure plan, the owner or operator must provide the Division with documentation signed by a registered professional engineer, registered in the state of Georgia, to certify that compliance with the closure requirements have been satisfied.
- (7) The closure documentation as provided in paragraph (6) of this Rule must be completed on forms provided by the Division. If the documentation is accepted by the Division, the Director will issue the Post-Closure Permit and establish the beginning of the post-closure care period.
- (8) Owners and operators of CCR units are exempt from this Rule and must meet the closure requirements in Rule [391-3-4-.10](#).

Authority: O.C.G.A. § [12-8-20](#) et seq., as amended.

History. Original Rule entitled "Closure Criteria" was F. Jun. 9, 1989; eff. Jun. 29, 1989.

Amended: F. Sept. 4, 1991; eff. Sept. 24, 1991.

Amended: F. Jun. 7, 1993; eff. Jun. 27, 1993.

Amended: F. Nov. 2, 2016; eff. Nov. 22, 2016.

Amended: F. Mar. 8, 2018; eff. Mar. 28, 2018.

Rule 391-3-4-.12. Post-Closure Care.

- (1) [40 CFR Part 258, Subpart F, Section 258.61](#), as amended, 56 Fed. Reg. 51016 (October 9, 1991); 57 Fed. Reg. 28628 (June 26, 1992) is hereby incorporated by reference:
- (2) The owner and/or operator of all landfills must conduct post-closure care for at least thirty (30) years after the Director has authorized the Post-Closure Permit. The Director may extend the post-closure care period where necessary to adequately protect human health and the environment.
- (3) The owner and/or operator shall be responsible for conducting all monitoring and corrective actions as needed to protect human health and the environment, including, but not limited to:
 - (a) Methane monitoring, reporting and development of remediation plans in accordance with the requirements specified in paragraphs (h) and (v) of Rule [391-3-4-.07\(3\)](#), and the approved plans developed for the facility.

- (b) Groundwater monitoring, reporting and development of corrective action plans in accordance with paragraph (v) of Rule [391-3-4-.07\(3\)](#), [391-3-4-.14](#) and the approved plans developed for the facility.
- (4) Post-closure use of property must never be allowed to disturb the integrity of the final cover, liner(s), or any other components of the containment system, or the function of the monitoring systems, unless the Division determines that the activities are necessary to meet the requirements of this Chapter.
 - (5) If the owner and/or operator or any subsequent owner or operator of the land upon which a landfill is located wishes to remove wastes and waste residues, the liner, if any, or contaminated soils, the owner or operator must request and receive written approval from the Division.
 - (6) A copy of the post-closure care plan required under paragraph (1) of this Rule must be submitted as part of the permit application, or in the case of existing sites, within 180 days of being directed to do so by the Director.
 - (7) Owners and operators of CCR units are exempt from this Rule and must meet the post-closure requirements in Rule [391-3-4-.10](#).
 - (8) Reduction of Post-Closure Care. Unless the facility is in active remediation, the Director may reduce the post-closure care period at certain sites when the following is demonstrated:
 - (a) No releases of contaminants above the groundwater protection standard or surface water instream standards are occurring, or where a statistically significant increase above background but statistically below the groundwater protection standard exists;
 - (b) Methane from the site is not migrating above the Lower Explosive Limit at the property boundary; and
 - (c) The landfill is stable and will not pose a threat to human health or the environment and is currently in the closure or post-closure period.
 - (d) The post-closure care period at MSWLs must, at a minimum, be 30 years.
 - (e) The Director may reduce the post-closure care period at Industrial Waste Disposal Facilities and Construction/Demolition Facilities where [391-3-4-.12\(8\)\(a\)](#), (b), and (c) can be demonstrated to the satisfaction of the Director.
 - (f) The Director may reduce the post-closure care period at sites permitted as Inert Waste Landfill Facilities where [391-3-4-.12\(8\)\(b\)](#) and (c) can be demonstrated to the satisfaction of the Director.

(g) The post-closure care period in (e) and (f) must, at a minimum, be 10 years.

- (9) Denial of reduction in Post-Closure Care. If an application for a reduction in post-closure care is denied by the Director, the applicant may request a subsequent review.

Rule 391-3-4-.13. Financial Responsibility.

- (1) Applicability. The requirements of this Rule apply to all owners and/or operators of solid waste processing, treatment, storage or disposal facilities other than permit-by-Rule facilities, except for the exemptions provided for in (3) below.
- (2) 40 CFR Part 258, Subpart G as amended, 56 Fed. Reg. 51029 (October 9, 1991), as amended at 57 Fed. Reg. 28628 (June 26, 1992); 58 Fed. Reg. 51547 (October 1, 1993); 60 Fed. Reg. 40105 (August 7, 1995); 60 Fed. Reg. 52342 (October 6, 1995); 61 Fed. Reg. 60337 (November 27, 1996); and 63 Fed. Reg. 17729 (April 10, 1998) is hereby incorporated by reference.
- (3) Financial responsibility shall be required for any solid waste handling facility and shall provide adequate financial responsibility to ensure the satisfactory maintenance, closure and post-closure care of such facility or to carry out any corrective action which may be required as a condition of a permit.
- (4) Forms. Allowable financial mechanisms for closure, post-closure care, and corrective action (i.e., trust fund, surety bond, letter of credit, insurance, financial test, or guarantee) shall be submitted on forms as provided or in a format as prescribed by the Director.

Rule 391-3-4-.14. Groundwater Monitoring and Corrective Action.

- (1) Applicability. All permits and modifications of permits for solid waste landfills, unless a variance has been approved, issued after the effective date of this Rule require the installation of a groundwater monitoring system. Such groundwater monitoring and, if needed, corrective action shall be conducted in accordance with this Rule. Industrial solid waste landfills and construction/demolition waste landfills must also meet the requirements of this Rule unless otherwise exempted by the Division. CCR units must meet requirements in paragraph (6) of Rule [391-3-4-.10](#).
- (2) Groundwater monitoring requirements under paragraphs (8) through (50) of this Rule may be suspended by the Director for a MSWLF unit if the owner or operator can demonstrate that there is no potential for migration of hazardous constituents from that MSWLF unit to the uppermost aquifer during the active life of the unit and the post-closure care period. This demonstration must be certified by a professional geologist registered to practice in Georgia or a professional geotechnical engineer registered to practice in Georgia and the demonstration approved by the Director, and must be based upon:
 - (a) Site-specific field collected measurements, sampling, and analysis of physical, chemical, and biological processes affecting contaminant fate and transport, and
 - (b) Contaminant fate and transport predictions that maximize contaminant migration and consider impacts on human health and the environment.
- (3) New MSWLF units must be in compliance with the groundwater monitoring requirements specified in this Rule before waste may be placed in the unit.
- (4) When referenced in this Rule, Appendix I and Appendix II constituents shall refer to those constituents as listed in Appendix I and II of 40 CFR Part 258, Subpart E, as amended, 56 Fed. Reg. 51032-51039 (October 9, 1991), which are hereby incorporated by reference.
- (5) When referenced in this Rule, Appendix III and Appendix IV constituents shall refer to those constituents as listed in Appendix III and IV of 40 CFR Part 257, Subpart D, 80 FR 21468, (April 17, 2015), which are hereby incorporated by reference.
- (6) Once established at a MSWLF unit, groundwater monitoring shall be conducted throughout the active life and post-closure care period of that MSWLF unit as specified in Rule [391-3-4-.12](#).
- (7) The Director may approve alternative schedules for demonstrating compliance with paragraph (11)(b) pertaining to notification of placement of certification in operating record; paragraph (23)(a) pertaining to notification that statistically significant increase (SSI) notice is in operating record; paragraph (23)(b) and (c), pertaining to an assessment monitoring program; paragraph (25), pertaining to sampling and analyzing Appendix II constituents; paragraph (27)(a) pertaining to placement of notice (Appendix II constituents detected) in record and notification of notice in record; paragraph (27)(b) pertaining to sampling of Appendix I and II to this Rule; paragraph (30) pertaining to

notification (and placement of notice in record) of SSI above groundwater protection standard; paragraphs (30)(a) and (34) pertaining to assessment of corrective measures; paragraph (38) pertaining to selection of remedy and notification of placement in paragraph record; paragraph (46)(d) pertaining to notification of placement in record (alternative corrective action measures); and paragraph (49) pertaining to notification of placement in record (certification of remedy completed).

(8) Groundwater Monitoring Systems. A groundwater monitoring system must be installed that consists of a sufficient number of wells, installed at appropriate locations and depths, to yield groundwater samples from the upper most aquifer that:

(a) Represent the quality of background groundwater that has not been affected by leakage from a unit. A determination of background quality may include sampling of wells that are not hydraulically upgradient of the waste management area where:

1. Hydrogeologic conditions do not allow the owner or operator to determine what wells are hydraulically upgradient; or
2. Sampling at other wells will provide an indication of background groundwater quality that is as representative or more representative than that provided by the upgradient wells; and

(b) Represent the quality of groundwater passing the relevant point of compliance specified by the Director under Rule [391-3-4-.07](#). The downgradient monitoring system must be installed at the relevant point of compliance specified by the Director under this Rule. When physical obstacles preclude installation of groundwater monitoring wells at the relevant point of compliance at existing units, the downgradient monitoring system may be installed at the closest practicable distance hydraulically downgradient from the relevant point of compliance specified by the Director under Rule [391-3-4-.07](#) that ensures detection of groundwater contamination in the uppermost aquifer.

(9) The Director may approve a multi-unit groundwater monitoring system instead of separate groundwater monitoring systems for each MSWLF unit when the facility has several units, provided the multi-unit groundwater monitoring system meets the requirement of paragraph (8) of this Rule and will be as protective of human health and the environment as individual monitoring systems for each MSWLF unit, based on the following factors:

- (a) Number, spacing, and orientation of their MSWLF units;
- (b) Subsurface and Surface Hydrogeologic setting;
- (c) Site history;
- (d) Engineering design of the MSWLF units, and

- (e) Type of waste accepted at the MSWLF units.
- (10) Monitoring wells must be cased in manner that maintains the integrity of the monitoring well borehole and prevents interaquifer migration of fluids. This casing must be screened or perforated and packed with gravel or sand, where necessary, to enable collection of groundwater samples. The annular space (i.e., the space between the borehole and well casing) above the sampling depth must be sealed to prevent contamination of samples and the groundwater.
- (a) The owner or operator must notify the Director that the design, installation, development and decommission of any monitoring wells, piezometers and other measurement, sampling, and analytical devices documentation has been placed in the operating record; and
 - (b) The monitoring wells, piezometers, and other measurement, sampling, and analytical devices must be operated and maintained so that they perform to design specifications throughout the life of the monitoring program. Monitoring wells and piezometers shall be constructed by drillers having a valid and current bond with the Water Wells Standards Advisory Council. Monitoring wells require replacement after two dry sampling events, unless an alternate schedule has been approved by the Division.
- (11) The number, spacing, and depths of monitoring systems shall be:
- (a) Determined based upon site-specific technical information that must include thorough characterization of:
 - 1. Aquifer thickness, groundwater flow rate, groundwater flow direction including seasonal and temporal fluctuations in groundwater flow; and
 - 2. Saturated and unsaturated geologic units and fill materials over lying the upper most aquifer, materials comprising the uppermost aquifer, and materials comprising the confining unit defining the lower boundary of the upper most aquifer; including, but not limited to: thickness, stratigraphy, lithology, hydraulic conductivities, porosities and effective porosities.
 - (b) Certified by a qualified groundwater scientist. Within 14 days of this certification, the owner or operator must notify the Director that the certification has been placed in the operating record.
- (12) Groundwater Sampling and Analysis Requirements. The groundwater monitoring program must include consistent sampling and analysis procedures that are designed to ensure monitoring results that provide an accurate representation of groundwater quality at the background and downgradient wells installed in compliance with paragraph (8) of this Rule. The owner or operator must notify the Director that the sampling and analysis

program documentation has been placed in the operating record and the program must include procedures and techniques for:

- (a) Sample collection;
 - (b) Sample preservation and shipment;
 - (c) Analytical procedures;
 - (d) Chain of custody control; and
 - (e) Quality assurance and quality control.
- (13) The groundwater monitoring program must include sampling and analytical methods that are appropriate for groundwater sampling and that accurately measure hazardous constituents and other monitoring parameters in groundwater samples. Groundwater samples are not normally field-filtered prior to laboratory analysis. If samples are filtered, then both filtered and unfiltered samples shall be collected and submitted to the laboratory for analysis.
- (14) The sampling procedures and frequency must be protective of human health and the environment.
- (15) Groundwater elevations must be measured in each well immediately prior to purging, each time groundwater is sampled. The owner or operator must determine the rate and direction of groundwater flow each time groundwater is sampled. Groundwater elevations in wells which monitor the same waste management area must be measured within a period of time short enough to avoid temporal variations in groundwater flow which could preclude accurate determinations of groundwater flow rate and direction.
- (16) The owner or operator must establish background groundwater quality in a hydraulically upgradient or background well(s) for each of the monitoring parameters or constituents required in the particular groundwater monitoring program that applies to the MSWLF unit, as determined under paragraph (21) or (24) of this Rule. Background groundwater quality may be established at wells are not located hydraulically upgradient from the MSWLF unit if it meets the requirements of paragraph (8)(a) of this Rule.
- (17) The number of samples collected to establish groundwater quality data must be consistent with the appropriate statistical procedures determined pursuant to paragraph (18) of this Rule. The sampling procedures shall be those specified in paragraph (22) for detection monitoring, paragraphs (24) and (27) for assessment monitoring, and paragraph (35) for corrective action.
- (18) The owner or operator must specify in the operating record one of the following statistical methods to be used in evaluating groundwater monitoring data for each hazardous constituent. The statistical test chosen shall be conducted separately for each hazardous constituent in each well.

- (a) A parametric analysis of variance (ANOVA) followed by multiple comparisons procedures to identify statistically significant evidence of contamination. The method must include estimation and testing of the contrasts between each compliance well's mean and the background mean levels for each constituent.
 - (b) An analysis of variance (ANOVA) based on the ranks followed by multiple comparisons procedures to identify statistically significant evidence of contamination. The method must include estimation and testing of the contrasts between each compliance well's median and the background median levels for each constituent.
 - (c) A tolerance or prediction interval procedure in which an interval for each constituent is established from the distribution of the background data, and the level of each constituent in each compliance well is compared to the upper tolerance or prediction limit.
 - (d) A control chart approach that gives control limits for each constituent.
 - (e) Another statistical method that meets the requirements of Statistical Analysis of Groundwater Monitoring Data at RCRA Facilities Unified Guidance (EPA-530-R-09-007 March 2009).
- (19) Any statistical method chosen under paragraph (18) of this Rule shall comply with the following performance standards, as appropriate:
- (a) The statistical method used evaluate groundwater monitoring data shall be appropriate for the distribution of chemical parameters or hazardous constituents. If the distribution of the chemical parameters or hazardous constituents is shown by the owner or operator to be inappropriate for a normal theory test, then the data should be transformed or a distribution-free theory test should be used. If the distributions for the constituents differ, more than one statistical method may be needed.
 - (b) If an individual well comparison procedure is used to compare an individual compliance well constituent concentration with background constituent concentrations or a groundwater protection standard, the test shall be done at a Type I error level no less than 0.01 for each testing period. If a multiple comparisons procedure is used, the Type I experiment wise error rate for each testing period shall be no less than 0.05; however, the Type I error of no less than 0.01 for individual well comparisons must be maintained. This performance standard does not apply to tolerance intervals, prediction intervals, or control charts.
 - (c) If a control chart approach is used to evaluate groundwater monitoring data, the specific type of control chart and its associated parameter values shall be protective of human health and the environment. The parameters shall be

determined after considering the number of samples in the background data base, the data distribution, and the range of the concentration values for each constituent of concern.

- (d) If a tolerance interval or a predictional interval is used to evaluate groundwater monitoring data, the levels of confidence and, for tolerance intervals, the percentage of the population that the interval must contain, shall be protective of human health and the environment. These parameters shall be determined after considering the number of samples in the background data base, the data distribution, and the range of the concentration values for each constituent of concern.
 - (e) The statistical method shall account for data below the limit of detection with one or more statistical procedures that are protective of human health and the environment. Any practical quantitation limit (pql) that is used in the statistical method shall be the lowest concentration level that can be reliably achieved within specified limits of precision and accuracy during routine laboratory operating conditions that are available to the facility.
 - (f) If necessary, the statistical method shall include procedures to control or correct for seasonal and spatial variability as well as temporal correlation in the data.
- (20) The owner or operator must determine whether or not there is a statistically significant increase over background values for each parameter or constituent required in the particular groundwater monitoring program that applies to the MSWLF unit, as determined in paragraphs (21) or (24) of this Rule.
- (a) In determining whether a statistically significant increase has occurred, the owner or operator must compare the groundwater quality of each parameter or constituent at each monitoring well designated pursuant to subparagraph (8)(b) of this Rule to the background value of that constituent, according to the statistical procedures and performance standards specified under paragraphs (18) and (19) of this Rule.
 - (b) Within a reasonable period of time after completing sampling and analysis, the owner or operator must determine whether there has been a statistically significant increase over background at each monitoring well.
- (21) **Detection Monitoring.** Detection monitoring is required at MSWLF units at all groundwater monitoring wells defined in subparagraphs (8)(a) and (b) of this Rule. At a minimum, a detection monitoring program must include the monitoring for the constituents listed in Appendix I of this Rule.
- (a) The Director may delete any of the Appendix I monitoring parameters for a MSWLF unit if it can be shown that the removed constituents are not reasonably expected to be contained in or delivered from the waste contained in the unit.

- (b) The Director may establish an alternative list of inorganic indicator for a MSWLF unit, in lieu of some or all of the heavy metals (constituents 1-15 in Appendix I to this Rule), if the alternative parameters provide a reliable indication of inorganic releases from the MSWLF unit to the groundwater. In determining alternative parameters, the Director shall consider the following factors:
 - 1. The types, quantities, and concentrations of constituents in wastes managed at the MSWLF unit;
 - 2. The mobility, stability, and persistence of waste constituents or their reaction products in the unsaturated zone beneath the MSWLF unit;
 - 3. The detectability of indicator parameters, waste constituents, and reaction products in the groundwater; and
 - 4. The concentration or values and coefficients of variation of monitoring parameters or constituents in the groundwater background.
 - (c) After the effective date of the Rule, owners and operators of MSWLFs and Commercial Industrial Landfills must add Appendix III to their detection monitoring parameters before the initial receipt of CCR. MSWLFs and Commercial Industrial Landfills that accepted CCR before the effective date of the Rule must incorporate the Appendix III constituents into their monitoring plan by minor modification within 180 days from the effective date of the Rule.
 - (d) The Director will not delete parameters or establish alternate parameter lists discussed under subparagraphs (21)(a) and (b) for those facilities accepting CCR wastes.
 - (e) The Director may require additional parameters based on waste descriptions.
- (22) The monitoring frequency for all constituents listed in Appendix I to this Rule, or in the alternative list approved in accordance with subparagraph (21)(b) of this Rule, shall be at least semiannual during the active life of the facility (including closure) and the post-closure care period. A minimum of four independent samples from each well (background and downgradient) must be collected and analyzed for the Appendix I constituents, or the alternative list approved in accordance with subparagraph (21)(b) of this Rule, during the first semiannual sampling event. At least one sample from each well (background and downgradient) must be collected and analyzed during subsequent semiannual sampling events. The Director may specify an appropriate alternative frequency for repeated sampling and analysis for Appendix I constituents, or the alternative list approved in accordance with subparagraph (21)(b) of this Rule, during the active life (including closure) and the post-closure care period. The alternative frequency during the active life (including closure) shall be no less than annual. The alternative frequency shall be based on consideration of the following factors:

- (a) Lithology of the aquifer and unsaturated zone;
 - (b) Hydraulic conductivity of the aquifer and unsaturated zone;
 - (c) Groundwater flow rates;
 - (d) Minimum distance between upgradient edge of the MSWLF unit and downgradient monitoring well screen (minimum distance of travel); and
 - (e) Resource value of the aquifer.
- (23) If the owner or operator determines, pursuant to paragraph (18) of this Rule, that there is statistically significant increase over background for one or more of the constituents listed in Appendix I to this Rule, or in the alternative list approved in accordance with subparagraph (21)(b) of this Rule, at any monitoring well at the boundary specified under subparagraph (8)(b) of this Rule, the owner or operator:
- (a) Must, within 14 days of this finding, place a notice in the operating record indicating which constituents have shown statistically significant changes from background levels, and notify the Director that this notice was placed in the operating record; and
 - (b) Must establish an assessment monitoring program meeting the requirements of paragraphs (20) through (33) of this Rule within 90 days except as provided for in subparagraph (23)(c) of this Rule.
 - (c) The owner/operator may demonstrate that a source other than a MSWLF unit caused the contamination or that the statistically significant increase resulted from error in sampling, analysis, statistical evaluation, or natural variation in groundwater quality. A report documenting this demonstration must be certified by a qualified groundwater scientist or approved by the Director and be placed in the operating record. If a successful demonstration is made and documented, the owner or operator may continue detection monitoring as specified in paragraphs (22) and (23) of this Rule. If, after 90 days, a successful demonstration is not made, the owner or operator must initiate an assessment monitoring program as required in paragraphs (24) through (33) of this Rule.
- (24) Assessment Monitoring Program. Assessment monitoring is required whenever a statistically significant increase over background has been detected for one or more of the constituents listed in Appendix I or in the alternative list approved in accordance with subparagraph (21)(b) of this Rule.
- (25) Within 90 days of triggering an assessment monitoring program, and annually thereafter, the owner or operator must sample and analyze the groundwater for all constituents identified in Appendix II of this Rule. A minimum of one sample from each downgradient well must be collected and analyzed during each sampling event. For any

constituent detected in the downgradient wells as the result of the complete Appendix II analysis, a minimum of four independent samples from each well (background and downgradient) must be collected and analyzed to establish background for the new constituents. The Director may specify an appropriate subset of wells to be sampled and analyzed for Appendix II constituents during assessment monitoring. The Director may delete any of the Appendix II monitoring parameters for a MSWLF unit if it can be shown that the removed constituents are not reasonably expected to be in or derived from the waste contained in the unit. Owners and operators of MSWLFs and Commercial Industrial Landfills that will accept CCR after the effective date of the Rule must include Appendix IV in the assessment monitoring parameters before the initial receipt of CCR. MSWLFs and Commercial Industrial Landfills that accepted CCR before the effective date of the Rule and with known releases must incorporate Appendix IV constituents into their monitoring plans by minor modification within 180 days from the effective date of the Rule.

- (26) The Director may specify an appropriate alternate frequency for repeated sampling and analysis for the full set of Appendix II constituents required by paragraph (25) of this Rule, during the active life (including closure) and post-closure care of the unit considering the following factors:
- (a) Lithology of the aquifer and unsaturated zone;
 - (b) Hydraulic conductivity of the aquifer and unsaturated zone;
 - (c) Groundwater flow rates;
 - (d) Minimum distance between upgradient edge of the MSWLF unit and downgradient monitoring well screen (minimum distance of travel);
 - (e) Resource value of the aquifer; and
 - (f) Nature (fate and transport) of any constituents detected in the response to this Rule.
- (27) After obtaining the results from the initial or subsequent sampling events required in paragraph (25) of this Rule, the owner or operator must:
- (a) Within 14 days, place a notice in the operating record identifying the Appendix II constituents that have been detected and notify the Director that this notice has been placed in the operating record;
 - (b) Within 90 days, and on at least a semiannual basis thereafter, resample all wells specified by paragraph (8) of this Rule, conduct analyses for all constituents in Appendix I to this Rule or in the alternative list approved in accordance with subparagraph (21)(b) of this Rule and for those constituents in Appendix II to this Rule that are detected in response to paragraph (25) of this Rule, and record their concentrations in the facility operating record. At least one sample from

each well (background and downgradient) must be collected and analyzed during these sampling events. The Director may specify an alternative monitoring frequency during the active life (including closure) and the post-closure care period for the constituents referred to in this paragraph. The alternative frequency for Appendix I constituents, or the alternative list approved in accordance with subparagraph (21)(b) of this Rule during the active life (including closure) shall be no less than annual. The alternative frequency shall be based on consideration of the factors specified in paragraph (26) of this Rule;

- (c) Establish background concentrations for any constituents detected pursuant to paragraph (25) or subparagraph (27)(b) of this Rule; and
 - (d) Establish groundwater protection standards for all constituents detected pursuant to paragraph (25) or (27) of this Rule. The groundwater protection standards shall be established in accordance with paragraph (31) or (32) of this Rule.
- (28) If the concentrations of all Appendix II constituents are shown to be at or below background values, using the statistical procedures in paragraph (18) of this Rule, for two consecutive sampling events, the owner or operator must notify the Director of this finding and may return to detection monitoring.
- (29) If the concentrations of any Appendix II constituents are above background values, but all concentrations are below the groundwater protection standard established under paragraphs (31) or (32) of this Rule, using the statistical procedures in paragraph (18) of this Rule, the owner or operator must continue assessment monitoring in accordance with this section.
- (30) If one or more Appendix II constituents are detected at statistically significant levels above the groundwater protection standard established under paragraph (31) or (32) of this Rule in any event, the owner or operator must, within 14 days of this finding, place a notice in the operating record identifying the Appendix II constituents have exceeded the groundwater protection standard and notify the Director and all appropriate local government officials that the notice has been placed in the operating record. The owner or operator also:
- (a) Must characterize the nature and extent of the release by installing additional monitoring wells as necessary;
 - (b) If the point of compliance is not at the facility boundary, the owner/operator must install at least one additional monitoring well at the facility boundary in the direction of contaminant migration and sample this well in accordance with subparagraph (27)(b) of this Rule.
 - (c) Must notify all persons who own the land or reside on the land that directly overlies any part of the plume of contamination if contaminants have migrated off-

site if indicated by sampling of wells in accordance with subparagraph (30)(a) of this Rule; and

- (d) Must initiate an assessment of corrective measures as required by paragraphs (34) through (37) of this Rule within 90 days; or
 - (e) May demonstrate that a source other than a MSWLF unit caused the contamination, or that the SSI resulted from error in sampling, analysis, statistical evaluation, or natural variation in groundwater quality. A report documenting this demonstration must be certified by a qualified groundwater scientist or approved by the Director and placed in the operating record. If a successful demonstration is made the owner or operator must continue monitoring in accordance with the assessment monitoring program pursuant to paragraphs (24) through (33) of this Rule and may return to detection monitoring if the Appendix II constituents are at or below background as specified in paragraph (28) of this Rule. Until a successful demonstration is made, the owner or operator must comply with subparagraph (30)(a) and (e), including initiating an assessment of corrective measures.
- (31) The owner or operator must establish a groundwater protection standard for each Appendix II constituent detected in the groundwater. The groundwater protection standard shall be:
- (a) For constituents for which a maximum contaminant level (MCL) has been promulgated under section 1412 of the Safe Drinking Water Act (codified) under 40 CFR part 141, the MCL for that constituent;
 - (b) For constituents for which MCLs have not been promulgated, the background concentration for the constituent established from wells in accordance with subparagraph (8)(a) of this Rule; or
 - (c) For constituents for which the background level is higher than the MCL identified under subparagraph (31)(a) of this Rule or health based levels identified under subparagraph (32)(a) of this Rule, the background concentration.
- (32) The Director may establish an alternative groundwater protection standard for constituents for which MCLs have not been established. These groundwater protection standards shall be appropriate health based levels that satisfy the following criteria:
- (a) The level is derived in a manner consistent with applicable state and federal guidelines for assessing the health risks of environmental pollutants (51 Fed. Reg. 33992, 34006, 34014, 34028; September 24, 1986).
 - (b) The level is based on scientifically valid studies conducted in accordance with the Toxic Substances Control Act Good Laboratory Practice Standards (40 CFR part 792) or equivalent;

- (c) For carcinogens, the level represents a concentration associated with an excess lifetime cancer risk level (due to continuous lifetime exposure) within the 1×10^{-4} to 1×10^{-6} range; and
 - (d) For systemic toxicants, the level represents a concentration to which the human population (including sensitive subgroups) could be exposed to on a daily basis that is likely to be without appreciable risk of deleterious effects during a lifetime. For purposes of this paragraph, systemic toxicants include toxic chemicals that cause effects other than cancer or mutation.
- (33) In establishing groundwater protection standards under paragraph (32) of this Rule, the Director may consider the following:
- (a) Multiple contaminants in the groundwater;
 - (b) Exposure threats to sensitive environmental receptors; and
 - (c) Other site-specific exposure or potential exposure to groundwater.
- (34) Assessment of Corrective Measures. Within 90 days of finding that any of the constituents listed in Appendix II have been detected at a statistically significant level exceeding the groundwater protection standards defined in paragraph (31) or (32) of this Rule, the owner or operator must initiate an assessment of corrective measures. Such an assessment must be completed within a reasonable period of time.
- (35) The owner or operator must continue to monitor in accordance with the assessment monitoring program as specified in paragraphs (24) through (33) of this Rule.
- (36) The assessment shall include an analysis of the effectiveness of potential corrective measures in meeting all of the requirements and objectives of the remedy as described in paragraphs (38) through (43) of this Rule addressing at least the following:
- (a) The performance, reliability, ease of implementation, and potential impacts of appropriate potential remedies, including safety impacts, cross media impacts, and control of exposure to any residual contamination;
 - (b) The time required to begin and complete the remedy;
 - (c) The cost of remedy implementation; and
 - (d) Other environmental or public health requirements that may substantially affect implementation of the remedy(s).
 - (e) Local, state or federal permit requirements.
- (37) The owner or operator must discuss the results of the corrective measures assessment, prior to the selection of remedy, in a public meeting with interested and affected parties.

- (38) Selection of Remedy. Based on the results of the corrective measures assessment conducted under paragraphs (34) through (37) of this Rule, the owner or operator must select a remedy that, at a minimum, meets the standards listed in paragraph (39) of this Rule and develop a Corrective Action Plan (CAP) for implementation of the remedy. The owner or operator must notify the Director, within 14 days of selecting a remedy, that. The owner or operator must notify the Director, within 14 days of selecting a remedy, that a report describing the selected remedy has been placed in the operating record and how it meets the standards in paragraph (39) of this Rule.
- (39) Remedies must:
- (a) Be protective of human health and the environment;
 - (b) Attain the groundwater protection standard as specified pursuant to paragraph (31) or (32) of this Rule.
 - (c) Control the source(s) of releases so as to reduce or eliminate, to the maximum extent practicable, further releases of Appendix II constituents into the environment that may pose a threat to human health or the environment; and
 - (d) Comply with standards for management of wastes as specified in paragraph (47) of this Rule.
- (40) In selecting a remedy that meets the standards of paragraph (31) of this Rule, the owner or operators shall consider the following evaluation factors:
- (a) The long- and short-term effectiveness and protectiveness of the potential remedy(s), along with the degree of certainty that the remedy will prove successful based on consideration of the following:
 1. Magnitude of reduction of existing risks;
 2. Magnitude of residual risks in terms of likelihood of further releases due to waste remaining following implementation of a remedy;
 3. The type and degree of long-term management required, including monitoring, operation, and maintenance;
 4. Short-term risks that might be posed to the community, workers, or the environment during implementation of such a remedy, including potential threats to human health and the environment associated with excavation, transportation, and redispal or containment;
 5. Time until full protection is achieved;
 6. Potential for exposure of humans and environmental receptors to remaining wastes, considering the potential threat to human health and the

environment associated with excavation, transportation, redisposal, or containment;

7. Long-term reliability of the engineering and institutional controls; and
 8. Potential need for replacement of the remedy.
- (b) The effectiveness of the remedy in controlling the source to reduce further releases based on consideration of the following factors;
1. The extent to which containment practices will reduce further releases;
 2. The extent to which treatment technologies may be used.
- (c) The ease or difficulty of implementing a potential remedy(s) based on consideration of the following types of factors:
1. Degree of difficulty associated with construction the technology;
 2. Expected operational reliability of the technologies;
 3. Need to coordinate with and obtain necessary approvals and permits from other agencies;
 4. Availability of necessary equipment and specialists; and
 5. Available capacity and location of needed treatment, storage, and disposal services.
- (d) Practicable capability of the owner or operator, including a consideration of the technical and economic capability.
- (e) The degree to which community concerns are addressed by a potential remedy(s).
- (41) The owner or operator shall specify as part of the selected remedy a schedule(s) for initiating and completing remedial activities. Such a schedule must require the initiation of remedial activities within a reasonable period of time taking into consideration the factors set forth in subparagraphs (41)(a) through(h) of this Rule. The owner or operator must consider the following factors in determining the schedule or remedial activities.
- (a) Extent and nature of contamination;
 - (b) Practical capabilities of remedial technologies in achieving compliance with groundwater protection standards established in paragraph (31) or (32) of this Rule and other objectives of the remedy;

- (c) Availability of treatment or disposal capacity for wastes managed during implementation of the remedy;
 - (d) Desirability of utilizing technologies that are not currently available, but which may offer significant advantages over already available technologies in terms of effectiveness, reliability, safety, or ability to achieve remedial objectives.
 - (e) Potential risks to human health and the environment from exposure to contamination prior to completion of the remedy;
 - (f) Resource value of the aquifer including:
 - 1. Current and future uses;
 - 2. Proximity and withdrawal rate of users;
 - 3. Groundwater quantity and quality;
 - 4. The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents;
 - 5. The hydrologic characteristic of the facility and surrounding land;
 - 6. Groundwater removal and treatment costs; and
 - 7. The cost and availability of alternative water supplies.
 - (g) Practicable capability of the owner or operator.
 - (h) Other relevant factors.
- (42) The Director may determine that remediation of a release of an Appendix II constituent from a MSWLF unit is not necessary if the owner or operator demonstrates to the satisfaction of the Director that:
- (a) The groundwater is additionally contaminated by substances that have originated from a source other than a MSWLF unit and those substances are present in concentrations such that cleanup of the release from the MSWLF unit would provide no significant reduction in risk to actual or potential receptors; or
 - (b) The constituent(s) is present in groundwater that:
 - 1. Is not currently or reasonably expected to be a source of drinking water; and
 - 2. Is not hydraulically connected with waters to which the hazardous constituents are migrating or are likely to migrate in a concentration(s) that

would exceed the groundwater protection standards established under paragraph (31) or (32) of this Rule; or

- (c) Remediation of the release(s) is technically impracticable; or
 - (d) Remediation results in unacceptable cross-media impacts.
- (43) A determination by the Director pursuant to paragraph (42) of this Rule shall not affect the authority of the state to require the owner or operator to undertake source control measures or other measures that may be necessary to eliminate or minimize further releases to the groundwater, to prevent exposure to the groundwater, or to remediate the groundwater to concentrations that are technically practicable and significantly reduce threats to human or the environment.
- (44) Implementation of the Corrective Action Program. Based on the schedule established under paragraph (41) of this Rule for initiation and completion of remedial activities, the owner or operator must:
- (a) Establish and implement a corrective action groundwater monitoring program that;
 1. At a minimum, meets the requirements of an assessment monitoring program under paragraphs (24) through (33) of this Rule;
 2. Indicates the effectiveness of the corrective action remedy; and
 3. Demonstrates compliance with groundwater protection standard pursuant to paragraph (48) of this Rule.
 - (b) Implement the corrective action remedy selected under paragraphs (38) through (43) of this Rule; and
 - (c) Take any interim measures necessary to ensure the protection of human health and the environment. Interim measures should, to the greatest extent practicable, be consistent with the objectives of and contribute to the performance of any remedy that may be required pursuant to paragraphs (28) through (43) of this Rule. The following factors must be considered by an owner or operator in determining whether interim measures are necessary.
 1. Time required to develop and implement a final remedy;
 2. Actual or potential exposure of nearby populations or environmental receptors to hazardous constituents;
 3. Actual or potential contamination of drinking water supplies or sensitive ecosystems;

4. Further degradation of the groundwater that may occur if remedial action is not initiated expeditiously;
5. Weather conditions that may cause hazardous constituents to migrate or be released;
6. Risks of fire or explosion, or potential for exposure to hazardous constituents as a result of an accident or failure of a container or handling system; and
7. Other situations that may pose threats to human health and the environment.

- (45) An owner or operator may determine, based on information developed after implementation of the remedy has begun or other information, that compliance with requirements paragraph (31) of this Rule are not being achieved through the remedy selected. In such cases, the owner or operator must implement other methods or techniques that could practicably achieve compliance with the requirements, unless the owner or operator makes the determination under paragraph (46) of this Rule.
- (46) If the owner or operator determines that compliance with requirements under paragraph (31) of this Rule cannot be practically achieved with any currently available methods, the owner or operator must:
- (a) Obtain certification of a qualified groundwater scientist or approval by the Director that compliance with requirements under paragraph (31) of this Rule cannot be practically achieved with any currently available methods;
 - (b) Implement alternate measures to control exposure of humans or the environment to residual contamination, as necessary to protect human health and the environment; and
 - (c) Implement alternate measures for control of the sources of contamination, or for removal or decontamination of equipment, units, devices, or structures that are:
 1. Technically practicable; and
 2. Consistent with the overall objective of the remedy.
 - (d) Notify the Director within 14 days that a report justifying the alternative measures prior to implementing the alternative measures has been placed in the operating record.

- (47) All solid wastes that are managed pursuant to a remedy required in paragraphs (38) through (43) of this Rule, or an interim measure required in paragraph (44)(c) of this Rule, shall be managed in a manner:
- (a) That is protective of human health and the environment; and
 - (b) That complies with applicable state Solid and Hazardous Waste Management Rules and federal Solid and Hazardous Waste Management Rules.
- (48) Remedies selected pursuant to paragraphs (38) through (43) of this Rule shall be considered complete when:
- (a) The owner or operator complies with the groundwater protection standards established under paragraph (31) or (32) of this Rule at all points within the plume of contamination that lie beyond the groundwater monitoring well system established under paragraph (8) of this Rule.
 - (b) Compliance with the groundwater protection standards established in paragraph (30) or (31) of this Rule has been achieved by demonstrating that concentrations of Appendix II constituents have not exceeded the groundwater protection standard(s) for a period of three consecutive years using the statistical procedures and performance standards in paragraphs (18) and (19) of this Rule. The Director may specify an alternative length of time during which the owner or operator must demonstrate that concentrations of Appendix II constituents have not exceeded the groundwater protection standard(s) taking into consideration:
 - 1. Extent and concentration of the release(s);
 - 2. Behavior characteristics of the hazardous constituents in the groundwater;
 - 3. Accuracy of monitoring or modeling techniques, including any seasonal, meteorological, or other environmental variabilities that may affect the accuracy; and
 - 4. Characteristics of the groundwater.
 - (c) All actions required to complete the remedy have been satisfied.
- (49) Upon completion of the remedy, the owner or operator must notify the Director within 14 days that a certification that the remedy has been completed in compliance with the requirements of paragraph (48) of this Rule has been placed in the operating record. The certification must be signed by the owner or operator and by a professional geologist, geotechnical or professional engineer registered to practice in Georgia and approved by the Director.
- (50) When upon completion of the certification, the owner or operator determines that the corrective action remedy has been completed in accordance with the requirements in

paragraph (48) of this Rule, the owner or operator shall be released from the requirements for financial assurance for corrective action under Rule [391-3-4-.13](#).

History. Original Rule entitled "Ground Water Monitoring and Corrective Action" was F. Jun. 9, 1989; eff. Jun. 29, 1989.

Amended: F. Sept. 4, 1991; eff. Sept. 24, 1991.

Amended: F. Jun. 7, 1993; eff. Jun. 27, 1993.

Amended: F. Nov. 2, 2016; eff. Nov. 22, 2016.

Amended: F. Mar. 8, 2018; eff. Mar. 28, 2018.

Rule 391-3-4-.15. Biomedical Waste.

- (1) All persons subject to regulation under Rule .15 shall, in addition to the requirements of Rule .15, handle biomedical waste in accordance with the provisions of O.C.G.A. [12-8-20](#), et seq., and the Rules for Solid Waste Management, Chapter 391-3-4 applicable to solid waste.
- (2) Biomedical waste shall mean and include the following:
 - (a) Pathological waste, which means all recognizable human tissues and body parts except teeth which are removed during surgery, obstetrical procedures, autopsy, and laboratory procedures.
 - (b) Biological waste, which means blood and blood products, exudates secretions, suctionings, and other body fluids which contains free liquids and cannot be or are not directly discarded into a municipal sewer system.
 - (c) Cultures and stocks of infectious agents and associated biologicals including cultures from medical and pathological laboratories, cultures and stocks of infectious agents from research and industrial laboratories, wastes from the production of biologicals, discarded live and attenuated vaccines, and culture dishes and devices used to transfer, inoculate, and mix cultures.
 - (d) Contaminated animal carcasses, body parts, their bedding, and other wastes from such animals which are infected with or which have been exposed to infectious agents, capable of causing disease in man.
 - (e) Sharps, which means any discarded article that may cause punctures or cuts. Such waste includes, but is not limited to, items such as needles, IV tubing and syringes with needles attached, and scalpel blades.
 - (f) Chemotherapy waste, which means any disposable material which has come in contact with cytotoxic/antineoplastic agents (agents toxic to cells) and/or antineoplastic agents (agents that inhibit or prevent the growth and spread of

tumors or malignant cells) during the preparation, handling, and administration of such agents. Such waste includes, but is not limited to, masks, gloves, gowns, empty IV tubing bags and vials, and other contaminated materials. The above waste must first be classified as empty which means such quantity that it is not subject to other federal or state waste management regulations prior to being handled as biomedical waste.

- (g) Discarded medical equipment and parts, excluding expendable supplies and materials included in paragraphs (a) through (f) of this Rule, which have not been decontaminated, and that were in contact with infectious agents.

(3) Generation of Biomedical Waste.

- (a) Unless otherwise exempted, Rule 391-3-4-.15 shall apply to all persons generating or handling biomedical waste, including but not limited to: ambulatory service centers, blood banks, clinics, county health departments, dental offices, funeral homes, health maintenance organizations (HMOs), hospitals, laboratories, medical buildings, physicians offices, veterinary offices, research and manufacturing facilities, nursing homes, and biomedical waste transportation, storage, treatment, and disposal facilities.
- (b) Partial exemption: facilities which generate less than 100 pounds per month of biomedical waste shall be exempt from all provisions of Rule 391-3-4-.15 except that they shall comply fully with the provisions of Rule 391-3-4-.15(4)(a), (4)(b), (4)(b)1., (4)(b)2., (4)(c), (6)(c), and (7)(b). For purposes of this Rule, a facility is defined as one or more persons generating biomedical waste who share common waste management services including, but not limited to, bulk storage containers.
- (c) Total exemption: in no case shall a person be generator of biomedical waste if those wastes are generated from single-family residential premises or a single-family dwelling unit in the self-care and treatment of family members living in those premises or units and disposed of as residential solid waste. Home health care organizations or physicians treating patients in a home are not exempt unless otherwise exempted in (b) above.
- (d) All requirements of this Rule shall apply to persons or facilities who generate 100 pounds or more biomedical waste per month.

(4) Storage and Containment of Biomedical Waste.

- (a) Containment of biomedical waste shall be a manner and location which affords protection from animals, rain and wind, does not provide a breeding place or a food source for insects and rodents, and minimizes exposure to the public.
- (b) Biomedical waste shall be segregated by separate containment from other waste at the point of origin.

1. Biomedical waste, except for sharps, shall be placed in containers which are impervious to moisture and have a strength sufficient to preclude ripping, tearing, or bursting under normal conditions of use. The containers shall be securely closed so as to prevent leakage or expulsion of solid or liquid wastes during storage, handling, or transport.
 2. Sharps shall be contained for storage, transportation, treatment and subsequent disposal in leakproof, rigid, puncture-resistant containers which are taped closed or tightly lidded to preclude loss of contents.
- (c) Rigid containers of discarded sharps and all other disposable containers used for containment of biological waste shall be red or orange in color or clearly identified with the universal biohazard symbol or clearly marked with the word "Biohazard".
- (d) Biomedical waste contained in disposable containers as prescribed above, shall be placed for storage, handling, or transport in disposable or reusable pails, cartons, boxes, drums, dumpsters, or portable bins. The containment system shall have a tight fitting cover and be kept clean and in good repair. The containers may be of any color and shall be conspicuously labeled with the universal biohazard symbol and the word "Biohazard" on the sides so as to be readily visible from any lateral direction when the container is upright.
1. Reusable containers used for shipment of biomedical waste shall be thoroughly washed and decontaminated each time they are emptied.
 2. Reusable pails, drums, dumpsters or bins used for containment of biomedical waste shall not be used for other purposes except after being decontaminated by procedures as described in (4)(d)1. above and after the universal biohazard symbol and word "Biohazard" are removed.
- (5) Transfer of Biomedical Waste to Off-Site Treatment or Disposal Facilities.
- (a) Any generator of biomedical waste shall transfer custody of the waste only to a collector who is operating under authority of these Rules.
 - (b) Biomedical waste shall not be transported in the same vehicle with other solid waste unless the biomedical waste is contained in a separate, fully enclosed leakproof container within the vehicle compartment or unless all of the waste is to be treated as biomedical waste in accordance with the requirements of these Rules.
 - (c) Biomedical waste shall be delivered for storage, including intermediate transfer, and treatment only to a facility or location for which there is a valid and appropriate operating permit as set forth in these Rules.

- (d) Surfaces of transport vehicles that have contacted spilled or leaked biomedical waste shall be decontaminated.
 - (e) Equipment used to transport waste from the generator to the off-site treatment or disposal facility may not destroy the integrity of the container.
 - (f) Vehicles used for the transport of biomedical waste shall not be used for transportation of food or food products.
- (6) Treatment of Biomedical Waste.
- (a) If treated in accordance with the following procedures, the waste shall no longer be considered biomedical waste and may be combined and handled with regular solid waste. Biomedical waste shall be treated by one of the following methods prior to disposal at a permitted waste disposal facility.
 1. Incineration in the thermal treatment technology facility which provides complete combustion of waste to render it nonpathogenic.
 - (i) Biomedical waste thermal treatment technology facilities shall be capable of maintaining a minimum temperature in the primary chamber sufficient to destroy infectious agents and procedure a residue essentially free of odors and unstable organic matter. If chemotherapy wastes are incinerated, the facility must be capable of maintaining a minimum of 1,800 degrees Fahrenheit in the secondary combustion chamber and a minimum residence time of two seconds.
 - (ii) Atmospheric emissions shall be controlled so as not to exceed air quality standards of the Division.
 2. Decontamination by heating with steam under pressure (autoclave) so as to render the biomedical waste noninfectious.
 - (i) A recording thermometer shall be used during each complete cycle to ensure the attainment of a temperature of 121 degrees Centigrade (250 degrees Fahrenheit) for one-half hour or longer in order to achieve decontamination of the entire load.
 - (ii) Monitoring of the steam sterilization process shall be required in order to confirm the attainment of decontamination.
 - (iii) Monitoring may be through the use of biological indicators or other methods as approved by the Director. Indicators used to ensure the attainment of the proper temperature during steam sterilization shall be placed at the point of the load where the rate of thermal penetration is at a minimum.

3. Other methods as may be approved by the Director.
 - (b) Fluid or semisolid waste specified in (2)(b) of this Rule may be discharged to a sewage treatment system that provides secondary treatment of waste if approved by the agency responsible for the operation of the sewage treatment system.
 - (c) Biomedical wastes consisting of recognizable human anatomical remains shall not be disposed of by landfilling.
 - (d) Chemotherapy waste, as defined in (2)(f), shall be treated at a permitted thermal treatment technology facility or other facility approved by the Director. Steam decontamination may not be used for the treatment of chemotherapy waste.
 - (e) All facilities treating regulated quantities of biomedical waste must, at a minimum, comply with the above criteria. Commercial biomedical waste treatment facilities may not construct or operate a biomedical waste treatment facility without first obtaining a solid waste handling permit under these Rules. On-site biomedical waste treatment facilities are required to obtain a solid waste permit-by-Rule, and must comply with the provisions of paragraph (6)(a)-(d) of this Rule, in addition to Rule [391-3-4-.06](#). For purposes of this Rule, "Commercial biomedical waste treatment facility" means a facility which accepts over 25 percent of its biomedical waste from other, off-site, facilities, which are not owned by the facility owning the treatment or disposal facility, generally for a fee.
- (7) Disposal of Biomedical Waste.
 - (a) Biomedical wastes treated in accordance with the provisions in Rule 391-3-4-.15(6), shall be properly disposed of at a facility permitted under the authority of these Rules unless otherwise approved by the Director.
 - (b) Biomedical waste from generators of less than 100 pounds per month shall be properly disposed of at a municipal solid waste landfill or treatment facility permitted under authority of these Rules or other facilities approved by the Director.
 - (c) The disposal of untreated biomedical waste, from generators of more than 100 pounds per month, by landfilling is prohibited.

History. Original Rule entitled "Biomedical Waste" was F. Jun. 9, 1989; eff. Jun. 29, 1989.

Amended: F. Sept. 4, 1991; eff. Sept. 24, 1991.

Amended: F. Jun. 7, 1993; eff. Jun. 27, 1993.

Rule 391-3-4-.16. Composting and Anaerobic Digestion Facilities.

- (1) Composting is a desirable means of reducing the amount of solid waste destined for disposal. All composting facilities not exempted in 391-3-4-.16(3) shall either be regulated under Permit-by-Rule in 391-3-4-.16(5)(b) or shall obtain a Solid Waste Handling Permit in accordance with either 391-3-4-.16(5)(c), 391-3-4-.16(5)(d), 391-3-4-.16(5)(e), or 391-3-4-.16(5)(f) depending on the technology employed and feedstocks processed.
 - (a) Composting facilities in existence on the effective date of this Rule may continue to operate until March 31, 2015 under their existing permit, or Permit-by-Rule, before demonstrating compliance under conditions (i) - (vii) of this section. Existing facilities requesting major modifications after the effective date of this Rule must fully comply with this Rule. Facilities that cannot demonstrate compliance with conditions (i) - (vii) of this section by March 31, 2015 shall initiate closure.
 - (i) Existing Permit-by-Rule composting facilities that meet the criteria of 391-3-4-.16(5)(b) 1. must comply with the operating standards of Class 2 Composting Facilities, but are exempted from the design standards of Class 2 Composting Facilities.
 - (ii) Existing permitted composting facilities that classify as Class 3 Composting Facilities in 391-3-4-.16(5)(c) 1. and 2. must comply with the operating standards of Class 3 facilities, but are exempted from the design standards of Class 3 facilities.
 - (iii) Existing permitted composting facilities that classify as Class 4 Composting Facilities in 391-3-4-.16(5)(d) 1. and 2. must comply with the operating standards of Class 3 and Class 4 facilities, but are exempted from the design standards of Class 3 and Class 4 facilities.
 - (iv) Existing permitted composting facilities that classify as Class 5 Composting Facilities in 391-3-4-.16(5)(e) 1. must comply with the operating standards of Class 3, Class 4, and Class 5 facilities, but are exempted from the design standards of Class 3, Class 4, and Class 5 facilities.
 - (v) Existing permitted composting facilities that classify as Class 6 In-vessel Composting and Anaerobic Digestion Facilities in 391-3-4-.16(5)(f) 1. must comply with the operating standards of Class 6 facilities, but are exempted from the design standards of Class 6 facilities.
 - (vi) All existing composting and anaerobic digestion facilities are exempt from the siting criteria of 391-3-4-.16(6), unless applying for a major modification as in 391-3-4-.16(7)(a) 1. or 2.

- (vii) All existing composting and anaerobic digestion facilities, other than those operating as Permit-by-Rule facilities, must comply with the testing requirements of 391-3-4-.16(8).

(2) Definitions. For the purposes of this Rule:

- (a) "Aerated Static Pile Composting" means a process in which decomposing organic material is placed in piles over an air distribution system to supply oxygen for the purpose of producing compost.
- (b) "Agricultural Residuals" means the residuals from customary and generally accepted activities, practices, and procedures that farmers adopt, use, or engage in during the production and preparation for market of poultry, livestock, and associated farm products; and in the production and harvesting of agricultural crops, which include agronomic, horticultural, and silvicultural crops, and residuals resulting from aquacultural activities. It also includes residuals from harvesting and production of row crops and manures. The term does not include dead animals, wastewater or special wastes, such as waste oils or other lubricants, unused fertilizers, pesticides, or pesticide containers.
- (c) "Anaerobic Digester" means an enclosed vessel that processes organic material under anaerobic conditions to produce biogas and digestate.
- (d) "Anaerobic Digestion" means the controlled decomposition of organic material under anaerobic conditions in an anaerobic digester to produce biogas and digestate.
- (e) "Backyard Composting" means composting of yard trimmings and food residuals, managed so as not to attract vectors, at residential, commercial, or industrial property by the owner or tenant for use on site. All feedstocks must be generated and composted on site.
- (f) "Biogas" means gas generated by anaerobic digestion.
- (g) "Compost" means a stabilized organic product produced by a controlled aerobic decomposition process that can be used as a soil additive, fertilizer, growth media or other beneficial use.
- (h) "Composting Facility" means buildings, grounds and equipment dedicated to the manufacture of compost.
- (i) "Contact Water" means a liquid that has passed through or emerged from raw feedstocks and materials that are being processed; liquid that has come into contact with equipment that is dedicated to the composting or anaerobic digestion process; and which contains extracted, dissolved or suspended materials. Contact water also

includes condensate from gases resulting from the composting and the anaerobic digestion processes.

- (j) "Curing" means, for the purposes of composting and anaerobic digestion, a continuation of the composting process after the high heat stage during which stability and maturity continue to increase. For the purposes of these regulations, compost enters the curing stage after completing the process to further reduce pathogens.
- (k) "Digestate" means the residual solids or liquids remaining after organic material has been processed in an anaerobic digester.
- (l) "Feedstock" means any organic material used in the production of compost or processed in an anaerobic digester. Feedstocks shall not include additives or amendments that are not part of the composting process.
- (m) "Food Processing Residuals" means organic material generated as a by-product of the food-processing sector that is non-hazardous and contains no domestic wastewater. For the purposes of these regulations, the term applies to use as a feedstock in the composting or anaerobic digestion process and does not include dissolved air flotation (DAF) skimmings or fats, oil, and greases.
- (n) "Food Residuals" means pre- and post-consumer food used as a feedstock in a composting or anaerobic digestion facility.
- (o) "Industrial By-product" means organic materials generated by manufacturing or industrial processes that are non-hazardous, contain no domestic wastewater, and pass the paint filter test.
- (p) "In-vessel Composting" means the aerobic decomposition of organic material in an enclosed container for the purpose of producing compost.
- (q) "Maturity" means a measure of the degree of completion of the composting process.
- (r) "Source-separated Organics" means organic material including, but not limited to, food residuals, food processing residuals, and compostable paper that has been separated from non-compostable material.
- (s) "Stability" means the inverse measure of the potential for a material to rapidly decompose that is measured by indicators of microbial activity, such as carbon dioxide production, oxygen uptake, or self-heating.

(3) Exemptions.

- (a) The following composting operations are exempt from a Solid Waste Handling Permit:
1. Backyard composting.
 2. A facility composting only Category A feedstock.
 3. A facility processing less than 40 tons per year of food residuals generated on site and composted in leak-proof containers that prohibit vector attraction and prevent nuisance odor generation.
 4. Composting of food residuals and yard trimmings generated on site at a K-12 institution for educational purposes.
 5. Composting of biosolids at a treatment works regulated by a National Pollutant Discharge Elimination System (NPDES) permit, Land Application System (LAS) permit, or other permit from EPD, and in which case that permit has been modified in accordance with the Georgia Rules for Water Quality Control [391-3-6-.17\(3\)\(c\) 1.](#) to incorporate any necessary requirements for regulating the composting operation.
 6. Composting of dead animals, provided such composting is in accordance with the requirements of the Georgia Dead Animal Disposal Act (O.C.G.A. § 4-5) and Georgia Department of Agriculture Rules (Chapter 40-13-5).
 7. Anaerobic digestion facilities that are permitted in accordance with the Georgia Rules for Water Quality Control. These include facilities located at a wastewater treatment plant and on-farm anaerobic digesters or lagoons.
 8. Manures managed in accordance with the Georgia Rules for Water Quality Control.

(4) Feedstock Categories.

- (a) The categories described below are not intended to be all-inclusive. Case-by-case determinations by the Division may be necessary concerning selection of the appropriate category for a particular feedstock, including industrial by-products not elsewhere classified. Accordingly, the Division may require that analytical and/or process information be supplied by the owner or operator to assist in making such determinations. At a minimum, the Division will require applicants to provide an analysis of metals and proof of compostability of the potential feedstock, including C:N ratio and soluble salts.
1. Feedstock Category A: Yard trimmings, land-clearing debris, agricultural residuals generated and processed on site, untreated and unpainted wood, or any combination thereof.

2. Feedstock Category B: Agricultural residuals generated off site, herbivorous animal manure generated at a zoo, and/or source-separated organics.
3. Feedstock Category C: Sewage sludge and biosolids not managed as part of a treatment works under an NPDES or LAS permit.
4. Feedstock Category D: Dissolved air flotation (DAF) skimmings or sludge generated from food processing and dewatered septage.

(b) Prohibited feedstocks include:

1. Asbestos-containing wastes.
2. Biomedical wastes.
3. Painted and treated wood.
4. Any other prohibited wastes included in [391-3-4-.04\(6\)](#).

(5) Design and Operating Standards for Composting Facilities by Class.

(a) Class 1 Composting Facilities

1. Facilities composting only Category A feedstock do not require a Solid Waste Handling Permit.
2. A permitted solid waste handling facility shall submit a minor modification prior to adding a Class 1 composting operation on site.

(b) Class 2 Composting Facilities

1. Facilities composting Category A and B feedstocks that meet both of the following criteria may operate under a Permit-by-Rule for Composting Facilities:
 - (i) Facilities receiving less than 500 tons of Category B feedstock per calendar month.
 - (ii) For Class 2 facilities, Category B feedstocks shall be restricted to exclude the receipt of non-vegetative food processing residuals and manures.
2. The design standards for Class 2 facilities include:

- (i) The composting area shall be constructed to maintain its structural integrity under operating conditions and be capable of supporting vehicular traffic.
 - (ii) The composting facility shall be adequate in size and capacity to manage the projected volume of compost and residue generated. The areas for storing feedstocks prior to processing shall be clearly defined and the maximum capacity specified.
 - (iii) For windrow operations, the maximum composting process windrow size and minimum composting process windrow spacing shall match the capability and requirements of the equipment used at the facility.
3. The operating standards for Class 2 facilities include:
- (i) The composting facility shall have a sign at its entrance that lists the name of the facility, hours of operation, feedstocks accepted, and emergency contact information.
 - (ii) The composting facility shall have storm water control measures.
 - (iii) The composting facility shall prevent flow of contact water from the active composting area into surface water and curing or finished compost areas.
 - (iv) Suitable measures to control vectors shall be applied.
 - (v) Suitable measures to control odors shall be applied.
 - (vi) Suitable measures to prevent, control, and extinguish fires shall be applied.
 - (vii) By the end of each operating day, all incoming Category B feedstock must be processed into the active composting area, transferred to leak-proof containment, or mixed with bulking material and covered in a manner that minimizes nuisance odors and scavenging by vectors.
 - (viii) No material shall be stored in excess of the designated capacity.
 - (ix) Storage of finished compost on site is limited to 12 months, unless approved by the Division on a case-by-case basis.

- (x) Non-compostable material and solid waste generated on site shall be stored in a waste container and then either recycled or disposed of at a permitted solid waste facility.
- (xi) Facilities accepting Category B feedstocks from off site shall track incoming feedstocks and finished compost. Records documenting compliance of the composting facility with these Rules shall be kept for a minimum of three years in a form suitable for submission to or inspection by the Division. Records shall include the weight or volume (in tons or cubic yards) of the feedstocks accepted, total compost produced, and any amount sold or used. Records shall be retained at the composting facility unless an off- site storage location is approved by the Division.
- (xii) Operation and management shall be under the supervision and control of an individual properly trained in the operation of such facilities at all times. Facility operations managers must be able to document training in the basics of composting facility operations.
- (xiii) Notice of final closure shall be provided to the Director within 60 days from final receipt of feedstock. Any site not receiving feedstock in excess of 180 days, unless properly closed or otherwise approved by the Division, shall be deemed closed and in violation of these Rules. Notice of closure shall include documentation that all feedstocks and active, curing, and final compost materials have been removed from the facility and that the site has been stabilized in accordance with the Manual for Erosion and Sediment Control in Georgia.

(c) Class 3 Composting Facilities

1. Any composting facility that is neither exempt under 391-3-4-.16(3), nor meets the conditions for Class 2 Composting Facilities in 391-3-4-.16(5)(b), shall obtain a permit in accordance with following requirements:
2. Class 3 composting facilities may compost Category A and B feedstocks.
3. The design standards for Class 3 facilities include:
 - (i) The composting facility shall be designed by a professional engineer licensed to practice in Georgia.
 - (ii) An all-weather compost pad shall be designed, constructed, and maintained to (1) prevent ponding and impede downward migration

of potential contaminants from contact water; (2) reliably transmit any free liquid present during the storage, treatment, and processing of materials laterally to a containment structure to prevent liquids from entering surface water or groundwater; (3) support vehicular traffic; and (4) prevent conditions that could contribute to or cause contamination.

- (iii) Surfaces on which composting takes place shall be graded with a slope between 2% and 6% to prevent ponding of water.
- (iv) The site shall be graded to prevent the flow of water from the active composting area into curing or finished compost areas.
- (v) Prior to receiving feedstocks, the Division shall be provided with written certification by a professional engineer licensed to practice in Georgia, that the facility has been constructed in accordance with the approved permit. Unless notified otherwise by the Division, within 15 days of receipt of the written certification, the facility owner or operator may commence composting operations.
- (vi) The owner or operator shall fully satisfy all applicable financial responsibility requirements, as provided by Chapter [391-3-4-.13](#). The financial assurance mechanism shall be updated at least annually for inflation and for any modifications required and approved by the Division.
- (vii) An as-built survey of the facility, prepared by a Georgia-registered professional surveyor, shall be submitted with the engineering certification.
- (viii) Contact water collection and removal systems shall be designed for incorporating the liquid back into the compost piles or for removal and treatment in a manner approved by the Division. Contact water may be used in the composting operation for moisture addition only in active compost piles that have not completed the process to further reduce pathogens.
- (ix) The maximum composting process windrow size and minimum composting process windrow spacing shall match the capability and requirements of the equipment used at the facility.
- (x) The composting facility shall submit a site-specific odor minimization plan that includes, at a minimum, the following:

- (I) A complaint response protocol.
 - (II) A description of operating procedures for minimizing odor.
 - (III) A description of the processes and technologies used to control odors.
 - (IV) A description of procedures to monitor odor, including sampling frequencies and method(s) used to measure odors.
- (xi) The composting facility shall submit a contingency plan detailing corrective or remedial actions to be taken in the event of equipment breakdown; odors; unacceptable waste delivered to the facility; spills; and other undesirable conditions such as fire, dust, noise, vectors, unusual traffic conditions, and litter. The plan shall also include the proposed emergency provisions for equipment breakdown or power failure.

4. The operating standards for Class 3 include:

- (i) Operation and management shall be under the supervision and control of an individual properly trained in the operation of such facilities at all times. Facility operations managers must be able to document training in the basics of composting facility operations.
- (ii) The facility shall install and maintain storm water management controls.
- (iii) Suitable measures to control vectors shall be applied.
- (iv) Suitable measures to prevent, control, and extinguish fires shall be applied.
- (v) By the end of each operating day, all incoming Category B feedstock shall be processed into the active composting area, transferred to leak-proof containment, or mixed with bulking material and covered in a manner that minimizes nuisance odors and scavenging by vectors. Prior to being incorporated into the active composting area, feedstocks with free liquid shall be mixed with drier feedstocks, bulking material, or compost so that the liquid is promptly absorbed and not allowed to flow from the mixing area.
- (vi) Compost processing time and temperatures shall be sufficient to kill weed seeds, reduce pathogens and vector attraction, and produce

compost that meets the stability necessary for the intended use. Pathogen and vector attraction reduction compliance shall be achieved as follows:

- (I) Windrow composting: The compost material shall be maintained at a minimum average temperature of 55°C or higher for 15 days or longer. During the period when the compost is maintained at 55°C or higher, there shall be a minimum of five turnings of the windrow. The 15 or more days at or above 55°C do not have to be continuous.
 - (II) Aerated static pile or in-vessel composting: The compost material shall be maintained at a minimum average temperature of 55°C or higher for three consecutive days, followed by at least 14 days at over 40°C with an average temperature of over 45°C.
- (vii) Facilities using aerated static piles shall insulate piles to ensure that all parts of the decomposing material reach and maintain temperatures at or above 55°C for a minimum of three days.
 - (viii) The all-weather compost pad must be maintained to its specified slope and resist deformation that would cause ponding or increase infiltration of contact water.
 - (ix) Storage of finished compost on site is limited to 12 months, unless approved by the Division on a case-by-case basis.
 - (x) Non-compostable material and solid waste generated on site shall be stored in a waste container and then either recycled or disposed of at a permitted solid waste facility.
 - (xi) Records shall be maintained to track incoming feedstocks and finished compost. By September 1 of each year, operators shall submit a report to the Division that includes the weight or volume (in tons or cubic yards) of the feedstocks accepted, total compost produced, and any amount sold or used in the previous fiscal year (July 1 - June 30).
 - (xii) Records documenting compliance of the composting facility with these Rules shall be kept for a minimum of three years in a form suitable for submission to or inspection by the Division. Records shall be retained at the composting facility unless an off-site storage location is approved by the Division.

- (xiii) A facility odor minimization plan shall be maintained and updated as stipulated in the following:
 - (I) The odor impact minimization plan shall be revised and submitted to the Division for any major modification as described in 391-3-4-.16(7).
 - (II) The odor impact minimization plan shall be reviewed annually by the operator to determine if any revisions are necessary.
 - (III) The odor impact minimization plan and results of the odor monitoring shall be used by the Division to determine whether the facility is following the procedures approved in its permit and its design and operational plan.
- (xiv) The composting facility shall have a sign at its entrance that lists the name of the facility, permit number, days and hours of operation, feedstocks accepted, and emergency contact information.
- (xv) The composting facility shall be closed in accordance with Rule [391-3-4-.11](#).

(d) Class 4 Composting Facilities

1. Any composting facility that is neither exempt under 391-3-4-.16(2), nor meets the conditions for Permit-by-Rule for Composting Facilities in 391-3-4-.16(4)(b), shall obtain a permit in accordance with following requirements:
2. Class 4 composting facilities may compost Category A, B, and C feedstocks.
3. Class 4 composting facilities shall comply with the design and operating standards for Class 3 composting facilities and the additional design and operating standards listed below:
 - (i) The design standards for Class 4 include:
 - (I) The compost pad for the receiving, mixing, and active composting areas shall prohibit ponding and limit infiltration of contact water by being uniformly graded at a minimum slope of 2%. The compost pad shall contain a layer to limit

infiltration. This layer shall either be one foot in thickness with a hydraulic conductivity not exceeding 1×10^{-5} cm/sec or an approved alternative which meets or exceeds this specification for the purpose of limiting infiltration. The layer to limit infiltration shall be constructed on a prepared and compacted subsurface, and overlain by a wearing surface that will resist deformation, prevent ponding, and prevent the infiltration of contact water. A minimum separation of five feet is required between the bottom of the infiltration layer and the seasonal high water table. Industrial waste proposed for the use in the construction of the compost pad shall be approved by the Division.

- (II) Contact water shall be contained in a tank with secondary containment or in an impoundment with a liner system consisting of a one-foot layer of compacted soil with a hydraulic conductivity of no more than 1×10^{-7} cm/sec. The liner shall be overlain by a protective marker layer of sand or stone no less than one foot in thickness. An alternate liner system with the equivalent ability to limit infiltration may be approved by the Division.
- (ii) The operating standards for Class 4 include:
- (I) The composting pad shall be maintained and repaired as needed. Cracks or other defects identified in the wearing surface shall be promptly repaired under the supervision of the facility manager. Any repairs or reconstruction of the layer limiting infiltration shall be completed under the supervision of a professional engineer, who shall prepare a report and certification of the repairs. A copy of the report(s) shall be maintained in the facility's operating records. Compost materials shall not be placed in areas with damage to the infiltration layer, and berms or other diversions shall be installed to prevent run-on of contact water into these areas.
 - (II) Facilities that compost biosolids or sewage sludge shall comply with all applicable federal regulations regarding sludge management at 40 CFR 501; 40 CFR 503; and 40 CFR 503, Subpart B.
 - (III) Groundwater monitoring systems shall be designed and installed in accordance with [391-3-4-.14](#). Additionally:

- (A) Monitoring parameters shall be established based on the hydrogeologic data related to the site, the type of feedstocks accepted at the facility, and waste characterization analyses performed on incoming feedstocks.
- (B) Monitoring shall be conducted semi-annually, at a minimum.

(IV) By the end of each operating day, all incoming Category B and C feedstocks shall be processed into the active composting pile, transferred to leak-proof containment, or mixed with bulking material and covered in a manner that minimizes nuisance odors and scavenging by vectors.

(e) Class 5 Composting Facilities

1. Class 5 composting facilities may compost Category A, B, C, and D feedstocks.
2. Class 5 composting facilities shall comply with the design and operating standards for Class 3 and 4 composting facilities and the additional design and operating standards listed below:
 - (i) The design standards for Class 5 include: Reserved.
 - (ii) The operating standards for Class 5 include:
 - (I) The feedstock receiving and mixing areas shall be in an enclosed structure. The receiving area of the composting operation shall be constructed of asphalt, concrete, or a composite liner system. Receiving entrances shall be closed and under negative pressure during receipt and processing of Category D feedstocks.
 - (II) By the end of each operating day, all incoming Category B, C, and D feedstocks shall be processed into the active composting pile, transferred to leak-proof containment, or mixed with bulking material to minimize nuisance odors and scavenging by vectors.

(f) Class 6 In-vessel Composting and Anaerobic Digestion Facilities

1. Class 6 facilities employ in-vessel composting or anaerobic digestion. These facilities may process Category A, B, C, and D feedstocks.
2. The design standards for Class 6 facilities include:
 - (i) A description of the basic site design.
 - (ii) A description of the type of technology to be used, including a copy of the drawings and specifications of the composting or digestion equipment and a process flow diagram that includes the types of the major material handling equipment and material flow.
 - (iii) A description of the unit's requirements for power, water, and wastewater removal.
 - (iv) A description of the type and quantities of feedstock to be processed.
 - (v) A description of the storage capacity for feedstocks, products and digestate, if applicable.
 - (vi) Anticipated annual operational capacity in cubic yards or gallons per day.
 - (vii) A description of the proposed methods used to control spills, run-off, litter, odors, dust, rodents, and insects, including the storage of feedstocks, compost and digestate, leak-prevention and spill release measures, and the methods to monitor effectiveness for control measures.
 - (viii) The facility shall have a site-specific odor minimization plan that includes, at a minimum, the following:
 - (I) A complaint response protocol.
 - (II) A description of operating procedures for minimizing odor.
 - (III) A description of the processes and technologies used to control odors.
 - (ix) A contingency plan detailing corrective or remedial actions to be taken in the event of equipment breakdown; odors; unacceptable waste delivered to the facility; spills; and other undesirable conditions such as fire, dust, noise, vectors, unusual traffic conditions, and litter. The plan shall also include the proposed emergency provisions for equipment breakdown or power failure.

3. The operating standards for Class 6 facilities include:
- (i) Operation and management shall be under the supervision and control of an individual properly trained in the operation of such facilities at all times. Facility operations managers must be able to document training in the basics of composting and/or anaerobic digestion operations through a course approved by the Division.
 - (ii) The facility shall have a sign at its entrance that lists the name of the facility, permit number, days and hours of operation, feedstocks accepted, and emergency contact information.
 - (iii) The facility shall install and maintain storm water management controls.
 - (iv) Suitable measures to control vectors shall be applied.
 - (v) Suitable measures to prevent, control, and extinguish fires shall be applied.
 - (vi) The operator shall take measures to prevent spillage and promptly respond to any leaks or spills that occur.
 - (vii) By the end of each operating day, all incoming Category B, C, and D feedstocks shall be processed, transferred to leak-proof containment, or mixed with bulking material and covered in a manner that minimizes odors and scavenging by vectors. For facilities with an anaerobic digester, the feedstocks can be stored in leak-proof containers with lids that prevent vector or odor problems for a period of time to allow for proper organic loading of the digester. This time period shall not exceed four days.
 - (viii) Digestate not contained in an in-vessel digester, sealed container, or sealed structure, shall, within 24 hours, be removed from the site and either disposed or processed at a permitted solid waste facility or incorporated into a permitted, on-site compost operation. Digestate may be stored in a sealed container or sealed structure for up to nine months. By-products from the separation of digestate shall be stored separately and in sealed containers.
 - (ix) Non-compostable waste shall be stored in a waste container and then recycled or disposed of at a permitted solid waste facility.
 - (x) For in-vessel composting operations, the operator shall ensure that the composting process reduces pathogens. The compost material

shall be maintained at a minimum average temperature of 55°C or higher for three consecutive days, followed by at least 14 days at over 40°C with an average temperature of over 45°C.

- (xi) Facilities employing anaerobic digestion must minimize the uncontrolled release of biogas.
- (xii) Notice of final closure shall be provided to the Director within 60 days from final receipt of feedstock. Any site not receiving feedstock in excess of 180 days, unless properly closed or otherwise approved by the Division, shall be deemed closed and in violation of these Rules. Notice of closure shall include documentation that all feedstocks, compost materials and digestate have been removed from the facility and that the site has been stabilized in accordance with the Manual for Erosion and Sediment Control in Georgia.

(6) Criteria for Siting Composting Facilities.

- (a) Class 2 composting facilities shall comply with the following criteria:
 - 1. The facility shall not be located in the 100-year floodplain.
 - 2. A 50-foot undisturbed buffer shall be maintained between the composting operation and the property line.
 - 3. A 200-foot buffer shall be maintained between the composting operation and any adjacent residences and/or drinking water supply wells.
 - 4. A 50-foot buffer shall be maintained between the composting operation and all streams.
 - 5. A description of surrounding land uses up to a ½-mile radius shall be provided.
 - 6. Airport safety restrictions, as required by Rule [391-3-4-.05\(1\)\(c\)](#) for MSWLF units, shall be met.
- (b) Classes 3-6 composting facilities and anaerobic digestion facilities shall comply with the following criteria:
 - 1. The facility shall submit a letter from the local government authority stating that the proposed facility complies with local zoning and land use ordinances.

2. The facility shall submit written verification by the applicant that the facility is consistent with the local or regional solid waste management plan, as required in Rule [391-3-4-.02\(4\)\(c\) 5](#).
 3. The facility shall not be located in the 100-year floodplain.
 4. The facility shall submit a map of the topographic setting depicting features, including all upstream and downstream drainage areas affecting or affected by the proposed site, floodplain, gullies, karst conditions, wetlands, unstable soils, and percent slope.
 5. A 100-foot undisturbed buffer shall be maintained between the composting operation and the property line.
 6. A 500-foot buffer shall be maintained between the composting operation and any adjacent residences and/or any drinking water supply wells.
 7. A 50-foot buffer shall be maintained between the composting operation and all streams.
 8. A description of surrounding land uses up to a ½-mile radius shall be provided.
 9. Airport safety restrictions as required by Rule [391-3-4-.05\(1\)\(c\)](#) for MSWLF units, shall be met.
 10. The facility shall submit a site assessment report, prepared by a professional geologist or geotechnical engineer registered in Georgia, addressing the above-listed criteria.
- (c) In addition to meeting the Class 3 siting requirements, Class 4 and 5 composting facilities shall comply with the following siting criteria:
1. Submission of a hydrogeological assessment, as specified in [391-3-4-.05\(1\)\(j\)](#) may be required.
 2. Submission of an odor assessment that includes, at a minimum:
 - (i) The proximity of existing odor receptors;
 - (ii) An evaluation of the site and operation characteristics to determine the potential for impacts on the neighboring community from the off-site migration of odors from the proposed facility; and

- (iii) A description of the design considerations or practices to be implemented to control the potential impacts of off-site odors generated from the facility.

(7) Permit Modifications for Class 3-6 Facilities.

(a) All modifications of existing facilities shall be classified as follows:

1. Major modifications include those changes which substantially alter the design of the facility, management practices, the types or categories of feedstocks processed, or the technologies employed, and due to the nature of the changes, would likely impact the facility's ability to adequately protect human health and the environment. Major modifications, therefore, require closer review and public input than minor modifications.
2. Major modifications shall include, but are not limited to, the following:
 - (i) A modification which adds a new solid waste handling process. This shall include, but not be limited to, the addition of a materials recovery facility, a composting operation co-located at an anaerobic digestion facility, baling operation, shredding operation, or liquid solidification operation.
 - (ii) A modification which involves a change to a site suitability requirement, which could have originally impacted the siting of the facility.
3. Minor modifications include changes that do not substantially alter the permit conditions, that do not reduce the capacity of the facility to protect human health or the environment, or that do not prevent the facility from responding in a timely manner. These changes include common variations in the type and quantities of feedstocks managed, technological advancements, or changes necessary to comply with new Rules, where these changes can be implemented without substantially changing design specifications or management practices in the permit.
 - (i) Minor modifications shall include, but are not limited to, the following:
 - (I) Changing the name of the facility.
 - (II) A modification which involves the relocation of access roads.
 - (III) A modification which adds scales.

- (IV) A modification which involves the addition or removal of on-site structures.
- (V) A modification which involves the addition of or a change to a groundwater or surface water monitoring system.
- (VI) A modification which involves the addition or removal of a Permit-by-Rule facility.
- (VII) A modification which involves the removal of any solid waste handling facility.
- (VIII) A modification which involves the addition of or a change to a closure or post- closure plan.
- (IX) A modification which involves the addition of or a change to a method of contact water handling and/or treatment.
- (X) A modification which involves the addition of a corrective action plan.
- (XI) A modification which involves a change in ownership, or in the case of a corporation of over five percent of the stock in a corporation holding a permit, but does not involve the transfer of the permit.

4. All major modifications shall be subject to the following requirements:
- (i) Submission of a completed application for a permit modification.
 - (ii) Submission of supporting documents accompanying the application for a permit modification that describe the exact change(s) to be made to the permit conditions and supporting documents referenced by the permit that explain why the change is needed.
 - (iii) Submission of a revised design for the requested change(s).
 - (iv) Submission of written verification by the applicant, as required by Rule [391-3-4-.05\(1\)\(a\)](#), that the facility, as proposed to be modified, conforms to all local zoning/land use ordinances, if any.
 - (v) Submission of written verification by the applicant that the facility, as proposed to be modified, is consistent with local or regional solid waste management plans. The verification shall consist of letters

from the host jurisdiction and generating jurisdictions verifying consistency with the approved local solid waste plan.

- (vi) Submission of written verification by the applicant that a public hearing was held by the governing authority of the county or municipality in which the facility requesting the modification is located, not less than two weeks prior to granting approval of the modification. Submission of a typed transcript of the hearing. Submission of written verification that notice of such hearing was posted at the site of such facility and advertised in a newspaper of general circulation serving the county or counties in which the facility is located at least 30 days prior to such hearing.

(8) Testing.

- (a) Class 3-6 composting facilities and anaerobic digestion facilities that compost on site shall meet the following test standards and requirements:

- 1. Samples and measurements taken for the purpose of product testing shall be representative of the composting activity and shall be conducted in accordance with methods and procedures approved by the Director.
- 2. The minimum number of samples that shall be collected and analyzed is shown in the table below. Samples to be analyzed shall be composted prior to the analysis.

Compost Quantity¹(tons/yr)	Frequency
1 - 6,200	Once per quarter
6,201 - 17,500	Once every two months
Greater than 17,500	Once per month

¹Either the amount of finished compost applied to the land, prepared for sale or given away on an "as is" (wet weight) basis.

If test results show the finished product is stable and in compliance with both metals and pathogens standards for a two-year period, the facility may request a reduction in the frequency of testing, provided there are no changes in feedstocks composted at the facility. Class 3 facilities may test for pathogens and trace metals at half the frequency, but overall testing for all other characteristics must be as defined in the table above.

- 3. All compost shall be tested for stability in accordance with methods and procedures approved by the Director.

- (i) The stability results shall be documented in the facility's operating records.
4. All compost shall be tested for the presence of pathogens in accordance with methods and procedures approved by the Director.
- (i) Either the density of fecal coliform in the finished compost shall be less than 1,000 most probable number (MPN) per gram of total solids (dry weight basis), or the density of Salmonella sp. bacteria in the finished compost shall be less than three MPN per four grams of total solids (dry weight basis) before the compost may be sold, given away, or applied to the land.
5. All compost shall be analyzed for metals in accordance with methods and procedures approved by the Director.
- (i) The following pollutant concentrations shall not be exceeded:

Pollutant	Monthly average concentration (milligrams per kilogram) ¹
Arsenic	41
Cadmium	39
Copper	1,500
Lead	300
Mercury	17
Nickel	420
Selenium	100
Zinc	2,800

¹ On a dry weight basis.

- (b) For Class 6 facilities that operate an anaerobic digester, the facility shall, at a minimum, monitor or test the following:
 1. Chemical Oxygen Demand shall be tested daily if the feedstocks change on a daily basis or weekly if the feedstocks are consistent or if the digester is at steady state, with steady state being defined as the treatment level or the gas production is constant for at least three Hydraulic Retention Times (HRT).
 2. Alkalinity shall be measured daily if the feedstocks change on a daily basis or weekly if the feedstocks are consistent or if the digester is at steady state,

with steady state being defined as the treatment level or the gas production is constant for at least three Hydraulic Retention Times (HRT).

3. Gas production shall be monitored.
 - (c) Digestate that has not been analyzed for metal concentration, pathogen concentration, and any other contaminants as stipulated by the Division, or is known to contain any metal in amounts that exceed the maximum metal concentrations in 391-3-4-.16(8)(a)(5)(i), shall be designated for disposal or additional processing.
 - (d) The Division may approve alternative methods of compliance to meet the requirements of this section including, but not limited to, sampling frequencies.

Amended: Title changed to "Composting, Mulching and Anaerobic Digestion Facilities." F. Jun. 25, 2014; eff. July 15, 2014.

Amended: F. Mar. 8, 2018; eff. Mar. 28, 2018.

Amended: New title "Composting and Anaerobic Digestion Facilities." F. June 10, 2021; eff. June 30, 2021.

Rule 391-3-4-.17. Measuring and Reporting Requirements.

- (1) Reporting the quantities of solid waste managed:
 - (a) Persons holding a municipal solid waste disposal permit, including permits-by-rule, shall report to the Director the total amount, in tons, of solid waste disposed of quarterly. Reports shall be filed by the 30th day after the beginning of each calendar quarter, covering the reporting period for the preceding quarter.
 - (b) The reports shall contain, at a minimum, which cities and counties are served by the disposal facility and the total number of tons of solid waste received from each jurisdiction served during the reporting period. The required data shall be submitted on such forms as may be prescribed by the Director.
- (2) Measurement Methods:
 - (a) Where disposal facilities do not have scales at the disposal facility, or through contractual or other arrangements, do not weigh all municipal solid waste destined for the facility, the owner and/or operator shall require each type of commercial vehicle utilizing the facility to be weighed with such frequency that an accurate

conversion from cubic yards to tons can be made for each commercial vehicle type not weighed.

- (b) Where such systems of estimating the weight are utilized, the owner or operator must prepare and submit to the Director for approval, a description of such systems for all existing sites. New disposal facilities must include this information as part of the permit application.
- (3) Reporting remaining capacity of the site.
- (a) On July 1 of each year, persons holding a municipal solid waste landfill permit shall report to the Director the remaining capacity of the facility.
 - (b) The remaining capacity shall be determined in cubic yards and the determinations shall be certified by the professional engineer, registered in the State of Georgia.
 - (c) The rate of filling shall be determined and provided along with an estimated completion date for the facility.
- (4) Waste Disposal Surcharge.
- (a) Owners or operators of any solid waste disposal facility, other than an inert waste landfill as defined in these Rules or a private industry solid waste disposal facility, shall assess and collect, on behalf of the division from each disposer of waste, a surcharge per ton on solid waste disposed as required by O.C.G.A. § [12-8-39](#). Surcharges assessed and collected on behalf of the division shall be paid annually to the division on July 1 for the preceding calendar year.
 - (b) The surcharge required by subparagraph (4)(a) of this Rule, shall be calculated based on the reports required by paragraph (1) of this Rule and in accordance with actual weights received or other approved methods provided for in paragraph (2) of this Rule.
- (5) For operating CCR units, the total volume of the CCR waste disposed in a CCR unit and the CCR removed, recovered, or diverted for beneficial use shall be reported to the Division on July 1 of each year after the first full year that the permit is in effect. The required data shall be submitted on such forms as may be prescribed by the Director.
- (6) The owner or operator of a municipal solid waste landfill shall notify the local governing authorities of any city and county in which such landfill is located of any release from the site of such landfill of a contaminant which is likely to pose a danger to human health. In addition, such owner or operator shall cause notice of such release to be published in the legal organ of the county in which such landfill is located. Compliance with the requirements of this Rule shall occur within 14 days of confirmation of such release by the Division.

Rule 391-3-4-.18. Operator Certification.

- (1) Applicability: this Rule applies to all operators of municipal solid waste landfills, municipal solid waste thermal treatment technology facilities, and employees of the Department of Natural Resources who inspect these facilities.
 - (a) No person shall perform the duties of a municipal solid waste disposal facility operator without being duly certified under this Rule.
 - (b) No municipal solid waste disposal facility shall be operated in Georgia unless the operator is certified under this Rule.
 - (c) All inspectors of municipal solid waste disposal facilities shall be certified to inspect the same.
- (2) Certificates:
 - (a) Any certificate granted under this Section shall be renewable every five years.
 - (b) The Division shall approve all examinations and courses to be used in determining the knowledge, ability, and judgment of applicants for certification under this Rule. Such courses and examinations shall be given at least twice annually.
 - (c) A Certified Landfill Operator or Inspector must meet the following minimum qualifications:
 1. Graduate of high school or an accredited GED program, and have worked at a landfill in Georgia for at least six months. Prior to July 1, 1994, persons who lack the required high school or GED preparation and possess an equivalent level of math and literacy skills, may substitute five years experience as a landfill operator or manager in Georgia for the required high school or GED program; or
 2. To conduct landfill inspections, be employed by the Georgia Department of Natural Resources and required by their job descriptions to conduct landfill inspections; and

3. Must have successfully completed the Landfill Certification Training Course and examination endorsed by the Division.
- (d) Upon application, a certificate may be issued without examination, in a comparable classification, to any person who holds a certificate in any state, territory, or possession of the United States or any country, provided that the requirements for certification of operators under which the person's certificate was issued do not conflict with this Rule and are of a standard not lower than that specified by this Rule; and provided further that reciprocal privileges are granted to certified operators of this State.
 - (e) The Director may investigate the actions of any operator and may revoke or suspend the certificate of an operator, following a hearing conducted in accordance with Chapter 13 of Title 50, the "Georgia Administrative Procedure Act", when it is found that the operator has practiced fraud or deception; that reasonable care, judgment, or the application of his knowledge or ability was not used in the performance of his duties; or that the operator is incompetent or unable to perform his duties properly.
 - (f) The Director shall include, as a condition in a permit issued, a requirement that the municipal solid waste disposal facility operator be duly certified in accordance with this Rule.

Rule 391-3-4-.19. Scrap and Used Tire Management.

- (1) Applicability.
 - (a) Scrap tire handling shall be regulated from the point of generation through the point of final disposition. The provisions of this Rule, except where exemptions apply, shall apply to all persons presently engaged in, or proposing to be engaged in, the retail sale of new replacement tires, handling of scrap tires, and/or the collection, inventory and marketing of used tires.
 - (b) All persons subject to regulation under this Rule shall, in addition to the requirements of 391-3-4-.19, handle scrap tires in accordance with the provisions

of O.C.G.A. [12-8-20](#), *et seq.*, and the Rules for Solid Waste Management, Chapter 391-3-4, applicable to solid waste.

(2) Definitions. For the purposes of this Rule:

- (a) "Beneficial reuse" means the use of scrap tires for purposes other than its original intended use and that have been approved by the Division prior to reuse.
- (b) "Enclosure" means structure with four sides and roof or an area surrounded by a wall or fence with the purpose of controlling or limiting access.
- (c) "End user" means the last person who uses the scrap tires, chips, crumb rubber, or similar materials to make a product with economic value, or, in the case of energy recovery, the person who uses the heat content or other form of energy from the incineration, combustion or pyrolysis of waste tires, chips or similar materials.
- (d) "Financial Assurance" means a mechanism designed to demonstrate that funds will be available to ensure compliance with statutory, regulatory and permit requirements of tire carriers and processors. The financial mechanism must be either a surety bond or an irrevocable letter of credit.
- (e) "Manufacturer" means a person who produces new tires from raw materials for the original intended use on, but not limited to, automobiles, trucks, motorcycles, trailers, recreational vehicles, construction equipment, earth-moving equipment and aircraft.
- (f) "Mixed Tires" means a group of tires that may consist of "used tires," "retreadable casings," and "scrap tires."
- (g) "Organized Site Cleanup Activity" means scrap tire abatement activities conducted by a government entity, non-profit, or other organization.
- (h) "Point of Final Disposition" means a location approved by the Division to receive scrap tires including, but not limited to, scrap tire processors, scrap tire sorters and end users.
- (i) "Residuals" means by-products resulting from the processing of scrap tires including, but not limited to, fibers, metals, inner tubes and rims.
- (j) "Retreadable Casing" means a scrap tire suitable for retreading. This includes casings that have value as a potential retreaded tire. This does not include casings with tread separation, unrepaired cuts, corroded belts, sidewall damage, run-flat or skidded.
- (k) "Retail Dealer" means a person actively engaged in the business of selling new replacement tires. Retail dealers may also be, but are not limited to,

manufacturers, wholesalers, and others who sell new replacement tires to the ultimate consumer.

- (l) "Scrap Tire" means a tire that is no longer suitable for its original intended purpose because of wear, damage, or defect.
- (m) "Scrap Tire Generator" means any person who generates scrap tires including, but not limited to, tire retailers; retail dealers; retreaders; scrap tire processors; scrap tire sorters; automobile dealers; private company vehicle maintenance shops; used tire dealers; garages, and service stations; and city, county, and state governments.
- (n) "Scrap Tire Processing" means any method, system, or other treatment designed to change the physical form, size, or chemical content of scrap tires for beneficial use.
- (o) "Scrap Tire Processor" means any person approved through a permit issued by the Division to receive and process scrap tires, but shall not include a registered secondary metals recycler operating a scrap metal shredder for the purpose of shredding metallic scrap, including scrap automobiles containing five or fewer scrap tires per automobile into specification grades of scrap metal.
- (p) "Scrap Tire Sorter" means any person, other than a registered scrap tire generator or a scrap tire processor, who handles mixed tires by separating used tires and retreadable casings from scrap tires and is approved through a permit by the Division.
- (q) "Tire" means a continuous solid or pneumatic rubber covering designed for encircling the wheel of a motor vehicle and which is neither attached to the motor vehicle nor a part of the motor vehicle as original equipment.
- (r) "Tire Carrier" means any person engaged in collecting or transporting tires, other than new tires. For the purpose of this Rule, tire carrier does not include a transporter of scrap or crushed vehicles.
- (s) "Tire Manifest" means a form or document used to identify the quantity, composition, origin, routing and destination of scrap tires during transportation from the point of generation to a point of final disposition and to track used tires from the point of generation to another location.
- (t) "Tire Retailer" means any person, other than a used motor vehicle parts dealer licensed in accordance with Chapter 47 of Title 43, engaged in the business of selling new replacement tires or used tires.

- (u) "Tire Retreader" means any person actively engaged in the business of retreading scrap tires by scarifying the surface to remove the old surface tread and attaching a new tread to make a usable tire.
- (v) "Ultimate Consumer" means the last person who receives and uses a new replacement tire.
- (w) "Used Tire" means a tire which has a minimum of 2/32 inch of road tread and which is still suitable for its original purpose but is no longer new. A tire retailer shall inventory and market used tires in substantially the same fashion as a new tire and be able to provide satisfactory evidence to the division that a market for the tire exists and that the tire is in fact being marketed as a used tire. A used tire shall not be considered solid waste.
- (x) "Used Tire Dealer" means a tire retailer selling used tires as defined in this Rule.

(3) Retail Dealers.

- (a) Beginning July 1, 1992, a tire management fee is imposed upon the retail sale of all new replacement tires in this state of \$1.00 per tire sold. The fee shall be collected by retail dealers at the time the retail dealer sells a new replacement tire to the ultimate consumer; provided, however, that a Georgia tire distributor who sells tires to retail dealers must collect such fees from any retail dealer who does not have a valid scrap tire generator identification number issued by the Division.
 - 1. New replacement tires include, but are not limited to, automobile, truck, heavy equipment, motor bike, boat and other trailers, aircraft, and recreational vehicles.
 - 2. Local and state governments are not exempt from the fee.
 - 3. The fee shall not be imposed on the sale of:
 - (i) Tires with a rim size less than 12 inches;
 - (ii) Tires from any device moved exclusively by human power; or
 - (iii) Tires used exclusively for agricultural purposes, except farm truck tires.
- (b) Retail dealers shall remit fees and a quarterly tire fee report documenting the number of new replacement tires sold to the Division. The retail dealers shall use forms provided by the Division. The fee and report shall be remitted by the 30th day of April, July, October, and January of each year, covering the period for the preceding quarter.

- (c) In collecting, reporting, and paying the fees due under this section, each distributor or retailer shall be allowed the following deductions, but only if the amount due was not delinquent at the time of payment:
 - 1. A deduction of three percent of the first \$3,000.00 of the total amount of all fees reported due on such report; and
 - 2. A deduction of one-half of one percent of the portion exceeding \$3,000.00 of the total amount of all fees reported on such report.

- (4) Scrap Tire Generators.
 - (a) Any person who generates scrap tires in this state shall have a scrap tire generator identification number (ID number #) issued by the Division. The ID number shall be used on tire manifests. A separate ID number shall be required for each business location.

 - (b) The following persons shall not be required to have an ID number:
 - 1. Scrap tire generators who generate scrap tires at out-of-state locations and ship their scrap tires to a point of final disposition in Georgia; and
 - 2. A licensed used motor vehicle parts dealer or registered secondary metals recycler, who does not generate scrap tires for disposal or recycling.
 - 3. A municipal solid waste collector holding a valid solid waste collection permit under authority of this part whose primary business is the collection of municipal solid waste;
 - 4. A private individual transporting no more than 10 of the individual's own or a private individual transporting more than 10 tires if such individual can provide proof of purchase with receipt for such tires;
 - 5. Any person transporting tires collected as part of an organized site cleanup activity;

 - (c) Scrap tire generators shall initiate a tire manifest to track scrap tires during transportation from the point of generation to an approved point of final disposition. The tire manifest shall include the following information:
 - 1. Name, address, county, telephone number and scrap tire generator identification number;
 - 2. An estimate of the number (accurate to within 10% of actual number) or weight of scrap tires to be transported;

3. Signature of the generator certifying the estimate and the date the scrap tires were picked up;
 4. Name, address, telephone number and permit number of the tire carrier;
 5. Signature of the permitted tire carrier, the date of pickup from the generator and the date of delivery to the point of final disposition;
 6. Name, address, telephone number and permit number of the point of final disposition;
 7. Signature of authorized representative at the point of final disposition certifying the weight (in tons or number of tires) and the date received from the tire carrier.
- (d) If a generator chooses to use tons of tires rather than actual numbers of tires on the tire manifest for passenger and truck tires, the following conversion factor must be used:
1. Passenger Tires: 2000 lb. (one ton) = 89 tires (22.5 lb/tire)
 2. Truck Tires: 2000 lb. (one ton) = 17 tires (120 lb/tire)
- (e) Scrap tire generators shall ensure that any person collecting and transporting their scrap tires hold a valid tire carrier permit issued by the Division and that their scrap tires were delivered to the point of final disposition designated by the generator on the scrap tire manifest.
- (f) Scrap tire generators shall retain a copy of the tire manifest signed and dated by the carrier at the time the scrap tires were collected or transported. This tire manifest copy should be kept until the generator receives the original tire manifest signed by the generator, carrier and point of final disposition. The original tire manifest shall be kept on-site for a period of three years.
- (g) A scrap tire generator shall notify the Division in writing of any carrier who fails to return a properly completed tire manifest to the generator within 30 days from scrap tire pickup. Such notification shall be filed within 15 days following any failure of the carrier to deliver the tire manifest with original signature to the generator.
- (h) Scrap tire generators may designate whether a tire, because of wear, damage, or defect, is a "used tire", or "retreadable casing" as defined in these Rules. However, if a generator fails to designate which tires are "used", or "retreadable casings" then all tires transported shall be considered scrap tires and must be indicated on the tire manifest.

(5) Tire Carriers.

- (a) Unless otherwise exempted, any person collecting or transporting scrap or used tires shall have a tire carrier permit issued by the Division. A permit shall not be issued unless the financial assurance, as provided for in these Rules, has been submitted and approved by the Division.
- (b) A separate permit and financial assurance instrument shall be required for each tire carrier business location.
- (c) A tire carrier shall transport scrap tires only to a point of final disposition as defined in these Rules.
- (d) Storage of scrap tires by tire carriers is prohibited.
- (e) The permitted tire carrier shall maintain financial assurance in a format provided by the Division. The required financial assurance is as follows:
 - 1. \$10,000.00 for carriers transporting up to 5,000 scrap tires per month.
 - 2. \$20,000.00 for carriers transporting more than 5,000 scrap tires per month.
- (f) The permitted tire carrier shall submit a quarterly report to the Division on forms provided by the Division. Reports shall be submitted by the 30th day of April, July, October and January of each year and cover the reporting period for the preceding calendar quarter. The tire carrier shall retain copies of the quarterly reports, tire manifests, invoices and weight tickets for three years at their place of business or other location approved by the Division. The tire carrier shall make these records available for review upon request by the Division.
- (g) The permitted tire carrier shall display a decal issued by the Division on both the driver's and passenger's doors on each vehicle used to collect or transport tires. A decal shall not be required for a tire carrier that collects tires exclusively from outside this state and transports them directly to a scrap tire processor or end user within this state.
 - 1. By August 1st of each year, tire carriers shall purchase decal(s) for each vehicle used to collect or transport tires.
 - 2. The tire carrier shall pay the Division a nominal fee for each decal issued.
 - 3. Decals are valid for a one-year period and shall expire on July 31st of each year.
- (h) It shall be the responsibility of the permitted tire carrier to return the tire manifest, with the three required original signatures, to the scrap tire generator no later than

30 days from the date on which the carrier collected the scrap tires from the generator.

- (i) The following persons shall not be required to have a tire carrier permit:
1. A tire retailer transporting its own used tires, if such dealer can provide proof of purchase with receipt for all used tires being transported and a document verifying the origin, route and destination of such used tires;
 2. A municipal solid waste collector holding a valid solid waste collection permit under authority of this part whose primary business is the collection of municipal solid waste;
 3. A private individual transporting no more than 10 of the individual's own tires or a private individual transporting more than 10 tires if such individual can provide proof of purchase with receipt for such tires;
 4. A company transporting the company's own tires to a scrap tire processor or end user or for proper disposal;
 5. Any person transporting tires collected as part of an organized site cleanup activity;
 6. The United States, the State of Georgia, any county, municipality, or public authority.
 7. Other persons, as approved by the Division, on a one time or temporary basis, as needed to further the intent of O.C.G.A. [12-8-20](#), *et seq.*, that scrap tires be reused or recycled rather than disposed.

(6) Scrap Tire Storage.

- (a) No person may store more than 25 scrap tires anywhere in this state.
- (b) If scrap tires are secured in a locked enclosure or are otherwise adequately secured in a manner suitable to prevent unauthorized access, then paragraph (6)(a) of this Rule shall not apply to the following:
1. A solid waste disposal site permitted by the Division, if the permit authorizes the storage of scrap tires prior to their disposal;
 2. A tire retailer or a publicly owned vehicle maintenance facility with not more than 1,500 scrap tires in storage;
 3. A tire retreader with not more than 3,000 scrap tires in storage, so long as the scrap tires are of the type the retreader is actively retreading;

4. A licensed used motor vehicle parts dealer registered with the Secretary of State's office, a registered secondary metals recycler or a privately owned vehicle maintenance facility that operates solely for the purpose of servicing a commercial vehicle fleet with not more than 500 scrap tires in storage; and
 5. A permitted scrap tire processor or sorter that has received approval prior to October 28, 2015 or holds a current permit, so long as the number of scrap tires in storage does not exceed the quantity approved by the Division. The Division may grant a waiver for the enclosure requirement if the person requesting the waiver can definitively show a significant and unique economic hardship which would impair the person's ability to continue operating his or her business.
 6. A farm with 100 or fewer scrap tires in storage or in use for agriculture purposes. In addition, the Division may grant waivers to allow the storage or use of more than 100 scrap tires for agricultural purposes, if such storage or use does not pose a threat to human health or the environment.
- (c) Any person storing scrap tires is subject to the following requirements:
1. Unless otherwise specified in an approved plan by the Division, all scrap tires shall be stored in a manner (e.g. under roof, secured tarp, or the like to prevent water accumulation) that controls the breeding and harborage of mosquitoes, rodents and other vectors;
 2. Activities involving open flames and other flammable materials (oil, gas, fuel) shall not be allowed within 25 feet of a scrap tire storage area, with the exception of maintenance activities involving torches and welding equipment, as long as a fireproof barrier is used;
 3. A 50-foot wide fire lane shall be placed around the perimeter of each scrap tire pile.
 4. All persons engaged in the collection, storage or processing of scrap tires, retreadable or used tires shall control the presence of vectors or other nuisance pests associated with storage of the tires. Such pests may include, but are not limited to, mosquitoes, rats, mice, snakes and other animals living in or adjacent to the tire storage. Permitted or approved facilities shall maintain records for three years that include, but are not limited to:
 - (i) Type of control method used;
 - (ii) If chemical control - the name of the chemical(s);
 - (iii) Dates and amounts of chemical(s) used; and

(iv) Chemical storage location.

(7) Criteria for Scrap Tire Processors, Sorters and Disposal Facilities.

(a) Processing operations shall include, but not limited to, shredding, chopping, chipping, splitting, pyrolysis, microwave, and cryogenic operations. Provided financial assurance requirements of these rules have been met, permitted scrap tire processors in existence on the effective date of this Rule may continue to operate under their existing permit. Existing facilities requesting modifications after the effective date of this Rule must fully comply with this Rule. Scrap tire processing facilities shall meet the following requirements:

1. All scrap tire processors located in this state shall submit an application and obtain a permit issued by the Director prior to operation. No person may process scrap tires without a permit issued from the Director.
2. A permitted scrap tire processor shall maintain financial assurance in a format provided by the Division in the amount of \$20,000 for each business location.
3. All scrap tire processors shall have and follow an operations plan approved by the Division. The facility owner(s) or authorized representatives shall submit a written request to modify an approved operations plan. Any proposed modification to the facility and/or operations shall not be implemented until approved by the Division.
4. The operations plan shall include, zoning approval, proof of fire inspection, operational narrative, site plan and drawing of the operation, and shall be designed by a professional engineer licensed to practice in Georgia.
5. Processors must show that they have the necessary operable equipment in place to process scrap tires prior to receiving scrap tires for processing.
6. In addition to the scrap tire storage requirements in section (6) of these Rules, the following requirements apply:
 - (i) Storage limits are based on the processing equipment capability, proof of market, recycling rate and available storage space.
 - (ii) Storage of scrap tires shall not exceed a 30 day operating supply. Prior approval for increased storage limits must be approved by the Division if 30 day operating supply cannot be met.

- (iii) Any processor with tires, product or residuals in enclosed trailers shall be subject to the following requirements:
 - (I) Trailer storage areas must be clearly depicted on a site plan.
 - (II) Storage area shall be no greater than 10,000 square feet per storage area.
 - (III) A minimum of two feet must be maintained between trailers (side-to-side and end-to-end). No more than two rows of trailers per storage area may be stored at any facility. Such storage must be end-to-end and the trailer must be stored in a manner that allows direct removal of the trailer if needed. Empty trailers stored in the area designated for scrap tire storage are subject to the same separation requirements.
 - (IV) A 50-foot wide fire lane shall be placed around the perimeter of each scrap tire storage area. The fire lane shall be kept free of debris, vehicles, trailers, weeds, grass and other potentially combustible material.
- (iv) Processors must meet the following requirements for tires, processed tires, product, and residuals stored on the ground.
 - (I) A tire, processed tire, product, or residual pile shall have no greater than the following maximum dimensions:
 - I. Area: 10,000 square feet.
 - II. Height: 15 feet.
 - (II) A 50-foot wide fire lane shall be placed around the perimeter of each pile with the exception of noncombustible materials (rims, wires, etc.). The fire lane shall be kept free of debris, vehicles, trailers, weeds, grass and other potentially combustible material. Existing processors may comply with the fire lane requirements documented on an approved plan until the plan is modified.
 - (III) Storage of whole tires, products, and residuals near buildings is prohibited unless:

- I. A non-combustible/non-flammable barrier (firewall) is constructed in accordance with applicable state or local firewall requirements and a 25-foot fire lane, unless otherwise set by the local fire authority or a Georgia State Certified Fire Inspector, is maintained between the firewall and the building.
- II. The whole tires, processed tires, products, and residuals shall not exceed the height of the firewall.

7. Scrap tire processors shall meet the following operational requirements:
 - (i) Access to the processing facility and fire lane(s) for emergency vehicles shall be unobstructed at all times, with the exception of routine loading or unloading operations, provided the vehicles are attended by their drivers during that time.
 - (ii) In the event of fire, the owner or operator shall immediately take all necessary steps to control and extinguish the fire and control any resulting runoff (i.e., water, oil or other fluid residue).
 - (iii) The run-off resulting from fires or fire suppression actions shall be prevented by berms or other detention structures approved by the Division from entering drains and waters of the state. Material(s) used in berm construction must be non-combustible, non-flammable and prevent run-off.
 - (iv) The facility owner or operator shall provide documentation that the local fire authority or a Georgia State Certified Fire Inspector conducted a fire safety survey. The facility owner or operator shall arrange for an additional fire safety survey as part of any modification request that would increase the amount of scrap tires in storage.
 - (v) Operations involving the use of open flames shall not be conducted within 25 feet of a scrap tire stockpile, processed tire stockpile or processing equipment. An exception is allowed for maintenance activity using torches or welding equipment, as long as fireproof

curtains or other fireproof barrier shields the ignition source from storage or equipment areas.

- (vi) Access to the facility shall be controlled using fences, gates or other means of security.
- (vii) An attendant shall be present when the scrap tire processing facility is open for business if the facility receives tires from persons other than the operator of the facility.
- (viii) Any residuals from scrap tire processing shall be managed so as to be contained on-site and shall be controlled and disposed of in a permitted solid waste handling facility or be properly recycled.
- (ix) A scrap tire processing facility shall not accept any scrap tires for processing if it has reached its approved or permitted staging limit. At least 75 percent of both the scrap and processed tires that are accumulated by the scrap tire processing facility each calendar quarter, and 75 percent by weight or volume of all scrap tires previously received and not recycled, reused or properly disposed during the preceding calendar quarter shall be processed and removed from the facility for disposal or recycling from the facility during the quarter or disposed of in a solid waste handling facility approved to accept scrap tires.
- (x) Communication equipment shall be maintained at the scrap tire processing facility to ensure that the facility attendant or operator can contact local emergency response authorities in the event of a fire. The facility will notify the Division within 24 hours in the event of a fire requiring a response by the local fire jurisdiction.
- (xi) The emergency/contingency portion of the operations plan shall include, but not be limited to:
 - (I) A list of names and numbers of persons to be contacted in the event of a fire, flood or other emergency.
 - (II) A list of the emergency response equipment at the facility, its location and how it should be used in the event of a fire or other emergency.
 - (III) A description of the procedures that should be followed in the event of a fire, including procedures to contain and

dispose of the oily material generated by the combustion of large numbers of tires.

(xii) Facility shall have storm water control measures.

(xiii) Facility shall have erosion and sediment control measures.

8. Scrap tire processors recordkeeping and reporting requirements.

(i) The owner or operator of a scrap tire processing facility shall retain required records for three years and make such records available for inspection by the Division. Required records include, but are not limited to:

(I) Copies of the tire manifests for all tires received.

(II) If more than ten scrap tires were delivered by a person who is not a permitted tire carrier or generator, the number or weight of tires delivered, the date and the person's name, address, telephone number and signature.

(III) Properly dated, numbered and signed weight tickets, from certified scales at the facility or from a certified public or private scale, for scrap tires or processed tire materials received at or leaving the facility.

(IV) For all scrap tires shipped for reuse or retreading, the quantity and type (passenger car, truck tires, off the road, or others) shipped and the name and location of the person receiving the tires.

(V) For all processed tires and residuals, invoices and shipping tickets identifying the date, weight, name, address and phone number of the point of final disposition.

(ii) Owners and operators of scrap tire processing facilities shall submit a quarterly report to the Division. The quarterly report shall be submitted by the 30th day of April, July, October and January. The report shall include, but not limited to, the following:

(I) The facility name, address and permit number.

(II) The calendar quarter and year covered by the report.

- (III) The total weight of scrap or processed tires received at the facility during the period covered by the report.
- (IV) The total weight of scrap tires, processed tires, residuals and used tires shipped from the facility during the period covered by the report.
- (V) The amount of scrap, processed tires or residuals remaining on site.

9. Scrap tire processors shall meet the following requirements for the closure of scrap tire processing facilities.

- (i) The owner or operator shall provide procedures in the operations plan for closing the facility, including, but not limited to:
 - (I) Notification to the Division of intent to close 30 days prior to the scheduled date for closing.
 - (II) Closure activities and schedule for completion.
 - (III) Control of access to the site.
 - (IV) Notification to the Division when all closure activities are completed.

(b) Sorters.

1. Sorters in existence on the effective date of this Rule may continue to operate under their existing approval. New or existing facilities requesting modifications after the effective date of this Rule must be permitted by the Division.
2. All sorters shall have and follow an operations plan approved by the Division. The facility owner(s) or authorized representatives shall submit a written request to modify an approved operations plan. Any proposed modification to the facility and/or operations shall not be implemented until approved by the Division.
3. The operations plan shall include, zoning approval, proof of fire inspection, operational narrative, and site plan and drawing of the operation.
4. In addition to the scrap tire storage requirements in section (6) of these Rules, the following requirements apply:

- (i) Storage limits are based on the permit.
- (ii) Any sorter with tires stored in enclosed trailers shall be subject to the following requirements:
 - (I) Trailer storage areas must be clearly depicted on a site plan.
 - (II) Storage area shall be no greater than 10,000 square feet per storage area.
 - (III) A minimum of two feet must be maintained between trailers (side-to-side and end-to-end). All trailers in the storage area must be stored in a manner that allows an unobstructed path for direct removal of the trailer at all times. Empty trailers stored in the area designated for scrap tire storage are subject to the same separation requirements.
 - (IV) A 50-foot wide fire lane shall be placed around the perimeter of each scrap tire storage area. The fire lane shall be kept free of debris, vehicles, trailers, weeds, grass and other potentially combustible material.
- (iii) Sorters must meet the following requirements for tires stored on the ground:
 - (I) A tire stockpile shall have no greater than the following maximum dimensions:
 - I. Area: 10,000 square feet.
 - II. Height: 15 feet.
 - (II) A 50-foot wide fire lane shall be placed around the perimeter of each pile with the exception of noncombustible materials (rims, wires, etc.). The fire lane shall be kept free of debris, vehicles, trailers, weeds, grass and other potentially combustible material.
 - (III) Storage of whole tires near buildings is prohibited unless:
 - I. A non-combustible/non-flammable barrier (firewall) is constructed in accordance with applicable state or local firewall requirements

and a 25-foot fire lane, unless otherwise set by the local fire authority or a Georgia State Certified Fire Inspector, is maintained between the firewall and the building.

II. The whole tires shall not exceed the height of the firewall.

5. Sorters shall meet the following operational requirements:

- (i) Access to the sorter facility and fire lane(s) for emergency vehicles shall be unobstructed at all times, with the exception of routine loading or unloading operations, provided the vehicles are attended by their drivers during that time.
- (ii) In the event of fire, the owner or operator shall immediately take all necessary steps to control and extinguish the fire and control any resulting runoff (i.e., water, oil or other fluid residue).
- (iii) The run-off resulting from fires or fire suppression actions shall be prevented by berms or other detention structures approved by the Division from entering drains and waters of the state. Material(s) used in berm construction must be non-combustible, non-flammable and prevent run-off.
- (iv) The facility owner or operator shall provide documentation that the local fire authority or a Georgia State Certified Fire Inspector conducted a fire safety survey. The facility owner or operator shall arrange for an additional fire safety survey as part of any modification request that would increase the amount of scrap tires in storage.
- (v) Operations involving the use of open flames shall not be conducted within 25 feet of a scrap tire stockpile. An exception is allowed for maintenance activity using torches or welding equipment, as long as fireproof curtains or other fireproof barrier shields the ignition source from storage or equipment areas.
- (vi) Access to the sorter facility shall be controlled using fences, gates or other means of security.

- (vii) An attendant shall be present when the scrap tire sorter is open for business if the sorter facility receives tires from persons other than the operator of the facility.
 - (viii) A scrap tire sorter facility shall not accept any scrap tires if it has reached its approved or permitted storage limit. At least 75 percent of both the scrap tires that are accumulated by the scrap tire sorter facility each calendar quarter, and 75 percent by weight or volume of all scrap tires previously received and not reused or properly disposed during the preceding calendar quarter shall be removed from the facility for disposal or recycling from the facility during the quarter or disposed of in a solid waste handling facility approved to accept scrap tires.
 - (ix) Communication equipment shall be maintained at the scrap tire sorter facility to ensure that the facility attendant or operator can contact local emergency response authorities in the event of a fire. The facility will notify the Division within 24 hours in the event of a fire requiring a response by the local fire jurisdiction.
 - (x) The emergency/contingency portion of the operations plan shall include, but not be limited to:
 - (I) A list of names and numbers of persons to be contacted in the event of a fire, flood or other emergency.
 - (II) A list of the emergency response equipment at the facility, its location and how it should be used in the event of a fire or other emergency.
 - (III) A description of the procedures that should be followed in the event of a fire, including procedures to contain and dispose of the oily material generated by the combustion of large numbers of tires.
 - (xi) Facility shall have storm water control measures.
 - (xii) Facility shall have erosion and sediment control measures.
6. Sorters must meet the following recordkeeping and reporting requirements.
- (i) The owner or operator of a scrap tire sorter facility shall retain required records for three years and make such records available for

inspection by the Division. Required records include, but are not limited to:

- (I) Copies of the tire manifests for all tires received.
 - (II) If more than ten scrap tires were delivered by a person who is not a permitted tire carrier or generator, the number or weight of tires delivered, the date and the person's name, address, telephone number and signature.
 - (III) For all scrap tires shipped for reuse or retreading, the quantity and type (passenger car, truck tires, off the road, or others) shipped and the name and location of the person receiving the tires.
 - (IV) For all sorter scrap tires, invoices and shipping tickets identifying the date, weight, name, address and phone number of the point of final disposition.
- (ii) Owners and operators of scrap tire sorter facilities shall submit a quarterly report to the Division. The quarterly report shall be submitted on the 30th day of April, July, October and January. The report shall include, but not be limited to, the following:
- (I) The facility name, address and permit number.
 - (II) The calendar quarter and year covered by the report.
 - (III) The number or tons of scrap tires received at the facility during the period covered by the report.
 - (IV) The number or tons of scrap tires shipped from the facility during the period covered by the report.
 - (V) The number or tons of scrap tires remaining on site.
- (iii) Municipalities operating sorter facilities for the purpose of collection are exempt from the reporting and recordkeeping requirements contained in 391-3-4-.19(7)(b)6(ii).
7. Sorters must meet the following requirements for the closure of scrap tire sorter facilities.
- (i) The owner or operator shall provide procedures in the operations plan for closing the facility, including, but not limited to:

- (I) Notification to the Division of intent to close 30 days prior to the scheduled date for closing.
 - (II) Closure activities and schedule for completion.
 - (III) Control of access to the site.
 - (IV) Notification to the Division when all closure activities are completed.
- (c) Disposal Operations: All solid waste disposal facilities (landfills and thermal treatment technology facilities) having a valid Solid Waste Handling Permit issued by the Director are approved to receive scrap tires except as provided in O.C.G.A. [12-8-40-.1\(b\)](#).
- (8) Recycling and Beneficial Reuse of Scrap Tires.
- (a) For the purposes of this Rule, the following criteria will be used to determine if scrap tires are being recycled:
1. The scrap tires or processed scrap tires must have a known use, reuse or recycling potential; must be feasibly used, reused or recycled; and must have been diverted or removed from the solid waste stream for sale, use, reuse, or recycling, whether or not requiring subsequent separation and processing.
 2. Scrap tires or processed scrap tires are not accumulated speculatively if the person accumulating them can show there is a known use, reuse, or recycling potential for them; that they can be feasibly sold, used, reused or recycled; and during the preceding 90 days, the amount of scrap or processed scrap tires recycled, sold, used or reused equals at least 75 percent by weight or volume of the tires received during the 90-day period.
 3. Proof of recycling, sale, use, or reuse shall be provided in the form of bills of sale, or other records showing adequate proof of movement of the scrap tires in question to a recognized recycling facility or for proper use or reuse from the accumulation point. Proof must be provided that there is a known market or disposition for the scrap tires or processed scrap tires and must show that they have the necessary equipment to do so, prior to receiving scrap tires for processing.

4. A scrap tire is "sold" if the generator of the scrap tire or the person who processed the scrap tire received consideration or compensation for the material because of its inherent value.
 5. A scrap tire is "used, reused, or recycled" if it is either:
 - (i) Employed as an ingredient (including use as an intermediate) in a process to make a product (e.g., utilizing crumb rubber to make rubber-asphalt); or
 - (ii) Employed in a particular function or application as an effective substitute for a commercial product (e.g., using shredded tires as a substitute for fuel oil, natural gas, coal, or wood in a boiler or industrial furnace), as long as such substitution does not pose a threat to human health or the environment, and so long as the facility is not a solid waste thermal treatment technology facility or utilizing shredded tires as a soil amendment, aggregate, etc., or
 - (iii) Reused for its original intended purpose as a used tire, or reused for other purposes approved by the Division, such as playground equipment, erosion control, etc.
- (b) Persons proposing to use more than 25 scrap tires in a beneficial reuse project shall submit a proposal and be approved by the Division prior to commencing beneficial reuse project.
- (9) Used Tire Dealers
- (a) Any person who acts as a used tire dealer in this state shall have a used tire dealer identification (ID) number issued by the Division, which shall be used on tire manifests. A separate ID number shall be required for each business location, except mobile locations.
 - (b) Used tire dealers shall obtain a tire carrier permit for transportation of used tires other than their own.
 - (c) Used tire dealers transporting tires other than their own shall initiate a tire manifest to track used tires from the point of generation to another location. The following information shall be provided on the tire manifest:
 1. Name, address, county, telephone number and used tire dealer ID number;
 2. The number of used tires to be transported;
 3. Signature of the generator and the date the used tires were picked up;

4. Name, address, telephone number and permit number of the tire carrier;
 5. Signature of the tire carrier, the date of pickup from the generator and the date of delivery to final location;
 6. Name, address, telephone number and permit number of business location receiving the used tires;
 7. Signature of authorized representative at the business received from the tire carrier.
- (d) Used tire dealers shall keep an inventory of all used tires to be updated quarterly. Such inventory shall contain, at a minimum, number of tires at the business location categorized by rim size.
- (e) Used tire dealers shall implement suitable measures to control vectors.

Subject 391-3-5. RULES FOR SAFE DRINKING WATER.

Rule 391-3-5-.01. Purpose.

The purpose of these Rules is to establish policies, procedures, requirements and standards to implement the Georgia Safe Drinking Water Act of 1977 (Act No. 231 O.C.G.A. Section [12-5-170](#)*et seq.*, as amended), and to carry out the purposes and requirements of the Federal Safe Drinking Water Act (PL 93-523). These Rules are promulgated so that the citizens of the State of Georgia shall be assured adequate, safe drinking water of the highest quality. Any reference in these Rules to standards, procedures and requirements in other sources is a specific adoption and incorporation by reference of that source for such standard, procedure, or requirement for purposes of these rules.

Cite as Ga. Comp. R. & Regs. R. 391-3-5-.01

Authority: Ga. L. 1977, p. 351, *et seq.*, O.C.G.A. Sec. [12-5-170](#)*et seq.*, as amended.

History. Original Rule entitled "Definitions" was filed on September 6, 1973; effective September 26, 1973.

Amended: Rule repealed and a new Rule entitled "Purpose" adopted. Filed July 5, 1977, effective July 26, 1977, as specified by Rule [391-3-5-.47](#).

Repealed: New Rule of same title adopted. F. May 12, 1989; eff. June 1, 1989.

Amended: F. Jan. 8, 2014; eff. Jan. 28, 2014.

Rule 391-3-5-.02. Definitions.

All terms used in these rules shall be interpreted in accordance with the definitions as set forth in the Georgia Safe Drinking Water Act of 1977 or as herein defined:

- (1) "Act" means the Georgia Safe Drinking Water Act of 1977, as amended.
- (2) "Action Level" means the concentration of a contaminant, which if exceeded, triggers treatment or other requirements which a water system must follow.
- (3) "Aquifer" means any stratum or zone of rock beneath the surface of the earth capable of containing water or producing water from a well.
- (4) "Aquifer Testing" means a controlled pumping test of a well lasting at least 24 continuous hours in which the water level and the pumping rate are monitored at closely spaced intervals and the water level is monitored for at least as long a time following the test as the duration of the test.
- (5) "Backflow" means the reverse flow of contaminated water, other liquid, gas, or substance into the distribution system of a potable water supply.
- (6) "Back pressure" means a condition in which the pressure in a non-potable system is greater than the pressure in the potable distribution system and can cause contaminants to backflow into the potable system.
- (7) "Backsiphonage" means a form of backflow caused by a negative or below atmospheric pressure within the potable water system.

- (8) "Bag filters" are pressure-driven separation devices that remove particulate matter larger than 1 micrometer using an engineered porous filtration media. They are typically constructed of a non-rigid, fabric filtration media housed in a pressure vessel in which the direction of flow is from the inside of the bag to outside.
- (9) "Bank filtration" is a water treatment process that uses a well to recover surface water that has naturally infiltrated into ground water through a river bed or bank(s). Infiltration is typically enhanced by the hydraulic gradient imposed by a nearby pumping water supply or other well(s).
- (10) "Business plan" means a written plan which is prepared to demonstrate a public water system's managerial and financial capacity to comply with all drinking water regulations in effect, or likely to be in effect. The business plan is to be prepared in conformance with Appendix A of the Division's "Minimum Standards for Public Water Systems", latest edition. The business plan shall be updated at intervals determined by the Director.
- (11) "Best Available Technology" or "BAT" means the best technology, treatment techniques, or other means promulgated by EPA and adopted by the Division. In promulgating BAT the EPA examines the efficacy under field conditions and not solely under laboratory conditions, and takes costs into consideration when determining what technology or treatment technique is available.
- (12) "CFR" means the Code of Federal Regulations, Title 40. The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the federal government.
- (13) "Capacity" means the overall capability of a water system to reliably produce and deliver water meeting all national primary drinking water regulations in effect, or likely to be in effect. Capacity encompasses the technical, managerial, and financial capabilities, as described in the latest edition of EPD's "Minimum Standards for Public Water Systems" and will enable a water system to plan for, achieve, and maintain compliance with applicable drinking water standards.
- (14) "Cartridge filters" are pressure-driven separation devices that remove particulate matter larger than 1 micrometer using an engineered porous filtration media. They are typically constructed as rigid or semi-rigid, self-supporting filter elements housed in pressure vessels in which flow is from the outside of the cartridge to the inside.
- (15) "Casing" means the tubular material used to shut off or exclude a stratum or strata and to protect against entrance of contaminants during the expected life of the well.
- (16) "Clean compliance history" is, for the purposes of the Revised Total Coliform Rule, [391-3-5-.55](#), a record of: no MCL violations under Rule [391-3-5-.18\(4\)\(a\)-\(c\)](#) or Rule [391-3-5-.55](#); no monitoring violations under Rule [391-3-5-.23](#) or Rule [391-3-5-.55](#); and no coliform treatment technique trigger exceedances or treatment technique violations under Rule [391-3-5-.55](#).

- (17) "Coagulation" means a process using coagulant chemicals and mixing by which colloidal and suspended materials are destabilized and agglomerated into flocs.
- (18) "Combined distribution system" is the interconnected distribution system consisting of the distribution systems of wholesale systems and of the consecutive systems that receive finished water.
- (19) "Community water system" or "CWS" means a public water system, which serves at least 15 service connections, used by year-round residents or regularly serves at least 25 year-round residents.
- (20) "Compliance cycle" means the nine-year calendar year cycle during which public water systems must monitor. Each compliance cycle consists of three-year compliance periods. The first compliance cycle begins January 1, 1993.
- (21) "Compliance period" means a three-year calendar year period within a compliance cycle. Each compliance cycle has three-year compliance periods.
- (22) "Comprehensive performance evaluation" or "CPE" means a thorough review and analysis of a treatment plant's performance-based capabilities and associated administrative, operation and maintenance practices. It is conducted to identify factors that may be adversely impacting a plant's capability to achieve compliance and emphasizes approaches that can be implemented without significant capital improvements. For purpose of compliance with subparts P and T of 40 CFR Part 141, the CPE shall consist of at least the following components: Assessment of plant performance; evaluation of major unit processes; identification and prioritization of performance limiting factors; assessment of the applicability of comprehensive technical assistance; and preparation of a CPE report.
- (23) "Confirmation Sample" means a sample analysis or analyses taken to verify the results of an original analysis. Each sample for the analysis shall be taken or measured at the same location in the water system as the original sample. The results of the confirmation samples shall be averaged with the original sample to determine compliance.
- (24) "Confined Aquifer" means an aquifer which is separated from the land surface by a significant zone of low permeability which prevents surface recharge or pollutants from readily reaching the aquifer.
- (25) "Confluent growth" means a continuous bacterial growth covering the entire filtration area of a membrane filter, or a portion thereof, in which bacterial colonies are not discrete.
- (26) "Consecutive system" is a public water system that receives some or all of its finished water from one or more wholesale systems. Delivery may be through a direct connection or through the distribution system of one or more consecutive systems.

- (27) "Consumer Confidence Report" means an annual report that community water systems must deliver to their customers which, as a minimum, contains information on the quality of the water delivered by the system and characterizes the risks (if any) from exposure to contaminants detected in the drinking water in an accurate and understandable manner.
- (28) "Contaminant" means any physical, chemical, biological, or radiological substance or matter in water.
- (29) "Conventional filtration treatment" means a series of processes including coagulation flocculation, sedimentation, and filtration resulting in substantial particulate removal.
- (30) "Corrosion Inhibitor" means a substance capable of reducing the corrosivity of water toward metal plumbing materials, especially lead and copper, by forming a protective film on the interior surface of those materials.
- (31) "Cross-connection" means any physical arrangement whereby a public water supply is connected, directly or indirectly, with any other water supply system, sewer, drain, conduit, pool, storage reservoir, plumbing fixture, or other device which contains or may contain contaminated water, sewage or other waste, or liquid of unknown or unsafe quality which may be capable of imparting contamination to the public water supply as the result of backflow. By-pass arrangements, jumper connections, removable sections, swivel or changeable devices, and other temporary or permanent devices through which or because of which backflow could occur are considered to be cross-connections.
- (32) "CT" is the product of "residual disinfectant concentration" (C) in milligrams per liter determined before or at the first customer tap where water is provided for human consumption and the corresponding "disinfectant contact time" (T) in minutes.
- (33) "Department" means the Department of Natural Resources of the State of Georgia.
- (34) "Diatomaceous earth filtration" means a process resulting in substantial particulate removal in which (1) a pre-coat cake of diatomaceous earth filter media is deposited on a support membrane (septum), and (2) while the water is filtered by passing through the cake on the septum, additional filter media known as the body feed is continuously added to feed water to maintain the permeability of the filter cake.
- (35) "Direct filtration" means a series of processes including coagulation and filtration but excluding sedimentation resulting in substantial particulate removal.
- (36) "Director" means the Director of the Environmental Protection Division, Department of Natural Resources of the State of Georgia, or his designee.
- (37) "Disinfectant" means any oxidant, including but not limited to chlorine, chlorine dioxide, chloramines, and ozone added to water in any part of the treatment or distribution process, that is intended to kill or inactivate pathogenic microorganisms.

- (38) "Disinfectant contact time" ("T" in CT calculations) means the time in minutes that it takes for water to move from the point of disinfectant application or the previous point where residual disinfectant concentration ("C") is measured.
- (39) "Disinfection" means a process, which inactivates pathogenic organisms in water by chemical oxidants or equivalent agents.
- (40) "Disinfection profile" means a summary of *Giardia lamblia* inactivation through the treatment plant. The procedure for developing a disinfection profile is contained in [40 CFR § 141.172](#). (Disinfection profiling and benchmarking) in subpart P and §§141.530-141.536 (Disinfection profile) in subpart T of 40 CFR Part 141.
- (41) "Division" means the Environmental Protection Division, Department of Natural Resources of the State of Georgia.
- (42) "Domestic or other non-distribution system plumbing problem" means a coliform contamination problem in a public water system with more than one service connection that is limited to the specific service connection from which the coliform-positive sample was taken.
- (43) "Dose equivalent" means the product of the absorbed dose from ionizing radiation and such factors as account for differences in biological effectiveness due to the type of radiation and its distribution in the body as specified by the International Commission on Radiological Units and Measurements (ICRU).
- (44) "Drinking Water" means water supplied to the public for human consumption from a public water system.
- (45) "Dual sample set" is a set of two samples collected at the same time and same location, with one sample analyzed for TTHM and the other sample analyzed for HAA5. Dual sample sets are collected for the purposes of conducting an IDSE under subpart U of 40 CFR, Part 141 and determining compliance with the TTHM and HAA5 MCLs under subpart V of 40 CFR, Part 141.
- (46) "Effective corrosion inhibitor residual" for the purpose of compliance with Rule 395-3-5-.25, means a concentration sufficient to form a protective film on the interior walls of a pipe.
- (47) "Enhanced coagulation" means the addition of sufficient coagulant for improved removal of disinfection byproduct precursors by conventional filtration treatment.
- (48) "Enhanced softening" means the improved removal of disinfection byproduct precursors by precipitative softening.
- (49) "Entry Point" means the sample point where after treatment drinking water enters the distribution system. For purposes of the Act and the Rules, "entry point" shall be defined

as a sample location anywhere on the finished water line after treatment, up to and including the first service or customer tap.

- (50) "EPA" means the United States Environmental Protection Agency.
- (51) "Exemption" means approval from the Division affording a public water system, existing as of the effective date of these rules, an extended time for compliance with a maximum contaminant level or treatment technique contained in a drinking water standard. An exemption pertains to non-compliance with a maximum contaminant level for reasons other than that instance when application of a generally available treatment method fails to adequately treat the raw water source.
- (52) "Federal Act" means the Federal Safe Drinking Water Act, 1974 P.L. 93-523, as amended.
- (53) "Filter profile" means a graphical representation of individual filter performance, based on continuous turbidity measurements or total particle counts versus time for an entire filter run, from startup to backwash inclusively, that includes an assessment of filter performance while another filter is being backwashed.
- (54) "Filtration" means a process for removing particulate matter from water by passage through porous media.
- (55) "Finished water" is water that is introduced into the distribution system of a public water system and is intended for distribution and consumption without further treatment, except as treatment necessary to maintain water quality in the distribution system (*e.g.*, booster disinfection, addition of corrosion control chemicals).
- (56) "First draw sample" means a one-liter sample of tap water collected in accordance with Rule [391-3-5-.25](#), that has been standing in the plumbing pipes at least 6 hours and is collected without flushing the tap.
- (57) "Flocculation" means a process to enhance agglomeration or collection of smaller floc particles into larger, more easily settleable particles by gentle stirring by hydraulic or mechanical means.
- (58) "Flowing stream" is a course of running water flowing in a definite channel.
- (59) "GAC10" means granular activated carbon filter beds with an empty-bed contact time of 10 minutes based on average daily flow and a carbon reactivation frequency of every 180 days, except that the reactivation frequency for GAC10 used as a best available technology for compliance with subpart V MCLs under [40 CFR § 141.64\(b\)\(2\)](#) shall be 120 days.
- (60) "GAC20" means granular activated carbon filter beds with an empty-bed contact time of 20 minutes based on average daily flow and a carbon reactivation frequency of every 240 days.

- (61) "Gross alpha particle activity" means the total radioactivity due to alpha particle emission as inferred from measurements on a dry sample.
- (62) "Gross beta particle activity" means the total radioactivity due to beta particle emission as inferred from measurement on a dry sample.
- (63) "Ground water" means water obtained from wells and/or springs used as a source of water supply for a public water system.
- (64) "Ground water under the direct influence of surface water" (GWUDI) means any water beneath the surface of the ground with:
- (a) significant occurrence of insects or other microorganisms, algae, or large-diameter pathogens such as *Giardia lamblia*, or *Cryptosporidium*, or
 - (b) significant and relatively rapid shifts in water characteristics such as turbidity, temperature, conductivity, or pH which closely correlate to climatological or surface water conditions.
- (65) "Haloacetic acids (five)" (HAA5) mean the sum of the concentrations in milligrams per liter of the haloacetic acid compounds (monochloroacetic acid, dichloroacetic acid, trichloroacetic acid, monobromoacetic acid, and dibromoacetic acid), rounded to two significant figures after addition.
- (66) "Halogen" means one of the chemical elements chlorine, bromine or iodine.
- (67) "Hazardous Material" means any chemical, substance or material that is classified as Hazardous by the U.S. Environmental Protection Agency (CFR 40, Part 261).
- (68) "Health hazards" mean any conditions, devices, or practices in a water supply system or its operation, which create or may create an imminent and substantial danger to the health and well-being to the water consumer.
- (69) "Heterotrophic plate count" formerly known as the standard plate count, is a procedure for estimating the number of live heterotrophic bacteria in water. Unless stated otherwise, heterotrophic plate count refers to Method 9215, the pour plate method, as set forth in *Standard Methods for the Examination of Water and Wastewater*, American Public Health Association, 18th Edition, 1992, pp. 9-32 to 9-34, or subsequent edition.
- (70) "Initial compliance period" means the first full three-year compliance period that begins January 1, 1993.
- (71) "Inventory" for the purpose of Rule [391-3-5-40](#) means a written or computer database listing of all potential sources of ground-water pollution located within a wellhead protection area.

- (72) "Lake/reservoir" refers to a natural or man-made basin or hollow on the Earth's surface in which water collects or is stored that may or may not have a current or single direction of flow.
- (73) "Large water system" for the purpose of Rule [391-3-5-.25](#) (Lead & Copper) means a water system that serves more than 50,000 persons.
- (74) "Lead service line" means a line made of lead, which connects the discharge side of the water meter to the building inlet and any lead pigtail, gooseneck or other fitting, which is connected to such lead line.
- (75) "*Legionella*" means a genus of bacteria, some species of which have caused a type of pneumonia called Legionnaires Disease.
- (76) "Level 1 assessment" is an evaluation to identify the possible presence of sanitary defects, defects in distribution system coliform monitoring practices, and (when possible) the likely reason that the system triggered the assessment. It is conducted by the system operator or owner. Minimum elements include review and identification of atypical events that could affect distributed water quality or indicate that distributed water quality was impaired; changes in distribution system maintenance and operation that could affect distributed water quality (including water storage); source and treatment considerations that bear on distributed water quality, where appropriate (e.g., whether a ground water system is disinfected); existing water quality monitoring data; and inadequacies in sample sites, sampling protocol, and sample processing. The system must conduct the assessment consistent with any Division directives that tailor specific assessment elements with respect to the size and type of the system and the size, type, and characteristics of the distribution system.
- (77) "Level 2 assessment" is an evaluation to identify the possible presence of sanitary defects, defects in distribution system coliform monitoring practices, and (when possible) the likely reason that the system triggered the assessment. A Level 2 assessment provides a more detailed examination of the system (including the system's monitoring and operational practices) than does a Level 1 assessment through the use of more comprehensive investigation and review of available information, additional internal and external resources, and other relevant practices. It is conducted by an individual approved by the Division, which may include the system operator. Minimum elements include review and identification of atypical events that could affect distributed water quality or indicate that distributed water quality was impaired; changes in distribution system maintenance and operation that could affect distributed water quality (including water storage); source and treatment considerations that bear on distributed water quality, where appropriate (e.g., whether a ground water system is disinfected); existing water quality monitoring data; and inadequacies in sample sites, sampling protocol, and sample processing. The system must conduct the assessment consistent with any Division directives that tailor specific assessment elements with respect to the size and type of the system and the size, type, and characteristics of the distribution

system. The system must comply with any expedited actions or additional actions required by the Division in the case of an *E. coli* MCL violation.

- (78) "Locational running annual average" (LRAA) is the average of sample analytical results for samples taken at a particular monitoring location during the previous four calendar quarters.
- (79) "Man-made beta particle and photon emitters" means all radionuclides emitting beta particles and/or photons listed in Maximum Permissible Body Burdens and Maximum Permissible Concentration of Radionuclides in Air or Water for Occupational Exposure, NBS Handbook 69, except the daughter products of thorium-232, uranium-235 and uranium-238.
- (80) "Maximum contaminant level" (MCL) means the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
- (81) "Maximum contaminant level goal" (MCLG) means the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- (82) "Maximum residual disinfectant level" (MRDL) means a level of a disinfectant added for water treatment that may not be exceeded at the consumer's tap without an unacceptable possibility of adverse health effects.
- (83) "Maximum residual disinfectant level goal" (MRDLG) means the maximum level of a disinfectant added for water treatment at which no known or anticipated adverse effect on the health of persons would occur, and which allows an adequate margin of safety. MRDLGs are non-enforceable health goals and do not reflect the benefit of the addition of the chemical for control of waterborne microbial contamination.
- (84) "Medium-size water system" for the purpose of Rule [391-3-5-.25](#) (Lead & Copper), means a water system that serves greater than 3,300 and less than or equal to 50,000 persons.
- (85) "Membrane filtration" is a pressure or vacuum driven separation process in which particulate matter larger than 1 micrometer is rejected by an engineered barrier, primarily through a size-exclusion mechanism, and which has a measurable removal efficiency of a target organism that can be verified through the application of a direct integrity test. This definition includes the common membrane technologies of microfiltration, ultrafiltration, nanofiltration, and reverse osmosis.
- (86) "Minimum Community Population Determination" for the purpose of the Act and the Rules means the minimum residential population shall be determined by a mathematical calculation of the total number of active residential service connections, multiplied by Georgia's average population per household, as published in the most recent Federal

Census Bureau Statistics. Multiple residential units served by a single connection (master meter) shall be included in the determination of population for a water system.

- (87) "Near the first service connection" means at one of the 20 percent of all service connections in the entire system that are nearest the water supply treatment facility, as measured by water transport time within the distribution system.
- (88) "Non-community water system" or "NCWS" means a public water system, which provides piped water for human consumption to at least 15 service connections or which serves at least 25 individuals at least 60 days out of the year but which is not a community water system. A non-community water system may be further classified as a "non-transient, non-community water system" or a "transient, non-community water system".
- (89) "Non-transient, non-community water system" or "NTNCWS" means a public water system that is not a community water system and that regularly serves at least 25 of the same persons over 6 months per year.
- (90) "Operator" means the person responsible for the maintenance and operation of the public water system. A certified operator is an operator registered as a Water Treatment Plant Operator in the State of Georgia in accordance with the provisions of the Certification of Water and Wastewater Treatment Plant Operators and Laboratory Analysts Act (Georgia Laws 1969, pp. 272 et. seq., as amended). For purposes of this Act a certified operator also includes persons involved with only the storage and distribution of drinking water.
- (91) "Optimal corrosion control treatment" as it applies to Rule [391-3-5.25](#) (Lead & Copper) of this Chapter, means the corrosion control treatment that minimizes the lead and copper concentrations at user's taps while insuring that the treatment does not cause the water to violate any national primary drinking water regulation.
- (92) "Person" means any individual, corporation, company, association, partnership, county, municipality, State agency, State authority, Federal agency, agency, facility, or other entity.
- (93) "Picocurie" (pCi) means that quantity of radioactive material producing 2.22 nuclear transformations per minute.
- (94) "Plant intake" refers to the works or structures at the head of a conduit through which water is diverted from a source (e.g., river or lake) into the treatment plant.
- (95) "Point of disinfection application" is the point where the disinfectant is applied and water downstream of that point is not subject to recontamination by surface water runoff.

- (96) "Presedimentation" is a preliminary treatment process used to remove gravel, sand and other particulate material from the source water through settling before the water enters the primary clarification and filtration processes in a treatment plant.
- (97) "Professional Engineer" means a person registered to practice professional engineering in the State of Georgia in accordance with the provisions of the Act governing the Practice of Professional Engineering in Georgia. (Ga. Laws 1945, p. 294 et. seq., as amended).
- (98) "Professional Geologist" means a person registered to practice professional geology in the State of Georgia in accordance with the provisions of the Registration of Geologist Act of 1975, (Code 1933, § 84-2101a, enacted by the Georgia Legislature 1975, p.163, 1).
- (99) "Public water system" or "PWS" means a system that provides water to the public for human consumption through pipes or other constructed conveyances, if such system has at least fifteen (15) service connections or regularly serves an average of twenty-five (25) individuals daily at least 60 days out of the year. Such terms include:
- 1) any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system; and
 - 2) any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system. Such term does not include any "special irrigation district." A public water system is a "community water system", a "non-transient non-community water system" or a "transient non-community water system".
- (100) "Raw water" means water from a source of water supply or a proposed source of water supply, which has not received any type of treatment to change the physical, chemical, biological, or radiological quality of the water.
- (101) "Rem" means the unit of dose equivalent from ionizing radiation to the total body or any internal organ or organ system. A "millirem (mrem)" is 1/1000 of a rem.
- (102) "Repeat compliance period" means any subsequent compliance period after the initial compliance period.
- (103) "Repeat sample" means a sample that is collected and analyzed in response to a previous coliform-positive sample.
- (104) "Residual disinfectant concentration" ("C" in CT calculations) means the concentration of disinfectant measured in milligrams per liter in a representative sample of water.
- (105) "Sanitary defect" is a defect that could provide a pathway of entry for microbial contamination into the distribution system or that is indicative of a failure or imminent failure in a barrier that is already in place.

- (106) "Sanitary survey" means an on-site review of the water source, facilities, equipment, treatment, operation and maintenance of a public water system for the purpose of evaluating the adequacy of each for producing and distributing safe drinking water.
- (107) "Seasonal system" is a non-community water system that is not operated as a public water system on a year-round basis and starts up and shuts down at the beginning and end of each operating season.
- (108) "Sedimentation" means a process for removal of solids before filtration by gravity or separation.
- (109) "Service connection" means the point at which the water distribution main and the water service pipe, metered or unmetered, are connected to serve water to a residence or water customer. As used in the definition of PWS, "service connection" does not include a connection to a system that delivers water by a constructed conveyance other than a pipe if:
- (a) The water is used exclusively for purposes other than residential uses (consisting of drinking, bathing, and cooking, or other similar uses);
 - (b) The Division determines that alternative water to achieve the equivalent level of public health protection provided by the applicable national primary drinking water regulation is provided for residential or similar uses for drinking and cooking; or
 - (c) The Division determines that the water provided for residential or similar uses for drinking, cooking, and bathing is centrally treated or treated at the point of entry by the provider, a pass-through entity, or the user to achieve the equivalent level of protection provided by the applicable national primary drinking water regulations.
- (110) "Service line sample" means a one-liter sample of water collected in accordance with Rule [391-3-5-.25](#) that has been standing for at least 6 hours in the service line.
- (111) "Single family structure" for the purpose of compliance with Rule [391-3-5-.25](#) (Lead & Copper), means a building constructed as a single-family residence that is currently used as either a residence or place of business.
- (112) "Slow sand filtration" means a process involving passage of raw water through a bed of sand at low velocity (generally less than 0.4 meters per hour) resulting in substantial particulate removal by physical and biological mechanisms.
- (113) "Small water system" for the purpose of Rule [391-3-5-.25](#) (Lead & Copper), means a water system that serves 3,300 persons or fewer.
- (114) "Source of water supply" means the waters of the State from which raw water is taken into a public water system to be treated and/or distributed.

- (115) "Source Water Assessment Plan" (SWAP) means a public report which documents a public drinking water system's and other stakeholders' reasonable efforts to ascertain the potential impact of natural or man-made pollutants, within a wellhead protection or watershed area, on the raw water source for the drinking water supply well or surface water intake.
- (116) "Spring" means a source of water supply which naturally issues forth for the first time from rock or soil onto the land or into a body of water.
- (117) "Standard sample" means the aliquot of finished drinking water that is examined for the presence of coliform bacteria.
- (118) "Storage tank" or "Tank" means any covered structure, such as clearwell, standpipe, reservoir, elevated tank, hydropneumatic tank or other storage facility or combination thereof used to store drinking water.
- (119) "Subpart H systems" means public water systems using surface water or ground water under the direct influence of surface water as a source.
- (120) "Supplier of water" or "Supplier" means any person who owns or operates a public water system.
- (121) "Surface water" means and includes any and all rivers, streams, branches, creeks, ponds, tributary streams, drainage basins, natural lakes, artificial reservoirs and impoundments and ground water under the direct influence of surface water.
- (122) "SUVA" means Specific Ultraviolet Absorption at 254 nanometers (nm), an indicator of the humic content of water. It is a calculated parameter obtained by dividing a sample's ultraviolet absorption at a wavelength of 254 nm by its concentration of dissolved organic carbon (DOC) (in mg/L).
- (123) "System with a single service connection" means a system, which supplies drinking water to consumers via a single service line.
- (124) "Total Organic Carbon" (TOC) means total organic carbon in mg/L measured using heat, oxygen, ultraviolet irradiation, chemical oxidants, or combinations of these oxidants that convert organic carbon to carbon dioxide, rounded to two significant figures.
- (125) "Total trihalomethanes" (TTHM) means the sum of the concentration in milligrams per liter of the trihalomethane compounds: trichloromethane (chloroform), dibromochloromethane, bromodichloromethane and tribromomethane (bromoform), rounded to two significant figures.
- (126) "Too numerous to count" means that the total number of bacterial colonies exceed 200 on a 47-mm diameter membrane filter used for coliform detection.

- (127) "Transient non-community water system" or "TNCWS" means a public water system that is not a community water system or a non-transient non-community water system. A transient non-community water system provides piped water for human consumption to at least 15 service connections or which regularly serves at least 25 persons at least 60 days a year.
- (128) "Treatment Technique" means a required process intended to reduce the level of contaminants in drinking water.
- (129) "Treatment technique requirement" means a requirement, which specifies for a contaminant, a specific treatment technique(s), which leads to a reduction in the level of such contaminant sufficient to comply with the requirements of these Rules.
- (130) "Trihalomethane" (THM) means one of the family of organic compounds, named as derivatives of methane, wherein three of the four hydrogen atoms in methane are each substituted by a halogen atom in the molecular structure.
- (131) "Two-stage lime softening" is a process in which chemical addition and hardness precipitation occur in each of two distinct unit clarification processes in series prior to filtration.
- (132) "Unconfined aquifer" means an aquifer which is not separated from the land surface by a significant zone of low permeability and, therefore, is more susceptible to pollution from the activities of mankind. Wellhead Protection Areas for unconfined aquifers are larger than such areas for confined aquifers.
- (133) "Uncovered finished water storage facility" means a tank, reservoir or other facility used to store water that will undergo no further treatment except residual disinfection and is open to the atmosphere.
- (134) "Variance" means approval from the Division affording a public water system an extended time for compliance with a maximum contaminant level or treatment technique contained in a drinking water standard. A variance pertains to non-compliance with a maximum contaminant level due to the inability to meet the maximum contaminant level even when a treatment method has been applied to a raw water source. The noncompliance is due to the quality of the raw water.
- (135) "Virus" means a microorganism of fecal origin, which is infectious to humans by waterborne transmission.
- (136) "Waterborne disease outbreak" means the significant occurrence of acute infectious illness, epidemiologically associated with the ingestion of water from a public water system which is deficient in treatment, as determined by the Division.
- (137) "Waters" or "Waters of the State" means and includes any and all rivers, streams, creeks, branches, lakes, reservoirs, ponds, drainage systems, springs, wells, and all other bodies of surface or underground water, natural or artificial, of this State.

- (138) "Watershed Area" means the entire drainage basin upstream of a water intake located on a stream or lake.
- (139) "Well" means any excavation that is cored, bored, drilled, jetted, dug, or otherwise constructed for the purpose of locating, testing, or withdrawing ground water.
- (140) "Wellhead protection area" means an area of potential ground water recharge around a well which should be protected from surface and subsurface sources of manmade pollution in order to protect the quality of drinking water supplies.
- (141) "Wholesale system" is a public water system that treats source water as necessary to produce finished water and then delivers some or all of that finished water to another public water system. Delivery may be through a direct connection or through the distribution system of one or more consecutive systems.

Rule 391-3-5-.03. Coverage.

- (1) **Applicability.** These rules shall apply to all public water systems in the state, except that such rules shall not apply to a public water system which meets all the following criteria:
- (a) which consists only of distribution and storage facilities (and does not have any collection and treatment facilities);
 - (b) which obtains all of its water from, but is not owned or operated by the owner or operator of a public water system to which such rules apply;

- (c) which does not sell water to any person; and
- (d) which is not a carrier which conveys passengers in interstate commerce.

Authority: Ga. L. 1977, p. 351 *et seq.*, O.C.G.A. Sec. [12-5-170](#) *et seq.*, as amended.

History. Original Rule entitled "Approved Required" was filed on September 6, 1973; effective September 26, 1973.

Amended: Rule repealed and a new Rule entitled "Coverage" adopted. Filed July 5, 1977; effective July 26, 1977, as specified by Rule [391-3-5-47](#).

Amended: F. Jan. 8, 2014; eff. Jan. 28, 2014.

Rule 391-3-5-.04. Approval Required. Amended.

- (1) **Approval.** No person shall erect, construct, or operate a public water system, nor undertake substantial enlargements, extensions, additions, modifications, renovations or repairs to any public water system, including storage, distribution, purification, or treatment components, without having first secured the Division's approval of: the source of water supply; the means and methods of treating, purifying, storing and distributing said water; and obtaining a permit to operate a public water system, except as provided by paragraph (2) of this Rule. The approval of the Director must be obtained prior to the dividing of a public water system. For purposes of these rules "substantial" as used in this Rule shall not include routine maintenance.
- (2) **Limited Additions.** Governmentally owned public water systems and water authorities and privately owned community water systems whose owners serves a combined population of greater than 10,000, with qualified staff and meeting operating criteria developed by the Division may, with prior approval from the Division, approve limited additions to the water system. These additions will be limited to water distribution lines to serve subdivisions, apartment complexes and shopping centers. The review of other additional types of water distribution system additions and/or extensions may be delegated to those water systems that have demonstrated the capability for such reviews. All delegations shall be by written agreement. Additions approved by the water system must be reported annually in a format prescribed by the Division. The report shall be due by July 1 of each year and describe additions approved in the previous calendar year.
- (3) **Local Governmental Approval.** Before a person may initiate construction of a new public water system or increase the capacity of an existing public water system, the person shall notify the local government in which the system is located and obtain the local government's approval for development of the project within its jurisdiction, prior to the submittal of the plans and specifications to the Division for approval. To the extent practicable, the person should avoid locating part or all of the new or expanded facility at a site which:

- (a) is subject to a significant risk from earthquakes, floods, fires or other disasters which could cause a breakdown of the public water system or a portion thereof; or
 - (b) except for intake structures, is within the floodplain of a 100- year flood or is lower than any recorded high tide where appropriate records exist; or
 - (c) is on or in close proximity to an abandoned landfill or any other site used for waste disposal.
- (4) **Connect to Local Governmental Public Water System.** Any person who desires to own or operate or who desires to commence the operation of a public water system shall first evaluate connecting to an existing local governmentally owned and operated public water system.
- (5) **Approval for No Connection to Local Governmental Public Water System.** No approval of the plans and specifications for the development of a separate source of water supply or the construction of the water system will be made and no permit to operate will be issued until the owner has provided acceptable certification to the Division outlining the reasons why the system cannot connect to an existing local governmentally owned water system.
- (6) **Pre-Operating Compliance Conditions.** Beginning January 1, 1998, the Division shall require compliance with the following conditions prior to the issuance of the initial permit to operate to a new privately owned community public water system:
- (a) The owner shall provide written certification from the local government in which the system is located, that the local government is in concurrence with the development of the privately owned public water system. The certification shall be provided to the Division with the submission of the permit application and prior to or concurrently with the submission to the Division of the plans and specifications for construction of the proposed public water system.
 - (b) The owner must retain a Professional Engineer, registered in the State of Georgia, to prepare plans and specifications for approval by the Division for the construction of the proposed public water system, and the owner shall submit to the Division a certification from the engineer that the water system was constructed according to the plans and specifications approved by the Division. The public water system must be designed and constructed in accordance with the Division's "Minimum Standards for Public Water Systems", latest edition.
 - (c) The owner must provide an approved back-up water source, such as an additional well, capable of providing adequate water service if the primary source becomes nonfunctional. The requirement for an approved back-up water source may be waived by the Director for systems with less than 25 service connections.

(7) **Treatment Products and Materials.** Products added directly to drinking water for its treatment or introduced indirectly into drinking water through its contact with surfaces of materials or products used for its treatment, storage, transmission, or distribution shall not adversely affect drinking water quality and public health.

(a) All treatment chemicals that come into contact with drinking water shall be certified for conformance with American National Standards Institute/National Sanitation Foundation Standard 60 (ANSI/NSF Standard 60) by an American National Standards Institute (ANSI) approved third-party certification program or laboratory.

(b) All products that come into contact with drinking water during its treatment, storage, transmission or distribution shall be certified for conformance with American National Standards Institute/ National Sanitation Foundation Standard 61 (ANSI/NSF Standard 61) by an American National Standards Institute (ANSI) approved third-party certification program or laboratory.

(8) **Infrastructure Security.** Public water systems must provide appropriate measures to protect and secure its critical drinking water supply infrastructure, including its water source, treatment, distribution, and any other component that is deemed pertinent to the safe operation and maintenance of the drinking water supply system.

(9) **Performance Bond or Letter of Credit**

(a) A performance bond or letter of credit may be required by the director to further assist in the assurance that a public water system serving year-round residents maintains compliance with the established contaminant levels and the provision of an adequate supply of water at or above the required minimum pressure. Such a performance bond or letter of credit shall be required of the owner or operator of any public water system serving year-round residents if:

1. After the first violation of contaminant or water supply standards or requirements, the owner or operator of the public water system fails to make the necessary corrections after receiving a notice from the director specifying:

(i) The corrections which must be made; and

(ii) A reasonable period of time for the completion of necessary corrective action; or

2. After a second violation of contaminant or water supply standards or requirements, the director makes a determination, based on factors such as past performance, frequency and severity of violations, and timeliness of corrective action, that a performance bond or letter of credit is required.

- (b) Any owner or operator of a public water system serving year-round residents who is required to obtain a performance bond or letter of credit pursuant to subparagraph (9)(a) shall file with the director the following:
1. A performance bond, payable to the director and issued by an insurance company authorized to issue such bonds in this state; or
 2. An irrevocable letter of credit, issued in favor of and payable to the director, from a commercial bank or other financial institution approved by the director.
- (c) The bond or letter of credit required in subparagraph (9)(a) shall be:
1. Conditioned upon faithful compliance with the Georgia Safe Drinking Water Act of 1977, the Rules for Safe Drinking Water Chapter 391-3-5, and the conditions and terms of the permit issued for the operation of the public water system;
 2. In such amount as determined by the director as necessary to ensure the continued lawful operation of the public water system for a period up to ten years in the event the owner or operator fails to do so; provided, however, the range shall be as follows:
 - (i) Systems with 25 service connections or less - an amount not to exceed \$30,000.00;
 - (ii) Systems with 26 to 50 service connections - an amount not to exceed \$40,000.00; or
 - (iii) Systems with more than 50 service connections - an amount not to exceed \$50,000.00;
 3. Subject to termination or expiration only upon 120 days' written notice to the director; and
 4. Conditioned upon coverage for any violation occurring during the term of the bond or letter of credit of which written notice has been given to the owner or operator prior to 120 days after said term even though the initial or final determination of the violation occurs after the term of the bond or letter of credit.
- (d) If an existing bond or letter of credit is to expire or terminate, the owner or operator of the public water system shall file a replacement bond or letter of credit meeting the requirements of this paragraph at least 60 days prior to the termination or expiration of the existing bond or letter of credit.

- (e) Upon a determination by the director that an owner or operator has violated the Georgia Safe Drinking Water Act of 1977, the Rules for Safe Drinking Water Chapter 391-3-5, or the terms or conditions of a permit, the director may, after written notice of the violation to the owner or operator:
 - 1. Forfeit or draw that amount of such bond or letter of credit that the director determines necessary to correct the violations determined and continue the lawful operation of the public water system; and
 - 2. Expend such amount for such purposes.
 - (f) No action taken by the director pursuant to this paragraph, including the forfeiture of a bond or the drawing of funds from a letter of credit, shall relieve the owner or operator of a public water system from compliance with all provisions of this part, including the requirement to maintain in full force and effect a bond or letter of credit meeting the requirements of this paragraph.
 - (g) Every permit issued under the Rules for Safe Drinking Water, Chapter 391-3-5, shall be conditioned upon compliance with this paragraph.
 - (h) The provisions of this paragraph shall not apply to:
 - 1. Any public water system of the state, an agency of the state, a county, a municipality, or of any other political subdivision or governmental entity;
 - 2. Any water system owned by a church or other religious institution;
 - 3. Any water system owned or provided by an employer and used primarily to serve employees; and
 - 4. Any water system which is jointly owned by private individuals who are the users of the water supplied by the system.
- (10) **Business Plan.** Beginning January 1, 1998, prior to the issuance of the initial permit to operate to a new community public water system, and beginning October 1, 1999, prior to the issuance of the initial permit to operate a new non transient, noncommunity water system, the Division shall require the owner to submit to the Division for approval a multiyear business plan. The multiyear business plan must adequately demonstrate the water system's managerial and financial capacity to comply with all drinking water regulations in effect, or likely to be in effect. The business plan shall be prepared in accordance with the latest edition of the Division's "Minimum Standards for Public Water Systems." The business plan shall be updated at intervals determined by the Director.

Rule 391-3-5-.05. Preparation and Submission of Engineering Reports, Plans and Specifications for Public Water Systems.

- (1) **General Provisions.** For any activity listed in paragraph (1) of Rule [391-3-5-.04](#) an engineering report prepared by a professional engineer shall be submitted to the Division prior to the preparation of the final construction plans and specifications. Plans and Specifications shall be prepared by a professional engineer and submitted to the Division, accompanied by a letter of submittal identifying the project, owner and owner's address. No construction shall be initiated without prior approval from the Division. The engineering report and/or plans and specifications may be waived by the Director when information submitted by the supplier of water allows an engineering appraisal of the proposed activity to be made by the Division as follows:
 - (a) For minor extensions, additions and/or modification to an existing governmentally owned public water systems which do not affect the normal operation of said water system.
 - (b) For new public water systems which are classified as transient non-community water systems and for additions to existing transient non-community water systems.
- (2) **Engineering Report.** The Engineering report shall contain a comprehensive description of the proposed activity including, but not limited to the following:
 - (a) scope and description of proposed activity;
 - (b) description of the proposed source of water supply, and data concerning the quality of the water;
 - (c) pertinent information regarding present available sources of water supply, water treatment facilities, and existing public water systems;

- (d) sufficient maps, diagrams, charts, tables, calculations, basis of design data and graphs to make the reports readily understandable; all sheets shall be descriptively labeled and bound together or folded in a folder attached to the report;
 - (e) operational and maintenance program description;
 - (f) the known character and depth of the natural earth formations through and from which groundwater sources are to developed;
 - (g) factors which may affect the quality of a source of water supply as determined by a survey of the water shed above the surface water intake or the surrounding area of a groundwater source.
- (3) **Minimum Standards.** Beginning January 1, 1998, all new, additions, or extensions to public water systems shall be designed and constructed in accordance with the latest edition of the Division's "Minimum Standards for Public Water Systems".
- (4) **Plans and Specifications.** Plans and specifications must be submitted with additional copies as may be requested, and shall include, but not be limited to the following:
- (a) map plans of the area to be served by the public water system, including, but not limited to: geographical location of the project, location of all existing and proposed streets in the area to be served, location of the source of water supply and the treatment facilities, and elevations of the principal parts of the public water system;
 - (b) detailed plans of the location and the construction of the storage tank, water mains, valves, fire hydrants and appurtenances;
 - (c) detailed plans of: the location and construction of the water treatment facilities including layout and relationship of the various units of the treatment facility; general piping, pumps, reservoirs, flow measuring devices, controls, points of chemical application, water sampling points, plant control laboratory, chemical feed equipment and chemical storage area. Sufficient dimensions and elevations shall be provided to make all parts of the readily understandable.
 - (d) the dimensions of the plan sheets must be within the following limits: twenty (20) to thirty (30) inches in height and twenty-four (24) to forty-two (42) inches in length;
 - (e) each plan sheet shall have printed thereon the name and location of the public water system, name and registration stamp of the professional engineer, scale, true and magnetic north, and shall be bound together and numbered consecutively;

- (f) if the plans are solely for extensions to an existing public water system, only such information as is necessary for comprehension of the plans and construction of the project will be required;
 - (g) specifications will be separate from the plans and shall have printed thereon the name and location of the public water system, name and stamp of the professional engineer, and shall be bound together and numbered consecutively;
 - (h) specifications for the construction of the public water system shall accompany all plans for new or existing public water systems and shall describe the plans for the whole and for each unit or component of construction of the proposed public water system, including where necessary, testing and disinfection, painting, laboratory equipment, metering and recording devices and related material;
 - (i) the specifications may be omitted for extensions or additions to existing systems provided the proposed construction is in accordance with specifications previously approved and on file with the Division;
 - (j) manufacturers' brochures of specifications of materials are not acceptable for purposes of this requirement.
- (5) **Deviations from Approved Plans.** Any significant deviation from the approved plans or specification must receive prior approval by the Division.
- (6) **Installation According to Plans and Specifications.** Upon completion of the installation of the public water system or any modification, the owner must send to the Division a statement from the engineer who prepared the plans and specifications that the system, as installed, is in accordance with the approved plans and specifications.
- (7) **Integrity of Treatment Units or Equipment.** Approval of plans and specifications by the Division does not include approval of the structural, electrical, mechanical, or design integrity of the treatment units or equipment.
- (8) **Construction Without Division Approval.** At the discretion of the Director, an existing public water system that is constructed without obtaining prior approval from the Division may be considered acceptable by the Director, provided all of the following are accomplished to the satisfaction of the Division:
- (a) An engineering evaluation of the constructed facilities is made by a professional engineer, licensed in the state of Georgia, to evaluate and certify conformance of the constructed facilities with all of the applicable paragraphs of the rules in this Chapter. The engineer's certification, along with the "as-built" plans and specifications must be submitted to the Division for review and comment.
 - (b) All items, data, documentation and information required for source approvals and permit issuances for a public water system, as stated in the rules of this Chapter,

must be submitted to the Division. Any additional and/or corrective action that is required by the Division for the owner or operator of the system to complete, prior to issuance of the permit, must be accomplished within ninety (90) days from the date of notification by the Division.

Rule 391-3-5-.06. Source of Water Supply.

- (1) **Source of Water Supply.** The source of water supply for all public water systems must have the approval of the Division and a valid ground water (Ground Water Use Act of 1972, as amended) or surface water (Georgia Water Quality Control Act of 1977, as amended) withdrawal permit where applicable. Beginning January 1, 1998, all owners and operators of new community public water systems with groundwater sources must provide an approved back-up water supply source, capable of providing adequate water service, if the primary source becomes nonfunctional. The Director may waive this requirement for systems with less than 25 service connections. Beginning December 1, 2009, any new ground water source must provide treatment that reliably achieves at least 4-log (99.99%) treatment of viruses before or at the first customer.
 - (a) All sources of water supply must be adequate as determined by the Division to meet anticipated growth. For human consumption in a community water system, one hundred (100) gallons per day for the projected population to be served at the end of the design period shall be considered adequate.
 1. Beginning January 1, 1998, all new sources constructed for water supply systems, that are required to comply with the rules in this Chapter, shall be metered.
 2. Beginning January 1, 1999, permitted water systems shall meter their existing water supply sources, when required by the Division or when the system's existing permit to operate a public water system is renewed or modified.
 - (b) The water must be of such quality that with reasonable treatment it will meet the Safe Drinking Water Rules of this Chapter.

- (c) Before approval of a surface water source the following procedures and requirements must be met:
1. Raw water samples from the proposed source shall be collected by the supplier or designee and submitted to a certified laboratory for microbiological analysis for the period of time and frequency specified by the Division.
 2. The supplier shall have the water from the proposed source analyzed for the physical, chemical and radiological parameters specified by the Division in a laboratory acceptable to the Division and shall furnish a copy of the results of the analysis to the Division.
 3. For an impoundment source, allowance must be made for water losses including required releases, evaporation, seepage and siltation. Available stream flow and weather records must be used in estimating the yield of the source.
 4. For water supply reservoirs, a reservoir management plan shall be developed in accordance with Rule [391-3-16-.01\(8\)](#).
 5. A Source Water Assessment Plan (SWAP) for the proposed surface water source intake must be developed in accordance with the Division's *Source Water Assessment and Protection Implementation Plan for Public Drinking Water Sources*, as outlined in Section [391-3-5-.42](#) of this Chapter.
- (d) Before approval of a ground water source, whether from a well or a spring, the following procedures and requirements must be met:
1. Raw water samples of the proposed source shall be collected by the supplier and submitted to a laboratory certified by the Division for microbiological analysis for a period of time and frequency specified by the Division.
 2. The supplier shall, when directed by the Division, have the water from the proposed source analyzed for the physical, chemical and radiological parameters specified by the Division in a laboratory acceptable to the Division and shall furnish a copy of the results of the analysis to the Division.
 3. Any drilled well previously used as a source of public water supply but inactive for three or more years and proposed to be reactivated as a source of supply shall be test pumped and meet the requirements of subparagraphs 1. and 2. of this paragraph.
 4. A Source Water Assessment Plan (SWAP) for the proposed ground water source must be developed, as applicable, in accordance with the Division's

Source Water Assessment and Protection Implementation Plan for Public Drinking Water Sources, as outlined in Section [391-3-5-42](#) of this Chapter.

- (e) The Division may direct that a ground water source be evaluated for the influence of surface water. Within eighteen (18) months of Division notification that a ground water source is under the direct influence of surface water, the supplier shall install filtration treatment and may be required by the Division to install additional treatment in accordance with subparagraph (a) of Rule [391-3-5-09](#).

Rule 391-3-5-.07. Wells.

- (1) **Approval.** No person shall construct a well as a source of water supply for a public water system without having first obtained approval from the Division. This requirement may be waived by the Director during emergency situations. Any well that is constructed and does not meet the rules of this Chapter shall not later be used as a drinking water source for a public water system.
- (2) **Prohibited Wells.** Dug, bored, or jetted wells are prohibited for all new public water systems.
- (3) **Protection from Contamination.** Each well must be protected from contamination by surface waters and other sources of contamination. The location of wells must be in compliance with the latest edition of the Division's "Minimum Standards for Public Water Systems."
- (4) **Fill, Plug and Seal.** Whenever a bore hole of any depth is excavated for, but not used as a source of water supply it shall be the supplier's responsibility to fill, plug and seal the hole within thirty (30) days of the excavation in a manner approved by the Division to restore as nearly as possible the natural earth condition existing before the hole was

excavated and to protect against contamination of the ground water. This paragraph shall not apply where some other use is made of the ground water from the well hole.

(5) **Well Construction Standards.** All wells must be constructed as hereinafter provided, however, deviations from these rules may be permitted or required by the Division due to the variable conditions of the subsurface and ground water quality in a specific area.

- (a) Drilling fluids must be from an uncontaminated source or must be disinfected.
- (b) All permanent casing, liners, screens and other manufactured material used in the well installation must be new and adequate to protect the well against entrance of contaminants during the expected life of the well. All casing and liner pipe joints shall be water tight the entire length in drilled wells.
 - 1. Steel pipe well casing shall conform to American Society for Testing and Materials (ASTM) Specification A 53, American Petroleum Institute (API) Specification 5L, or equal standard, and meet the following minimum wall thickness unless otherwise approved by the Division.

Nominal Casing Diameter (inches)	Minimum Wall Thickness (inches)
4	0.237
5	0.258
6	0.280
8	0.322
10	0.365
12	0.375
14	0.375
16	0.375
18	0.375
20	0.375
24	0.500
26	0.500

- 2. The use of plastic well casing and screens must be approved by the Division prior to well installation. The well casing and couplings shall meet the requirements of the ASTM Standard F 480 or equal standard and the National Sanitation Foundation for use with potable water. When approved for use by the Division, plastic well casing shall conform to the following minimum wall thickness. However, plastic well casing diameters of 12 inches or greater or deep wells may require greater wall thickness to meet the collapse strength requirements.

Nominal Casing Diameter (inches)	Minimum Wall Thickness (inches)
----------------------------------	---------------------------------

4	0.265
4.5	0.291
6	0.390
8	0.508
10	0.632
12	0.750

Plastic well casing and screen shall not extend to a depth of greater than 300 feet below the ground surface.

- (c) The outer, permanent, protective casing shall extend at least five (5) feet into the first solid, unweathered or impervious subsurface rock strata encountered, and shall have a minimum length of twenty-five (25) feet from the ground surface into a well excavated into water-bearing formations in crystalline rocks and fifty (50) feet in a well excavated into sedimentary water-bearing formations. The outer, permanent, protective casing shall be cement grouted its entire length with a cement slurry consisting of not more than six (6) gallons of water to one cubic foot cement, plus standard additives, when necessary, to facilitate placing or setting and shall be placed under pressure from the bottom of the annular space to be grouted upward until the grout is extruded at the earth's surface. The wall thickness of the cement grout surrounding the outer, permanent, protective casing shall be not less than one and one-half (1-1/2) inches at any point. Subsurface well construction shall cease for at least twenty-four (24) hours after grouting. Other grouting materials for sealing the annular space may be used upon the approval of the Division prior to well construction.
 - (d) Any ground water of unacceptable quality encountered during the well construction must be sealed off.
 - (e) The gravel for gravel-packed wells must be washed, free of organic matter, and composed of well rounded particles.
- (6) **Stoppage During Construction.** During the periods of stoppage of the well construction and when the site is unattended, the drilling contractor must have the well opening securely covered to prevent tampering and possible contamination.
- (7) **Sanitary Conditions.** During the well construction, the premises, construction material, tools and equipment must be maintained in a sanitary manner to prevent contamination of the well by the person excavating the well.
- (8) **Proper Well Development.** Every well must be properly developed, disinfected, and pump tested by the drilling contractor. The well must be test pumped at not less than the

desired yield for a period of at least twenty-four (24) hours and shall continue for at least four (4) hours after the pumping level has stabilized. The static water level, drawdown and pumping water level must be measured.

(9) **Disinfection of the Well.**

- (a) The well must be disinfected prior to the pumping test by the introduction of a chlorine solution into the well under sufficient pressure to overcome the natural flow pressures of all developed water-bearing zones, and in sufficient quantity to produce a minimum chlorine residual of fifty (50) parts per million in six (6) hours after such application.
- (b) After disinfection, the well must be pumped until no trace of chlorine remains in the water, and water samples taken for microbiological analysis. No water may be furnished for human consumption until samples of water are collected by the supplier, and submitted to the Division for microbiological examination, and the quality of the water approved by the Division. If the water samples submitted are found to be unsatisfactory, the disinfection procedure must be repeated as required by the Division.
- (c) The permanent pump and pumping equipment shall be disinfected with a chlorine solution prior to being placed into service.
- (d) Well disinfection shall be conducted in accordance with American Water Works Association (AWWA) Standard C654.

(10) **Licensed Water Well Contractor.** The person constructing the well shall be a licensed water well contractor in the State of Georgia in accordance with the provisions of the Water Well Standards Act of 1985 (O.C.G.A. § [12-5-120](#), et. seq.). The contractor must maintain accurate driller logs, material setting and grouting data, complete results of the pump test, including water level measurements, and must furnish a signed copy of the results to the owner and to the Division on forms provided by the Division.

(11) **Installation Standards.** A well used as a source of water supply must include the following:

- (a) A concrete slab with a minimum thickness of six (6) inches shall be constructed around the well casing and shall extend at least two (2) feet in all directions, and slope away, from the casing.
- (b) The well casing shall extend at least twelve (12) inches above the concrete slab of the floor.
- (c) For submersible pump installations, the well casing shall be provided with a sealed cover plate and, when required by the Division, vented by a screened riser pipe so that the screened opening terminated downward at least twelve (12) inches above the top of the casing or ground level.

- (d) For turbine pump installations, a concrete block to support the pump motor shall be constructed around the outer well casing and shall extend at least twelve (12) inches above the concrete slab, and:
 - 1. the outer casing shall extend at least one (1) inch above the pump motor block;
 - 2. the well head and pump base shall be sealed to prevent seepage and the casing shall be vented by a screened riser pipe so that the screen opening terminates downward and above any point of back flow of contaminants into the well; and
 - 3. oil lubricated vertical turbine pumps shall be lubricated with an acceptable turbine oil as prescribed by the pump manufacturer.
 - (e) A raw water sampling tap shall be installed prior to the well discharge pipe check valve.
 - (f) An access port of not less than five-eighths (5/8) inch in diameter, with screw cap, for water level measurements; a deep well air line and gage may also be used in conjunction with the access port.
- (12) **Deepening Existing Wells.** Existing wells that are deepened shall be regarded by the Division as a development of a new ground water source and must meet the requirements for approval.
- (13) **Rehabilitating Existing Wells.** When an existing well is rehabilitated or reworked, the well shall be disinfected according to procedures described in this Rule.
- (14) **Infrastructure Security.** The pumping and water treatment equipment shall be protected from unauthorized entry and use by an enclosed shelter or enclosed by a fence. In addition, the water treatment equipment shall be enclosed in a weather proof shelter.

Rule 391-3-5-.08. Springs.

- (1) **Enclosure Required.** A spring to be used as a source of water supply for a public water system must be protected by an enclosed structure. The walls of the structure must extend down to bedrock, or into the soil sufficiently to provide for a proper foundation to prevent surface water infiltration.
- (2) **Runoff Diversion.** All surface water runoff must be diverted from the spring.
- (3) **Surface Water Entry.** The spring must be protected from any entry of surface water.
- (4) **Overflow.** The overflow from the spring's enclosed structure must be designed to prevent entrance of contaminants or animals.
- (5) **Facility Enclosure.** The pumping and water treatment facilities must be enclosed in shelters that are of weather and vandal-proof construction.
- (6) **Infrastructure Security.** The spring area must be secured as specified by the Division to prevent unauthorized entry.

Rule 391-3-5-.09. Water Treatment Facilities.

- (1) **Water Treatment Facility Requirements.** All means and methods of treating, purifying and storing water for public water systems must be approved by the Division. The Division shall consider, but not be limited to, the following requirements when evaluating water treatment facilities for a public water system:
 - (a) Surface water treatment plants and ground water treatment plants must be of such design and capacity to provide for the required treatment of the raw water so that the drinking water will comply with the rules of this Chapter. In addition, surface water treatment plants and plants treating ground water under the influence of surface water must provide facilities for filtration of the raw water, and must provide, when required by the Division, flocculation and sedimentation of the raw water and continuous coagulation or application of other filter aids for optimization of filter performance.
 1. Water treatment plants processing surface water sources shall include, but not be limited to, means for rapid mixing, flocculation, sedimentation, filtration and disinfection. The treatment plant shall be of such construction

to allow units to be taken out of service without disrupting operation and required treatment processes.

2. Based upon the quality of raw water, the quality desired in the finished water and other factors, multiple-stage treatment facilities and/or presedimentation facilities, shall be provided when required by the Division.
- (b) The Division may accept new and alternate treatment means, methods and technologies, provided the following are demonstrated to the satisfaction of the Division:
1. The treatment method has been thoroughly tested in full scale comparable installations by an acceptable third party, in accordance with protocol and standards acceptable to the Division.
 2. The treatment method has been thoroughly tested in a pilot plant approved by the Division, by an acceptable third party, in accordance with protocol and standards acceptable to the Division, and operated for a period that will demonstrate the effectiveness and reliability of the proposed treatment system during changes in seasonal, and climatic conditions.
 3. Compliance with the treatment technique requirements of paragraph (1)(p).
- (c) Water from a spring shall be disinfected and retained in a detention tank for a minimum of thirty (30) minutes unless otherwise approved by the Division; and such additional water treatment as the Division may require for the drinking water to comply with the rules of this Chapter.
- (d) Chemical feed equipment shall be of such design and capacity to accurately supply, at all times, the treatment chemicals required.
- (e) Chlorination equipment may be solution-feed-gas-type but must have sufficient feed capacity for the treatment of the raw water and drinking water to maintain a chlorine residual in the drinking water as required by paragraph (2) of Rule [391-3-5-14](#).
- (f) Gas chlorination equipment and cylinders must be housed in a separate room or facility provided for that purpose, separated from the other treatment facilities and chemicals. The following shall be required:
1. Chlorine cylinders stored or used outdoors must be protected from the direct rays of the sun by shading and additionally protected to prevent unauthorized tampering.
 2. Chlorine cylinders must be secured from accidental tipping or movement.

3. A chlorine gas mask or self-contained gas mask (air pack) must be provided outside the gas chlorine room or facility or otherwise made available and be readily accessible to the operator for repairs or emergencies.
 4. Forced air ventilation, placed near floor level and near the cylinders, must be provided to exhaust any leaking chlorine gas from a confined room or facility. Exhaust fumes must be directed away from the entrance to the room or facility. The fan must be activated by an outside switch or start automatically when the door is opened.
 5. A small bottle of fresh ammonia solution shall be provided for testing for chlorine gas leaks.
- (g) Hypochlorite feeders are not required to be placed in a separate room or facility.
- (h) Other means of disinfection such as iodine, ultra-violet light, or ozone treatment may be approved by the Division.
- (i) There must be sufficient space for chemical storage.
- (j) Fluoridation equipment and chemicals, where used, must be placed in a separate room or facility provided for that purpose, unless otherwise approved by the Division.
- (k) Each water treatment facility must have, as may be required by the Division, a laboratory and laboratory equipment to perform daily tests pertinent to the proper control of the required water treatment operations.
- (l) Water sampling taps shall be placed in the water treatment facility, as may be required by the Division, for obtaining water samples to perform laboratory tests to ensure the proper functioning of the water treatment facility.
- (m) A metering device to measure the flow of raw water and/or treated water is required for all surface water treatment plants and all new wells serving public water systems.
- (n) Water from a well used as a source of water supply shall be disinfected unless otherwise approved by the Division and such additional water treatment as the Division may require for the drinking water to comply with the rules of this Chapter.
- (o) Chemical water treatment equipment must be installed in such a manner to prevent back-siphonage or overdosing of the chemicals to the water supply.

- (p) Each public water system with a surface water source or a ground water source under the direct influence of surface water must provide treatment of that source water that complies with these treatment technique requirements. The treatment technique requirements consist of installing and properly operating water treatment processes which reliably achieve:
1. At least 99.9 percent (3-log) removal and/or inactivation of *Giardia lamblia* cysts between a point where the raw water is not subject to recontamination by surface water runoff and a point downstream before or at the first customer; and
 2. At least 99.99 percent (4-log) removal and/or inactivation of viruses between a point where the raw water is not subject to recontamination by surface water runoff and a point downstream before or at the first customer.
 3. At least 99 percent (2-log) removal of *Cryptosporidium* between a point where the raw water is not subject to recontamination by surface water runoff and a point downstream before or at the first customer for filtered systems. This treatment technique requirement is applicable to Subpart H systems serving at least 10,000 people, beginning January 1, 2002, and to systems serving fewer than 10,000 people, beginning January 14, 2005.
- (q) Effective June 29, 1993, each public water system with a surface water source or a ground water source under the direct influence of surface water source shall conduct continuous monitoring of the residual disinfectant concentration of the water entering the distribution system. The continuous online chlorine analyzer shall be calibrated in accordance with EPA Method 334.0. Systems must record the results of the residual disinfectant monitoring every fifteen (15) minutes, and record and report the lowest value each day, except if there is a failure in the continuous monitoring equipment, grab sampling every 4 hours may be conducted in lieu of continuous monitoring, but for no more than 5 working days following the failure of the equipment, and systems serving 3,300 or fewer persons may take grab samples in lieu of providing continuous monitoring on an ongoing basis at the frequencies each day prescribed below:

Population Served	Samples per day¹
500 or fewer	1
501 to 1,000	2
1,001 to 2,500	3
2,501 to 3,300	4

Note: ¹ The day's samples cannot be taken at the same time. The sampling intervals are subject to Division review and approval. The residual disinfectant concentration in the water entering the distribution system cannot be less than 0.2

mg/L for more than four hours. If at any time the residual disinfectant concentration falls below 0.2 mg/L in a system using grab sampling in lieu of continuous monitoring, the system must take a grab sample every 4 hours until the residual disinfectant concentration is equal to or greater than 0.2 mg/L.

1. Maintenance of the disinfectant residual in the distribution system must conform to paragraph (2) of Rule [391-3-5-.14](#).
 2. Until March 31, 2016, the residual disinfectant concentration must be measured at least at the same points in the distribution system and at the same time as total coliforms are sampled, as specified in [40 CFR § 141.21](#)
 3. Beginning April 1, 2016, the residual disinfectant concentration must be measured at least at the same points in the distribution system and at the same time as total coliforms are sampled, as specified in Rule [391-3-5-.55\(4\) through \(8\)](#). The Division may allow a public water system which uses both a surface water source or a ground water source under the direct influence of surface water, and a ground water source, to take disinfectant residual samples at points other than the total coliform sampling points if the Division determines that such points are more representative of treated (disinfected) water quality within the distribution system. Heterotrophic bacteria, measured as heterotrophic plate count (HPC) as specified in [40 CFR § 141.74\(a\)\(1\)](#), may be measured in lieu of residual disinfectant concentration.
- (r) Filter backwash recycling requirement: [40 CFR § 141.76](#) is hereby incorporated by reference. All subpart H systems that employ conventional filtration or direct filtration treatment and that recycle spent filter backwash water, thickener supernatant, or liquids from dewatering processes must meet the requirements in paragraphs (b), (c) and (d) of [40 CFR § 141.76](#).
1. Treatment technique requirement. Any system that recycles spent filter backwash water, thickener supernatant, or liquids from dewatering processes must return these flows through the processes of a system's existing conventional or direct filtration system as defined in [40 CFR § 141.2](#) or at an alternate location approved by the Division by June 8, 2004. If capital improvements are required to modify the recycle location to meet this requirement, all capital improvements must be completed no later than June 8, 2006.
 2. Record keeping. The system must collect and retain on file recycle flow information specified in paragraphs (d)(1) through (6) or [40 CFR § 141.76](#) for review and evaluation by the Division beginning June 8, 2004.

Rule 391-3-5-.10. Distribution System.

- (1) **Design for Flow and Pressure.** The water distribution system must be designed and the water lines sufficiently sized to furnish at all times the instantaneous demand flow of water required and to maintain at all times a pressure of twenty (20) pounds per square inch at each service connection in the distribution system under all conditions of flow.
- (2) **Looped Lines.** Distribution lines must be looped whenever possible.
- (3) **Metering.** Beginning January 1, 1998, all new services connected to community and non-transient non-community water systems shall be metered, unless specifically directed otherwise by the Director. For existing water systems, metering of existing services shall be performed when required by the Director.
- (4) **Prevent Contamination.** It is the responsibility of the supplier of water to maintain the distribution system to prevent contamination of the drinking water and to provide the required pressure and flow at all times.
- (5) **Minimum Pipe Size.** The minimum size water main shall be two (2) inches in nominal diameter. The Division may allow for a departure in sizing provided it is justified by hydraulic analysis and future water use of the area to be served and such departures will be considered only in special circumstances.
- (6) **Lines in Contaminated Areas.** Water lines must not be installed in contaminated areas such as sanitary landfill or dump areas.
- (7) **Sewer Line Contact.** No water main or pipe shall pass through or come into contact with any part of a sewer or sewer manhole.
- (8) **Minimum Cover.** The minimum recommended cover for water distribution mains or lines shall be twenty-four (24) inches.

- (9) **Installation Requirements.** All newly installed distribution mains and appurtenances shall be flushed, pressure tested and disinfected.
- (10) **Lead Free.**
- (a) For purposes of this rule, the term "lead free" means:
 - 1. not containing more than 0.2 percent lead when used with respect to solder and flux; and
 - 2. not more than a weighted average of 0.25 percent lead when used with respect to the wetted surfaces of pipes, pipe fittings, plumbing fittings, and fixtures.
 - (b) The weighted average lead content of a pipe, pipe fitting, plumbing fitting, or fixture shall be calculated by using the following formula: For each wetted component, the percentage of lead in the component shall be multiplied by the ratio of the wetted surface area of that component to the total wetted surface area of the entire product to arrive at the weighted percentage of lead of the component. The weighted percentage of lead of each wetted component shall be added together, and the sum of these weighted percentages shall constitute the weighted average lead content of the product. The lead content of the material used to produce wetted components shall be used to determine compliance with paragraph (a). For lead content of materials that are provided as a range, the maximum content of the range shall be used.
 - (c) When used with respect to plumbing fittings and fixtures intended by the manufacturer to dispense water for human ingestion refers to fittings and fixtures that are in compliance with standards established in accordance with [42 U.S.C. 300g-6\(e\)](#).
 - (d) This term does not apply to leaded joints necessary for the repair of cast iron pipes.
- (11) **Notification of Lead-containing Service Lines.** Suppliers of water shall identify and report to the Division any lead pipe and/or lead service connections known to be installed in the distribution system. Suppliers shall adopt a local plumbing code that requires use of lead free solder for plumbing.
- (12) **Infrastructure Security.** Public water distribution network and its related components must be protected to prevent unauthorized tampering.

Rule 391-3-5-.11. Storage Tanks.

- (1) **Tank Requirements.** All storage tanks must be provided with a permanent cover, screened vents and openings, overflow piping and means of draining.
- (2) **Interior Paint.** The paint used for the interior of a storage tank must be approved by the Division.
- (3) **Approval for Repairs.** Repairs and renovations to existing storage tanks that may affect the quality of the drinking water must receive approval from the Division prior to starting such work. Upon completion of such work the storage tank must be disinfected according to Rule [391-3-5-.12](#).
- (4) **Contamination Prevention.** It is the owner's responsibility to maintain the storage tank or tanks to prevent contamination of the drinking water by infiltration or other means.
- (5) **Buried Tanks.** Buried or semi-buried storage tanks must have the ground surface sloping away from the facility.
- (6) **Pressure Tanks.** Hydropneumatic pressure tanks must be provided with devices for maintaining the air-water volume at the designed water level and working pressures.
- (7) **Pre-Service Requirements.** All new storage tanks must be cleaned, tested for leakage, and must be disinfected according to Rule [391-3-5-.12](#).

Rule 391-3-5-.12. Disinfection.

- (1) **Disinfection Requirements.** All newly constructed public water systems including extensions, additions, modifications, or repairs to existing public water systems including water mains, storage tanks, treatment plants, wells, or any other pipes or parts of the public water system which may affect the quality of the drinking water which is delivered, treated or stored, must be disinfected before being placed into service by the supplier or water by one of the following methods:

- (a) Water mains. Any new or repaired water main must be disinfected in accordance with the latest edition of American Water Works Association (AWWA) Standard C651.
- (b) Storage facilities. Any new or repaired water storage facility must be disinfected in accordance with the latest edition of American Water Works Association (AWWA) Standard C652.
- (c) Water treatment plants. Any new or repaired portion of a water treatment plant must be disinfected in accordance with the latest edition of American Water Works Association (AWWA) Standard C653.
- (d) Wells. Any new well or existing well that has been rehabilitated or reworked must be disinfected in accordance with the latest edition of American Water Works Association (AWWA) Standard C654.
- (e) Any system required to develop a disinfection profile in accordance with the provisions specified in sections (8)(c)(i) and (ii) of Rule [391-3-5-.20](#) and that decides to make a significant change to its disinfection practice must consult with the Division prior to making such change. Significant changes to disinfection practice are: changes to the point of disinfection; changes to the disinfectant(s) used in the treatment plant; changes to the disinfection process; and, any other modification identified by the Division. Any system that is modifying its disinfection practice must calculate its disinfection benchmark as specified in section (8)(c)(iii) of Rule [391-3-5-.20](#).

Rule 391-3-5-.13. Cross Connections.

- (1) **Prohibitions.** No person shall construct, maintain or operate a physical arrangement whereby a public water system is or may be connected directly or indirectly with a non-potable water system or non-permitted water system, sewer, drain, conduit, pool, storage reservoir, plumbing fixture, or other device which contains or may contain contaminated water, liquid, gasses, sewage or other waste of unknown or unsafe quality, which may be capable of imparting contamination to the public water system as the results of backflow,

bypass arrangements, jumper connections, removable sections, swivel or changeover devices, or other temporary, permanent or potential connections through which or because of which back-flow or back-siphonage could or would occur.

- (2) **Contamination Prevention.** A supplier of water or any person having possession or control of facilities which may cause the contamination of a public water system has the responsibility to prevent water from unapproved sources or any contaminants from entering the public water system by such physical arrangements cited in paragraph (1) of this Section.
- (3) **Purchasers and Resellers.** Any person connecting to and purchasing water from a public water system and reselling it to others is considered a supplier of the water so purchased as well as a consumer, and is also responsible for the quality of such water.
- (4) **Cross-Connection Control Program.** A supplier shall, when requested by the Division, develop a control program for the elimination and prevention of all cross-connections. A written plan for the program shall be submitted to the Division for review and approval within two (2) years or less in accordance with a written request by the Division. When the plan is approved, the owner shall implement the program immediately.
- (5) **Conformance with National Standards.** The procedures for back-flow and back-siphonage prevention and cross-connection control shall conform to those recommended by the American Water Works Association, Manual 14, and the U.S. Environmental Protection Agency Cross-Connection Manual.
- (6) **Backflow Prevention Assemblies Field Testing.** The supplier shall require that all backflow prevention assemblies installed pursuant to this section be field tested following installation, repair, or relocation and at least annually thereafter.
- (7) **Certified Backflow Testing.** After October 1, 2004, all required field testing shall be performed by persons who are certified in the testing of backflow prevention assemblies by the Georgia Statewide Backflow Prevention Assembly Certification Program, as approved by the Division, the American Backflow Prevention Association (ABPA), the American Society of Sanitary Engineers (ASSE) or the University of Florida TREEO Center.
- (8) **Gauge Accuracy.** Gauges used in the testing of backflow prevention assemblies shall be tested for accuracy annually in accordance with the University of Southern California Manual of Cross-Connection Control or American Water Works Association Manual 14. Public water systems shall require testers to include test gauge serial numbers on "Test and Maintenance" report forms and ensure testers have gauges tested for accuracy.
- (9) **Record Maintenance.** Each water supplier shall maintain records of the following for a minimum of three (3) years:
 - (a) Most current hazard assessment, conducted pursuant to Section 608 of the Georgia State Minimum Standard Plumbing Code (International Plumbing Code);

- (b) Locations and types of backflow protection and associated hazards;
- (c) Results of all backflow prevention assembly field testing and air gap inspections;
and
- (d) Repairs made to, or replacement or relocation of, backflow protection.
- (e) Summaries of the information in sections (9)(a) - (d) shall be available to the Division on request for a minimum of three years.
- (f) The supplier shall ensure that backflow prevention assemblies that fail the field test are repaired or replaced within thirty (30) days.
- (g) The supplier shall ensure that bypass piping installed around any approved backflow preventer is equipped with a backflow preventer providing an equivalent level of protection.
- (h) Reduced pressure principal backflow prevention assemblies shall not be installed in any location subject to possible flooding. This includes pits and/or vaults which are not provided with a gravity drain to the ground's surface that is capable of exceeding the discharge rate of the relief valve.
- (i) Each supplier shall notify the Division of any known incident of backflow into the public water system as soon as possible but no later than the end of the next business day upon discovery of the incident. If requested to do so by the Division, the supplier shall submit a written report of the incident describing the nature and severity of the backflow, the actions taken by the water supplier in response to the incident, and the action plan intended to prevent such incidents in the future.
- (j) The supplier of water shall deny or discontinue water service to a commercial consumer if a required backflow prevention device is not installed or properly maintained. Water service shall not be restored to such premises until the deficiencies have been corrected or eliminated to the satisfaction of the supplier and the Division. Residential connections shall be maintained in accordance with the Georgia State Minimum Standard Plumbing Code (International Plumbing Code).

Rule 391-3-5-.14. Operation.

- (1) **Compliance with Safe Drinking Water Rules.** A supplier of water shall treat the water supplied so the water complies with the Safe Drinking Water rules of this Chapter. Public water systems shall not use bottled water to achieve compliance with a maximum contaminant level (MCL). Bottled water may be used on a temporary basis to avoid unreasonable risk to health. Community and non-transient non-community water systems shall not use point-of-use or point-of-entry treatment units to achieve compliance with an MCL or a treatment technique requirement.
- (2) **Continuous Chlorination.** The supplier of water must continuously chlorinate the water to maintain a detectable residual of free chlorine in all parts of the distribution system in the recommended amount of at least 0.2 parts per million, and such additional amounts as may be determined necessary by the Division, unless other means of disinfection have been approved by the Director. If the residual disinfectant concentration is measured by approved analytical methods and not detected, the supplier may, upon approval by the Division, determine and report detectability by the use of heterotrophic plate count measurements as required by [40 CFR § 141.72](#) (1989) and other applicable paragraphs of 40 CFR Part 141.
- (3) **Disinfection Waiver.** After consideration of the microbiological quality of the source of water supply, the local geology, the population served and the extent of the water distribution system, the disinfection treatment may be waived by the Director.
- (4) **Fluoridation Requirements.** The supplier of water of a fluoridated public water system shall daily sample and analyze the fluoride concentration of the drinking water. Daily records of the analytical results shall be kept on forms provided by the Division or on forms acceptable to the Division and a copy of the result submitted to the Division in accordance with Rule [391-3-5-.30](#).
- (5) **Surface Water Source Certified Operator.** A supplier having a surface water source must have a certified operator on duty and onsite at all times when the water plant is in operation. A supplier having a groundwater source under the direct influence of surface water must have a certified operator on duty and onsite at all times when the water plant is in operation, unless otherwise approved by the Division, depending upon the complexity of the water treatment processes, quality of the water sources, and the size of the system.
- (6) **Groundwater Source Certified Operator.** A supplier having only ground water sources must have a certified operator to comply with the classification prescribed in Section [391-3-5-.39](#) of this Chapter. The Director may find that the availability of a certified operator to a system with only groundwater sources is sufficient to comply with Section [391-3-5-.39](#) of this Chapter and may so allow, but only if the Director determines that the

complexity of the water treatment processes, quality of the water sources, and the size of the system so warrant.

- (7) **Record Maintenance.** The supplier of water shall maintain daily records of the operation of the water treatment facility and water distribution system as may be required by the Division including the amount of water treated daily, results of the performance of daily tests pertinent to the control of the water treatment processes, disinfectant residuals, and tests performed in the water distribution system. Daily records shall be kept by the supplier on forms furnished by the Division and a copy of the record submitted to the Division in accordance with Rule [391-3-5-.30](#). Based on the complexity of the water treatment process, the quality of the water sources, and the size of the system, the Director may establish less frequent maintenance of record requirements for small groundwater systems.
- (8) **Microbiological Laboratory.** All community water systems which have a surface water source with water treatment facilities and those public water systems having only a ground water source or only a water distribution system and serving a population of more than 12,900 must have, or have available, the services of a microbiological laboratory certified by the Division to perform the microbiological tests necessary for compliance with the maximum microbiological contaminant levels. The laboratory and equipment must be kept in good working order at all times.
- (9) **Summary Microbiological Analytical Results.** A supplier of water required to have, or have available, a microbiological laboratory under paragraph (8) of Section 391-3-5-.14 shall collect and analyze drinking water samples in accordance with the minimum number specified in paragraph (1) of Section [391-3-5-.23](#) and such additional samples as may be required by the Director. The supplier shall furnish the Division, on forms provided by the Division, a monthly microbiological summary of the number of samples analyzed and the results in accordance with Section [391-3-5-.30](#).
- (10) **Routine Microbiological Samples.** The supplier of water shall collect routine drinking water samples for microbiological analysis as follows:
 - (a) the minimum number of routine samples per month shall be in accordance with paragraph (1) of Section [391-3-5-.23](#);
 - (b) at the treatment plant and at various points in the distribution system which are representative of the drinking water when three or more samples per month are required; or
 - (c) at various points in the distribution system which are representative of the drinking water when only one or two samples per month are required.
- (11) **Certified Laboratories.** For the purposes of determining compliance with Rules [391-3-5-.18](#), .19, .20, .21, .22, .23, .24, .25, .26, .27 samples may be considered only if they have been analyzed by a laboratory certified by the Division, except that measurements used solely for operational control, including but not limited to turbidity, free chlorine

residual, fluoride residual, temperature, pH, conductivity, calcium, alkalinity, orthophosphate, chloramines, chlorine dioxide, chlorite and silica may be performed by any person acceptable to the Division.

- (12) **Operations and Maintenance Plan.** All public surface water and ground water under the direct influence of surface water systems shall develop an Operations and Maintenance Plan (O & M Plan). The plan shall be prepared in accordance with the Division's "*Operation and Maintenance Plan - Guidance Manual for Preparing Public Water Supply System O & M Plans*", latest edition. The plan shall be updated at intervals determined by the Director. For public groundwater systems and systems that are using alternate treatment technologies, development of such a plan may be required by the Director when the complexity of the water treatment processes, quality of the water sources, and the size of the system so warrant.

Rule 391-3-5-.15. Record Maintenance.

- (1) **Requirements for Records and Retention.** Any supplier of water shall retain on its premises or at a convenient location near its premises, the following records:
- (a) Records of microbiological analyses and turbidity analyses made pursuant to these rules shall be kept for not less than five (5) years. Records of chemical analyses made pursuant to these rules shall be kept for not less than ten (10) years. Actual laboratory reports may be kept, or data may be transferred to tabular summaries, provided that the following information is included:
1. the date, place and time of sampling and the name of the person who collected the sample;

2. identification of the sample as to whether it was routine distribution system sample, check sample, raw or drinking water sample or other special purpose sample;
 3. date of analysis;
 4. laboratory and person responsible for performing analysis;
 5. the analytical technique/method used; and
 6. the results of the analysis.
- (b) Records of public notices, certifications of public notices and any actions taken by the system to correct violations of these rules shall be kept for a period not less than three (3) years after either the public notice was issued, certification was submitted or the last corrective action was taken with respect to the particular violation involved.
- (c) Copies of any written reports, summaries or communications relating to sanitary surveys of the system conducted by the system itself, by a private consultant, or by any local, state or federal agency, shall be kept for a period not less than ten (10) years after completion of the sanitary survey involved.
- (d) Records concerning a variance or exemption granted to the system shall be kept for a period ending not less than five (5) years following the expiration of such variance or exemption.
- (e) Any system subject to the lead and copper requirements shall retain on its premises original records of all sampling data, analyses, reports, surveys, letters, evaluations, schedules, Division determinations, and any other information required by Rules [391-3-5-.25](#) or .30. Each water system shall retain the records required by this rule for no fewer than twelve (12) years.
- (f) Systems must maintain the results of individual filter monitoring taken under Rule [391-3-5-.20\(7\)\(c\) and \(8\)\(h\)](#) for at least three (3) years.
- (g) Any system subject to disinfection profiling and benchmarking shall keep the results of the profile and the benchmark (including raw data and analysis) indefinitely.
- (h) Copies of monitoring plans developed pursuant to this part shall be kept for the same period of time as the records of analyses taken under the plan are required to be kept under paragraph (1)(a), except as specified elsewhere in this part.

Rule 391-3-5-.17. Permit to Operate a Public Water System.

- (1) **Permit Required from the Director.** Any person who owns or operates a public water system or who desires to commence operation of a public water system shall obtain a permit from the Director.
- (2) **Permit Application.** Applicants for permits under the Act shall be on forms as may be prescribed and furnished by the Division. The permit application form shall be signed by the owner or their duly authorized agent.
- (3) **Additional Information.** Any applicant for a permit whose application is pending final consideration shall upon the request of the Director provide such additional information as may be necessary to enable the Director to properly pass upon the application. Such additional information may include, but not be limited to, complete engineering report, quantitative and qualitative determinations of the source of water supply and drinking water, plans, specifications, maps, measurements, records, documentation to demonstrate system's financial, technical and managerial capacity with respect to drinking water regulations in effect or likely to be in effect, source water assessments and protection plan, water conservation plan, cross-connection plan, operations and maintenance plan, infrastructure protection plan, and all related material.

- (4) **Complete Applications.** Applications for permits will be reviewed together with the submitted information and when the Director is satisfied that the application is complete a determination to issue or deny the permit will be made.
- (5) **Public Participation.** Whenever in the judgment of the Director public participation may be required prior to the final determination to issue or deny a permit the Director may give public notice of the proposed action. Public notice will be prepared and circulated in a manner designed to inform interested and potentially interested persons of the permit application. Procedures for circulation of the public notice shall include the following:
- (a) A copy of the public notice will be provided to the permit applicant, will be available at the Division office in Atlanta, and will be posted to the Division's website.
 - (b) Electronic mailing (e-mail) notification of the public notice to any persons or groups included on the electronic mailing list to receive such notices. The EPD shall maintain an electronic mailing list for distribution of public notices. Any person or group may request that their e-mail address be added to the electronic mailing list or they may sign-up through the EPD website.
 - (c) The Director shall provide a period of not less than thirty (30) days following the public notice in which interested persons may submit their written views with respect to the permit application. All written comments submitted during the thirty (30) day comment period will be retained by the Division and considered in the final determination of the permit application.
 - (d) The contents of the public notice will be in accordance with applicable Federal regulations and State laws.
- (6) **Public Hearing.** The Director shall hold a public hearing if he determines that there is sufficient public interest or need for a public hearing prior to the final determination to issue or deny a permit.
- (a) Any public hearing held pursuant to this paragraph shall be held in the geographical area of the proposed or existing public water system or other appropriate location at the discretion of the Director.
 - (b) The Director may hold one public hearing on related groups of permit applications.
 - (c) Public notice of any public hearing held pursuant to this paragraph shall be provided at least thirty (30) days in advance of the hearing date and shall be circulated in accordance with paragraph (5) of this rule.
- (7) **Permit Conditions.** A permit issued by the Director shall stipulate such terms, and conditions and schedules of compliance as the Director deems necessary to meet the requirements of these rules and which are consistent and in conformity with the Act and

the Federal Act. Any permit issued pursuant to the Act may be subject to such monitoring, recording and reporting requirements as may be reasonably required by the Director including the installation, use and maintenance of monitoring equipment or methods; specific requirements for recording of monitoring activities and results; and periodic reporting of monitoring results. The monitoring, recording and reporting requirements shall be specified in a permit issued, provided, however, the Director may modify or require additional monitoring, recording and reporting by written notification to the permittee.

- (8) **Permit Transfers.** A permit issued by the Director may be transferred due to a change in ownership of the public water system. The permittee shall notify the succeeding owner by letter of the existing permit and shall surrender the permit to the Director along with a copy of the letter to the succeeding owner. It shall be the succeeding owner's responsibility to request a transfer of the permit. A completed permit application shall be submitted to the Director on the forms prescribed and furnished by the Division within 30 days of transfer. The succeeding owner shall upon the request of the Director provide such additional information as may be necessary (including but not limited to proof of ownership and business plan) to enable the Director to transfer the permit.
- (9) **Permit Application Denials.** Based on the information submitted or available to the Director, a permit application may be denied by the Director for any one of the following reasons where the proposed activity or system would:
 - (a) present an immediate or potential health hazard to the public, or
 - (b) not adequately supply water under sufficient pressure and flow at all times, or
 - (c) not meet the requirements of these rules or the Act.
- (10) **Notice In Case of Application Denial.** In the event an applicant's permit is denied, the Director shall serve written notice of such action to the applicant setting forth in such notice the reason for the action.
- (11) **Permit Expiration Term.** Each permit issued under this Rule shall have a fixed term not to exceed ten (10) years. The permittee shall apply for a renewal at least 90 days prior to the expiration of the permit. A new permit may be issued by the Director if, after a review, the Director determines that the continued operation of such public water system meets or will meet all applicable drinking water standards, maximum contaminant levels and all requirements of the Act and these rules. Any permit issued under this paragraph may include any of the terms, conditions and schedules of compliance under paragraph (7) of this Rule.
- (12) **Revocation, Suspension, or Modification.** The Director may revoke, suspend, or modify a permit issued under this Rule for cause, including, but not limited to, the following:
 - (a) violation of any condition of said permit;

- (b) obtaining a permit by misrepresentation, or failure to disclose fully all relevant facts;
 - (c) change in any condition that requires either:
 - 1. a temporary or permanent decrease in the maximum contaminant levels; or
 - 2. elimination of the permitted operation.
- (13) **Notice In Case of Permit Revocation, Suspension, or Modification.** In the event of modification, suspension, or revocation of a permit, the Director shall serve written notice of such action on the permit holder and shall set forth in such notice the reason for the action.
- (14) **Access by Division.** The Director or any agents or employees of the Division shall be permitted access in or upon any private or public property at all reasonable times for the purpose of investigating conditions, processes, methods of treatment, records relating to the operation of any public water system, compliance with any operating permit issued, to make sanitary surveys, to determine compliance with the Act and any rules promulgated thereunder, or to make such investigations and studies as the Director deems advisable and necessary for the protection of the public health.
- (15) **Previous Permits.** In the event of reissue, modification, suspension, revocation or transfer of a permit all previously issued permits for the system shall be surrendered to the Division upon written notice by the Director.
- (16) **Compliance with Wellhead Protection.** All community public water systems utilizing ground water sources and serving a municipality, county, or an authority are required to comply with the Wellhead Protection rule, Rule [391-3-5-40](#).
- (17) **Conformance with Minimum Standards.** Design and construction of all public water systems shall conform to the latest edition of the Division's "Minimum Standards for Public Water Systems".

Rule 391-3-5-.18. Primary Maximum Contaminant Levels for Drinking Water.

(1) **Primary MCLs for Inorganics. INORGANICS** - The maximum contaminant levels (MCLs) for antimony, arsenic, asbestos, barium, beryllium, cadmium, chromium, mercury, nickel, selenium and thallium of this Rule apply to community water systems and non-transient, non-community water systems. The MCLs for fluoride in this Rule apply to community water systems. The MCLs for nitrate, nitrite, and total nitrate-nitrite of this Rule apply to all (CWS, NTNCWS, TNCWS) public water systems.

(a) The following are the maximum contaminant levels for inorganic chemicals:

Contaminant	Maximum Contaminant Level (mg/L)	Applicable Systems
Antimony	0.006	CWS, NTNCWS
Arsenic	0.010	CWS, NTNCWS
Asbestos	7 Million Fibers/Liter Longer than 10 μ m	CWS, NTNCWS
Barium	2	CWS, NTNCWS
Beryllium	0.004	CWS, NTNCWS
Cadmium	0.005	CWS, NTNCWS
Chromium	0.1	CWS, NTNCWS
Cyanide	0.2	CWS, NTNCWS
Fluoride ^{1,2}	4.0	CWS
Lead	see 391-3-5-.25 Treatment Technique	CWS, NTNCWS
Mercury	0.002	CWS, NTNCWS
Nickel	0.1	CWS, NTNCWS
Nitrate	10 (as N)	CWS, NTNCWS, TNCWS
Nitrite	1 (as N)	CWS, NTNCWS, TNCWS
Total Nitrate + Nitrite	10 (as N)	CWS, NTNCWS, TNCWS
Selenium	0.05	CWS, NTNCWS
Thallium	0.002	CWS, NTNCWS

NOTES:

1. Effective date for fluoride was October 2, 1987.
 2. Fluoride also has a secondary MCL (Rule [391-3-5-.19\(2\)](#)).
- (b) At the discretion of the Director, nitrate levels not to exceed 20 mg/L may be allowed in a non-community water system if the supplier of water demonstrates to the satisfaction of the Director that:
1. such water will not be available to children under 6 months of age;
 2. the water system is meeting the public notification requirements under Rule [391-3-5-.32](#), including continuous posting of the fact that nitrate levels exceed 10 mg/L and the potential health effects of exposure;
 3. local and State public health authorities will be notified annually of nitrate levels that exceed 10 mg/L; and
 4. no adverse health effects shall result.
- (2) **Primary MCLs for Organics.** ORGANIC CHEMICALS - The following maximum contaminant levels for organic contaminants apply to community water systems and non-transient, non-community water systems. Compliance with maximum contaminant levels for the following organics is to be calculated pursuant to Rule [391-3-5-.22](#).

(a) Synthetic Organic Chemicals, Pesticides and Polychlorinated biphenyls

Contaminant	Maximum Contaminant Level (mg/L)
Alachlor	0.002
Aldicarb	Deferred
Aldicarb sulfone	Deferred
Aldicarb sulfoxide	Deferred
Atrazine	0.003
Benzo(a)Pyrene	0.0002
Carbofuran	0.04
Chlordane	0.002
Dalapon	0.2
Di(2-ethylhexyl) adipate	0.4
Di(2-ethylhexyl) phthalate	0.006

Dibromochloropropane (DBCP)	0.0002
Dinoseb	0.007
Diquat	0.02
2,4-D	0.07
Endothall	0.1
Endrin	0.002
Ethylene dibromide (EDB)	0.00005
Glyphosate	0.7
Heptachlor	0.0004
Heptachlor Epoxide	0.0002
Hexachlorobenzene	0.001
Hexachlorocyclopentadiene	0.05
Lindane	0.0002
Methoxychlor	0.04
Oxamyl (Vydate)	0.2
Pentachlorophenol	0.001
Picloram	0.5
Polychlorinated biphenyls (PCBs)	0.0005
Simazine	0.004
Toxaphene	0.003
2,4,5-TP (Silvex)	0.05
2,3,7,8-TCDD (Dioxin)	3×10^{-8}

(b) Volatile Organic Contaminants (VOCs)

Contaminant	Maximum Contaminant Level (mg/L)
Vinyl chloride	0.002
Benzene	0.005
Carbon tetrachloride	0.005
1,2-Dichloroethane	0.005
Trichloroethylene	0.005
para-Dichlorobenzene	0.075
1,1-Dichloroethylene	0.007
1,1,1-Trichloroethane	0.2
cis-1,2-Dichloroethylene	0.07

1,2-Dichloropropane	0.005
Ethylbenzene	0.7
Monochlorobenzene	0.1
o-Dichlorobenzene	0.6
Styrene	0.1
Tetrachloroethylene	0.005
Toluene	1
trans-1,2-Dichloroethylene	0.1
Xylenes (total)	10
Dichloromethane	0.005
1,2,4-Trichlorobenzene	0.07
1,1,2-Trichloroethane	0.005

(3) **Primary MCLs for Turbidity.** Turbidity - Treatment Technique Requirements:

- (a) The maximum contaminant level for turbidity is determined by a treatment technique requirement as set forth in this Rule.
- (b) The treatment technique requirement for turbidity is applicable to both community water systems and non-community water systems using surface water sources or ground water sources under the direct influence of surface water in whole or in part. The treatment technique requirement for turbidity in drinking water, measured at a representative point(s) in the filtered water is:
 1. Less than or equal to 0.3 turbidity unit in at least 95 percent of the monthly measurements. One turbidity unit is the maximum allowable level and must not be exceeded at any time.
 2. Five turbidity units is the maximum allowable level and must not be exceeded at any time.
 3. In accordance with [40 CFR § 141.73](#), the Division may allow higher turbidity levels for slow sand filtration, diatomaceous earth filtration, or other filtration technologies.
 4. Beginning January 1, 2002, public water systems that use surface water or ground water under the direct influence of surface water and serve at least 10,000 people must meet the filtration requirements specified in [40 CFR § 141.173](#) (see Rule [391-3-5-.20\(5\)](#)).

5. The Enhanced Filtration and Disinfection requirements specified in 40 CFR Part 141, Subpart P are applicable to Subpart H systems serving at least 10,000 people (see Rule [391-3-5-.20\(8\)](#)).
6. Beginning January 14, 2005, public water systems that use surface water or ground water under the direct influence of surface water as a source and serve fewer than 10,000 people must meet the filtration and disinfection requirements in 40 CFR Part 141, Subpart T. This requirement is in addition to complying with requirements in Subpart H of 40 CFR Part 141 [see Rule [391-3-5-.20\(8\)](#)].

(4) **Primary MCLs for Microbiologicals.** Microbiological - Maximum contaminant levels (MCLs) for microbiological contaminants.

- (a) Until March 31, 2016, the total coliform MCL is based on the presence or absence of total coliforms in a sample, rather than coliform density.
 1. For a system that collects at least 40 samples per month, if no more than 5.0 percent of the samples collected during a month are total coliform-positive, the system is in compliance with the MCL for total coliforms.
 2. For a system that collects fewer than 40 samples per month, if no more than one sample collected during a month is total coliform-positive, the system is in compliance with the MCL for total coliforms.
- (b) Until March 31, 2016, any fecal coliform-positive repeat sample or *E. coli*-positive repeat sample, or any total coliform-positive repeat sample following a fecal coliform-positive or *E. coli*-positive routine sample, constitutes a violation of the MCL for total coliforms. For purposes of the public notification requirements in Rule [391-3-5-.32](#), this is a violation that may pose an acute risk to health.
- (c) Beginning April 1, 2016, a system is in compliance with the MCL for *E. coli* for samples taken under the provisions of Rule [391-3-5-.55](#) unless any of the conditions identified in paragraphs (4)(c)1. through (4)(c)4. occur. For purposes of the public notification requirements in Rule [391-3-5-.32](#), violation of the MCL may pose an acute risk to health.
 1. The system has an *E. coli*-positive repeat sample following a total coliform-positive routine sample.
 2. The system has a total coliform-positive repeat sample following an *E. coli*-positive routine sample.
 3. The system fails to take all required repeat samples following an *E. coli*-positive routine sample.

4. The system fails to test for *E. coli* when any repeat sample tests positive for total coliform.
- (d) Until March 31, 2016, a public water system must determine compliance with the MCL for total coliforms in paragraphs (4)(a) and (4)(b) for each month in which it is required to monitor for total coliforms. Beginning April 1, 2016, a public water system must determine compliance with the MCL for *E. coli* in paragraph (4)(c) for each month in which it is required to monitor for total coliforms.
 - (e) The EPA Administrator, pursuant to section 1412 of the federal Safe Drinking Water Act, identifies the following as the best technology, treatment techniques, or other means available for achieving compliance with the maximum contaminant level for total coliforms in paragraphs (4)(a) and (4)(b) and for achieving compliance with the maximum contaminant level for *E. coli* in paragraph (4)(c):
 1. Protection of wells from fecal contamination by appropriate placement and construction;
 2. Maintenance of a disinfectant residual throughout the distribution system;
 3. Proper maintenance of the distribution system including appropriate pipe replacement and repair procedures, main flushing programs, proper operation and maintenance of storage tanks and reservoirs, cross connection control, and continual maintenance of positive water pressure in all parts of the distribution system;
 4. Filtration and/or disinfection of surface water, as described in 40 CFR Part 141 Subparts H, P, T, and W, or disinfection of ground water, as described in 40 CFR Part 141 Subpart S, using strong oxidants such as chlorine, chlorine dioxide, or ozone; and
 5. For systems using ground water, compliance with the requirements of an EPA-approved Division Wellhead Protection Program developed and implemented under section 1428 of the federal Safe Drinking Water Act.
 - (f) The EPA Administrator, pursuant to section 1412 of the federal Safe Drinking Water Act, identifies the technology, treatment techniques, or other means available identified in paragraph (4)(e) as affordable technology, treatment techniques, or other means available to systems serving 10,000 or fewer people for achieving compliance with the maximum contaminant level for total coliforms in paragraphs (4)(a) and (4)(b) and for achieving compliance with the maximum contaminant level for *E. coli* in paragraph (4)(c).
- (5) **Primary MCLs for Radioactivity and Radionuclides.** Radioactivity - Maximum contaminant levels for Radium-226, Radium-228, gross alpha particle radioactivity, beta

particle and photon radioactivity from man-made radionuclides in community water systems.

- (a) The following are the maximum contaminant levels for Radium-226, Radium-228, gross alpha radioactivity, and Uranium:

Radionuclides / Radioactivity	Maximum Contaminant Level
Combined Radium-226 and Radium-228 (²²⁶ Ra, ²²⁸ Ra)	5 pCi/L
Gross alpha particle activity (including Radium-226 but excluding Radon and Uranium)	15 pCi/L
Uranium	30 µg/L

- (b) The average annual concentration of beta particle and photon radioactivity from manmade radionuclides in drinking water shall not produce an annual dose equivalent to the total body or any internal organ greater than 4 millirem per year.
- (c) Except for the radionuclides listed in Table A, the concentration of man-made radionuclides causing 4 mrem total body or organ dose equivalents shall be calculated on the basis of a 2 liter per day drinking water intake using the 168 hour data listed in "*Maximum Permissible Body Burdens and Maximum Permissible Concentrations of Radionuclides in Air or Water for Occupational Exposure*", NBS Handbook 69 as amended August, 1963, U.S. Department of Commerce. If two or more radionuclides are present, the sum of their annual dose equivalent to the total body or to any organ shall not exceed 4 millirem per year.

TABLE A. - Average annual concentrations assumed for the purpose of this rule to produce a total body or organ dose of 4 millirem per year.

Radionuclide	Critical Organ	Average Annal Concentration
Tritium (³ H)	Total Body	20,000 pCi/L
Strontium-90 (⁹⁰ Sr)	Bone Marrow	8 pCi/L

- (6) **Primary MCLs for Trihalomethanes.** TRIHALOMETHANES - Maximum contaminant level for trihalomethanes: see paragraph (7), DISINFECTANTS and DISINFECTION BYPRODUCTS, below.
- (7) **Primary MCLs for Disinfectants and Disinfection Byproducts.** DISINFECTANTS and DISINFECTION BYPRODUCTS (D/DBPs). Beginning January 1, 2002, this paragraph shall be applicable as specified below:

- (a) The maximum contaminant levels (MCLs) for disinfection byproducts (DBPs) are as specified in [40 CFR § 141.64](#) and the maximum residual disinfectant levels (MRDLs) are as specified in [40 CFR § 141.65](#).

Disinfection Byproduct	Maximum Contaminant Level (mg/L)
Total trihalomethanes	0.080
Haloacetic acids (five)	0.060
Bromate	0.010
Chlorite	1.0

Disinfectant Residuals	Maximum Residual Disinfectant Level (mg/L)
Chlorine	4.0 (as Cl ₂)
Chloramines	4.0 (as Cl ₂)
Chlorine Dioxide	0.8 (as ClO ₂)

- (b) Beginning January 1, 2002, community and non-transient, non-community Subpart H water systems which serve a population of 10,000 people or more must comply with paragraph (7). All systems must comply with these MCLs until the date specified for Subpart V compliance in [40 CFR § 141.620\(c\)](#).
- (c) Beginning January 1, 2004, community and non-transient, non-community Subpart H water systems serving fewer than 10,000 people and systems using only ground water not under the direct influence of surface water must comply with paragraph (7). All systems must comply with these MCLs until the date specified for Subpart V compliance in [40 CFR § 141.620\(c\)](#).
- (d) The Subpart V MCLs for TTHM and HAA5 must be complied with as a locational running annual average at each monitoring location beginning the date specified for Subpart V compliance in [40 CFR § 141.620\(c\)](#).
- (e) A system that is installing granular activated carbon (GAC) or membrane technology to comply with paragraph (7) may apply to the Division for an extension of up to 24 months past the dates in paragraphs (7)(b) and (7)(c), but not beyond December 31, 2003.
- (f) Transient non-community Subpart H water systems serving 10,000 or more persons and using chlorine dioxide as a disinfectant or oxidant must comply with the chlorine dioxide MRDL beginning January 1, 2002.
- (g) Transient non-community Subpart H water systems serving fewer than 10,000 persons and using chlorine dioxide as a disinfectant or oxidant and systems using only ground water not under the direct influence of surface water and using chlorine dioxide as a disinfectant or oxidant must comply with the chlorine dioxide MRDL beginning January 1, 2004.

(h) The best technology, treatment technique, or other means available for achieving compliance with the maximum contaminant levels for disinfection byproducts identified in paragraph (7)(a) shall be in accordance with [40 CFR §§ 141.64\(a\)\(2\) and \(b\)\(2\)](#).

(8) **Maximum Contamination Level Goals (MCLG).** The maximum contaminant level goals for organic contaminants, inorganic contaminants, and microbiological contaminants shall be in accordance with [40 CFR §§ 141.50, 141.51, 141.52, 141.53, and 141.54](#).

Rule 391-3-5-.19. Secondary Maximum Contaminant Levels for Drinking Water.

(1) **Adverse Effects on Drinking Water.** The drinking water should not contain any contaminant which will adversely affect the odor or appearance of the drinking water and consequently may cause a substantial number of the persons served by the public water system to discontinue its use or which may adversely affect the public welfare.

(2) **Secondary MCLs.** The Secondary maximum contaminant levels established below represent reasonable goals for drinking water quality:

Contaminant	Secondary Level
Aluminum (Al)	0.05 to 0.2 mg/L
Chloride	250 mg/L

Color	15 color units
Copper (Cu)	1.0 mg/L
Corrosivity	Non-corrosive
Fluoride (F)	2.0 mg/L
Foaming Agents	0.5 mg/L
Iron (Fe)	0.3 mg/L
Manganese (Mn)	0.05 mg/L
Odor	3 threshold odor number
pH	6.5 to 8.5
Silver (Ag)	0.1 mg/L
Sulfate	250 mg/L
Total dissolved solids (TDS)	500 mg/L
Zinc (Zn)	5.0 mg/L

- (3) **Standard Methods.** Any analyses required under this rule shall be conducted in accordance with the analytical recommendations set forth in the latest edition of "Standard Methods of Examination of Water and Wastewater" as published by the American Public Health Association, or as such analyses may be modified by the Director.
- (4) **Collect and Submit Samples for Analyses.** Upon written direction of the Director, the supplier shall collect drinking water samples and submit them to the Division's water laboratory or other laboratory for analyses in accordance with the schedule furnished to the supplier.

Rule 391-3-5-.20. Turbidity Sampling and Analytical Requirements.

- (1) **Turbidity Testing Frequency.** On and after June 29, 1993, representative samples of filtered water shall be taken and analyzed by said suppliers at least every four hours when the plant is in operation, for the purpose of making turbidity measurements to determine compliance with the treatment technique requirement of Rule [391-3-5-.18\(3\)](#). If the Division determines that a reduced sampling frequency in a non-community system will not pose a risk to public health, it can reduce the required sampling frequency in accordance with [40 CFR 141.74](#) for systems using slow sand filtration or filtration treatment other than conventional treatment, direct filtration, or diatomaceous earth filtration. The option of reducing the turbidity frequency shall be permitted only in those public water systems that practice disinfection and which maintain an active residual disinfectant in the distribution system and in those cases where the Division has indicated in writing that no unreasonable risk to health existed under the circumstances of this option. The turbidity measurements shall be made in accordance with the recommendations set forth in [40 CFR Part 141.22](#).
- (2) **Exceedance Determination.** If a turbidity treatment violation has occurred based on a single exceedance of the maximum allowable turbidity limit, the supplier of water shall consult with the Division as soon as practical but no later than 24 hours after learning of the violation ([40 CFR 141.203\(b\)](#)). If the consultation does not occur within those 24 hours, the violation is elevated to Tier 1 under 40 CFR Subpart Q. If the monthly treatment technique requirement is exceeded, or if any measured turbidity level exceeds the maximum allowable level, the supplier of water shall report to the Division and notify the public as directed in Rules [391-3-5-.30](#) and .32.
- (3) **Applicability to Surface Water Sources.** The requirements of this Rule shall apply only to public water systems, which use water obtained in whole or in part from surface water sources or ground water sources under the direct influence of surface water.
- (4) **Compliance and Enforcement.** The Division has the authority to determine compliance or initiate enforcement action based upon analytical results or other information compiled by their sanctioned representatives or agencies.
- (5) **Filtration Requirements for Greater than 10,000 Population Water Systems.** Beginning January 1, 2002, public water systems that use surface water or ground water under the direct influence of surface water and serve at least 10,000 people must meet the filtration requirements specified in [40 CFR § 141.173](#).
- (6) **Enhanced Filtration Requirements.** The Enhanced Filtration and Disinfection requirements specified in 40 CFR, Subpart P are applicable to Subpart H systems serving at least 10,000 people.
 - (a) General requirements: [40 CFR, Subpart P § 141.170](#) is hereby incorporated by reference. Subpart H systems that did not conduct optional monitoring under § 141.172 because they served fewer than 10,000 persons when such monitoring was required, but serve more than 10,000 persons prior to January 14, 2005 must comply with §§ 141.170, 141.171, 141.173, 141.174, and 141.175. These systems

must contact the Division and establish a disinfection benchmark. A system that decides to make a significant change to its disinfection practice, as described in § 141.172(c)(1)(i) through (iv) must obtain prior approval from the Division prior to making such change.

- (b) Criteria for avoiding filtration: [40 CFR, Subpart P § 141.171](#) is hereby incorporated by reference.
 - (c) Disinfection profiling and benchmarking: [40 CFR, Subpart P § 141.172](#) is hereby incorporated by reference.
 - (d) Determination of systems required to profile: [40 CFR, Subpart P § 141.172\(a\)](#) is hereby incorporated by reference.
 - (e) Disinfection profiling: [40 CFR, Subpart P § 141.172\(b\)](#) is hereby incorporated by reference.
 - (f) Disinfection benchmarking: [40 CFR, Subpart P § 141.172\(c\)](#) is hereby incorporated by reference.
- (7) **Filtration.** [40 CFR, Subpart P § 141.173](#) is hereby incorporated by reference.
- (a) Conventional filtration treatment or direct filtration: [40 CFR, Subpart P § 141.173\(a\)](#) is hereby incorporated by reference. (For systems using conventional filtration or direct filtration, the turbidity level of representative samples of a system's filtered water must be less than or equal to 0.3 NTU (Nephelometric Turbidity Units) in at least 95 percent of the measurements taken each month, measured as specified in [40 CFR § 141.74\(a\) and \(c\)](#), and the turbidity level of representative samples of a system's filtered water must at no time exceed 1 NTU, measured as specified in [40 CFR § 141.74\(a\) and \(c\)](#)).
 - (b) Systems using filtration technologies other than conventional filtration treatment, direct filtration, slow sand filtration, or diatomaceous earth filtration: [40 CFR, Subpart P § 141.173\(b\)](#) is hereby incorporated by reference. Beginning January 1, 2002, systems serving at least 10,000 people must meet the requirements for other filtration technologies referenced in 141.173(b).
 - (c) Filtration sampling requirements: [40 CFR, Subpart P § 141.174](#) is hereby incorporated by reference. (A public water system subject to the requirements of this section that provides conventional filtration treatment or direct filtration must conduct continuous monitoring of turbidity for each individual filter using an approved method in [40 CFR § 141.74\(a\)](#) and must calibrate turbidimeters using the procedure specified by the manufacturer. Systems must record the results of individual filter monitoring every fifteen (15) minutes. If there is a failure in the continuous turbidity monitoring equipment, the system must conduct grab

sampling every four (4) hours in lieu of continuous monitoring, but for no more than five (5) working days following the failure of the equipment.)

(8) Filtration Requirements for Fewer than 10,000 Population Water Systems.

Beginning January 14, 2005, public water systems that use surface water or ground water under the direct influence of surface water as a source and serve fewer than 10,000 people must meet the filtration and disinfection requirements in 40 CFR Part 141, Subpart T. This requirement is in addition to complying with requirements in Subpart H of 40 CFR Part 141.

- (a) Beginning January 14, 2005, public water systems that use surface water or ground water under the direct influence of surface water and serve fewer than 10,000 people must meet the filtration requirements specified in [40 CFR §§ 141.550](#) through [141.553](#).
- (b) Other filtration technologies: [40 CFR § 141.73\(d\)](#) is hereby incorporated by reference. Beginning January 14, 2005, systems serving fewer than 10,000 people must meet the requirements for other filtration technologies in [40 CFR §§ 141.550](#) through [141.553](#).
- (c) General requirements: [40 CFR, Subpart T § 141.500](#) is hereby incorporated by reference.
- (d) Additional watershed control requirements for unfiltered systems: [40 CFR, Subpart T §§ 141.520](#) through [141.522](#) is hereby incorporated by reference. This is in addition to the continued requirement to comply with the filtration avoidance criteria in [40 CFR § 141.71](#).
- (e) Disinfection Profile: [40 CFR, Subpart T §§ 141.530](#) through [141.536](#) is hereby incorporated by reference. This requirement applies both to community and non-transient non-community water systems.
- (f) Disinfection benchmark: [40 CFR, Subpart T §§ 141.540](#) through [141.544](#) is hereby incorporated by reference. If you are a subpart H system required to develop a disinfection profile under Rule 391-3-5-.20(10)(e), your system must develop a disinfection benchmark if you decide to make a significant change to your disinfection practice. Before implementing a significant disinfection practice change, a prior approval from the Division must be obtained. Significant changes to disinfection practice include:
 - 1. Changes to the point of disinfection;
 - 2. Changes to the disinfectant(s) used in the treatment plant;
 - 3. Changes to the disinfection process; or

4. Any other modification identified by the Division.
- (g) Combined filter effluent requirements: [40 CFR, Subpart T § 141.550](#) through [141.553](#) is hereby incorporated by reference. This requirement applies to all subpart H systems which serve populations fewer than 10,000, are required to filter, and utilize filtration other than slow sand filtration or diatomaceous earth filtration.
1. For systems using conventional filtration or direct filtration, the turbidity level of representative samples of a system's filtered water must be less than or equal to 0.3 NTU in at least 95 percent of the measurements taken each month, and the maximum turbidity level of representative samples of a system's filtered water must at no time exceed 1 NTU. All measurements must be taken as described in [40 CFR § 141.74\(a\) and \(c\)](#).
 2. For systems using "alternative" filtration (filtration other than slow sand filtration, diatomaceous earth filtration, conventional filtration, or direct filtration), the 95th percentile turbidity value, not to exceed 1 NTU, and the maximum turbidity value, not to exceed 5 NTU, shall be determined by the Division based on the demonstration as described in [40 CFR, Subpart T § 141.552](#). The systems, using pilot plant studies or other means, must demonstrate that the system's filtration, in combination with disinfection treatment, consistently achieves: two-log (99%) removal of *Cryptosporidium* oocysts; three-log (99.9%) removal and/or inactivation of *Giardia lamblia* cysts; and four-log (99.99%) removal and/or inactivation of viruses.
- (h) Individual filter turbidity requirements for systems utilizing conventional filtration or direct filtration: [40 CFR, Subpart T §§ 141.560](#) through [141.564](#) is hereby incorporated by reference. A subpart H public water system subject to the requirements of this Rule must conduct continuous monitoring of turbidity for each individual filter using an approved method in [40 CFR § 141.74\(a\)](#) and must calibrate turbidimeters using the procedure specified by the manufacturer. Systems must record the results of individual filter monitoring every fifteen (15) minutes. If there is a failure in the continuous turbidity monitoring equipment, the system must conduct grab sampling every four (4) hours in lieu of continuous monitoring until the turbidimeter is back on-line. The system has fourteen (14) days to resume continuous monitoring before a violation is incurred.
1. Systems with two or fewer filters may conduct continuous monitoring of combined filter effluent turbidity in lieu of individual filter effluent turbidity monitoring, in accordance with the same requirements set forth in [40 CFR § 141.560\(a\) through \(d\)](#) and [§ 141.561](#).

2. Based on continuous turbidity monitoring of individual filters, the systems are required to take the follow-up actions described in [40 CFR § 141.563\(a\), \(b\) and \(c\)](#).
- (i) Reporting and recordkeeping requirements: [40 CFR, Subpart T §§ 141.570 through 141.571](#) is hereby incorporated by reference. The items which must be reported and the frequency of reporting must be as specified in [40 CFR § 141.570](#). Based on the requirements of subpart T of 40 CFR Part 141, applicable systems must keep several required records, in addition to the recordkeeping required under [40 CFR § 141.75](#). Specifically, the results of individual filter monitoring must be kept for at least three (3) years and the results of any disinfection profiling or benchmarking (including raw data and analysis) must be kept indefinitely.

Rule 391-3-5-.21. Inorganic Chemical Sampling and Analytical Requirements.

- (1) **CWS and NTNCWS Monitoring.** Community and non-transient, non-community water systems shall conduct monitoring to determine compliance with the maximum contaminant levels specified in Rule [391-3-5-.18](#) in accordance with this rule.
- (2) **TNCWS Monitoring.** Transient, non-community water systems shall conduct monitoring to determine compliance with the nitrate and nitrite maximum contaminant levels in Rule [391-3-5-.18](#) in accordance with this rule.
- (3) **Nitrate Monitoring for NCWS with Alternate Limit.** The frequency of monitoring conducted to determine compliance with the maximum contaminant level for Nitrate as specified in Rule [391-3-5-.18\(1\)\(b\)](#) shall be conducted as follows:

- (a) Analyses for all non community water systems (NTNCWS and TNCWS) utilizing surface water sources shall be repeated at yearly intervals. Analyses for all non community water systems (NTNCWS and TNCWS) utilizing only ground water sources shall be repeated at three-year intervals.
 - (b) For any non community water system (NTNCWS and TNCWS) that the Director has granted an alternate nitrate MCL of 20 mg/l pursuant to Rule [391-3-5-.18\(1\)\(b\)](#) the monitoring frequency shall be conducted at intervals determined by the Director.
 - (c) If the result of an analysis made pursuant to paragraph (3) of this Rule indicates that the level of Nitrate listed in Rule [391-3-5-.18\(1\)\(b\)](#) exceeds the maximum contaminant level, the supplier of water shall report to the Division in writing within seven (7) days and initiate three additional analyses at the same sampling point within fourteen (14) days.
 - (d) When the average of four analyses made pursuant to paragraph (3)(c), rounded to the same number of significant figures as the maximum contaminant level for the substance in question, exceeds the maximum contaminant level, the supplier of water shall notify the Division pursuant to Rule [391-3-5-.30](#) and give notice to the public pursuant to Rule [391-3-5-.32](#). Monitoring after public notification shall be at a frequency designated by the Division and shall continue until the maximum contaminant level has not been exceeded in two successive samples or until a monitoring schedule as a condition to a permit, variance, exception or enforcement action shall become effective.
 - (e) If the four analyses are not made pursuant to paragraph (3)(c), the Division will use the analyses available to prepare compliance calculations pursuant to paragraph (3)(d).
 - (f) The Division has the authority to determine compliance or initiate enforcement action based upon analytical results and other information compiled by their sanctioned representatives or agencies.
 - (g) The provisions of paragraphs (3)(c) and (3)(d) notwithstanding, compliance with maximum contaminant for nitrate shall be determined based on the mean of the two analyses. When a level exceeding the maximum contaminant level for nitrate is found, a second analysis shall be initiated within 24 hours and if the mean of the two analyses exceeds the maximum contamination level, the supplier of water shall report the findings to the Director pursuant to Rule [391-3-5-.30](#) and shall notify the public pursuant to Rule [391-3-5-.32](#).
- (4) **Inorganic Monitoring.** Monitoring for inorganic chemicals shall be conducted as follows:

- (a) Groundwater systems shall take a minimum of one sample at every entry point to the distribution system which is representative of each well after treatment (hereafter called a sampling point) beginning in the compliance period starting January 1, 1993. The system shall take each sample at the same sampling point unless conditions make another sampling point more representative of each source or treatment plant.
 - (b) Surface water systems shall take a minimum of one sample at every entry point to the distribution system after any application of treatment or in the distribution system at a point which is representative of each source after treatment (hereafter called a sampling point) beginning in the compliance period starting January 1, 1993. The system shall take each sample at the same sampling point unless conditions make another sampling point more representative of each source or treatment plant. [NOTE: For purposes of this paragraph, surface water systems include systems with a combination of surface and ground sources.]
 - (c) If a system draws water from more than one source and the sources are combined before distribution, the system must sample at an entry point to the distribution system during periods of normal operating conditions (i.e., when water is representative of all sources being used).
 - (d) The Division may reduce the total number of samples, which must be analyzed by allowing the use of compositing. Composite samples shall be collected and analyzed in accordance with [40 CFR, Part 141.23\(a\)\(4\)](#). In the case of arsenic, if a PWS supplies water to one or more other PWSs and the interconnection justifies treating them as a single system for monitoring purposes, then the PWSs receiving the supplied water may have their arsenic monitoring requirements modified.
- (5) **Asbestos Monitoring.** The frequency of monitoring conducted to determine compliance with the maximum contaminant level for asbestos specified in Rule [391-3-5-.18](#) shall be conducted as follows:
- (a) Community or non-transient, non-community water systems are required to monitor for asbestos during the first three-year compliance period of each nine-year compliance cycle beginning in the compliance period starting January 1, 1993.
 - (b) If the system believes it is not vulnerable to either asbestos contamination in its source water or due to corrosion of asbestos-cement pipe, or both, it may apply to the Division for a waiver of the monitoring requirements in paragraph (5)(a) above. If the waiver is granted by the Division, the system is not required to monitor.
 - (c) The Division may grant a waiver based on a consideration of the following factors:

1. Potential asbestos contamination of the water source.
 2. The use of asbestos-cement pipe for finished water distribution and the corrosive nature of the water.
- (d) A waiver remains in effect until the completion of the three-year compliance period. Systems not receiving a waiver must monitor in accordance with the provisions of paragraph (5)(a).
 - (e) A system vulnerable to asbestos contamination due solely to corrosion of asbestos-cement pipe shall take one sample at a tap served by asbestos-cement pipe and under conditions where asbestos contamination is most likely to occur.
 - (f) A system vulnerable to asbestos contamination due solely to source water shall monitor in accordance with the provision of paragraph (4).
 - (g) A system vulnerable to asbestos contamination due both to its source water supply and corrosion of asbestos-cement pipe shall take one sample at a tap served by asbestos-cement pipe and under conditions where asbestos contamination is most likely to occur.
 - (h) A system which exceeds the maximum contaminant levels as determined in Rule 391-3-5-.21(12) shall monitor quarterly beginning in the next quarter after the violation occurred.
 - (i) The Division may decrease the quarterly monitoring requirement to the frequency specified in paragraph (5)(a) provided the Division has determined that the system is reliably and consistently below the maximum contaminant level. In no case can the Division make this determination unless a groundwater system takes a minimum of two quarterly samples and a surface (or combined surface/ground) water system takes a minimum of four quarterly samples.
 - (j) If monitoring data collected after January 1, 1990 are generally consistent with the requirements of Rule 391-3-5-.21(5) then the Division may allow systems to use that data to satisfy the monitoring requirement for the initial compliance period beginning January 1, 1993.
- (6) **Other Inorganics Monitoring.** The frequency of monitoring conducted to determine compliance with the maximum contaminant levels in Rule [391-3-5-.18](#) for antimony, arsenic, barium, beryllium, cadmium, chromium, cyanide, fluoride, mercury, nickel, selenium and thallium shall be as follows:
- (a) Groundwater systems shall take one sample at each sampling point during each compliance period beginning in the compliance period starting January 1, 1993.

Surface water systems (or combined surface/ground) shall take one sample annually at each sampling point beginning January 1, 1993.

- (b) The system may apply to the Division for a waiver from the monitoring frequencies specified in paragraph (6)(a).
